(l) *Transfers of partnership interests.* The capital accounts of the partners will not be considered to be determined and maintained in accordance with the rules of this paragraph (b)(2)(iv) unless, upon the transfer of all or a part of an interest in the partnership, the capital account of the transferor that is attributable to the transferred interest carries over to the transferee partner. (See paragraph (b)(2)(iv)(m) of this section for rules concerning the effect of a section 754 election on the capital accounts of the partners.) If the transfer of an interest in a partnership causes a termination of the partnership under section 708(b)(1)(B), the capital account of the transferee partner and the capital accounts of the other partners of the terminated partnership carry over to the new partnership that is formed as a result of the termination of the

partnership under § 1.708-1(b)(1)(iv). Moreover, the deemed contribution of assets and liabilities by the terminated partnership to a new partnership and the deemed liquidation of the terminated partnership that occur under § 1.708-1(b)(1)(iv) are disregarded for purposes of this paragraph (b)(2)(iv). See *Example 13* of paragraph (b)(5) of this section and the example in § 1.708-1(b)(1)(iv). The previous three sentences apply to terminations of partnerships under section 708(b)(1)(B) occurring on or after May 9, 1997; however, the sentences may be applied to terminations occurring on or after May 9, 1996, provided that the partnership and its partners apply the sentences to the termination in a consistent manner.

(m) *Section 754 elections—(1) In general.* The capital accounts of the partners will not be considered to be determined and maintained in accordance with the rules of this paragraph (b)(2)(iv) unless, upon adjustment to the adjusted tax basis of partnership property under section 732, 734, or 743, the capital accounts of the partners are adjusted as provided in this paragraph (b)(2)(iv)(m).

(2) *Section 743 adjustments.* In the case of a transfer of all or a part of an interest in a partnership that has a section 754 election in effect for the partnership taxable year in which such transfer occurs, adjustments to the adjusted tax basis of partnership property under section 743 shall not be reflected in the capital account of the transferee partner or on the books of the partnership, and subsequent capital account adjustments for distributions (see paragraph (b)(2)(iv)(e)(1) of this section) and for depreciation, depletion, amortization, and gain or loss with respect to such property will disregard the effect of such basis adjustment. The preceding sentence shall not apply to the extent such basis adjustment is allocated to the common basis of partnership property under paragraph (b)(1) of § 1.734-2; in these cases, such basis adjustment shall, except as provided in paragraph (b)(2)(iv)(m)(5) of this section, give rise to adjustments to the capital accounts of the partners in accordance with their interests in the partnership under

paragraph (b)(3) of this section. See examples 13 (iii) and (iv) of paragraph (b)(5) of this section.

(3) *Section 732 adjustments.* In the case of a transfer of all or a part of an interest in a partnership that does not have a section 754 election in effect for the partnership taxable year in which such transfer occurs, adjustments to the adjusted tax basis of partnership property under section 732(d) will be treated in the capital accounts of the partners in the same manner as section 743 basis adjustments are treated under paragraph (b)(2)(iv)(m)(2) of this section.

(4) *Section 734 adjustments.* Except as provided in paragraph (b)(2)(iv)(m)(5) of this section, in the case of a distribution of property in liquidation of a partner's interest in the partnership by a partnership that has a section 754 election in effect for the partnership taxable year in which the distribution occurs, the partner who receives the distribution that gives rise to the adjustment to the adjusted tax basis of partnership property under section 734 shall have a corresponding adjustment made to his capital account. If such distribution is made other than in liquidation of a partner's interest in the partnership, however, except as provided in paragraph (b)(2)(iv)(m)(5) of this section, the capital accounts of the partners shall be adjusted by the amount of the adjustment to the adjusted tax basis of partnership property under section 734, and such capital account adjustment shall be shared among the partners in the manner in which the unrealized income and gain that is displaced by such adjustment would have been shared if the property whose basis is adjusted were sold immediately prior to such adjustment for its recomputed adjusted tax basis.

(5) *Limitations on adjustments.* Adjustments may be made to the capital account of a partner (or his successor in interest) in respect of basis adjustments to partnership property under sections 732, 734, and 743 only to the extent that such basis adjustments (i) are permitted to be made to one or more items of partnership property under section 755, and (ii) result in an increase or a decrease in the amount at which such property is carried on the partnership's balance sheet, as com-

puted for book purposes. For example, if the book value of partnership property exceeds the adjusted tax basis of such property, a basis adjustment to such property may be reflected in a partner's capital account only to the extent such adjustment exceeds the difference between the book value of such property and the adjusted tax basis of such property prior to such adjustment.

(n) *Partnership level characterization.* Except as otherwise provided in paragraph (b)(2)(iv)(k) of this section, the capital accounts of the partners will not be considered to be determined and maintained in accordance with the rules of this paragraph (b)(2)(iv) unless adjustments to such capital accounts in respect of partnership income, gain, loss, deduction, and section 705(a)(2)(B) expenditures (or item thereof) are made with reference to the Federal tax treatment of such items (and in the case of book items, with reference to the Federal tax treatment of the corresponding tax items) at the partnership level, without regard to any requisite or elective tax treatment of such items at the partner level (for example, under section 58(i)). However, a partnership that incurs mining exploration expenditures will determine the Federal tax treatment of income, gain, loss, and deduction with respect to the property to which such expenditures relate at the partnership level only after first taking into account the elections made by its partners under section 617 and section 703(b)(4).

(o) *Guaranteed payments.* Guaranteed payments to a partner under section 707(c) cause the capital account of the recipient partner to be adjusted only to the extent of such partner's distributive share of any partnership deduction, loss, or other downward capital account adjustment resulting from such payment.

(p) *Minor discrepancies.* Discrepancies between the balances in the respective capital accounts of the partners and the balances that would be in such respective capital accounts if they had been determined and maintained in accordance with this paragraph (b)(2)(iv) will not adversely affect the validity of

an allocation, provided that such discrepancies are minor and are attributable to good faith error by the partnership.

(q) *Adjustments where guidance is lacking.* If the rules of this paragraph (b)(2)(iv) fail to provide guidance on how adjustments to the capital accounts of the partners should be made to reflect particular adjustments to partnership capital on the books of the partnership, such capital accounts will not be considered to be determined and maintained in accordance with those rules unless such capital account adjustments are made in a manner that (1) maintains equality between the aggregate governing capital accounts of the partners and the amount of partnership capital reflected on the partnership's balance sheet, as computed for book purposes, (2) is consistent with the underlying economic arrangement of the partners, and (3) is based, wherever practicable, on Federal tax accounting principles.

(r) *Restatement of capital accounts.* With respect to partnerships that began operating in a taxable year beginning before May 1, 1986, the capital accounts of the partners of which have not been determined and maintained in accordance with the rules of this paragraph (b)(2)(iv) since inception, such capital accounts shall not be considered to be determined and maintained in accordance with the rules of this paragraph (b)(2)(iv) for taxable years beginning after April 30, 1986, unless either—

(1) Such capital accounts are adjusted, effective for the first partnership taxable year beginning after April 30, 1986, to reflect the fair market value of partnership property as of the first day of such taxable year, and in connection with such adjustment, the rules contained in paragraph (b)(2)(iv)(f) (2), (3), and (4) of this section are satisfied, or

(2) The differences between the balance in each partner's capital account and the balance that would be in such partner's capital account if capital accounts had been determined and maintained in accordance with this paragraph (b)(2)(iv) throughout the full term of the partnership are not significant (for example, such differences are

solely attributable to a failure to provide for treatment of section 709 expenses in accordance with the rules of paragraph (b)(2)(iv)(i)(2) of this section or to a failure to follow the rules in paragraph (b)(2)(iv)(m) of this section), and capital accounts are adjusted to bring them into conformity with the rules of this paragraph (b)(2)(iv) no later than the end of the first partnership taxable year beginning after April 30, 1986.

(3) With respect to a partnership that began operating in a taxable year beginning before May 1, 1986, modifications to the partnership agreement adopted on or before November 1, 1988, to make the capital account adjustments required to comply with this paragraph, and otherwise to satisfy the requirements of this paragraph, will be treated as if such modifications were included in the partnership agreement before the end of the first partnership taxable year beginning after April 30, 1986. However, compliance with the previous sentences will have no bearing on the validity of allocations that relate to partnership taxable years beginning before May 1, 1986.

(s) *Adjustments on the exercise of a noncompensatory option.* A partnership agreement may grant a partner, on the exercise of a noncompensatory option (as defined in §1.721-2(f)), a right to share in partnership capital that exceeds (or is less than) the sum of the consideration paid to the partnership to acquire and exercise such option. Where such an agreement exists, capital accounts will not be considered to be determined and maintained in accordance with the rules of this paragraph (b)(2)(iv) unless the following requirements are met:

(1) In lieu of revaluing partnership property under paragraph (b)(2)(iv)(f) of this section immediately before the exercise of the option, the partnership revalues partnership property in accordance with the provisions of paragraphs (b)(2)(iv)(f)(1) through (f)(4) of this section immediately after the exercise of the option.

(2) In determining the capital accounts of the partners (including the exercising partner) under paragraph (b)(2)(iv)(s)(1) of this section, the partnership first allocates any unrealized

income, gain, or loss in partnership property (that has not been reflected in the capital accounts previously) to the exercising partner to the extent necessary to reflect that partner's right to share in partnership capital under the partnership agreement, and then allocates any remaining unrealized income, gain, or loss (that has not been reflected in the capital accounts previously) to the existing partners, to reflect the manner in which the unrealized income, gain, or loss in partnership property would be allocated among those partners if there were a taxable disposition of such property for its fair market value on that date. For purposes of the preceding sentence, if the exercising partner's initial capital account as determined under § 1.704-1(b)(2)(iv)(b) and (d)(4) of this section would be less than the amount that reflects the exercising partner's right to share in partnership capital under the partnership agreement, then only income or gain may be allocated to the exercising partner from partnership properties with unrealized appreciation, in proportion to their respective amounts of unrealized appreciation. If the exercising partner's initial capital account, as determined under § 1.704-1(b)(2)(iv)(b) and (d)(4) of this section, would be greater than the amount that reflects the exercising partner's right to share in partnership capital under the partnership agreement, then only loss may be allocated to the exercising partner from partnership properties with unrealized loss, in proportion to their respective amounts of unrealized loss. However, any allocation must take into account the economic arrangement of the partners with respect to the property.

(3) If, after making the allocations described in paragraph (b)(2)(iv)(s)(2) of this section, the exercising partner's capital account does not reflect that partner's right to share in partnership capital under the partnership agreement, then the partnership reallocates partnership capital between the existing partners and the exercising partner so that the exercising partner's capital account reflects the exercising partner's right to share in partnership capital under the partnership agreement (a capital account reallocation). Any

increase or decrease in the capital accounts of existing partners that occurs as a result of a capital account reallocation under this paragraph (b)(2)(iv)(s)(3) must be allocated among the existing partners in accordance with the principles of this section. See *Example 32* of paragraph (b)(5) of this section.

(4) The partnership agreement requires corrective allocations so as to take into account all capital account reallocations made under paragraph (b)(2)(iv)(s)(3) of this section (see paragraph (b)(4)(x) of this section). See *Example 32* of paragraph (b)(5) of this section.

(3) *Partner's interest in the partnership*—(i) *In general.* References in section 704(b) and this paragraph to a partner's interest in the partnership, or to the partners' interests in the partnership, signify the manner in which the partners have agreed to share the economic benefit or burden (if any) corresponding to the income, gain, loss, deduction, or credit (or item thereof) that is allocated. Except with respect to partnership items that cannot have economic effect (such as non-recourse deductions of the partnership), this sharing arrangement may or may not correspond to the overall economic arrangement of the partners. Thus, a partner who has a 50 percent overall interest in the partnership may have a 90 percent interest in a particular item of income or deduction. (For example, in the case of an unexpected downward adjustment to the capital account of a partner who does not have a deficit make-up obligation that causes such partner to have a negative capital account, it may be necessary to allocate a disproportionate amount of gross income of the partnership to such partner for such year so as to bring that partner's capital account back up to zero.) The determination of a partner's interest in a partnership shall be made by taking into account all facts and circumstances relating to the economic arrangement of the partners.

(ii) *Factors considered.* In determining a partner's interest in the partnership, the following factors are among those that will be considered:

(a) The partners' relative contributions to the partnership,

(b) The interests of the partners in economic profits and losses (if different than that in taxable income or loss),

(c) The interests of the partners in cash flow and other non-liquidating distributions, and

(d) The rights of the partners to distributions of capital upon liquidation.

The provisions of this subparagraph (b)(3) are illustrated by examples (1)(i) and (ii), (4)(i), (5)(i) and (ii), (6), (7), (8), (10)(ii), (16)(i), and (19)(iii) of paragraph (b)(5) of this section. See paragraph (b)(4)(i) of this section concerning rules for determining the partners' interests in the partnership with respect to certain tax items.

(iii) *Certain determinations.* If—

(a) Requirements (1) and (2) of paragraph (b)(2)(ii)(b) of this section are satisfied, and

(b) All or a portion of an allocation of income, gain, loss, or deduction made to a partner for a partnership taxable year does not have economic effect under paragraph (b)(2)(ii) of this section.

the partners' interests in the partnership with respect to the portion of the allocation that lacks economic effect will be determined by comparing the manner in which distributions (and contributions) would be made if all partnership property were sold at book value and the partnership were liquidated immediately following the end of the taxable year to which the allocation relates with the manner in which distributions (and contributions) would be made if all partnership property were sold at book value and the partnership were liquidated immediately following the end of the prior taxable year, and adjusting the result for the items described in (4), (5), and (6) of paragraph (b)(2)(ii)(d) of this section. A determination made under this paragraph (b)(3)(iii) will have no force if the economic effect of valid allocations made in the same manner is insubstantial under paragraph (b)(2)(iii) of this section. See examples 1 (iv), (v), and (vi), and 15 (ii) and (iii) of paragraph (b)(5) of this section.

(iv) *Special rule for creditable foreign tax expenditures.* In determining whether an allocation of a partnership item

is in accordance with the partners' interests in the partnership, the allocation of the creditable foreign tax expenditure (CFTE) (as defined in paragraph (b)(4)(viii)(b) of this section) must be disregarded. This paragraph (b)(3)(iv) shall not apply to the extent the partners to whom such taxes are allocated reasonably expect to claim a deduction for such taxes in determining their U.S. tax liabilities.

(4) *Special rules*—(i) *Allocations to reflect revaluations.* If partnership property is, under paragraphs (b)(2)(iv)(d) or (b)(2)(iv)(f) of this section, properly reflected in the capital accounts of the partners and on the books of the partnership at a book value that differs from the adjusted tax basis of such property, then depreciation, depletion, amortization, and gain or loss, as computed for book purposes, with respect to such property will be greater or less than the depreciation, depletion, amortization, and gain or loss, as computed for tax purposes, with respect to such property. In these cases the capital accounts of the partners are required to be adjusted solely for allocations of the book items to such partners (see paragraph (b)(2)(iv)(g) of this section), and the partners' shares of the corresponding tax items are not independently reflected by further adjustments to the partners' capital accounts. Thus, separate allocations of these tax items cannot have economic effect under paragraph (b)(2)(ii)(b)(I) of this section, and the partners' distributive shares of such tax items must (unless governed by section 704(c)) be determined in accordance with the partners' interests in the partnership. These tax items must be shared among the partners in a manner that takes account of the variation between the adjusted tax basis of such property and its book value in the same manner as variations between the adjusted tax basis and fair market value of property contributed to the partnership are taken into account in determining the partners' shares of tax items under section 704(c). See examples 14 and 18 of paragraph (b)(5) of this section.

(ii) *Credits.* Allocations of tax credits and tax credit recapture are not reflected by adjustments to the partners' capital accounts (except to the extent

that adjustments to the adjusted tax basis of partnership section 38 property in respect of tax credits and tax credit recapture give rise to capital account adjustments under paragraph (b)(2)(iv)(j) of this section). Thus, such allocations cannot have economic effect under paragraph (b)(2)(ii)(b)(I) of this section, and the tax credits and tax credit recapture must be allocated in accordance with the partners' interests in the partnership as of the time the tax credit or credit recapture arises. With respect to the investment tax credit provided by section 38, allocations of cost or qualified investment made in accordance with paragraph (f) of § 1.46-3 and paragraph (a)(4)(iv) of § 1.48-8 shall be deemed to be made in accordance with the partners' interests in the partnership. With respect to other tax credits, if a partnership expenditure (whether or not deductible) that gives rise to a tax credit in a partnership taxable year also gives rise to valid allocations of partnership loss or deduction (or other downward capital account adjustments) for such year, then the partners' interests in the partnership with respect to such credit (or the cost giving rise thereto) shall be in the same proportion as such partners' respective distributive shares of such loss or deduction (and adjustments). See example 11 of paragraph (b)(5) of this section. Identical principles shall apply in determining the partners' interests in the partnership with respect to tax credits that arise from receipts of the partnership (whether or not taxable).

(iii) *Excess percentage depletion.* To the extent the percentage depletion in respect of an item of depletable property of the partnership exceeds the adjusted tax basis of such property, allocations of such excess percentage depletion are not reflected by adjustments to the partners' capital accounts. Thus, such allocations cannot have economic effect under paragraph (b)(2)(ii)(b)(I) of this section, and such excess percentage depletion must be allocated in accordance with the partners' interests in the partnership. The partners' interests in the partnership for a partnership taxable year with respect to such excess percentage depletion shall be in the same proportion as

such partners' respective distributive shares of gross income from the depletable property (as determined under section 613(c)) for such year. See example 12 of paragraph (b)(5) of this section. See paragraphs (b)(2)(iv)(k) and (b)(4)(v) of this section for special rules concerning oil and gas properties of the partnership.

(iv) *Allocations attributable to non-recourse liabilities.* The rules for allocations attributable to nonrecourse liabilities are contained in § 1.704-2.

(v) *Allocations under section 613A(c)(7)(D).* Allocations of the adjusted tax basis of a partnership oil or gas property are controlled by section 613A(c)(7)(D) and the regulations thereunder. However, if the partnership agreement provides for an allocation of the adjusted tax basis of an oil or gas property among the partners, and such allocation is not otherwise governed under section 704(c) (or related principles under paragraph (b)(4)(i) of this section), that allocation will be recognized as being in accordance with the partners' interests in partnership capital under section 613A(c)(7)(D), provided (a) such allocation does not give rise to capital account adjustments under paragraph (b)(2)(iv)(k) of this section, the economic effect of which is insubstantial (as determined under paragraph (b)(2)(iii) of this section), and (b) all other material allocations and capital account adjustments under the partnership agreement are recognized under this paragraph (b). Otherwise, such adjusted tax basis must be allocated among the partners pursuant to section 613A(c)(7)(D) in accordance with the partners' actual interests in partnership capital or income. For purposes of section 613A(c)(7)(D) the partners' allocable shares of the amount realized upon the partnership's taxable disposition of an oil or gas property will, except to the extent governed by section 704(c) (or related principles under paragraph (b)(4)(i) of this section), be determined under this paragraph (b)(4)(v). If, pursuant to paragraph (b)(2)(iv)(k)(2) of this section, the partners' capital accounts are adjusted to reflect the simulated depletion of an oil or gas property of the partnership,

the portion of the total amount realized by the partnership upon the taxable disposition of such property that represents recovery of its simulated adjusted tax basis therein will be allocated to the partners in the same proportion as the aggregate adjusted tax basis of such property was allocated to such partners (or their predecessors in interest). If, pursuant to paragraph (b)(2)(iv)(k)(3) of this section, the partners' capital accounts are adjusted to reflect the actual depletion of an oil or gas property of the partnership, the portion of the total amount realized by the partnership upon the taxable disposition of such property that equals the partners' aggregate remaining adjusted basis therein will be allocated to the partners in proportion to their respective remaining adjusted tax bases in such property. An allocation provided by the partnership agreement of the portion of the total amount realized by the partnership on its taxable disposition of an oil or gas property that exceeds the portion of the total amount realized allocated under either of the previous two sentences (whichever is applicable) shall be deemed to be made in accordance with the partners' allocable shares of such amount realized, provided (c) such allocation does not give rise to capital account adjustments under paragraph (b)(2)(iv)(k) of this section the economic effect of which is insubstantial (as determined under paragraph (b)(2)(ii) of this section), and (d) all other allocations and capital account adjustments under the partnership agreement are recognized under this paragraph. Otherwise, the partners' allocable shares of the total amount realized by the partnership on its taxable disposition of an oil or gas property shall be determined in accordance with the partners' interests in the partnership under paragraph (b)(3) of this section. See example 19 of paragraph (b)(5) of this section. (See paragraph (b)(2)(iv)(k) of this section for the determination of appropriate adjustments to the partners' capital accounts relating to section 613A(c)(7)(D).)

(vi) *Amendments to partnership agreement.* If an allocation has substantial economic effect under paragraph (b)(2) of this section or is deemed to be made

in accordance with the partners' interests in the partnership under paragraph (b)(4) of this section under the partnership agreement that is effective for the taxable year to which such allocation relates, and such partnership agreement thereafter is modified, both the tax consequences of the modification and the facts and circumstances surrounding the modification will be closely scrutinized to determine whether the purported modification was part of the original agreement. If it is determined that the purported modification was part of the original agreement, prior allocations may be reallocated in a manner consistent with the modified terms of the agreement, and subsequent allocations may be reallocated to take account of such modified terms. For example, if a partner is obligated by the partnership agreement to restore the deficit balance in his capital account (or any limited dollar amount thereof) in accordance with requirement (3) of paragraph (b)(2)(ii)(b) of this section and, thereafter, such obligation is eliminated or reduced (other than as provided in paragraph (b)(2)(ii)(f) of this section), or is not complied with in a timely manner, such elimination, reduction, or non-compliance may be treated as if it always were part of the partnership agreement for purposes of making any reallocations and determining the appropriate limitations period.

(vii) *Recapture.* For special rules applicable to the allocation of recapture income or credit, see paragraph (e) of §1.1245-1, paragraph (f) of §1.1250-1, paragraph (c) of §1.1254-1, and paragraph (a) of §1.47-6.

(viii) *Allocation of creditable foreign taxes—(a) In general.* Allocations of creditable foreign taxes do not have substantial economic effect within the meaning of paragraph (b)(2) of this section and, accordingly, such expenditures must be allocated in accordance with the partners' interests in the partnership. See paragraph (b)(3)(iv) of this section. An allocation of a creditable foreign tax expenditure (CFTE) will be deemed to be in accordance with the partners' interests in the partnership if—

(1) The CFTE is allocated (whether or not pursuant to an express provision in

the partnership agreement) and reported on the partnership return in proportion to the distributive shares of income to which the CFTE relates; and

(2) Allocations of all other partnership items that, in the aggregate, have a material effect on the amount of CFTEs allocated to a partner pursuant to paragraph (b)(4)(viii)(a)(I) of this section are valid.

(b) *Creditable foreign tax expenditures (CFTEs).* For purposes of this section, a CFTE is a foreign tax paid or accrued by a partnership that is eligible for a credit under section 901(a) or an applicable U.S. income tax treaty. A foreign tax is a CFTE for these purposes without regard to whether a partner receiving an allocation of such foreign tax elects to claim a credit for such tax. Foreign taxes paid or accrued by a partner with respect to a distributive share of partnership income, and foreign taxes deemed paid under section 902 or 960 by a corporate partner with respect to stock owned, directly or indirectly, by or for a partnership, are not taxes paid or accrued by a partnership and, therefore, are not CFTEs subject to the rules of this section. See paragraphs (e) and (f) of §1.901-2 for rules for determining when and by whom a foreign tax is paid or accrued.

(c) *Income to which CFTEs relate—(1) In general.* For purposes of paragraph (b)(4)(viii)(a) of this section, CFTEs are related to net income in the partnership's CFTE category or categories to which the CFTE is allocated and apportioned in accordance with the rules of paragraph (b)(4)(viii)(d) of this section. Paragraph (b)(4)(viii)(c)(2) of this section provides rules for determining a partnership's CFTE categories. Paragraph (b)(4)(viii)(c)(3) of this section provides rules for determining the net income in each CFTE category. Paragraph (b)(4)(viii)(c)(4) of this section provides guidance in determining a partner's distributive share of income in a CFTE category. Paragraph (b)(4)(viii)(c)(5) of this section provides a special rule for allocating CFTEs when a partnership has no net income in a CFTE category.

(2) *CFTE category—(i) Income from activities.* A CFTE category is a category of net income (or loss) attributable to one or more activities of the partner-

ship. Net income (or loss) from all the partnership's activities shall be included in a single CFTE category unless the allocation of net income (or loss) from one or more activities differs from the allocation of net income (or loss) from other activities, in which case income from each activity or group of activities that is subject to a different allocation shall be treated as net income (or loss) in a separate CFTE category.

(ii) *Different allocations.* Different allocations of net income (or loss) generally will result from provisions of the partnership agreement providing for different sharing ratios for net income (or loss) from separate activities. Different allocations of net income (or loss) from separate activities generally will also result if any partnership item is shared in a different ratio than any other partnership item. A guaranteed payment described in paragraph (b)(4)(viii)(c)(3)(ii) of this section, gross income allocation, or other preferential allocation will result in different allocations of net income (or loss) from separate activities only if the amount of the payment or the allocation is determined by reference to income from less than all of the partnership's activities. For purposes of this paragraph (b)(4)(viii)(c)(2), a partnership item shall not include any item that is excluded from income attributable to an activity pursuant to the second sentence of paragraph (b)(4)(viii)(c)(3)(ii) of this section (relating to allocations or payments that result in a deduction under foreign law).

(iii) *Activity.* Whether a partnership has one or more activities, and the scope of each activity, shall be determined in a reasonable manner taking into account all the facts and circumstances. In evaluating whether aggregating or disaggregating income from particular business or investment operations constitutes a reasonable method of determining the scope of an activity, the principal consideration is whether the proposed determination has the effect of separating CFTEs from the related foreign income. Accordingly, relevant considerations include whether the partnership conducts business in more than one geographic

location or through more than one entity or branch, and whether certain types of income are exempt from foreign tax or subject to preferential foreign tax treatment. In addition, income from a divisible part of a single activity shall be treated as income from a separate activity if necessary to prevent separating CFTEs from the related foreign income. The partnership's activities must be determined consistently from year to year absent a material change in facts and circumstances.

(3) *Net income in a CFTE category*—(i) *In general.* The net income in a CFTE category means the net income for U.S. Federal income tax purposes, determined by taking into account all partnership items attributable to the relevant activity or group of activities, including items of gross income, gain, loss, deduction, and expense and items allocated pursuant to section 704(c). The items of gross income attributable to an activity shall be determined in a consistent manner under any reasonable method taking into account all the facts and circumstances. Except as otherwise provided below, expenses, losses or other deductions shall be allocated and apportioned to gross income attributable to an activity in accordance with the rules of §§1.861-8 and 1.861-8T. Under these rules, if an expense, loss or other deduction is allocated to gross income from more than one activity, such expense, loss or deduction must be apportioned among each such activity using a reasonable method that reflects to a reasonably close extent the factual relationship between the deduction and the gross income from such activities. See §1.861-8T(c). For purposes of determining net income in a CFTE category, the partnership's interest expense and research and experimental expenditures described in section 174 may be allocated and apportioned under any reasonable method, including but not limited to the methods prescribed in §1.861-9 through §1.861-13T (interest expense) and §1.861-17 (research and experimental expenditures). For purposes of determining the net income attributable to any activity of a branch, the only items of gross income taken into account in applying this paragraph (b)(4)(viii)(c)(3) are those items of gross

income recognized by the branch for U.S. income tax purposes. See paragraph (b)(5) *Example 24* of this section (relating to inter-branch payments).

(ii) *Special rules.* Income attributable to an activity shall include the amount included in a partner's income as a guaranteed payment (within the meaning of section 707(c)) from the partnership to the extent that the guaranteed payment is not deductible by the partnership under foreign law. See paragraph (b)(5) *Example 25 (iv)* of this section. Income attributable to an activity shall not include an item of partnership income to the extent the allocation of such item of income (or payment thereof) results in a deduction under foreign law. See paragraph (b)(5) *Example 25 (iii)* and *(iv)* of this section. Similarly, income attributable to an activity shall not include net income that foreign law would exclude from the foreign tax base as a result of the status of a partner. See paragraph (b)(5) *Example 27* of this section.

(4) *Distributive shares of income.* For purposes of paragraph (b)(4)(viii)(a)(I) of this section, distributive share of income means the net income from each CFTE category, determined in accordance with paragraph (b)(4)(viii)(c)(3) of this section, that is allocated to a partner. A guaranteed payment shall be treated as a distributive share of income for purposes of paragraph (b)(4)(viii)(a)(I) of this section to the extent that the guaranteed payment is treated as income attributable to an activity pursuant to paragraph (b)(4)(viii)(c)(3)(ii) of this section. See paragraph (b)(5) *Example 25 (iv)* of this section. If more than one partner receives positive income allocations (income in excess of expenses) from a CFTE category, which in the aggregate exceed the total net income in the CFTE category, then for purposes of paragraph (b)(4)(viii)(a)(I) of this section such partner's distributive share of income from the CFTE category shall equal the partner's positive income allocation from the CFTE category, divided by the aggregate positive income allocations from the CFTE category, multiplied by the net income in the CFTE category.

(5) *No net income in a CFTE category.* If a CFTE is allocated or apportioned

to a CFTE category that does not have net income for the year in which the foreign tax is paid or accrued, the CFTE shall be deemed to relate to the aggregate of the net income (disregarding net losses) recognized by the partnership in that CFTE category in each of the three preceding taxable years. Accordingly, except as provided below, such CFTE must be allocated in the current taxable year in the same proportion as the allocation of the aggregate net income for the prior three-year period in order to satisfy the requirements of paragraph (b)(4)(viii)(a)(I) of this section. If the partnership does not have net income in the applicable CFTE category in either the current year or any of the previous three taxable years, the CFTE must be allocated in the same proportion that the partnership reasonably expects to allocate the aggregate net income (disregarding net losses) in the CFTE category for the succeeding three taxable years. If the partnership does not reasonably expect to have net income in the CFTE category for the succeeding three years and the partnership has net income in one or more other CFTE categories for the year in which the foreign tax is paid or accrued, the CFTE shall be deemed to relate to such other net income and must be allocated in proportion to the allocations of such other net income. If any CFTE is not allocated pursuant to the above provisions of this paragraph then the CFTE must be allocated in proportion to the partners' outstanding capital contributions.

(d) *Allocation and apportionment of CFTEs to CFTE categories*—(1) *In general.* CFTEs are allocated and apportioned to CFTE categories in accordance with the principles of § 1.904-6. Under these principles, a CFTE is related to income in a CFTE category if the income is included in the base upon which the foreign tax is imposed. In accordance with § 1.904-6(a)(1)(ii) as modified by this paragraph (b)(4)(viii)(d), if the foreign tax base includes income in more than one CFTE category, the CFTEs are apportioned among the CFTE categories based on the relative amounts of taxable income computed under foreign law in each CFTE category. For purposes of this paragraph

(b)(4)(viii)(d), references in § 1.904-6 to a separate category or separate categories shall mean “CFTE category” or “CFTE categories” and the rules in § 1.904-6(a)(1)(ii) are modified as follows:

(i) The related party interest expense rule in § 1.904-6(a)(1)(ii) shall not apply in determining the amount of taxable income computed under foreign law in a CFTE category.

(ii) If foreign law does not provide for the direct allocation or apportionment of expenses, losses or other deductions allowed under foreign law to a CFTE category of income, then such expenses, losses or other deductions must be allocated and apportioned to gross income as determined under foreign law in a manner that is consistent with the allocation and apportionment of such items for purposes of determining the net income in the CFTE categories for U.S. tax purposes pursuant to paragraph (b)(4)(viii)(c)(3) of this section.

(2) *Timing and base differences.* A foreign tax imposed on an item that would be income under U.S. tax principles in another year (a timing difference) is allocated to the CFTE category that would include the income if the income were recognized for U.S. tax purposes in the year in which the foreign tax is imposed. A foreign tax imposed on an item that would not constitute income under U.S. tax principles in any year (a base difference) is allocated to the CFTE category that includes the partnership items attributable to the activity with respect to which the foreign tax is imposed. See paragraph (b)(5) *Example 23* of this section.

(3) [Reserved] For further guidance, see § 1.704-1T(b)(4)(viii)(d)(3).

(ix) *Allocations with respect to non-compensatory options*—(a) *In general.* A partnership agreement may grant to a partner that exercises a noncompensatory option (as defined in § 1.721-2(f)) a right to share in partnership capital that exceeds (or is less than) the sum of the amounts paid to the partnership to acquire and exercise the option. In such a case, allocations of income, gain, loss, and deduction to the partners while the noncompensatory option is outstanding cannot have economic effect because, if the noncompensatory

option is exercised, the exercising partner, rather than the existing partners, may receive the economic benefit or bear the economic detriment associated with that income, gain, loss, or deduction. However, allocations of partnership income, gain, loss, and deduction to the partners while the noncompensatory option is outstanding will be deemed to be in accordance with the partners' interests in the partnership only if—

(1) The holder of the noncompensatory option is not treated as a partner under § 1.761-3;

(2) The partnership agreement requires that, while a noncompensatory option is outstanding, the partnership comply with the rules of paragraph (b)(2)(iv)(f) of this section and that, on the exercise of the noncompensatory option, the partnership comply with the rules of paragraph (b)(2)(iv)(s) of this section; and

(3) All material allocations and capital account adjustments under the partnership agreement would be respected under section 704(b) if there were no outstanding noncompensatory options issued by the partnership. See *Examples 31 through 35* of paragraph (b)(5) of this section.

(b) *Substantial economic effect under sections 168(h) and 514(c)(9)(E)(i)(II)*. An allocation of partnership income, gain, loss, or deduction to the partners will be deemed to have substantial economic effect for purposes of sections 168(h) and 514(c)(9)(E)(i)(II) if—

(1) The allocation would meet the substantial economic effect requirements of paragraph (b)(2) of this section if there were no outstanding noncompensatory options issued by the partnership; and

(2) The partnership satisfies the requirements of paragraph (b)(4)(ix)(a)(I), (2), and (3) of this section.

(x) *Corrective allocations—(a)—In general*. If partnership capital is reallocated between existing partners and a partner exercising a noncompensatory option under paragraph (b)(2)(iv)(s)(3) of this section (a capital account reallocation), then the partnership must, beginning with the taxable year of the exercise and in all succeeding taxable years until the required allocations are fully taken into account, make correc-

tive allocations so as to take into account the capital account reallocation. A corrective allocation is an allocation (consisting of a pro rata portion of each item) for tax purposes of gross income and gain, or gross loss and deduction, that differs from the partnership's allocation of the corresponding book item. See *Example 32* of paragraph (b)(5) of this section.

(b) *Timing*. Section 706 and the regulations and principles thereunder apply in determining the items of income, gain, loss, and deduction that may be subject to corrective allocation.

(c) *Allocation of gross income and gain and gross loss and deduction*. If the capital account reallocation is from the historic partners to the exercising option holder, then the corrective allocations must first be made with gross income and gain. If an allocation of gross income and gain alone does not completely take into account the capital account reallocation in a given year, then the partnership must also make corrective allocations using a pro rata portion of items of gross loss and deduction as to further take into account the capital account reallocation. Conversely, if the capital account reallocation is from the exercising option holder to the historic partners, then the corrective allocations must first be made with gross loss and deduction. If an allocation of gross loss and deduction alone does not completely take into account the capital account reallocation in a given year, then the partnership must also make corrective allocations using a pro rata portion of items of gross income and gain as to further take into account the capital account reallocation.

(5) *Examples*. The operation of the rules in this paragraph is illustrated by the following examples:

*Example 1.* (i) A and B form a general partnership with cash contributions of \$40,000 each, which cash is used to purchase depreciable personal property at a cost of \$80,000. The partnership elects under section 48(q)(4) to reduce the amount of investment tax credit in lieu of adjusting the tax basis of such property. The partnership agreement provides that A and B will have equal shares of taxable income and loss (computed without regard to cost recovery deductions) and cash flow and that all cost recovery deductions on the property will be allocated to A.

## § 1.704-1

The agreement further provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of the section, but that upon liquidation of the partnership, distributions will be made equally between the partners (regardless of capital account balances) and no partner will be required to restore the deficit balance in his capital account for distribution to partners with positive capital accounts balances. In the partnership's first taxable year, it recognizes operating income equal to its operating expenses and has an additional \$20,000 cost recovery deduction, which is allocated entirely to A. That A and B will be entitled to equal distributions on liquidation, even though A is allocated the entire \$20,000 cost recovery deduction, indicates A will not bear the full risk of the economic loss corresponding to such deduction if such loss occurs. Under paragraph (b)(2)(ii) of this section, the allocation lacks economic effect and will be disregarded. The partners made equal contributions to the partnership, share equally in other taxable income and loss and in cash flow, and will share equally in liquidation proceeds, indicating that their actual economic arrangement is to bear the risk imposed by the potential decrease in the value of the property equally. Thus, under paragraph (b)(3) of this section the partners' interests in the partnership are equal, and the cost recovery deduction will be reallocated equally between A and B.

(ii) Assume the same facts as in (i) except that the partnership agreement provides that liquidation proceeds will be distributed in accordance with capital account balances if the partnership is liquidated during the first five years of its existence but that liquidation proceeds will be distributed equally if the partnership is liquidated thereafter. Since the partnership agreement does not provide for the requirement contained in paragraph (b)(2)(ii)(b)(2) of this section to be satisfied throughout the term of the partnership, the partnership allocations do not have economic effect. Even if the partnership agreement provided for the requirement contained in paragraph (b)(2)(ii)(b)(2) to be satisfied throughout the term of the partnership, such allocations would not have economic effect unless the requirement contained in paragraph (b)(2)(ii)(b)(3) of this section or the alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section were satisfied.

(iii) Assume the same facts as in (i) except that distributions in liquidation of the partnership (or any partner's interest) are to be made in accordance with the partners' positive capital account balances throughout the term of the partnership (as set forth in paragraph (b)(2)(ii)(b)(2) of this section). Assume further that the partnership agreement contains a qualified income offset (as defined in

## 26 CFR Ch. I (4-1-14 Edition)

paragraph (b)(2)(ii)(d) of this section) and that, as of the end of each partnership taxable year, the items described in paragraphs (b)(2)(ii)(d)(4), (5), and (6) of this section are not reasonably expected to cause or increase a deficit balance in A's capital account.

	A	B
Capital account upon formation .....	\$40,000	\$40,000
Less: year 1 cost recovery deduction	(20,000)	0
Capital account at end of year 1 .....	\$20,000	\$40,000

Under the alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section, the allocation of the \$20,000 cost recovery deduction to A has economic effect.

(iv) Assume the same facts as in (iii) and that in the partnership's second taxable year it recognizes operating income equal to its operating expenses and has a \$25,000 cost recovery deduction which, under the partnership agreement, is allocated entirely to A.

	A	B
Capital account at beginning of year 2 .....	\$20,000	\$40,000
Less: year 2 cost recovery deduction	(25,000)	0
Capital account at end of year 2 .....	(\$5,000)	\$40,000

The allocation of the \$25,000 cost recovery deduction to A satisfies that alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section only to the extent of \$20,000. Therefore, only \$20,000 of such allocation has economic effect, and the remaining \$5,000 must be reallocated in accordance with the partners' interests in the partnership. Under the partnership agreement, if the property were sold immediately following the end of the partnership's second taxable year for \$35,000 (its adjusted tax basis), the \$35,000 would be distributed to B. Thus, B, and not A, bears the economic burden corresponding to \$5,000 of the \$25,000 cost recovery deduction allocated to A. Under paragraph (b)(3)(iii) of this section, \$5,000 of such cost recovery deduction will be reallocated to B.

(v) Assume the same facts as in (iv) except that the cost recovery deduction for the partnership's second taxable year is \$20,000 instead of \$25,000. The allocation of such cost recovery deduction to A has economic effect under the alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section. Assume further that the property is sold for \$35,000 immediately following the end of the partnership's second taxable year, resulting in a \$5,000 taxable loss (\$40,000 adjusted tax basis less \$35,000 sales price), and the partnership is liquidated.

## Internal Revenue Service, Treasury

## § 1.704-1

	A	B
Capital account at beginning of year 2	\$20,000	\$40,000
Less: year 2 cost recovery deduction ...	(20,000)	0
Capital account at end of year 2 .....	0	\$40,000
Less: loss on sale .....	(2,500)	(2,500)
Capital account before liquidation .....	(\$2,500)	\$37,500

Under the partnership agreement the \$35,000 sales proceeds are distributed to B. Since B bears the entire economic burden corresponding to the \$5,000 taxable loss from the sale of the property, the allocation of \$2,500 of such loss to A does not have economic effect and must be reallocated in accordance with the partners' interests in the partnership. Under paragraph (b)(3)(iii) of this section, such \$2,500 loss will be reallocated to B.

(vi) Assume the same facts as in (iv) except that the cost recovery deduction for the partnership's second taxable year is \$20,000 instead of \$25,000, and that as of the end of the partnership's second taxable year it is reasonably expected that during its third taxable year the partnership will (1) have operating income equal to its operating expenses (but will have no cost recovery deductions), (2) borrow \$10,000 (recourse) and distribute such amount \$5,000 to A and \$5,000 to B, and (3) thereafter sell the partnership property, repay the \$10,000 liability, and liquidate. In determining the extent to which the alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section is satisfied as of the end of the partnership's second taxable year, the fair market value of partnership property is presumed to be equal to its adjusted tax basis (in accordance with paragraph (b)(2)(iii)(c) of this section). Thus, it is presumed that the selling price of such property during the partnership's third taxable year will be its \$40,000 adjusted tax basis. Accordingly, there can be no reasonable expectation that there will be increases to A's capital account in the partnership's third taxable year that will offset the expected \$5,000 distribution to A. Therefore, the distribution of the loan proceeds must be taken into account in determining to what extent the alternate economic effect test contained in paragraph (b)(2)(ii)(d) is satisfied.

	A	B
Capital account at beginning of year 2	\$20,000	\$40,000
Less: expected future distribution .....	(5,000)	(5,000)
Less: year 2 cost recovery deduction ...	(20,000)	(0)
Hypothetical capital account at end of year 2 ..	(\$5,000)	\$35,000

Upon sale of the partnership property, the \$40,000 presumed sales proceeds would be used to repay the \$10,000 liability, and the remaining \$30,000 would be distributed to B.

Under these circumstances the allocation of the \$20,000 cost recovery deduction to A in the partnership's second taxable year satisfies the alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section only to the extent of \$15,000. Under paragraph (b)(3)(iii) of this section, the remaining \$5,000 of such deduction will be reallocated to B. The results in this example would be the same even if the partnership agreement also provided that any gain (whether ordinary income or capital gain) upon the sale of the property would be allocated to A to the extent of the prior allocations of cost recovery deductions to him, and, at end of the partnership's second taxable year, the partners were confident that the gain on the sale of the property in the partnership's third taxable year would be sufficient to offset the expected \$5,000 distribution to A.

(vii) Assume the same facts as in (iv) except that the partnership agreement also provides that any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraph (b)(2)(ii)(b)(3) of this section). Thus, if the property were sold for \$35,000 immediately after the end of the partnership's second taxable year, the \$35,000 would be distributed to B, A would contribute \$5,000 (the deficit balance in his capital account) to the partnership, and that \$5,000 would be distributed to B. The allocation of the entire \$25,000 cost recovery deduction to A in the partnership's second taxable year has economic effect.

(viii) Assume the same facts as in (vii) except that A's obligation to restore the deficit balance in his capital account is limited to a maximum of \$5,000. The allocation of the \$25,000 cost recovery deduction to A in the partnership's second taxable year has economic effect under the alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section. At the end of such year, A makes an additional \$5,000 contribution to the partnership (thereby eliminating the \$5,000 deficit balance in his capital account). Under paragraph (b)(2)(ii)(f) of this section, A's obligation to restore up to \$5,000 of the deficit balance in his capital account may be eliminated after he contributes the additional \$5,000 without affecting the validity of prior allocations.

(ix) Assume the same facts as in (iv) except that upon formation of the partnership A also contributes to the partnership his negotiable promissory note with a \$5,000 principal balance. The note unconditionally obligates A to pay an additional \$5,000 to the partnership at the earlier of (a) the beginning of the partnership's fourth taxable year, or (b) the end of the partnership taxable year in which A's interest is liquidated. Under paragraph (b)(2)(ii)(c) of this section, A is considered obligated to restore up to \$5,000 of the deficit

balance in his capital account to the partnership. Accordingly, under the alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section, the allocation of the \$25,000 cost recovery deduction to A in the partnership's second taxable year has economic effect. The results in this example would be the same if (1) the note A contributed to the partnership were payable only at the end of the partnership's fourth taxable year (so that A would not be required to satisfy the note upon liquidation of his interest in the partnership), and (2) the partnership agreement provided that upon liquidation of A's interest, the partnership would retain A's note, and A would contribute to the partnership the excess of the outstanding principal balance of the note over its then fair market value.

(x) Assume the same facts as in (ix) except that A's obligation to contribute an additional \$5,000 to the partnership is not evidenced by a promissory note. Instead, the partnership agreement imposes upon A the obligation to make an additional \$5,000 contribution to the partnership at the earlier of (a) the beginning of the partnership's fourth taxable year, or (b) the end of the partnership taxable year in which A's interest is liquidated. Under paragraph (b)(2)(ii)(c) of this section, as a result of A's deferred contribution requirement, A is considered obligated to restore up to \$5,000 of the deficit balance in his capital account to the partnership. Accordingly, under the alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section, the allocation of the \$25,000 cost recovery deduction to A in the partnership's second taxable year has economic effect.

(xi) Assume the same facts as in (vii) except that the partnership agreement also provides that any gain (whether ordinary income or capital gain) upon the sale of the property will be allocated to A to the extent of the prior allocations to A of cost recovery deductions from such property, and additional gain will be allocated equally between A and B. At the time the allocations of cost recovery deductions were made to A, the partners believed there would be gain on the sale of the property in an amount sufficient to offset the allocations of cost recovery deductions to A. Nevertheless, the existence of the gain chargeback provision will not cause the economic effect of the allocations to be insubstantial under paragraph (b)(2)(iii)(c) of this section, since in testing whether the economic effect of such allocations is substantial, the recovery property is presumed to decrease in value by the amount of such deductions.

*Example 2.* C and D form a general partnership solely to acquire and lease machinery that is 5-year recovery property under section 168. Each contributes \$100,000, and the partnership obtains an \$800,000 recourse loan

to purchase the machinery. The partnership elects under section 48(q)(4) to reduce the amount of investment tax credit in lieu of adjusting the tax basis of such machinery. The partnership, C, and D have calendar taxable years. The partnership agreement provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b)(2) and (3) of this section). The partnership agreement further provides that (a) partnership net taxable loss will be allocated 90 percent to C and 10 percent to D until such time as there is partnership net taxable income, and therefore C will be allocated 90 percent of such taxable income until he has been allocated partnership net taxable income equal to the partnership net taxable loss previously allocated to him, (b) all further partnership net taxable income or loss will be allocated equally between C and D, and (c) distributions of operating cash flow will be made equally between C and D. The partnership enters into a 12-year lease with a financially secure corporation under which the partnership expects to have a net taxable loss in each of its first 5 partnership taxable years due to cost recovery deductions with respect to the machinery and net taxable income in each of its following 7 partnership taxable years, in part due to the absence of such cost recovery deductions. There is a strong likelihood that the partnership's net taxable loss in partnership taxable years 1 through 5 will be \$100,000, \$90,000, \$80,000, \$70,000, and \$60,000, respectively, and the partnership's net taxable income in partnership taxable years 6 through 12 will be \$40,000, \$50,000, \$60,000, \$70,000, \$80,000, \$90,000, and \$100,000, respectively. Even though there is a strong likelihood that the allocations of net taxable loss in years 1 through 5 will be largely offset by other allocations in partnership taxable years 6 through 12, and even if it is assumed that the total tax liability of the partners in years 1 through 12 will be less than if the allocations had not been provided in the partnership agreement, the economic effect of the allocations will not be insubstantial under paragraph (b)(2)(iii)(c) of this section. This is because at the time such allocations became part of the partnership agreement, there was a strong likelihood that the allocations of net taxable loss in years 1 through 5 would not be largely offset by allocations of income within 5 years (determined on a first-in, first-out basis). The year 1 allocation will not be offset until years 6, 7, and 8, the year 2 allocation will not be offset until

years 8 and 9, the year 3 allocation will not be offset until years 9 and 10, the year 4 allocation will not be offset until years 10 and 11, and the year 5 allocation will not be offset until years 11 and 12.

*Example 3.* E and F enter into a partnership agreement to develop and market experimental electronic devices. E contributes \$2,500 cash and agrees to devote his full-time services to the partnership. F contributes \$100,000 cash and agrees to obtain a loan for the partnership for any additional capital needs. The partnership agreement provides that all deductions for research and experimental expenditures and interest on partnership loans are to be allocated to F. In addition, F will be allocated 90 percent, and E 10 percent, of partnership taxable income or loss, computed net of the deductions for such research and experimental expenditures and interest, until F has received allocations of such taxable income equal to the sum of such research and experimental expenditures, such interest expense, and his share of such taxable loss. Thereafter, E and F will share all taxable income and loss equally. Operating cash flow will be distributed equally between E and F. The partnership agreement also provides that E's and F's capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b)(2) and (3) of this section). These allocations have economic effect. In addition, in view of the nature of the partnership's activities, there is not a strong likelihood at the time the allocations become part of the partnership agreement that the economic effect of the allocations to F of deductions for research and experimental expenditures and interest on partnership loans will be largely offset by allocations to F of partnership net taxable income. The economic effect of the allocations is substantial.

*Example 4.* (i) G and H contribute \$75,000 and \$25,000, respectively, in forming a general partnership. The partnership agreement provides that all income, gain, loss, and deduction will be allocated equally between the partners, that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, but that all partnership distributions will, regardless of capital account balances, be made 75 percent to G and 25 percent to H. Following the liquidation of the partnership, neither partner is required to restore the deficit balance in his capital account to the partnership for distribution to partners with positive capital account bal-

ances. The allocations in the partnership agreement do not have economic effect. Since contributions were made in a 75/25 ratio and the partnership agreement indicates that all economic profits and losses of the partnership are to be shared in a 75/25 ratio, under paragraph (b)(3) of this section, partnership income, gain, loss, and deduction will be reallocated 75 percent to G and 25 percent to H.

(ii) Assume the same facts as in (i) except that the partnership maintains no capital accounts and the partnership agreement provides that all income, gain, loss, deduction, and credit will be allocated 75 percent to G and 25 percent to H. G and H are ultimately liable (under a State law right of contribution) for 75 percent and 25 percent, respectively, of any debts of the partnership. Although the allocations do not satisfy the requirements of paragraph (b)(2)(ii)(b) of this section, the allocations have economic effect under the economic effect equivalence test of paragraph (b)(2)(ii)(i) of this section.

(iii) Assume the same facts as in (i) except that the partnership agreement provides that any partner with a deficit balance in his capital account must restore that deficit to the partnership (as set forth in paragraph (b)(2)(ii)(b)(2) of this section). Although the allocations do not satisfy the requirements of paragraph (b)(2)(ii)(b) of this section, the allocations have economic effect under the economic effect equivalence test of paragraph (b)(2)(ii)(i) of this section.

*Example 5.* (i) Individuals I and J are the only partners of an investment partnership. The partnership owns corporate stocks, corporate debt instruments, and tax-exempt debt instruments. Over the next several years, I expects to be in the 50 percent marginal tax bracket, and J expects to be in the 15 percent marginal tax bracket. There is a strong likelihood that in each of the next several years the partnership will realize between \$450 and \$550 of tax-exempt interest and between \$450 and \$550 of a combination of taxable interest and dividends from its investments. I and J made equal capital contributions to the partnership, and they have agreed to share equally in gains and losses from the sale of the partnership's investment securities. I and J agree, however, that rather than share interest and dividends of the partnership equally, they will allocate the partnership's tax-exempt interest 80 percent to I and 20 percent to J and will distribute cash derived from interest received on the tax-exempt bonds in the same percentages. In addition, they agree to allocate 100 percent of the partnership's taxable interest and dividends to J and to distribute cash derived from interest and dividends received on the corporate stocks and debt instruments 100 percent to J. The partnership agreement further provides that the partners' capital accounts will be determined and maintained in

accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partner's positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b) (2) and (3) of this section). The allocation of taxable interest and dividends and tax-exempt interest has economic effect, but that economic effect is not substantial under the general rules set forth in paragraph (b)(2)(iii) of this section. Without the allocation I would be allocated between \$225 and \$275 of tax-exempt interest and between \$225 and \$275 of a combination of taxable interest and dividends, which (net of Federal income taxes he would owe on such income) would give I between \$337.50 and \$412.50 after tax. With the allocation, however, I will be allocated between \$360 and \$440 of tax-exempt interest and no taxable interest and dividends, which (net of Federal income taxes) will give I between \$360 and \$440 after tax. Thus, at the time the allocations became part of the partnership agreement, I is expected to enhance his after-tax economic consequences as a result of the allocations. On the other hand, there is a strong likelihood that neither I nor J will substantially diminish his after-tax economic consequences as a result of the allocations. Under the combination of likely investment outcomes least favorable for J, the partnership would realize \$550 of tax-exempt interest and \$450 of taxable interest and dividends, giving J \$492.50 after tax (which is more than the \$466.25 after tax J would have received if each of such amounts had been allocated equally between the partners). Under the combination of likely investment outcomes least favorable for I, the partnership would realize \$450 of tax-exempt interest and \$550 of taxable interest and dividends, giving I \$360 after tax (which is not substantially less than the \$362.50 he would have received if each of such amounts had been allocated equally between the partners). Accordingly, the allocations in the partnership agreement must be reallocated in accordance with the partners' interests in the partnership under paragraph (b)(3) of this section.

(ii) Assume the same facts as in (i). In addition, assume that in the first partnership taxable year in which the allocation arrangement described in (i) applies, the partnership realizes \$450 of tax-exempt interest and \$550 of taxable interest and dividends, so that, pursuant to the partnership agreement, I's capital account is credited with \$360 (80 percent of the tax-exempt interest), and J's capital account is credited with \$640 (20 percent of the tax-exempt interest and 100 percent of the taxable interest and dividends). The allocations of tax-exempt interest and taxable

interest and dividends (which do not have substantial economic effect for the reasons stated in (i)) will be disregarded and will be reallocated. Since under the partnership agreement I will receive 36 percent (360/1,000) and J will receive 64 percent (640/1,000) of the partnership's total investment income in such year, under paragraph (b)(3) of this section the partnership's tax-exempt interest and taxable interest and dividends each will be reallocated 36 percent to I and 64 percent to J.

*Example 6.* K and L are equal partners in a general partnership formed to acquire and operate property described in section 1231(b). The partnership, K, and L have calendar taxable years. The partnership agreement provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, that distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances, and that any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b) (2) and (3) of this section). For a taxable year in which the partnership expects to incur a loss on the sale of a portion of such property, the partnership agreement is amended (at the beginning of the taxable year) to allocate such loss to K, who expects to have no gains from the sale of depreciable property described in section 1231(b) in that taxable year, and to allocate an equivalent amount of partnership loss and deduction for that year of a different character to L, who expects to have such gains. Any partnership loss and deduction in excess of these allocations will be allocated equally between K and L. The amendment is effective only for that taxable year. At the time the partnership agreement is amended, there is a strong likelihood that the partnership will incur deduction or loss in the taxable year other than loss from the sale of property described in section 1231(b) in an amount that will substantially equal or exceed the expected amount of the section 1231(b) loss. The allocations in such taxable year have economic effect. However, the economic effect of the allocations is insubstantial under the test described in paragraph (b)(2)(iii) (b) of this section because there is a strong likelihood, at the time the allocations become part of the partnership agreement, that the net increases and decreases to K's and L's capital accounts will be the same at the end of the taxable year to which they apply with such allocations in effect as they would have been in the absence of such allocations, and that the total taxes of K and L for such year will be reduced as a result of such allocations. If in fact the partnership incurs deduction or

loss, other than loss from the sale of property described in section 1231(b), in an amount at least equal to the section 1231(b) loss, the loss and deduction in such taxable year will be reallocated equally between K and L under paragraph (b)(3) of this section. If not, the loss from the sale of property described in section 1231(b) and the items of deduction and other loss realized in such year will be reallocated between K and L in proportion to the net decreases in their capital accounts due to the allocation of such items under the partnership agreement.

*Example 7.* (i) M and N are partners in the MN general partnership, which is engaged in an active business. Income, gain, loss, and deduction from MN's business is allocated equally between M and N. The partnership, M, and N have calendar taxable years. Under the partnership agreement the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partner's positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b) (2) and (3) of this section). In order to enhance the credit standing of the partnership, the partners contribute surplus funds to the partnership, which the partners agree to invest in equal dollar amounts of tax-exempt bonds and corporate stock for the partnership's first 3 taxable years. M is expected to be in a higher marginal tax bracket than N during those 3 years. At the time the decision to make these investments is made, it is agreed that, during the 3-year period of the investment, M will be allocated 90 percent and N 10 percent of the interest income from the tax-exempt bonds as well as any gain or loss from the sale thereof, and that M will be allocated 10 percent and N 90 percent of the dividend income from the corporate stock as well as any gain or loss from the sale thereof. At the time the allocations concerning the investments become part of the partnership agreement, there is not a strong likelihood that the gain or loss from the sale of the stock will be substantially equal to the gain or loss from the sale of the tax-exempt bonds, but there is a strong likelihood that the tax-exempt interest and the taxable dividends realized from these investments during the 3-year period will not differ substantially. These allocations have economic effect, and the economic effect of the allocations of the gain or loss on the sale of the tax-exempt bonds and corporate stock is substantial. The economic effect of the allocations of the tax-exempt interest and the taxable dividends, however, is not substantial under the test described in paragraph (b)(2)(iii)(c) of this section because there is a

strong likelihood, at the time the allocations become part of the partnership agreement, that at the end of the 3-year period to which such allocations relate, the net increases and decreases to M's and N's capital accounts will be the same with such allocations as they would have been in the absence of such allocations, and that the total taxes of M and N for the taxable years to which such allocations relate will be reduced as a result of such allocations. If in fact the amounts of the tax-exempt interest and taxable dividends earned by the partnership during the 3-year period are equal, the tax-exempt interest and taxable dividends will be reallocated to the partners in equal shares under paragraph (b)(3) of this section. If not, the tax-exempt interest and taxable dividends will be reallocated between M and N in proportion to the net increases in their capital accounts during such 3-year period due to the allocation of such items under the partnership agreement.

(ii) Assume the same facts as in (i) except that gain or loss from the sale of the tax-exempt bonds and corporate stock will be allocated equally between M and N and the partnership agreement provides that the 90/10 allocation arrangement with respect to the investment income applies only to the first \$10,000 of interest income from the tax-exempt bonds and the first \$10,000 of dividend income from the corporate stock, and only to the first taxable year of the partnership. There is a strong likelihood at the time the 90/10 allocation of the investment income became part of the partnership agreement that in the first taxable year of the partnership, the partnership will earn more than \$10,000 of tax-exempt interest and more than \$10,000 of taxable dividends. The allocations of tax-exempt interest and taxable dividends provided in the partnership agreement have economic effect, but under the test contained in paragraph (b)(2)(iii)(b) of this section, such economic effect is not substantial for the same reasons stated in (i) (but applied to the 1 taxable year, rather than to a 3-year period). If in fact the partnership realizes at least \$10,000 of tax-exempt interest and at least \$10,000 of taxable dividends in such year, the allocations of such interest income and dividend income will be reallocated equally between M and N under paragraph (b)(3) of this section. If not, the tax-exempt interest and taxable dividends will be reallocated between M and N in proportion to the net increases in their capital accounts due to the allocations of such items under the partnership agreement.

(iii) Assume the same facts as in (ii) except that at the time the 90/10 allocation of investment income becomes part of the partnership agreement, there is not a strong likelihood that (1) the partnership will earn \$10,000 or more of tax-exempt interest and \$10,000 or more of taxable dividends in the

partnership's first taxable year, and (2) the amount of tax-exempt interest and taxable dividends earned during such year will be substantially the same. Under these facts the economic effect of the allocations generally will be substantial. (Additional facts may exist in certain cases, however, so that the allocation is insubstantial under the second sentence of paragraph (b)(2)(iii). See example 5 above.)

*Example 8.* (i) O and P are equal partners in the OP general partnership. The partnership, O, and P have calendar taxable years. Partner O has a net operating loss carryover from another venture that is due to expire at the end of the partnership's second taxable year. Otherwise, both partners expect to be in the 50 percent marginal tax bracket in the next several taxable years. The partnership agreement provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b) (2) and (3) of this section). The partnership agreement is amended (at the beginning of the partnership's second taxable year) to allocate all the partnership net taxable income for that year to O. Future partnership net taxable loss is to be allocated to O, and future partnership net taxable income to P, until the allocation of income to O in the partnership's second taxable year is offset. It is further agreed orally that in the event the partnership is liquidated prior to completion of such offset, O's capital account will be adjusted downward to the extent of one-half of the allocations of income to O in the partnership's second taxable year that have not been offset by other allocations. P's capital account will be adjusted upward by a like amount, and liquidation proceeds will be distributed in accordance with the partners' adjusted capital account balances. As a result of this oral amendment, all allocations of partnership net taxable income and net taxable loss made pursuant to the amendment executed at the beginning of the partnership's second taxable year lack economic effect and will be disregarded. Under the partnership agreement other allocations are made equally to O and P, and O and P will share equally in liquidation proceeds, indicating that the partners' interests in the partnership are equal. Thus, the disregarded allocations will be reallocated equally between the partners under paragraph (b)(3) of this section.

(ii) Assume the same facts as in (i) except that there is no agreement that O's and P's capital accounts will be adjusted downward

and upward, respectively, to the extent of one-half of the partnership net taxable income allocated to O in the partnership's second taxable year that is not offset subsequently by other allocations. The income of the partnership is generated primarily by fixed interest payments received with respect to highly rated corporate bonds, which are expected to produce sufficient net taxable income prior to the end of the partnership's seventh taxable year to offset in large part the net taxable income to be allocated to O in the partnership's second taxable year. Thus, at the time the allocations are made part of the partnership agreement, there is a strong likelihood that the allocation of net taxable income to be made to O in the second taxable year will be offset in large part within 5 taxable years thereafter. These allocations have economic effect. However, the economic effect of the allocation of partnership net taxable income to O in the partnership's second taxable year, as well as the offsetting allocations to P, is not substantial under the test contained in paragraph (b)(2)(iii)(c) of this section because there is a strong likelihood that the net increases or decreases in O's and P's capital accounts will be the same at the end of the partnership's seventh taxable year with such allocations as they would have been in the absence of such allocations, and the total taxes of O and P for the taxable years to which such allocations relate will be reduced as a result of such allocations. If in fact the partnership, in its taxable years 3 through 7, realizes sufficient net taxable income to offset the amount allocated to O in the second taxable year, the allocations provided in the partnership agreement will be reallocated equally between the partners under paragraph (b)(3) of this section.

*Example 9.* Q and R form a limited partnership with contributions of \$20,000 and \$180,000, respectively. Q, the limited partner, is a corporation that has \$2,000,000 of net operating loss carryforwards that will not expire for 8 years. Q does not expect to have sufficient income (apart from the income of the partnership) to absorb any of such net operating loss carryforwards. R, the general partner, is a corporation that expects to be in the 46 percent marginal tax bracket for several years. The partnership agreement provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b) (2) and (3) of this section). The

partnership's cash, together with the proceeds of an \$800,000 loan, are invested in assets that are expected to produce taxable income and cash flow (before debt service) of approximately \$150,000 a year for the first 8 years of the partnership's operations. In addition, it is expected that the partnership's total taxable income in its first 8 taxable years will not exceed \$2,000,000. The partnership's \$150,000 of cash flow in each of its first 8 years will be used to retire the \$800,000 loan. The partnership agreement provides that partnership net taxable income will be allocated 90 percent to Q and 10 percent to R in the first through eighth partnership taxable years, and 90 percent to R and 10 percent to Q in all subsequent partnership taxable years. Net taxable loss will be allocated 90 percent to R and 10 percent to Q in all partnership taxable years. All distributions of cash from the partnership to partners (other than the priority distributions to Q described below) will be made 90 percent to R and 10 percent to Q. At the end of the partnership's eighth taxable year, the amount of Q's capital account in excess of one-ninth of R's capital account on such date will be designated as Q's "excess capital account." Beginning in the ninth taxable year of the partnership, the undistributed portion of Q's excess capital account will begin to bear interest (which will be paid and deducted under section 707(c) at a rate of interest below the rate that the partnership can borrow from commercial lenders, and over the next several years (following the eight year) the partnership will make priority cash distributions to Q in prearranged percentages of Q's excess capital account designed to amortize Q's excess capital account and the interest thereon over a prearranged period. In addition, the partnership's agreement prevents Q from causing his interest in the partnership from being liquidated (and thereby receiving the balance in his capital account) without R's consent until Q's excess capital account has been eliminated. The below market rate of interest and the period over which the amortization will take place are prescribed such that, as of the end of the partnership's eighth taxable year, the present value of Q's right to receive such priority distributions is approximately 46 percent of the amount of Q's excess capital account as of such date. However, because the partnership's income for its first 8 taxable years will be realized approximately ratably over that period, the present value of Q's right to receive the priority distributions with respect to its excess capital account is, as of the date the partnership agreement is entered into, less than the present value of the additional Federal income taxes for which R would be liable if, during the partnership's first 8 taxable years, all partnership income were to be allocated 90 percent to R and 10 to Q. The allocations of partnership taxable income to Q and

R in the first through eighth partnership taxable years have economic effect. However, such economic effect is not substantial under the general rules set forth in paragraph (b)(2)(iii) of this section. This is true because R may enhance his after-tax economic consequences, on a present value basis, as a result of the allocations to Q of 90 percent of partnership's income during taxable years 1 through 8, and there is a strong likelihood that neither R nor Q will substantially diminish its after-tax economic consequences, on a present value basis, as a result of such allocation. Accordingly, partnership taxable income for partnership taxable years 1 through 8 will be reallocated in accordance with the partners' interests in the partnership under paragraph (b)(3) of this section.

*Example 10.* (i) S and T form a general partnership to operate a travel agency. The partnership agreement provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b) (2) and (3) of this section). The partnership agreement provides that T, a resident of a foreign country, will be allocated 90 percent, and S 10 percent, of the income, gain, loss, and deduction derived from operations conducted by T within his country, and all remaining income, gain, loss, and deduction will be allocated equally. The amount of such income, gain, loss, or deduction cannot be predicted with any reasonable certainty. The allocations provided by the partnership agreement have substantial economic effect.

(ii) Assume the same facts as in (i) except that the partnership agreement provides that all income, gain, loss, and deduction of the partnership will be shared equally, but that T will be allocated all income, gain, loss, and deduction derived from operations conducted by him within his country as a part of his equal share of partnership income, gain, loss, and deduction, upon to the amount of such share. Assume the total tax liability of S and T for each year to which these allocations relate will be reduced as a result of such allocation. These allocations have economic effect. However, such economic effect is not substantial under the test stated in paragraph (b)(2)(iii)(b) of this section because, at the time the allocations became part of the partnership agreement, there is a strong likelihood that the net increases and decreases to S's and T's capital accounts will be the same at the end of each

partnership taxable year with such allocations as they would have been in the absence of such allocations, and that the total tax liability of S and T for each year to which such allocations relate will be reduced as a result of such allocations. Thus, all items of partnership income, gain, loss, and income, gain, loss, and deduction will be reallocated equally between S and T under paragraph (b)(3) of this section.

*Example 11.* (i) U and V share equally all income, gain, loss, and deduction of the UV general partnership, as well as all non-liquidating distributions made by the partnership. The partnership agreement provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore such deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b) (2) and (3) of this section). The agreement further provides that the partners will be allocated equal shares of any section 705(a)(2)(B) expenditures of the partnership. In the partnership's first taxable year, it pays qualified first-year wages of \$6,000 and is entitled to a \$3,000 targeted jobs tax credit under sections 44B and 51 of the Code. Under section 280C the partnership must reduce its deduction for wages paid by the \$3,000 credit claimed (which amount constitutes a section 705(a)(2)(B) expenditure). The partnership agreement allocates the credit to U. Although the allocations of wage deductions and section 705(a)(2)(B) expenditures have substantial economic effect, the allocation of tax credit cannot have economic effect since it cannot properly be reflected in the partners' capital accounts. Furthermore, the allocation is not in accordance with the special partners' interests in the partnership rule contained in paragraph (b)(4)(ii) of this section. Under that rule, since the expenses that gave rise to the credit are shared equally by the partners, the credit will be shared equally between U and V.

(ii) Assume the same facts as in (i) and that at the beginning of the partnership's second taxable year, the partnership agreement is amended to allocate to U all wage expenses incurred in that year (including wage expenses that constitute section 705(a)(2)(B) expenditures) whether or not such wages qualify for the credit. The partnership agreement contains no offsetting allocations. That taxable year the partnership pays \$8,000 in total wages to its employees. Assume that the partnership has operating income equal to its operating expenses (exclusive of expenses for wages). Assume further that \$6,000 of the \$8,000 wage expense

constitutes qualified first-year wages. U is allocated the \$3,000 deduction and the \$3,000 section 705(a)(2)(B) expenditure attributable to the \$6,000 of qualified first-year wages, as well as the deduction for the other \$2,000 in wage expenses. The allocations of wage deductions and section 705(a)(2)(B) expenditures have substantial economic effect. Furthermore, since the wage credit is allocated in the same proportion as the expenses that gave rise to the credit, and the allocation of those expenses has substantial economic effect, the allocation of such credit to U is in accordance with the special partners' interests in the partnership rule contained in paragraph (b)(4)(ii) of this section and is recognized thereunder.

*Example 12.* (i) W and X form a general partnership for the purpose of mining iron ore. W makes an initial contribution of \$75,000, and X makes an initial contribution of \$25,000. The partnership agreement provides that non-liquidating distributions will be made 75 percent to W and 25 percent to X, and that all items of income, gain, loss, and deduction will be allocated 75 percent to W and 25 percent to X, except that all percentage depletion deductions will be allocated to W. The agreement further provides that the partners' capital accounts will be determined and maintained in accordance with paragraphs (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore such deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b) (2) and (3) of this section). Assume that the adjusted tax basis of the partnership's only depletable iron ore property is \$1,000 and that the percentage depletion deduction for the taxable year with respect to such property is \$1,500. The allocation of partnership income, gain, loss, and deduction (excluding the percentage depletion deduction) as well as the allocation of \$1,000 of the percentage depletion deduction have substantial economic effect. The allocation to W of the remaining \$500 of the percentage depletion deduction, representing the excess of percentage depletion over adjusted tax basis of the iron ore property, cannot have economic effect since such amount cannot properly be reflected in the partners' capital accounts. Furthermore, the allocation to W of that \$500 excess percentage depletion deduction is not in accordance with the special partners' interests in the partnership rule contained in paragraph (b)(4)(iii) of this section, under which such \$500 excess depletion deduction (and all further percentage depletion deductions from the mine) will be reallocated 75 percent to W and 25 percent to X.

## Internal Revenue Service, Treasury

## § 1.704-1

(ii) Assume the same facts as in (i) except that the partnership agreement provides that all percentage depletion deductions of the partnership will be allocated 75 percent to W and 25 percent to X. Once again, the allocation of partnership income, gain, loss, and deduction (excluding the percentage depletion deduction) as well as the allocation of \$1,000 of the percentage depletion deduction have substantial economic effect. Furthermore, since the \$500 portion of the percentage depletion deduction that exceeds the adjusted basis of such iron ore property is allocated in the same manner as valid allocations of the gross income from such property during the taxable year (*i.e.*, 75 percent to W and 25 percent to X), the allocation of the \$500 excess percentage depletion contained in the partnership agreement is in accordance with the special partners' interests in the partnership rule contained in paragraph (b)(4)(iii) of this section.

*Example 13.* (i) Y and Z form a brokerage general partnership for the purpose of investing and trading in marketable securities. Y contributes cash of \$10,000, and Z contributes securities of P corporation, which have an adjusted basis of \$3,000 and a fair market value of \$10,000. The partnership would not be an investment company under section 351(e) if it were incorporated. The partnership agreement provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b) (2) and (3) of this section). The partnership uses the interim closing of the books method for purposes of section 706. The initial capital accounts of Y and Z are fixed at \$10,000 each. The agreement further provides that all partnership distributions, income, gain, loss, deduction, and credit will be shared equally between Y and Z, except that the taxable gain attributable to the precontribution appreciation in the value of the securities of P corporation will be allocated to Z in accordance with section 704(c). During the partnership's first taxable year, it sells the securities of P corporation for \$12,000, resulting in a \$2,000 book gain (\$12,000 less \$10,000 book value) and a \$9,000 taxable gain (\$12,000 less \$3,000 adjusted tax basis). The partnership has no other income, gain, loss, or deductions for the taxable year. The gain from the sale of the securities is allocated as follows:

	Y		Z	
	Tax	Book	Tax	Book
Capital account upon formation	\$10,000	\$10,000	\$3,000	\$10,000
Plus: gain .....	1,000	1,000	8,000	1,000
Capital account at end of year 1 ..	\$11,000	\$11,000	\$11,000	\$11,000

The allocation of the \$2,000 book gain, \$1,000 each to Y and Z, has substantial economic effect. Furthermore, under section 704(c) the partners' distributive shares of the \$9,000 taxable gain are \$1,000 to Y and \$8,000 to Z.

(ii) Assume the same facts as in (i) and that at the beginning of the partnership's second taxable year, it invests its \$22,000 of cash in securities of G Corp. The G Corp. securities increase in value to \$40,000, at which time Y sells 50 percent of his partnership interest (*i.e.*, a 25 percent interest in the partnership) to LK for \$10,000. The partnership does not have a section 754 election in effect for the partnership taxable year during which such sale occurs. In accordance with paragraph (b)(2)(iv)(I) of this section, the partnership agreement provides that LK inherits 50 percent of Y's \$11,000 capital account balance. Thus, following the sale, LK and Y each have a capital account of \$5,500, and Z's capital account remains at \$11,000. Prior to the end of the partnership's second taxable year, the securities are sold for their \$40,000 fair market value, resulting in an \$18,000 taxable gain (\$40,000 less \$22,000 adjusted tax basis). The partnership has no other income, gain, loss, or deduction in such taxable year. Under the partnership agreement the \$18,000 taxable gain is allocated as follows:

	Y	Z	LK
Capital account before sale of securities .....	\$5,500	\$11,000	\$5,500
Plus: gain .....	4,500	9,000	4,500
Capital account at end of year 2 .....	\$10,000	\$20,000	\$10,000

The allocation of the \$18,000 taxable gain has substantial economic effect.

(iii) Assume the same facts as in (ii) except that the partnership has a section 754 election in effect for the partnership taxable year during which Y sells 50 percent of his interest to LK. Accordingly, under § 1.743-1 there is a \$4,500 basis increase to the G Corp. securities with respect to LK. Notwithstanding this basis adjustment, as a result of the sale of the G Corp. securities, LK's capital account is, as in (ii), increased by \$4,500. The fact that LK recognizes no taxable gain from such sale (due to his \$4,500 section 743 basis adjustment) is irrelevant for capital

## § 1.704-1

accounting purposes since, in accordance with paragraph (b)(2)(iv)(m)(2) of this section, that basis adjustment is disregarded in the maintenance and computation of the partners' capital accounts.

(iv) Assume the same facts as in (iii) except that immediately following Y's sale of 50 percent of this interest to LK, the G Corp. securities decrease in value to \$32,000 and are sold. The \$10,000 taxable gain (\$32,000 less \$22,000 adjusted tax basis) is allocated as follows:

	Y	Z	LK
Capital account before sale of securities .....	\$5,500	\$11,000	\$5,500
Plus: gain .....	2,500	5,000	2,500
Capital account at end of the year 2 ..	\$8,000	\$16,000	\$8,000

The fact that LK recognizes a \$2,000 taxable loss from the sale of the G Corp. securities (due to his \$4,500 section 743 basis adjustment) is irrelevant for capital accounting purposes since, in accordance with paragraph (b)(2)(iv)(m)(2) of this section, that basis adjustment is disregarded in the maintenance and computation of the partners' capital accounts.

(v) Assume the same facts as in (ii) except that Y sells 100 percent of his partnership interest (*i.e.*, a 50 percent interest in the partnership) to LK for \$20,000. Under section 708(b)(1)(B) the partnership terminates. Under paragraph (b)(1)(iv) of § 1.708-1, there is a constructive liquidation of the partnership. Immediately preceding the constructive liquidation, the capital accounts of Z and LK equal \$11,000 each (LK having inherited Y's \$11,000 capital account) and the book value of the G Corp. securities is \$22,000 (original purchase price of securities). Under paragraph (b)(2)(iv)(l) of this section, the deemed contribution of assets and liabilities by the terminated partnership to the new partnership and the deemed liquidation of the terminated partnership that occur under § 1.708-1(b)(1)(iv) in connection with the constructive liquidation of the terminated partnership are disregarded in the maintenance and computation of the partners' capital accounts. As a result, the capital accounts of Z and LK in the new partnership equal \$11,000 each (their capital accounts in the terminated partnership immediately prior to the termination), and the book value of the G Corp. securities remains \$22,000 (its book value immediately prior to the termination). This *Example 13(v)* applies to terminations of partnerships under section 708(b)(1)(B) occurring on or after May 9, 1997; however, this *Ex-*

## 26 CFR Ch. I (4-1-14 Edition)

*ample 13(v)* may be applied to terminations occurring on or after May 9, 1996, provided that the partnership and its partners apply this *Example 13(v)* to the termination in a consistent manner.

*Example 14.* (i) MC and RW form a general partnership to which each contributes \$10,000. The \$20,000 is invested in securities of Ventureco (which are not readily tradable on an established securities market). In each of the partnership's taxable years, it recognizes operating income equal to its operating deductions (excluding gain or loss from the sale of securities). The partnership agreement provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b)(2) and (3) of this section). The partnership uses the interim closing of the books method for purposes of section 706. Assume that the Ventureco securities subsequently appreciate in value to \$50,000. At that time SK makes a \$25,000 cash contribution to the partnership (thereby acquiring a one-third interest in the partnership), and the \$25,000 is placed in a bank account. Upon SK's admission to the partnership, the capital accounts of MC and RW (which were \$10,000 each prior to SK's admission) are, in accordance with paragraph (b)(2)(iv)(f) of this section, adjusted upward (to \$25,000 each) to reflect their shares of the unrealized appreciation in the Ventureco securities that occurred before SK was admitted to the partnership. Immediately after SK's admission to the partnership, the securities are sold for their \$50,000 fair market value, resulting in taxable gain of \$30,000 (\$50,000 less \$20,000 adjusted tax basis) and no book gain or loss. An allocation of the \$30,000 taxable gain cannot have economic effect since it cannot properly be reflected in the partners' book capital accounts. Under paragraph (b)(2)(iv)(f) of this section and the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, unless the partnership agreement provides that the \$30,000 taxable gain will, in accordance with section 704(c) principles, be shared \$15,000 to MC and \$15,000 to RW, the partners' capital accounts will not be considered maintained in accordance with paragraph (b)(2)(iv) of this section.

	MC		RW		SK	
	Tax	Book	Tax	Book	Tax	Book
Capital account following SK's admission .....	\$10,000	\$25,000	\$10,000	\$25,000	\$25,000	\$25,000

	MC		RW		SK	
	Tax	Book	Tax	Book	Tax	Book
Plus: gain .....	15,000	0	15,000	0	0	0
Capital account following sale .....	\$25,000	\$25,000	\$25,000	\$25,000	\$25,000	\$25,000

(ii) Assume the same facts as (i), except that after SK's admission to the partnership, the Ventureco securities appreciate in value to \$74,000 and are sold, resulting in taxable gain of \$54,000 (\$74,000 less \$20,000 adjusted tax basis) and book gain of \$24,000 (\$74,000 less \$50,000 book value). Under the partnership agreement the \$24,000 book gain (the appreciation in value occurring after SK became a partner) is allocated equally among MC, RW, and SK, and such allocations have substantial economic effect. An allocation of the \$54,000 taxable gain cannot have economic effect since it cannot properly be reflected in the partners' book capital accounts. Under paragraph (b)(2)(iv)(f) of this section and the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, unless the partnership agreement provides that the taxable gain will, in accordance with section 704(c) principles, be shared \$23,000 to MC \$23,000 to RW, and \$8,000 to SK, the partners' capital accounts will not be considered maintained in accordance with paragraph (b)(2)(iv) of this section.

Under paragraph (b)(2)(iv)(f) of this section and the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, unless the partnership agreement provides that the taxable gain will, in accordance with section 704(c) principles, be shared \$23,000 to MC \$23,000 to RW, and \$8,000 to SK, the partners' capital accounts will not be considered maintained in accordance with paragraph (b)(2)(iv) of this section.

	MC		RW		SK	
	Tax	Book	Tax	Book	Tax	Book
Capital account following SK's admission .....	\$10,000	\$25,000	\$10,000	\$25,000	\$25,000	\$25,000
Plus: gain .....	23,000	8,000	23,000	8,000	8,000	8,000
Capital account following sale .....	\$33,000	\$33,000	\$33,000	\$33,000	\$33,000	\$33,000

(iii) Assume the same facts as (i) except that after SK's admission to the partnership, the Ventureco securities depreciate in value to \$44,000 and are sold, resulting in taxable gain of \$24,000 (\$44,000 less \$20,000 adjusted tax basis) and a book loss of \$6,000 (\$50,000 book value less \$44,000). Under the partnership agreement the \$6,000 book loss is allocated equally among MC, RW, and SK, and such allocations have substantial economic effect. An allocation of the \$24,000 taxable gain cannot have economic effect since it cannot properly be reflected in the partners' book capital accounts. Under paragraph (b)(2)(iv)(f) of this section and the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, unless the partnership agreement provides that the \$24,000 taxable gain will, in accordance with section 704(c) principles, be shared equally between MC and RW, the partners' capital accounts will not be considered maintained in accordance with paragraph (b)(2)(iv) of this section.

cannot properly be reflected in the partners' book capital accounts. Under paragraph (b)(2)(iv)(f) of this section and the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, unless the partnership agreement provides that the \$24,000 taxable gain will, in accordance with section 704(c) principles, be shared equally between MC and RW, the partners' capital accounts will not be considered maintained in accordance with paragraph (b)(2)(iv) of this section.

	MC		RW		SK	
	Tax	Book	Tax	Book	Tax	Book
Capital account following SK's admission .....	\$10,000	\$25,000	\$10,000	\$25,000	\$25,000	\$25,000
Plus: gain .....	12,000	0	12,000	0	0	0
Less: loss .....	0	(2,000)	0	(2,000)	0	(2,000)
Capital account following sale .....	\$22,000	\$23,000	\$22,000	\$23,000	\$25,000	\$25,000

That SK bears an economic loss of \$2,000 without a corresponding taxable loss is attributable entirely to the "ceiling rule." See paragraph (c)(2) of § 1.704-1.

(iv) Assume the same facts as in (ii) except that upon the admission of SK the capital accounts of MC and RW are not each adjusted upward from \$10,000 to \$25,000 to reflect the appreciation in the partnership's securities that occurred before SK was admitted to the partnership. Rather, upon SK's admission to the partnership, the partnership agreement is amended to provide that the first \$30,000 of taxable gain upon the sale of such securities will be allocated equally between MC and RW, and that all other income, gain, loss, and deduction will be allocated equally between MC, RW, and SK. When the securities are sold for \$74,000, the \$54,000 of taxable gain is so allocated. These allocations of taxable gain have substantial economic effect. (If the agreement instead

mission to the partnership, the partnership agreement is amended to provide that the first \$30,000 of taxable gain upon the sale of such securities will be allocated equally between MC and RW, and that all other income, gain, loss, and deduction will be allocated equally between MC, RW, and SK. When the securities are sold for \$74,000, the \$54,000 of taxable gain is so allocated. These allocations of taxable gain have substantial economic effect. (If the agreement instead

§ 1.704-1

26 CFR Ch. I (4-1-14 Edition)

provides for all taxable gain (including the \$30,000 taxable gain attributable to the appreciation in the securities prior to SK's admission to the partnership) to be allocated equally between MC, RW, and SK, the partners should consider whether, and to what extent, the provisions of paragraphs (b)(1)(iii) and (iv) of this section are applicable.)

(v) Assume the same facts as in (iv) except that instead of selling the securities, the partnership makes a distribution of the securities (which have a fair market value of \$74,000). Assume the distribution does not give rise to a transaction described in section 707(a)(2)(B). In accordance with paragraph (b)(2)(iv)(e) of this section, the partners' capital accounts are adjusted immediately prior to the distribution to reflect how taxable gain (\$54,000) would have been allocated had the securities been sold for their \$74,000 fair market value, and capital account adjustments in respect of the distribution of the securities are made with reference to the \$74,000 "booked-up" fair market value.

	MC	RW	SK
Capital account before adjustment .....	\$10,000	\$10,000	\$25,000
Deemed sale adjustment	23,000	23,000	8,000

	MC		RW		SK	
	Tax	Book	Tax	Book	Tax	Book
Capital account before distribution .....	\$10,000	\$25,000	\$10,000	\$25,000	\$25,000	\$25,000
Plus: basis adjustment .....	15,000	0	0	0	0	0
Less: distribution .....	(25,000)	(25,000)	0	0	0	0
Capital account after liquidation .....	0	0	\$10,000	\$25,000	\$25,000	\$25,000

(vii) Assume the same facts as in (vi) except that the partnership has no section 754

	MC	RW	SK
Less: distribution .....	(24,667)	(24,667)	(24,667)
Capital account after distribution	\$8,333	\$8,333	\$8,333

(vi) Assume the same facts as in (i) except that the partnership does not sell the Ventureco securities. During the next 3 years the fair market value of the Ventureco securities remains at \$50,000, and the partnership engages in no other investment activities. Thus, at the end of that period the balance sheet of the partnership and the partners' capital accounts are the same as they were at the beginning of such period. At the end of the 3 years, MC's interest in the partnership is liquidated for the \$25,000 cash held by the partnership. Assume the distribution does not give rise to a transaction described in section 707(a)(2)(B). Assume further that the partnership has a section 754 election in effect for the taxable year during which such liquidation occurs. Under sections 734(b) and 755 the partnership increases the basis of the Ventureco securities by the \$15,000 basis adjustment (the excess of \$25,000 over the \$10,000 adjusted tax basis of MC's partnership interest).

election in effect for the taxable year during which such liquidation occurs.

	MC		RW		SK	
	Tax	Book	Tax	Book	Tax	Book
Capital account before distribution .....	\$10,000	\$25,000	\$10,000	\$25,000	\$25,000	\$25,000
Less: distribution .....	(25,000)	(25,000)	0	0	0	0
Capital account after liquidation .....	(\$15,000)	0	\$10,000	\$25,000	\$25,000	\$25,000

Following the liquidation of MC's interest in the partnership, the Ventureco securities are sold for their \$50,000 fair market value, resulting in no book gain or loss but a \$30,000 taxable gain. An allocation of this \$30,000 taxable gain cannot have economic effect since it cannot properly be reflected in the partners' book capital accounts. Under paragraph (b)(2)(iv)(f) of this section and the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, unless the partnership agreement provides that \$15,000 of such taxable gain

will, in accordance with section 704(c) principles, be included in RW's distributive share, the partners' capital accounts will not be considered maintained in accordance with paragraph (b)(2)(iv) of this section. The remaining \$15,000 of such gain will, under paragraph (b)(3) of this section, be shared equally between RW and SK.

*Example 15.* (i) JB and DK form a limited partnership for the purpose of purchasing residential real estate to lease. JB, the limited partner, contributes \$13,500, and DK, the

## Internal Revenue Service, Treasury

## § 1.704-1

general partner, contributes \$1,500. The partnership, which uses the cash receipts and disbursements method of accounting, purchases a building for \$100,000 (on leased land), incurring a recourse mortgage of \$85,000 that requires the payment of interest only for a period of 3 years. The partnership agreement provides that partnership net taxable income and loss will be allocated 90 percent to JB and 10 percent to DK, the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances (as set forth in paragraph (b)(2)(ii)(b)(2) of this section), and JB is not required to restore any deficit balance in his capital account, but DK is so required. The partnership agreement contains a qualified income offset (as defined in paragraph (b)(2)(ii)(d) of this section). As of the end of each of the partnership's first 3 taxable years, the items described in paragraphs (b)(2)(ii)(d)(4), (5), and (6) of this section are not reasonably expected to cause or increase a deficit balance in JB's capital account. In the partnership's first taxable year, it has rental income of \$10,000, operating expenses of \$2,000, interest expense of \$8,000, and cost recovery deductions of \$12,000. Under the partnership agreement JB and DK are allocated \$10,800 and \$1,200, respectively, of the \$12,000 net taxable loss incurred in the partnership's first taxable year.

	JB	DK
Capital account upon formation .....	\$13,500	\$1,500
Less: year 1 net loss .....	(10,800)	(1,200)
Capital account at end of year 1 .....	\$2,700	\$300

The alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section is satisfied as of the end of the partnership's first taxable year. Thus, the allocation made in the partnership's first taxable year has economic effect.

(ii) Assume the same facts as in (i) and that in the partnership's second taxable year it again has rental income of \$10,000, operating expenses of \$2,000, interest expense of \$8,000, and cost recovery deductions of \$12,000. Under the partnership agreement JB and DK are allocated \$10,800 and \$1,200, respectively, of the \$12,000 net taxable loss incurred in the partnership's second taxable year.

	JB	DK
Capital account at beginning of year 1 .....	\$2,700	\$300
Less: year 2 net loss .....	(10,800)	(1,200)

	JB	DK
Capital account at end of year 2 .....	(\$8,100)	(\$900)

Only \$2,700 of the \$10,800 net taxable loss allocated to JB satisfies the alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section as of the end of the partnership's second taxable year. The allocation of such \$2,700 net taxable loss to JB (consisting of \$2,250 of rental income, \$450 of operating expenses, \$1,800 of interest expense, and \$2,700 of cost recovery deductions) has economic effect. The remaining \$8,100 of net taxable loss allocated by the partnership agreement to JB must be reallocated in accordance with the partners' interests in the partnership. Under paragraph (b)(3)(iii) of this section, the determination of the partners' interests in the remaining \$8,100 net taxable loss is made by comparing how distributions (and contributions) would be made if the partnership sold its property at its adjusted tax basis and liquidated immediately following the end of the partnership's first taxable year with the results of such a sale and liquidation immediately following the end of the partnership's second taxable year. If the partnership's real property were sold for its \$88,000 adjusted tax basis and the partnership were liquidated immediately following the end of the partnership's first taxable year, the \$88,000 sales proceeds would be used to repay the \$85,000 note, and there would be \$3,000 remaining in the partnership, which would be used to make liquidating distributions to DK and JB of \$300 and \$2,700, respectively. If such property were sold for its \$76,000 adjusted tax basis and the partnership were liquidated immediately following the end of the partnership's second taxable year, DK would be required to contribute \$9,000 to the partnership in order for the partnership to repay the \$85,000 note, and there would be no assets remaining in the partnership to distribute. A comparison of these outcomes indicates that JB bore \$2,700 and DK \$9,300 of the economic burden that corresponds to the \$12,000 net taxable loss. Thus, in addition to the \$1,200 net taxable loss allocated to DK under the partnership agreement, \$8,100 of net taxable loss will be reallocated to DK under paragraph (b)(3)(iii) of this section. Similarly, for subsequent taxable years, absent an increase in JB's capital account, all net taxable loss allocated to JB under the partnership agreement will be reallocated to DK.

(iii) Assume the same facts as in (ii) and that in the partnership's third taxable year there is rental income of \$35,000, operating expenses of \$2,000, interest expense of \$8,000, and cost recovery deductions of \$10,000. The capital accounts of the partners maintained on the books of the partnership do not take into account the reallocation to DK of the

\$8,100 net taxable loss in the partnership's second taxable year. Thus, an allocation of the \$15,000 net taxable income \$13,500 to JB and \$1,500 to DK (as dictated by the partnership agreement and as reflected in the capital accounts of the partners) does not have economic effect. The partners' interests in the partnership with respect to such \$15,000 taxable gain again is made in the manner described in paragraph (b) (3) (iii) of this section. If the partnership's real property were sold for its \$76,000 adjusted tax basis and the partnership were liquidated immediately following the end of the partnership's second taxable year, DK would be required to contribute \$9,000 to the partnership in order for the partnership to repay the \$85,000 note, and there would be no assets remaining to distribute. If such property were sold for its \$66,000 adjusted tax basis and the partnership were liquidated immediately following the end of the partnership's third taxable year, the \$91,000 (\$66,000 sales proceeds plus \$25,000 cash on hand) would be used to repay the \$85,000 note and there would be \$6,000 remaining in the partnership, which would be used to make liquidating distributions to DK and JB of \$600 and \$5,400, respectively. Accordingly, under paragraph (b) (3) (iii) of this section the \$15,000 net taxable income in the partnership's third taxable year will be reallocated \$9,600 to DK (minus \$9,000 at end of the second taxable year to positive \$600 at end of the third taxable year) and \$5,400 to JB (zero at end of the second taxable year to positive \$5,400 at end of the third taxable year).

*Example 16.* (i) KG and WN form a limited partnership for the purpose of investing in improved real estate. KG, the general partner, contributes \$10,000 to the partnership, and WN, the limited partner, contributes \$990,000 to the partnership. The \$1,000,000 is used to purchase an apartment building on leased land. The partnership agreement provides that (1) the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section; (2) cash will be distributed first to WN until such time as he has received the amount of his original capital contribution (\$990,000), next to KG until such time as he has received the amount of his original capital contribution (\$10,000), and thereafter equally between WN and KG; (3) partnership net taxable income will be allocated 99 percent to WN and 1 percent to KG until the cumulative net taxable income allocated for all taxable years is equal to the cumulative net taxable loss previously allocated to the partners, and thereafter equally between WN and KG; (4) partnership net taxable loss will be allocated 99 percent to WN and 1 percent to KG, unless net taxable income has previously been allocated equally between WN and KG, in which case such net taxable loss first will be allocated equally until the cu-

mulative net taxable loss allocated for all taxable years is equal to the cumulative net taxable income previously allocated to the partners; and (5) upon liquidation, WN is not required to restore any deficit balance in his capital account, but KG is so required. Since distributions in liquidation are not required to be made in accordance with the partners' positive capital account balances, and since WN is not required, upon the liquidation of his interest, to restore the deficit balance in his capital account to the partnership, the allocations provided by the partnership agreement do not have economic effect and will be reallocated in accordance with the partners' interests in the partnership under paragraph (b) (3) of this section.

(ii) Assume the same facts as in (i) except that the partnership agreement further provides that distributions in liquidation of the partnership (or any partner's interest) are to be made in accordance with the partners' positive capital account balances (as set forth in paragraph (b)(2)(ii)(b)(2) of this section). Assume further that the partnership agreement contains a qualified income offset (as defined in paragraph (b)(2)(ii)(d) of this section) and that, as of the end of each partnership taxable year, the items described in paragraphs (b)(2)(iii)(d) (4), (5), and (6) of this section are not reasonably expected to cause or increase a deficit balance in WN's capital account. The allocations provided by the partnership agreement have economic effect.

*Example 17.* FG and RP form a partnership with FG contributing cash of \$100 and RP contributing property, with 2 years of cost recovery deductions remaining, that has an adjusted tax basis of \$80 and a fair market value of \$100. The partnership, FG, and RP have calendar taxable years. The partnership agreement provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, liquidation proceeds will be made in accordance with capital account balances, and each partner is liable to restore the deficit balance in his capital account to the partnership upon liquidation of his interest (as set forth in paragraphs (b)(2)(ii)(b) (2) and (3) of this section). FG expects to be in a substantially higher tax bracket than RP in the partnership's first taxable year. In the partnership's second taxable year, and in subsequent taxable years, it is expected that both will be in approximately equivalent tax brackets. The partnership agreement allocates all items equally except that all \$50 of book depreciation is allocated to FG in the partnership's first taxable year and all \$50 of book depreciation is allocated to RP in the partnership's second taxable year. If the allocation to FG of all book depreciation in the partnership's first taxable year is respected, FG would be entitled under section 704(c) to the entire cost recovery deduction (\$40) for such

## Internal Revenue Service, Treasury

## § 1.704-1

year. Likewise, if the allocation to RP of all the book depreciation in the partnership's second taxable year is respected, RP would be entitled under section 704(c) to the entire cost recovery deduction (\$40) for such year. The allocation of book depreciation to FG and RP in the partnership's first 2 taxable years has economic effect within the meaning of paragraph (b)(2)(ii) of this section. However, the economic effect of these allocations is not substantial under the test described in paragraph (b)(2)(iii)(c) of this section since there is a strong likelihood at the time such allocations became part of the partnership agreement that at the end of the 2-year period to which such allocations relate, the net increases and decreases to FG's and RP's capital accounts will be the same with such allocations as they would have been in the absence of such allocation, and the total tax liability of FG and RP for the taxable years to which the section 704(c) determinations relate would be reduced as a result of the allocations of book depreciation. As a result the allocations of book depreciation in the partnership agreement will be disregarded. FG and RP will be allocated such book depreciation in accordance with the partners' interests in the partnership under paragraph (b)(3) of this section. Under these facts the book depreciation deductions will be reallocated equally between the partners, and section 704(c) will be applied with reference to such reallocation of book depreciation.

**Example 18.** (i) WM and JL form a general partnership by each contributing \$300,000 thereto. The partnership uses the \$600,000 to purchase an item of tangible personal property, which it leases out. The partnership elects under section 48 (q)(4) to reduce the amount of investment tax credit in lieu of adjusting the tax basis of such property. The partnership agreement provides that (1) the partners' capital account will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, (2) distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances (as set forth in paragraph (b)(2)(ii)(b)(2) of this section), (3) any partner with a deficit balance in his capital account following the liquidation of his interest must restore that deficit to the partnership (as set forth in paragraph (b)(2)(ii)(b)(3) of this section), (4) all income, gain, loss, and deduction of the partnership will be allocated equally between the partners, and (5) all non-liquidating distributions of the partnership will be made equally between the partners. Assume that in each of the partnership's taxable years, it recognizes operating income equal to its operating deductions (excluding cost recovery and depreciation deductions and gain or loss on the sale of its property). During its first 2 taxable years, the partner-

ship has an additional \$200,000 cost recovery deduction in each year. Pursuant to the partnership agreement these items are allocated equally between WM and JL.

	WM	JL
Capital account upon formation ....	\$300,000	\$300,000
Less: Net loss for years 1 and 2 ...	(200,000)	(200,000)
Capital account at end of year 2 .....	\$100,000	\$100,000

The allocations made in the partnership's first 2 taxable years have substantial economic effect.

(ii) Assume the same facts as in (i) and that MK is admitted to the partnership at the beginning of the partnership's third taxable year. At the time of his admission, the fair market value of the partnership property is \$600,000. MK contributes \$300,000 to the partnership in exchange for an equal one-third interest in the partnership, and, as permitted under paragraph (b)(2)(iv)(g), the capital accounts of WM and JL are adjusted upward to \$300,000 each to reflect the fair market value of partnership property. In addition, the partnership agreement is modified to provide that depreciation and gain or loss, as computed for tax purposes, with respect to the partnership property that appreciated prior to MK's admission will be shared among the partners in a manner that takes account of the variation between such property's \$200,000 adjusted tax basis and its \$600,000 book value in accordance with paragraph (b)(2)(iv)(f) and the special rule contained in paragraph (b)(4)(i) of this section. Depreciation and gain or loss, as computed for book purposes, with respect to such property will be allocated equally among the partners and, in accordance with paragraph (b)(2)(iv)(g) of this section, will be reflected in the partner's capital accounts, as will all other partnership income, gain, loss, and deduction. Since the requirements of (b)(2)(iv)(g) of this section are satisfied, the capital accounts of the partners (as adjusted) continue to be maintained in accordance with paragraph (B)(2)(iv) of this section.

(iii) Assume the same facts as in (ii) and that immediately after MK's admission to the partnership, the partnership property is sold for \$600,000, resulting in a taxable gain of \$400,000 (\$600,000 less \$200,000 adjusted tax basis) and no book gain or loss, and the partnership is liquidated. An allocation of the \$400,000 taxable gain cannot have economic effect because such gain cannot properly be reflected in the partners' book capital accounts. Consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement provides that the \$400,000 taxable gain will, in accordance with section 704(c) principles, be shared equally between WM and JL.

§ 1.704-1

26 CFR Ch. I (4-1-14 Edition)

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 3 .....	\$100,000	\$300,000	\$100,000	\$300,000	\$300,000	\$300,000
Plus: gain .....	200,000	0	200,000	0	0	0
Capital account before liquidation .....	\$300,000	\$300,000	\$300,000	\$300,000	\$300,000	\$300,000

The \$900,000 of partnership cash (\$600,000 sales proceeds plus \$300,000 contributed by MK) is distributed equally among WM, JL, and MK in accordance with their adjusted positive capital account balances, each of which is \$300,000.

(iv) Assume the same facts as in (iii) except that prior to liquidation the property

appreciates and is sold for \$900,000, resulting in a taxable gain of \$700,000 (\$900,000 less \$200,000 adjusted tax basis) and a book gain of \$300,000 (\$900,000 less \$600,000 book value). Under the partnership agreement the \$300,000 of book gain is allocated equally among the partners, and such allocation has substantial economic effect.

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 3 .....	\$100,000	\$300,000	\$100,000	\$300,000	\$300,000	\$300,000
Plus: gain .....	300,000	100,000	300,000	100,000	100,000	100,000
Capital account before liquidation .....	\$400,000	\$400,000	\$400,000	\$400,000	\$400,000	\$400,000

Consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement provides that the \$700,000 taxable gain is, in accordance with section 704(c) principles, shared \$300,000 to JL, \$300,000 to WM, and \$100,000 to MK. This ensures that (1) WM and JL share equally the \$400,000 taxable gain that is attributable to appreciation in the property that occurred prior to MK's admission to the partnership in the same manner as it was reflected in their capital accounts upon MK's admission,

and (2) WM, JL, and MK share equally the additional \$300,000 taxable gain in the same manner as they shared the \$300,000 book gain.

(v) Assume the same facts as in (ii) except that shortly after MK's admission the property depreciates and is sold for \$450,000, resulting in a taxable gain of \$250,000 (\$450,000 less \$200,000 adjusted tax basis) and a book loss of \$150,000 (450,000 less \$600,000 book value). Under the partnership agreement these items are allocated as follow:

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 3 .....	\$100,000	\$300,000	\$100,000	\$300,000	\$300,000	\$300,000
Plus: gain .....	125,000	0	125,000	0	0	0
Less: loss .....	0	(50,000)	0	(50,000)	0	(50,000)
Capital account before liquidation .....	\$225,000	\$250,000	\$225,000	\$250,000	\$300,000	\$250,000

The \$150,000 book loss is allocated equally among the partners, and such allocation has substantial economic effect. Consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement provides that the \$250,000 taxable gain is, in accordance with section 704(c) principles, shared equally between WM and JL. The fact that MK bears an economic loss of \$50,000 without a corresponding taxable loss is attributable entirely to the "ceiling rule." See paragraph (c)(2) of § 1.704-1.

(vi) Assume the same facts as in (ii) except that the property depreciates and is sold for \$170,000, resulting in a \$30,000 taxable loss (\$200,000 adjusted tax basis less \$170,000) and a book loss of \$430,000 (\$600,000 book value less \$170,000). The book loss of \$430,000 is allocated equally among the partners (\$143,333 each) and has substantial economic effect. Consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement provides that the entire \$30,000 taxable loss is, in accordance with

# Internal Revenue Service, Treasury

# § 1.704-1

section 704(c) principles, included in MK's distributive share.

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 3 .....	\$100,000	\$300,000	\$100,000	\$300,000	\$300,000	\$300,000
Less Loss .....	0	(143,333)	0	(143,333)	(30,000)	(143,333)
Capital account before liquidation .....	\$100,000	\$156,667	\$100,000	\$156,667	\$270,000	\$156,667

(vii) Assume the same facts as in (ii) and that during the partnership's third taxable year, the partnership has an additional \$100,000 cost recovery deduction and \$300,000 book depreciation deduction attributable to the property purchased by the partnership in its first taxable year. The \$300,000 book depreciation deduction is allocated equally among the partners, and that allocation has substantial economic effect. Consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of

this section, the partnership agreement provides that the \$100,000 cost recovery deduction for the partnership's third taxable year is, in accordance with section 704(c) principles, included in MK's distributive share. This is because under these facts those principles require MK to include the cost recovery deduction for such property in his distributive share up to the amount of the book depreciation deduction for such property properly allocated to him.

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 3 .....	\$100,000	\$300,000	\$100,000	\$300,000	\$300,000	\$300,000
Less: recovery/depreciation deduction for year 3 .....	0	(100,000)	0	(100,000)	(100,000)	(100,000)
Capital account at end of year 3 .....	\$100,000	\$200,000	\$100,000	\$200,000	\$200,000	\$200,000

(viii) Assume the same facts as in (vii) except that upon MK's admission the partnership property has an adjusted tax basis of \$220,000 (instead of \$200,000), and thus the cost recovery deduction for the partnership's third taxable year is \$110,000. Assume further that upon MK's admission WM and JL have adjusted capital account balances of \$110,000 and \$100,000, respectively. Consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement provides that the excess \$10,000 cost recovery deduction (\$110,000 less \$100,000 included in MK's distributive share) is, in accordance with section 704 (c) principles, shared equally between WM and JL and is so included in their respective distributive shares for the partnership's third taxable year.

(ix) Assume the same facts as in (vii) except that upon MK's admission the partnership agreement is amended to allocate the first \$400,000 of book depreciation and loss on partnership property equally between WM and JL and the last \$200,000 of such book de-

preciation and loss to MK. Assume such allocations have substantial economic effect. Pursuant to this amendment the \$300,000 book depreciation deduction in the partnership's third taxable year is allocated equally between WM and JL. Consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement provides that the \$100,000 cost recovery deduction is, in accordance with section 704(c) principles, shared equally between WM and JL. In the partnership's fourth taxable year, it has a \$60,000 cost recovery deduction and a \$180,000 book depreciation deduction. Under the amendment described above, the \$180,000 book depreciation deduction is allocated \$50,000 to WM, \$50,000 to JL, and \$80,000 to MK. Consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement provides that the \$60,000 cost recovery deduction is, in accordance with section 704(c) principles, included entirely in MK's distributive share.

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 3 .....	\$100,000	\$300,000	\$100,000	\$300,000	\$300,000	\$300,000

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Less:						
(a) recovery/depreciation deduction for year 3 .....	(50,000)	(150,000)	(50,000)	(150,000)	0	0
(b) recovery/depreciation deduction for year 4 .....	0	(50,000)	0	(50,000)	(60,000)	(80,000)
Capital account at end of year 4	\$50,000	\$100,000	\$50,000	\$100,000	\$240,000	\$220,000

(x) Assume the same facts as in (vii) and that at the beginning of the partnership's third taxable year, the partnership purchases a second item of tangible personal property for \$300,000 and elects under section 48(q) (4) to reduce the amount of investment tax credit in lieu of adjusting the tax basis of such property. The partnership agreement is amended to allocate the first \$150,000 of cost recovery deductions and loss from such property to WM and the next \$150,000 of cost recovery deductions and loss from such property equally between JL and MK. Thus, in the partnership's third taxable year it has, in addition to the items specified in (vii), a cost recovery and book depreciation deduction of \$100,000 attributable to the newly ac-

quired property, which is allocated entirely to WM.

As in (vii), the allocation of the \$300,000 book depreciation attributable to the property purchased in the partnership's first taxable year equally among the partners has substantial economic effect, and consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement properly provides for the entire \$100,000 cost recovery deduction attributable to such property to be included in MK's distributive share. Furthermore, the allocation to WM of the \$100,000 cost recovery deduction attributable to the property purchased in the partnership's third taxable year has substantial economic effect.

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 3 .....	\$100,000	\$300,000	\$100,000	\$300,000	\$300,000	\$300,000
Less:						
(a) recovery/depreciation deduction for property bought in year 1 .....	0	(100,000)	0	(100,000)	(100,000)	(100,000)
(b) recovery/depreciation deduction for property bought in year 3 .....	(100,000)	(100,000)	0	0	0	0
Capital account at end of year 3 ...	0	\$100,000	\$100,000	\$200,000	\$200,000	\$200,000

(xi) Assume the same facts as in (x) and that at the beginning of the partnership's fourth taxable year, the properties purchased in the partnership's first and third taxable years are disposed of for \$90,000 and \$180,000, respectively, and the partnership is liquidated. With respect to the property purchased in the first taxable year, there is a book loss of \$210,000 (\$300,000 book value less \$90,000) and a taxable loss of \$10,000 (\$100,000 adjusted tax basis less \$90,000). The book loss is allocated equally among the partners, and such allocation has substantial economic ef-

fect. Consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement provides that the taxable loss of \$10,000 will, in accordance with section 704(c) principles, be included entirely in MK's distributive share. With respect to the property purchased in the partnership's third taxable year, there is a book and taxable loss of \$20,000. Pursuant to the partnership agreement this loss is allocated entirely to WM, and such allocation has substantial economic effect.

## Internal Revenue Service, Treasury

## § 1.704-1

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account before liquidation	(\$20,000)	\$10,000	\$100,000	\$130,000	\$190,000	\$130,000

Partnership liquidation proceeds (\$270,000) are properly distributed in accordance with the partners' adjusted positive book capital account balances (\$10,000 to WM, \$130,000 to JL and \$130,000 to MK).

(xii) Assume the same facts as in (x) and that in the partnership's fourth taxable year it has a cost recovery deduction of \$60,000 and book depreciation deduction of \$180,000 attributable to the property purchased in the partnership's first taxable year, and a cost recovery and book depreciation deduction of \$100,000 attributable to the property purchased in the partnership's third taxable year. The \$180,000 book depreciation deduction attributable to the property purchased in the partnership's first taxable year is allo-

cated equally among the partners, and such allocation has substantial economic effect. Consistent with the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, the partnership agreement provides that the \$60,000 cost recovery deduction attributable to the property purchased in the first taxable year is, in accordance with section 704(c) principles, included entirely in MK's distributive share. Furthermore, the \$100,000 cost recovery deduction attributable to the property purchased in the third taxable year is allocated \$50,000 to WM, \$25,000 to JL, and \$25,000 to MK, and such allocation has substantial economic effect.

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 4 .....	0	\$100,000	\$100,000	\$200,000	\$200,000	\$200,000
Less:						
(a) recovery/depreciation deduction for property bought in year 1 .....	0	(60,000)	0	(60,000)	(60,000)	(60,000)
(b) recovery/depreciation deduction for property bought in year 3 .....	(50,000)	(50,000)	(25,000)	(25,000)	(25,000)	(25,000)
Capital account at end of year 4	(\$50,000)	(\$10,000)	\$75,000	\$115,000	\$115,000	\$115,000

At the end of the partnership's fourth taxable year the adjusted tax bases of the partnership properties acquired in its first and third taxable years are \$40,000 and \$100,000, respectively. If the properties are disposed of at the beginning of the partnership's fifth

taxable year for their adjusted tax bases, there would be no taxable gain or loss, a book loss of \$80,000 on the property purchased in the partnership's first taxable year (\$120,000 book value less \$40,000), and cash available for distribution of \$140,000.

	WM		JL		MK	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 5 .....	(\$50,000)	(\$10,000)	\$75,000	\$115,000	\$115,000	\$115,000
Less: loss .....	0	(26,667)	0	(26,667)	0	(26,667)
Capital account before liquidation ...	(\$50,000)	(\$36,667)	\$75,000	\$88,333	\$115,000	\$88,333

If the partnership is then liquidated, the \$140,000 of cash on hand plus the \$36,667 balance that WM would be required to contribute to the partnership (the deficit balance in his book capital account) would be distributed equally between JL and MK in accordance with their adjusted positive book capital account balances.

(xiii) Assume the same facts as in (i). Any tax preferences under section 57(a)(12) attributable to the partnership's cost recovery deductions in the first 2 taxable years will be

taken into account equally by WM and JL. If the partnership agreement instead provides that the partnership's cost recovery deductions in its first 2 taxable years are allocated 25 percent to WM and 75 percent to JL (and such allocations have substantial economic effect), the tax preferences attributable to such cost recovery deductions would be taken into account 25 percent by WM and 75 percent by JL. The conclusion in the previous sentence is unchanged even if the partnership's operating expenses (exclusive of

cost recovery and depreciation deductions) exceed its operating income in each of the partnership's first 2 taxable years, the resulting net loss is allocated entirely to WM, and the cost recovery deductions are allocated 25 percent to WM and 75 percent to JL (provided such allocations have substantial economic effect). If the partnership agreement instead provides that all income, gain, loss, and deduction (including cost recovery and depreciations) are allocated equally between JL and WM, the tax preferences attributable to the cost recovery deductions would be taken into account equally by JL and WM. In this case, if the partnership has a \$100,000 cost recovery deduction in its first taxable year and an additional net loss of \$100,000 in its first taxable year (*i.e.*, its operating expenses exceed its operating income by \$100,000) and purports to categorize JL's \$100,000 distributive share of partnership loss as being attributable to the cost recovery deduction and WM's \$100,000 distributive share of partnership loss as being attributable to the net loss, the economic effect of such allocations is not substantial, and each partner will be allocated one-half of all partnership income, gain, loss, and deduction and will take into account one-half of the tax preferences attributable to the cost recovery deductions.

*Example 19.* (i) DG and JC form a general partnership for the purpose of drilling oil wells. DG contributes an oil lease, which has a fair market value and adjusted tax basis of \$100,000. JC contributes \$100,000 in cash, which is used to finance the drilling operations. The partnership agreement provides that DG is credited with a capital account of \$100,000, and JC is credited with a capital account of \$100,000. The agreement further provides that the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances, and any partner with a deficit balance in his capital account following the liquidation of his interest must restore such deficit to the partnership (as set forth in paragraphs (b)(2)(ii)(b) (2) and (3) of this section. The partnership chooses to adjust capital accounts on a simulated cost depletion basis and elects under section 48(q)(4) to reduce the amount of investment tax credit in lieu of adjusting the basis of its section 38 property. The agreement further provides that (1) all additional cash requirements of the partnership will be borne equally by DG and JC, (2) the deductions attributable to the property (including money) contributed by each partner will be allocated to such partner, (3) all other income, gain, loss, and deductions (and item thereof) will be allocated equally between DG and JC, and (4) all cash from operations will be distrib-

uted equally between DG and JC. In the partnership's first taxable year \$80,000 of partnership intangible drilling cost deductions and \$20,000 of cost recovery deductions on partnership equipment are allocated to JC, and the \$100,000 basis of the lease is, for purposes of the depletion allowance under sections 611 and 613A(c)(7)(D), allocated to DG. The allocations of income, gain, loss, and deduction provided in the partnership agreement have substantial economic effect. Furthermore, since the allocation of the entire basis of the lease to DG will not result in capital account adjustments (under paragraph (b)(2)(iv)(k) of this section) the economic effect of which is insubstantial, and since all other partnership allocations are recognized under this paragraph, the allocation of the \$100,000 adjusted basis of the lease to DG is, under paragraph (b)(4)(v) of this section, recognized as being in accordance with the partners' interests in partnership capital for purposes of section 613A(c)(7)(D).

(ii) Assume the same facts as in (i) except that the partnership agreement provides that (1) all additional cash requirements of the partnership for additional expenses will be funded by additional contributions from JC, (2) all cash from operations will first be distributed to JC until the excess of such cash distributions over the amount of such additional expense equals his initial \$100,000 contributions, (3) all deductions attributable to such additional operating expenses will be allocated to JC, and (4) all income will be allocated to JC until the aggregate amount of income allocated to him equals the amount of partnership operating expenses funded by his initial \$100,000 contribution plus the amount of additional operating expenses paid from contributions made solely by him. The allocations of income, gain, loss, and deduction provided in partnership agreement have economic effect. In addition, the economic effect of the allocations provided in the agreement is substantial. Because the partnership's drilling activities are sufficiently speculative, there is not a strong likelihood at the time the disproportionate allocations of loss and deduction to JC are provided for by the partnership agreement that the economic effect of such allocations will be largely offset by allocations of income. In addition, since the allocation of the entire basis of the lease to DG will not result in capital account adjustments (under paragraph (b)(2)(iv)(k) of this section) the economic effect of which is insubstantial, and since all other partnership allocations are recognized under this paragraph, the allocation of the adjusted basis of the lease to DG is, under paragraph (b)(4)(v) of this section, recognized as being in accordance with the partners' interests in partnership capital under section 613A(c)(7)(D).

(iii) Assume the same facts as in (i) except that all distributions, including those made

upon liquidation of the partnership, will be made equally between DG and JC, and no partner is obligated to restore the deficit balance in his capital account to the partnership following the liquidation of his interest for distribution to partners with positive capital account balances. Since liquidation proceeds will be distributed equally between DG and JC irrespective of their capital account balances, and since no partner is required to restore the deficit balance in his capital account to the partnership upon liquidation (in accordance with paragraph (b)(2)(ii)(b)(3) of this section), the allocations of income, gain, loss, and deduction provided in the partnership agreement do not have economic effect and must be reallocated in accordance with the partners' interests in the partnership under paragraph (b)(3) of this section. Under these facts all partnership income, gain, loss, and deduction (and item thereof) will be reallocated equally between JC and DG. Furthermore, the allocation of the \$100,000 adjusted tax basis of the lease of DG is not, under paragraph (b)(4)(v) of this section, deemed to be in accordance with the partners' interests in partnership capital under section 613A(c)(7)(D), and such basis must be reallocated in accordance with the partners' interests in partnership capital or income as determined under section 613A(c)(7)(D). The results in this example would be the same if JC's initial cash contribution were \$1,000,000 (instead of \$100,000), but in such case the partners should consider whether, and to what extent, the provisions of paragraph (b)(1) of § 1.721-1, and principles related thereto, may be applicable.

(iv) Assume the same facts as in (i) and that for the partnership's first taxable year the simulated depletion deduction with respect to the lease is \$10,000. Since DG properly was allocated the entire depletable basis of the lease (such allocation having been recognized as being in accordance with DG's interest in partnership capital with respect to such lease), under paragraph (b)(2)(iv)(k)(I) of this section the partnership's \$10,000 simulated depletion deduction is allocated to DG and will reduce his capital account accordingly. If (prior to any additional simulated depletion deductions) the lease is sold for \$100,000, paragraph (b)(4)(v) of this section requires that the first \$90,000 (*i.e.*, the partnership's simulated adjusted basis in the lease) out of the \$100,000 amount realized on such sale be allocated to DG (but does not directly affect his capital account). The partnership agreement allocates the remaining \$10,000 amount realized equally between JC and DG (but such allocation does not directly affect their capital accounts). This allocation of the \$10,000 portion of amount realized that exceeds the partnership's simulated adjusted basis in the lease will be treated as being in accordance with the partners' allocable shares of such amount realized under section

613A(c)(7)(D) because such allocation will not result in capital account adjustments (under paragraph (b)(2)(iv)(k) of this section) the economic effect of which is insubstantial, and all other partnership allocations are recognized under this paragraph. Under paragraph (b)(2)(iv)(k) of this section, the partners' capital accounts are adjusted upward by the partnership's simulated gain of \$10,000 (\$100,000 sales price less \$90,000 simulated adjusted basis) in proportion to such partners' allocable shares of the \$10,000 portion of the total amount realized that exceeds the partnership's \$90,000 simulated adjusted basis (\$5,000 to JC and \$5,000 to DG). If the lease is sold for \$50,000, under paragraph (b)(4)(v) of this section the entire \$50,000 amount realized on the sale of the lease will be allocated to DG (but will not directly affect his capital account). Under paragraph (b)(2)(iv)(k) of this section the partners' capital accounts will be adjusted downward by the partnership's \$40,000 simulated loss (\$50,000 sales price less \$90,000 simulated adjusted basis) in proportion to the partners' allocable shares of the total amount realized from the property that represents recovery of the partnership's simulated adjusted basis therein. Accordingly, DG's capital account will be reduced by such \$40,000.

*Example 20.* (i) A and B form AB, an eligible entity (as defined in § 301.7701-3(a) of this chapter), treated as a partnership for U.S. tax purposes. AB operates business M in country X and earns income from passive investments in country X. Country X imposes a 40 percent tax on business M income, which tax is a CFTE, but exempts from tax income from passive investments. In 2007, AB earns \$100,000 of income from business M and \$30,000 from passive investments and pays or accrues \$40,000 of country X taxes. For purposes of section 904(d), the income from business M is general limitation income and the income from the passive investments is passive income. Pursuant to the partnership agreement, all partnership items, including CFTEs, from business M are allocated 60 percent to A and 40 percent to B, and all partnership items, including CFTEs, from passive investments are allocated 80 percent to A and 20 percent to B. Accordingly, A is allocated 60 percent of the business M income (\$60,000) and 60 percent of the country X taxes (\$24,000), and B is allocated 40 percent of the business M income (\$40,000) and 40 percent of the country X taxes (\$16,000). The income from the passive investments is allocated \$24,000 to A and \$6,000 to B. Assume that allocations of all items other than CFTEs are valid.

(ii) Because the partnership agreement provides for different allocations of the net income attributable to business M and the passive investments, the net income attributable to each is income in a separate CFTE category. See paragraph (b)(4)(viii)(c)(2) of

this section. AB must determine the net income in each CFTE category and the CFTEs allocable to each CFTE category. Under paragraph (b)(4)(viii)(c)(3) of this section, the net income in the business M CFTE category is the \$100,000 attributable to business M and the net income in the passive investments CFTE category is the \$30,000 attributable to the passive investments. Under paragraph (b)(4)(viii)(d) of this section, the \$40,000 of country X taxes is allocated to the business M CFTE category and no portion of the country X taxes is allocated to the passive investments CFTE category. Therefore, the \$40,000 of country X taxes are related to the \$100,000 of net income in the business M CFTE category. See paragraph (b)(4)(viii)(c)(1) of this section. Because AB's partnership agreement allocates the net income from the business M CFTE category 60 percent to A and 40 percent to B, and the country X taxes 60 percent to A and 40 percent to B, the allocations of the CFTEs are in proportion to the distributive shares of income to which the CFTEs relate. Because AB satisfies the requirement of paragraph (b)(4)(viii) of this section, the allocations of the country X taxes are deemed to be in accordance with the partners' interests in the partnership. Because the business M income is general limitation income, all \$40,000 of taxes are attributable to the general limitation category. See § 1.904-6.

*Example 21.* (i) A and B form AB, an eligible entity (as defined in § 301.7701-3(a) of this chapter), treated as a partnership for U.S. tax purposes. AB operates business M in country X and business N in country Y. Country X imposes a 40 percent tax on business M income, country Y imposes a 20 percent tax on business N income, and the country X and country Y taxes are CFTEs. In 2007, AB has \$100,000 of income from business M and \$50,000 of income from business N. Country X imposes \$40,000 of tax on the income from business M and country Y imposes \$10,000 of tax on the income of business N. Pursuant to the partnership agreement, all partnership items, including CFTEs, from business M are allocated 75 percent to A and 25 percent to B, and all partnership items, including CFTEs, from business N are split evenly between A and B (50 percent each). Accordingly, A is allocated 75 percent of the income from business M (\$75,000), 75 percent of the country X taxes (\$30,000), 50 percent of the income from business N (\$25,000), and 50 percent of the country Y taxes (\$5,000). B is allocated 25 percent of the income from business M (\$25,000), 25 percent of the country X taxes (\$10,000), 50 percent of the income from business N (\$25,000), and 50 percent of the country Y taxes (\$5,000). Assume that allocations of all items other than CFTEs are valid. The income from business M and business N is general limitation income for purposes of section 904(d).

(ii) Because the partnership agreement provides for different allocations of the net income attributable to businesses M and N, the net income attributable to each business is income in a separate CFTE category even though all of the income is in the general limitation category for section 904(d) purposes. See paragraph (b)(4)(viii)(c)(2) of this section. Under paragraph (b)(4)(viii)(c)(3) of this section, the net income in the business M CFTE category is the \$100,000 attributable to business M and the net income in the business N CFTE category is \$50,000 attributable to business N. Under paragraph (b)(4)(viii)(d) of this section, the \$40,000 of country X taxes is allocated to the business M CFTE category and the \$10,000 of country Y taxes is allocated to the business N CFTE category. Therefore, the \$40,000 of country X taxes are related to the \$100,000 of net income in the business M CFTE category and the \$10,000 of country Y taxes are related to the \$50,000 of net income in the business N CFTE category. See paragraph (b)(4)(viii)(c)(1) of this section. Because AB's partnership agreement allocates the \$40,000 of country X taxes in the same proportion as the net income in the business M CFTE category, and the \$10,000 of country Y taxes in the same proportion as the net income in the business N CFTE category, the allocations of the country X taxes and the country Y taxes are in proportion to the distributive shares of income to which the foreign taxes relate. Because AB satisfies the requirements of paragraph (b)(4)(viii) of this section, the allocations of the country X and country Y taxes are deemed to be in accordance with the partners' interests in the partnership.

*Example 22.* (i) The facts are the same as in *Example 21*, except that the partnership agreement provides for the following allocations. Depreciation attributable to machine X, which is used in business M, is allocated 100 percent to A. B is allocated the first \$20,000 of gross income attributable to business N, which allocation does not result in a deduction under foreign law. All remaining items, except CFTEs, are allocated 50 percent to A and 50 percent to B. For 2007, assume that business M generates \$120,000 of income, before taking into account depreciation attributable to machine X. The total amount of depreciation attributable to machine X is \$20,000, which results in \$100,000 of net income attributable to business M for U.S. and country X tax purposes. Business N generates \$70,000 of gross income and has \$20,000 of expenses, resulting in \$50,000 of net income for U.S. and country Y tax purposes. Pursuant to the partnership agreement, A is allocated \$40,000 of the net income attributable to business M (\$60,000 of business M income less \$20,000 of depreciation attributable to machine X), and \$15,000 of the net income attributable to business N. B is allocated \$60,000 of the net income attributable

to business M and \$35,000 of the net income attributable to business N (\$20,000 of gross income, plus \$15,000 of net income).

(ii) As a result of the special allocations, the net income attributable to business M (\$100,000) is allocated 40 percent to A and 60 percent to B. The net income attributable to business N (\$50,000) is allocated 30 percent to A and 70 percent to B. Because the partnership agreement provides for different allocations of the net income attributable to businesses M and N, the net income from each of businesses M and N is income in a separate CFTE category. See paragraph (b)(4)(viii)(c)(2) of this section. Under paragraph (b)(4)(viii)(c)(3) of this section, the net income in the business M CFTE category is the \$100,000 of net income attributable to business M and the net income in the business N CFTE category is the \$50,000 of net income attributable to business N. Under paragraph (b)(4)(viii)(d)(1) of this section, the \$40,000 of country X taxes is allocated to the business M CFTE category and the \$10,000 of country Y taxes is allocated to the business N CFTE category. Therefore, the \$40,000 of country X taxes relates to the \$100,000 of net income in the business M CFTE and the \$10,000 of country Y taxes relates to the \$50,000 of net income in the business N CFTE category. See paragraph (b)(4)(viii)(c)(1) of this section. The allocations of the country X taxes will be in proportion to the distributive shares of income to which they relate and will be deemed to be in accordance with the partners' interests in the partnership if such taxes are allocated 40 percent to A and 60 percent to B. The allocations of the country Y taxes will be in proportion to the distributive shares of income to which they relate and will be deemed to be in accordance with the partners' interests in the partnership if such taxes are allocated 30 percent to A and 70 percent to B.

(iii) Assume that for 2008, all the facts are the same as in paragraph (i) of this *Example 22*, except that business M generates \$60,000 of income before taking into account depreciation attributable to machine X and country X imposes \$16,000 of tax on the \$40,000 of net income attributable to business M. Pursuant to the partnership agreement, A is allocated 25 percent of the income from business M (\$10,000), and B is allocated 75 percent of the income from business M (\$30,000). Allocations of the country X taxes will be in proportion to the distributive shares of income to which they relate and will be deemed to be in accordance with the partners' interests in the partnership if such taxes are allocated 25 percent to A and 75 percent to B.

*Example 23.* (i) The facts are the same as in *Example 21*, except that AB does not actually receive the \$50,000 of income accrued in 2007 with respect to business N until 2008 and AB accrues and receives an additional \$100,000 with respect to business N in 2008. Also as-

sume that A, B, and AB each report taxable income on an accrual basis for U.S. tax purposes and AB reports taxable income using the cash receipts and disbursements method of accounting for country X and country Y purposes. In 2007, AB pays or accrues country X taxes of \$40,000. In 2008, AB pays or accrues country Y taxes of \$30,000. Pursuant to the partnership agreement, in 2007, A is allocated 75 percent of business M income (\$75,000) and country X taxes (\$30,000) and 50 percent of business N income (\$25,000). B is allocated 25 percent of business M income (\$25,000) and country X taxes (\$10,000) and 50 percent of business N income (\$25,000). In 2008, A and B are each allocated 50 percent of the business N income (\$50,000) and country Y taxes (\$15,000).

(ii) For 2007, the \$40,000 of country X taxes paid or accrued by AB relates to the \$100,000 of net income in the business M CFTE category. No portion of the country X taxes paid or accrued in 2007 relates to the \$50,000 of net income in the business N CFTE category. For 2008, the net income in the business N CFTE category is the \$100,000 attributable to business N. See paragraph (b)(4)(viii)(c)(3) of this section. Under paragraph (b)(4)(viii)(d)(1) of this section, \$20,000 of the country Y tax paid or accrued in 2008 is allocated to the business N CFTE category. The remaining \$10,000 of country Y tax is allocated to the business N CFTE category under paragraph (b)(4)(viii)(d)(2) of this section (relating to timing differences). Therefore, the \$30,000 of country Y taxes paid or accrued by AB in 2008 is related to the \$100,000 of net income in the business N CFTE category for 2008. See paragraph (b)(4)(viii)(c)(1) of this section. Because AB's partnership agreement allocates the \$40,000 of country X taxes and the \$30,000 of country Y taxes in proportion to the distributive shares of income to which the taxes relate, the allocations of the country X and country Y taxes satisfy the requirements of paragraphs (b)(4)(viii)(a)(1) and (2) of this section and the allocations of the country X and Y taxes are deemed to be in accordance with the partners' interests in the partnership under paragraph (b)(4)(viii) of this section.

*Example 24.* [Reserved] For further guidance, see § 1.704-1T(b)(5) *Example 24*.

*Example 25.* (i) A contributes \$750,000 and B contributes \$250,000 to form AB, an eligible entity (as defined in § 301.7701-3(a) of this chapter), treated as a partnership for U.S. tax purposes. AB operates business M in country X. Country X imposes a 20 percent tax on the net income from business M, which tax is a CFTE. In 2007, AB earns \$300,000 of gross income, has deductible expenses of \$100,000, and pays or accrues \$40,000 of country X tax. Pursuant to the partnership agreement, the first \$100,000 of gross income each year is allocated to A as a return

on excess capital contributed by A. All remaining partnership items, including CFTEs, are split evenly between A and B (50 percent each). The gross income allocation is not deductible in determining AB's taxable income under country X law. Assume that allocations of all items other than CFTEs are valid.

(ii) AB has a single CFTE category because all of AB's net income is allocated in the same ratio. See paragraph (b)(4)(viii)(c)(2). Under paragraph (b)(4)(viii)(c)(3) of this section, the net income in the single CFTE category is \$200,000. The \$40,000 of taxes is allocated to the single CFTE category and, thus, related to the \$200,000 of net income in the single CFTE category. In 2007, AB's partnership agreement allocates \$150,000 or 75 percent of the net income to A (\$100,000 attributable to the gross income allocation plus \$50,000 of the remaining \$100,000 of net income) and \$50,000 or 25 percent of the net income to B. AB's partnership agreement allocates the country X taxes in accordance with the partners' shares of partnership items remaining after the \$100,000 gross income allocation. Therefore, AB allocates the country X taxes 50 percent to A (\$20,000) and 50 percent to B (\$20,000). AB's allocations of country X taxes are not deemed to be in accordance with the partners' interests in the partnership under paragraph (b)(4)(viii) of this section, because they are not in proportion to the allocations of the distributive shares of income to which the country X taxes relate. Accordingly, the country X taxes will be reallocated according to the partners' interests in the partnership. Assuming that the partners do not reasonably expect to claim a deduction for the CFTE in determining their U.S. tax liabilities, a reallocation of the CFTEs under paragraph (b)(3) of this section would be 75 percent to A (\$30,000) and 25 percent to B (\$10,000). If the reallocation of the CFTEs causes the partners' capital accounts not to reflect their contemplated economic arrangement, the partners may need to reallocate other partnership items to ensure that the tax consequences of the partnership's allocations are consistent with their contemplated economic arrangement over the term of the partnership. The Commissioner will not reallocate other partnership items after the reallocation of the CFTEs.

(iii) The facts are the same as in paragraph (i) of this *Example 25*, except that the \$100,000 allocation of gross income is deductible under country X law and that AB pays or accrues \$20,000 of foreign tax. Under paragraph (b)(4)(viii)(c)(3) of this section, the net income in the single CFTE category is the \$100,000 of net income, determined by disregarding the \$100,000 of gross income that is allocated to A and deductible in determining AB's taxable income under the law of country X. See paragraph (b)(4)(viii)(c)(3)(ii) of

this section. The \$20,000 of country X tax is allocated to the single CFTE category, and, thus, related to the \$100,000 of net income in the single CFTE category. See paragraphs (b)(4)(viii)(c)(1) and (d) of this section. No portion of the tax is related to the \$100,000 of gross income allocated to A. Pursuant to the partnership agreement, AB allocates the country X taxes 50 percent to A (\$10,000) and 50 percent to B (\$10,000). AB's allocations of country X taxes are deemed to be in accordance with the partners' interests in the partnership under paragraph (b)(4)(viii) of this section.

(iv) The results in (ii) and (iii) of this *Example 25* would be the same assuming all of the facts except that, rather than being a preferential gross income allocation, the \$100,000 was a guaranteed payment to A within the meaning of section 707(c). See paragraph (b)(4)(viii)(c)(3) of this section.

*Example 26.* (i) A and B form AB, an eligible entity (as defined in §301.7701-3(a) of this chapter), treated as a partnership for U.S. tax purposes. AB operates business M in country X and business N in country Y. A, a U.S. corporation, contributes a building with a fair market value of \$200,000 and an adjusted basis of \$50,000 for both U.S. and country X purposes. The building contributed by A is used in business M. B, a country X corporation, contributes \$800,000 cash. The AB partnership agreement provides that AB will make allocations under section 704(c) using the traditional method under §1.704-3(b) and that all other items, excluding creditable foreign taxes, will be allocated 20 percent to A and 80 percent to B. The partnership agreement provides that creditable foreign taxes will be allocated in proportion to the partners' distributive shares of net income in each CFTE category, which shall be determined by taking into accounts items allocated pursuant to section 704(c). Country X and Country Y impose tax at a rate of 20 percent and 40 percent, respectively, and such taxes are CFTEs. In 2007, AB sells the building contributed by A for \$200,000, thereby recognizing taxable income of \$150,000 for U.S. and country X purposes, and recognizes \$250,000 of other income from the operation of business M. AB pays or accrues \$80,000 of country X tax on such income. Also in 2007, business N recognizes \$100,000 of taxable income for U.S. and country Y purposes and pays or accrues \$40,000 of country Y tax. Pursuant to the partnership agreement, A is allocated \$200,000 of business M income (\$150,000 of taxable income in accordance with section 704(c) and \$50,000 of other business M income) and \$40,000 of country X tax, and 20 percent of both business N income (\$20,000) and country Y tax (\$8,000). B is allocated \$200,000 of business M income and \$40,000 of country X tax and 80 percent of both the business N income (\$80,000) and

country Y tax (\$32,000). Assume that allocations of all items other than CFTEs are valid.

(ii) The net income attributable to business M (\$400,000) is allocated 50 percent to A and 50 percent to B while the net income attributable to business N (\$100,000) is allocated 20 percent to A and 80 percent to B. Because the partnership agreement provides for different allocations of the net income attributable to businesses M and N, the net income attributable to each activity is income in a separate CFTE category. See paragraph (b)(4)(viii)(c)(2) of this section. Under paragraph (b)(4)(viii)(c)(3) of this section, the net income in the business M CFTE category is the \$400,000 of net income attributable to business M and the net income in the business N CFTE category is the \$100,000 of net income attributable to business N. Under paragraph (b)(4)(viii)(d)(1) of this section, the \$80,000 of country X tax is allocated to the business M CFTE category and the \$40,000 of country Y tax is allocated to the business N CFTE category. Therefore, the \$80,000 of country X tax relates to the \$400,000 of net income in the business M CFTE category and the \$40,000 of country Y tax relates to the \$100,000 of net income in the business N CFTE category. See paragraph (b)(4)(viii)(c)(1) of this section. Because AB's partnership agreement allocates the \$80,000 of country X taxes and \$40,000 of country Y taxes in proportion to the distributive shares of income to which such taxes relate, the allocations are deemed to be in accordance with the partners' interests in the partnership under paragraph (b)(4)(viii) of this section.

*Example 27.* (i) A, a U.S. citizen, and B, a country X citizen, form AB, a country X eligible entity (as defined in §301.7701-3(a) of this chapter), treated as a partnership for U.S. tax purposes. AB's only activity is business M, which it operates in country X. Country X imposes a 40 percent tax on the portion of AB's business M income that is the allocable share of AB's owners that are not citizens of country X, which tax is a CFTE. The partnership agreement provides that all partnership items, excluding CFTEs, from business M are allocated 40 percent to A and 60 percent to B. CFTEs are allocated 100 percent to A. In 2007, AB earns \$100,000 of net income from business M and pays or accrues \$16,000 of country X taxes on A's allocable share of AB's income (\$40,000). Pursuant to the partnership agreement, A is allocated 40 percent of the business M income (\$40,000) and 100 percent of the country X taxes (\$16,000), and B is allocated 60 percent of the business M income (\$60,000) and no country X taxes. Assume that allocations of all items other than CFTEs are valid.

(ii) AB has a single CFTE category because all of AB's net income is allocated in the same ratio. See paragraph (b)(4)(viii)(c)(2).

Under paragraph (b)(4)(viii)(c)(3) of this section, the \$40,000 of business M income that is allocated to A is included in the single CFTE category. Under paragraph (b)(4)(viii)(c)(3)(ii) of this section, no portion of the \$60,000 allocated to B is included in the single CFTE category. Under paragraph (b)(4)(viii)(d) of this section, the \$16,000 of taxes is allocated to the single CFTE category.

Therefore, the \$16,000 of country X taxes is related to the \$40,000 of net income in the single CFTE category that is allocated to A. See paragraph (b)(4)(viii)(c)(1) of this section. Because AB's partnership agreement allocates the country X taxes in proportion to the distributive share of income to which the taxes relate, AB satisfies the requirement of paragraph (b)(4)(viii) of this section, and the allocation of the country X taxes is deemed to be in accordance with the partners' interests in the partnership.

*Example 28.* (i) B, a domestic corporation, and C, a controlled foreign corporation, form BC, a partnership organized under the laws of country X. B and C each contribute 50 percent of the capital of BC. B and C are wholly-owned subsidiaries of A, a domestic corporation. Substantially all of BC's income would not be subpart F income if earned directly by C. The BC partnership agreement provides that, for the first fifteen years, BC's gross income will be allocated 10 percent to B and 90 percent to C, and BC's deductions and losses will be allocated 90 percent to B and 10 percent to C. The partnership agreement also provides that, after the initial fifteen year period, BC's gross income will be allocated 90 percent to B and 10 percent to C, and BC's deductions and losses will be allocated 10 percent to B and 90 percent to C.

(ii) Apart from the application of section 704(b), the Commissioner may reallocate or otherwise not respect the allocations under other sections. See paragraph (b)(1)(iii) of this section. For example, BC's allocations of gross income, deductions, and losses may be evaluated and reallocated (or not respected), as appropriate, if it is determined that the allocations result in the evasion of tax or do not clearly reflect income under section 482.

*Example 29.* PRS is a partnership with three equal partners, A, B, and C. A is a corporation that is a member of a consolidated group within the meaning of §1.1502-1(h). B is a subchapter S corporation that is wholly owned by D, an individual. C is a partnership with two partners, E, an individual, and F, a corporation that is a member of a consolidated group within the meaning of §1.1502-1(h). For purposes of paragraph (b)(2)(iii) of this section, in determining the after-tax economic benefit or detriment of an allocation to A, the tax consequences that result from the interaction of the allocation to A with the tax attributes of the consolidated group of which A is a member must be taken into account. In determining the after-tax

economic benefit or detriment of an allocation to B, the tax consequences that result from the interaction of the allocation with the tax attributes of D must be taken into account. In determining the after-tax economic benefit or detriment of an allocation to C, the tax consequences that result from the interaction of the allocation with the tax attributes of E and the consolidated group of which F is a member must be taken into account.

**Example 30.** (i) A, a controlled foreign corporation, and B, a foreign corporation that is not a controlled foreign corporation, form AB, a partnership organized under the laws of country X. The partnership agreement contains the provisions necessary to comply with the economic effect safe harbor of paragraph (b)(2)(ii)(b) of this section. A is wholly owned by C, a domestic corporation that is not a member of a consolidated group within the meaning of § 1.1502-1(h). B is wholly owned by an individual who is a citizen and resident of country X and is not related to A. Neither A, B, nor AB, is engaged in a trade or business in the United States. A and B each contribute 50 percent of the capital of AB. There is a strong likelihood that in each of the next several years AB will realize equal amounts of gross income that would constitute subpart F income if allocated to A, and gross income that would not constitute subpart F income if allocated to A (“non-subpart F income”). A and B agree to share bottom-line net income from AB equally; however, rather than share all items of gross income equally, A and B agree that B will be allocated all of AB’s subpart F income to the extent of its 50 percent share of bottom-line net income. In year 1, AB earns \$60x of income, \$30x of which is subpart F income and is allocated to B, and \$30x of which is non-subpart F income and is allocated to A.

(ii) Although neither A nor B is subject to U.S. tax with respect to its distributive share of the income of AB, under paragraph (b)(2)(iii)(d) of this section, the tax attributes of C must be taken into account with respect to A for purposes of applying the tests described in paragraphs (b)(2)(iii)(a), (b), and (c) of this section. The allocations in year 1 have economic effect. However, the economic effect of the allocations is not substantial under the test described in paragraph (b)(2)(iii)(b) of this section because there was a strong likelihood, at the time the allocations became part of the AB partnership agreement, that the net increases and decreases to A’s and B’s capital accounts in year 1 would not differ substantially when compared to the net increases and decreases to A’s and B’s capital accounts for year 1 if the allocations were not contained in the partnership agreement, and the total tax liability from the income earned by AB in year 1 (taking into account

the tax attributes of the allocations to C) would be reduced as a result of such allocations. Under paragraph (b)(3) of this section, the subpart F income and non-subpart F income earned by AB in year 1 must each be reallocated 50 percent to A and 50 percent to B.

**Example 31.** (i) In Year 1, A and B each contribute cash of \$9,000 to LLC, a newly formed limited liability company classified as a partnership for Federal tax purposes, in exchange for 100 units in LLC. Under the LLC agreement, each unit is entitled to participate equally in the profits and losses of LLC. LLC uses the cash contributions to purchase a nondepreciable property, Property A, for \$18,000. Later in Year 1, at a time when Property A is valued at \$20,000, LLC issues an option to C. The option allows C to buy 100 units in LLC for an exercise price of \$15,000 in Year 2. C pays \$1,000 to LLC to purchase the option. Assume that the LLC agreement satisfies the requirements of paragraph (b)(2) of this section and requires that, on the exercise of a noncompensatory option, LLC comply with the rules of paragraph (b)(2)(iv)(s) of this section. Also assume that C’s option is a noncompensatory option under § 1.721-2(f), and that C is not treated as a partner with respect to the option. Under paragraph (b)(2)(iv)(f)(5)(iv) of this section, LLC revalues its property in connection with the issuance of the option. The \$2,000 unrealized gain in Property A is allocated equally to A and B under the LLC agreement. In Year 2, C exercises the option, contributing the \$15,000 exercise price to the partnership. At the time the option is exercised, the value of Property A is \$35,000.

	Basis	Value
Total .....	34,000	51,000

(ii) In lieu of revaluing LLC's property under paragraph (b)(2)(iv)(f) of this section immediately before the option is exercised, under paragraph (b)(2)(iv)(s)(I) of this section LLC must revalue its property under the principles of paragraph (b)(2)(iv)(f) of this section immediately after the exercise of the option. Under paragraphs (b)(2)(iv)(b) and (b)(2)(iv)(d)(4) of this section, C's capital account is credited with the amount paid for the option (\$1,000) and the exercise price of the option (\$15,000). Under the LLC agreement, however, C is entitled to LLC capital corresponding to 100 units of LLC ( $\frac{1}{3}$  of LLC's capital). Immediately after the exercise of the option, LLC's properties are cash of \$16,000 (\$1,000 premium and \$15,000 exercise price contributed by C) and Property A, which has a value of \$35,000. Thus, the total value of LLC's property is \$51,000. C is entitled to LLC capital equal to  $\frac{1}{3}$  of this value, or \$17,000. As C is entitled to \$1,000 more LLC capital than C's capital contributions to LLC, the provisions of paragraph (b)(2)(iv)(s) of this section apply.

(iii) Under paragraph (b)(2)(iv)(s)(2) of this section, LLC must increase C's capital account from \$16,000 to \$17,000 by, first, revaluing LLC property in accordance with the principles of paragraph (b)(2)(iv)(f) of this section. The unrealized gain in LLC's property (Property A) which has not been reflected in the capital accounts previously is \$15,000 (\$35,000 value less \$20,000 book value). Under paragraph (b)(2)(iv)(s)(2) of this section, the first \$1,000 of this gain must be allocated to C, and the remaining \$14,000 of this gain is allocated equally to A and B in accordance with the LLC agreement. Because the revaluation of LLC property under paragraph (b)(2)(iv)(s)(2) of this section increases C's capital account to the amount agreed on by the members, LLC is not required to make a capital account reallocation under paragraph (b)(2)(iv)(s)(3) of this section. The \$17,000 of unrealized booked gain in Property A (\$35,000 value less \$18,000 basis) is shared \$8,000 to each A and B, and \$1,000 to C. Under paragraph (b)(2)(iv)(f)(4) of this section, the tax items from the revalued property must be allocated in accordance with section 704(c) principles.

*Example 32.* (i) Assume the same facts as in *Example 31*, except that, in Year 2, before the exercise of the option, LLC sells Property A for \$40,000, recognizing gain of \$22,000. LLC does not distribute the sale proceeds to its partners and it has no other earnings in Year 2. With the proceeds (\$40,000), LLC purchases Property B, a nondepreciable property. Also assume that C exercises the noncompensatory option at the beginning of Year 3 and that, at the time C exercises the option, the value of Property B is \$41,000. In Year 3, LLC has gross income of \$3,000 and deductions of \$1,500.

Year 2 After Purchase of Property B		
Assets:		
Cash Premium .....	\$1,000	\$1,000
Property B .....	40,000	40,000
Total .....	41,000	41,000
Liabilities and Capital:		
Cash Premium .....	1,000	1,000
A .....	20,000	20,000

B .....	20,000	20,000
Total .....	41,000	41,000
Year 3 After Exercise of the Option		
Assets:		
Property B .....	40,000	41,000
Cash .....	16,000	16,000
Total .....	56,000	57,000
Liabilities and Capital:		
A .....	20,000	19,000
B .....	20,000	19,000
C .....	16,000	19,000
Total .....	56,000	57,000

(ii) Under paragraphs (b)(2)(iv)(b) and (b)(2)(iv)(d)(4) of this section, C's capital account is credited with the amount paid for the option (\$1,000) and the exercise price of the option (\$15,000). Under the LLC agreement, however, C is entitled to LLC capital corresponding to 100 units of LLC ( $\frac{1}{3}$  of LLC's capital). Immediately after the exercise of the option, LLC's properties are

§ 1.704-1

26 CFR Ch. I (4-1-14 Edition)

\$16,000 cash (\$1,000 option premium and \$15,000 exercise price contributed by C) and Property B, which has a value of \$41,000. Thus, the total value of LLC's property is \$57,000. C is entitled to LLC capital equal to 1/3 of this amount, or \$19,000. As C is entitled to \$3,000 more LLC capital than C's capital contributions to LLC, the provisions of paragraph (b)(2)(iv)(s) of this section apply.

(iii) In lieu of revaluing LLC's property under paragraph (b)(2)(iv)(f) of this section immediately before the option is exercised, under paragraph (b)(2)(iv)(s)(I) of this section LLC must revalue its property under the principles of paragraph (b)(2)(iv)(f) of this section immediately after the exercise of the option. Under paragraph (b)(2)(iv)(s) of this section, LLC must increase C's capital account from \$16,000 to \$19,000 by, first, revaluing LLC property in accordance with the principles of paragraph (b)(2)(iv)(f) of this section, and allocating all \$1,000 of unrealized gain from the revaluation to C under paragraph (b)(2)(iv)(s)(2). This brings C's capital account to \$17,000.

(iv) Next, under paragraph (b)(2)(iv)(s)(3) of this section, LLC must reallocate \$2,000 of

capital from the existing partners (A and B) to C to bring C's capital account to \$19,000 (the capital account reallocation). As A and B shared equally in all items from Property A, whose sale gave rise to the need for the capital account reallocation, each member's capital account is reduced by 1/2 of the \$2,000 reduction (\$1,000).

(v) Under paragraph (b)(2)(iv)(s)(4) of this section, beginning in the year in which the option is exercised, LLC must make corrective allocations so as to take into account the capital account reallocation. In Year 3, LLC has gross income of \$3,000 and deductions of \$1,500. Under paragraph (b)(4)(x)(c), LLC must allocate the book gross income of \$3,000 equally among A, B, and C, but for tax purposes, however, LLC must allocate all of its gross income (\$3,000) to C. LLC's book and tax deductions (\$1,500) will then be allocated equally among A, B, and C. The \$1,000 unrealized booked gain in Property B has been allocated entirely to C. Under paragraph (b)(2)(iv)(f)(4) of this section, the tax items from Property B must be allocated in accordance with section 704(c) principles.

*Example 33.* (i) In Year 1, D and E each contribute cash of \$10,000 to LLC, a newly formed limited liability company classified as a partnership for Federal tax purposes, in exchange for 100 units in LLC. Under the LLC agreement, each unit is entitled to participate equally in the profits and losses of LLC. LLC uses the cash contributions to purchase two nondepreciable properties, Property A and Property B, for \$10,000 each. Also in Year 1, at a time when Property A and Property B are still valued at \$10,000 each, LLC issues an option to F. The option allows F to buy 100 units in LLC for an exercise price of \$15,000 in Year 2. F pays \$2,000 to LLC to purchase the option. Assume that the LLC agreement satisfies the requirements of paragraph (b)(2) of this section and requires that, on the exercise of a noncompensatory option, LLC comply with the rules of paragraph (b)(2)(iv)(s) of this section. Also assume that F's option is a noncompensatory

option under §1.721-2(f), and that F is not treated as a partner with respect to the option.

## Internal Revenue Service, Treasury

## § 1.704-1

(ii) In year 2, prior to the exercise of F's option, G contributes \$18,000 to LLC for 100 units in LLC. At the time of G's contribution, Property A has a value of \$32,000 and a basis of \$10,000, Property B has a value of \$5,000 and a basis of \$10,000, and the fair market value of F's option is \$3,000. In year 2, LLC has no item of income, gain, loss, deduction, or credit.

(iii) Upon G's admission to the partnership, the capital accounts of D and E (which were \$10,000 each prior to G's admission) are, in accordance with paragraph (b)(2)(iv)(f) of this section, adjusted upward to reflect their shares of the unrealized appreciation in the partnership's property. Property A has \$22,000 of unrealized gain and Property B has \$5,000 of unrealized loss. Under paragraph (b)(2)(iv)(f)(i) of this section, the adjustments must be based on the fair market value of LLC property (taking section 7701(g) into account) on the date of the adjustment, as determined under paragraph (b)(2)(iv)(h) of this section. The fair market value of partnership property must be reduced by the

excess of the fair market value of the option as of the date of the adjustment over the consideration paid by F to acquire the option (\$3,000 - \$2,000 = \$1,000) (under paragraph (b)(2)(iv)(h)(2) of this section), but only to the extent of the unrealized appreciation in LLC property that has not been reflected in the capital accounts previously (\$22,000). This \$1,000 reduction is allocated entirely to Property A, the only asset having unrealized appreciation not reflected in the capital accounts previously. Therefore, the book value of Property A is \$31,000. Accordingly, the revaluation adjustments must reflect only \$16,000 of the net appreciation in LLC's property (\$21,000 of unrealized gain in Property A and \$5,000 of unrealized loss in Property B). Thus, D's and E's capital accounts (which were \$10,000 each prior to G's admission) must be adjusted upward (by \$8,000) to \$18,000 each. The \$21,000 of built-in gain in Property A and the \$5,000 of built-in loss in Property B must be allocated equally between D and E in accordance with section 704(c) principles.

	Basis	Value	Option adjustment	704(b) Book
<b>Assets:</b>				
Property A .....	\$10,000	\$32,000	(\$1,000)	\$31,000
Property B .....	10,000	5,000	0	5,000
Cash .....	2,000	2,000	0	2,000
Subtotal .....	22,000	39,000	(1,000)	38,000
Cash Contributed by G .....	18,000	18,000	0	18,000
Total .....	40,000	57,000	(1,000)	56,000
<b>Liabilities and Capital:</b>				
Cash Premium (option value) .....		\$ 2,000	\$ 3,000	\$ 2,000
D .....		10,000	18,000	18,000
E .....		10,000	18,000	18,000
G .....		18,000	18,000	18,000
Total .....		40,000	57,000	56,000

(iv) In year 2, after the admission of G, when Property A still has a value of \$32,000 and a basis of \$10,000 and Property B still has a value of \$5,000 and a basis of \$10,000, F exercises the option. On the exercise of the option, F's capital account is credited with the amount paid for the option (\$2,000) and the exercise price of the option (\$15,000). Under the LLC agreement, however, F is entitled to LLC capital corresponding to 100 units of LLC (1/4 of LLC's capital). Immediately after the exercise of the option, LLC's properties are worth \$72,000 (\$15,000 contributed by F, plus the value of LLC property prior to the exercise of the option, \$57,000). F is entitled to LLC capital equal to 1/4 of this value, or \$18,000. As F is entitled to \$1,000 more LLC capital than F's capital contributions to

LLC, the provisions of paragraph (b)(2)(iv)(s) of this section apply.

(v) Under paragraph (b)(2)(iv)(s) of this section, LLC must increase F's capital account from \$17,000 to \$18,000 by, first, revaluing LLC property in accordance with the principles of paragraph (b)(2)(iv)(f) of this section and allocating the first \$1,000 of unrealized gain to F. The total unrealized gain which has not been reflected in the capital accounts previously is \$1,000 (the difference between the actual value of Property A, \$32,000, and the book value of Property A, \$31,000). The entire \$1,000 of book gain is allocated to F under paragraph (b)(2)(iv)(s)(2) of this section. Because the revaluation of LLC property under paragraph (b)(2)(iv)(s)(2) of this section increases F's capital account to the amount agreed on by the members, LLC is

§ 1.704-1

26 CFR Ch. I (4-1-14 Edition)

not required to make a capital account re-allocation under paragraph (b)(2)(iv)(s)(3) of this section. The (\$5,000) of unrealized booked loss in Property B has been allocated (\$2,500) to each D and E, and the \$22,000 of unrealized booked gain in Property A has been

allocated \$10,500 to each D and E, and \$1,000 to F. Under paragraph (b)(2)(iv)(f)(4) of this section, the tax items from Properties A and B must be allocated in accordance with section 704(c) principles.

*Example 34.* (i) On the first day of Year 1, H, I, and J form LLC, a limited liability company classified as a partnership for Federal tax purposes. H and I each contribute \$10,000 cash to LLC for 100 units of common interest in LLC. J contributes \$10,000 cash for a convertible preferred interest in LLC. J's convertible preferred interest entitles J to receive an annual allocation and distribution of cumulative LLC net profits in an amount equal to 10 percent of J's unreturned capital. J's convertible preferred interest also entitles J to convert, in Year 3, J's preferred interest into 100 units of common interest. If J converts, J has the right to the same share of LLC capital as J would have had if J had held the 100 units of common interest since the formation of LLC. Under the LLC agreement, each unit of common interest has an equal right to share in any LLC net profits that remain after payment of the preferred return. Assume that the LLC agreement sat-

isfies the requirements of paragraph (b)(2) of this section and requires that, on the exercise of a noncompensatory option, LLC comply with the rules of paragraph (b)(2)(iv)(s) of this section. Also assume that J's right to convert the preferred interest into a common interest qualifies as a noncompensatory option under §1.721-2(f), and that, prior to the exercise of the conversion right, the conversion right is not treated as a partnership interest.

(ii) LLC uses the \$30,000 to purchase Property Z, a property that is depreciable on a straight-line basis over 15 years. In each of Years 1 and 2, LLC has net income of \$2,500, comprised of \$4,500 of gross income and \$2,000 of depreciation. It allocates \$1,000 of net income to J and distributes \$1,000 to J in each year. LLC allocates the remaining \$1,500 of net income equally to H and I in each year but makes no distributions to H and I.

	H		I		J	
	Tax	Book	Tax	Book	Tax	Book
Capital account upon formation .....	\$10,000	\$10,000	\$10,000	\$10,000	\$10,000	\$10,000
Allocation of income Years 1 and 2 .....	1,500	1,500	1,500	1,500	2,000	2,000
Distributions Years 1 and 2 .....	0	0	0	0	(2,000)	(2,000)
Capital account at end of Year 2 .....	11,500	11,500	11,500	11,500	10,000	10,000

(iii) At the beginning of Year 3, when Property Z has a value of \$38,000 and a basis of \$26,000 (\$30,000 original basis less \$4,000 of depreciation) and LLC has accumulated undistributed cash of \$7,000 (\$9,000 gross receipts less \$2,000 distributions), J converts J's preferred interest into a common interest. Under paragraphs (b)(2)(iv)(b) and (b)(2)(iv)(d)(4) of this section, J's capital account after the conversion equals J's capital account before the conversion, \$10,000. On the conversion of the preferred interest, however, J is entitled to LLC capital corresponding to 100 units of common interest in LLC ( $\frac{1}{3}$  of LLC's capital). At the time of

the conversion, the total value of LLC property is \$45,000. J is entitled to LLC capital equal to  $\frac{1}{3}$  of this value, or \$15,000. As J is entitled to \$5,000 more LLC capital than J's capital account immediately after the conversion, the provisions of paragraph (b)(2)(iv)(s) of this section apply.

	Basis	Value
Assets:		
Property Z .....	\$26,000	\$38,000
Undistributed Income .....	7,000	7,000
Total .....	33,000	45,000
Liabilities and Capital:		

## Internal Revenue Service, Treasury

	Basis	Value
H .....	11,500	15,000
I .....	11,500	15,000
J .....	10,500	15,000
Total .....	33,000	45,000

(iv) Under paragraph (b)(2)(iv)(s) of this section, LLC must increase J's capital account from \$10,000 to \$15,000 by, first, revaluing LLC property in accordance with the principles of paragraph (b)(2)(iv)(f) of this section, and allocating the first \$5,000 of unrealized gain from that revaluation to J. The unrealized gain in Property Z is \$12,000 (\$38,000 value less \$26,000 basis). The first \$5,000 of this unrealized gain must be allo-

cated to J under paragraph (b)(2)(iv)(s)(2) of this section. The remaining \$7,000 of the unrealized gain must be allocated equally to H and I in accordance with the LLC agreement. Because the revaluation of LLC property under paragraph (b)(2)(iv)(s)(2) of this section increases J's capital account to the amount agreed on by the members, LLC is not required to make a capital account reallocation under paragraph (b)(2)(iv)(s)(3) of this section. The \$12,000 of unrealized booked gain in Property Z has been allocated \$3,500 to each H and I, and \$5,000 to J. Under paragraph (b)(2)(iv)(f)(4) of this section, the tax items from the revalued property must be allocated in accordance with section 704(c) principles.

*Example 35.* (i) On the first day of Year 1, K and L each contribute cash of \$10,000 to LLC, a newly formed limited liability company classified as a partnership for Federal tax purposes, in exchange for 100 units in LLC. Immediately after its formation, LLC borrows \$10,000 from M. Under the terms of the debt instrument, interest of \$1,000 is unconditionally payable at the end of each year and the \$10,000 stated principal is repayable in five years. Throughout the term of the indebtedness, M has the right to convert the debt instrument into 100 units in LLC. If M converts, M has the right to the same share of LLC capital as M would have had if M had held 100 units in LLC since the formation of LLC. Under the LLC agreement, each unit participates equally in the profits and losses of LLC and has an equal right to share in LLC capital. Assume that the LLC agreement satisfies the requirements of paragraph

(b)(2) of this section and requires that, on the exercise of a noncompensatory option, LLC comply with the rules of paragraph (b)(2)(iv)(s) of this section. Also assume that M's right to convert the debt into an interest in LLC qualifies as a noncompensatory option under § 1.721-2(f), and that, prior to the exercise of the conversion right, M is not treated as a partner with respect to the convertible debt.

(ii) LLC uses the \$30,000 to purchase Property D, property that is depreciable on a straight-line basis over 15 years. In each of Years 1, 2, and 3, LLC has net income of \$2,000, comprised of \$5,000 of gross income, \$2,000 of depreciation, and interest expense (representing payments of interest on the loan from M) of \$1,000. LLC allocates this income equally to K and L but makes no distributions to either K or L.

	K		L		M	
	Tax	Book	Tax	Book	Tax	Book
Initial capital account .....	\$10,000	\$10,000	\$10,000	\$10,000	0	0
Year 1 net income .....	1,000	1,000	1,000	1,000	0	0
Year 2 net income .....	1,000	1,000	1,000	1,000	0	0
Year 3 net income .....	1,000	1,000	1,000	1,000	0	0
Year 4 initial capital account .....	13,000	13,000	13,000	13,000	0	0

(iii) At the beginning of Year 4, at a time when property D, LLC's only asset, has a value of \$33,000 and basis of \$24,000 (\$30,000 original basis less \$6,000 depreciation in Years 1 through 3), and LLC has accumulated

undistributed cash of \$12,000 (\$15,000 gross income less \$3,000 of interest payments) in LLC, M converts the debt into a  $\frac{1}{3}$  interest in LLC. Under paragraphs (b)(2)(iv)(b) and

§ 1.704-1

26 CFR Ch. I (4-1-14 Edition)

(b)(2)(iv)(d)(4) of this section, M's capital account after the conversion is the adjusted issue price of the debt immediately before M's conversion of the debt, \$10,000, plus any accrued but unpaid qualified stated interest on the debt, \$0. On the conversion of the debt, however, M is entitled to receive LLC capital corresponding to 100 units of LLC ( $\frac{1}{3}$  of LLC's capital). At the time of the conversion, the total value of LLC's property is \$45,000. M is entitled to LLC capital equal to  $\frac{1}{3}$  of this value, or \$15,000. As M is entitled to \$5,000 more LLC capital than M's capital contribution to LLC (\$10,000), the provisions of paragraph (b)(2)(iv)(s) of this section apply.

	Basis	Value
<b>Assets:</b>

	<b>\$36,000</b>	<b>\$45,000</b>

(iv) Under paragraph (b)(2)(iv)(s) of this section, LLC must increase M's capital account from \$10,000 to \$15,000 by, first, revaluing LLC property in accordance with the principles of paragraph (b)(2)(iv)(f) of this section, and allocating the first \$5,000 of unrealized gain from that revaluation to M. The unrealized gain in Property D is \$9,000 (\$33,000 value less \$24,000 basis). The first \$5,000 of this unrealized gain must be allocated to M under paragraph (b)(2)(iv)(s)(2) of this section, and the remaining \$4,000 of the unrealized gain must be allocated equally to K and L in accordance with the LLC agreement. Because the revaluation of LLC property under paragraph (b)(2)(iv)(s)(2) of this section increases M's capital account to the amount agreed upon by the members, LLC is not required to make a capital account reallocation under paragraph (b)(2)(iv)(s)(3) of this section. The \$9,000 unrealized booked gain in property D has been allocated \$2,000 to each K and L, and \$5,000 to M. Under paragraph (b)(2)(iv)(f)(4) of this section, the tax items from the revalued property must be allocated in accordance with section 704(c) principles.

	K		L		M	
	Tax	Book	Tax	Book	Tax	Book
Year 4 capital account prior to exercise .....	\$13,000	\$13,000	\$13,000	\$13,000	0	0
Capital account after exercise .....	13,000	13,000	13,000	13,000	10,000	10,000
Revaluation .....	0	2,000	0	2,000	0	5,000
<b>Capital account after revaluation .....</b>	<b>13,000</b>	<b>15,000</b>	<b>13,000</b>	<b>15,000</b>	<b>10,000</b>	<b>15,000</b>

(c) *Contributed property; cross-reference.* See § 1.704-3 for methods of making allocations that take into account precontribution appreciation or diminution in value of property contributed by a partner to a partnership.

(d) *Limitation on allowance of losses.* (1) A partner's distributive share of partnership loss will be allowed only to the extent of the adjusted basis (before reduction by current year's losses) of such partner's interest in the partnership at the end of the partnership taxable year in which such loss occurred. A partner's share of loss in excess of his adjusted basis at the end of the partnership taxable year will not be allowed for that year. However, any loss so disallowed shall be allowed as a deduction at the end of the first succeeding partnership taxable year, and subsequent partnership taxable years, to the extent that the partner's adjusted basis for his partnership interest

at the end of any such year exceeds zero (before reduction by such loss for such year).

(2) In computing the adjusted basis of a partner's interest for the purpose of ascertaining the extent to which a partner's distributive share of partnership loss shall be allowed as a deduction for the taxable year, the basis shall first be increased under section 705(a)(1) and decreased under section 705(a)(2), except for losses of the taxable year and losses previously disallowed. If the partner's distributive share of the aggregate of items of loss specified in section 702(a) (1), (2), (3), (8), and (9) exceeds the basis of the partner's interest computed under the preceding sentence, the limitation on losses under section 704(d) must be allocated to his distributive share of each such loss. This allocation shall be determined by taking the proportion that each loss bears to the total of all

such losses. For purposes of the preceding sentence, the total losses for the taxable year shall be the sum of his distributive share of losses for the current year and his losses disallowed and carried forward from prior years.

(3) For the treatment of certain liabilities of the partner or partnership, see section 752 and § 1.752-1.

(4) The provisions of this paragraph may be illustrated by the following examples:

*Example 1.* At the end of the partnership taxable year 1955, partnership AB has a loss of \$20,000. Partner A's distributive share of this loss is \$10,000. At the end of such year, A's adjusted basis for his interest in the partnership (not taking into account his distributive share of the loss) is \$6,000. Under section 704(d), A's distributive share of partnership loss is allowed to him (in his taxable year within or with which the partnership taxable year ends) only to the extent of his adjusted basis of \$6,000. The \$6,000 loss allowed for 1955 decreases the adjusted basis of A's interest to zero. Assume that, at the end of partnership taxable year 1956, A's share of partnership income has increased the adjusted basis of A's interest in the partnership to \$3,000 (not taking into account the \$4,000 loss disallowed in 1955). Of the \$4,000 loss disallowed for the partnership taxable year 1955, \$3,000 is allowed A for the partnership taxable year 1956, thus again decreasing the adjusted basis of his interest to zero. If, at the end of partnership taxable year 1957, A has an adjusted basis of his interest of at least \$1,000 (not taking into account the disallowed loss of \$1,000), he will be allowed the \$1,000 loss previously disallowed.

*Example 2.* At the end of partnership taxable year 1955, partnership CD has a loss of \$20,000. Partner C's distributive share of this loss is \$10,000. The adjusted basis of his interest in the partnership (not taking into account his distributive share of such loss) is \$6,000. Therefore, \$4,000 of the loss is disallowed. At the end of partnership taxable year 1956, the partnership has no taxable income or loss, but owes \$8,000 to a bank for money borrowed. Since C's share of this liability is \$4,000, the basis of his partnership interest is increased from zero to \$4,000. (See sections 752 and 722, and §§ 1.752-1 and 1.722-1.) C is allowed the \$4,000 loss, disallowed for the preceding year under section 704(d), for his taxable year within or with which partnership taxable year 1956 ends.

*Example 3.* At the end of partnership taxable year 1955, partner C has the following distributive share of partnership items described in section 702(a): Long-term capital loss, \$4,000; short-term capital loss, \$2,000; income as described in section 702(a)(9), \$4,000. Partner C's adjusted basis for his partnership

interest at the end of 1955, before adjustment for any of the above items, is \$1,000. As adjusted under section 705(a)(1)(A), C's basis is increased from \$1,000 to \$5,000 at the end of the year. C's total distributive share of partnership loss is \$6,000. Since without regard to losses, C has a basis of only \$5,000, C is allowed only \$5,000/\$6,000 of each loss, that is, \$3,333 of his long-term capital loss, and \$1,667 of his short-term capital loss. C must carry forward to succeeding taxable years \$667 as a long-term capital loss and \$333 as a short-term capital loss.

(e) *Family partnerships*—(1) *In general*—(i) *Introduction.* The production of income by a partnership is attributable to the capital or services, or both, contributed by the partners. The provisions of subchapter K, chapter 1 of the Code, are to be read in the light of their relationship to section 61, which requires, inter alia, that income be taxed to the person who earns it through his own labor and skill and the utilization of his own capital.

(ii) *Recognition of donee as partner.* With respect to partnerships in which capital is a material income-producing factor, section 704(e)(1) provides that a person shall be recognized as a partner for income tax purposes if he owns a capital interest in such a partnership whether or not such interest is derived by purchase or gift from any other person. If a capital interest in a partnership in which capital is a material income-producing factor is created by gift, section 704(e)(2) provides that the distributive share of the donee under the partnership agreement shall be includible in his gross income, except to the extent that such distributive share is determined without allowance of reasonable compensation for services rendered to the partnership by the donor, and except to the extent that the portion of such distributive share attributable to donated capital is proportionately greater than the share of the donor attributable to the donor's capital. For rules of allocation in such cases, see subparagraph (3) of this paragraph.

(iii) *Requirement of complete transfer to donee.* A donee or purchaser of a capital interest in a partnership is not recognized as a partner under the principles of section 704(e)(1) unless such interest is acquired in a bona fide transaction, not a mere sham for tax avoidance or

evasion purposes, and the donee or purchaser is the real owner of such interest. To be recognized, a transfer must vest dominion and control of the partnership interest in the transferee. The existence of such dominion and control in the donee is to be determined from all the facts and circumstances. A transfer is not recognized if the transferor retains such incidents of ownership that the transferee has not acquired full and complete ownership of the partnership interest. Transactions between members of a family will be closely scrutinized, and the circumstances, not only at the time of the purported transfer but also during the periods preceding and following it, will be taken into consideration in determining the bona fides or lack of bona fides of the purported gift or sale. A partnership may be recognized for income tax purposes as to some partners but not as to others.

(iv) *Capital as a material income-producing factor.* For purposes of section 704(e)(1), the determination as to whether capital is a material income-producing factor must be made by reference to all the facts of each case. Capital is a material income-producing factor if a substantial portion of the gross income of the business is attributable to the employment of capital in the business conducted by the partnership. In general, capital is not a material income-producing factor where the income of the business consists principally of fees, commissions, or other compensation for personal services performed by members or employees of the partnership. On the other hand, capital is ordinarily a material income-producing factor if the operation of the business requires substantial inventories or a substantial investment in plant, machinery, or other equipment.

(v) *Capital interest in a partnership.* For purposes of section 704(e), a capital interest in a partnership means an interest in the assets of the partnership, which is distributable to the owner of the capital interest upon his withdrawal from the partnership or upon liquidation of the partnership. The mere right to participate in the earnings and profits of a partnership is not a capital interest in the partnership.

(2) *Basic tests as to ownership*—(i) *In general.* Whether an alleged partner who is a donee of a capital interest in a partnership is the real owner of such capital interest, and whether the donee has dominion and control over such interest, must be ascertained from all the facts and circumstances of the particular case. Isolated facts are not determinative; the reality of the donee's ownership is to be determined in the light of the transaction as a whole. The execution of legally sufficient and irrevocable deeds or other instruments of gift under State law is a factor to be taken into account but is not determinative of ownership by the donee for the purposes of section 704(e). The reality of the transfer and of the donee's ownership of the property attributed to him are to be ascertained from the conduct of the parties with respect to the alleged gift and not by any mechanical or formal test. Some of the more important factors to be considered in determining whether the donee has acquired ownership of the capital interest in a partnership are indicated in subdivisions (ii) to (x), inclusive, of this subparagraph.

(ii) *Retained controls.* The donor may have retained such controls of the interest which he has purported to transfer to the donee that the donor should be treated as remaining the substantial owner of the interest. Controls of particular significance include, for example, the following:

(a) Retention of control of the distribution of amounts of income or restrictions on the distributions of amounts of income (other than amounts retained in the partnership annually with the consent of the partners, including the donee partner, for the reasonable needs of the business). If there is a partnership agreement providing for a managing partner or partners, then amounts of income may be retained in the partnership without the acquiescence of all the partners if such amounts are retained for the reasonable needs of the business.

(b) Limitation of the right of the donee to liquidate or sell his interest in the partnership at his discretion without financial detriment.

(c) Retention of control of assets essential to the business (for example,

through retention of assets leased to the alleged partnership).

(d) *Retention of management powers inconsistent with normal relationships among partners.* Retention by the donor of control of business management or of voting control, such as is common in ordinary business relationships, is not by itself to be considered as inconsistent with normal relationships among partners, provided the donee is free to liquidate his interest at his discretion without financial detriment. The donee shall not be considered free to liquidate his interest unless, considering all the facts, it is evident that the donee is independent of the donor and has such maturity and understanding of his rights as to be capable of deciding to exercise, and capable of exercising, his right to withdraw his capital interest from the partnership.

The existence of some of the indicated controls, though amounting to less than substantial ownership retained by the donor, may be considered along with other facts and circumstances as tending to show the lack of reality of the partnership interest of the donee.

(iii) *Indirect controls.* Controls inconsistent with ownership by the donee may be exercised indirectly as well as directly, for example, through a separate business organization, estate, trust, individual, or other partnership. Where such indirect controls exist, the reality of the donee's interest will be determined as if such controls were exercisable directly.

(iv) *Participation in management.* Substantial participation by the donee in the control and management of the business (including participation in the major policy decisions affecting the business) is strong evidence of a donee partner's exercise of dominion and control over his interest. Such participation presupposes sufficient maturity and experience on the part of the donee to deal with the business problems of the partnership.

(v) *Income distributions.* The actual distribution to a donee partner of the entire amount or a major portion of his distributive share of the business income for the sole benefit and use of the donee is substantial evidence of the reality of the donee's interest, provided

the donor has not retained controls inconsistent with real ownership by the donee. Amounts distributed are not considered to be used for the donee's sole benefit if, for example, they are deposited, loaned, or invested in such manner that the donor controls or can control the use or enjoyment of such funds.

(vi) *Conduct of partnership business.* In determining the reality of the donee's ownership of a capital interest in a partnership, consideration shall be given to whether the donee is actually treated as a partner in the operation of the business. Whether or not the donee has been held out publicly as a partner in the conduct of the business, in relations with customers, or with creditors or other sources of financing, is of primary significance. Other factors of significance in this connection include:

(a) Compliance with local partnership, fictitious names, and business registration statutes.

(b) Control of business bank accounts.

(c) Recognition of the donee's rights in distributions of partnership property and profits.

(d) Recognition of the donee's interest in insurance policies, leases, and other business contracts and in litigation affecting business.

(e) The existence of written agreements, records, or memoranda, contemporaneous with the taxable year or years concerned, establishing the nature of the partnership agreement and the rights and liabilities of the respective partners.

(f) Filing of partnership tax returns as required by law.

However, despite formal compliance with the above factors, other circumstances may indicate that the donor has retained substantial ownership of the interest purportedly transferred to the donee.

(vii) *Trustees as partners.* A trustee may be recognized as a partner for income tax purposes under the principles relating to family partnerships generally as applied to the particular facts of the trust-partnership arrangement. A trustee who is unrelated to and independent of the grantor, and who participates as a partner and receives distribution of the income distributable

to the trust, will ordinarily be recognized as the legal owner of the partnership interest which he holds in trust unless the grantor has retained controls inconsistent with such ownership. However, if the grantor is the trustee, or if the trustee is amenable to the will of the grantor, the provisions of the trust instrument (particularly as to whether the trustee is subject to the responsibilities of a fiduciary), the provisions of the partnership agreement, and the conduct of the parties must all be taken into account in determining whether the trustee in a fiduciary capacity has become the real owner of the partnership interest. Where the grantor (or person amenable to his will) is the trustee, the trust may be recognized as a partner only if the grantor (or such other person) in his participation in the affairs of the partnership actively represents and protects the interests of the beneficiaries in accordance with the obligations of a fiduciary and does not subordinate such interests to the interests of the grantor. Furthermore, if the grantor (or person amenable to his will) is the trustee, the following factors will be given particular consideration:

(a) Whether the trust is recognized as a partner in business dealings with customers and creditors, and

(b) Whether, if any amount of the partnership income is not properly retained for the reasonable needs of the business, the trust's share of such amount is distributed to the trust annually and paid to the beneficiaries or reinvested with regard solely to the interests of the beneficiaries.

(viii) *Interests (not held in trust) of minor children.* Except where a minor child is shown to be competent to manage his own property and participate in the partnership activities in accordance with his interest in the property, a minor child generally will not be recognized as a member of a partnership unless control of the property is exercised by another person as fiduciary for the sole benefit of the child, and unless there is such judicial supervision of the conduct of the fiduciary as is required by law. The use of the child's property or income for support for which a parent is legally responsible will be considered a use for the parent's benefit.

“Judicial supervision of the conduct of the fiduciary” includes filing of such accountings and reports as are required by law of the fiduciary who participates in the affairs of the partnership on behalf of the minor. A minor child will be considered as competent to manage his own property if he actually has sufficient maturity and experience to be treated by disinterested persons as competent to enter business dealings and otherwise to conduct his affairs on a basis of equality with adult persons, notwithstanding legal disabilities of the minor under State law.

(ix) *Donees as limited partners.* The recognition of a donee's interest in a limited partnership will depend, as in the case of other donated interests, on whether the transfer of property is real and on whether the donee has acquired dominion and control over the interest purportedly transferred to him. To be recognized for Federal income tax purposes, a limited partnership must be organized and conducted in accordance with the requirements of the applicable State limited-partnership law. The absence of services and participation in management by a donee in a limited partnership is immaterial if the limited partnership meets all the other requirements prescribed in this paragraph. If the limited partner's right to transfer or liquidate his interest is subject to substantial restrictions (for example, where the interest of the limited partner is not assignable in a real sense or where such interest may be required to be left in the business for a long term of years), or if the general partner retains any other control which substantially limits any of the rights which would ordinarily be exercisable by unrelated limited partners in normal business relationships, such restrictions on the right to transfer or liquidate, or retention of other control, will be considered strong evidence as to the lack of reality of ownership by the donee.

(x) *Motive.* If the reality of the transfer of interest is satisfactorily established, the motives for the transaction are generally immaterial. However, the presence or absence of a tax-avoidance motive is one of many factors to be considered in determining the reality

of the ownership of a capital interest acquired by gift.

(3) *Allocation of family partnership income*—(i) *In general.* (a) Where a capital interest in a partnership in which capital is a material income-producing factor is created by gift, the donee's distributive share shall be includible in his gross income, except to the extent that such share is determined without allowance of reasonable compensation for services rendered to the partnership by the donor, and except to the extent that the portion of such distributive share attributable to donated capital is proportionately greater than the distributive share attributable to the donor's capital. For the purpose of section 704, a capital interest in a partnership purchased by one member of a family from another shall be considered to be created by gift from the seller, and the fair market value of the purchased interest shall be considered to be donated capital. The "family" of any individual, for the purpose of the preceding sentence, shall include only his spouse, ancestors, and lineal descendants, and any trust for the primary benefit of such persons.

(b) To the extent that the partnership agreement does not allocate the partnership income in accordance with (a) of this subdivision, the distributive shares of the partnership income of the donor and donee shall be reallocated by making a reasonable allowance for the services of the donor and by attributing the balance of such income (other than a reasonable allowance for the services, if any, rendered by the donee) to the partnership capital of the donor and donee. The portion of income, if any, thus attributable to partnership capital for the taxable year shall be allocated between the donor and donee in accordance with their respective interests in partnership capital.

(c) In determining a reasonable allowance for services rendered by the partners, consideration shall be given to all the facts and circumstances of the business, including the fact that some of the partners may have greater managerial responsibility than others. There shall also be considered the amount that would ordinarily be paid in order to obtain comparable services

from a person not having an interest in the partnership.

(d) The distributive share of partnership income, as determined under (b) of this subdivision, of a partner who rendered services to the partnership before entering the Armed Forces of the United States shall not be diminished because of absence due to military service. Such distributive share shall be adjusted to reflect increases or decreases in the capital interest of the absent partner. However, the partners may by agreement allocate a smaller share to the absent partner due to his absence.

(ii) *Special rules.* (a) The provisions of subdivision (i) of this subparagraph, relating to allocation of family partnership income, are applicable where the interest in the partnership is created by gift, indirectly or directly. Where the partnership interest is created indirectly, the term *donor* may include persons other than the nominal transferor. This rule may be illustrated by the following examples:

*Example 1.* A father gives property to his son who shortly thereafter conveys the property to a partnership consisting of the father and the son. The partnership interest of the son may be considered created by gift and the father may be considered the donor of the son's partnership interest.

*Example 2.* A father, the owner of a business conducted as a sole proprietorship, transfers the business to a partnership consisting of his wife and himself. The wife subsequently conveys her interest to their son. In such case, the father, as well as the mother, may be considered the donor of the son's partnership interest.

*Example 3.* A father makes a gift to his son of stock in the family corporation. The corporation is subsequently liquidated. The son later contributes the property received in the liquidation of the corporation to a partnership consisting of his father and himself. In such case, for purposes of section 704, the son's partnership interest may be considered created by gift and the father may be considered the donor of his son's partnership interest.

(b) The allocation rules set forth in section 704(e) and subdivision (i) of this subparagraph apply in any case in which the transfer or creation of the partnership interest has any of the substantial characteristics of a gift. Thus, allocation may be required where transfer of a partnership interest is

made between members of a family (including collaterals) under a purported purchase agreement, if the characteristics of a gift are ascertained from the terms of the purchase agreement, the terms of any loan or credit arrangements made to finance the purchase, or from other relevant data.

(c) In the case of a limited partnership, for the purpose of the allocation provisions of subdivision (i) of this subparagraph, consideration shall be given to the fact that a general partner, unlike a limited partner, risks his credit in the partnership business.

(4) *Purchased interest*—(i) *In general*. If a purported purchase of a capital interest in a partnership does not meet the requirements of subdivision (ii) of this subparagraph, the ownership by the transferee of such capital interest will be recognized only if it qualifies under the requirements applicable to a transfer of a partnership interest by gifts. In a case not qualifying under subdivision (ii) of this subparagraph, if payment of any part of the purchase price is made out of partnership earnings, the transaction may be regarded in the same light as a purported gift subject to deferred enjoyment of income. Such a transaction may be lacking in reality either as a gift or as a bona fide purchase.

(ii) *Tests as to reality of purchased interests*. A purchase of a capital interest in a partnership, either directly or by means of a loan or credit extended by a member of the family, will be recognized as bona fide if:

(a) It can be shown that the purchase has the usual characteristics of an arm's-length transaction, considering all relevant factors, including the terms of the purchase agreement (as to price, due date of payment, rate of interest, and security, if any) and the terms of any loan or credit arrangement collateral to the purchase agreement; the credit standing of the purchaser (apart from relationship to the seller) and the capacity of the purchaser to incur a legally binding obligation; or

(b) It can be shown, in the absence of characteristics of an arm's-length transaction, that the purchase was genuinely intended to promote the success of the business by securing partici-

pation of the purchaser in the business or by adding his credit to that of the other participants.

However, if the alleged purchase price or loan has not been paid or the obligation otherwise discharged, the factors indicated in (a) and (b) of this subdivision shall be taken into account only as an aid in determining whether a bona fide purchase or loan obligation existed.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 1.704-1, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.fdsys.gov](http://www.fdsys.gov).

**§ 1.704-1T Partner's distributive share (temporary).**

(a) Through (b)(1)(ii)(b)(2) [Reserved] For further guidance, see § 1.704-1(a) through (b)(1)(ii)(b)(2).

(3) *Special rules for certain inter-branch payments*—(A) *In general*. The provisions of § 1.704-1(b)(4)(viii)(c)(3)(ii) and § 1.704-1(b)(4)(viii)(d)(3) apply for partnership taxable years beginning on or after January 1, 2012.

(B) *Transition rule*. Transition relief is provided herein to partnerships whose agreements were entered into prior to February 14, 2012. In such case, if there has been no material modification to the partnership agreement on or after February 14, 2012, then the partnership may apply the provisions of § 1.704-1(b)(4)(viii)(c)(3)(ii) and § 1.704-1(b)(4)(viii)(d)(3) (revised as of April 1, 2011). For purposes of this paragraph (b)(1)(ii)(b)(3), any change in ownership constitutes a material modification to the partnership agreement. This transition rule does not apply to any taxable year in which persons bearing a relationship to each other that is specified in section 267(b) or section 707(b) collectively have the power to amend the partnership agreement without the consent of any unrelated party (and all subsequent taxable years).

(b)(1)(iii) through (b)(4)(viii)(d)(2) [Reserved] For further guidance, see § 1.704-1(b)(1)(iii) through (b)(4)(viii)(d)(2).

(3) *Special rules for inter-branch payments*. For rules relating to foreign tax paid or accrued in partnership taxable years beginning before January 1, 2012

in respect of certain inter-branch payments, see 26 CFR 1.704-1(b)(4)(viii)(d)(3) (revised as of April 1, 2011).

(b)(4)(ix) through (b)(5) *Example 23* [Reserved] For further guidance, see § 1.704-1(b)(4)(ix) through (b)(5) *Example 23*.

*Example 24.* (i) The facts are the same as in *Example 21*, except that businesses M and N are conducted by entities (DE1 and DE2, respectively) that are corporations for country X and Y tax purposes and disregarded entities for U.S. tax purposes. Also, assume that DE1 makes payments of \$75,000 during 2012 to DE2 that are deductible by DE1 for country X tax purposes and includible in income of DE2 for country Y tax purposes. As a result of such payments, DE1 has taxable income of \$25,000 for country X purposes on which \$10,000 of taxes are imposed and DE2 has taxable income of \$125,000 for country Y purposes on which \$25,000 of taxes are imposed. For U.S. tax purposes, \$100,000 of AB's income is attributable to the activities of DE1 and \$50,000 of AB's income is attributable to the activities of DE2. Pursuant to the partnership agreement, all partnership items from business M, excluding CFTEs paid or accrued by business M, are allocated 75 percent to A and 25 percent to B, and all partnership items from business N, excluding CFTEs paid or accrued by business N, are split evenly between A and B (50 percent each). Accordingly, A is allocated 75 percent of the income from business M (\$75,000), and 50 percent of the income from business N (\$25,000). B is allocated 25 percent of the income from business M (\$25,000), and 50 percent of the income from business N (\$25,000).

(ii) Because the partnership agreement provides for different allocations of the net income attributable to businesses M and N, the net income attributable to each of business M and business N is income in separate CFTE categories. See paragraph (b)(4)(viii)(c)(2) of this section. Under paragraph (b)(4)(viii)(c)(3) of this section, the \$100,000 of net income attributable to business M is in the business M CFTE category and the \$50,000 of net income attributable to business N is in the business N CFTE category. Under paragraph (b)(4)(viii)(d)(1) of this section, the \$10,000 of country X taxes is allocated to the business M CFTE category and \$10,000 of the country Y taxes is allocated to the business N CFTE category. The additional \$15,000 of country Y tax imposed with respect to the inter-branch payment is assigned to the business M CFTE category because for U.S. tax purposes, the related \$75,000 of income that country Y is taxing is in the business M CFTE category. Therefore, \$25,000 of taxes (\$10,000 of country X taxes and \$15,000 of the country Y taxes) is related

to the \$100,000 of net income in the business M CFTE category and the other \$10,000 of country Y taxes is related to the \$50,000 of net income in the business N CFTE category. See paragraph (b)(4)(viii)(c)(1) of this section. The allocations of country X taxes will be in proportion to the distributive shares of income to which they relate and will be deemed to be in accordance with the partners' interests in the partnership if such taxes are allocated 75 percent to A and 25 percent to B. The allocations of country Y taxes will be in proportion to the distributive shares of income to which they relate and will be deemed to be in accordance with the partners' interests in the partnership if \$15,000 of such taxes is allocated 75 percent to A and 25 percent to B and the other \$10,000 of such taxes is allocated 50 percent to A and 50 percent to B. No inference is intended with respect to the application of other provisions to arrangements that involve disregarded payments.

(iii) Assume that the facts are the same as in paragraph (i) of this *Example 24*, except that in order to reflect the \$75,000 payment from DE1 to DE2, the partnership agreement allocates \$75,000 of the income attributable to business M equally between A and B (50 percent each). In order to prevent separating the CFTEs from the related foreign income, the \$75,000 payment is treated as a divisible part of the business M activity and, therefore, a separate activity. See paragraph (b)(4)(viii)(c)(2)(iii) of this section. Because items from the disregarded payment and business N are both shared equally between A and B, the disregarded payment activity and the business N activity are treated as a single CFTE category. See paragraph (b)(4)(viii)(c)(2)(i) of this section. Accordingly, \$25,000 of net income attributable to business M is in the business M CFTE category and \$75,000 of income of business M attributable to the disregarded payment and the \$50,000 of net income attributable to business N are in the business N CFTE category. Under paragraph (b)(4)(viii)(d)(1) of this section, the \$10,000 of country X taxes is allocated to the business M CFTE category and all \$25,000 of the country Y taxes is allocated to the business N CFTE category. The allocations of country X taxes will be in proportion to the distributive shares of income to which they relate and will be deemed to be in accordance with the partners' interests in the partnership if such taxes are allocated 75 percent to A and 25 percent to B. The allocations of country Y taxes will be in proportion to the distributive shares of income to which they relate and will be deemed to be in accordance with the partners' interests in the partnership if such taxes are allocated 50 percent to A and 50 percent to B.

## § 1.704-2

## 26 CFR Ch. I (4-1-14 Edition)

*Example 25* through (e) [Reserved] For further guidance, see § 1.704-1(b)(5) *Example 25* through (e).

(f) *Expiration date.* The applicability of this section expires on February 9, 2015.

[T.D. 9577, 77 FR 8134, Feb. 14, 2012]

### § 1.704-2 Allocations attributable to nonrecourse liabilities.

(a) *Table of contents.* This paragraph contains a listing of the major headings of this § 1.704-2.

#### § 1.704-2 Allocations attributable to nonrecourse liabilities.

- (a) Table of contents.
- (b) General principles and definitions.
  - (1) Definition of and allocations of nonrecourse deductions.
  - (2) Definition of and allocations pursuant to a minimum gain chargeback.
  - (3) Definition of nonrecourse liability.
  - (4) Definition of partner nonrecourse debt.
  - (c) Amount of nonrecourse deductions.
  - (d) Partnership minimum gain.
  - (1) Amount of partnership minimum gain.
  - (2) Property subject to more than one liability.
    - (i) In general.
    - (ii) Allocating liabilities.
  - (3) Partnership minimum gain if there is a book/tax disparity.
  - (4) Special rule for year of revaluation.
  - (e) Requirements to be satisfied.
  - (f) Minimum gain chargeback requirement.
    - (1) In general.
    - (2) Exception for certain conversions and refinancings.
    - (3) Exception for certain capital contributions.
    - (4) Waiver for certain income allocations that fail to meet minimum gain chargeback requirement if minimum gain chargeback distorts economic arrangement.
    - (5) Additional exceptions.
    - (6) Partnership items subject to the minimum gain chargeback requirement.
    - (7) Examples.
    - (g) Shares of partnership minimum gain.
      - (1) Partner's share of partnership minimum gain.
      - (2) Partner's share of the net decrease in partnership minimum gain.
      - (3) Conversions of recourse or partner nonrecourse debt into nonrecourse debt.
      - (h) Distribution of nonrecourse liability proceeds allocable to an increase in partnership minimum gain.
        - (1) In general.
        - (2) Distribution allocable to nonrecourse liability proceeds.
        - (3) Option when there is an obligation to restore.

(4) Carryover to immediately succeeding taxable year.

(i) Partnership nonrecourse liabilities where a partner bears the economic risk of loss.

(1) In general.

(2) Definition of and determination of partner nonrecourse deductions.

(3) Determination of partner nonrecourse debt minimum gain.

(4) Chargeback of partner nonrecourse debt minimum gain.

(5) Partner's share of partner nonrecourse debt minimum gain.

(6) Distribution of partner nonrecourse debt proceeds allocable to an increase in partner nonrecourse debt minimum gain.

(j) Ordering rules.

(1) Treatment of partnership losses and deductions.

(i) Partner nonrecourse deductions.

(ii) Partnership nonrecourse deductions.

(iii) Carryover to succeeding taxable year.

(2) Treatment of partnership income and gains.

(i) Minimum gain chargeback.

(ii) Chargeback attributable to decrease in partner nonrecourse debt minimum gain.

(iii) Carryover to succeeding taxable year.

(k) Tiered partnerships.

(1) Increase in upper-tier partnership's minimum gain.

(2) Decrease in upper-tier partnership's minimum gain.

(3) Nonrecourse debt proceeds distributed from the lower-tier partnership to the upper-tier partnership.

(4) Nonrecourse deductions of lower-tier partnership treated as depreciation by upper-tier partnership.

(5) Coordination with partner nonrecourse debt rules.

(l) Effective dates.

(1) In general.

(i) Prospective application.

(ii) Partnerships subject to temporary regulations.

(iii) Partnerships subject to former regulations.

(2) Special rule applicable to pre-January 30, 1989, related party nonrecourse debt.

(3) Transition rule for pre-March 1, 1984, partner nonrecourse debt.

(4) Election.

(m) Examples.

(b) *General principles and definitions—*

(1) *Definition of and allocations of nonrecourse deductions.* Allocations of losses, deductions, or section 705(a)(2)(B) expenditures attributable to partnership nonrecourse liabilities ("nonrecourse deductions") cannot have economic effect because the creditor alone bears any economic burden that corresponds to those allocations.

Thus, nonrecourse deductions must be allocated in accordance with the partners' interests in the partnership. Paragraph (e) of this section provides a test that deems allocations of nonrecourse deductions to be in accordance with the partners' interests in the partnership. If that test is not satisfied, the partners' distributive shares of nonrecourse deductions are determined under § 1.704-1(b)(3), according to the partners' overall economic interests in the partnership. See also paragraph (i) of this section for special rules regarding the allocation of deductions attributable to nonrecourse liabilities for which a partner bears the economic risk of loss (as described in paragraph (b)(4) of this section).

(2) *Definition of and allocations pursuant to a minimum gain chargeback.* To the extent a nonrecourse liability exceeds the adjusted tax basis of the partnership property it encumbers, a disposition of that property will generate gain that at least equals that excess ("partnership minimum gain"). An increase in partnership minimum gain is created by a decrease in the adjusted tax basis of property encumbered by a nonrecourse liability below the amount of that liability and by a partnership nonrecourse borrowing that exceeds the adjusted tax basis of the property encumbered by the borrowing. Partnership minimum gain decreases as reductions occur in the amount by which the nonrecourse liability exceeds the adjusted tax basis of the property encumbered by the liability. Allocations of gain attributable to a decrease in partnership minimum gain (a "minimum gain chargeback," as required under paragraph (f) of this section) cannot have economic effect because the gain merely offsets nonrecourse deductions previously claimed by the partnership. Thus, to avoid impairing the economic effect of other allocations, allocations pursuant to a minimum gain chargeback must be made to the partners that either were allocated nonrecourse deductions or received distributions of proceeds attributable to a nonrecourse borrowing. Paragraph (e) of this section provides a test that, if met, deems allocations of partnership income pursuant to a minimum gain chargeback to be in accordance with

the partners' interests in the partnership. If property encumbered by a nonrecourse liability is reflected on the partnership's books at a value that differs from its adjusted tax basis, paragraph (d)(3) of this section provides that minimum gain is determined with reference to the property's book basis. See also paragraph (i)(4) of this section for special rules regarding the minimum gain chargeback requirement for partner nonrecourse debt.

(3) *Definition of nonrecourse liability.* *Nonrecourse liability* means a nonrecourse liability as defined in § 1.752-1(a)(2) or a § 1.752-7 liability (as defined in § 1.752-7(b)(3)(i)) assumed by the partnership from a partner on or after June 24, 2003.

(4) *Definition of partner nonrecourse debt.* *Partner nonrecourse debt* or *partner nonrecourse liability* means any partnership liability to the extent the liability is nonrecourse for purposes of § 1.1001-2, and a partner or related person (within the meaning of § 1.752-4(b)) bears the economic risk of loss under § 1.752-2 because, for example, the partner or related person is the creditor or a guarantor.

(c) *Amount of nonrecourse deductions.* The amount of nonrecourse deductions for a partnership taxable year equals the net increase in partnership minimum gain during the year (determined under paragraph (d) of this section), reduced (but not below zero) by the aggregate distributions made during the year of proceeds of a nonrecourse liability that are allocable to an increase in partnership minimum gain (determined under paragraph (h) of this section). See paragraph (m), *Examples* (1)(i) and (vi), (2), and (3) of this section. However, increases in partnership minimum gain resulting from conversions, refinancings, or other changes to a debt instrument (as described in paragraph (g)(3)) do not generate nonrecourse deductions. Generally, nonrecourse deductions consist first of certain depreciation or cost recovery deductions and then, if necessary, a pro rata portion of other partnership losses, deductions, and section 705(a)(2)(B) expenditures for that year; excess nonrecourse deductions are carried over. See paragraphs (j)(1) (ii) and

(iii) of this section for more specific ordering rules. See also paragraph (m), *Example* (1)(iv) of this section.

(d) *Partnership minimum gain*—(1) *Amount of partnership minimum gain.* The amount of partnership minimum gain is determined by first computing for each partnership nonrecourse liability any gain the partnership would realize if it disposed of the property subject to that liability for no consideration other than full satisfaction of the liability, and then aggregating the separately computed gains. The amount of partnership minimum gain includes minimum gain arising from a conversion, refinancing, or other change to a debt instrument, as described in paragraph (g)(3) of this section, only to the extent a partner is allocated a share of that minimum gain. For any partnership taxable year, the net increase or decrease in partnership minimum gain is determined by comparing the partnership minimum gain on the last day of the immediately preceding taxable year with the partnership minimum gain on the last day of the current taxable year. See paragraph (m), *Examples* (1) (i) and (iv), (2), and (3) of this section.

(2) *Property subject to more than one liability.* (i) *In general.* If property is subject to more than one liability, only the portion of the property's adjusted tax basis that is allocated to a nonrecourse liability under paragraph (d)(2)(ii) of this section is used to compute minimum gain with respect to that liability.

(ii) *Allocating liabilities.* If property is subject to two or more liabilities of equal priority, the property's adjusted tax basis is allocated among the liabilities in proportion to their outstanding balances. If property is subject to two or more liabilities of unequal priority, the adjusted tax basis is allocated first to the liability of the highest priority to the extent of its outstanding balance and then to each liability in descending order of priority to the extent of its outstanding balance, until fully allocated. See paragraph (m), *Example* (1) (v) and (vii) of this section.

(3) *Partnership minimum gain if there is a book/tax disparity.* If partnership property subject to one or more nonrecourse liabilities is, under § 1.704-

1(b)(2)(iv) (d), (f), or (r), reflected on the partnership's books at a value that differs from its adjusted tax basis, the determinations under this section are made with reference to the property's book value. See section 704(c) and § 1.704-1(b)(4)(i) for principles that govern the treatment of a partner's share of minimum gain that is eliminated by the revaluation. See also paragraph (m), *Example* (3) of this section.

(4) *Special rule for year of revaluation.* If the partners' capital accounts are increased pursuant to § 1.704-1(b)(2)(iv) (d), (f), or (r) to reflect a revaluation of partnership property subject to a nonrecourse liability, the net increase or decrease in partnership minimum gain for the partnership taxable year of the revaluation is determined by:

(i) First calculating the net decrease or increase in partnership minimum gain using the current year's book values and the prior year's partnership minimum gain amount; and

(ii) Then adding back any decrease in minimum gain arising solely from the revaluation.

See paragraph (m), *Example* (3)(iii) of this section. If the partners' capital accounts are decreased to reflect a revaluation, the net increases or decreases in partnership minimum gain are determined in the same manner as in the year before the revaluation, but by using book values rather than adjusted tax bases. See section 7701(g) and § 1.704-1(b)(2)(iv)(f)(1) (property being revalued cannot be booked down below the amount of any nonrecourse liability to which the property is subject).

(e) *Requirements to be satisfied.* Allocations of nonrecourse deductions are deemed to be in accordance with the partners' interests in the partnership only if—

(1) Throughout the full term of the partnership requirements (1) and (2) of § 1.704-1(b)(2)(ii)(b) are satisfied (i.e., capital accounts are maintained in accordance with § 1.704-1(b)(2)(iv) and liquidating distributions are required to be made in accordance with positive capital account balances), and requirement (3) of either § 1.704-1(b)(2)(ii)(b) or § 1.704-1(b)(2)(ii)(d) is satisfied (i.e., partners with deficit capital accounts

have an unconditional deficit restoration obligation or agree to a qualified income offset);

(2) Beginning in the first taxable year of the partnership in which there are nonrecourse deductions and thereafter throughout the full term of the partnership, the partnership agreement provides for allocations of nonrecourse deductions in a manner that is reasonably consistent with allocations that have substantial economic effect of some other significant partnership item attributable to the property securing the nonrecourse liabilities;

(3) Beginning in the first taxable year of the partnership that it has nonrecourse deductions or makes a distribution of proceeds of a nonrecourse liability that are allocable to an increase in partnership minimum gain, and thereafter throughout the full term of the partnership, the partnership agreement contains a provision that complies with the minimum gain chargeback requirement of paragraph (f) of this section; and

(4) All other material allocations and capital account adjustments under the partnership agreement are recognized under § 1.704-1(b) (without regard to whether allocations of adjusted tax basis and amount realized under section 613A(c)(7)(D) are recognized under § 1.704-1(b)(4)(v)).

(f) *Minimum gain chargeback requirement*—(1) *In general.* If there is a net decrease in partnership minimum gain for a partnership taxable year, the minimum gain chargeback requirement applies and each partner must be allocated items of partnership income and gain for that year equal to that partner's share of the net decrease in partnership minimum gain (within the meaning of paragraph (g)(2)).

(2) *Exception for certain conversions and refinancings.* A partner is not subject to the minimum gain chargeback requirement to the extent the partner's share of the net decrease in partnership minimum gain is caused by a recharacterization of nonrecourse partnership debt as partially or wholly recourse debt or partner nonrecourse debt, and the partner bears the economic risk of loss (within the meaning of § 1.752-2) for the liability.

(3) *Exception for certain capital contributions.* A partner is not subject to the minimum gain chargeback requirement to the extent the partner contributes capital to the partnership that is used to repay the nonrecourse liability or is used to increase the basis of the property subject to the nonrecourse liability, and the partner's share of the net decrease in partnership minimum gain results from the repayment or the increase to the property's basis. See paragraph (m), *Example* (1)(iv) of this section.

(4) *Waiver for certain income allocations that fail to meet minimum gain chargeback requirement if minimum gain chargeback distorts economic arrangement.* In any taxable year that a partnership has a net decrease in partnership minimum gain, if the minimum gain chargeback requirement would cause a distortion in the economic arrangement among the partners and it is not expected that the partnership will have sufficient other income to correct that distortion, the Commissioner has the discretion, if requested by the partnership, to waive the minimum gain chargeback requirement. The following facts must be demonstrated in order for a request for a waiver to be considered:

(i) The partners have made capital contributions or received net income allocations that have restored the previous nonrecourse deductions and the distributions attributable to proceeds of a nonrecourse liability; and

(ii) The minimum gain chargeback requirement would distort the partners' economic arrangement as reflected in the partnership agreement and as evidenced over the term of the partnership by the partnership's allocations and distributions and the partners' contributions.

(5) *Additional exceptions.* The Commissioner may, by revenue ruling, provide additional exceptions to the minimum gain chargeback requirement.

(6) *Partnership items subject to the minimum gain chargeback requirement.* Any minimum gain chargeback required for a partnership taxable year consists first of a pro rata portion of certain gains recognized from the disposition of partnership property subject to one

## § 1.704-2

or more partnership nonrecourse liabilities and income from the discharge of indebtedness relating to one or more partnership nonrecourse liabilities to which partnership property is subject, and then, if necessary, consists of a pro rata portion of the partnership's other items of income and gain for that year. If the amount of the minimum gain chargeback requirement exceeds the partnership's income and gains for the taxable year, the excess carries over. See paragraphs (j)(2)(i) and (j)(2)(iii) of this section for more specific ordering rules.

(7) *Examples.* The following examples illustrate the provisions in § 1.704-2(f).

*Example 1.* Partnership AB consists of two partners, limited partner A and general partner B. Partner A contributes \$90 and Partner B contributes \$10 to the partnership. The partnership agreement has a minimum gain chargeback provision and provides that, except as otherwise required by section 704(c), all losses will be allocated 90 percent to A and 10 percent to B; and that all income will be allocated first to restore previous losses and thereafter 50 percent to A and 50 percent to B. Distributions are made first to return initial capital to the partners and then 50 percent to A and 50 percent to B. Final distributions are made in accordance with capital account balances. The partnership borrows \$200 on a nonrecourse basis from an unrelated third party and purchases an asset for \$300. The partnership's only tax item for each of the first three years is \$100 of depreciation on the asset. A's and B's shares of minimum gain (under paragraph (g) of this section) and deficit capital account balances are \$180 and \$20 respectively at the end of the third year. In the fourth year, the partnership earns \$400 of net operating income and allocates the first \$300 to restore the previous losses (*i.e.*, \$270 to A and \$30 to B); the last \$100 is allocated \$50 each. The partnership distributes \$200 of the available cash that same year; the first \$100 is distributed \$90 to A and \$10 to B to return their capital contributions; the last \$100 is distributed \$50 each to reflect their ratio for sharing profits.

	A	B
Capital account on formation .....	\$90	\$10
Less: Net loss in years 1-3 .....	(\$270)	(\$30)
Capital account at end of year 3 .....	(\$180)	(\$20)
Allocation of operating income to restore nonrecourse deductions .....	\$180	\$20
Allocation of operating income to restore capital contributions .....	\$90	\$10
Allocation of operating income to reflect profits .....	\$50	\$50

## 26 CFR Ch. I (4-1-14 Edition)

	A	B
Capital accounts after allocation of operating income .....	\$140	\$60
Distribution reflecting capital contribution ..	(\$90)	(\$10)
Distribution in profit-sharing ratio .....	(\$50)	(\$50)
Capital accounts following distribution .....	(\$0)	(\$0)

In the fifth year, the partnership sells the property for \$300 and realizes \$300 of gain. \$200 of the proceeds are used to pay the nonrecourse lender. The partnership has \$300 to distribute, and the partners expect to share that equally. Absent a waiver under paragraph (f)(4) of this section, the minimum gain chargeback would require the partnership to allocate the first \$200 of the gain \$180 to A and \$20 to B, which would distort their economic arrangement. This allocation, together with the allocation of the \$100 profit \$50 to each partner, would result in A having a positive capital account balance of \$230 and B having a positive capital account balance of \$70. The allocation of income in year 4 in effect anticipated the minimum gain chargeback that did not occur until year 5. Assuming the partnership would not have sufficient other income to correct the distortion that would otherwise result, the partnership may request that the Commissioner exercise his or her discretion to waive the minimum gain chargeback requirement and recognize allocations that would allow A and B to share equally the gain on the sale of the property. These allocations would bring the partners' capital accounts to \$150 each, allowing them to share the last \$300 equally. The Commissioner may, in his or her discretion, permit this allocation pursuant to paragraph (f)(4) of this section because the minimum gain chargeback would distort the partners' economic arrangement over the term of the partnership as reflected in the partnership agreement and as evidenced by the partners' contributions and the partnership's allocations and distributions.

*Example 2.* A and B form a partnership, contribute \$25 each to the partnership's capital, and agree to share all losses and profits 50 percent each. Neither partner has an unconditional deficit restoration obligation and all the requirements in paragraph (e) of this section are met. The partnership obtains a nonrecourse loan from an unrelated third party of \$100 and purchases two assets, stock for \$50 and depreciable property for \$100. The nonrecourse loan is secured by the partnership's depreciable property. The partnership generates \$20 of depreciation in each of the first five years as its only tax item. These deductions are properly treated as nonrecourse deductions and the allocation of these deductions 50 percent to A and 50 percent to B is deemed to be in accordance with the partners' interests in the partnership. At the end of year five, A and B each have a \$25

deficit capital account and a \$50 share of partnership minimum gain. In the beginning of year six, (at the lender's request), A guarantees the entire nonrecourse liability. Pursuant to paragraph (d)(1) of this section, the partnership has a net decrease in minimum gain of \$100 and under paragraph (g)(2) of this section, A's and B's shares of that net decrease are \$50 each. Under paragraph (f)(1) of this section (the minimum gain chargeback requirement), B is subject to a \$50 minimum gain chargeback. Because the partnership has no gross income in year six, the entire \$50 carries over as a minimum gain chargeback requirement to succeeding taxable years until there is enough income to cover the minimum gain chargeback requirement. Under the exception to the minimum gain chargeback in paragraph (f)(2) of this section, A is not subject to a minimum gain chargeback for A's \$50 share of the net decrease because A bears the economic risk of loss for the liability. Instead, A's share of partner nonrecourse debt minimum gain is \$50 pursuant to paragraph (i)(3) of this section. In year seven, the partnership earns \$100 of net operating income and uses the money to repay the entire \$100 nonrecourse debt (that A has guaranteed). Under paragraph (i)(3) of this section, the partnership has a net decrease in partner nonrecourse debt minimum gain of \$50. B must be allocated \$50 of the operating income pursuant to the carried over minimum gain chargeback requirement; pursuant to paragraph (i)(4) of this section, the other \$50 of operating income must be allocated to A as a partner nonrecourse debt minimum gain chargeback.

(g) *Shares of partnership minimum gain*—(1) *Partner's share of partnership minimum gain.* Except as increased in paragraph (g) (3) of this section, a partner's share of partnership minimum gain at the end of any partnership taxable year equals:

(i) The sum of nonrecourse deductions allocated to that partner (and to that partner's predecessors in interest) up to that time and the distributions made to that partner (and to that partner's predecessors' in interest) up to that time of proceeds of a nonrecourse liability allocable to an increase in partnership minimum gain (see paragraph (h)(1) of this section); minus

(ii) The sum of that partner's (and that partner's predecessors' in interest) aggregate share of the net decreases in partnership minimum gain plus their aggregate share of decreases resulting from revaluations of partnership prop-

erty subject to one or more partnership nonrecourse liabilities.

For purposes of § 1.704-1(b)(2)(ii)(d), a partner's share of partnership minimum gain is added to the limited dollar amount, if any, of the deficit balance in the partner's capital account that the partner is obligated to restore. See paragraph (m), *Examples* (1)(i) and (3)(i) of this section.

(2) *Partner's share of the net decrease in partnership minimum gain.* A partner's share of the net decrease in partnership minimum gain is the amount of the total net decrease multiplied by the partner's percentage share of the partnership's minimum gain at the end of the immediately preceding taxable year. A partner's share of any decrease in partnership minimum gain resulting from a revaluation of partnership property equals the increase in the partner's capital account attributable to the revaluation to the extent the reduction in minimum gain is caused by the revaluation. See paragraph (m), *Example* (3)(ii) of this section.

(3) *Conversions of recourse or partner nonrecourse debt into nonrecourse debt.* A partner's share of partnership minimum gain is increased to the extent provided in this paragraph (g)(3) if a recourse or partner nonrecourse liability becomes partially or wholly nonrecourse. If a recourse liability becomes a nonrecourse liability, a partner has a share of the partnership's minimum gain that results from the conversion equal to the partner's deficit capital account (determined under § 1.704-1(b)(2)(iv)) to the extent the partner no longer bears the economic burden for the entire deficit capital account as a result of the conversion. For purposes of the preceding sentence, the determination of the extent to which a partner bears the economic burden for a deficit capital account is made by determining the consequences to the partner in the case of a complete liquidation of the partnership immediately after the conversion applying the rules described in § 1.704-1(b)(2)(iii)(c) that deem the value of partnership property to equal its basis, taking into account section 7701(g) in the case of property that secures nonrecourse indebtedness. If a partner nonrecourse debt becomes a nonrecourse

liability, the partner's share of partnership minimum gain is increased to the extent the partner is not subject to the minimum gain chargeback requirement under paragraph (i)(4) of this section.

(h) *Distribution of nonrecourse liability proceeds allocable to an increase in partnership minimum gain*—(1) *In general.* If during its taxable year a partnership makes a distribution to the partners allocable to the proceeds of a nonrecourse liability, the distribution is allocable to an increase in partnership minimum gain to the extent the increase results from encumbering partnership property with aggregate nonrecourse liabilities that exceed the property's adjusted tax basis. See paragraph (m), *Example* (1)(vi) of this section. If the net increase in partnership minimum gain for a partnership taxable year is allocable to more than one nonrecourse liability, the net increase is allocated among the liabilities in proportion to the amount each liability contributed to the increase in minimum gain.

(2) *Distribution allocable to nonrecourse liability proceeds.* A partnership may use any reasonable method to determine whether a distribution by the partnership to one or more partners is allocable to proceeds of a nonrecourse liability. The rules prescribed under § 1.163-8T for allocating debt proceeds among expenditures (applying those rules to the partnership as if it were an individual) constitute a reasonable method for determining whether the nonrecourse liability proceeds are distributed to the partners and the partners to whom the proceeds are distributed.

(3) *Option when there is an obligation to restore.* A partnership may treat any distribution to a partner of the proceeds of a nonrecourse liability (that would otherwise be allocable to an increase in partnership minimum gain) as a distribution that is not allocable to an increase in partnership minimum gain to the extent the distribution does not cause or increase a deficit balance in the partner's capital account that exceeds the amount the partner is otherwise obligated to restore (within the meaning of § 1.704-1(b)(2)(ii)(c)) as of the

end of the partnership taxable year in which the distribution occurs.

(4) *Carryover to immediately succeeding taxable year.* The carryover rule of this paragraph applies if the net increase in partnership minimum gain for a partnership taxable year that is allocable to a nonrecourse liability under paragraph (h)(2) of this section exceeds the distributions allocable to the proceeds of the liability ("excess allocable amount"), and all or part of the net increase in partnership minimum gain for the year is carried over as an increase in partnership minimum gain for the immediately succeeding taxable year (pursuant to paragraph (j)(1)(iii) of this section). If the carryover rule of this paragraph applies, the excess allocable amount (or the amount carried over under paragraph (j)(1)(iii) of this section, if less) is treated in the succeeding taxable year as an increase in partnership minimum gain that arose in that year as a result of incurring the nonrecourse liability to which the excess allocable amount is attributable. See paragraph (m), *Example* (1)(vi) of this section. If for a partnership taxable year there is an excess allocable amount with respect to more than one partnership nonrecourse liability, the excess allocable amount is allocated to each liability in proportion to the amount each liability contributed to the increase in minimum gain.

(i) *Partnership nonrecourse liabilities where a partner bears the economic risk of loss*—(1) *In general.* Partnership losses, deductions, or section 705(a)(2)(B) expenditures that are attributable to a particular partner nonrecourse liability ("partner nonrecourse deductions," as defined in paragraph (i)(2) of this section) must be allocated to the partner that bears the economic risk of loss for the liability. If more than one partner bears the economic risk of loss for a partner nonrecourse liability, any partner nonrecourse deductions attributable to that liability must be allocated among the partners according to the ratio in which they bear the economic risk of loss. If partners bear the economic risk of loss for different portions of a liability, each portion is treated as a separate partner nonrecourse liability.

(2) *Definition of and determination of partner nonrecourse deductions.* For any partnership taxable year, the amount of partner nonrecourse deductions with respect to a partner nonrecourse debt equals the net increase during the year in minimum gain attributable to the partner nonrecourse debt ("partner nonrecourse debt minimum gain"), reduced (but not below zero) by proceeds of the liability distributed during the year to the partner bearing the economic risk of loss for the liability that are both attributable to the liability and allocable to an increase in the partner nonrecourse debt minimum gain. See paragraph (m), *Example* (1)(viii) and (ix) of this section. The determination of which partnership items constitute the partner nonrecourse deductions with respect to a partner nonrecourse debt must be made in a manner consistent with the provisions of paragraphs (c) and (j)(1)(i) and (iii) of this section.

(3) *Determination of partner nonrecourse debt minimum gain.* For any partnership taxable year, the determination of partner nonrecourse debt minimum gain and the net increase or decrease in partner nonrecourse debt minimum gain must be made in a manner consistent with the provisions of paragraphs (d) and (g)(3) of this section.

(4) *Chargeback of partner nonrecourse debt minimum gain.* If during a partnership taxable year there is a net decrease in partner nonrecourse debt minimum gain, any partner with a share of that partner nonrecourse debt minimum gain (determined under paragraph (i)(5) of this section) as of the beginning of the year must be allocated items of income and gain for the year (and, if necessary, for succeeding years) equal to that partner's share of the net decrease in the partner nonrecourse debt minimum gain. A partner's share of the net decrease in partner nonrecourse debt minimum gain is determined in a manner consistent with the provisions of paragraph (g)(2) of this section. A partner is not subject to this minimum gain chargeback, however, to the extent the net decrease in partner nonrecourse debt minimum gain arises because a partner nonrecourse liability becomes partially or wholly a non-

recourse liability. The amount that would otherwise be subject to the partner nonrecourse debt minimum gain chargeback is added to the partner's share of partnership minimum gain under paragraph (g)(3) of this section. In addition, rules consistent with the provisions of paragraphs (f) (2), (3), (4), and (5) of this section apply with respect to partner nonrecourse debt in appropriate circumstances. The determination of which items of partnership income and gain must be allocated pursuant to this paragraph (i)(4) is made in a manner that is consistent with the provisions of paragraph (f)(6) of this section. See paragraph (j)(2)(ii) and (iii) of this section for more specific rules.

(5) *Partner's share of partner nonrecourse debt minimum gain.* A partner's share of partner nonrecourse debt minimum gain at the end of any partnership taxable year is determined in a manner consistent with the provisions of paragraphs (g)(1) and (g)(3) of this section with respect to each particular partner nonrecourse debt for which the partner bears the economic risk of loss. For purposes of § 1.704-1(b)(2)(ii)(d), a partner's share of partner nonrecourse debt minimum gain is added to the limited dollar amount, if any, of the deficit balance in the partner's capital account that the partner is obligated to restore, and the partner is not otherwise considered to have a deficit restoration obligation as a result of bearing the economic risk of loss for any partner nonrecourse debt. See paragraph (m), *Example* (1)(viii) of this section.

(6) *Distribution of partner nonrecourse debt proceeds allocable to an increase in partner nonrecourse debt minimum gain.* Rules consistent with the provisions of paragraph (h) of this section apply to distributions of the proceeds of partner nonrecourse debt.

(j) *Ordering rules.* For purposes of this section, the following ordering rules apply to partnership items. Notwithstanding any other provision in this section and § 1.704-1, allocations of partner nonrecourse deductions, nonrecourse deductions, and minimum gain chargebacks are made before any other allocations.

(1) *Treatment of partnership losses and deductions.* (i) *Partner nonrecourse deductions.* Partnership losses, deductions, and section 705(a)(2)(B) expenditures are treated as partner nonrecourse deductions in the amount determined under paragraph (i)(2) of this section (determining partner nonrecourse deductions) in the following order:

(A) First, depreciation or cost recovery deductions with respect to property that is subject to partner nonrecourse debt;

(B) Then, if necessary, a pro rata portion of the partnership's other deductions, losses, and section 705(a)(2)(B) items.

Depreciation or cost recovery deductions with respect to property that is subject to a partnership nonrecourse liability is first treated as a partnership nonrecourse deduction and any excess is treated as a partner nonrecourse deduction under this paragraph (j)(1)(i).

(ii) *Partnership nonrecourse deductions.* Partnership losses, deductions, and section 705(a)(2)(B) expenditures are treated as partnership nonrecourse deductions in the amount determined under paragraph (c) of this section (determining nonrecourse deductions) in the following order:

(A) First, depreciation or cost recovery deductions with respect to property that is subject to partnership nonrecourse liabilities;

(B) Then, if necessary, a pro rata portion of the partnership's other deductions, losses, and section 705(a)(2)(B) items.

Depreciation or cost recovery deductions with respect to property that is subject to partner nonrecourse debt is first treated as a partner nonrecourse deduction and any excess is treated as a partnership nonrecourse deduction under this paragraph (j)(1)(ii). Any other item that is treated as a partner nonrecourse deduction will in no event be treated as a partnership nonrecourse deduction.

(iii) *Carryover to succeeding taxable year.* If the amount of partner nonrecourse deductions or nonrecourse deductions exceeds the partnership's losses, deductions, and section 705(a)(2)(B) expenditures for the taxable year (determined under para-

graphs (j)(1) (i) and (ii) of this section), the excess is treated as an increase in partner nonrecourse debt minimum gain or partnership minimum gain in the immediately succeeding partnership taxable year. See paragraph (m), *Example* (1)(vi) of this section.

(2) *Treatment of partnership income and gains.* (i) *Minimum gain chargeback.* Items of partnership income and gain equal to the minimum gain chargeback requirement (determined under paragraph (f) of this section) are allocated as a minimum gain chargeback in the following order:

(A) First, a pro rata portion of gain from the disposition of property subject to partnership nonrecourse liabilities and discharge of indebtedness income relating to partnership nonrecourse liabilities to which property is subject;

(B) Then, if necessary, a pro rata portion of the partnership's other items of income and gain for that year.

Gain from the disposition of property subject to partner nonrecourse debt is allocated to satisfy a minimum gain chargeback requirement for partnership nonrecourse debt only to the extent not allocated under paragraph (j)(2)(i) of this section.

(ii) *Chargeback attributable to decrease in partner nonrecourse debt minimum gain.* Items of partnership income and gain equal to the partner nonrecourse debt minimum gain chargeback (determined under paragraph (i)(4) of this section) are allocated to satisfy a partner nonrecourse debt minimum gain chargeback in the following order:

(A) First, a pro rata portion of gain from the disposition of property subject to partner nonrecourse debt and discharge of indebtedness income relating to partner nonrecourse debt to which property is subject.

(B) Then, if necessary, a pro rata portion of the partnership's other items of income and gain for that year.

Gain from the disposition of property subject to a partnership nonrecourse liability is allocated to satisfy a partner nonrecourse debt minimum gain chargeback only to the extent not allocated under paragraph (j)(2)(i) of this section. An item of partnership income and gain that is allocated to satisfy a

minimum gain chargeback under paragraph (f) of this section is not allocated to satisfy a minimum gain chargeback under paragraph (i)(4).

(iii) *Carryover to succeeding taxable year.* If a minimum gain chargeback requirement (determined under paragraphs (f) and (i)(4) of this section) exceeds the partnership's income and gains for the taxable year, the excess is treated as a minimum gain chargeback requirement in the immediately succeeding partnership taxable years until fully charged back.

(k) *Tiered partnerships.* For purposes of this section, the following rules determine the effect on partnership minimum gain when a partnership ("upper-tier partnership") is a partner in another partnership ("lower-tier partnership").

(1) *Increase in upper-tier partnership's minimum gain.* The sum of the nonrecourse deductions that the lower-tier partnership allocates to the upper-tier partnership for any taxable year of the upper-tier partnership, and the distributions made during that taxable year from the lower-tier partnership to the upper-tier partnership of proceeds of nonrecourse debt that are allocable to an increase in the lower-tier partnership's minimum gain, is treated as an increase in the upper-tier partnership's minimum gain.

(2) *Decrease in upper-tier partnership's minimum gain.* The upper-tier partnership's share for its taxable year of the lower-tier partnership's net decrease in its minimum gain is treated as a decrease in the upper-tier partnership's minimum gain for that taxable year.

(3) *Nonrecourse debt proceeds distributed from the lower-tier partnership to the upper-tier partnership.* All distributions from the lower-tier partnership to the upper-tier partnership during the upper-tier partnership's taxable year of proceeds of a nonrecourse liability allocable to an increase in the lower-tier partnership's minimum gain are treated as proceeds of a nonrecourse liability of the upper-tier partnership. The increase in the upper-tier partnership's minimum gain (under paragraph (k)(1) of this section) attributable to the receipt of those distributions is, for purposes of paragraph (h) of this section, treated as an increase in the upper-tier

partnership's minimum gain arising from encumbering property of the upper-tier partnership with a nonrecourse liability of the upper-tier partnership.

(4) *Nonrecourse deductions of lower-tier partnership treated as depreciation by upper-tier partnership.* For purposes of paragraph (c) of this section, all nonrecourse deductions allocated by the lower-tier partnership to the upper-tier partnership for the upper-tier partnership's taxable year are treated as depreciation or cost recovery deductions with respect to property owned by the upper-tier partnership and subject to a nonrecourse liability of the upper-tier partnership with respect to which minimum gain increased during the year by the amount of the nonrecourse deductions.

(5) *Coordination with partner nonrecourse debt rules.* The lower-tier partnership's liabilities that are treated as the upper-tier partnership's liabilities under §1.752-4(a) are treated as the upper-tier partnership's liabilities for purposes of applying paragraph (i) of this section. Rules consistent with the provisions of paragraphs (k)(1) through (k)(4) of this section apply to determine the allocations that the upper-tier partnership must make with respect to any liability that constitutes a nonrecourse debt for which one or more partners of the upper-tier partnership bear the economic risk of loss.

(1) *Effective/applicability dates.*—(i) *In general.*—(i) *Prospective application.* Except as otherwise provided in this paragraph (1), this section applies for partnership taxable years beginning on or after December 28, 1991. For the rules applicable to taxable years beginning after December 29, 1988, and before December 28, 1991, see former §1.704-1T(b)(4)(iv). For the rules applicable to taxable years beginning on or before December 29, 1988, see former §1.704-1(b)(4)(iv).

(ii) *Partnerships subject to temporary regulations.* If a partnership agreement entered into after December 29, 1988, and before December 28, 1991, or a partnership agreement entered into on or before December 29, 1988, that elected to apply former §1.704-1T(b)(4)(iv) (as contained in the CFR edition revised as

## § 1.704-2

## 26 CFR Ch. I (4-1-14 Edition)

of April 1, 1991), complied with the provisions of former § 1.704-1T(b)(4)(iv) before December 28, 1991—

(A) The provisions of former § 1.704-1T(b)(4)(iv) continue to apply to the partnership for any taxable year beginning on or after December 28, 1991, (unless the partnership makes an election under paragraph (1)(4) of this section) and ending before any subsequent material modification to the partnership agreement; and

(B) The provisions of this section do not apply to the partnership for any of those taxable years.

(iii) *Partnerships subject to former regulations.* If a partnership agreement entered into on or before December 29, 1988, complied with the provisions of former § 1.704-1(b)(4)(iv)(d) on or before that date—

(A) The provisions of former § 1.704-1(b)(4)(iv) (a) through (f) continue to apply to the partnership for any taxable year beginning after that date (unless the partnership made an election under § 1.704-1T(b)(4)(iv)(m)(4) in a partnership taxable year ending before December 28, 1991, or makes an election under paragraph (1)(4) of this section) and ending before any subsequent material modification to the partnership agreement; and

(B) The provisions of this section do not apply to the partnership for any of those taxable years.

(iv) Paragraph (f)(2), the first sentence of paragraph (g)(3), and the third sentence of paragraph (i)(4) of this section apply to liabilities incurred or assumed by a partnership on or after October 11, 2006 other than liabilities incurred or assumed by a partnership pursuant to a written binding contract in effect prior to October 11, 2006. The rules applicable to liabilities incurred or assumed (or subject to a binding contract in effect) prior to October 11, 2006 are contained in this section in effect prior to October 11, 2006. (See 26 CFR part 1 revised as of April 1, 2006.)

(v) The first sentence of paragraph (f)(6) of this section and paragraphs (j)(2)(i)(A) and (j)(2)(ii)(A) of this section apply on and after November 17, 2011.

(2) *Special rule applicable to pre-January 30, 1989, related party nonrecourse*

*debt.* For purposes of this section and former § 1.704-1T(b)(4)(iv), if—

(i) A partnership liability would, but for this paragraph (1)(2) of this section, constitute a partner nonrecourse debt; and

(ii) Sections 1.752-1 through 1.752-3 or former §§ 1.752-1T through -3T (whichever is applicable) do not apply to the liability;

the liability is, notwithstanding paragraphs (i) and (b)(4) of this section, treated as a nonrecourse liability of the partnership, and not as a partner nonrecourse debt, to the extent the liability would be so treated under this section (or § 1.704-1T(b)(4)(iv)) if the determination of the extent to which one or more partners bears the economic risk of loss for the liability under § 1.752-1 or former § 1.752-1T were made without regard to the economic risk of loss that any partner would otherwise be considered to bear for the liability by reason of any obligation undertaken or interest as a creditor acquired prior to January 30, 1989, by a person related to the partner (within the meaning of § 1.752-4(b) or former § 1.752-1T(h)). For purposes of the preceding sentence, if a related person undertakes an obligation or acquires an interest as a creditor on or after January 30, 1989, pursuant to a written binding contract in effect prior to January 30, 1989, and at all times thereafter, the obligation or interest as a creditor is treated as if it were undertaken or acquired prior to January 30, 1989. However, for partnership taxable years beginning on or after December 29, 1988, a pre-January 30, 1989, liability, other than a liability subject to paragraph (1)(3) of this section or former § 1.704-1T(b)(4)(iv)(m)(3) (whichever is applicable), that is treated as grandfathered under former §§ 1.752-1T through -3T (whichever is applicable) will be treated as a nonrecourse liability for purposes of this section provided that all partners in the partnership consistently treat the liability as nonrecourse for partnership taxable years beginning on or after December 29, 1988.

(3) *Transition rule for pre-March 1, 1984, partner nonrecourse debt.* If a partnership liability would, but for this paragraph (1)(3) or former § 1.704-

1T(b)(4)(iv), constitute a partner non-recourse debt and the liability constitutes grandfathered partner non-recourse debt that is appropriately treated as a nonrecourse liability of the partnership under §1.752-1 (as in effect prior to December 29, 1988)—

(i) The liability is, notwithstanding paragraphs (i) and (b)(4) of this section, former §1.704-1T(b)(4)(iv), and former §1.704-1(b)(4)(iv), treated as a non-recourse liability of the partnership for purposes of this section and for purposes of former §1.704-1T(b)(4)(iv) and former §1.704-1(b)(4)(iv) to the extent of the amount, if any, by which the smallest outstanding balance of the liability during the period beginning at the end of the first partnership taxable year ending on or after December 31, 1986, and ending at the time of any determination under this paragraph (1)(3)(i) or former §1.704-1T(b)(4)(iv)(m)(3)(i) exceeds the aggregate amount of the adjusted basis (or book value) of partnership property allocable to the liability (determined in accordance with former §1.704-1(b)(4)(iv)(c) (1) and (2) at the end of the first partnership taxable year ending on or after December 31, 1986); and

(ii) In applying this section to the liability, former §1.704-1(b)(4)(iv)(c) (1) and (2) is applied as if all of the adjusted basis of partnership property allocable to the liability is allocable to the portion of the liability that is treated as a partner nonrecourse debt and as if none of the adjusted basis of partnership property that is allocable to the liability is allocable to the portion of the liability that is treated as a nonrecourse liability under this paragraph (1)(3) and former §1.704-1T(b)(4)(iv)(m)(3)(i).

For purposes of the preceding sentence, a grandfathered partner debt is any partnership liability that was not subject to former §§1.752-1T and -3T but that would have been subject to those sections under §1.752-4T(b) if the liability had arisen (other than pursuant to a written binding contract) on or after March 1, 1984. A partnership liability is not considered to have been subject to §§1.752-2T and -3T solely because a portion of the liability was treated as a liability to which those sections apply under §1.752-4(e).

(4) *Election.* A partnership may elect to apply the provisions of this section to the first taxable year of the partnership ending on or after December 28, 1991. An election under this paragraph (1)(4) is made by attaching a written statement to the partnership return for the first taxable year of the partnership ending on or after December 28, 1991. The written statement must include the name, address, and taxpayer identification number of the partnership making the statement and must declare that an election is made under this paragraph (1)(4).

(m) *Examples.* The principles of this section are illustrated by the following examples:

*Example 1. Nonrecourse deductions and partnerships minimum gain.* For *Example 1*, unless otherwise provided, the following facts are assumed. LP, the limited partner, and GP, the general partner, form a limited partnership to acquire and operate a commercial office building. LP contributes \$180,000, and GP contributes \$20,000. The partnership obtains an \$800,000 nonrecourse loan and purchases the building (on leased land) for \$1,000,000. The nonrecourse loan is secured only by the building, and no principal payments are due for 5 years. The partnership agreement provides that GP will be required to restore any deficit balance in GP's capital account following the liquidation of GP's interest (as set forth in §1.704-1 (b) (2)(ii)(b)(3)), and LP will not be required to restore any deficit balance in LP's capital account following the liquidation of LP's interest. The partnership agreement contains the following provisions required by paragraph (e) of this section: a qualified income offset (as defined in §1.704-1(b)(2)(ii)(d)); a minimum gain chargeback (in accordance with paragraph (f) of this section); a provision that the partners' capital accounts will be determined and maintained in accordance with §1.704-1(b)(2)(ii)(b)(1); and a provision that distributions will be made in accordance with partners' positive capital account balances (as set forth in §1.704-1(b)(2)(ii)(b)(2)). In addition, as of the end of each partnership taxable year discussed herein, the items described in §1.704-1(b)(2)(ii)(d) (4), (5), and (6) are not reasonably expected to cause or increase a deficit balance in LP's capital account. The partnership agreement provides that, except as otherwise required by its qualified income offset and minimum gain chargeback provisions, all partnership items will be allocated 90 percent to LP and 10 percent to GP until the first time when the partnership has recognized items of income and gain that exceed the items of loss and deduction it has recognized over its life, and

§ 1.704-2

26 CFR Ch. I (4-1-14 Edition)

all further partnership items will be allocated equally between LP and GP. Finally, the partnership agreement provides that all distributions, other than distributions in liquidation of the partnership or of a partner's interest in the partnership, will be made 90 percent to LP and 10 percent to GP until a total of \$200,000 has been distributed, and thereafter all the distributions will be made equally to LP and GP. In each of the partnership's first 2 taxable years, it generates rental income of \$95,000, operating expenses (including land lease payments) of \$10,000, interest expense of \$80,000, and a depreciation deduction of \$90,000, resulting in a net taxable loss of \$85,000 in each of those years. The allocations of these losses 90 per cent to LP and 10 percent to GP have substantial economic effect.

	LP	GP
Capital account on formation .....	\$180,000	\$20,000
Less: net loss in years 1 and 2 .....	(153,000)	(17,000)
Capital account at end of year 2 .....	\$27,000	\$3,000

In the partnership's third taxable year, it again generates rental income of \$95,000, operating expenses of \$10,000, interest expense of \$80,000, and a depreciation deduction of \$90,000, resulting in net taxable loss of \$85,000. The partnership makes no distributions.

(i) *Calculation of nonrecourse deductions and partnership minimum gain.* If the partnership were to dispose of the building in full satisfaction of the nonrecourse liability at the end of the third year, it would realize \$70,000 of gain (\$800,000 amount realized less \$730,000 adjusted tax basis). Because the amount of partnership minimum gain at the end of the third year (and the net increase in partnership minimum gain during the year) is \$70,000, there are partnership nonrecourse deductions for that year of \$70,000, consisting of depreciation deductions allowable with respect to the building of \$70,000. Pursuant to the partnership agreement, all partnership items comprising the net taxable loss of \$85,000, including the \$70,000 nonrecourse deduction, are allocated 90 percent to LP and 10 percent to GP. The allocation of these items, other than the nonrecourse deductions, has substantial economic effect.

	LP	GP
Capital account at end of year 2 .....	\$27,000	\$3,000
Less: net loss in year 3 (without nonrecourse deductions) .....	(13,500)	(1,500)
Less: nonrecourse deductions in year 3 .....	(63,000)	(7,000)
Capital account at end of year 3 .....	(\$49,500)	(\$5,500)

The allocation of the \$70,000 nonrecourse deduction satisfies requirement (2) of paragraph (e) of this section because it is consistent with allocations having substantial economic effect of other significant partnership items attributable to the building. Because the remaining requirements of paragraph (e) of this section are satisfied, the allocation of nonrecourse deductions is deemed to be in accordance with the partners' interests in the partnership. At the end of the partnership's third taxable year, LP's and GP's shares of partnership minimum gain are \$63,000 and \$7,000, respectively. Therefore, pursuant to paragraph (g)(1) of this section, LP is treated as obligated to restore a deficit capital account balance of \$63,000, so that in the succeeding year LP could be allocated up to an additional \$13,500 of partnership deductions, losses, and section 705(a)(2)(B) items that are not nonrecourse deductions. Even though this allocation would increase a deficit capital account balance, it would be considered to have economic effect under the alternate economic effect test contained in § 1.704-1(b)(2)(ii)(d). If the partnership were to dispose of the building in full satisfaction of the nonrecourse liability at the beginning of the partnership's fourth taxable year (and had no other economic activity in that year), the partnership minimum gain would be decreased from \$70,000 to zero, and the minimum gain chargeback would require that LP and GP be allocated \$63,000 and \$7,000, respectively, of the gain from that disposition.

(ii) *Illustration of reasonable consistency requirement.* Assume instead that the partnership agreement provides that all nonrecourse deductions of the partnership will be allocated equally between LP and GP. Furthermore, at the time the partnership agreement is entered into, there is a reasonable likelihood that over the partnership's life it will realize amounts of income and gain significantly in excess of amounts of loss and deduction (other than nonrecourse deductions). The equal allocation of excess income and gain has substantial economic effect.

	LP	GP
Capital account on formation .....	\$180,000	\$20,000
Less: net loss in years 1 and 2 .....	(153,000)	(17,000)
Less: net loss in year (without nonrecourse deductions) .....	(13,500)	(1,500)
Less: nonrecourse deductions in year 3 .....	(35,000)	(35,000)
Capital account at end of year 3 .....	(\$21,500)	(\$33,500)

The allocation of the \$70,000 nonrecourse deduction equally between LP and GP satisfies requirement (2) of paragraph (e) of this section because the allocation is consistent with allocations, which will have substantial

## Internal Revenue Service, Treasury

## § 1.704-2

economic effect, of other significant partnership items attributable to the building. Because the remaining requirements of paragraph (e) of this section are satisfied, the allocation of nonrecourse deductions is deemed to be in accordance with the partners' interests in the partnership. The allocation of the nonrecourse deductions 75 percent to LP and 25 percent to GP (or in any other ratio between 90 percent to LP/10 percent to GP and 50 percent to LP/50 percent to GP) also would satisfy requirement (2) of paragraph (e) of this section.

(iii) *Allocation of nonrecourse deductions that fails reasonable consistency requirement.* Assume instead that the partnership agreement provides that LP will be allocated 99 percent, and GP 1 percent, of all nonrecourse deductions of the partnership. Allocating nonrecourse deductions this way does not satisfy requirement (2) of paragraph (e) of this section because the allocations are not reasonably consistent with allocations, having substantial economic effect, of any other significant partnership item attributable to the building. Therefore, the allocation of nonrecourse deductions will be disregarded, and the nonrecourse deductions of the partnership will be reallocated according to the partners' overall economic interests in the partnership, determined under § 1.704-1(b)(3)(ii).

(iv) *Capital contribution to pay down nonrecourse debt.* At the beginning of the partnership's fourth taxable year, LP contributes \$144,000 and GP contributes \$16,000 of addition capital to the partnership, which the partnership immediately uses to reduce the amount of its nonrecourse liability from \$800,000 to \$640,000. In addition, in the partnership's fourth taxable year, it generates rental income of \$95,000, operating expenses of \$10,000, interest expense of \$64,000 (consistent with the debt reduction), and a depreciation deduction of \$90,000, resulting in a net taxable loss of \$69,000. If the partnership were to dispose of the building in full satisfaction of the nonrecourse liability at the end of that year, it would realize no gain (\$640,000 amount realized less \$640,000 adjusted tax basis). Therefore, the amount of partnership minimum gain at the end of the year is zero, which represents a net decrease in partnership minimum gain of \$70,000 during the year. LP's and GP's shares of this net decrease are \$63,000 and \$7,000 respectively, so that at the end of the partnership's fourth taxable year, LP's and GP's shares of partnership minimum gain are zero. Although there has been a net decrease in partnership minimum gain, pursuant to paragraph (f)(3) of this section LP and GP are not subject to a minimum gain chargeback.

	LP	GP
Capital account at end of year 3 .....	(\$49,500)	(\$5,500)

	LP	GP
Plus: contribution .....	144,000	16,000
Less: net loss in year 4 ....	(62,100)	(6,900)
Capital account at end of year 4 .....	\$32,400	\$3,600
Minimum gain chargeback carryforward .....	\$0	\$0

(v) *Loans of unequal priority.* Assume instead that the building acquired by the partnership is secured by a \$700,000 nonrecourse loan and a \$100,000 recourse loan, subordinate in priority to the nonrecourse loan. Under paragraph (d)(2) of this section, \$700,000 of the adjusted basis of the building at the end of the partnership's third taxable year is allocated to the nonrecourse liability (with the remaining \$30,000 allocated to the recourse liability) so that if the partnership disposed of the building in full satisfaction of the nonrecourse liability at the end of that year, it would realize no gain (\$700,000 amount realized less \$700,000 adjusted tax basis). Therefore, there is no minimum gain (or increase in minimum gain) at the end of the partnership's third taxable year. If, however, the \$700,000 nonrecourse loan were subordinate in priority to the \$100,000 recourse loan, under paragraph (d)(2) of this section, the first \$100,000 of adjusted tax basis in the building would be allocated to the recourse liability, leaving only \$630,000 of the adjusted basis of the building to be allocated to the \$700,000 nonrecourse loan. In that case, the balance of the \$700,000 nonrecourse liability would exceed the adjusted tax basis of the building by \$70,000, so that there would be \$70,000 of minimum gain (and a \$70,000 increase in partnership minimum gain) in the partnership's third taxable year.

(vi) *Nonrecourse borrowing; distribution of proceeds in subsequent year.* The partnership obtains an additional nonrecourse loan of \$200,000 at the end of its fourth taxable year, secured by a second mortgage on the building, and distributes \$180,000 of this cash to its partners at the beginning of its fifth taxable year. In addition, in its fourth and fifth taxable years, the partnership again generates rental income of \$95,000, operating expenses of \$10,000, interest expense of \$80,000 (\$100,000 in the fifth taxable year reflecting the interest paid on both liabilities), and a depreciation deduction of \$90,000, resulting in a net taxable loss of \$85,000 (\$105,000 in the fifth taxable year reflecting the interest paid on both liabilities). The partnership has distributed its \$5,000 of operating cash flow in each year (\$95,000 of rental income less \$10,000 of operating expense and \$80,000 of interest expense) to LP and GP at the end of each year. If the partnership were to dispose of the building in full satisfaction of both nonrecourse liabilities at the end of its fourth taxable year, the partnership would realize \$360,000 of gain (\$1,000,000 amount realized less \$640,000 adjusted tax basis). Thus,

## § 1.704-2

the net increase in partnership minimum gain during the partnership's fourth taxable year is \$290,000 (\$360,000 of minimum gain at the end of the fourth year less \$70,000 of minimum gain at the end of the third year). Because the partnership did not distribute any of the proceeds of the loan it obtained in its fourth year during that year, the potential amount of partnership nonrecourse deductions for that year is \$290,000. Under paragraph (c) of this section, if the partnership had distributed the proceeds of that loan to its partners at the end of its fourth year, the partnership's nonrecourse deductions for that year would have been reduced by the amount of that distribution because the proceeds of that loan are allocable to an increase in partnership minimum gain under paragraph (h)(1) of this section. Because the nonrecourse deductions of \$290,000 for the partnership's fourth taxable year exceed its total deductions for that year, all \$180,000 of the partnership's deductions for that year are treated as nonrecourse deductions, and the \$110,000 excess nonrecourse deductions are treated as an increase in partnership minimum gain in the partnership's fifth taxable year under paragraph (c) of this section.

	LP	GP
Capital account at end of year 3 (including cash flow distributions) ....	(\$63,000)	(\$7,000)
Plus: rental income in year 4 .....	85,500	9,500
Less: nonrecourse deductions in year 4 .....	(162,000)	(18,000)
Less: cash flow distributions in year 4 .....	(4,500)	(500)
Capital account at end of year 4 .....	(\$144,000)	(\$16,000)

At the end of the partnership's fourth taxable year, LP's and GP's shares of partnership minimum gain are \$225,000 and \$25,000, respectively (because the \$110,000 excess of nonrecourse deductions is carried forward to the next year). If the partnership were to dispose of the building in full satisfaction of the nonrecourse liabilities at the end of its fifth taxable year, the partnership would realize \$450,000 of gain (\$1,000,000 amount realized less \$550,000 adjusted tax basis). Therefore, the net increase in partnership minimum gain during the partnership's fifth taxable year is \$200,000 (\$110,000 deemed increase plus the \$90,000 by which minimum gain at the end of the fifth year exceeds minimum gain at the end of the fourth year (\$450,000 less \$360,000)). At the beginning of its fifth year, the partnership distributes \$180,000 of the loan proceeds (retaining \$20,000 to pay the additional interest expense). Under paragraph (h) of this section, the first \$110,000 of this distribution (an amount equal to the deemed increase in partnership minimum gain for the year) is considered allocable to an increase in partnership minimum gain for the year. As a result, the amount of non-

## 26 CFR Ch. I (4-1-14 Edition)

recourse deductions for the partnership's fifth taxable year is \$90,000 (\$200,000 net increase in minimum gain less \$110,000 distribution of nonrecourse liability proceeds allocable to an increase in partnership minimum gain), and the nonrecourse deductions consist solely of the \$90,000 depreciation deduction allowable with respect to the building. As a result of the distributions during the partnership's fifth taxable year, the total distributions to the partners over the partnership's life equal \$205,000. Therefore, the last \$5,000 distributed to the partners during the fifth year will be divided equally between them under the partnership agreement. Thus, out of the \$185,000 total distribution during the partnership's fifth taxable year, the first \$180,000 is distributed 90 percent to LP and 10 percent to GP, and the last \$5,000 is divided equally between them.

	LP	GP
Capital account at end of year 4	(\$144,000)	(\$16,000)
Less: net loss in year 5 (without nonrecourse deductions) .....	(13,500)	(1,500)
Less: nonrecourse deductions in year 5 .....	(81,000)	(9,000)
Less: distribution of loan proceeds .....	(162,000)	(18,000)
Less: cash flow distribution in year 5 .....	(2,500)	(2,500)
Capital account at end of year 5	(\$403,000)	(\$47,000)

At the end of the partnership's fifth taxable year, LP's share of partnership minimum gain is \$405,000 (\$225,000 share of minimum gain at the end of the fourth year plus \$81,000 of nonrecourse deductions for the fifth year and a \$99,000 distribution of nonrecourse liability proceeds that are allocable to an increase in minimum gain) and GP's share of partnership minimum gain is \$45,000 (\$25,000 share of minimum gain at the end of the fourth year plus \$9,000 of nonrecourse deductions for the fifth year and an \$11,000 distribution of nonrecourse liability proceeds that are allocable to an increase in minimum gain).

(vii) *Partner guarantee of nonrecourse debt.* LP and GP personally guarantee the "first" \$100,000 of the \$800,000 nonrecourse loan (*i.e.*, only if the building is worth less than \$100,000 will they be called upon to make up any deficiency). Under paragraph (d)(2) of this section, only \$630,000 of the adjusted tax basis of the building is allocated to the \$700,000 nonrecourse portion of the loan because the collateral will be applied first to satisfy the \$100,000 guaranteed portion, making it superior in priority to the remainder of the loan. On the other hand, if LP and GP were to guarantee the "last" \$100,000 (*i.e.*, if the building is worth less than \$800,000, they will be called upon to make up the deficiency up to \$100,000), \$700,000 of the adjusted tax basis of the building would be allocated to

the \$700,000 nonrecourse portion of the loan because the guaranteed portion would be inferior in priority to it.

(viii) *Partner nonrecourse debt.* Assume instead that the \$800,000 loan is made by LP, the limited partner. Under paragraph (b)(4) of this section, the \$800,000 obligation does not constitute a nonrecourse liability of the partnership for purposes of this section because LP, a partner, bears the economic risk of loss for that loan within the meaning of § 1.752-2. Instead, the \$800,000 loan constitutes a partner nonrecourse debt under paragraph (b)(4) of this section. In the partnership's third taxable year, partnership minimum gain would have increased by \$70,000 if the debt were a nonrecourse liability of the partnership. Thus, under paragraph (i)(3) of this section, there is a net increase of \$70,000 in the minimum gain attributable to the \$800,000 partner nonrecourse debt for the partnership's third taxable year, and \$70,000 of the \$90,000 depreciation deduction from the building for the partnership's third taxable year constitutes a partner nonrecourse deduction with respect to the debt. See paragraph (i)(4) of this section. Under paragraph (i)(2) of this section, this partner nonrecourse deduction must be allocated to LP, the partner that bears the economic risk of loss for that liability.

(ix) *Nonrecourse debt and partner nonrecourse debt of differing priorities.* As in Example 1 (viii) of this paragraph (m), the \$800,000 loan is made to the partnership by LP, the limited partner, but the loan is a purchase money loan that "wraps around" a \$700,000 underlying nonrecourse note (also secured by the building) issued by LP to an unrelated person in connection with LP's acquisition of the building. Under these circumstances, LP bears the economic risk of loss with respect to only \$100,000 of the liability within the meaning of § 1.752-2. See § 1.752-2(f) (Example 6). Therefore, for purposes of paragraph (d) of this section, the \$800,000 liability is treated as a \$700,000 nonrecourse liability of the partnership and a \$100,000 partner nonrecourse debt (inferior in priority to the \$700,000 liability) of the partnership for which LP bears the economic risk of loss. Under paragraph (i)(2) of this section, \$70,000 of the \$90,000 depreciation deduction realized in the partnership's third taxable year constitutes a partner nonrecourse deduction that must be allocated to LP.

*Example 2. Netting of increases and decreases in partnership minimum gain.* For Example 2 unless otherwise provided, the following facts are assumed. X and Y form a general partnership to acquire and operate residential real properties. Each partner contributes \$150,000 to the partnership. The partnership obtains a \$1,500,000 nonrecourse loan and purchases 3 apartment buildings (on leased land) for \$720,000 ("Property A"), \$540,000 ("Property B"), and \$540,000 ("Property C"). The

nonrecourse loan is secured only by the 3 buildings, and no principal payments are due for 5 years. In each of the partnership's first 3 taxable years, it generates rental income of \$225,000, operating expenses (including land lease payments) of \$50,000, interest expense of \$175,000, and depreciation deductions on the 3 properties of \$150,000 (\$60,000 on Property A and \$45,000 on each of Property B and Property C), resulting in a net taxable loss of \$150,000 in each of those years. The partnership makes no distributions to X or Y.

(i) *Calculation of net increases and decreases in partnership minimum gain.* If the partnership were to dispose of the 3 apartment buildings in full satisfaction of its nonrecourse liability at the end of its third taxable year, it would realize \$150,000 of gain (\$1,500,000 amount realized less \$1,350,000 adjusted tax basis). Because the amount of partnership minimum gain at the end of that year (and the net increase in partnership minimum gain during that year) is \$150,000, the amount of partnership nonrecourse deductions for that year is \$150,000, consisting of depreciation deductions allowable with respect to the 3 apartment buildings of \$150,000. The result would be the same if the partnership obtained 3 separate nonrecourse loans that were "cross-collateralized" (i.e., if each separate loan were secured by all 3 of the apartment buildings).

(ii) *Netting of increases and decreases in partnership minimum gain when there is a disposition.* At the beginning of the partnership's fourth taxable year, the partnership (with the permission of the nonrecourse lender) disposes of Property A for \$835,000 and uses a portion of the proceeds to repay \$600,000 of the nonrecourse liability (the principal amount attributable to Property A), reducing the balance to \$900,000. As a result of the disposition, the partnership realizes gain of \$295,000 (\$835,000 amount realized less \$540,000 adjusted tax basis). If the disposition is viewed in isolation, the partnership has generated minimum gain of \$60,000 on the sale of Property A (\$600,000 of debt reduction less \$540,000 adjusted tax basis). However, during the partnership's fourth taxable year it also generates rental income of \$135,000, operating expenses of \$30,000, interest expense of \$105,000, and depreciation deductions of \$90,000 (\$45,000 on each remaining building). If the partnership were to dispose of the remaining two buildings in full satisfaction of its nonrecourse liability at the end of the partnership's fourth taxable year, it would realize gain of \$180,000 (\$900,000 amount realized less \$720,000 aggregate adjusted tax basis), which is the amount of partnership minimum gain at the end of the year. Because the partnership minimum gain increased from \$150,000 to \$180,000 during the partnership's fourth taxable year, the amount of partnership nonrecourse deductions for that year is \$30,000, consisting of a

## § 1.704-2

ratable portion of depreciation deductions allowable with respect to the two remaining apartment buildings. No minimum gain chargeback is required for the taxable year, even though the partnership disposed of one of the properties subject to the nonrecourse liability during the year, because there is no net decrease in partnership minimum gain for the year. See paragraph (f)(1) of this section.

*Example 3. Nonrecourse deductions and partnership minimum gain before third partner is admitted.* For purposes of Example 3, unless otherwise provided, the following facts are assumed. Additional facts are given in each of Examples 3 (ii), (iii), and (iv). A and B form a limited partnership to acquire and lease machinery that is 5-year recovery property. A, the limited partner, and B, the general partner, contribute \$100,000 each to the partnership, which obtains an \$800,000 nonrecourse loan and purchases the machinery for \$1,000,000. The nonrecourse loan is secured only by the machinery. The principal amount of the loan is to be repaid \$50,000 per year during each of the partnership's first 5 taxable years, with the remaining \$550,000 of unpaid principal due on the first day of the partnership's sixth taxable year. The partnership agreement contains all of the provisions required by paragraph (e) of this section, and, as of the end of each partnership taxable year discussed herein, the items described in § 1.704-1(b)(2)(ii)(d) (4), (5), and (6) are not reasonably expected to cause or increase a deficit balance in A's or B's capital account. The partnership agreement provides that, except as otherwise required by its qualified income offset and minimum gain chargeback provisions, all partnership items will be allocated equally between A and B. Finally, the partnership agreement provides that all distributions, other than distributions in liquidation of the partnership or of a partner's interest in the partnership, will be made equally between A and B. In the partnership's first taxable year it generates rental income of \$130,000, interest expense of \$80,000, and a depreciation deduction of \$150,000, resulting in a net taxable loss of \$100,000. In addition, the partnership repays \$50,000 of the nonrecourse liability, reducing that liability to \$750,000. Allocations of these losses equally between A and B have substantial economic effect.

	A	B
Capital account on formation .....	\$100,000	\$100,000
Less: net loss in year 1 ..	(50,000)	(50,000)
Capital account at end of year 1 ...	\$50,000	\$50,000

In the partnership's second taxable year, it generates rental income of \$130,000, interest expense of \$75,000, and a depreciation deduction of \$220,000, resulting in a net taxable

## 26 CFR Ch. I (4-1-14 Edition)

loss of \$165,000. In addition, the partnership repays \$50,000 of the nonrecourse liability, reducing that liability to \$700,000, and distributes \$2,500 of cash to each partner. If the partnership were to dispose of the machinery in full satisfaction of the nonrecourse liability at the end of that year, it would realize \$70,000 of gain (\$700,000 amount realized less \$630,000 adjusted tax basis). Therefore, the amount of partnership minimum gain at the end of that year (and the net increase in partnership minimum gain during the year) is \$70,000, and the amount of partnership nonrecourse deductions for the year is \$70,000. The partnership nonrecourse deductions for its second taxable year consist of \$70,000 of the depreciation deductions allowable with respect to the machinery. Pursuant to the partnership agreement, all partnership items comprising the net taxable loss of \$165,000, including the \$70,000 nonrecourse deduction, are allocated equally between A and B. The allocation of these items, other than the nonrecourse deductions, has substantial economic effect.

	A	B
Capital account at end of year 1 .....	\$50,000	\$50,000
Less: net loss in year 2 (without nonrecourse deductions) .....	(47,500)	(47,500)
Less: nonrecourse deductions in year 2 .....	(35,000)	(35,000)
Less: distribution .....	(2,500)	(2,500)
Capital account at end of year 2 .....	(\$35,000)	(\$35,000)

(i) *Calculation of nonrecourse deductions and partnership minimum gain.* Because all of the requirements of paragraph (e) of this section are satisfied, the allocation of nonrecourse deductions is deemed to be made in accordance with the partners' interests in the partnership. At the end of the partnership's second taxable year, A's and B's shares of partnership minimum gain are \$35,000 each. Therefore, pursuant to paragraph (g)(1) of this section, A and B are treated as obligated to restore deficit balances in their capital accounts of \$35,000 each. If the partnership were to dispose of the machinery in full satisfaction of the nonrecourse liability at the beginning of the partnership's third taxable year (and had no other economic activity in that year), the partnership minimum gain would be decreased from \$70,000 to zero. A's and B's shares of that net decrease would be \$35,000 each. Upon that disposition, the minimum gain chargeback would require that A and B each be allocated \$35,000 of that gain before any other allocation is made under section 704 (b) with respect to partnership items for the partnership's third taxable year.

(ii) *Nonrecourse deductions and restatement of capital accounts.* (a) *Additional facts.* C is admitted to the partnership at the beginning

of the partnership's third taxable year. At the time of C's admission, the fair market value of the machinery is \$900,000. C contributes \$100,000 to the partnership (the partnership invests \$95,000 of this in undeveloped land and holds the other \$5,000 in cash) in exchange for an interest in the partnership. In connection with C's admission to the partnership, the partnership's machinery is revalued on the partnership's books to reflect its fair market value of \$900,000. Pursuant to § 1.704-1(b)(2)(iv)(f), the capital accounts of A and B are adjusted upwards to \$100,000 each to reflect the revaluation of the partnership's machinery. This adjustment reflects the manner in which the partnership gain of \$270,000 (\$900,000 fair market value minus \$630,000 adjusted tax basis) would be shared if the machinery were sold for its fair market value immediately prior to C's admission to the partnership.

	A	B
Capital account before C's admission .....		
Deemed sale adjustment .....	(\$35,000) 135,000	(\$35,000) 135,000
Capital account adjusted for C's admission .....	\$100,000	\$100,000

The partnership agreement is modified to provide that, except as otherwise required by its qualified income offset and minimum gain chargeback provisions, partnership income, gain, loss, and deduction, as computed for book purposes, are allocated equally among the partners, and those allocations are reflected in the partners' capital accounts. The partnership agreement also is modified to provide that depreciation and gain or loss, as computed for tax purposes, with respect to the machinery will be shared among the partners in a manner that takes account of the variation between the property's \$630,000 adjusted tax basis and its \$900,000 book value, in accordance with § 1.704-1(b)(2)(iv)(f) and the special rule contained in § 1.704-1(b)(4)(i).

(b) *Effect of revaluation.* Because the requirements of § 1.704-1(b)(2)(iv)(g) are satisfied, the capital accounts of the partners (as adjusted) continue to be maintained in accordance with § 1.704-1(b)(2)(iv). If the partnership were to dispose of the machinery in full satisfaction of the nonrecourse liability immediately following the revaluation of the machinery, it would realize no book gain (\$700,000 amount realized less \$900,000 book value). As a result of the revaluation of the machinery upward by \$270,000, under part (i) of paragraph (d)(4) of this section, the partnership minimum gain is reduced from \$70,000 immediately prior to the revaluation to zero; but under part (ii) of paragraph (d)(4) of this section, the partnership minimum gain is increased by the \$70,000 decrease arising solely from the revaluation. Accordingly,

there is no net increase or decrease solely on account of the revaluation, and so no minimum gain chargeback is triggered. All future nonrecourse deductions that occur will be the nonrecourse deductions as calculated for book purposes, and will be charged to all 3 partners in accordance with the partnership agreement. For purposes of determining the partners' shares of minimum gain under paragraph (g) of this section, A's and B's shares of the decrease resulting from the revaluation are \$35,000 each. However, as illustrated below, under section 704(c) principles, the tax capital accounts of A and B will eventually be charged \$35,000 each, reflecting their 50 percent shares of the decrease in partnership minimum gain that resulted from the revaluation.

(iii) *Allocation of nonrecourse deductions following restatement of capital accounts.* (a) *Additional facts.* During the partnership's third taxable year, the partnership generates rental income of \$130,000, interest expense of \$70,000 a tax depreciation deduction of \$210,000, and a book depreciation deduction (attributable to the machinery) of \$300,000. As a result, the partnership has a net taxable loss of \$150,000 and a net book loss of \$240,000. In addition, the partnership repays \$50,000 of the nonrecourse liability (after the data of C's admission), reducing the liability to \$650,000 and distributes \$5,000 of cash to each partner.

(b) *Allocations.* If the partnership were to dispose of the machinery in full satisfaction of the nonrecourse liability at the end of the year, \$50,000 of book gain would result (\$650,000 amount realized less \$600,000 book basis). Therefore, the amount of partnership minimum gain at the end of the year is \$50,000, which represents a net decrease in partnership minimum gain of \$20,000 during the year. (This is so even though there would be an increase in partnership minimum gain in the partnership's third taxable year if minimum gain were computed with reference to the adjusted tax basis of the machinery.) Nevertheless, pursuant to paragraph (d)(4) of this section, the amount of nonrecourse deductions of the partnership for its third taxable year is \$50,000 (the net increase in partnership minimum gain during the year determined by adding back the \$70,000 decrease in partnership minimum gain attributable to the revaluation of the machinery to the \$20,000 net decrease in partnership minimum gain during the year). The \$50,000 of partnership nonrecourse deductions for the year consist of book depreciation deductions allowable with respect to the machinery of \$50,000. Pursuant to the partnership agreement, all partnership items comprising the net book loss of \$240,000, including the \$50,000 nonrecourse deduction, are allocated equally among the partners. The allocation of these

§ 1.704-2

26 CFR Ch. I (4-1-14 Edition)

items, other than the nonrecourse deductions, has substantial economic effect. Consistent with the special partners' interests in the partnership rule contained in § 1.704-1(b)(4)(i), the partnership agreement provides

that the depreciation deduction for tax purposes of \$210,000 for the partnership's third taxable year is, in accordance with section 704(c) principles, shared \$55,000 to A, \$55,000 to B, and \$100,000 to C.

	A		B		C	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 3	(\$35,000)	\$100,000	(\$35,000)	\$100,000	\$100,000	\$100,000
Less: nonrecourse deductions	(9,166)	(16,666)	(9,166)	(16,666)	(16,666)	(16,666)
Less: items other than nonrecourse deductions in year 3	(25,834)	(63,334)	(25,834)	(63,334)	(63,334)	(63,334)
Less: distribution	(5,000)	(5,000)	(5,000)	(5,000)	(5,000)	(5,000)
Capital account at end of year 3	(\$75,000)	\$15,000	(\$75,000)	\$15,000	\$15,000	\$15,000

Because the requirements of paragraph (e) of this section are satisfied, the allocation of the nonrecourse deduction is deemed to be made in accordance with the partners' interests in the partnership. At the end of the partnership's third taxable year, A's, B's, and C's shares of partnership minimum gain are \$16,666 each.

(iv) *Subsequent allocation of nonrecourse deductions following restatement of capital accounts.* (a) *Additional facts.* The partners' capital accounts at the end of the second and third taxable years of the partnership are as stated in *Example 3*(iii) of this paragraph (m). In addition, during the partnership's fourth taxable year the partnership generates rental income of \$130,000, interest expense of \$65,000, a tax depreciation deduction of \$210,000, and a book depreciation deduction (attributable to the machinery) of \$300,000. As a result, the partnership has a net taxable loss of \$145,000 and a net book loss of \$235,000. In addition, the partnership repays \$50,000 of the nonrecourse liability, reducing that liability to \$600,000, and distributes \$5,000 of cash to each partner.

(b) *Allocations.* If the partnership were to dispose of the machinery in full satisfaction

of the nonrecourse liability at the end of the fourth year, \$300,000 of book gain would result (\$600,000 amount realized less \$300,000 book value). Therefore, the amount of partnership minimum gain as of the end of the year is \$300,000, which represents a net increase in partnership minimum gain during the year of \$250,000. Thus, the amount of partnership nonrecourse deductions for that year equals \$250,000, consisting of book depreciation deductions of \$250,000. Pursuant to the partnership agreement, all partnership items comprising the net book loss of \$235,000, including the \$250,000 nonrecourse deduction, are allocated equally among the partners. That allocation of all items, other than the nonrecourse deductions, has substantial economic effect. Consistent with the special partners' interests in the partnership rule contained in § 1.704-1(b)(4)(i), the partnership agreement provides that the depreciation deduction for tax purposes of \$210,000 in the partnership's fourth taxable year is, in accordance with section 704(c) principles, allocated \$55,000 to A, \$55,000 to B, and \$100,000 to C.

	A		B		C	
	Tax	Book	Tax	Book	Tax	Book
Capital account at end year 3	(\$75,000)	\$15,000	(\$75,000)	\$15,000	\$15,000	\$15,000
Less: nonrecourse deductions	(45,833)	(83,333)	(45,833)	(83,333)	(83,333)	(83,333)
Plus: items other than nonrecourse deduction in year 4	12,499	5,000	12,499	5,000	5,000	5,000
Less: distribution	(5,000)	(5,000)	(5,000)	(5,000)	(5,000)	(5,000)
Capital account at end of year 4	(\$113,334)	(\$68,333)	(\$113,333)	(\$68,333)	(\$68,333)	(\$68,333)

The allocation of the \$250,000 nonrecourse deduction equally among A, B, and C satisfies requirement (2) of paragraph (e) of this section. Because all of the requirements of paragraph (e) of this section are satisfied, the allocation is deemed to be in accordance with the partners' interests in the partnership. At the end of the partnership's fourth taxable

year, A's, B's, and C's shares of partnership minimum gain are \$100,000 each.

(v) *Disposition of partnership property following restatement of capital accounts.* (a) *Additional facts.* The partners' capital accounts at the end of the fourth taxable year of the partnership are as stated above in (iv). In addition, at the beginning of the partnership's

fifth taxable year it sells the machinery for \$650,000 (using \$600,000 of the proceeds to repay the nonrecourse liability), resulting in a taxable gain of \$440,000 (\$650,000 amount realized less \$210,000 adjusted tax basis) and a book gain of \$350,000 (\$650,000 amount realized less \$300,000 book basis). The partnership has no other items of income, gain, loss, or deduction for the year.

(b) *Effect of disposition.* As a result of the sale, partnership minimum gain is reduced from \$300,000 to zero, reducing A's, B's, and C's shares of partnership minimum gain to zero from \$100,000 each. The minimum gain chargeback requires that A, B, and C each be allocated \$100,000 of that gain (an amount equal to each partner's share of the net decrease in partnership minimum gain result-

ing from the sale) before any allocation is made to them under section 704(b) with respect to partnership items for the partnership's fifth taxable year. Thus, the allocation of the first \$300,000 of book gain \$100,000 to each of the partners is deemed to be in accordance with the partners' interests in the partnership under paragraph (e) of this section. The allocation of the remaining \$50,000 of book gain equally among the partners has substantial economic effect. Consistent with the special partners' interests in the partnership rule contained in § 1.704-1(b)(4)(i), the partnership agreement provides that the \$440,000 taxable gain is, in accordance with section 704(c) principles, allocated \$161,667 to A, \$161,667 to B, and \$116,666 to C.

	A		B		C	
	Tax	Book	Tax	Book	Tax	Book
Capital account at end of year 4 .....	(\$113,334)	(\$68,333)	(\$113,334)	(\$68,333)	(\$68,333)	(\$68,333)
Plus: minimum gain chargeback .....	138,573	100,000	138,573	100,000	100,000	100,000
Plus: additional gain .....	23,094	16,666	23,094	16,666	16,666	16,666
Capital account before liquidation .....	\$48,333	\$48,333	\$48,333	\$48,333	\$48,333	\$48,333

*Example 4. Allocations of increase in partnership minimum gain among partnership properties.* For Example 4, unless otherwise provided, the following facts are assumed. A partnership owns 4 properties, each of which is subject to a nonrecourse liability of the partnership. During a taxable year of the partnership, the following events take place. First, the partnership generates a depreciation deduction (for both book and tax purposes) with respect to Property W of \$10,000 and repays \$5,000 of the nonrecourse liability secured only by that property, resulting in an increase in minimum gain with respect to that liability of \$5,000. Second, the partnership generates a depreciation deduction (for both book and tax purposes) with respect to Property X of \$10,000 and repays none of the nonrecourse liability secured by that property, resulting in an increase in minimum gain with respect to that liability of \$10,000. Third, the partnership generates a depreciation deduction (for both book and tax purposes) of \$2,000 with respect to Property Y and repays \$11,000 of the nonrecourse liability secured only by that property, resulting in a decrease in minimum gain with respect to that liability of \$9,000 (although at the end of that year, there remains minimum gain with respect to that liability). Finally, the partnership borrows \$5,000 on a nonrecourse basis, giving as the only security for that liability Property Z, a parcel of undeveloped land with an adjusted tax basis (and book value) of \$2,000, resulting in a net increase in minimum gain with respect to that liability of \$3,000.

(i) *Allocation of increase in partnership minimum gain.* The net increase in partnership minimum gain during that partnership taxable year is \$9,000, so that the amount of nonrecourse deductions of the partnership for that taxable year is \$9,000. Those nonrecourse deductions consist of \$3,000 of depreciation deductions with respect to Property W and \$6,000 of depreciation deductions with respect to Property X. See paragraph (c) of this section. The amount of nonrecourse deductions consisting of depreciation deductions is determined as follows. With respect to the nonrecourse liability secured by Property Z, for which there is no depreciation deduction, the amount of depreciation deductions that constitutes nonrecourse deductions is zero. Similarly, with respect to the nonrecourse liability secured by Property Y, for which there is no increase in minimum gain, the amount of depreciation deductions that constitutes nonrecourse deductions is zero. With respect to each of the nonrecourse liabilities secured by Properties W and X, which are secured by property for which there are depreciation deductions and for which there is an increase in minimum gain, the amount of depreciation deductions that constitutes nonrecourse deductions is determined by the following formula:

net increase in the partnership minimum gain for that taxable year X total depreciation deductions for that taxable year on the specific property securing the nonrecourse liability to the extent minimum gain increased on that liability (divided by) total depreciation deductions for that taxable year

on all properties securing nonrecourse liabilities to the extent of the aggregate increase in minimum gain on all those liabilities.

Thus, for the liability secured by Property W, the amount is \$9,000 times \$5,000/\$15,000, or \$3,000. For the liability secured by Property X, the amount is \$9,000 times \$10,000/\$15,000, or \$6,000. (If one depreciable property secured two partnership nonrecourse liabilities, the amount of depreciation or book depreciation with respect to that property would be allocated among those liabilities in accordance with the method by which adjusted basis is allocated under paragraph (d)(2) of this section).

(ii) *Alternative allocation of increase in partnership minimum gain among partnership properties.* Assume instead that the loan secured by Property Z is \$15,000 (rather than \$5,000), resulting in a net increase in minimum gain with respect to that liability of \$13,000. Thus, the net increase in partnership minimum gain is \$19,000, and the amount of nonrecourse deductions of the partnership for that taxable year is \$19,000. Those nonrecourse deductions consist of \$5,000 of depreciation deductions with respect to Property W, \$10,000 of depreciation deductions with respect to Property X, and a pro rata portion of the partnership's other items of deduction, loss, and section 705(a)(2)(B) expenditure for that year. The method for computing the amounts of depreciation deductions that constitute nonrecourse deductions is the same as in (i) of this *Example* 4 for the liabilities secured by Properties Y and Z. With respect to each of the nonrecourse liabilities secured by Properties W and X, the amount of depreciation deductions that constitutes nonrecourse deductions equals the total depreciation deductions with respect to the partnership property securing that particular liability to the extent of the increase in minimum gain with respect to that liability.

**§ 1.704-3 Contributed property.**

(a) *In general*—(1) *General principles.* The purpose of section 704(c) is to prevent the shifting of tax consequences among partners with respect to precontribution gain or loss. Under section 704(c), a partnership must allocate income, gain, loss, and deduction with respect to property contributed by a partner to the partnership so as to take into account any variation be-

tween the adjusted tax basis of the property and its fair market value at the time of contribution. Notwithstanding any other provision of this section, the allocations must be made using a reasonable method that is consistent with the purpose of section 704(c). For this purpose, an allocation method includes the application of all of the rules of this section (e.g., aggregation rules). An allocation method is not necessarily unreasonable merely because another allocation method would result in a higher aggregate tax liability. Paragraphs (b), (c), and (d) of this section describe allocation methods that are generally reasonable. Other methods may be reasonable in appropriate circumstances. Nevertheless, in the absence of specific published guidance, it is not reasonable to use an allocation method in which the basis of property contributed to the partnership is increased (or decreased) to reflect built-in gain (or loss), or a method under which the partnership creates tax allocations of income, gain, loss, or deduction independent of allocations affecting book capital accounts. See § 1.704-3(d). Paragraph (e) of this section contains special rules and exceptions. The principles of this paragraph (a)(1), together with the methods described in paragraphs (b), (c) and (d) of this section, apply only to contributions of property that are otherwise respected. See for example § 1.701-2. Accordingly, even though a partnership's allocation method may be described in the literal language of paragraphs (b), (c) or (d) of this section, based on the particular facts and circumstances, the Commissioner can recast the contribution as appropriate to avoid tax results inconsistent with the intent of subchapter K. One factor that may be considered by the Commissioner is the use of the remedial allocation method by related partners in which allocations of remedial items of income, gain, loss or deduction are made to one partner and the allocations of offsetting remedial items are made to a related partner.

(2) *Operating rules.* Except as provided in paragraphs (e)(2) and (e)(3) of this section, section 704(c) and this section apply on a property-by-property basis. Therefore, in determining whether there is a disparity between adjusted

tax basis and fair market value, the built-in gains and built-in losses on items of contributed property cannot be aggregated. A partnership may use different methods with respect to different items of contributed property, provided that the partnership and the partners consistently apply a single reasonable method for each item of contributed property and that the overall method or combination of methods are reasonable based on the facts and circumstances and consistent with the purpose of section 704(c). It may be unreasonable to use one method for appreciated property and another method for depreciated property. Similarly, it may be unreasonable to use the traditional method for built-in gain property contributed by a partner with a high marginal tax rate while using curative allocations for built-in gain property contributed by a partner with a low marginal tax rate. A new partnership formed as the result of the termination of a partnership under section 708(b)(1)(B) is not required to use the same method as the terminated partnership with respect to section 704(c) property deemed contributed to the new partnership by the terminated partnership under § 1.708-1(b)(1)(iv). The previous sentence applies to terminations of partnerships under section 708(b)(1)(B) occurring on or after May 9, 1997; however, the sentence may be applied to terminations occurring on or after May 9, 1996, provided that the partnership and its partners apply the sentence to the termination in a consistent manner.

(3) *Definitions*—(i) *Section 704(c) property*. Property contributed to a partnership is section 704(c) property if at the time of contribution its book value differs from the contributing partner's adjusted tax basis. For purposes of this section, book value is determined as contemplated by § 1.704-1(b). Therefore, book value is equal to fair market value at the time of contribution and is subsequently adjusted for cost recovery and other events that affect the basis of the property. For a partnership that maintains capital accounts in accordance with § 1.704-1(b)(2)(iv), the book value of property is initially the value used in determining the contributing partner's capital account under § 1.704-

1(b)(2)(iv)(d), and is appropriately adjusted thereafter (e.g., for book cost recovery under §§ 1.704-1(b)(2)(iv)(g)(3) and 1.704-3(d)(2) and other events that affect the basis of the property). A partnership that does not maintain capital accounts under § 1.704-1(b)(2)(iv) must comply with this section using a book capital account based on the same principles (i.e., a book capital account that reflects the fair market value of property at the time of contribution and that is subsequently adjusted for cost recovery and other events that affect the basis of the property). Property deemed contributed to a new partnership as the result of the termination of a partnership under section 708(b)(1)(B) is treated as section 704(c) property in the hands of the new partnership only to the extent that the property was section 704(c) property in the hands of the terminated partnership immediately prior to the termination. See § 1.708-1(b)(1)(iv) for an example of the application of this rule. The previous two sentences apply to terminations of partnerships under section 708(b)(1)(B) occurring on or after May 9, 1997; however, the sentences may be applied to terminations occurring on or after May 9, 1996, provided that the partnership and its partners apply the sentences to the termination in a consistent manner.

(ii) *Built-in gain and built-in loss*. The built-in gain on section 704(c) property is the excess of the property's book value over the contributing partner's adjusted tax basis upon contribution. The built-in gain is thereafter reduced by decreases in the difference between the property's book value and adjusted tax basis. The built-in loss on section 704(c) property is the excess of the contributing partner's adjusted tax basis over the property's book value upon contribution. The built-in loss is thereafter reduced by decreases in the difference between the property's adjusted tax basis and book value. See § 1.460-4(k)(3)(v)(A) for a rule relating to the amount of built-in income or built-in loss attributable to a contract accounted for under a long-term contract method of accounting.

(4) *Accounts payable and other accrued but unpaid items*. Accounts payable and

other accrued but unpaid items contributed by a partner using the cash receipts and disbursements method of accounting are treated as section 704(c) property for purposes of applying the rules of this section.

(5) *Other provisions of the Internal Revenue Code.* Section 704(c) and this section apply to a contribution of property to the partnership only if the contribution is governed by section 721, taking into account other provisions of the Internal Revenue Code. For example, to the extent that a transfer of property to a partnership is a sale under section 707, the transfer is not a contribution of property to which section 704(c) applies.

(6) *Other applications of section 704(c) principles—(i) Revaluations under section 704(b).* The principles of this section apply to allocations with respect to property for which differences between book value and adjusted tax basis are created when a partnership revalues partnership property pursuant to § 1.704-1(b)(2)(iv)(f) or 1.704-1(b)(2)(iv)(s) (reverse section 704(c) allocations). Partnerships are not required to use the same allocation method for reverse section 704(c) allocations as for contributed property, even if at the time of revaluation the property is already subject to section 704(c) and paragraph (a) of this section. In addition, partnerships are not required to use the same allocation method for reverse section 704(c) allocations each time the partnership revalues its property. A partnership that makes allocations with respect to revalued property must use a reasonable method that is consistent with the purposes of section 704(b) and (c).

(ii) *Basis adjustments.* A partnership making adjustments under § 1.743-1(b) or 1.751-1(a)(2) must account for built-in gain or loss under section 704(c) in accordance with the principles of this section.

(7) *Transfer of a partnership interest.* If a contributing partner transfers a partnership interest, built-in gain or loss must be allocated to the transferee partner as it would have been allocated to the transferor partner. If the contributing partner transfers a portion of the partnership interest, the share of built-in gain or loss proportionate to

the interest transferred must be allocated to the transferee partner. This rule does not apply to any person who acquired a partnership interest from a § 1.752-7 liability partner in a transaction to which paragraph (e)(1) of § 1.752-7 applies. See § 1.752-7(c)(1).

(8) *Special rules—(i) Disposition in a nonrecognition transaction.* If a partnership disposes of section 704(c) property in a nonrecognition transaction, the substituted basis property (within the meaning of section 7701(a)(42)) is treated as section 704(c) property with the same amount of built-in gain or loss as the section 704(c) property disposed of by the partnership. If gain or loss is recognized in such a transaction, appropriate adjustments must be made. The allocation method for the substituted basis property must be consistent with the allocation method chosen for the original property. If a partnership transfers an item of section 704(c) property together with other property to a corporation under section 351, in order to preserve that item's built-in gain or loss, the basis in the stock received in exchange for the section 704(c) property is determined as if each item of section 704(c) property had been the only property transferred to the corporation by the partnership.

(ii) *Disposition in an installment sale.* If a partnership disposes of section 704(c) property in an installment sale as defined in section 453(b), the installment obligation received by the partnership is treated as the section 704(c) property with the same amount of built-in gain as the section 704(c) property disposed of by the partnership (with appropriate adjustments for any gain recognized on the installment sale). The allocation method for the installment obligation must be consistent with the allocation method chosen for the original property.

(iii) *Contributed contracts.* If a partner contributes to a partnership a contract that is section 704(c) property, and the partnership subsequently acquires property pursuant to the contract in a transaction in which less than all of the gain or loss is recognized, then the acquired property is treated as the section 704(c) property with the same amount of built-in gain or loss as the contract (with appropriate adjustments

for any gain or loss recognized on the acquisition). For this purpose, the term contract includes, but is not limited to, options, forward contracts, and futures contracts. The allocation method for the acquired property must be consistent with the allocation method chosen for the contributed contract.

(iv) *Capitalized amounts.* To the extent that a partnership properly capitalizes all or a portion of an item as described in paragraph (a)(12) of this section, then the item or items to which such cost is properly capitalized is treated as section 704(c) property with the same amount of built-in loss as corresponds to the amount capitalized.

(9) *Tiered partnerships.* If a partnership contributes section 704(c) property to a second partnership (the lower-tier partnership), or if a partner that has contributed section 704(c) property to a partnership contributes that partnership interest to a second partnership (the upper-tier partnership), the upper-tier partnership must allocate its distributive share of lower-tier partnership items with respect to that section 704(c) property in a manner that takes into account the contributing partner's remaining built-in gain or loss. Allocations made under this paragraph will be considered to be made in a manner that meets the requirements of § 1.704-1(b)(2)(iv)(q) (relating to capital account adjustments where guidance is lacking).

(10) *Anti-abuse rule*—(i) *In general.* An allocation method (or combination of methods) is not reasonable if the contribution of property (or event that results in reverse section 704(c) allocations) and the corresponding allocation of tax items with respect to the property are made with a view to shifting the tax consequences of built-in gain or loss among the partners in a manner that substantially reduces the present value of the partners' aggregate tax liability. For purposes of this paragraph (a)(10), all references to the partners shall include both direct and indirect partners.

(ii) *Definition of indirect partner.* An *indirect partner* is any direct or indirect owner of a partnership, S corporation, or controlled foreign corporation (as defined in section 957(a) or 953(c)), or

direct or indirect beneficiary of a trust or estate, that is a partner in the partnership, and any consolidated group of which the partner in the partnership is a member (within the meaning of § 1.1502-1(h)). An owner (whether directly or through tiers of entities) of a controlled foreign corporation is treated as an indirect partner only with respect to allocations of items of income, gain, loss, or deduction that enter into the computation of a United States shareholder's inclusion under section 951(a) with respect to the controlled foreign corporation, enter into any person's income attributable to a United States shareholder's inclusion under section 951(a) with respect to the controlled foreign corporation, or would enter into the computations described in this sentence if such items were allocated to the controlled foreign corporation.

(11) *Contributing and noncontributing partners' recapture shares.* For special rules applicable to the allocation of depreciation recapture with respect to property contributed by a partner to a partnership, see §§ 1.1245-1(e)(2) and 1.1250-1(f).

(12) *§ 1.752-7 liabilities.* Except as otherwise provided in § 1.752-7, § 1.752-7 liabilities (within the meaning of § 1.752-7(b)(2)) are section 704(c) property (built-in loss property that at the time of contribution has a book value that differs from the contributing partner's adjusted tax basis) for purposes of applying the rules of this section. See § 1.752-7(c). To the extent that the built-in loss associated with the § 1.752-7 liability exceeds the cost of satisfying the § 1.752-7 liability (as defined in § 1.752-7(b)(3)), the excess creates a "ceiling rule" limitation, within the meaning of § 1.704-3(b)(1), subject to the methods of allocation set forth in § 1.704-3(b), (c) and (d).

(b) *Traditional method*—(1) *In general.* This paragraph (b) describes the traditional method of making section 704(c) allocations. In general, the traditional method requires that when the partnership has income, gain, loss, or deduction attributable to section 704(c) property, it must make appropriate allocations to the partners to avoid shifting the tax consequences of the built-in gain or loss. Under this rule, if the

partnership sells section 704(c) property and recognizes gain or loss, built-in gain or loss on the property is allocated to the contributing partner. If the partnership sells a portion of, or an interest in, section 704(c) property, a proportionate part of the built-in gain or loss is allocated to the contributing partner. For section 704(c) property subject to amortization, depletion, depreciation, or other cost recovery, the allocation of deductions attributable to these items takes into account built-in gain or loss on the property. For example, tax allocations to the noncontributing partners of cost recovery deductions with respect to section 704(c) property generally must, to the extent possible, equal book allocations to those partners. However, the total income, gain, loss, or deduction allocated to the partners for a taxable year with respect to a property cannot exceed the total partnership income, gain, loss, or deduction with respect to that property for the taxable year (the ceiling rule). If a partnership has no property the allocations from which are limited by the ceiling rule, the traditional method is reasonable when used for all contributed property.

(2) *Examples.* The following examples illustrate the principles of the traditional method.

*Example 1. Operation of the traditional method.* (i) *Calculation of built-in gain on contribution.* A and B form partnership AB and agree that each will be allocated a 50 percent share of all partnership items and that AB will make allocations under section 704(c) using the traditional method under paragraph (b) of this section. A contributes depreciable property with an adjusted tax basis of \$4,000 and a book value of \$10,000, and B contributes \$10,000 cash. Under paragraph (a)(3) of this section, A has built-in gain of \$6,000, the excess of the partnership's book value for the property (\$10,000) over A's adjusted tax basis in the property at the time of contribution (\$4,000).

(ii) *Allocation of tax depreciation.* The property is depreciated using the straight-line method over a 10-year recovery period. Because the property depreciates at an annual rate of 10 percent, B would have been entitled to a depreciation deduction of \$500 per year for both book and tax purposes if the adjusted tax basis of the property equalled its fair market value at the time of contribution. Although each partner is allocated \$500 of book depreciation per year, the partnership is allowed a tax depreciation deduction

of only \$400 per year (10 percent of \$4,000). The partnership can allocate only \$400 of tax depreciation under the ceiling rule of paragraph (b)(1) of this section, and it must be allocated entirely to B. In AB's first year, the proceeds generated by the equipment exactly equal AB's operating expenses. At the end of that year, the book value of the property is \$9,000 (\$10,000 less the \$1,000 book depreciation deduction), and the adjusted tax basis is \$3,600 (\$4,000 less the \$400 tax depreciation deduction). A's built-in gain with respect to the property decreases to \$5,400 (\$9,000 book value less \$3,600 adjusted tax basis). Also, at the end of AB's first year, A has a \$9,500 book capital account and a \$4,000 tax basis in A's partnership interest. B has a \$9,500 book capital account and a \$9,600 adjusted tax basis in B's partnership interest.

(iii) *Sale of the property.* If AB sells the property at the beginning of AB's second year for \$9,000, AB realizes tax gain of \$5,400 (\$9,000, the amount realized, less the adjusted tax basis of \$3,600). Under paragraph (b)(1) of this section, the entire \$5,400 gain must be allocated to A because the property A contributed has that much built-in gain remaining. If AB sells the property at the beginning of AB's second year for \$10,000, AB realizes tax gain of \$6,400 (\$10,000, the amount realized, less the adjusted tax basis of \$3,600). Under paragraph (b)(1) of this section, only \$5,400 of gain must be allocated to A to account for A's built-in gain. The remaining \$1,000 of gain is allocated equally between A and B in accordance with the partnership agreement. If AB sells the property for less than the \$9,000 book value, AB realizes tax gain of less than \$5,400, and the entire gain must be allocated to A.

(iv) *Termination and liquidation of partnership.* If AB sells the property at the beginning of AB's second year for \$9,000, and AB engages in no other transactions that year, A will recognize a gain of \$5,400, and B will recognize no income or loss. A's adjusted tax basis for A's interest in AB will then be \$9,400 (\$4,000, A's original tax basis, increased by the gain of \$5,400). B's adjusted tax basis for B's interest in AB will be \$9,600 (\$10,000, B's original tax basis, less the \$400 depreciation deduction in the first partnership year). If the partnership then terminates and distributes its assets (\$19,000 in cash) to A and B in proportion to their capital account balances, A will recognize a capital gain of \$100 (\$9,500, the amount distributed to A, less \$9,400, the adjusted tax basis of A's interest). B will recognize a capital loss of \$100 (the excess of B's adjusted tax basis, \$9,600, over the amount received, \$9,500).

*Example 2. Unreasonable use of the traditional method.* (i) *Facts.* C and D form partnership CD and agree that each will be allocated a 50 percent share of all partnership items and that CD will make allocations under section 704(c) using the traditional method

under paragraph (b) of this section. C contributes equipment with an adjusted tax basis of \$1,000 and a book value of \$10,000, with a view to taking advantage of the fact that the equipment has only one year remaining on its cost recovery schedule although its remaining economic life is significantly longer. At the time of contribution, C has a built-in gain of \$9,000 and the equipment is section 704(c) property. D contributes \$10,000 of cash, which CD uses to buy securities. D has substantial net operating loss carryforwards that D anticipates will otherwise expire unused. Under § 1.704-1(b)(2)(iv)(g)(3), the partnership must allocate the \$10,000 of book depreciation to the partners in the first year of the partnership. Thus, there is \$10,000 of book depreciation and \$1,000 of tax depreciation in the partnership's first year. CD sells the equipment during the second year for \$10,000 and recognizes a \$10,000 gain (\$10,000, the amount realized, less the adjusted tax basis of \$0).

(ii) *Unreasonable use of method*—(A) At the beginning of the second year, both the book value and adjusted tax basis of the equipment are \$0. Therefore, there is no remaining built-in gain. The \$10,000 gain on the sale of the equipment in the second year is allocated \$5,000 each to C and D. The interaction of the partnership's one-year write-off of the entire book value of the equipment and the use of the traditional method results in a shift of \$4,000 of the precontribution gain in the equipment from C to D (D's \$5,000 share of CD's \$10,000 gain, less the \$1,000 tax depreciation deduction previously allocated to D).

(B) The traditional method is not reasonable under paragraph (a)(10) of this section because the contribution of property is made, and the traditional method is used, with a view to shifting a significant amount of taxable income to a partner with a low marginal tax rate and away from a partner with a high marginal tax rate.

(C) Under these facts, if the partnership agreement in effect for the year of contribution had provided that tax gain from the sale of the property (if any) would always be allocated first to C to offset the effect of the ceiling rule limitation, the allocation method would not violate the anti-abuse rule of paragraph (a)(10) of this section. See paragraph (c)(3) of this section. Under other facts, (for example, if the partnership holds multiple section 704(c) properties and either uses multiple allocation methods or uses a single allocation method where one or more of the properties are subject to the ceiling rule) the allocation to C may not be reasonable.

(c) *Traditional method with curative allocations*—(1) *In general*. To correct distortions created by the ceiling rule, a partnership using the traditional method under paragraph (b) of this section

may make reasonable curative allocations to reduce or eliminate disparities between book and tax items of noncontributing partners. A curative allocation is an allocation of income, gain, loss, or deduction for tax purposes that differs from the partnership's allocation of the corresponding book item. For example, if a noncontributing partner is allocated less tax depreciation than book depreciation with respect to an item of section 704(c) property, the partnership may make a curative allocation to that partner of tax depreciation from another item of partnership property to make up the difference, notwithstanding that the corresponding book depreciation is allocated to the contributing partner. A partnership may limit its curative allocations to allocations of one or more particular tax items (e.g., only depreciation from a specific property or properties) even if the allocation of those available items does not offset fully the effect of the ceiling rule.

(2) *Consistency*. A partnership must be consistent in its application of curative allocations with respect to each item of section 704(c) property from year to year.

(3) *Reasonable curative allocations*—(i) *Amount*. A curative allocation is not reasonable to the extent it exceeds the amount necessary to offset the effect of the ceiling rule for the current taxable year or, in the case of a curative allocation upon disposition of the property, for prior taxable years.

(ii) *Timing*. The period of time over which the curative allocations are made is a factor in determining whether the allocations are reasonable. Notwithstanding paragraph (c)(3)(i) of this section, a partnership may make curative allocations in a taxable year to offset the effect of the ceiling rule for a prior taxable year if those allocations are made over a reasonable period of time, such as over the property's economic life, and are provided for under the partnership agreement in effect for the year of contribution. See paragraph (c)(4) *Example 3* (ii)(C) of this section.

(iii) *Type*—(A) *In general*. To be reasonable, a curative allocation of income, gain, loss, or deduction must be expected to have substantially the

same effect on each partner's tax liability as the tax item limited by the ceiling rule. The expectation must exist at the time the section 704(c) property is obligated to be (or is) contributed to the partnership and the allocation with respect to that property becomes part of the partnership agreement. However, the expectation is tested at the time the allocation with respect to that property is actually made if the partnership agreement is not sufficiently specific as to the precise manner in which allocations are to be made with respect to that property. Under this paragraph (c), if the item limited by the ceiling rule is loss from the sale of property, a curative allocation of gain must be expected to have substantially the same effect as would an allocation to that partner of gain with respect to the sale of the property. If the item limited by the ceiling rule is depreciation or other cost recovery, a curative allocation of income to the contributing partner must be expected to have substantially the same effect as would an allocation to that partner of partnership income with respect to the contributed property. For example, if depreciation deductions with respect to leased equipment contributed by a tax-exempt partner are limited by the ceiling rule, a curative allocation of dividend or interest income to that partner generally is not reasonable, although a curative allocation of depreciation deductions from other leased equipment to the noncontributing partner is reasonable. Similarly, under this rule, if depreciation deductions apportioned to foreign source income in a particular statutory grouping under section 904(d) are limited by the ceiling rule, a curative allocation of income from another statutory grouping to the contributing partner generally is not reasonable, although a curative allocation of income from the same statutory grouping and of the same character is reasonable.

(B) *Exception for allocation from disposition of contributed property.* If cost recovery has been limited by the ceiling

rule, the general limitation on character does not apply to income from the disposition of contributed property subject to the ceiling rule, but only if properly provided for in the partnership agreement in effect for the year of contribution or revaluation. For example, if allocations of depreciation deductions to a noncontributing partner have been limited by the ceiling rule, a curative allocation to the contributing partner of gain from the sale of that property, if properly provided for in the partnership agreement, is reasonable for purposes of paragraph (c)(3)(iii)(A) of this section even if not of the same character.

(4) *Examples.* The following examples illustrate the principles of this paragraph (c).

*Example 1. Reasonable and unreasonable curative allocations.* (i) *Facts.* E and F form partnership EF and agree that each will be allocated a 50 percent share of all partnership items and that EF will make allocations under section 704(c) using the traditional method with curative allocations under paragraph (c) of this section. E contributes equipment with an adjusted tax basis of \$4,000 and a book value of \$10,000. The equipment has 10 years remaining on its cost recovery schedule and is depreciable using the straight-line method. At the time of contribution, E has a built-in gain of \$6,000, and therefore, the equipment is section 704(c) property. F contributes \$10,000 of cash, which EF uses to buy inventory for resale. In EF's first year, the revenue generated by the equipment equals EF's operating expenses. The equipment generates \$1,000 of book depreciation and \$400 of tax depreciation for each of 10 years. At the end of the first year EF sells all the inventory for \$10,700, recognizing \$700 of income. The partners anticipate that the inventory income will have substantially the same effect on their tax liabilities as income from E's contributed equipment. Under the traditional method of paragraph (b) of this section, E and F would each be allocated \$350 of income from the sale of inventory for book and tax purposes and \$500 of depreciation for book purposes. The \$400 of tax depreciation would all be allocated to F. Thus, at the end of the first year, E and F's book and tax capital accounts would be as follows:

E		F		
Book	Tax	Book	Tax	
\$10,000 <500>	\$4,000 <0>	\$10,000 <500>	\$10,000 <400>	Initial contribution. Depreciation.

## Internal Revenue Service, Treasury

## § 1.704-3

E		F		
Book	Tax	Book	Tax	
350	350	350	350	Sales income.
9,850	4,350	9,850	9,950	

(ii) *Reasonable curative allocation.* Because the ceiling rule would cause a disparity of \$100 between F's book and tax capital accounts, EF may properly allocate to E under paragraph (c) of this section an additional

\$100 of income from the sale of inventory for tax purposes. This allocation results in capital accounts at the end of EF's first year as follows:

E		F		
Book	Tax	Book	Tax	
\$10,000	\$4,000	\$10,000	\$10,000	Initial contribution. Depreciation. Sales income.
<500>	<0>	<500>	<400>	
350	450	350	250	
9,850	4,450	9,850	9,850	

(iii) *Unreasonable curative allocation.* (A) The facts are the same as in paragraphs (i) and (ii) of this *Example 1*, except that E and F choose to allocate all the income from the sale of the inventory to E for tax purposes,

although they share it equally for book purposes. This allocation results in capital accounts at the end of EF's first year as follows:

E		F		
Book	Tax	Book	Tax	
\$10,000	\$4,000	\$10,000	\$10,000	Initial contribution. Depreciation. Sales income.
<500>	<0>	<500>	<400>	
350	700	350	0	
9,850	4,700	9,850	9,600	

(B) This curative allocation is not reasonable under paragraph (c)(3)(i) of this section because the allocation exceeds the amount necessary to offset the disparity caused by the ceiling rule.

*Example 2. Curative allocations limited to depreciation.* (i) *Facts.* G and H form partnership GH and agree that each will be allocated a 50 percent share of all partnership items and that GH will make allocations under section 704(c) using the traditional method with curative allocations under paragraph (c) of this section, but only to the extent that the partnership has sufficient tax depreciation deductions. G contributes property G1, with an adjusted tax basis of \$3,000 and a fair market value of \$10,000, and H contributes property H1, with an adjusted tax basis of \$6,000 and a fair market value of \$10,000. Both properties have 5 years remaining on their cost

recovery schedules and are depreciable using the straight-line method. At the time of contribution, G1 has a built-in gain of \$7,000 and H1 has a built-in gain of \$4,000, and therefore, both properties are section 704(c) property. G1 generates \$600 of tax depreciation and \$2,000 of book depreciation for each of five years. H1 generates \$1,200 of tax depreciation and \$2,000 of book depreciation for each of 5 years. In addition, the properties each generate \$500 of operating income annually. G and H are each allocated \$1,000 of book depreciation for each property. Under the traditional method of paragraph (b) of this section, G would be allocated \$0 of tax depreciation for G1 and \$1,000 for H1, and H would be allocated \$600 of tax depreciation for G1 and \$200 for H1. Thus, at the end of the first year, G and H's book and tax capital accounts would be as follows:

G		H		
Book	Tax	Book	Tax	
\$10,000	\$3,000	\$10,000	\$6,000	Initial contribution.

G		H		
Book	Tax	Book	Tax	
<1,000> <1,000> 500	<0> <1,000> 500	<1,000> <1,000> 500	<600> <200> 500	G1 depreciation. H1 depreciation. Operating income.
8,500	2,500	8,500	5,700	

(ii) *Curative allocations.* Under the traditional method, G is allocated more depreciation deductions than H, even though H contributed property with a smaller disparity reflected on GH's book and tax capital accounts. GH makes curative allocations to H of an additional \$400 of tax depreciation each

year, which reduces the disparities between G and H's book and tax capital accounts ratably each year. These allocations are reasonable provided the allocations meet the other requirements of this section. As a result of their agreement, at the end of the first year, G and H's capital accounts are as follows:

G		H		
Book	Tax	Book	Tax	
\$10,000 <1,000> <1,000> 500	\$3,000 <0> <600> 500	\$10,000 <1,000> <1,000> 500	\$6,000 <600> <600> 500	Initial contribution. G1 depreciation. H1 depreciation. Operating income.
8,500	2,900	8,500	5,300	

*Example 3. Unreasonable use of curative allocations.* (i) *Facts.* J and K form partnership JK and agree that each will receive a 50 percent share of all partnership items and that JK will make allocations under section 704(c) using the traditional method with curative allocations under paragraph (c) of this section. J contributes equipment with an adjusted tax basis of \$1,000 and a book value of \$10,000, with a view to taking advantage of the fact that the equipment has only one year remaining on its cost recovery schedule although it has an estimated remaining economic life of 10 years. J has substantial net operating loss carryforwards that J anticipates will otherwise expire unused. At the time of contribution, J has a built-in gain of \$9,000, and therefore, the equipment is section 704(c) property. K contributes \$10,000 of cash, which JK uses to buy inventory for re-

sale. In JK's first year, the revenues generated by the equipment exactly equal JK's operating expenses. Under § 1.704-1(b)(2)(iv)(g)(3), the partnership must allocate the \$10,000 of book depreciation to the partners in the first year of the partnership. Thus, there is \$10,000 of book depreciation and \$1,000 of tax depreciation in the partnership's first year. In addition, at the end of the first year JK sells all of the inventory for \$18,000, recognizing \$8,000 of income. The partners anticipate that the inventory income will have substantially the same effect on their tax liabilities as income from J's contributed equipment. Under the traditional method of paragraph (b) of this section, J and K's book and tax capital accounts at the end of the first year would be as follows:

J		K		
Book	Tax	Book	Tax	
\$10,000 <5,000> 4,000	\$1,000 <0> 4,000	\$10,000 <5,000> 4,000	\$10,000 <1,000> 4,000	Initial contribution. Depreciation. Sales income.
9,000	5,000	9,000	13,000	

(ii) *Unreasonable use of method.* (A) The use of curative allocations under these facts to offset immediately the full effect of the cell-

ing rule would result in the following book and tax capital accounts at the end of JK's first year:

J		K		
Book	Tax	Book	Tax	
\$10,000	\$1,000	\$10,000	\$10,000	Initial contribution. Depreciation. Sales income.
<5,000>	<0>	<5,000>	<1,000>	
4,000	8,000	4,000	0	
9,000	9,000	9,000	9,000	

(B) This curative allocation is not reasonable under paragraph (a)(10) of this section because the contribution of property is made and the curative allocation method is used with a view to shifting a significant amount of partnership taxable income to a partner with a low marginal tax rate and away from a partner with a high marginal tax rate, within a period of time significantly shorter than the economic life of the property.

(C) The property has only one year remaining on its cost recovery schedule even though its economic life is considerably

longer. Under these facts, if the partnership agreement had provided for curative allocations over a reasonable period of time, such as over the property's economic life, rather than over its remaining cost recovery period, the allocations would have been reasonable. See paragraph (c)(3)(ii) of this section. Thus, in this example, JK would make a curative allocation of \$400 of sales income to J in the partnership's first year (10 percent of \$4,000). J and K's book and tax capital accounts at the end of the first year would be as follows:

J		K		
Book	Tax	Book	Tax	
\$10,000	\$1,000	\$10,000	\$10,000	Initial contribution. Depreciation. Sales income.
<5,000>	<0>	<5,000>	<1,000>	
4,000	4,400	4,000	3,600	
9,000	5,400	9,000	12,600	

(d) *Remedial allocation method*—(1) *In general.* A partnership may adopt the remedial allocation method described in this paragraph to eliminate distortions caused by the ceiling rule. A partnership adopting the remedial allocation method eliminates those distortions by creating remedial items and allocating those items to its partners. Under the remedial allocation method, the partnership first determines the amount of book items under paragraph (d)(2) of this section and the partners' distributive shares of these items under section 704(b). The partnership then allocates the corresponding tax items recognized by the partnership, if any, using the traditional method described in paragraph (b)(1) of this section. If the ceiling rule (as defined in paragraph (b)(1) of this section) causes the book allocation of an item to a noncontributing partner to differ from the tax allocation of the same item to the noncontributing partner, the partnership creates a remedial item of income, gain, loss, or deduction equal to the full amount of the difference and

allocates it to the noncontributing partner. The partnership simultaneously creates an offsetting remedial item in an identical amount and allocates it to the contributing partner.

(2) *Determining the amount of book items.* Under the remedial allocation method, a partnership determines the amount of book items attributable to contributed property in the following manner rather than under the rules of § 1.704-1(b)(2)(iv)(g)(3). The portion of the partnership's book basis in the property equal to the adjusted tax basis in the property at the time of contribution is recovered in the same manner as the adjusted tax basis in the property is recovered (generally, over the property's remaining recovery period under section 168(i)(7) or other applicable Internal Revenue Code section). The remainder of the partnership's book basis in the property (the amount by which book basis exceeds adjusted tax basis) is recovered using any recovery period and depreciation

(or other cost recovery) method (including first-year conventions) available to the partnership for newly purchased property (of the same type as the contributed property) that is placed in service at the time of contribution.

(3) *Type.* Remedial allocations of income, gain, loss, or deduction to the noncontributing partner have the same tax attributes as the tax item limited by the ceiling rule. The tax attributes of offsetting remedial allocations of income, gain, loss, or deduction to the contributing partner are determined by reference to the item limited by the ceiling rule. Thus, for example, if the ceiling rule limited item is loss from the sale of contributed property, the offsetting remedial allocation to the contributing partner must be gain from the sale of that property. Conversely, if the ceiling rule limited item is gain from the sale of contributed property, the offsetting remedial allocation to the contributing partner must be loss from the sale of that property. If the ceiling rule limited item is depreciation or other cost recovery from the contributed property, the offsetting remedial allocation to the contributing partner must be income of the type produced (directly or indirectly) by that property. Any partner level tax attributes are determined at the partner level. For example, if the ceiling rule limited item is depreciation from property used in a rental activity, the remedial allocation to the noncontributing partner is depreciation from property used in a rental activity and the offsetting remedial allocation to the contributing partner is ordinary income from that rental activity. Each partner then applies section 469 to the allocations as appropriate.

(4) *Effect of remedial items—(i) Effect on partnership.* Remedial items do not affect the partnership's computation of its taxable income under section 703 and do not affect the partnership's adjusted tax basis in partnership property.

(ii) *Effect on partners.* Remedial items are notional tax items created by the partnership solely for tax purposes and do not affect the partners' book capital accounts. Remedial items have the same effect as actual tax items on a

partner's tax liability and on the partner's adjusted tax basis in the partnership interest.

(5) *Limitations on use of methods involving remedial allocations—(i) Limitation on taxpayers.* In the absence of published guidance, the remedial allocation method described in this paragraph (d) is the only reasonable section 704(c) method permitting the creation of notional tax items.

(ii) *Limitation on Internal Revenue Service.* In exercising its authority under paragraph (a)(10) of this section to make adjustments if a partnership's allocation method is not reasonable, the Internal Revenue Service will not require a partnership to use the remedial allocation method described in this paragraph (d) or any other method involving the creation of notional tax items.

(6) *Adjustments to application of method.* The Commissioner may, by published guidance, prescribe adjustments to the remedial allocation method under this paragraph (d) as necessary or appropriate. This guidance may, for example, prescribe adjustments to the remedial allocation method to prevent the duplication or omission of items of income or deduction or to reflect more clearly the partners' income or the income of a transferee of a partner.

(7) *Examples.* The following examples illustrate the principles of this paragraph (d).

*Example 1. Remedial allocation method.* (i) *Facts.* On January 1, L and M form partnership LM and agree that each will be allocated a 50 percent share of all partnership items. The partnership agreement provides that LM will make allocations under section 704(c) using the remedial allocation method under this paragraph (d) and that the straight-line method will be used to recover excess book basis. L contributes depreciable property with an adjusted tax basis of \$4,000 and a fair market value of \$10,000. The property is depreciated using the straight-line method with a 10-year recovery period and has 4 years remaining on its recovery period. M contributes \$10,000, which the partnership uses to purchase land. Except for the depreciation deductions, LM's expenses equal its income in each year of the 10 years commencing with the year the partnership is formed.

(ii) *Years 1 through 4.* Under the remedial allocation method of this paragraph (d), LM has book depreciation for each of its first 4

## Internal Revenue Service, Treasury

## § 1.704-3

years of \$1,600 [\$1,000 (\$4,000 adjusted tax basis divided by the 4-year remaining recovery period) plus \$600 (\$6,000 excess of book value over tax basis, divided by the new 10-year recovery period)]. (For the purpose of simplifying the example, the partnership's book depreciation is determined without regard to any first-year depreciation conventions.) Under the partnership agreement, L and M are each allocated 50 percent (\$800) of the book depreciation. M is allocated \$800 of tax depreciation and L is allocated the remaining \$200 of tax depreciation (\$1,000-\$800). See paragraph (d)(1) of this section. No remedial allocations are made because the ceiling rule does not result in a book allocation of depreciation to M different from the tax allocation. The allocations result in capital accounts at the end of LM's first 4 years as follows:

	L		M	
	Book	Tax	Book	Tax
Initial contribution ....	\$10,000	\$4,000	\$10,000	\$10,000
Depreciation	<3,200>	<800>	<3,200>	<3,200>
	\$6,800	\$3,200	\$6,800	\$6,800

(iii) *Subsequent years.* (A) For each of years 5 through 10, LM has \$600 of book depreciation (\$6,000 excess of initial book value over adjusted tax basis divided by the 10-year recovery period that commenced in year 1), but no tax depreciation. Under the partnership agreement, the \$600 of book depreciation is allocated equally to L and M. Because of the application of the ceiling rule in year 5, M would be allotted \$300 of book depreciation, but no tax depreciation. Thus, at the end of LM's fifth year L's and M's book and tax capital accounts would be as follows:

	L		M	
	Book	Tax	Book	Tax
End of year 4 Depreciation	\$6,800	\$3,200	\$6,800	\$6,800
	<300>	.....	<300>	.....
	\$6,500	\$3,200	\$6,500	\$6,800

(B) Because the ceiling rule would cause an annual disparity of \$300 between M's allocations of book and tax depreciation, LM must make remedial allocations of \$300 of tax depreciation deductions to M under the remedial allocation method for each of years 5 through 10. LM must also make an offsetting remedial allocation to L of \$300 of taxable income, which must be of the same type as income produced by the property. At the end of year 5, LM's capital accounts are as follows:

	L		M	
	Book	Tax	Book	Tax
End of year 4	\$6,800	\$3,200	\$6,800	\$6,800

	L		M	
	Book	Tax	Book	Tax
Depreciation	<300>	.....	<300>	.....
Remedial allocations ...	.....	300	.....	<300>
	\$6,500	\$3,500	\$6,500	\$6,500

(C) At the end of year 10, LM's capital accounts are as follows:

	L		M	
	Book	Tax	Book	Tax
End of year 5 Depreciation	\$6,500	\$3,500	\$6,500	\$6,500
Remedial allocations ...	<1,500>	.....	<1,500>	.....
	.....	1,500	.....	<1,500>
	\$5,000	\$5,000	\$5,000	\$5,000

*Example 2. Remedial allocations on sale.* (i) *Facts.* N and P form partnership NP and agree that each will be allocated a 50 percent share of all partnership items. The partnership agreement provides that NP will make allocations under section 704(c) using the remedial allocation method under this paragraph (d). N contributes Blackacre (land) with an adjusted tax basis of \$4,000 and a fair market value of \$10,000. Because N has a built-in gain of \$6,000, Blackacre is section 704(c) property. P contributes Whiteacre (land) with an adjusted tax basis and fair market value of \$10,000. At the end of NP's first year, NP sells Blackacre to Q for \$9,000 and recognizes a capital gain of \$5,000 (\$9,000 amount realized less \$4,000 adjusted tax basis) and a book loss of \$1,000 (\$9,000 amount realized less \$10,000 book basis). NP has no other items of income, gain, loss, or deduction. If the ceiling rule were applied, N would be allocated the entire \$5,000 of tax gain and N and P would each be allocated \$500 of book loss. Thus, at the end of NP's first year N's and P's book and tax capital accounts would be as follows:

	N		P	
	Book	Tax	Book	Tax
Initial contribution ....	\$10,000	\$4,000	\$10,000	\$10,000
Sale of Blackacre	<500>	5,000	<500>	.....
	\$9,500	\$9,000	\$9,500	\$10,000

(ii) *Remedial allocation.* Because the ceiling rule would cause a disparity of \$500 between P's allocation of book and tax loss, NP must make a remedial allocation of \$500 of capital loss to P and an offsetting remedial allocation to N of an additional \$500 of capital gain. These allocations result in capital accounts at the end of NP's first year as follows:

§ 1.704-3

26 CFR Ch. I (4-1-14 Edition)

	N		P	
	Book	Tax	Book	Tax
Initial contribution ....	\$10,000	\$4,000	\$10,000	\$10,000
Sale of Blackacre	<500>	5,000	<500>	.....
Remedial allocations ...	.....	500	.....	<500>
	\$9,500	\$9,500	\$9,500	\$9,500

*Example 3. Remedial allocation where built-in gain property sold for book and tax loss.* (i) *Facts.* The facts are the same as in Example 2, except that at the end of NP's first year, NP sells Blackacre to Q for \$3,000 and recognizes a capital loss of \$1,000 (\$3,000 amount realized less \$4,000 adjusted tax basis) and a book loss of \$7,000 (\$3,000 amount realized less \$10,000 book basis). If the ceiling rule were applied, P would be allocated the entire \$1,000 of tax loss and N and P would each be allocated \$3,500 of book loss. Thus, at the end of NP's first year, N's and P's book and tax capital accounts would be as follows:

	N		P	
	Book	Tax	Book	Tax
Initial contribution ....	\$10,000	\$4,000	\$10,000	\$10,000
Sale of Blackacre	<3,500>	0	<3,500>	<1,000>
	\$6,500	\$4,000	\$6,500	\$9,000

(ii) *Remedial allocation.* Because the ceiling rule would cause a disparity of \$2,500 between P's allocation of book and tax loss on the sale of Blackacre, NP must make a remedial allocation of \$2,500 of capital loss to P and an offsetting remedial allocation to N of \$2,500 of capital gain. These allocations result in capital accounts at the end of NP's first year as follows:

	N		P	
	Book	Tax	Book	Tax
Initial contribution ....	\$10,000	\$4,000	\$10,000	\$10,000
Sale of Blackacre	<3,500>	0	<3,500>	<1,000>
Remedial Al-	.....	2,500	.....	<2,500>
locations ...	\$6,500	\$6,500	\$6,500	\$6,500

(e) *Exceptions and special rules*—(1) *Small disparities*—(i) *General rule.* If a partner contributes one or more items of property to a partnership within a single taxable year of the partnership, and the disparity between the book value of the property and the contributing partner's adjusted tax basis in

the property is a small disparity, the partnership may—

(A) Use a reasonable section 704(c) method;

(B) Disregard the application of section 704(c) to the property; or

(C) Defer the application of section 704(c) to the property until the disposition of the property.

(ii) *Definition of small disparity.* A disparity between book value and adjusted tax basis is a small disparity if the book value of all properties contributed by one partner during the partnership taxable year does not differ from the adjusted tax basis by more than 15 percent of the adjusted tax basis, and the total gross disparity does not exceed \$20,000.

(2) *Aggregation.* Each of the following types of property may be aggregated for purposes of making allocations under section 704(c) and this section if contributed by one partner during the partnership taxable year.

(i) *Depreciable property.* All property, other than real property, that is included in the same general asset account of the contributing partner and the partnership under section 168.

(ii) *Zero-basis property.* All property with a basis equal to zero, other than real property.

(iii) *Inventory.* For partnerships that do not use a specific identification method of accounting, each item of inventory, other than qualified financial assets (as defined in paragraph (e)(3)(ii) of this section).

(3) *Special aggregation rule for securities partnerships*—(i) *General rule.* For purposes of making reverse section 704(c) allocations, a securities partnership may aggregate gains and losses from qualified financial assets using any reasonable approach that is consistent with the purpose of section 704(c). Notwithstanding paragraphs (a)(2) and (a)(6)(i) of this section, once a partnership adopts an aggregate approach, that partnership must apply the same aggregate approach to all of its qualified financial assets for all taxable years in which the partnership qualifies as a securities partnership. Paragraphs (e)(3)(iv) and (e)(3)(v) of this section describe approaches for aggregating reverse section 704(c) gains

and losses that are generally reasonable. Other approaches may be reasonable in appropriate circumstances. See, however, paragraph (a)(10) of this section, which describes the circumstances under which section 704(c) methods, including the aggregate approaches described in this paragraph (e)(3), are not reasonable. A partnership using an aggregate approach must separately account for any built-in gain or loss from contributed property.

(ii) *Qualified financial assets*—(A) *In general*. A qualified financial asset is any personal property (including stock) that is actively traded. Actively traded means actively traded as defined in § 1.1092(d)-1 (defining actively traded property for purposes of the straddle rules).

(B) *Management companies*. For a management company, qualified financial assets also include the following, even if not actively traded: shares of stock in a corporation; notes, bonds, debentures, or other evidences of indebtedness; interest rate, currency, or equity notional principal contracts; evidences of an interest in, or derivative financial instruments in, any security, currency, or commodity, including any option, forward or futures contract, or short position; or any similar financial instrument.

(C) *Partnership interests*. An interest in a partnership is not a qualified financial asset for purposes of this paragraph (e)(3)(ii). However, for purposes of this paragraph (e)(3), a partnership (upper-tier partnership) that holds an interest in a securities partnership (lower-tier partnership) must take into account the lower-tier partnership's assets and qualified financial assets as follows:

(1) In determining whether the upper-tier partnership qualifies as an investment partnership, the upper-tier partnership must treat its proportionate share of the lower-tier securities partnership's assets as assets of the upper-tier partnership; and

(2) If the upper-tier partnership adopts an aggregate approach under this paragraph (e)(3), the upper-tier partnership must aggregate the gains and losses from its directly held qualified financial assets with its distributive share of the gains and losses from

the qualified financial assets of the lower-tier securities partnership.

(iii) *Securities partnership*—(A) *In general*. A partnership is a securities partnership if the partnership is either a management company or an investment partnership, and the partnership makes all of its book allocations in proportion to the partners' relative book capital accounts (except for reasonable special allocations to a partner that provides management services or investment advisory services to the partnership).

(B) *Definitions*—(1) *Management company*. A partnership is a management company if it is registered with the Securities and Exchange Commission as a management company under the Investment Company Act of 1940, as amended (15 U.S.C. 80a).

(2) *Investment partnership*. A partnership is an investment partnership if:

(i) On the date of each capital account restatement, the partnership holds qualified financial assets that constitute at least 90 percent of the fair market value of the partnership's non-cash assets; and

(ii) The partnership reasonably expects, as of the end of the first taxable year in which the partnership adopts an aggregate approach under this paragraph (e)(3), to make revaluations at least annually.

(iv) *Partial netting approach*. This paragraph (e)(3)(iv) describes the partial netting approach of making reverse section 704(c) allocations. See Example 1 of paragraph (e)(3)(ix) of this section for an illustration of the partial netting approach. To use the partial netting approach, the partnership must establish appropriate accounts for each partner for the purpose of taking into account each partner's share of the book gains and losses and determining each partner's share of the tax gains and losses. Under the partial netting approach, on the date of each capital account restatement, the partnership:

(A) Nets its book gains and book losses from qualified financial assets since the last capital account restatement and allocates the net amount to its partners;

(B) Separately aggregates all tax gains and all tax losses from qualified

financial assets since the last capital account restatement; and

(C) Separately allocates the aggregate tax gain and aggregate tax loss to the partners in a manner that reduces the disparity between the book capital account balances and the tax capital account balances (book-tax disparities) of the individual partners.

(v) *Full netting approach.* This paragraph (e)(3)(v) describes the full netting approach of making reverse section 704(c) allocations on an aggregate basis. See Example 2 of paragraph (e)(3)(ix) of this section for an illustration of the full netting approach. To use the full netting approach, the partnership must establish appropriate accounts for each partner for the purpose of taking into account each partner's share of the book gains and losses and determining each partner's share of the tax gains and losses. Under the full netting approach, on the date of each capital account restatement, the partnership:

(A) Nets its book gains and book losses from qualified financial assets since the last capital account restatement and allocates the net amount to its partners;

(B) Nets tax gains and tax losses from qualified financial assets since the last capital account restatement; and

(C) Allocates the net tax gain (or net tax loss) to the partners in a manner that reduces the book-tax disparities of the individual partners.

(vi) *Type of tax gain or loss.* The character and other tax attributes of gain or loss allocated to the partners under this paragraph (e)(3) must:

(A) Preserve the tax attributes of each item of gain or loss realized by the partnership;

(B) Be determined under an approach that is consistently applied; and

(C) Not be determined with a view to reducing substantially the present value of the partners' aggregate tax liability.

(vii) *Disqualified securities partnerships.* A securities partnership that adopts an aggregate approach under this paragraph (e)(3) and subsequently fails to qualify as a securities partnership must make reverse section 704(c) allocations on an asset-by-asset basis

after the date of disqualification. The partnership, however, is not required to disaggregate the book gain or book loss from qualified asset revaluations before the date of disqualification when making reverse section 704(c) allocations on or after the date of disqualification.

(viii) *Transitional rule for qualified financial assets revalued after effective date.* A securities partnership revaluing its qualified financial assets pursuant to § 1.704-1(b)(2)(iv)(f) on or after the effective date of this section may use any reasonable approach to coordinate with revaluations that occurred prior to the effective date of this section.

(ix) *Examples.* The following examples illustrate the principles of this paragraph (e)(3).

*Example 1. Operation of the partial netting approach.* (i) *Facts.* Two regulated investment companies, X and Y, each contribute \$150,000 in cash to form PRS, a partnership that registers as a management company. The partnership agreement provides that book items will be allocated in accordance with the partners' relative book capital accounts, that book capital accounts will be adjusted to reflect daily revaluations of property pursuant to § 1.704-1(b)(2)(iv)(f)(5)(iii), and that reverse section 704(c) allocations will be made using the partial netting approach described in paragraph (e)(3)(iv) of this section. X and Y each have an initial book capital account of \$150,000. In addition, the partnership establishes for each of X and Y a revaluation account with a beginning balance of \$0. On Day 1, PRS buys Stock 1, Stock 2, and Stock 3 for \$100,000 each. On Day 2, Stock 1 increases in value from \$100,000 to \$102,000, Stock 2 increases in value from \$100,000 to \$105,000, and Stock 3 declines in value from \$100,000 to \$98,000. At the end of Day 2, Z, a regulated investment company, joins PRS by contributing \$152,500 in cash for a one-third interest in the partnership [\$152,500 divided by \$300,000 (initial values of stock) + \$5,000 (net gain at end of Day 2) = \$152,500]. PRS uses this cash to purchase Stock 4. PRS establishes a revaluation account for Z with a \$0 beginning balance. As of the close of Day 3, Stock 1 increases in value from \$102,000 to \$105,000, and Stocks 2, 3, and 4 decrease in value from \$105,000 to \$102,000, from \$98,000 to \$96,000, and from \$152,500 to \$151,500, respectively. At the end of Day 3, PRS sells Stocks 2 and 3.

(ii) *Book allocations—Day 2.* At the end of Day 2, PRS revalues the partnership's qualified financial assets and increases X's and Y's book capital accounts by each partner's 50 percent share of the \$5,000 (\$2,000 + \$5,000 - \$2,000) net increase in the value of the

## Internal Revenue Service, Treasury

## § 1.704-3

partnership's assets during Day 2. PRS increases X's and Y's respective revaluation account balances by \$2,500 each to reflect the amount by which each partner's book capital account increased on Day 2. Z's capital account is not affected because Z did not join PRS until the end of Day 2. At the beginning of Day 3, the partnership's accounts are as follows:

	Stock 1	Stock 2	Stock 3	Stock 4
Opening Balance	\$100,000	\$100,000	\$100,000	
Day 2 Adjustment	2,000	5,000	(2,000)	
Total .....	\$102,000	\$105,000	\$98,000	\$152,500

X			
	Book	Tax	Revaluation account
Opening Balance .....	\$150,000	\$150,000	0
Day 2 Adjustment .....	2,500	0	\$2,500
Closing Balance .....	\$152,500	\$150,000	\$2,500

Y			
	Book	Tax	Revaluation account
Opening Balance .....	\$150,000	\$150,000	0
Day 2 Adjustment .....	2,500	0	\$2,500
Closing balance .....	\$152,500	\$150,000	\$2,500

Z			
	Book	Tax	Revaluation account
Opening Balance.			
Day 2 Adjustment.			
Closing Balance .....	\$152,500	\$152,500	\$0

(iii) *Book and tax allocations—Day 3.* At the end of Day 3, PRS decreases the book capital accounts of X, Y, and Z by \$1,000 to reflect each partner's share of the \$3,000 (\$3,000—\$3,000—\$2,000—\$1,000) net decrease in the value of the partnership's qualified financial assets. PRS also reduces each partner's revaluation account balance by \$1,000. Accordingly, X's and Y's revaluation account balances are reduced to \$1,500 each and Z's revaluation account balance is (\$1,000). PRS then separately allocates the tax gain from the sale of Stock 2 and the tax loss from the sale of Stock 3. The \$2,000 of tax gain recognized on the sale of Stock 2 (\$102,000—\$100,000) is allocated among the partners with positive revaluation account balances in accordance with the relative balances of those revaluation accounts. X's and Y's revaluation accounts have equal positive balances; thus, PRS allocates \$1,000 of the gain

from the sale of Stock 2 to X and \$1,000 of that gain to Y. PRS allocates none of the gain from the sale to Z because Z's revaluation account balance is negative. The \$4,000 of tax loss recognized from the sale of Stock 3 (\$96,000—\$100,000) is allocated first to the partners with negative revaluation account balances to the extent of those balances. Because Z is the only partner with a negative revaluation account balance, the tax loss is allocated first to Z to the extent of Z's (\$1,000) balance. The remaining \$3,000 of tax loss is allocated among the partners in accordance with their distributive shares of the loss. Accordingly, PRS allocates \$1,000 of tax loss from the sale of Stock 3 to each of X and Y. PRS also allocates an additional \$1,000 of the tax loss to Z, so that Z's total share of the tax loss from the sale of Stock 3 is \$2,000. PRS then reduces each partner's revaluation account balance by the amount of any tax gain allocated to that partner and increases each partner's revaluation account balance by the amount of any tax loss allocated to that partner. At the beginning of Day 4, the partnership's accounts are as follows:

	Stock 1	Stock 2	Stock 3	Stock 4
Opening Balance	\$100,000	\$100,000	\$100,000	\$152,500
Day 2 Adjustment	2,000	5,000	(2,000)	
Day 3 Adjustment	\$3,000	(3,000)	(2,000)	(1,000)
Total .....	\$105,000	\$102,000	\$96,000	\$151,500

X and Y			
	Book	Tax	Revaluation account
Opening Balance ...	\$150,000	\$150,000	0
Day 2 Adjustment ..	2,500	0	\$2,500
Day 3 Adjustment ..	(1,000)	0	(\$1,000)
Total .....	\$151,500	\$150,000	\$1,500
Gain from Stock 2	0	\$1,000	(1,000)
Loss from Stock 3	0	(\$1,000)	1,000
Closing Balance ....	\$151,500	\$150,000	\$1,500

Z			
	Book	Tax	Revaluation account
Opening Balance ...	\$152,500	\$152,500	0
Day 3 Adjustment ..	(1,000)	0	(\$1,000)
Total .....	\$151,500	\$152,500	(\$1,000)
Gain from Stock 2	0	0	0
Loss from Stock 3	0	(2,000)	2,000
Closing Balance ....	\$151,500	\$150,500	\$1,000

*Example 2. Operation of the full netting approach.* (i) *Facts.* The facts are the same as in Example 1, except that the partnership

§ 1.704-3

26 CFR Ch. I (4-1-14 Edition)

agreement provides that PRS will make reverse section 704(c) allocations using the full netting approach described in paragraph (e)(3)(v) of this section.

(ii) *Book allocations—Days 2 and 3.* PRS allocates its book gains and losses in the manner described in paragraphs (ii) and (iii) of Example 1 (the partial netting approach). Thus, at the end of Day 2, PRS increases the book capital accounts of X and Y by \$2,500 to reflect the appreciation in the partnership's assets from the close of Day 1 to the close of Day 2 and records that increase in the revaluation account created for each partner. At the end of Day 3, PRS decreases the book capital accounts of X, Y, and Z by \$1,000 to reflect each partner's share of the decline in value of the partnership's assets from Day 2 to Day 3 and reduces each partner's revaluation account by a corresponding amount.

(iii) *Tax allocations—Day 3.* After making the book adjustments described in the previous paragraph, PRS allocates its net tax gain (or net tax loss) from its sales of quali-

fied financial assets during Day 3. To do so, PRS first determines its net tax gain (or net tax loss) recognized from its sales of qualified financial assets for the day. There is a \$2,000 net tax loss (\$2,000 gain from the sale of Stock 2 less \$4,000 loss from the sale of Stock 3) on the sale of PRS's qualified financial assets. Because Z is the only partner with a negative revaluation account balance, the partnership's net tax loss is allocated first to Z to the extent of Z's (\$1,000) revaluation account balance. The remaining net tax loss is allocated among the partners in accordance with their distributive shares of loss. Thus, PRS allocates \$333.33 of the \$2,000 net tax loss to each of X and Y. PRS also allocates an additional \$333.33 of the net tax loss to Z, so that the total net tax loss allocation to Z is \$1,333.33. PRS then increases each partner's revaluation account balance by the amount of net tax loss allocated to that partner. At the beginning of Day 4, the partnership's accounts are as follows:

	Stock 1	Stock 2	Stock 3	Stock 4
Opening Balance .....	\$100,000	\$100,000	\$100,000	\$152,500
Day 2 Adjustment .....	2,000	5,000	(2,000)	
Day 3 Adjustment .....	3,000	(3,000)	(2,000)	(\$1,000)
Total .....	\$105,000	\$102,000	\$96,000	\$151,500

	X and Y		
	Book	Tax	Revaluation account
Opening Balance ...	\$150,000	\$150,000	0
Day 2 Adjustment ..	\$2,500	0	\$2,500
Day 3 Adjustment ..	(1,000)	0	(1,000)
Total .....	\$151,500	\$150,000	\$1,500
Net Tax Loss-Stocks 2 & 3 .....	0	(333)	333
Closing Balance ....	\$151,500	\$149,667	\$1,833

	Z		
	Book	Tax	Revaluation account
Opening Balance .....	\$152,500	\$152,500	0
Day 3 Adjustment ....	(1,000)	0	(\$1,000)
Total .....	\$151,500	\$152,500	(\$1,000)
Net Tax Loss-Stocks 2 & 3 .....	0	(1,333)	1,333
Closing Balance .....	\$151,500	\$151,167	\$333

(ii) Partnerships and partners not described in paragraph (e)(3) of this section to aggregate gain and loss from qualified financial assets; and

(iii) Aggregation of qualified financial assets for purposes of making section 704(c) allocations in the same manner as that described in paragraph (e)(3) of this section.

(f) *Effective/Applicability Dates.* With the exception of paragraphs (a)(1), (a)(8)(ii), (a)(8)(iii), (a)(10), and (a)(11) of this section, this section applies to properties contributed to a partnership and to restatements pursuant to § 1.704-1(b)(2)(iv)(f) on or after December 21, 1993. Paragraph (a)(11) of this section applies to properties contributed by a partner to a partnership on or after August 20, 1997. However, partnerships may rely on paragraph (a)(11) of this section for properties contributed before August 20, 1997 and disposed of on or after August 20, 1997. Paragraph (a)(8)(ii) applies to installment obligations received by a partnership in exchange for section 704(c) property on or after November 24, 2003. Paragraph (a)(8)(iii) applies to property acquired on or after November 24, 2003, by a partnership pursuant to a contract

(4) *Aggregation as permitted by the Commissioner.* The Commissioner may, by published guidance or by letter ruling, permit:

(i) Aggregation of properties other than those described in paragraphs (e)(2) and (e)(3) of this section;

that is section 704(c) property. Except as otherwise provided in §1.752-7(k), paragraphs (a)(8)(iv) and (a)(12) apply to §1.752-7 liability transfers, as defined in §1.752-7(b)(4), occurring on or after June 24, 2003. See §1.752-7(k). Paragraphs (a)(1) and (a)(10) of this section are applicable for taxable years beginning after June 9, 2010.

[T.D. 8500, 58 FR 67679, Dec. 22, 1993]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting §1.704-3, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at [www.fdsys.gov](http://www.fdsys.gov).

#### § 1.704-4 Distribution of contributed property.

(a) *Determination of gain and loss—(1) In general.* A partner that contributes section 704(c) property to a partnership must recognize gain or loss under section 704(c)(1)(B) and this section on the distribution of such property to another partner within five years of its contribution to the partnership in an amount equal to the gain or loss that would have been allocated to such partner under section 704(c)(1)(A) and §1.704-3 if the distributed property had been sold by the partnership to the distributee partner for its fair market value at the time of the distribution. See §1.704-3(a)(3)(i) for a definition of section 704(c) property.

(2) *Transactions to which section 704(c)(1)(B) applies.* Section 704(c)(1)(B) and this section apply only to the extent that a distribution by a partnership is a distribution to a partner acting in the capacity of a partner within the meaning of section 731.

(3) *Fair market value of property.* The fair market value of the distributed section 704(c) property is the price at which the property would change hands between a willing buyer and a willing seller at the time of the distribution, neither being under any compulsion to buy or sell and both having reasonable knowledge of the relevant facts. The fair market value that a partnership assigns to distributed section 704(c) property will be regarded as correct, provided that the value is reasonably agreed to among the partners in an arm's-length negotiation and the partners have sufficiently adverse interests.

(4) *Determination of five-year period—(i) General rule.* The five-year period specified in paragraph (a)(1) of this section begins on and includes the date of contribution.

(ii) *Section 708(b)(1)(B) terminations.* A termination of the partnership under section 708(b)(1)(B) does not begin a new five-year period for each partner with respect to the built-in gain and built-in loss property that the terminated partnership is deemed to contribute to the new partnership under §1.708-1(b)(1)(iv). See §1.704-3(a)(3)(ii) for the definitions of built-in gain and built-in loss on section 704(c) property. This paragraph (a)(4)(ii) applies to terminations of partnerships under section 708(b)(1)(B) occurring on or after May 9, 1997; however, this paragraph (a)(4)(ii) may be applied to terminations occurring on or after May 9, 1996, provided that the partnership and its partners apply this paragraph (a)(4)(ii) to the termination in a consistent manner.

(5) *Examples.* The following examples illustrate the rules of this paragraph (a). Unless otherwise specified, partnership income equals partnership expenses (other than depreciation deductions for contributed property) for each year of the partnership, the fair market value of partnership property does not change, all distributions by the partnership are subject to section 704(c)(1)(B), and all partners are unrelated.

*Example 1. Recognition of gain.* (i) On January 1, 1995, A, B, and C form partnership ABC as equal partners. A contributes \$10,000 cash and Property A, nondepreciable real property with a fair market value of \$10,000 and an adjusted tax basis of \$4,000. Thus, there is a built-in gain of \$6,000 on Property A at the time of contribution. B contributes \$10,000 cash and Property B, nondepreciable real property with a fair market value and adjusted tax basis of \$10,000. C contributes \$20,000 cash.

(ii) On December 31, 1998, Property A and Property B are distributed to C in complete liquidation of C's interest in the partnership.

(iii) A would have recognized \$6,000 of gain under section 704(c)(1)(A) and §1.704-3 on the sale of Property A at the time of the distribution (\$10,000 fair market value less \$4,000 adjusted tax basis). As a result, A must recognize \$6,000 of gain on the distribution of Property A to C. B would not have recognized any gain or loss under section

704(c)(1)(A) and § 1.704-3 on the sale of Property B at the time of distribution because Property B was not section 704(c) property. As a result, B does not recognize any gain or loss on the distribution of Property B.

*Example 2. Effect of post-contribution depreciation deductions.* (i) On January 1, 1995, A, B, and C form partnership ABC as equal partners. A contributes Property A, depreciable property with a fair market value of \$30,000 and an adjusted tax basis of \$20,000. Therefore, there is a built-in gain of \$10,000 on Property A. B and C each contribute \$30,000 cash. ABC uses the traditional method of making section 704(c) allocations described in § 1.704-3(b) with respect to Property A.

(ii) Property A is depreciated using the straight-line method over its remaining 10-year recovery period. The partnership has book depreciation of \$3,000 per year (10 percent of the \$30,000 book basis), and each partner is allocated \$1,000 of book depreciation per year (one-third of the total annual book depreciation of \$3,000). The partnership has a tax depreciation deduction of \$2,000 per year (10 percent of the \$20,000 tax basis in Property A). This \$2,000 tax depreciation deduction is allocated equally between B and C, the noncontributing partners with respect to Property A.

(iii) At the end of the third year, the book value of Property A is \$21,000 (\$30,000 initial book value less \$9,000 aggregate book depreciation) and the adjusted tax basis is \$14,000 (\$20,000 initial tax basis less \$6,000 aggregate tax depreciation). A's remaining section 704(c)(1)(A) built-in gain with respect to Property A is \$7,000 (\$21,000 book value less \$14,000 adjusted tax basis).

(iv) On December 31, 1997, Property A is distributed to B in complete liquidation of B's interest in the partnership. If Property A had been sold for its fair market value at the time of the distribution, A would have recognized \$7,000 of gain under section 704(c)(1)(A) and § 1.704-3(b). Therefore, A recognizes \$7,000 of gain on the distribution of Property A to B.

*Example 3. Effect of remedial method.* (i) On January 1, 1995, A, B, and C form partnership ABC as equal partners. A contributes Property A1, nondepreciable real property with a fair market value of \$10,000 and an adjusted tax basis of \$5,000, and Property A2, nondepreciable real property with a fair market value and adjusted tax basis of \$10,000. B and C each contribute \$20,000 cash. ABC uses the remedial method of making section 704(c) allocations described in § 1.704-3(d) with respect to Property A1.

(ii) On December 31, 1998, when the fair market value of Property A1 has decreased to \$7,000, Property A1 is distributed to C in a current distribution. If Property A1 had been sold by the partnership at the time of the distribution, ABC would have recognized the \$2,000 of remaining built-in gain under sec-

tion 704(c)(1)(A) on the sale (fair market value of \$7,000 less \$5,000 adjusted tax basis). All of this gain would have been allocated to A. ABC would also have recognized a book loss of \$3,000 (\$10,000 original book value less \$7,000 current fair market value of the property). Book loss in the amount of \$2,000 would have been allocated equally between B and C. Under the remedial method, \$2,000 of tax loss would also have been allocated equally to B and C to match their share of the book loss. As a result, \$2,000 of gain would also have been allocated to A as an offsetting remedial allocation. A would have recognized \$4,000 of total gain under section 704(c)(1)(A) on the sale of Property A1 (\$2,000 of section 704(c) recognized gain plus \$2,000 remedial gain). Therefore, A recognizes \$4,000 of gain on the distribution of Property A1 to C under this section.

(b) *Character of gain or loss*—(1) *General rule.* Gain or loss recognized by the contributing partner under section 704(c)(1)(B) and this section has the same character as the gain or loss that would have resulted if the distributed property had been sold by the partnership to the distributee partner at the time of the distribution.

(2) *Example.* The following example illustrates the rule of this paragraph (b). Unless otherwise specified, partnership income equals partnership expenses (other than depreciation deductions for contributed property) for each year of the partnership, the fair market value of partnership property does not change, all distributions by the partnership are subject to section 704(c)(1)(B), and all partners are unrelated.

*Example. Character of gain.* (i) On January 1, 1995, A and B form partnership AB. A contributes \$10,000 and Property A, nondepreciable real property with a fair market value of \$10,000 and an adjusted tax basis of \$4,000, in exchange for a 25 percent interest in partnership capital and profits. B contributes \$60,000 cash for a 75 percent interest in partnership capital and profits.

(ii) On December 31, 1998, Property A is distributed to B in a current distribution. Property A is used in a trade or business of B.

(iii) A would have recognized \$6,000 of gain under section 704(c)(1)(A) on a sale of Property A at the time of the distribution (the difference between the fair market value (\$10,000) and the adjusted tax basis (\$4,000) of the property at that time). Because Property A is not a capital asset in the hands of Partner B and B holds more than 50 percent of partnership capital and profits, the character of the gain on a sale of Property A to

B would have been ordinary income under section 707(b)(2). Therefore, the character of the gain to A on the distribution of Property A to B is ordinary income.

(c) *Exceptions*—(1) *Property contributed on or before October 3, 1989.* Section 704(c)(1)(B) and this section do not apply to property contributed to the partnership on or before October 3, 1989.

(2) *Certain liquidations.* Section 704(c)(1)(B) and this section do not apply to a distribution of an interest in section 704(c) property to a partner other than the contributing partner in a liquidation of the partnership if—

(i) The contributing partner receives an interest in the section 704(c) property contributed by that partner (and no other property); and

(ii) The built-in gain or loss in the interest distributed to the contributing partner, determined immediately after the distribution, is equal to or greater than the built-in gain or loss on the property that would have been allocated to the contributing partner under section 704(c)(1)(A) and § 1.704-3 on a sale of the contributed property to an unrelated party immediately before the distribution.

(3) *Section 708(b)(1)(B) terminations.* Section 704(c)(1)(B) and this section do not apply to the deemed distribution of interests in a new partnership caused by the termination of a partnership under section 708(b)(1)(B). A subsequent distribution of section 704(c) property by the new partnership to a partner of the new partnership is subject to section 704(c)(1)(B) to the same extent that a distribution by the terminated partnership would have been subject to section 704(c)(1)(B). See also § 1.737-2(a) for a similar rule in the context of section 737. This paragraph (c)(3) applies to terminations of partnerships under section 708(b)(1)(B) occurring on or after May 9, 1997; however, this paragraph (c)(3) may be applied to terminations occurring on or after May 9, 1996, provided that the partnership and its partners apply this paragraph (c)(3) to the termination in a consistent manner.

(4) *Complete transfer to another partnership.* Section 704(c)(1)(B) and this section do not apply to a transfer by a partnership (transferor partnership) of

all of its assets and liabilities to a second partnership (transferee partnership) in an exchange described in section 721, followed by a distribution of the interest in the transferee partnership in liquidation of the transferor partnership as part of the same plan or arrangement. A subsequent distribution of section 704(c) property by the transferee partnership to a partner of the transferee partnership is subject to section 704(c)(1)(B) to the same extent that a distribution by the transferor partnership would have been subject to section 704(c)(1)(B). See § 1.737-2(b) for a similar rule in the context of section 737.

(5) *Incorporation of a partnership.* Section 704(c)(1)(B) and this section do not apply to an incorporation of a partnership by any method of incorporation (other than a method involving an actual distribution of partnership property to the partners followed by a contribution of that property to a corporation), provided that the partnership is liquidated as part of the incorporation transaction. See § 1.737-2(c) for a similar rule in the context of section 737.

(6) *Undivided interests.* Section 704(c)(1)(B) and this section do not apply to a distribution of an undivided interest in property to the extent that the undivided interest does not exceed the undivided interest, if any, contributed by the distributee partner in the same property. See § 1.737-2(d)(4) for the application of section 737 in a similar context. The portion of the undivided interest in property retained by the partnership after the distribution, if any, that is treated as contributed by the distributee partner, is reduced to the extent of the undivided interest distributed to the distributee partner.

(7) *Example.* The following example illustrates the rule of paragraph (c)(2) of this section. Unless otherwise specified, partnership income equals partnership expenses (other than depreciation deductions for contributed property) for each year of the partnership, the fair market value of partnership property does not change, all distributions by the partnership are subject to section 704(c)(1)(B), and all partners are unrelated.

*Example.* (i) On January 1, 1995, A and B form partnership AB, as equal partners. A

contributes Property A, nondepreciable real property with a fair market value and adjusted tax basis of \$20,000. B contributes Property B, nondepreciable real property with a fair market value of \$20,000 and an adjusted tax basis of \$10,000. Property B therefore has a built-in gain of \$10,000 at the time of contribution.

(ii) On December 31, 1998, the partnership liquidates when the fair market value of Property A has not changed, but the fair market value of Property B has increased to \$40,000.

(iii) In the liquidation, A receives Property A and a 25 percent interest in Property B. This interest in Property B has a fair market value of \$10,000 to A, reflecting the fact that A was entitled to 50 percent of the \$20,000 post-contribution appreciation in Property B. The partnership distributes to B a 75 percent interest in Property B with a fair market value of \$30,000. B's basis in this portion of Property B is \$10,000 under section 732(b). As a result, B has a built-in gain of \$20,000 in this portion of Property B immediately after the distribution (\$30,000 fair market value less \$10,000 adjusted tax basis). This built-in gain is greater than the \$10,000 of built-in gain in Property B at the time of contribution to the partnership. B therefore does not recognize any gain on the distribution of a portion of Property B to A under this section.

(d) *Special rules*—(1) *Nonrecognition transactions, installment obligations, contributed contracts, and capitalized costs*—(i) *Nonrecognition transactions.* Property received by the partnership in exchange for section 704(c) property in a nonrecognition transaction is treated as the section 704(c) property for purposes of section 704(c)(1)(B) and this section to the extent that the property received is treated as section 704(c) property under § 1.704-3(a)(8). See § 1.737-2(d)(3) for a similar rule in the context of section 737.

(ii)–(iii) [Reserved]

(iv) *Capitalized costs.* Property to which the cost of section 704(c) property is properly capitalized is treated as section 704(c) property for purposes of section 704(c)(1)(B) and this section to the extent that such property is treated as section 704(c) property under § 1.704-3(a)(8)(iv). See § 1.737-2(d)(3) for a similar rule in the context of section 737.

(2) *Transfers of a partnership interest.* The transferee of all or a portion of the partnership interest of a contributing partner is treated as the contributing

partner for purposes of section 704(c)(1)(B) and this section to the extent of the share of built-in gain or loss allocated to the transferee partner. See § 1.704-3(a)(7).

(3) *Distributions of like-kind property.* If section 704(c) property is distributed to a partner other than the contributing partner and like-kind property (within the meaning of section 1031) is distributed to the contributing partner no later than the earlier of (i) 180 days following the date of the distribution to the non-contributing partner, or (ii) the due date (determined with regard to extensions) of the contributing partner's income tax return for the taxable year of the distribution to the non-contributing partner, the amount of gain or loss, if any, that the contributing partner would otherwise have recognized under section 704(c)(1)(B) and this section is reduced by the amount of built-in gain or loss in the distributed like-kind property in the hands of the contributing partner immediately after the distribution. The contributing partner's basis in the distributed like-kind property is determined as if the like-kind property were distributed in an unrelated distribution prior to the distribution of any other property distributed as part of the same distribution and is determined without regard to the increase in the contributing partner's adjusted tax basis in the partnership interest under section 704(c)(1)(B) and this section. See § 1.707-3 for provisions treating the distribution of the like-kind property to the contributing partner as a disguised sale in certain situations.

(4) *Example.* The following example illustrates the rules of this paragraph (d). Unless otherwise specified, partnership income equals partnership expenses (other than depreciation deductions for contributed property) for each year of the partnership, the fair market value of partnership property does not change, all distributions by the partnership are subject to section 704(c)(1)(B), and all partners are unrelated.

*Example. Distribution of like-kind property.* (i) On January 1, 1995, A, B, and C form partnership ABC as equal partners. A contributes Property A, nondepreciable real property

with a fair market value of \$20,000 and an adjusted tax basis of \$10,000. B and C each contribute \$20,000 cash. The partnership subsequently buys Property X, nondepreciable real property of a like-kind to Property A with a fair market value and adjusted tax basis of \$8,000. The fair market value of Property X subsequently increases to \$10,000.

(ii) On December 31, 1998, Property A is distributed to B in a current distribution. At the same time, Property X is distributed to A in a current distribution. The distribution of Property X does not result in the contribution of Property A being properly characterized as a disguised sale to the partnership under § 1.707-3. A's basis in Property X is \$8,000 under section 732(a)(1). A therefore has \$2,000 of built-in gain in Property X (\$10,000 fair market value less \$8,000 adjusted tax basis).

(iii) A would generally recognize \$10,000 of gain under section 704(c)(1)(B) on the distribution of Property A, the difference between the fair market value (\$20,000) of the property and its adjusted tax basis (\$10,000). This gain is reduced, however, by the amount of the built-in gain of Property X in the hands of A. As a result, A recognizes only \$8,000 of gain on the distribution of Property A to B under section 704(c)(1)(B) and this section.

(e) *Basis adjustments*—(1) *Contributing partner's basis in the partnership interest.* The basis of the contributing partner's interest in the partnership is increased by the amount of the gain, or decreased by the amount of the loss, recognized by the partner under section 704(c)(1)(B) and this section. This increase or decrease is taken into account in determining (i) the contributing partner's adjusted tax basis under section 732 for any property distributed to the partner in a distribution that is part of the same distribution as the distribution of the contributed property, other than like-kind property described in paragraph (d)(3) of this section (pertaining to the special rule for distributions of like-kind property), and (ii) the amount of the gain recognized by the contributing partner under section 731 or section 737, if any, on a distribution of money or property to the contributing partner that is part of the same distribution as the distribution of the contributed property. For a determination of basis in a distribution subject to section 737, see § 1.737-3(a).

(2) *Partnership's basis in partnership property.* The partnership's adjusted

tax basis in the distributed section 704(c) property is increased or decreased immediately before the distribution by the amount of gain or loss recognized by the contributing partner under section 704(c)(1)(B) and this section. Any increase or decrease in basis is therefore taken into account in determining the distributee partner's adjusted tax basis in the distributed property under section 732. For a determination of basis in a distribution subject to section 737, see § 1.737-3(b).

(3) *Section 754 adjustments.* The basis adjustments to partnership property made pursuant to paragraph (e)(2) of this section are not elective and must be made regardless of whether the partnership has an election in effect under section 754. Any adjustments to the bases of partnership property (including the distributed section 704(c) property) under section 734(b) pursuant to a section 754 election must be made after (and must take into account) the adjustments to basis made under paragraph (e)(2) of this section. See § 1.737-3(c)(4) for a similar rule in the context of section 737.

(4) *Example.* The following example illustrates the rules of this paragraph (e). Unless otherwise specified, partnership income equals partnership expenses (other than depreciation deductions for contributed property) for each year of the partnership, the fair market value of partnership property does not change, all distributions by the partnership are subject to section 704(c)(1)(B), and all partners are unrelated.

*Example. Basis adjustment.* On January 1, 1995, A, B, and C form partnership ABC as equal partners. A contributes \$10,000 cash and Property A, nondepreciable real property with a fair market value of \$10,000 and an adjusted tax basis of \$4,000. B and C each contribute \$20,000 cash.

(ii) On December 31, 1998, Property A is distributed to B in a current distribution.

(iii) Under paragraph (a) of this section, A recognizes \$6,000 of gain on the distribution of Property A because that is the amount of gain that would have been allocated to A under section 704(c)(1)(A) and § 1.704-3 on a sale of Property A for its fair market value at the time of the distribution (fair market value of Property A (\$10,000) less its adjusted tax basis at the time of distribution (\$4,000)). The adjusted tax basis of A's partnership interest is increased from \$14,000 to \$20,000 to

reflect this gain. The partnership's adjusted tax basis in Property A is increased from \$4,000 to \$10,000 immediately prior to its distribution to B. B's adjusted tax basis in Property A is therefore \$10,000 under section 732(a)(1).

(f) *Anti-abuse rule—(1) In general.* The rules of section 704(c)(1)(B) and this section must be applied in a manner consistent with the purpose of section 704(c)(1)(B). Accordingly, if a principal purpose of a transaction is to achieve a tax result that is inconsistent with the purpose of section 704(c)(1)(B), the Commissioner can recast the transaction for federal tax purposes as appropriate to achieve tax results that are consistent with the purpose of section 704(c)(1)(B) and this section. Whether a tax result is inconsistent with the purpose of section 704(c)(1)(B) and this section must be determined based on all the facts and circumstances. See § 1.737-4 for an anti-abuse rule and examples in the context of section 737.

(2) *Examples.* The following examples illustrate the anti-abuse rule of this paragraph (f). The examples set forth below do not delineate the boundaries of either permissible or impermissible types of transactions. Further, the addition of any facts or circumstances that are not specifically set forth in an example (or the deletion of any facts or circumstances) may alter the outcome of the transaction described in the example. Unless otherwise specified, partnership income equals partnership expenses (other than depreciation deductions for contributed property) for each year of the partnership, the fair market value of partnership property does not change, all distributions by the partnership are subject to section 704(c)(1)(B), and all partners are unrelated.

*Example 1. Distribution in substance made within five-year period; results inconsistent with the purpose of section 704(c)(1)(B).* (i) On January 1, 1995, A, B, and C form partnership ABC as equal partners. A contributes Property A, nondepreciable real property with a fair market value of \$10,000 and an adjusted tax basis of \$1,000. B and C each contributes \$10,000 cash.

(ii) On December 31, 1998, the partners desire to distribute Property A to B in complete liquidation of B's interest in the partnership. If Property A were distributed at

that time, however, A would recognize \$9,000 of gain under section 704(c)(1)(B), the difference between the \$10,000 fair market value and the \$1,000 adjusted tax basis of Property A, because Property A was contributed to the partnership less than five years before December 31, 1998. On becoming aware of this potential gain recognition, and with a principal purpose of avoiding such gain, the partners amend the partnership agreement on December 31, 1998, and take any other steps necessary to provide that substantially all of the economic risks and benefits of Property A are borne by B as of December 31, 1998, and that substantially all of the economic risks and benefits of all other partnership property are borne by A and C. The partnership holds Property A until January 5, 2000, at which time it is distributed to B in complete liquidation of B's interest in the partnership.

(iii) The actual distribution of Property A occurred more than five years after the contribution of the property to the partnership. The steps taken by the partnership on December 31, 1998, however, are the functional equivalent of an actual distribution of Property A to B in complete liquidation of B's interest in the partnership as of that date. Section 704(c)(1)(B) requires recognition of gain when contributed section 704(c) property is in substance distributed to another partner within five years of its contribution to the partnership. Allowing a contributing partner to avoid section 704(c)(1)(B) through arrangements such as those in this *Example 1* that have the effect of a distribution of property within five years of the date of its contribution to the partnership would effectively undermine the purpose of section 704(c)(1)(B) and this section. As a result, the steps taken by the partnership on December 31, 1998, are treated as causing a distribution of Property A to B for purposes of section 704(c)(1)(B) on that date, and A recognizes gain of \$9,000 under section 704(c)(1)(B) and this section at that time.

(iv) Alternatively, if on becoming aware of the potential gain recognition to A on a distribution of Property A on December 31, 1998, the partners had instead agreed that B would continue as a partner with no changes to the partnership agreement or to B's economic interest in partnership operations, the distribution of Property A to B on January 5, 2000, would not have been inconsistent with the purpose of section 704(c)(1)(B) and this section. In that situation, Property A would not have been distributed until after the expiration of the five-year period specified in section 704(c)(1)(B) and this section. Deferring the distribution of Property A until the end of the five-year period for a principal purpose of avoiding the recognition of gain under section 704(c)(1)(B) and this section is not inconsistent with the purpose of section

## Internal Revenue Service, Treasury

## § 1.705-1

704(c)(1)(B). Therefore, A would not have recognized gain on the distribution of Property A in that case.

*Example 2. Suspension of five-year period in manner consistent with the purpose of section 704(c)(1)(B).* (i) A, B, and C form partnership ABC on January 1, 1995, to conduct bona fide business activities. A contributes Property A, nondepreciable real property with a fair market value of \$10,000 and an adjusted tax basis of \$1,000, in exchange for a 49.5 percent interest in partnership capital and profits. B contributes \$10,000 in cash for a 49.5 percent interest in partnership capital and profits. C contributes cash for a 1 percent interest in partnership capital and profits. A and B are wholly owned subsidiaries of the same affiliated group and continue to control the management of Property A by virtue of their controlling interests in the partnership. The partnership is formed pursuant to a plan a principal purpose of which is to minimize the period of time that A would have to remain a partner with a potential acquiror of Property A.

(ii) On December 31, 1997, D is admitted as a partner to the partnership in exchange for \$10,000 cash.

(iii) On January 5, 2000, Property A is distributed to D in complete liquidation of D's interest in the partnership.

(iv) The distribution of Property A to D occurred more than five years after the contribution of the property to the partnership. On these facts, however, a principal purpose of the transaction was to minimize the period of time that A would have to remain partners with a potential acquiror of Property A, and treating the five-year period of section 704(c)(1)(B) as running during a time when Property A was still effectively owned through the partnership by members of the contributing affiliated group of which A is a member is inconsistent with the purpose of section 704(c)(1)(B). Prior to the admission of D as a partner, the pooling of assets between A and B, on the one hand, and C, on the other hand, although sufficient to constitute ABC as a valid partnership for federal income tax purposes, is not a sufficient pooling of assets for purposes of running the five-year period with respect to the distribution of Property A to D. Allowing a contributing partner to avoid section 704(c)(1)(B) through arrangements such as those in this *Example 2* would have the effect of substantially nullifying the five-year requirement of section 704(c)(1)(B) and this section and elevating the form of the transaction over its substance. As a result, with respect to the distribution of Property A to D, the five-year period of section 704(c)(1)(B) is tolled until the admission of D as a partner on December 31, 1997. Therefore, the distribution of Property A occurred before the end of the five-year period of section 704(c)(1)(B), and A rec-

ognizes gain of \$9,000 under section 704(c)(1)(B) on the distribution.

(g) *Effective dates.* This section applies to distributions by a partnership to a partner on or after January 9, 1995, except that paragraph (d)(1)(iv) applies to distributions by a partnership to a partner on or after June 24, 2003.

[T.D. 8642, 60 FR 66730, Dec. 26, 1995, as amended by T.D. 8717, 62 FR 25500, May 9, 1997; T.D. 9193, 70 FR 14395, Mar. 22, 2005; T.D. 9207, 70 FR 30342, May 26, 2005]

### § 1.705-1 Determination of basis of partner's interest.

(a) *General rule.* (1) Section 705 and this section provide rules for determining the adjusted basis of a partner's interest in a partnership. A partner is required to determine the adjusted basis of his interest in a partnership only when necessary for the determination of his tax liability or that of any other person. The determination of the adjusted basis of a partnership interest is ordinarily made as of the end of a partnership taxable year. Thus, for example, such year-end determination is necessary in ascertaining the extent to which a partner's distributive share of partnership losses may be allowed. See section 704(d). However, where there has been a sale or exchange of all or a part of a partnership interest or a liquidation of a partner's entire interest in a partnership, the adjusted basis of the partner's interest should be determined as of the date of sale or exchange or liquidation. The adjusted basis of a partner's interest in a partnership is determined without regard to any amount shown in the partnership books as the partner's "capital", "equity", or similar account. For example, A contributes property with an adjusted basis to him of \$400 (and a value of \$1,000) to a partnership. B contributes \$1,000 cash. While under their agreement each may have a "capital account" in the partnership of \$1,000, the adjusted basis of A's interest is only \$400 and B's interest \$1,000.

(2) The original basis of a partner's interest in a partnership shall be determined under section 722 (relating to contributions to a partnership) or section 742 (relating to transfers of partnership interests). Such basis shall be

increased under section 722 by any further contributions to the partnership and by the sum of the partner's distributive share for the taxable year and prior taxable years of:

(i) Taxable income of the partnership as determined under section 703(a),

(ii) Tax-exempt receipts of the partnership, and

(iii) The excess of the deductions for depletion over the basis of the depletable property, unless the property is an oil or gas property the basis of which has been allocated to partners under section 613A(c)(7)(D).

(3) The basis shall be decreased (but not below zero) by distributions from the partnership as provided in section 733 and by the sum of the partner's distributive share for the taxable year and prior taxable years of:

(i) Partnership losses (including capital losses), and

(ii) Partnership expenditures which are not deductible in computing partnership taxable income or loss and which are not capital expenditures.

(4) The basis shall be decreased (but not below zero) by the amount of the partner's deduction for depletion allowable under section 611 for any partnership oil and gas property to the extent the deduction does not exceed the proportionate share of the adjusted basis of the property allocated to the partner under section 613A(c)(7)(D).

(5) The basis shall be adjusted (but not below zero) to reflect any gain or loss to the partner resulting from a disposition by the partnership of a domestic oil or gas property after December 31, 1974.

(6) For the effect of liabilities in determining the amount of contributions made by a partner to a partnership or the amount of distributions made by a partnership to a partner, see section 752 and § 1.752-1, relating to the treatment of certain liabilities. In determining the basis of a partnership interest on the effective date of subchapter K, chapter 1 of the Code, or any of the sections thereof, the partner's share of partnership liabilities on that date shall be included.

(7) For basis adjustments necessary to coordinate sections 705 and 1032 in certain situations in which a partnership disposes of stock or any position

in stock to which section 1032 applies of a corporation that holds a direct or indirect interest in the partnership, see § 1.705-2.

(8) For basis adjustments necessary to coordinate sections 705 and 358(h), see § 1.358-7(b). For certain basis adjustments with respect to a § 1.752-7 liability assumed by a partnership from a partner, see § 1.752-7.

(9) For basis adjustments necessary to coordinate sections 705 and 362(e)(2), see § 1.362-4(f)(i).

(b) *Alternative rule.* In certain cases, the adjusted basis of a partner's interest in a partnership may be determined by reference to the partner's share of the adjusted basis of partnership property which would be distributable upon termination of the partnership. The alternative rule may be used to determine the adjusted basis of a partner's interest where circumstances are such that the partner cannot practicably apply the general rule set forth in section 705(a) and paragraph (a) of this section, or where, from a consideration of all the facts, it is, in the opinion of the Commissioner, reasonable to conclude that the result produced will not vary substantially from the result obtainable under the general rule. Where the alternative rule is used, adjustments may be necessary in determining the adjusted basis of a partner's interest in a partnership. Adjustments would be required, for example, in order to reflect in a partner's share of the adjusted basis of partnership property any significant discrepancies arising as a result of contributed property, transfers of partnership interests, or distributions of property to the partners. The operation of the alternative rules may be illustrated by the following examples:

*Example 1.* The ABC partnership, in which A, B, and C are equal partners, owns various properties with a total adjusted basis of \$1,500 and has earned and retained an additional \$1,500. The total adjusted basis of partnership property is thus \$3,000. Each partner's share in the adjusted basis of partnership property is one-third of this amount, or \$1,000. Under the alternative rule, this amount represents each partner's adjusted basis for his partnership interest.

*Example 2.* Assume that partner A in example 1 of this paragraph sells his partnership interest to D for \$1,250 at a time when the

## Internal Revenue Service, Treasury

## § 1.705-2

partnership property with an adjusted basis of \$1,500 had appreciated in value to \$3,000, and when the partnership also had \$750 in cash. The total adjusted basis of all partnership property is \$2,250 and the value of such property is \$3,750. D's basis for his partnership interest is his cost, \$1,250. However, his one-third share of the adjusted basis of partnership property is only \$750. Therefore, for the purposes of the alternative rule, D has an adjustment of \$500 in determining the basis of his interest. This amount represents the difference between the cost of his partnership interest and his share of partnership basis at the time of his purchase. If the partnership subsequently earns and retains an additional \$1,500, its property will have an adjusted basis of \$3,750. D's adjusted basis for his interest under the alternative rule is \$1,750, determined by adding \$500, his basis adjustment to \$1,250 (his one-third share of the \$3,750 adjusted basis of partnership property). If the partnership distributes \$250 to each partner in a current distribution, D's adjusted basis for his interest will be \$1,500 (\$1,000, his one-third share of the remaining basis of partnership property, \$3,000, plus his basis adjustment of \$500).

*Example 3.* Assume that BCD partnership in example 2 of this paragraph continues to operate. In 1960, D proposes to sell his partnership interest and wishes to evaluate the tax consequences of such sale. It is necessary, therefore, to determine the adjusted basis of his interest in the partnership. Assume further that D cannot determine the adjusted basis of his interest under the general rule. The balance sheet of the BCD partnership is as follows:

Assets	Adjusted basis per books	Market value
Cash .....	\$3,000	\$3,000
Receivables .....	4,000	4,000
Depreciable property .....	5,000	5,000
Land held for investment .....	18,000	30,000
<b>Total .....</b>	<b>30,000</b>	<b>42,000</b>
Liabilities and capital		Per books
Liabilities .....		\$6,000
Capital accounts:		
B .....		4,500
C .....		4,500
D .....		15,000
<b>Total .....</b>		<b>30,000</b>

The \$15,000 representing the amount of D's capital account does not reflect the \$500 basis adjustment arising from D's purchase of his interest. See example 2 of this paragraph. The adjusted basis of D's partnership interest determined under the alternative rule is as follows:

D's share of the adjusted basis of partnership property (reduced by the amount of liabilities) at time of proposed sale .....	\$15,000
D's share of partnership liabilities (under the partnership agreement liabilities are shared equally) .....	2,000
D's basis adjustment from example 2 .....	500
<b>Adjusted basis of D's interest at the time of proposed sale, as determined under alternative rule .....</b>	<b>17,500</b>

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, 25 FR 14021, Dec. 31, 1960, as amended by T.D. 8437, 57 FR 43903, Sept. 23, 1992; T.D. 8986, 67 FR 15114, Mar. 29, 2002; T.D. 9049, 68 FR 12816, Mar. 18, 2003; T.D. 9207, 70 FR 30342, May 26, 2005; T.D. 9633, 78 FR 54168, Sept. 3, 2013]

### § 1.705-2 Basis adjustments coordinating sections 705 and 1032.

(a) *Purpose.* This section coordinates the application of sections 705 and 1032 and is intended to prevent inappropriate increases or decreases in the adjusted basis of a corporate partner's interest in a partnership resulting from the partnership's disposition of the corporate partner's stock. The rules under section 705 generally are intended to preserve equality between the adjusted basis of a partner's interest in a partnership (outside basis) and such partner's share of the adjusted basis in partnership assets (inside basis). However, in situations where a section 754 election was not in effect for the year in which a partner acquired its interest, the partner's inside basis and outside basis may not be equal. Similarly, in situations where a section 754 election was not in effect for the year in which a partnership distributes money or other property to another partner and that partner recognizes gain or loss on the distribution or the basis of the property distributed to that partner is adjusted, the remaining partners' inside basis and outside basis may not be equal. In these situations, gain or loss allocated to the partner upon disposition of the partnership assets that is attributable to the difference between the adjusted basis of the partnership assets absent the section 754 election and the adjusted basis of the partnership assets had a section 754 election been in effect generally will result in an adjustment to the basis of the partner's interest in the partnership under section 705(a). Such gain (or loss) therefore generally will be offset

by a corresponding decrease in the gain or increase in the loss (or increase in the gain or decrease in the loss) upon the subsequent disposition by the partner of its interest in the partnership. Where such a difference exists with respect to stock of a corporate partner that is held by the partnership, gain or loss from the disposition of corporate partner stock attributable to the difference is not recognized by the corporate partner under section 1032. To adjust the basis of the corporate partner's interest in the partnership for this unrecognized gain or loss would not be appropriate because it would create an opportunity for the recognition of taxable gain or loss on a subsequent disposition of the partnership interest where no economic gain or loss has been incurred by the corporate partner and no corresponding taxable gain or loss had previously been allocated to the corporate partner by the partnership.

(b) *Single partnership*—(1) *Required adjustments relating to acquisitions of partnership interest.* (i) This paragraph (b)(1) applies in situations where a corporation acquires an interest in a partnership that holds stock in that corporation (or the partnership subsequently acquires stock in that corporation in an exchanged basis transaction), the partnership does not have an election under section 754 in effect for the year in which the corporation acquires the interest, and the partnership later sells or exchanges the stock. In these situations, the increase (or decrease) in the corporation's adjusted basis in its partnership interest resulting from the sale or exchange of the stock equals the amount of gain (or loss) that the corporate partner would have recognized (absent the application of section 1032) if, for the year in which the corporation acquired the interest, a section 754 election had been in effect.

(ii) The provisions of this paragraph (b)(1) are illustrated by the following example:

*Example.* (i) A, B, and C form equal partnership PRS. Each partner contributes \$30,000 in exchange for its partnership interest. PRS has no liabilities. PRS purchases stock in corporation X for \$30,000, which appreciates in value to \$120,000. PRS also purchases inventory for \$60,000, which appreciates in value to \$150,000. A sells its interest in PRS

to corporation X for \$90,000 in a year for which an election under section 754 is not in effect. PRS later sells the X stock for \$150,000. PRS realizes a gain of \$120,000 on the sale of the X stock. X's share of the gain is \$40,000. Under section 1032, X does not recognize its share of the gain.

(ii) Normally, X would be entitled to a \$40,000 increase in the basis of its PRS interest for its allocable share of PRS's gain from the sale of the X stock, but a special rule applies in this situation. If a section 754 election had been in effect for the year in which X acquired its interest in PRS, X would have been entitled to a basis adjustment under section 743(b) of \$60,000 (the excess of X's basis for the transferred partnership interest over X's share of the adjusted basis to PRS of PRS's property). See § 1.743-1(b). Under § 1.755-1(b), the basis adjustment under section 743(b) would have been allocated \$30,000 to the X stock (the amount of the gain that would have been allocated to X from the hypothetical sale of the stock), and \$30,000 to the inventory (the amount of the gain that would have been allocated to X from the hypothetical sale of the inventory).

(iii) If a section 754 election had been in effect for the year in which X acquired its interest in PRS, the amount of gain that X would have recognized upon PRS's disposition of X stock (absent the application of section 1032) would be \$10,000 (X's share of PRS's gain from the stock sale, \$40,000, minus the amount of X's basis adjustment under section 743(b), \$30,000). See § 1.743-1(j). Accordingly, the increase in the basis of X's interest in PRS is \$10,000.

(2) *Required adjustments relating to distributions.* (i) This paragraph (b)(2) applies in situations where a corporation owns a direct or indirect interest in a partnership that owns stock in that corporation, the partnership distributes money or other property to another partner and that partner recognizes gain or loss on the distribution or the basis of the property distributed to that partner is adjusted during a year in which the partnership does not have an election under section 754 in effect, and the partnership subsequently sells or exchanges the stock. In these situations, the increase (or decrease) in the corporation's adjusted basis in its partnership interest resulting from the sale or exchange of the stock equals the amount of gain (or loss) that the corporate partner would have recognized (absent the application of section 1032) if, for the year in which the partnership made the distribution, a section 754 election had been in effect.

(ii) The provisions of this paragraph (b)(2) are illustrated by the following example:

*Example.* (i) A, B, and corporation C form partnership PRS. A and B each contribute \$10,000 and C contributes \$20,000 in exchange for a partnership interest. PRS has no liabilities. PRS purchases stock in corporation C for \$10,000, which appreciates in value to \$70,000. PRS distributes \$25,000 to A in complete liquidation of A's interest in PRS in a year for which an election under section 754 is not in effect. PRS later sells the C stock for \$70,000. PRS realizes a gain of \$60,000 on the sale of the C stock. C's share of the gain is \$40,000. Under section 1032, C does not recognize its share of the gain.

(ii) Normally, C would be entitled to a \$40,000 increase in the basis of its PRS interest for its allocable share of PRS's gain from the sale of the C stock, but a special rule applies in this situation. If a section 754 election had been in effect for the year in which PRS made the distribution to A, PRS would have been entitled to adjust the basis of partnership property under section 734(b)(1)(A) by \$15,000 (the amount of gain recognized by A with respect to the distribution to A under section 731(a)(1)). See § 1.734-1(b). Under § 1.755-1(c)(1)(ii), the basis adjustment under section 734(b) would have been allocated to the C stock, increasing its basis to \$25,000 (where there is a distribution resulting in an adjustment under section 734(b)(1)(A) to the basis of undistributed partnership property, the adjustment is allocated only to capital gain property).

(iii) If a section 754 election had been in effect for the year in which PRS made the distribution to A, the amount of gain that PRS would have recognized upon PRS's disposition of C stock would be \$45,000 (\$70,000 minus \$25,000 basis in the C stock), and the amount of gain C would have recognized upon PRS's disposition of the C stock (absent the application of section 1032) would be \$30,000 (C's share of PRS's gain of \$45,000 from the stock sale). Accordingly, upon PRS's sale of the C stock, the increase in the basis of C's interest in PRS is \$30,000.

(c) *Tiered partnerships and other arrangements*—(1) *Required adjustments.* The purpose of these regulations as set forth in paragraph (a) of this section cannot be avoided through the use of tiered partnerships or other arrangements. For example, if a corporation acquires an indirect interest in its own stock through a chain of two or more partnerships (either where the corporation acquires a direct interest in a partnership or where one of the partnerships in the chain acquires an inter-

est in another partnership), and gain or loss from the sale or exchange of the stock is subsequently allocated to the corporation, then the bases of the interests in the partnerships included in the chain shall be adjusted in a manner that is consistent with the purpose of this section. Similarly, if a corporation owns an indirect interest in its own stock through a chain of two or more partnerships, and a partnership in the chain distributes money or other property to another partner and that partner recognizes gain or loss on the distribution or the basis of the property distributed to that partner is adjusted during a year in which the partnership does not have an election under section 754 in effect, then upon any subsequent sale or exchange of the stock, the bases of the interests in the partnerships included in the chain shall be adjusted in a manner that is consistent with the purpose of this section.

(2) *Examples.* The provisions of this paragraph (c) are illustrated by the following examples:

*Example 1. Acquisition of upper-tier partnership interest by corporation.* (i) A, B, and C form a partnership (UTP), with each partner contributing \$25,000. UTP and D form a partnership (LTP). UTP contributes \$75,000 in exchange for its interest in LTP, and D contributes \$25,000 in exchange for D's interest in LTP. Neither UTP nor LTP has any liabilities. LTP purchases stock in corporation E for \$100,000, which appreciates in value to \$1,000,000. C sells its interest in UTP to corporation E for \$250,000 in a year for which an election under section 754 is not in effect for UTP or LTP. LTP later sells the E stock for \$2,000,000. LTP realizes a \$1,900,000 gain on the sale of the E stock. UTP's share of the gain is \$1,425,000, and E's share of the gain is \$475,000. Under section 1032, E does not recognize its share of the gain.

(ii) With respect to the basis of UTP's interest in LTP, if all of the gain from the sale of the E stock (including E's share) were to increase the basis of UTP's interest in LTP, UTP's basis in such interest would be \$1,500,000 (\$75,000 + \$1,425,000). The fair market value of UTP's interest in LTP is \$1,500,000. Because UTP did not have a section 754 election in effect for the taxable year in which E acquired its interest in UTP, UTP's basis in the LTP interest does not reflect the purchase price paid by E for its interest. Increasing the basis of UTP's interest in LTP by the full amount of the gain that would be recognized (in the absence of section 1032) on the sale of the E stock preserves the conformity between UTP's inside basis

and outside basis with respect to LTP (i.e., UTP's share of LTP's cash is equal to \$1,500,000, and UTP's basis in the LTP interest is \$1,500,000) and appropriately would cause UTP to recognize no gain or loss on the sale of UTP's interest in LTP immediately after the sale of the E stock. Accordingly, increasing the basis of UTP's interest in LTP by the entire amount of gain allocated to UTP (including E's share) from LTP's sale of the E stock is consistent with the purpose of this section. The \$1,425,000 of gain allocated by LTP to UTP will increase the adjusted basis of UTP's interest in LTP under section 705(a)(1). The basis of UTP's interest in LTP immediately after the sale of the E stock is \$1,500,000.

(iii) With respect to the basis of E's interest in UTP, if E's share of the gain allocated to UTP and then to E were to increase the basis of E's interest in UTP, E's basis in such interest would be \$725,000 (\$250,000 + \$475,000) and the fair market value of such interest would be \$500,000, so that E would recognize a loss of \$225,000 if E sold its interest in UTP immediately after LTP's disposition of the E stock. It would be inappropriate for E to recognize a taxable loss of \$225,000 upon a disposition of its interest in UTP because E would not incur an economic loss in the transaction, and E did not recognize a taxable gain upon LTP's disposition of the E stock that appropriately would be offset by a taxable loss on the disposition of its interest in UTP. Accordingly, increasing E's basis in its UTP interest by the entire amount of gain allocated to E from the sale of the E stock is not consistent with the purpose of this section. (Conversely, because A and B were allocated taxable gain on the disposition of the E stock, it would be appropriate to increase A's and B's bases in their respective interests in UTP by the full amount of the gain allocated to them.)

(iv) The appropriate basis adjustment for E's interest in UTP upon the disposition of the E stock by LTP can be determined as the amount of gain that E would have recognized (in the absence of section 1032) upon the sale by LTP of the E stock if both UTP and LTP had made section 754 elections for the taxable year in which E acquired the interest in UTP. If section 754 elections had been in effect for UTP and LTP for the year in which E acquired E's interest in UTP, the following would occur. E would be entitled to a \$225,000 positive basis adjustment under section 743(b) with respect to the property of UTP. The entire basis adjustment would be allocated to UTP's only asset, its interest in LTP. In addition, the sale of C's interest in UTP would be treated as a deemed sale of E's share of UTP's interest in LTP for purposes of sections 754 and 743. The deemed selling price of E's share of UTP's interest in LTP would be \$250,000 (E's share of UTP's adjusted basis in LTP, \$25,000, plus E's basis adjust-

ment under section 743(b) with respect to the assets of UTP, \$225,000). The deemed sale of E's share of UTP's interest in LTP would trigger a basis adjustment under section 743(b) of \$225,000 with respect to the assets of LTP (the excess of E's share of UTP's adjusted basis in LTP, including E's basis adjustment (\$225,000), \$250,000, over E's share of the adjusted basis of LTP's property, \$25,000). This \$225,000 adjustment by LTP would be allocated to LTP's only asset, the E stock, and would be segregated and allocated solely to E. The amount of LTP's gain from the sale of the E stock (before considering section 743(b)) would be \$1,900,000. E's share of this gain, \$475,000, would be offset in part by the \$225,000 basis adjustment under section 743(b), so that E would recognize gain equal to \$250,000 in the absence of section 1032.

(v) If the basis of E's interest in UTP were increased by \$250,000, the total basis of E's interest would equal \$500,000. This would conform to E's share of UTP's basis in the LTP interest (\$1,500,000 $\times$ 1/3=\$500,000) as well as E's indirect share of the cash held by LTP ((1/3 $\times$ 3/4) $\times$ \$2,000,000=\$500,000). Such a basis adjustment does not create the opportunity for the recognition of an inappropriate loss by E on a subsequent disposition of E's interest in UTP and is consistent with the purpose of this section. Accordingly, under this paragraph (c), of the \$475,000 gain allocated to E, only \$250,000 will apply to increase the adjusted basis of E in UTP under section 705(a)(1). E's adjusted basis in its UTP interest following the sale of the E stock is \$500,000.

*Example 2. Acquisition of lower-tier partnership interest by upper-tier partnership.* (i) A, corporation B, and C form an equal partnership (UTP), with each partner contributing \$100,000. D, E, and F also form an equal partnership (LTP), with each partner contributing \$30,000. LTP purchases stock in corporation B for \$90,000, which appreciates in value to \$900,000. LTP has no liabilities. UTP purchases D's interest in LTP for \$300,000. LTP does not have an election under section 754 in effect for the taxable year of UTP's purchase. LTP later sells the B stock for \$900,000. UTP's share of the gain is \$270,000, and B's share of that gain is \$90,000. Under section 1032, B does not recognize its share of the gain.

(ii) With respect to the basis of UTP's interest in LTP, if all of the gain from the sale of the B stock (including B's share) were to increase the basis of UTP's interest in LTP, UTP's basis in the LTP interest would be \$570,000 (\$300,000 + \$270,000), and the fair market value of such interest would be \$300,000, so that B would be allocated a loss of \$90,000 ((\$570,000 - \$300,000) $\times$ 1/3) if UTP sold its interest in LTP immediately after LTP's disposition of the B stock. It would be inappropriate for B to recognize a taxable loss of \$90,000 upon a disposition of UTP's interest

in LTP. B would not incur an economic loss in the transaction, and B was not allocated a taxable gain upon LTP's disposition of the B stock that appropriately would be offset by a taxable loss on the disposition of UTP's interest in LTP. Accordingly, increasing UTP's basis in its LTP interest by the gain allocated to B from the sale of the B stock is not consistent with the purpose of this section. (Conversely, because E and F were allocated taxable gain on the disposition of the B stock, it would be appropriate to increase E's and F's bases in their respective interests in LTP by the full amount of such gain.)

(iii) The appropriate basis adjustment for UTP's interest in LTP upon the disposition of the B stock by LTP can be determined as the amount of gain that UTP would have recognized (in the absence of section 1032) upon the sale by LTP of the B stock if the portion of the gain allocated to UTP that subsequently is allocated to B were determined as if LTP had made an election under section 754 for the taxable year in which UTP acquired its interest in LTP. If a section 754 election had been in effect for LTP for the year in which UTP acquired its interest in LTP, then with respect to B, the following would occur. UTP would be entitled to a \$90,000 positive basis adjustment under section 743(b), allocable to B, in the property of LTP. The entire basis adjustment would be allocated to LTP's only asset, its B stock. The amount of LTP's gain from the sale of the B stock (before considering section 743(b)) would be \$810,000. UTP's share of this gain, \$270,000, would be offset, in part, by the basis adjustment under section 743(b), so that UTP would recognize gain equal to \$180,000.

(iv) If the basis of UTP's interest in LTP were increased by \$180,000, the total basis of UTP's partnership interest would equal \$480,000. This would conform to the sum of UTP's share of the cash held by LTP ( $(1/3 \times \$900,000 = \$300,000)$ ) and the taxable gain recognized by A and C on the disposition of the B stock that appropriately may be offset on the disposition of their interests in UTP ( $\$90,000 + \$90,000 = \$180,000$ ). Such a basis adjustment does not inappropriately create the opportunity for the allocation of a loss to B on a subsequent disposition of UTP's interest in LTP and is consistent with the purpose of this section. Accordingly, of the \$270,000 gain allocated to UTP, only \$180,000 will apply to increase the adjusted basis of UTP in LTP under section 705(a)(1). Such \$180,000 basis increase must be segregated and allocated \$90,000 each to solely A and C. UTP's adjusted basis in its LTP interest following the sale of the B stock is \$480,000.

(v) With respect to B's interest in UTP, if B's share of the gain allocated to UTP and then to B were to increase the basis of B's interest in UTP, B would have a UTP partnership interest with an adjusted basis of

\$190,000 ( $\$100,000 + \$90,000$ ) and a value of \$100,000, so that B would recognize a loss of \$90,000 if B sold its interest in UTP immediately after LTP's disposition of the B stock. It would be inappropriate for B to recognize a taxable loss of \$90,000 upon a disposition of its interest in UTP because B would not incur an economic loss in the transaction, and B did not recognize a taxable gain upon LTP's disposition of the B stock that appropriately would be offset by a taxable loss on the disposition of its interest in UTP. Accordingly, increasing B's basis in its UTP interest by the gain allocated to B from the sale of the B stock is not consistent with the purpose of this section. (Conversely, because A and C were allocated taxable gain on the disposition of the B stock that is a result of LTP not having a section 754 election in effect, it would be appropriate for A and C to recognize an offsetting taxable loss on the disposition of A's and C's interests in UTP. Accordingly, it would be appropriate to increase A's and C's bases in their respective interests in UTP by the amount of gain recognized by A and C.)

(vi) The appropriate basis adjustment for B's interest in UTP upon the disposition of the B stock by LTP can be determined as the amount of gain that B would have recognized (in the absence of section 1032) upon the sale by LTP of the B stock if the portion of the gain allocated to UTP that is subsequently allocated to B were determined as if LTP had made an election under section 754 for the taxable year in which UTP acquired its interest in LTP. If a section 754 election had been in effect for LTP for the year in which UTP acquired its interest in LTP, then with respect to B, the following would occur. UTP would be entitled to a basis adjustment under section 743(b) in the property of LTP of \$90,000 with respect to B. The entire basis adjustment would be allocated to LTP's only asset, its B stock. The amount of LTP's gain from the sale of the B stock (before considering section 743(b)) would be \$810,000. UTP's share of this gain, \$270,000, would be offset, in part, by the \$90,000 basis adjustment under section 743(b), so that UTP would recognize gain equal to \$180,000. The \$90,000 basis adjustment would completely offset the gain that otherwise would be allocated to B.

(vii) If no gain were allocated to B so that the basis of B's interest in UTP was not increased, the total basis of B's interest would equal \$100,000. This would conform to B's share of UTP's basis in the LTP interest ( $(\$480,000 - \$180,000)$  (i.e., A's and C's share of the basis that should offset taxable gain recognized as a result of LTP's failure to have a section 754 election)  $\times 1/3 = \$100,000$ ) as well as B's indirect share of the cash held by LTP ( $((1/3 \times 1/3) \times \$900,000 = \$100,000)$ ). Such a basis adjustment does not create the opportunity for the recognition of an inappropriate loss by B on a subsequent disposition of B's interest in

UTP and is consistent with the purpose of this section. Accordingly, under this paragraph (c), of the \$90,000 gain allocated to B, none will apply to increase the adjusted basis of B in UTP under section 705(a)(1). B's adjusted basis in its UTP interest following the sale of the B stock is \$100,000.

(viii) Immediately after LTP's disposition of the B stock, UTP sells its interest in LTP for \$300,000. UTP's adjusted basis in its LTP interest is \$480,000, \$180,000 of which must be allocated \$90,000 each to A and C. Accordingly, upon UTP's sale of its interest in LTP, UTP realizes \$180,000 of loss, and A and C in turn each realize \$90,000 of loss.

(d) *Positions in Stock.* For purposes of this section, stock includes any position in stock to which section 1032 applies.

(e) *Effective date.* This section applies to gain or loss allocated with respect to sales or exchanges of stock occurring after December 6, 1999, except that paragraph (d) of this section is applicable with respect to sales or exchanges of stock occurring on or after March 29, 2002, and the fourth sentence of paragraph (a), paragraph (b)(2), and the third sentence of paragraph (c)(1) of this section are applicable with respect to sales or exchanges of stock occurring on or after March 18, 2003.

[T.D. 8986, 67 FR 15114, Mar. 29, 2002, as amended by T.D. 9049, 68 FR 12816, Mar. 18, 2003]

**§ 1.706-1 Taxable years of partner and partnership.**

(a) *Year in which partnership income is includible.* (1) In computing taxable income for a taxable year, a partner is required to include the partner's distributive share of partnership items set forth in section 702 and the regulations thereunder for any partnership taxable year ending within or with the partner's taxable year. A partner must also include in taxable income for a taxable year guaranteed payments under section 707(c) that are deductible by the partnership under its method of accounting in the partnership taxable year ending within or with the partner's taxable year.

(2) The rules of this paragraph (a)(1) may be illustrated by the following example:

*Example.* Partner A reports income using a calendar year, while the partnership of which A is a member reports its income

using a fiscal year ending May 31. The partnership reports its income and deductions under the cash method of accounting. During the partnership taxable year ending May 31, 2002, the partnership makes guaranteed payments of \$120,000 to A for services and for the use of capital. Of this amount, \$70,000 was paid to A between June 1 and December 31, 2001, and the remaining \$50,000 was paid to A between January 1 and May 31, 2002. The entire \$120,000 paid to A is includible in A's taxable income for the calendar year 2002 (together with A's distributive share of partnership items set forth in section 702 for the partnership taxable year ending May 31, 2002).

(3) If a partner receives distributions under section 731 or sells or exchanges all or part of a partnership interest, any gain or loss arising therefrom does not constitute partnership income.

(b) *Taxable year*—(1) *Partnership treated as a taxpayer.* The taxable year of a partnership must be determined as though the partnership were a taxpayer.

(2) *Partnership's taxable year*—(i) *Required taxable year.* Except as provided in paragraph (b)(2)(ii) of this section, the taxable year of a partnership must be—

(A) The majority interest taxable year, as defined in section 706(b)(4);

(B) If there is no majority interest taxable year, the taxable year of all of the principal partners of the partnership, as defined in 706(b)(3) (the principal partners' taxable year); or

(C) If there is no majority interest taxable year or principal partners' taxable year, the taxable year that produces the least aggregate deferral of income as determined under paragraph (b)(3) of this section.

(ii) *Exceptions.* A partnership may have a taxable year other than its required taxable year if it makes an election under section 444, elects to use a 52-53-week taxable year that ends with reference to its required taxable year or a taxable year elected under section 444, or establishes a business purpose for such taxable year and obtains approval of the Commissioner under section 442.

(3) *Least aggregate deferral*—(i) *Taxable year that results in the least aggregate deferral of income.* The taxable year that results in the least aggregate deferral of income will be the taxable year of one or more of the partners in

the partnership which will result in the least aggregate deferral of income to the partners. The aggregate deferral for a particular year is equal to the sum of the products determined by multiplying the month(s) of deferral for each partner that would be generated by that year and each partner's interest in partnership profits for that year. The partner's taxable year that produces the lowest sum when compared to the other partner's taxable years is the taxable year that results in the least aggregate deferral of income to the partners. If the calculation results in more than one taxable year qualifying as the taxable year with the least aggregate deferral, the partnership may select any one of those taxable years as its taxable year. However, if one of the qualifying taxable years is also the partnership's existing taxable year, the partnership must maintain its existing taxable year. The determination of the taxable year that results in the least aggregate deferral of income generally must be made as of the beginning of the partnership's current taxable year. The director, however, may determine that the first day of the current taxable year is not the appropriate testing day and require the use of some other day or period that will more accurately reflect the ownership of the partnership and thereby the actual aggregate deferral to the partners where the partners engage in a transaction that has as its principal purpose the avoidance of the principles of this section. Thus, for example the preceding sentence would apply where there is a transfer of an interest in the partnership that results in a temporary transfer of that interest principally for purposes of qualifying for a specific

taxable year under the principles of this section. For purposes of this section, deferral to each partner is measured in terms of months from the end of the partnership's taxable year forward to the end of the partner's taxable year.

(ii) *Determination of the taxable year of a partner or partnership that uses a 52-53-week taxable year.* For purposes of the calculation described in paragraph (b)(3)(i) of this section, the taxable year of a partner or partnership that uses a 52-53-week taxable year must be the same year determined under the rules of section 441(f) and the regulations thereunder with respect to the inclusion of income by the partner or partnership.

(iii) *Special de minimis rule.* If the taxable year that results in the least aggregate deferral produces an aggregate deferral that is less than .5 when compared to the aggregate deferral of the current taxable year, the partnership's current taxable year will be treated as the taxable year with the least aggregate deferral. Thus, the partnership will not be permitted to change its taxable year.

(iv) *Examples.* The principles of this section may be illustrated by the following examples:

*Example 1.* Partnership P is on a fiscal year ending June 30. Partner A reports income on the fiscal year ending June 30 and Partner B reports income on the fiscal year ending July 31. A and B each have a 50 percent interest in partnership profits. For its taxable year beginning July 1, 1987, the partnership will be required to retain its taxable year since the fiscal year ending June 30 results in the least aggregate deferral of income to the partners. This determination is made as follows:

Test 6/30	Year end	Interest in partnership profits	Months of deferral for 6/30 year end	Interest× deferral
Partner A .....	6/30	.5	0	0
Partner B .....	7/31	.5	1	.5
Aggregate deferral .....				.5
Test 7/31	Year end	Interest in partnership profits	Months of deferral for 7/31 year end	Interest× deferral
Partner A .....	6/30	.5	11	5.5
Partner B .....	7/31	.5	0	0
Aggregate deferral .....				5.5

§ 1.706-1

26 CFR Ch. I (4-1-14 Edition)

*Example 2.* The facts are the same as in *Example 1* except that A reports income on the calendar year and B reports on the fiscal year ending November 30. For the partnership's taxable year beginning July 1, 1987,

the partnership is required to change its taxable year to a fiscal year ending November 30 because such year results in the least aggregate deferral of income to the partners. This determination is made as follows:

Test 12/31	Year end	Interest in partnership profits	Months of deferral for 12/31 year end	Interest× deferral
Partner A .....	12/31	.5	0	0
Partner B .....	11/30	.5	11	5.5
Aggregate deferral .....				5.5

  

Test 11/30	Year end	Interest in partnership profits	Months of deferral for 11/30 year end	Interest× deferral
Partner A .....	12/31	.5	1	.5
Partner B .....	11/30	.5	0	0
Aggregate deferral .....				.5

*Example 3.* The facts are the same as in *Example 2* except that B reports income on the fiscal year ending June 30. For the partnership's taxable year beginning July 1, 1987, each partner's taxable year will result in identical aggregate deferral of income. If the partnership's current taxable year was neither a fiscal year ending June 30 nor the cal-

endar year, the partnership would select either the fiscal year ending June 30 or the calendar year as its taxable year. However, since the partnership's current taxable year ends June 30, it must retain its current taxable year. The determination is made as follows:

Test 12/31	Year end	Interest in partnership profits	Months of deferral for 12/31 year end	Interest× deferral
Partner A .....	12/31	.5	0	0
Partner B .....	6/30	.5	6	3.0
Aggregate deferral .....				3.0

  

Test 6/30	Year end	Interest in partnership profits	Months of deferral for 6/30 year end	Interest× deferral
Partner A .....	12/31	.5	6	3.0
Partner B .....	6/30	.5	0	0
Aggregate deferral .....				3.0

*Example 4.* The facts are the same as in *Example 1* except that on December 31, 1987, partner A sells a 4 percent interest in the partnership to Partner C, who reports income on the fiscal year ending June 30, and a 40 percent interest in the partnership to Partner D, who also reports income on the fiscal year ending June 30. The taxable year beginning July 1, 1987, is unaffected by the sale. However, for the taxable year beginning July 31, 1988, the partnership must determine the taxable year resulting in the least aggregate deferral as of July 1, 1988. In this case, the partnership will be required to retain its

taxable year since the fiscal year ending June 30 continues to be the taxable year that results in the least aggregate deferral of income to the partners.

*Example 5.* The facts are the same as in *Example 4* except that Partner D reports income on the fiscal year ending April 30. As in *Example 4*, the taxable year during which the sale took place is unaffected by the shifts in interests. However, for its taxable year beginning July 1, 1988, the partnership will be required to change its taxable year to the fiscal year ending April 30. This determination is made as follows:

## Internal Revenue Service, Treasury

## § 1.706-1

Test 7/31	Year end	Interest in partnership profits	Months of deferral for 7/31 year end	Interest× deferral
Partner A .....	6/30	.06	11	.66
Partner B .....	7/31	.5	0	0
Partner C .....	6/30	.04	11	.44
Partner D .....	4/30	.4	9	3.60
Aggregate deferral .....				4.70

  

Test 6/30	Year end	Interest in partnership profits	Months of deferral for 6/30 year end	Interest× deferral
Partner A .....	6/30	.06	0	0
Partner B .....	7/31	.5	1	.5
Partner C .....	6/30	.04	0	0
Partner D .....	4/30	.4	10	4.0
Aggregate deferral .....				4.5

  

Test 4/30	Year end	Interest in partnership profits	Months of deferral for 4/30 year end	Interest× deferral
Partner A .....	6/30	.06	2	.12
Partner B .....	7/31	.5	3	1.50
Partner C .....	6/30	.04	2	.08
Partner D .....	4/30	.4	0	0
Aggregate deferral .....				1.70

  

§ 1.706-1(b)(3) Test				
Current taxable year (June 30) .....				4.5
Less: Taxable year producing the least aggregate deferral (April 30) .....				1.7
Additional aggregate deferral (greater than .5) .....				2.8

*Example 6.* (i) Partnership P has two partners, A who reports income on the fiscal year ending March 31, and B who reports income on the fiscal year ending July 31. A and B share profits equally. P has determined its taxable year under paragraph (b)(3) of this section to be the fiscal year ending March 31 as follows:

Test 3/31	Year end	Interest in partnership profits	Deferral for 3/31 year end	Interest× deferral
Partner A .....	3/31	.5	0	0
Partner B .....	7/31	.5	4	2
Aggregate deferral .....				2

  

Test 7/31	Year end	Interest in partnership profits	Deferral for 7/31 year end	Interest× deferral
Partner A .....	3/31	.5	8	4
Partner B .....	7/31	.5	0	0
Aggregate deferral .....				4

(ii) In May 1988, Partner A sells a 45 percent interest in the partnership to C, who reports income on the fiscal year ending April 30. For the taxable period beginning April 1, 1989, the fiscal year ending April 30 is the taxable year that produces the least aggregate

deferral of income to the partners. However, under paragraph (b)(3)(iii) of this section the partnership is required to retain its fiscal year ending March 31. This determination is made as follows:

Test 3/31	Year end	Interest in partnership profits	Deferral for 3/31 year end	Interest× deferral
Partner A .....	3/31	.05	0	0
Partner B .....	7/31	.5	4	2.0
Partner C .....	4/30	.45	1	.45
Aggregate deferral .....				2.45

  

Test 7/31	Year end	Interest in partnership profits	Deferral for 7/31 year end	Interest× deferral
Partner A .....	3/31	.05	8	.40
Partner B .....	7/31	.5	0	0
Partner C .....	4/30	.45	9	4.05
Aggregate deferral .....				4.45

  

Test 4/30	Year end	Interest in partnership profits	Deferral for 4/30 year end	Interest× deferral
Partner A .....	3/31	.05	11	.55
Partner B .....	7/31	.5	3	1.50
Partner C .....	4/30	.45	0	0
Aggregate deferral .....				2.05

  

§ 1.706-1(b)(3) Test

Current taxable year (3/31) .....	2.45
Less: Taxable year producing the least aggregate deferral (4/30) .....	2.05
Additional aggregate deferral (less than .5) .....	.40

(4) *Measurement of partner's profits and capital interest—*

(i) *In general.* The rules of this paragraph (b)(4) apply in determining the majority interest taxable year, the principal partners' taxable year, and the least aggregate deferral taxable year.

(ii) *Profits interest—(A) In general.* For purposes of section 706(b), a partner's interest in partnership profits is generally the partner's percentage share of partnership profits for the current partnership taxable year. If the partnership does not expect to have net income for the current partnership taxable year, then a partner's interest in partnership profits instead must be the partner's percentage share of partnership net income for the first taxable year in which the partnership expects to have net income.

(B) *Percentage share of partnership net income.* The partner's percentage share of partnership net income for a partnership taxable year is the ratio of: the partner's distributive share of partnership net income for the taxable year, to

the partnership's net income for the year. If a partner's percentage share of partnership net income for the taxable year depends on the amount or nature of partnership income for that year (due to, for example, preferred returns or special allocations of specific partnership items), then the partnership must make a reasonable estimate of the amount and nature of its income for the taxable year. This estimate must be based on all facts and circumstances known to the partnership as of the first day of the current partnership taxable year. The partnership must then use this estimate in determining the partners' interests in partnership profits for the taxable year.

(C) *Distributive share.* For purposes of this paragraph (b)(4)(ii), a partner's distributive share of partnership net income is determined by taking into account all rules and regulations affecting that determination, including, without limitation, sections 704(b), (c), and (e), 736, and 743.

(iii) *Capital interest.* Generally, a partner's interest in partnership capital is determined by reference to the assets of the partnership that the partner would be entitled to upon withdrawal from the partnership or upon liquidation of the partnership. If the partnership maintains capital accounts in accordance with § 1.704-1(b)(2)(iv), then for purposes of section 706(b), the partnership may assume that a partner's interest in partnership capital is the ratio of the partner's capital account to all partners' capital accounts as of the first day of the partnership taxable year.

(5) *Taxable year of a partnership with tax-exempt partners—(i) Certain tax-exempt partners disregarded.* In determining the taxable year (the current year) of a partnership under section 706(b) and the regulations thereunder, a partner that is tax-exempt under section 501(a) shall be disregarded if such partner was not subject to tax, under chapter 1 of the Internal Revenue Code, on any income attributable to its investment in the partnership during the partnership's taxable year immediately preceding the current year. However, if a partner that is tax-exempt under section 501(a) was not a partner during the partnership's immediately preceding taxable year, such partner will be disregarded for the current year if the partnership reasonably believes that the partner will not be subject to tax, under chapter 1 of the Internal Revenue Code, on any income attributable to such partner's investment in the partnership during the current year.

(ii) *Example.* The provisions of paragraph (b)(5)(i) of this section may be illustrated by the following example:

*Example.* Assume that partnership A has historically used the calendar year as its taxable year. In addition, assume that A is owned by 5 partners, 4 calendar year individuals (each owning 10 percent of A's profits and capital) and a tax-exempt organization (owning 60 percent of A's profits and capital). The tax-exempt organization has never had unrelated business taxable income with respect to A and has historically used a June 30 fiscal year. Finally, assume that A desires to retain the calendar year for its taxable year beginning January 1, 2003. Under these facts and but for the special rule in paragraph (b)(5)(i) of this section, A would be required under section 706(b)(1)(B)(i) to change to a year ending June 30, for its taxable year

beginning January 1, 2003. However, under the special rule provided in paragraph (b)(5)(i) of this section the partner that is tax-exempt is disregarded, and A must retain the calendar year, under section 706(b)(1)(B)(i), for its taxable year beginning January 1.

(iii) *Effective date.* The provisions of this paragraph (b)(5) are applicable for taxable years beginning on or after July 23, 2002. For taxable years beginning before July 23, 2002, see § 1.706-3T as contained in 26 CFR part 1 revised April 1, 2002.

(6) *Certain foreign partners disregarded—(i) Interests of disregarded foreign partners not taken into account.* In determining the taxable year (the current taxable year) of a partnership under section 706(b) and the regulations thereunder, any interest held by a disregarded foreign partner is not taken into account. A foreign partner is a disregarded foreign partner unless such partner is allocated any gross income of the partnership that was effectively connected (or treated as effectively connected) with the conduct of a trade or business within the United States during the partnership's taxable year immediately preceding the current taxable year (or, if such partner was not a partner during the partnership's immediately preceding taxable year, the partnership reasonably believes that the partner will be allocated any such income during the current taxable year) and taxation of that income is not otherwise precluded under any U.S. income tax treaty.

(ii) *Definition of foreign partner.* For purposes of this paragraph (b)(6), a foreign partner is any partner that is not a U.S. person (as defined in section 7701(a)(30)), except that a partner that is a controlled foreign corporation (as defined in section 957(a)) or a foreign personal holding company (as defined in section 552) shall not be treated as a foreign partner.

(iii) *Minority interest rule.* If each partner that is not a disregarded foreign partner under paragraph (b)(6)(i) of this section (regarded partner) holds less than a 10-percent interest, and the regarded partners, in the aggregate, hold less than a 20-percent interest in the capital or profits of the partnership, then paragraph (b)(6)(i) of this section does not apply. In determining

ownership in a partnership for purposes of this paragraph (b)(6)(iii), each regarded partner is treated as owning any interest in the partnership owned by a related partner. For this purpose, partners are treated as related if they are related within the meaning of sections 267(b) or 707(b) (using the language “10 percent” instead of “50 percent” each place it appears). However, for purposes of determining if partners hold less than a 20-percent interest in the aggregate, the same interests will not be considered as being owned by more than one regarded partner.

(iv) *Example.* The provisions of paragraph (b)(6) of this section may be illustrated by the following example:

*Example.* Partnership B is owned by two partners, F, a foreign corporation that owns a 95-percent interest in the capital and profits of partnership B, and D, a domestic corporation that owns the remaining 5-percent interest in the capital and profits of partnership B. Partnership B is not engaged in the conduct of a trade or business within the United States, and, accordingly, partnership B does not earn any income that is effectively connected with a U.S. trade or business. F uses a March 31 fiscal year, and causes partnership B to maintain its books and records on a March 31 fiscal year as well. D is a calendar year taxpayer. Under paragraph (b)(6)(i) of this section, F would be disregarded and partnership B’s taxable year would be determined by reference to D. However, because D owns less than a 10-percent interest in the capital and profits of partnership B, the minority interest rule of paragraph (b)(6)(iii) of this section applies, and partnership B must adopt the March 31 fiscal year for Federal tax purposes.

(v) *Effective date—(A) Generally.* The provisions of this paragraph (b)(6) are applicable for the first taxable year of a partnership other than an existing partnership that begins on or after July 23, 2002. For this purpose, an existing partnership is a partnership that was formed prior to September 23, 2002.

(B) *Voluntary change in taxable year.* An existing partnership may change its taxable year to a year determined in accordance with this section. An existing partnership that makes such a change will cease to be exempted from the requirements of paragraph (b)(6) of this section.

(C) *Subsequent sale or exchange of interests.* If an existing partnership terminates under section 708(b)(1)(B), the re-

sulting partnership is not an existing partnership for purposes of paragraph (b)(6)(v)(A) of this section.

(D) *Transition rule.* If, in the first taxable year beginning on or after July 23, 2002, an existing partnership voluntarily changes its taxable year to a year determined in accordance with this paragraph (b)(6), then the partners of that partnership may apply the provisions of § 1.702-3T to take into account all items of income, gain, loss, deduction, and credit attributable to the partnership year of change ratably over a four-year period.

(7) *Adoption of taxable year.* A newly-formed partnership may adopt, in accordance with § 1.441-1(c), its required taxable year, a taxable year elected under section 444, or a 52-53-week taxable year ending with reference to its required taxable year or a taxable year elected under section 444 without securing the approval of the Commissioner. If a newly-formed partnership wants to adopt any other taxable year, it must establish a business purpose and secure the approval of the Commissioner under section 442.

(8) *Change in taxable year—(i) Partnerships-(A) Approval required.* An existing partnership may change its taxable year only by securing the approval of the Commissioner under section 442 or making an election under section 444. However, a partnership may obtain automatic approval for certain changes, including a change to its required taxable year, pursuant to administrative procedures published by the Commissioner.

(B) *Short period tax return.* A partnership that changes its taxable year must make its return for a short period in accordance with section 443, but must not annualize the partnership taxable income.

(C) *Change in required taxable year.* If a partnership is required to change to its majority interest taxable year, then no further change in the partnership’s required taxable year is required for either of the two years following the year of the change. This limitation against a second change within a three-year period applies only if the first change was to the majority interest taxable year and does not apply following a change in the partnership’s

taxable year to the principal partners' taxable year or the least aggregate deferral taxable year.

(ii) *Partners.* Except as otherwise provided in the Internal Revenue Code or the regulations thereunder (e.g., section 859 regarding real estate investment trusts or §1.442-2(c) regarding a subsidiary changing to its consolidated parent's taxable year), a partner may not change its taxable year without securing the approval of the Commissioner under section 442. However, certain partners may be eligible to obtain automatic approval to change their taxable years pursuant to the regulations or administrative procedures published by the Commissioner. A partner that changes its taxable year must make its return for a short period in accordance with section 443.

(9) *Retention of taxable year.* In certain cases, a partnership will be required to change its taxable year unless it obtains the approval of the Commissioner under section 442, or makes an election under section 444, to retain its current taxable year. For example, a partnership using a taxable year that corresponds to its required taxable year must obtain the approval of the Commissioner to retain such taxable year if its required taxable year changes as a result of a change in ownership, unless the partnership previously obtained approval for its current taxable year or, if appropriate, makes an election under section 444.

(10) *Procedures for obtaining approval or making a section 444 election.* See §1.442-1(b) for procedures to obtain the approval of the Commissioner (automatically or otherwise) to adopt, change, or retain a taxable year. See §§1.444-1T and 1.444-2T for qualifications, and §1.444-3T for procedures, for making an election under section 444.

(11) *Effect of partner elections under section 444—(i) Election taken into account.* For purposes of section 706(b)(1)(B), any section 444 election by a partner in a partnership shall be taken into account in determining the taxable year of the partnership. See §1.7519-1T(d), *Example (4)*.

(ii) *Effective date.* The provisions of this paragraph (b)(11) are applicable for taxable years beginning on or after July 23, 2002. For taxable years begin-

ning before July 23, 2002, see §1.706-3T as contained in 26 CFR part 1 revised April 1, 2002.

(c) *Closing of partnership year—(1) General rule.* Section 706(c) and this paragraph provide rules governing the closing of partnership years. The closing of a partnership taxable year or a termination of a partnership for Federal income tax purposes is not necessarily governed by the "dissolution", "liquidation", etc., of a partnership under State or local law. The taxable year of a partnership shall not close as the result of the death of a partner, the entry of a new partner, the liquidation of a partner's entire interest in the partnership (as defined in section 761(d)), or the sale or exchange of a partner's interest in the partnership, except in the case of a termination of a partnership and except as provided in subparagraph (2) of this paragraph. In the case of termination, the partnership taxable year closes for all partners as of the date of termination. See section 708(b) and paragraph (b) of §1.708-1.

(2) *Partner who retires or sells interest in partnership—(i) Disposition of entire interest.* A partnership taxable year shall close with respect to a partner who sells or exchanges his entire interest in a partnership, and with respect to a partner whose entire interest is liquidated. However, a partnership taxable year with respect to a partner who dies shall not close prior to the end of such partnership taxable year, or the time when such partner's interest (held by his estate or other successor) is liquidated or sold or exchanged, whichever is earlier. See subparagraph (3) of this paragraph.

(ii) *Inclusions in taxable income.* In the case of a sale, exchange, or liquidation of a partner's entire interest in a partnership, the partner shall include in his taxable income for his taxable year within or with which his membership in the partnership ends, his distributive share of items described in section 702(a), and any guaranteed payments under section 707(c), for his partnership taxable year ending with the date of such sale, exchange, or liquidation. In order to avoid an interim closing of the partnership books, such partner's distributive share of items described in

section 702(a) may, by agreement among the partners, be estimated by taking his pro rata part of the amount of such items he would have included in his taxable income had he remained a partner until the end of the partnership taxable year. The proration may be based on the portion of the taxable year that has elapsed prior to the sale, exchange, or liquidation, or may be determined under any other method that is reasonable. Any partner who is the transferee of such partner's interest shall include in his taxable income, as his distributive share of items described in section 702(a) with respect to the acquired interest, the pro rata part (determined by the method used by the transferor partner) of the amount of such items he would have included had he been a partner from the beginning of the taxable year of the partnership. The application of this subdivision may be illustrated by the following example:

*Example.* Assume that a partner selling his partnership interest on June 30, 1955, has an adjusted basis for his interest of \$5,000 on that date; that his pro rata share of partnership income up to June 30 is \$15,000; and that he sells his interest for \$20,000. Under the provisions of section 706(c)(2), the partnership year with respect to him closes at the time of the sale. The \$15,000 is includible in his income as his distributive share and, under section 705, it increases the basis of his partnership interest to \$20,000, which is also the selling price of his interest. Therefore, no gain is realized on the sale of his partnership interest. The purchaser of this partnership interest shall include in his income as his distributive share his pro rata part of partnership income for the remainder of the partnership taxable year.

(3) *Partner who dies.* (i) When a partner dies, the partnership taxable year shall not close with respect to such partner prior to the end of the partnership taxable year. The partnership taxable year shall continue both for the remaining partners and the decedent partner. Where the death of a partner results in the termination of the partnership, the partnership taxable year shall close for all partners on the date of such termination under section 708(b)(1)(A). See also paragraph (b)(1)(i)(b) of § 1.708-1 for the continuation of a 2-member partnership under certain circumstances after the death

of a partner. However, if the decedent partner's estate or other successor sells or exchanges its entire interest in the partnership, or if its entire interest is liquidated, the partnership taxable year with respect to the estate or other successor in interest shall close on the date of such sale or exchange, or the date of completion of the liquidation.

(ii) The last return of a decedent partner shall include only his share of partnership taxable income for any partnership taxable year or years ending within or with the last taxable year for such decedent partner (i. e., the year ending with the date of his death). The distributive share of partnership taxable income for a partnership taxable year ending after the decedent's last taxable year is includible in the return of his estate or other successor in interest. If the estate or other successor in interest of a partner continues to share in the profits or losses of the partnership business, the distributive share thereof is includible in the taxable year of the estate or other successor in interest within or with which the taxable year of the partnership ends. See also paragraph (a)(1)(ii) of § 1.736-1. Where the estate or other successor in interest receives distributions, any gain or loss on such distributions is includible in its gross income for its taxable year in which the distribution is made.

(iii) If a partner (or a retiring partner), in accordance with the terms of the partnership agreement, designates a person to succeed to his interest in the partnership after his death, such designated person shall be regarded as a successor in interest of the deceased for purposes of this chapter. Thus, where a partner designates his widow as the successor in interest, her distributive share of income for the taxable year of the partnership ending within or with her taxable year may be included in a joint return in accordance with the provisions of sections 2 and 6013(a) (2) and (3).

(iv) If, under the terms of an agreement existing at the date of death of a partner, a sale or exchange of the decedent partner's interest in the partnership occurs upon that date, then the taxable year of the partnership with respect to such decedent partner shall

close upon the date of death. See section 706(c)(2)(A)(i). The sale or exchange of a partnership interest does not, for the purpose of this rule, include any transfer of a partnership interest which occurs at death as a result of inheritance or any testamentary disposition.

(v) To the extent that any part of a distributive share of partnership income of the estate or other successor in interest of a deceased partner is attributable to the decedent for the period ending with the date of his death, such part of the distributive share is income in respect of the decedent under section 691. See section 691 and the regulations thereunder.

(vi) The provisions of this subparagraph may be illustrated by the following examples:

*Example 1.* B has a taxable year ending December 31 and is a member of partnership ABC, the taxable year of which ends on June 30. B dies on October 31, 1955. His estate (which as a new taxpayer may, under section 441 and the regulations thereunder, adopt any taxable year) adopts a taxable year ending October 31. The return of the decedent for the period January 1 to October 31, 1955, will include only his distributive share of taxable income of the partnership for its taxable year ending June 30, 1955. The distributive share of taxable income of the partnership for its taxable year ending June 30, 1956, arising from the interest of the decedent, will be includible in the return of the estate for its taxable year ending October 31, 1956. That part of the distributive share attributable to the decedent for the period ending with the date of his death (July 1 through October 31, 1955) is income in respect of a decedent under section 691.

*Example 2.* Assume the same facts as in example 1 of this subdivision, except that, prior to B's death, B and D had agreed that, upon B's death, D would purchase B's interest for \$10,000. When B dies on October 31, 1955, the partnership taxable year beginning July 1, 1955, closes with respect to him. Therefore, the return for B's last taxable year (January 1 to October 31, 1955) will include his distributive share of taxable income of the partnership for its taxable year ending June 30, 1955, plus his distributive share of partnership taxable income for the period July 1 to October 31, 1955. See subdivision (iv) of this subparagraph.

*Example 3.* H is a member of a partnership having a taxable year ending December 31. Both H and his wife W are on a calendar year and file joint returns. H dies on March 31, 1955. Administration of the estate is com-

pleted and the estate, including the partnership interest, is distributed to W as legatee on November 30, 1955. Such distribution by the estate is not a sale or exchange of H's partnership interest. No part of the taxable income of the partnership for the taxable year ending December 31, 1955, which is allocable to H, will be included in H's taxable income for his last taxable year (January 1 through March 31, 1955) or in the taxable income of H's estate for the taxable year April 1 through November 30, 1955. The distributive share of partnership taxable income for the full calendar year that is allocable to H will be includible in the taxable income of W for her taxable year ending December 31, 1955, and she may file a joint return under sections 2 and 6013(a)(3). That part of the distributive share attributable to the decedent for the period ending with the date of his death (January 1 through March 31, 1955) is income in respect of a decedent under section 691.

*Example 4.* M is a member of partnership JKM which operates on a calendar year. M and his wife S file joint returns for calendar years. In accordance with the partnership agreement, M designated S to succeed to his interest in the partnership upon his death. M, who had withdrawn \$10,000 from the partnership before his death, dies on October 20, 1955. S's distributive share of income for the taxable year 1955 is \$15,000 (\$10,000 of which represents the amount withdrawn by M). S shall include \$15,000 in her income, even though M received \$10,000 of this amount before his death. S may file a joint return with M for the year 1955 under sections 2 and 6013(a). That part of the \$15,000 distributive share attributable to the decedent for the period ending with the date of his death (January 1 through October 20, 1955) is income in respect of a decedent under section 691.

(4) *Disposition of less than entire interest.* If a partner sells or exchanges a part of his interest in a partnership, or if the interest of a partner is reduced, the partnership taxable year shall continue to its normal end. In such case, the partner's distributive share of items which he is required to include in his taxable income under the provisions of section 702(a) shall be determined by taking into account his varying interests in the partnership during the partnership taxable year in which such sale, exchange, or reduction of interest occurred.

(5) *Transfer of interest by gift.* The transfer of a partnership interest by gift does not close the partnership taxable year with respect to the donor. However, the income up to the date of gift attributable to the donor's interest

## § 1.706-2T

shall be allocated to him under section 704(e)(2).

(6) *Foreign taxes.* For rules relating to the treatment of foreign taxes paid or accrued by a partnership, see §1.901-2(f)(4)(i) and (f)(4)(ii).

(d) *Effective date.* The rules of this section are applicable for taxable years ending on or after May 17, 2002, except for paragraph (c), which applies for taxable years beginning after December 31, 1953.

## § 1.706-2T Temporary regulations; question and answer under the Tax Reform Act of 1984.

*Question 1:* For purposes of section 706(d), how is an otherwise deductible amount that is deferred under section 267(a)(2) treated?

*Answer 1:* In the year the deduction is allowed, the deduction will constitute an allocable cash basis item under section 706(d)(2)(B)(iv).

(Secs. 267(f)(2)(B), 706(d)(2)(B)(iv), 1502, and 7805, Internal Revenue Code of 1954 (98 Stat. 704, 26 U.S.C. 267; 98 Stat. 589, 26 U.S.C. 706; 68A Stat. 367, 26 U.S.C. 1502; 68A Stat. 917, 26 U.S.C. 7805))

- (b) Section 1.707-8 disclosure of certain information.

[T.D. 8439, 57 FR 44978, Sept. 30, 1992]

**§ 1.707-1 Transactions between partner and partnership.**

(a) *Partner not acting in capacity as partner.* A partner who engages in a transaction with a partnership other than in his capacity as a partner shall be treated as if he were not a member of the partnership with respect to such transaction. Such transactions include, for example, loans of money or property by the partnership to the partner or by the partner to the partnership, the sale of property by the partner to

the partnership, the purchase of property by the partner from the partnership, and the rendering of services by the partnership to the partner or by the partner to the partnership. Where a partner retains the ownership of property but allows the partnership to use such separately owned property for partnership purposes (for example, to obtain credit or to secure firm creditors by guaranty, pledge, or other agreement) the transaction is treated as one between a partnership and a partner not acting in his capacity as a partner. However, transfers of money or property by a partner to a partnership as contributions, or transfers of money or property by a partnership to a partner as distributions, are not transactions included within the provisions of this section. In all cases, the substance of the transaction will govern rather than its form. See paragraph (c)(3) of § 1.731-1.

(b) *Certain sales or exchanges of property with respect to controlled partnerships—(1) Losses disallowed.* (i) No deduction shall be allowed for a loss on a sale or exchange of property (other than an interest in the partnership, directly or indirectly, between a partnership and a partner who owns, directly or indirectly, more than 50 percent of the capital interest or profits interest in such partnership. A loss on a sale or exchange of property, directly or indirectly, between two partnerships in which the same persons own, directly or indirectly, more than 50 percent of the capital interest or profits interest in each partnership shall not be allowed.

(ii) If a gain is realized upon the subsequent sale or exchange by a transferee of property with respect to which a loss was disallowed under the provisions of subdivision (i) of this subparagraph, section 267(d) (relating to amount of gain where loss previously disallowed) shall apply as though the loss were disallowed under section 267(a)(1).

(2) *Gains treated as ordinary income.* Any gain recognized upon the sale or exchange, directly or indirectly, of property which, in the hands of the transferee immediately after the transfer, is property other than a capital asset, as defined in section 1221, shall

be ordinary income if the transaction is between a partnership and a partner who owns, directly or indirectly, more than 80 percent of the capital interest or profits interest in the partnership. This rule also applies where such a transaction is between partnerships in which the same persons own, directly or indirectly, more than 80 percent of the capital interest or profits interest in each partnership. The term *property other than a capital asset* includes (but is not limited to) trade accounts receivable, inventory, stock in trade, and depreciable or real property used in the trade or business.

(3) *Ownership of a capital or profits interest.* In determining the extent of the ownership by a partner, as defined in section 761(b), of his capital interest or profits interest in a partnership, the rules for constructive ownership of stock provided in section 267(c) (1), (2), (4), and (5) shall be applied for the purpose of section 707(b) and this paragraph. Under these rules, ownership of a capital or profits interest in a partnership may be attributed to a person who is not a partner as defined in section 761(b) in order that another partner may be considered the constructive owner of such interest under section 267(c). However, section 707(b)(1)(A) does not apply to a constructive owner of a partnership interest since he is not a partner as defined in section 761(b). For example, where trust T is a partner in the partnership ABT, and AW, A's wife, is the sole beneficiary of the trust, the ownership of a capital and profits interest in the partnership by T will be attributed to AW only for the purpose of further attributing the ownership of such interest to A. See section 267(c) (1) and (5). If A, B, and T are equal partners, then A will be considered as owning more than 50 percent of the capital and profits interest in the partnership, and losses on transactions between him and the partnership will be disallowed by section 707(b)(1)(A). However, a loss sustained by AW on a sale or exchange of property with the partnership would not be disallowed by section 707, but will be disallowed to the extent provided in paragraph (b) of § 1.267(b)-1. See section 267 (a) and (b), and the regulations thereunder.

(c) *Guaranteed payments.* Payments made by a partnership to a partner for services or for the use of capital are considered as made to a person who is not a partner, to the extent such payments are determined without regard to the income of the partnership. However, a partner must include such payments as ordinary income for his taxable year within or with which ends the partnership taxable year in which the partnership deducted such payments as paid or accrued under its method of accounting. See section 706(a) and paragraph (a) of § 1.706-1. Guaranteed payments are considered as made to one who is not a member of the partnership only for the purposes of section 61(a) (relating to gross income) and section 162(a) (relating to trade or business expenses). For a guaranteed payment to be a partnership deduction, it must meet the same tests under section 162(a) as it would if the payment had been made to a person who is not a member of the partnership, and the rules of section 263 (relating to capital expenditures) must be taken into account. This rule does not affect the deductibility to the partnership of a payment described in section 736(a)(2) to a retiring partner or to a deceased partner's successor in interest. Guaranteed payments do not constitute an interest in partnership profits for purposes of sections 706(b)(3), 707(b), and 708(b). For the purposes of other provisions of the internal revenue laws, guaranteed payments are regarded as a partner's distributive share of ordinary income. Thus, a partner who receives guaranteed payments for a period during which he is absent from work because of personal injuries or sickness is not entitled to exclude such payments from his gross income under section 105(d). Similarly, a partner who receives guaranteed payments is not regarded as an employee of the partnership for the purposes of withholding of tax at source, deferred compensation plans, etc. The provisions of this paragraph may be illustrated by the following examples:

*Example 1.* Under the ABC partnership agreement, partner A is entitled to a fixed annual payment of \$10,000 for services, without regard to the income of the partnership.

His distributive share is 10 percent. After deducting the guaranteed payment, the partnership has \$50,000 ordinary income. A must include \$15,000 as ordinary income for his taxable year within or with which the partnership taxable year ends (\$10,000 guaranteed payment plus \$5,000 distributive share).

*Example 2.* Partner C in the CD partnership is to receive 30 percent of partnership income as determined before taking into account any guaranteed payments, but not less than \$10,000. The income of the partnership is \$60,000, and C is entitled to \$18,000 (30 percent of \$60,000) as his distributive share. No part of this amount is a guaranteed payment. However, if the partnership had income of \$20,000 instead of \$60,000, \$6,000 (30 percent of \$20,000) would be partner C's distributive share, and the remaining \$4,000 payable to C would be a guaranteed payment.

*Example 3.* Partner X in the XY partnership is to receive a payment of \$10,000 for services, plus 30 percent of the taxable income or loss of the partnership. After deducting the payment of \$10,000 to partner X, the XY partnership has a loss of \$9,000. Of this amount, \$2,700 (30 percent of the loss) is X's distributive share of partnership loss and, subject to section 704(d), is to be taken into account by him in his return. In addition, he must report as ordinary income the guaranteed payment of \$10,000 made to him by the partnership.

*Example 4.* Assume the same facts as in example 3 of this paragraph, except that, instead of a \$9,000 loss, the partnership has \$30,000 in capital gains and no other items of income or deduction except the \$10,000 paid X as a guaranteed payment. Since the items of partnership income or loss must be segregated under section 702(a), the partnership has a \$10,000 ordinary loss and \$30,000 in capital gains. X's 30 percent distributive shares of these amounts are \$3,000 ordinary loss and \$9,000 capital gain. In addition, X has received a \$10,000 guaranteed payment which is ordinary income to him.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7891, 48 FR 20049, May 4, 1983]

#### **§ 1.707-2 Disguised payments for services. [Reserved]**

#### **§ 1.707-3 Disguised sales of property to partnership; general rules.**

(a) *Treatment of transfers as a sale—(1) In general.* Except as otherwise provided in this section, if a transfer of property by a partner to a partnership and one or more transfers of money or other consideration by the partnership to that partner are described in paragraph (b)(1) of this section, the trans-

fers are treated as a sale of property, in whole or in part, to the partnership.

(2) *Definition and timing of sale.* For purposes of §§ 1.707-3 through 1.707-5, the use of the term sale (or any variation of that word) to refer to a transfer of property by a partner to a partnership and a transfer of consideration by a partnership to a partner means a sale or exchange of that property, in whole or in part, to the partnership by the partner acting in a capacity other than as a member of the partnership, rather than a contribution and distribution to which sections 721 and 731, respectively, apply. A transfer that is treated as a sale under paragraph (a)(1) this section is treated as a sale for all purposes of the Internal Revenue Code (e.g., sections 453, 483, 1001, 1012, 1031 and 1274). The sale is considered to take place on the date that, under general principles of Federal tax law, the partnership is considered the owner of the property. If the transfer of money or other consideration from the partnership to the partner occurs after the transfer of property to the partnership; the partner and the partnership are treated as if, on the date of the sale, the partnership transferred to the partner an obligation to transfer to the partner money or other consideration.

(3) *Application of disguised sale rules.* If a person purports to transfer property to a partnership in a capacity as a partner, the rules of this section apply for purposes of determining whether the property was transferred in a disguised sale, even if it is determined after the application of the rules of this section that such person is not a partner. If after the application of the rules of this section to a purported transfer of property to a partnership, it is determined that no partnership exists because the property was actually sold, or it is otherwise determined that the contributed property is not owned by the partnership for tax purposes, the transferor of the property is treated as having sold the property to the person (or persons) that acquired ownership of the property for tax purposes.

(4) *Deemed terminations under section 708.* In applying the rules of this section, transfers resulting from a termination of a partnership under section 708(b)(1)(B) are disregarded.

(b) *Transfers treated as a sale*—(1) *In general.* A transfer of property (excluding money or an obligation to contribute money) by a partner to a partnership and a transfer of money or other consideration (including the assumption of or the taking subject to a liability) by the partnership to the partner constitute a sale of property, in whole or in part, by the partner to the partnership only if based on all the facts and circumstances—

(i) The transfer of money or other consideration would not have been made but for the transfer of property; and

(ii) In cases in which the transfers are not made simultaneously, the subsequent transfer is not dependent on the entrepreneurial risks of partnership operations.

(2) *Facts and circumstances.* The determination of whether a transfer of property by a partner to the partnership and a transfer of money or other consideration by the partnership to the partner constitute a sale, in whole or in part, under paragraph (b)(1) of this section is made based on all the facts and circumstances in each case. The weight to be given each of the facts and circumstances will depend on the particular case. Generally, the facts and circumstances existing on the date of the earliest of such transfers are the ones considered in determining whether a sale exists under paragraph (b)(1) of this section. Among the facts and circumstances that may tend to prove the existence of a sale under paragraph (b)(1) of this section are the following:

(i) That the timing and amount of a subsequent transfer are determinable with reasonable certainty at the time of an earlier transfer;

(ii) That the transferor has a legally enforceable right to the subsequent transfer;

(iii) That the partner's right to receive the transfer of money or other consideration is secured in any manner, taking into account the period during which it is secured;

(iv) That any person has made or is legally obligated to make contributions to the partnership in order to permit the partnership to make the transfer of money or other consideration;

(v) That any person has loaned or has agreed to loan the partnership the money or other consideration required to enable the partnership to make the transfer, taking into account whether any such lending obligation is subject to contingencies related to the results of partnership operations;

(vi) That a partnership has incurred or is obligated to incur debt to acquire the money or other consideration necessary to permit it to make the transfer, taking into account the likelihood that the partnership will be able to incur that debt (considering such factors as whether any person has agreed to guarantee or otherwise assume personal liability for that debt);

(vii) That the partnership holds money or other liquid assets, beyond the reasonable needs of the business, that are expected to be available to make the transfer (taking into account the income that will be earned from those assets);

(viii) That partnership distributions, allocation or control of partnership operations is designed to effect an exchange of the burdens and benefits of ownership of property;

(ix) That the transfer of money or other consideration by the partnership to the partner is disproportionately large in relationship to the partner's general and continuing interest in partnership profits; and

(x) That the partner has no obligation to return or repay the money or other consideration to the partnership, or has such an obligation but it is likely to become due at such a distant point in the future that the present value of that obligation is small in relation to the amount of money or other consideration transferred by the partnership to the partner.

(c) *Transfers made within two years presumed to be a sale*—(1) *In general.* For purposes of this section, if within a two-year period a partner transfers property to a partnership and the partnership transfers money or other consideration to the partner (without regard to the order of the transfers), the transfers are presumed to be a sale of the property to the partnership unless the facts and circumstances clearly establish that the transfers do not constitute a sale.

(2) *Disclosure of transfers made within two years.* Disclosure to the Internal Revenue Service in accordance with § 1.707-8 is required if—

(i) A partner transfers property to a partnership and the partnership transfers money or other consideration to the partner with a two-year period (without regard to the order of the transfers);

(ii) The partner treats the transfers other than as a sale for tax purposes; and

(iii) The transfer of money or other consideration to the partner is not presumed to be a guaranteed payment for capital under § 1.707-4(a)(1)(ii), is not a reasonable preferred return within the meaning of § 1.707-4(a)(3), and is not an operating cash flow distribution within the meaning of § 1.707-4(b)(2).

(d) *Transfers made more than two years apart presumed not to be a sale.* For purposes of this section, if a transfer of money or other consideration to a partner by a partnership and the transfer of property to the partnership by that partner are more than two years apart, the transfers are presumed not to be a sale of the property to the partnership unless the facts and circumstances clearly establish that the transfers constitute a sale.

(e) *Scope.* This section and §§ 1.707-4 through 1.707-9 apply to contributions and distributions of property described in section 707(a)(2)(A) and transfers described in section 707(a)(2)(B) of the Internal Revenue Code.

(f) *Examples.* The following examples illustrate the application of this section.

*Example 1. Treatment of simultaneous transfers as a sale.* A transfers property X to partnership AB on April 9, 1992, in exchange for an interest in the partnership. At the time of the transfer, property X has a fair market value of \$4,000,000 and an adjusted tax basis of \$1,200,000. Immediately after the transfer, the partnership transfers \$3,000,000 in cash to A. Assume that, under this section, the partnership's transfer of cash to A is treated as part of a sale of property X to the partnership. Because the amount of cash A receives on April 9, 1992, does not equal the fair market value of the property, A is considered to have sold a portion of property X with a value of \$3,000,000 to the partnership in exchange for the cash. Accordingly, A must recognize \$2,100,000 of gain (\$3,000,000 amount realized less \$900,000 adjusted tax basis

(\$1,200,000 multiplied by \$3,000,000/\$4,000,000)). Assuming A receives no other transfers that are treated as consideration for the sale of the property under this section, A is considered to have contributed to the partnership, in A's capacity as a partner, \$1,000,000 of the fair market value of the property with an adjusted tax basis of \$300,000.

*Example 2. Treatment of transfers at different times as a sale.* (i) The facts are the same as in *Example 1*, except that the \$3,000,000 is transferred to A one year after A's transfer of property X to the partnership. Assume that under this section the partnership's transfer of cash to A is treated as part of a sale of property X to the partnership. Assume also that the applicable Federal short-term rate for April, 1992, is 10 percent, compounded semiannually.

(ii) Under paragraph (a)(2) of this section, A and the partnership are treated as if, on April 9, 1992, A sold a portion of property X to the partnership in exchange for an obligation to transfer \$3,000,000 to A one year later. Section 1274 applies to this obligation because it does not bear interest and is payable more than six months after the date of the sale. As a result, A's amount realized from the receipt of the partnership's obligation will be the imputed principal amount of the partnership's obligation to transfer \$3,000,000 to A, which equals \$2,721,088 (the present value on April 9, 1992, of a \$3,000,000 payment due one year later, determined using a discount rate of 10 percent, compounded semiannually). Therefore, A's amount realized from the receipt of the partnership's obligation is \$2,721,088 (without regard to whether the sale is reported under the installment method). A is therefore considered to have sold only \$2,721,088 of the fair market value of property X. The remainder of the \$3,000,000 payment (\$278,912) is characterized in accordance with the provisions of section 1272. Accordingly, A must recognize \$1,904,761 of gain (\$2,721,088 amount realized less \$816,327 adjusted tax basis (\$1,200,000 multiplied by \$2,721,088/\$4,000,000)) on the sale of property X to the partnership. The gain is reportable under the installment method of section 453 if the sale is otherwise eligible. Assuming A receives no other transfers that are treated as consideration for the sale of property under this section, A is considered to have contributed to the partnership, in A's capacity as a partner, \$1,278,912 of the fair market value of property X with an adjusted tax basis of \$383,673.

*Example 3. Operation of presumption for transfers within two years.* (i) C transfers undeveloped land to the CD partnership in exchange for an interest in the partnership. The partnership intends to construct a building on the land. At the time the land is transferred to the partnership, it is unencumbered and has an adjusted tax basis of \$500,000 and a fair market value of

\$1,000,000. The partnership agreement provides that upon completing construction of the building the partnership will distribute \$900,000 to C.

(ii) If, within two years of C's transfer of land to the partnership, a transfer is made to C pursuant to the provision requiring a distribution upon completion of the building, the transfer is presumed to be, under paragraph (c) of this section, part of a sale of the land to the partnership. C may rebut the presumption that the transfer is part of a sale if the facts and circumstances clearly establish that—

(A) The transfer to C would have been made without regard to C's transfer of land to the partnership; or

(B) The partnership's obligation or ability to make this transfer to C depends, at the time of the transfer to the partnership, on the entrepreneurial risks of partnership operations.

(iii) For example, if the partnership will be able to fund the transfer of cash to C only to the extent that permanent loan proceeds exceed the cost of constructing the building, the fact that excess permanent loan proceeds will be available only if the cost to complete the building is significantly less than the amount projected by a reasonable budget would be evidence that the transfer to C is not part of a sale. Similarly, a condition that limits the amount of the permanent loan to the cost of constructing the building (and thereby limits the partnership's ability to make a transfer to C) unless all or a substantial portion of the building is leased would be evidence that the transfer to C is not part of a sale, if a significant risk exists that the partnership may not be able to lease the building to that extent. Another factor that may prove that the transfer of cash to C is not part of a sale would be that, at the time the land is transferred to the partnership, no lender has committed to make a permanent loan to fund the transfer of cash to C.

(iv) Facts indicating that the transfer of cash to C is not part of a sale, however, may be offset by other factors. An offsetting factor to restrictions on the permanent loan proceeds may be that the permanent loan is to be a recourse loan and certain conditions to the loan are likely to be waived by the lender because of the creditworthiness of the partners or the value of the partnership's other assets. Similarly, the factor that no lender has committed to fund the transfer of cash to C may be offset by facts establishing that the partnership is obligated to attempt to obtain such a loan and that its ability to obtain such a loan is not significantly dependent on the value that will be added by successful completion of the building, or that the partnership reasonably anticipates that it will have (and will utilize) an alternative source to fund the transfer of cash to

C if the permanent loan proceeds are inadequate.

*Example 4. Operation of presumption for transfers within two years.* E is a partner in the equal EF partnership. The partnership owns two parcels of unimproved real property (*parcels 1 and 2*). Parcels 1 and 2 are unencumbered. Parcel 1 has a fair market value of \$500,000, and parcel 2 has a fair market value of \$1,500,000. E transfers additional unencumbered, unimproved real property (*parcel 3*) with a fair market value of \$1,000,000 to the partnership in exchange for an increased interest in partnership profits of 66⅔ percent. Immediately after this transfer, the partnership sells parcel 1 for \$500,000 in a transaction not in the ordinary course of business. The partnership transfers the proceeds of the sale \$333,333 to E and \$166,667 to F in accordance with their respective partnership interests. The transfer of \$333,333 to E is presumed to be, in accordance with paragraph (c) of this section, a sale, in part, of parcel 3 to the partnership. However, the facts of this example clearly establish that \$250,000 of the transfer to E is not part of a sale of parcel 3 to the partnership because E would have been distributed \$250,000 from the sale of parcel 1 whether or not E had transferred parcel 3 to the partnership. The transfer to E exceeds by \$83,333 (\$333,333 minus \$250,000) the amount of the distribution that would have been made to E if E had not transferred parcel 3 to the partnership. Therefore, \$83,333 of the transfer is presumed to be part of a sale of a portion of parcel 3 to the partnership by E.

*Example 5. Operation of presumption for transfers more than two years apart.* (i) G transfers undeveloped land to the GH partnership in exchange for an interest in the partnership. At the time the land is transferred to the partnership, it is unencumbered and has an adjusted tax basis of \$500,000 and a fair market value of \$1,000,000. H contributes \$1,000,000 in cash in exchange for an interest in the partnership. Under the partnership agreement, the partnership is obligated to construct a building on the land. The projected construction cost is \$5,000,000, which the partnership plans to fund with its \$1,000,000 in cash and the proceeds of a construction loan secured by the land and improvements.

(ii) Shortly before G's transfer of the land to the partnership, the partnership secures commitments from lending institutions for construction and permanent financing. To obtain the construction loan, H guarantees completion of the building for a cost of \$5,000,000. The partnership is not obligated to reimburse or indemnify H if H must make payment on the completion guarantee. The permanent loan will be funded upon completion of the building, which is expected to occur two years after G's transfer of the land. The amount of the permanent loan is

to equal the lesser of \$5,000,000 or 80 percent of the appraised value of the improved property at the time the permanent loan is closed. Under the partnership agreement, the partnership is obligated to apply the proceeds of the permanent loan to retire the construction loan and to hold any excess proceeds for transfer to G 25 months after G's transfer of the land to the partnership. The appraised value of the improved property at the time the permanent loan is closed is expected to exceed \$5,000,000 only if the partnership is able to lease a substantial portion of the improvements by that time, and there is a significant risk that the partnership will not be able to achieve a satisfactory occupancy level. The partnership completes construction of the building for the projected cost of \$5,000,000 approximately two years after G's transfer of the land. Shortly thereafter, the permanent loan is funded in the amount of \$5,000,000. At the time of funding the land and building have an appraised value of \$7,000,000. The partnership transfers the \$1,000,000 excess permanent loan proceeds to G 25 months after G's transfer of the land to the partnership.

(iii) G's transfer of the land to the partnership and the partnership's transfer of \$1,000,000 to G occurred more than two years apart. In accordance with paragraph (d) of this section, those transfers are presumed not to be a sale unless the facts and circumstances clearly establish that the transfers constitute a sale of the property, in whole or part, to the partnership. The transfer of \$1,000,000 to G would not have been made but for G's transfer of the land to the partnership. In addition, at the time G transferred the land to the partnership, G had a legally enforceable right to receive a transfer from the partnership at a specified time an amount that equals the excess of the permanent loan proceeds over \$4,000,000. In this case, however, there was a significant risk that the appraised value of the property would be insufficient to support a permanent loan in excess of \$4,000,000 because of the risk that the partnership would not be able to achieve a sufficient occupancy level. Therefore, the facts of this example indicate that at the time G transferred the land to the partnership the subsequent transfer of \$1,000,000 to G depended on the entrepreneurial risks of partnership operations. Accordingly, G's transfer of the land to the partnership is not treated as part of a sale.

*Example 6. Rebuttal of presumption for transfers more than two years apart.* The facts are the same as in *Example 5*, except that the partnership is able to secure a commitment for a permanent loan in the amount of \$5,000,000 without regard to the appraised value of the improved property at the time the permanent loan is funded. Under these facts, at the time that G transferred the land to the partnership the subsequent transfer of

\$1,000,000 to G was not dependent on the entrepreneurial risks of partnership operations, because during the period before the permanent loan is funded, the permanent lender's obligation to make a loan in the amount necessary to fund the transfer is not subject to the contingencies related to the risks of partnership operations, and after the permanent loan is funded, the partnership holds liquid assets sufficient to make the transfer. Therefore, the facts and circumstances clearly establish that G's transfer of the land to the partnership is part of a sale.

*Example 7. Operation of presumption for transfers more than two years apart.* The facts are the same as in *Example 6*, except that H does not guarantee either that the improvements will be completed or that the cost to the partnership of completing the improvements will not exceed \$5,000,000. Under these facts, if there is a significant risk that the improvements will not be completed, G's transfer of the land to the partnership will not be treated as part of a sale because the lender is required to make the permanent loan if the improvements are not completed. Similarly, the transfers will not be treated as a sale to the extent that there is a significant risk that the cost of constructing the improvements will exceed \$5,000,000, because, in the absence of a guarantee of the cost of the improvements by H, the \$5,000,000 proceeds of the permanent loan might not be sufficient to retire the construction loan and fund the transfer to G. In either case, the transfer of cash to G would be dependent on the entrepreneurial risks of partnership operations.

*Example 8. Rebuttal of presumption for transfers more than two years apart.* (i) On February 1, 1992, I, J, and K form partnership IJK. On formation of the partnership, I transfers an unencumbered office building with a fair market value of \$50,000,000 and an adjusted tax basis of \$20,000,000 to the partnership, and J and K each transfer United States government securities with a fair market value and an adjusted tax basis of \$25,000,000 to the partnership. Substantially all of the rentable space in the office building is leased on a long-term basis. The partnership agreement provides that all items of income, gain, loss, and deduction from the office building are to be allocated 45 percent to J, 45 percent to K, and 10 percent to I. The partnership agreement also provides that all items of income, gain, loss, and deduction from the government securities are to be allocated 90 percent to I, 5 percent to J, and 5 percent to K. The partnership agreement requires that cash flow from the office building and government securities be allocated between partners in the same manner as the items of income, gain, loss, and deduction from those properties are allocated between them. The partnership agreement complies

with the requirements of § 1.704-1(b)(2)(ii)(b). It is not expected that the partnership will need to resort to the government securities or the cash flow therefrom to operate the office building. At the time the partnership is formed, I, J, and K contemplated that I's interest in the partnership would be liquidated sometime after January 31, 1994, in exchange for a transfer of the government securities and cash (if necessary). On March 1, 1995, the partnership transfers cash and the government securities to I in liquidation of I's interest in the partnership. The cash transferred to I represents the excess of I's share of the appreciation in the office building since the formation of the partnership over J's and K's share of the appreciation in the government securities since they are acquired by the partnership.

(ii) I's transfer of the office building to the partnership and the partnership's transfer of the government securities and cash to I occurred more than two years apart. Therefore, those transfers are presumed not to be a sale unless the facts and circumstances clearly establish that the transfers constitute a sale. Absent I's transfer of the office building to the partnership, I would not have received the government securities from the partnership. The facts including the amount and nature of partnership assets indicate that, at the time that I transferred the office building to the partnership, the timing of the transfer of the government securities to I was anticipated and was not dependent on the entrepreneurial risks of partnership operations. Moreover, the facts indicate that the partnership allocations were designed to effect an exchange of the burdens and benefits of ownership of the government securities in anticipation of the transfer of those securities to I and those burdens and benefits were effectively shifted to I on formation of the partnership. Accordingly, the facts and circumstances clearly establish that I sold the office building to the partnership on February 1, 1992, in exchange for the partnership's obligation to transfer the government securities to I and to make certain other cash transfers to I.

[T.D. 8439, 57 FR 44978, Sept. 30, 1992]

**§ 1.707-4 Disguised sales of property to partnership; special rules applicable to guaranteed payments, preferred returns, operating cash flow distributions, and reimbursements of preformation expenditures.**

(a) *Guaranteed payments and preferred returns*—(1) *Guaranteed payment not treated as part of a sale*—(i) *In general*. A guaranteed payment for capital made to a partner is not treated as part of a sale of property under § 1.707-3(a) (relating to treatment of transfers as a

sale). A party's characterization of a payment as a guaranteed payment for capital will not control in determining whether a payment is, in fact, a guaranteed payment for capital. The term *guaranteed payment for capital* means any payment to a partner by a partnership that is determined without regard to partnership income and is for the use of that partner's capital. See section 707(c). For this purpose, one or more payments are not made for the use of a partner's capital if the payments are designed to liquidate all or part of the partner's interest in property contributed to the partnership rather than to provide the partner with a return on an investment in the partnership.

(ii) *Reasonable guaranteed payments*. Notwithstanding the presumption set forth in § 1.707-3(c) (relating to transfers made within two years of each other), for purposes of section 707(a)(2) and the regulations thereunder a transfer of money to a partner that is characterized by the parties as a guaranteed payment for capital, is determined without regard to the income of the partnership and is reasonable (within the meaning of paragraph (a)(3) of this section) is presumed to be a guaranteed payment for capital unless the facts and circumstances clearly establish that the transfer is not a guaranteed payment for capital and is part of a sale.

(iii) *Unreasonable guaranteed payments*. A transfer of money to a partner that is characterized by the parties as a guaranteed payment for capital but that is not reasonable (within the meaning of paragraph (a)(3) of this section) is presumed not to be a guaranteed payment for capital unless the facts and circumstances clearly establish that the transfer is a guaranteed payment for capital. A transfer that is not a guaranteed payment for capital is subject to the rules of § 1.707-3.

(2) *Presumption regarding reasonable preferred returns*. Notwithstanding the presumption set forth in § 1.707-3(c) (relating to transfers made within two years of each other), a transfer of money to a partner that is characterized by the parties as a preferred return and that is reasonable (within the

meaning of paragraph (a)(3) of this section) is presumed not to be part of a sale of property to the partnership unless the facts and circumstances (including the likelihood and expected timing of the subsequent allocation of income or gain to support the preferred return) clearly establish that the transfer is part of a sale. The term *preferred return* means a preferential distribution of partnership cash flow to a partner with respect to capital contributed to the partnership by the partner that will be matched, to the extent available, by an allocation of income or gain.

(3) *Definition of reasonable preferred returns and guaranteed payments*—(i) *In general.* A transfer of money to a partner that is characterized as a preferred return or guaranteed payment for capital is reasonable only to the extent that the transfer is made to the partner pursuant to a written provision of a partnership agreement that provides for payment for the use of capital in a reasonable amount, and only to the extent that the payment is made for the use of capital after the date on which that provision is added to the partnership agreement.

(ii) *Reasonable amount.* A transfer of money that is made to a partner during any partnership taxable year and is characterized as a preferred return or guaranteed payment for capital is reasonable in amount if the sum of any preferred return and any guaranteed payment for capital that is payable for that year does not exceed the amount determined by multiplying either the partner's unreturned capital at the beginning of the year or, at the partner's option, the partner's weighted average capital balance for the year (with either amount appropriately adjusted, taking into account the relevant compounding periods, to reflect any unpaid preferred return or guaranteed payment for capital that is payable to the partner) by the safe harbor interest rate for that year. The safe harbor interest rate for a partnership's taxable year equals 150 percent of the highest applicable Federal rate, at the appropriate compounding period or periods, in effect at any time from the time that the right to the preferred return or guaranteed payment for capital is

first established pursuant to a binding, written agreement among the partners through the end of the taxable year. A partner's unreturned capital equals the excess of the aggregate amount of money and the fair market value of other consideration (net of liabilities) contributed by the partner to the partnership over the aggregate amount of money and the fair market value of other consideration (net of liabilities) distributed by the partnership to the partner other than transfers of money that are presumed to be guaranteed payments for capital under paragraph (a)(1)(ii) of this section, transfers of money that are reasonable preferred returns within the meaning of this paragraph (a)(3), and operating cash flow distributions within the meaning of paragraph (b)(2) of this section.

(4) *Examples.* The following examples illustrate the application of paragraph (a) of this section:

*Example 1. Transfer presumed to be a guaranteed payment.* (i) A transfers property with a fair market value of \$100,000 to partnership AB. At the time of A's transfer, the partnership agreement is amended to provide that A is to receive a guaranteed payment for the use of A's capital of 10 percent (compounded annually) of the fair market value of the transferred property in each of the three years following the transfer. The partnership agreement provides that partnership net taxable income and loss will be allocated equally between partners A and B, and that partnership cash flow will be distributed in accordance with the allocation of partnership net taxable income and loss. The partnership would be allowed a deduction in the year paid if the transfers made to A are treated as guaranteed payments under section 707(c). Under the partnership agreement, that deduction would be allocated in the same manner as any other item of partnership deduction. The partnership agreement complies with the requirements of § 1.704-1(b)(2)(ii)(b). The partnership agreement does not provide for the payment of a preferred return and, other than the guaranteed payment to be paid to A, no transfer is expected to be made during the three year period following A's transfer that is not an operating cash flow distribution (within the meaning of paragraph (b)(2) of this section). Assume that the highest applicable Federal rate in effect at the time of A's transfer is eight percent compounded annually.

(ii) The transfer of money to be made to A under the partnership agreement is characterized by the parties as a guaranteed payment for capital and is determined without

regard to the income of the partnership. The transfer is also reasonable within the meaning of § 1.707-4(a)(3). The transfer, therefore, is presumed to be a guaranteed payment for capital. The presumption set forth in § 1.707-3(c) (relating to transfers made within two years of each other) thus does not apply to this transfer. The transfer will not be treated as part of a sale of property to the partnership unless the facts and circumstances clearly establish that the transfer is not a guaranteed payment for capital but is part of a sale.

(iii) The presumption that the transfer is a guaranteed payment for capital is not rebutted, because there are no facts indicating that the transfer is not a guaranteed payment for the use of capital.

*Example 2. Transfers characterized as guaranteed payments treated as part of a sale.* (i) C and D form partnership CD. C transfers property with a fair market value of \$100,000 and an adjusted tax basis of \$20,000 in exchange for a partnership interest. D is responsible for managing the day-to-day operations of the partnership and makes no capital contribution to the partnership upon its formation. The partnership agreement provides that C is to receive payments characterized as guaranteed payments and determined without regard to partnership income of \$8,333 per year for the first four years of partnership operations for the use of C's capital. In addition, the partnership agreement provides that—

(A) Partnership net taxable income and loss will be allocated 75 percent to C and 25 percent to D; and

(B) All partnership cash flow (determined prior to consideration of the guaranteed payment) will be distributed 75 percent to C and 25 percent to D except that guaranteed payments that the partnership is obligated to make to C are payable solely out of D's share of the partnership's cash flow.

(ii) If D's share of the partnership's cash flow is not sufficient to make the guaranteed payment to C, then D is obligated to contribute any shortfall to the partnership, even in the event the partnership is liquidated. Thus, the effect of the guaranteed payment arrangement is that the guaranteed payment to C is funded entirely by D. The partnership agreement complies with the requirements of § 1.704-1(b)(2)(ii)(b). Assume that, at the time the partnership is formed, the partnership or D could borrow \$25,000 pursuant to a loan requiring equal payments of principal and interest over a four-year term at the current market interest rate of approximately 12 percent (compounded annually). Assume that the highest applicable Federal rate in effect at the time the partnership is formed is 10 percent compounded annually.

(iii) The transfer of money to be made to C under the partnership agreement is characterized by the parties as a guaranteed pay-

ment for capital and is determined without regard to the income of the partnership. The transfer is also reasonable within the meaning of § 1.707-4(a)(3). The transfer, therefore, is presumed to be a guaranteed payment for capital. The presumption set forth in § 1.707-3(c) (relating to transfers made within two years of each other) thus does not apply to this transfer. The transfer will not be treated as part of a sale of property to the partnership unless the facts and circumstances clearly establish that the transfer is not a guaranteed payment for capital and is part of a sale.

(iv) For the first four years of partnership operations, the total guaranteed payments made to C under the partnership agreement will equal \$33,332. If the characterization of those payments as guaranteed payments for capital within the meaning of section 707(c) were respected, C would be allocated \$24,999 of the deductions that would be claimed by the partnership for those payments, thereby leaving the balance in C's capital account approximately \$25,000 less than it would have been if the guaranteed payments had not been made. The guaranteed payments thus have the effect of offsetting approximately \$25,000 of the credit made to C's capital account for the property transferred to the partnership by C. C's resulting capital account is approximately equivalent to the capital account C would have had if C had only contributed 75 percent of the property to the partnership. Furthermore, the effect of D's funding the guaranteed payment to C (either through reduced distributions of cash flow to D or additional contributions) is that D's capital account is approximately equivalent to the capital account D would have had if D had contributed 25 percent of the property (or contributed cash so that the partnership could purchase the 25 percent). Moreover, a \$25,000 loan requiring equal payments of principal and interest over a four-year term at the current market interest rate of 12 percent (compounded annually), would have resulted in annual payments of principal and interest of \$8,230.86. Consequently, the guaranteed payments effectively place the partners in the same economic position that they would have been in had D purchased a one-quarter interest in the property from C financed at the current market rate of interest, and then C and D each contributed their share of the property to the partnership. In view of the burden the guaranteed payments place on D's right to transfers of partnership cash flow and D's legal obligation to make contributions to the partnership to the extent necessary to fund the guaranteed payments, D has effectively purchased through the partnership a one-quarter interest in the property from C.

(v) Under these facts, the presumption that the transfers to C are guaranteed payments for capital is rebutted, because the facts and

circumstances clearly establish that the transfers are part of a sale and not guaranteed payments for capital. Under § 1.707-3(a), C and the partnership are treated as if C sold a one-quarter interest in the property to the partnership in exchange for a promissory note evidencing the partnership's obligation to make the guaranteed payments.

(b) *Presumption regarding operating cash flow distributions*—(1) *In general.* Notwithstanding the presumption set forth in § 1.707-3(c) (relating to transfers made within two years of each other), an operating cash flow distribution is presumed not to be part of a sale of property to the partnership unless the facts and circumstances clearly establish that the transfer is part of a sale.

(2) *Operating cash flow distributions*—(i) *In general.* One or more transfers of money by the partnership to a partner during a taxable year of the partnership are operating cash flow distributions for purposes of paragraph (b)(1) of this section to the extent that those transfers are not presumed to be guaranteed payments for capital under paragraph (a)(1)(ii) of this section, are not reasonable preferred returns within the meaning of paragraph (a)(3) of this section, are not characterized by the parties as distributions to the partner acting in a capacity other than as a partner, and to the extent they do not exceed the product of the net cash flow of the partnership from operations for the year multiplied by the lesser of the partner's percentage interest in overall partnership profits for that year or the partner's percentage interest in overall partnership profits for the life of the partnership. For purposes of the preceding sentence, the net cash flow of the partnership from operations for a taxable year is an amount equal to the taxable income or loss of the partnership arising in the ordinary course of the partnership's business and investment activities, increased by tax exempt interest, depreciation, amortization, cost recovery allowances and other noncash charges deducted in determining such taxable income and decreased by—

(A) Principal payments made on any partnership indebtedness;

(B) Property replacement or contingency reserves actually established by the partnership;

(C) Capital expenditures when made other than from reserves or from borrowings the proceeds of which are not included in operating cash flow; and

(D) Any other cash expenditures (including preferred returns) not deducted in determining such taxable income or loss.

(ii) *Operating cash flow safe harbor.* For any taxable year, in determining a partner's operating cash flow distributions for the year, the partner may use the partner's smallest percentage interest under the terms of the partnership agreement in any material item of partnership income or gain that may be realized by the partnership in the three-year period beginning with such taxable year. This provision is merely intended to provide taxpayers with a safe harbor and is not intended to preclude a taxpayer from using a different percentage under the rules of paragraph (b)(2)(i) of this section.

(iii) *Tiered partnerships.* In the case of tiered partnerships, the upper-tier partnership must take into account its share of the net cash flow from operations of the lower-tier partnership applying principles similar to those described in paragraph (b)(2)(i) of this section, so that the amount of the upper-tier partnership's operating cash flow distributions is neither overstated nor understated.

(c) *Accumulation of guaranteed payments, preferred returns, and operating cash flow distributions.* Guaranteed payments for capital, preferred returns, and operating cash flow distributions presumed not to be part of a sale under the rules of paragraphs (a) and (b) of this section do not lose the benefit of the presumption by reason of being retained for distribution in a later year.

(d) *Exception for reimbursements of preformation expenditures.* A transfer of money or other consideration by the partnership to a partner is not treated as part of a sale of property by the partner to the partnership under § 1.707-3(a) (relating to treatment of transfers as a sale) to the extent that the transfer to the partner by the partnership is made to reimburse the partner for, and does not exceed the amount of, capital expenditures that—

(1) Are incurred during the two-year period preceding the transfer by the partner to the partnership; and

(2) Are incurred by the partner with respect to—

(i) Partnership organization and syndication costs described in section 709; or

(ii) Property contributed to the partnership by the partner, but only to the extent the reimbursed capital expenditures do not exceed 20 percent of the fair market value of such property at the time of the contribution. However, the 20 percent of fair market value limitation of this paragraph (d)(2)(ii) does not apply if the fair market value of the contributed property does not exceed 120 percent of the partner's adjusted basis in the contributed property at the time of contribution.

(e) *Other exceptions.* The Commissioner may provide by guidance published in the Internal Revenue Bulletin that other payments or transfers to a partner are not treated as part of a sale for purposes of section 707(a)(2) and the regulations thereunder.

[T.D. 8439, 57 FR 44981, Sept. 30, 1992; 57 FR 56444, Nov. 30, 1992]

**§ 1.707-5 Disguised sales of property to partnership; special rules relating to liabilities.**

(a) *Liability assumed or taken subject to by partnership*—(1) *In general.* For purposes of this section and §§1.707-3 and 1.707-4, if a partnership assumes or takes property subject to a qualified liability (as defined in paragraph (a)(6) of this section) of a partner, the partnership is treated as transferring consideration to the partner only to the extent provided in paragraph (a)(5) of this section. By contrast, if the partnership assumes or takes property subject to a liability of the partner other than a qualified liability, the partnership is treated as transferring consideration to the partner to the extent that the amount of the liability exceeds the partner's share of that liability immediately after the partnership assumes or takes subject to the liability as provided in paragraphs (a) (2), (3) and (4) of this section.

(2) *Partner's share of liability.* A partner's share of any liability of the part-

nership is determined under the following rules:

(i) *Recourse liability.* A partner's share of a recourse liability of the partnership equals the partner's share of the liability under the rules of section 752 and the regulations thereunder. A partnership liability is a recourse liability to the extent that the obligation is a recourse liability under §1.752-1(a)(1) or would be treated as a recourse liability under that section if it were treated as a partnership liability for purposes of that section.

(ii) *Nonrecourse liability.* A partner's share of a nonrecourse liability of the partnership is determined by applying the same percentage used to determine the partner's share of the excess nonrecourse liability under §1.752-3(a)(3). A partnership liability is a nonrecourse liability of the partnership to the extent that the obligation is a nonrecourse liability under §1.752-1(a)(2) or would be a nonrecourse liability of the partnership under §1.752-1(a)(2) if it were treated as a partnership liability for purposes of that section.

(3) *Reduction of partner's share of liability.* For purposes of this section, a partner's share of a liability, immediately after a partnership assumes or takes subject to the liability, is determined by taking into account a subsequent reduction in the partner's share if—

(i) At the time that the partnership assumes or takes subject to a liability, it is anticipated that the transferring partner's share of the liability will be subsequently reduced; and

(ii) The reduction of the partner's share of the liability is part of a plan that has as one of its principal purposes minimizing the extent to which the assumption of or taking subject to the liability is treated as part of a sale under §1.707-3.

(4) *Special rule applicable to transfers of encumbered property to a partnership by more than one partner pursuant to a plan.* For purposes of paragraph (a)(1) of this section, if the partnership assumes or takes property or properties subject to the liabilities of more than one partner pursuant to a plan, a partner's share of the liabilities assumed or taken subject to by the partnership pursuant to that plan immediately

after the transfers equals the sum of that partner's shares of the liabilities (other than that partner's qualified liabilities, as defined in paragraph (a)(6) of this section) assumed or taken subject to by the partnership pursuant to the plan. This paragraph (a)(4) does not apply to any liability assumed or taken subject to by the partnership with a principal purpose of reducing the extent to which any other liability assumed or taken subject to by the partnership is treated as a transfer of consideration under paragraph (a)(1) of this section.

(5) *Special rule applicable to qualified liabilities.* (i) If a transfer of property by a partner to a partnership is not otherwise treated as part of a sale, the partnership's assumption of or taking subject to a qualified liability in connection with a transfer of property is not treated as part of a sale. If a transfer of property by a partner to the partnership is treated as part of a sale without regard to the partnership's assumption of or taking subject to a qualified liability (as defined in paragraph (a)(6) of this section) in connection with the transfer of property, the partnership's assumption of or taking subject to that liability is treated as a transfer of consideration made pursuant to a sale of such property to the partnership only to the extent of the lesser of—

(A) The amount of consideration that the partnership would be treated as transferring to the partner under paragraph (a)(1) of this section if the liability were not a qualified liability; or

(B) The amount obtained by multiplying the amount of the qualified liability by the partner's net equity percentage with respect to that property.

(ii) A partner's net equity percentage with respect to an item of property equals the percentage determined by dividing—

(A) The aggregate transfers of money or other consideration to the partner by the partnership (other than any transfer described in this paragraph (a)(5)) that are treated as proceeds realized from the sale of the transferred property; by

(B) The excess of the fair market value of the property at the time it is transferred to the partnership over any qualified liability encumbering the

property or, in the case of any qualified liability described in paragraph (a)(6)(i) (C) or (D) of this section, that is properly allocable to the property.

(6) *Qualified liability of a partner defined.* A liability assumed or taken subject to by a partnership in connection with a transfer of property to the partnership by a partner is qualified liability of the partner only to the extent—

(i) The liability is—

(A) A liability that was incurred by the partner more than two years prior to the earlier of the date the partner agrees in writing to transfers the property or the date the partner transfers the property to the partnership and that has encumbered the transferred property throughout that two-year period;

(B) A liability that was not incurred in anticipation of the transfer of the property to a partnership, but that was incurred by the partner within the two-year period prior to the earlier of the date the partner agrees in writing to transfer the property or the date the partner transfers the property to the partnership and that has encumbered the transferred property since it was incurred (see paragraph (a)(7) of this section for further rules regarding a liability incurred within two years of a property transfer or of a written agreement to transfer);

(C) A liability that is allocable under the rules of §1.163-8T to capital expenditures with respect to the property; or

(D) A liability that was incurred in the ordinary course of the trade or business in which property transferred to the partnership was used or held but only if all the assets related to that trade or business are transferred other than assets that are not material to a continuation of the trade or business; and

(ii) If the liability is a recourse liability, the amount of the liability does not exceed the fair market value of the transferred property (less the amount of any other liabilities that are senior in priority and that either encumber such property or are liabilities described in paragraph (a)(6)(i) (C) or (D) of this section) at the time of the transfer.

(7) *Liability incurred within two years of transfer presumed to be in anticipation*

*of the transfer*—(i) *In general.* For purposes of this section, if within a two-year period a partner incurs a liability (other than a liability described in paragraph (a)(6)(i) (C) or (D) of this section) and transfers property to a partnership or agrees in writing to transfer the property, and in connection with the transfer the partnership assumes or takes the property subject to the liability, the liability is presumed to be incurred in anticipation of the transfer unless the facts and circumstances clearly establish that the liability was not incurred in anticipation of the transfer.

(ii) *Disclosure of transfers of property subject to liabilities incurred within two years of the transfer.* If a partner treats a liability assumed or taken subject to by a partnership as a qualified liability under paragraph (a)(6)(i)(B) of this section, such treatment is to be disclosed to the Internal Revenue Service in accordance with § 1.707-8.

(b) *Treatment of debt-financed transfers of consideration by partnerships*—(1) *In general.* For purposes of § 1.707-3, if a partner transfers property to a partnership, and the partnership incurs a liability and all or a portion of the proceeds of that liability are allocable under § 1.163-8T to a transfer of money or other consideration to the partner made within 90 days of incurring the liability, the transfer of money or other consideration to the partner is taken into account only to the extent that the amount of money or the fair market value of the other consideration transferred exceeds that partner's allocable share of the partnership liability.

(2) *Partner's allocable share of liability*—(i) *In general.* A partner's allocable share of a partnership liability for purposes of paragraph (b)(1) of this section equals the amount obtained by multiplying the partner's share of the liability as described in paragraph (a)(2) of this section by the fraction determined by dividing—

(A) The portion of the liability that is allocable under § 1.163-8T to the money or other property transferred to the partner; by

(B) The total amount of the liability.

(ii) *Debt-financed transfers made pursuant to a plan*—(A) *In general.* Except as provided in paragraph (b)(2)(iii) of

this section, if a partnership transfers to more than one partner pursuant to a plan all or a portion of the proceeds of one or more partnership liabilities, paragraph (b)(1) of this section is applied by treating all of the liabilities incurred pursuant to the plan as one liability, and each partner's allocable share of those liabilities equals the amount obtained by multiplying the sum of the partner's shares of each of the respective liabilities (as defined in paragraph (a)(2) of this section) by the fraction obtained by dividing—

(1) The portion of those liabilities that is allocable under § 1.163-8T to the money or other consideration transferred to the partners pursuant to the plan; by

(2) The total amount of those liabilities.

(B) *Special rule.* Paragraph (b)(2)(ii)(A) of this section does not apply to any transfer of money or other property to a partner that is made with a principal purpose of reducing the extent to which any transfer is taken into account under paragraph (b)(1) of this section.

(iii) *Reduction of partner's share of liability.* For purposes of paragraph (b)(2) of this section, a partner's share of a liability, immediately after the partnership assumes or takes subject to the liability, is determined by taking into account a subsequent reduction in the partner's share if—

(A) It is anticipated that the partner's share of the liability that is allocable to a transfer of money or other consideration to the partner will be reduced subsequent to the transfer; and

(B) The reduction of the partner's share of the liability is part of a plan that has as one of its principal purposes minimizing the extent to which the partnership's distribution of the proceeds of the borrowing is treated as part of a sale.

(c) *Refinancings.* To the extent that the proceeds of a partner or partnership liability (the *refinancing debt*) are allocable under the rules of § 1.163-8T to payments discharging all or part of any other liability of that partner or of the partnership, as the case may be, the refinancing debt is treated as the other liability for purposes of applying the rules of this section.

(d) *Share of liability where assumption accompanied by transfer of money.* For purposes of §§ 1.707-3 through 1.707-5, if pursuant to a plan a partner pays or contributes money to the partnership and the partnership assumes or takes subject to one or more liabilities (other than qualified liabilities) of the partner, the amount of those liabilities that the partnership is treated as assuming or taking subject to is reduced (but not below zero) by the money transferred.

(e) *Tiered partnerships and other related persons.* If a lower-tier partnership succeeds to a liability of an upper-tier partnership, the liability in the lower-tier partnership retains the characterization as qualified or nonqualified that it had under these rules in the upper-tier partnership. A similar rule applies to other related party transactions involving liabilities to the extent provided by guidance published in the Internal Revenue Bulletin.

(f) *Examples.* The following examples illustrate the application of this section.

*Example 1. Partnership's assumption of nonrecourse liability encumbering transferred property.* (i) A and B form partnership AB, which will engage in renting office space. A transfers \$500,000 in cash to the partnership, and B transfers an office building to the partnership. At the time it is transferred to the partnership, the office building has a fair market value of \$1,000,000, an adjusted basis of \$400,000, and is encumbered by a \$500,000 liability, which B incurred 12 months earlier to finance the acquisition of other property. No facts rebut the presumption that the liability was incurred in anticipation of the transfer of the property to the partnership. Assume that this liability is a nonrecourse liability of the partnership within the meaning of section 752 and the regulations thereunder. The partnership agreement provides that partnership items will be allocated equally between A and B, including excess nonrecourse deductions under § 1.752-3(a)(3). The partnership agreement complies with the requirements of § 1.704-1(b)(2)(ii)(b).

(ii) The nonrecourse liability secured by the office building is not a qualified liability within the meaning of paragraph (a)(6) of this section. B would be allocated 50 percent of the excess nonrecourse liability under the partnership agreement. Accordingly, immediately after the partnership's assumption of that liability, B's share of the liability equals \$250,000, which is equal to B's 50 percent share of the excess nonrecourse liability of the partnership as determined in accord-

ance with B's share of partnership profits under § 1.752-3(a)(3).

(iii) The partnership's taking subject to the liability encumbering the office building is treated as a transfer of \$250,000 of consideration to B (the amount by which the liability (\$500,000) exceeds B's share of that liability immediately after taking subject to \$250,000)). B is treated as having sold \$250,000 of the fair market value of the office building to the partnership in exchange for the partnership's taking subject to a \$250,000 liability. This results in a gain of \$150,000 (\$250,000 minus (\$250,000/\$1,000,000 multiplied by \$400,000)).

*Example 2. Partnership's assumption of recourse liability encumbering transferred property.* (i) C transfers property Y to a partnership. At the time of its transfer to the partnership, property Y has a fair market value of \$10,000,000 and is subject to an \$8,000,000 liability that C incurred, immediately before transferring property Y to the partnership, in order to finance other expenditures. Upon the transfer of property Y to the partnership, the partnership assumed the liability encumbering that property. The partnership assumed this liability solely to acquire property Y. Under section 752 and the regulations thereunder, immediately after the partnership's assumption of the liability encumbering property Y, the liability is a recourse liability of the partnership and C's share of that liability is \$7,000,000.

(ii) Under the facts of this example, the liability encumbering property Y is not a qualified liability. Accordingly, the partnership's assumption of the liability results in a transfer of consideration to C in connection with C's transfer of property Y to the partnership in the amount of \$1,000,000 (the excess of the liability assumed by the partnership (\$8,000,000) over C's share of the liability immediately after the assumption (\$7,000,000)). See paragraphs (a) (1) and (2) of this section.

*Example 3. Subsequent reduction of transferring partner's share of liability.* (i) The facts are the same as in Example 2. In addition, property Y is a fully leased office building, the rental income from property Y is sufficient to meet debt service, and the remaining term of the liability is ten years. It is anticipated that, three years after the partnership's assumption of the liability, C's share of the liability under section 752 will be reduced to zero because of a shift in the allocation of partnership losses pursuant to the terms of the partnership agreement. Under the partnership agreement, this shift in the allocation of partnership losses is dependent solely on the passage of time.

(ii) Under paragraph (a)(3) of this section, if the reduction in C's share of the liability was anticipated at the time of C's transfer, and the reduction was part of a plan that has as one of its principal purposes minimizing

the extent of sale treatment under § 1.707-3 (i.e., a principal purpose of allocating a large percentage of losses to C in the first three years when losses were not likely to be realized was to minimize the extent to which C's transfer would be treated as part of a sale), C's share of the liability immediately after the assumption is treated as equal to C's reduced share.

*Example 4. Trade payables as qualified liabilities.* (i) D and E form partnership DE which will engage in a consulting business that requires no overhead and minimal cash on hand for daily operating expenses. Previously, D and E, as individual sole proprietors, operated separate consulting businesses. D and E each transfer to the partnership sufficient cash to cover daily operating expenses together with the goodwill and trade payables related to each sole proprietorship. Due to uncertainty over the collection rate on the trade receivables related to their sole proprietorships, D and E agree that none of the trade receivables will be transferred to the partnership.

(ii) Under the facts of this example, all the assets related to the consulting business (other than the trade receivables) together with the trade payables were transferred to partnership DE. The trade receivables retained by D and E are not material to a continuation of the trade or business by the partnership because D and E contributed sufficient cash to cover daily operating expenses. Accordingly, the trade payables transferred to the partnership constitute qualified liability under paragraph (a)(6) of this section.

*Example 5. Partnership's assumption of a qualified liability as sole consideration.* (i) F transfers property Z to a partnership. At the time of its transfer to the partnership, property Z has a fair market value of \$165,000 and an adjusted tax basis of \$75,000. Also, at the time of the transfer, property Z is subject to a \$75,000 liability that F incurred more than two years before transferring property Z to the partnership. The liability has been secured by property Z since it was incurred by F. Upon the transfer of property Z to the partnership, the partnership assumed the liability encumbering that property. The partnership made no other transfers to F in consideration for the transfer of property Z to the partnership. Assume that, under section 752 and the regulations thereunder, immediately after the partnership's assumption of the liability encumbering property Z, the liability is a recourse liability of the partnership and F's share of that liability is \$25,000.

(ii) The \$75,000 liability secured by property Z is a qualified liability of F because F incurred the liability more than two years prior to the assumption of the liability by the partnership and the liability has encumbered property Z for more than two years prior to that assumption. See paragraph

(a)(6) of this section. Therefore, since no other transfer to F was made as consideration for the transfer of property Z, under paragraph (a)(5) of this section, the partnership's assumption of the qualified liability of F encumbering property Z is not treated as part of a sale.

*Example 6. Partnership's assumption of a qualified liability in addition to other consideration.* (i) The facts are the same as in *Example 5*, except that the partnership makes a transfer to D of \$30,000 in money that is consideration for F's transfer of property Z to the partnership under § 1.707-3.

(ii) As in *Example 5*, the \$75,000 liability secured by property Z is a qualified liability of F. Since the partnership transferred \$30,000 to F in addition to assuming the qualified liability under paragraph (a)(5) of this section, the partnership's assumption of this qualified liability is treated as a transfer of additional consideration to F to the extent of the lesser of—

(A) The amount that the partnership would be treated as transferring to F if the liability were not a qualified liability (\$50,000 (i.e., the excess of the \$75,000 qualified liability over F's \$25,000 share of that liability)); or

(B) The amount obtained by multiplying the qualified liability (\$75,000) by F's net equity percentage with respect to property Z (one-third).

(iii) F's net equity percentage with respect to property Z equals the fraction determined by dividing—

(A) The aggregate amount of money or other consideration (other than the qualified liability) transferred to F and treated as part of a sale of property Z under § 1.707-3(a) (\$30,000 transfer of money); by

(B) F's net equity in property Z (\$90,000 (i.e., the excess of the \$165,000 fair market value over the \$75,000 qualified liability)).

(iv) Accordingly, the partnership's assumption of the qualified liability of F encumbering property Z is treated as a transfer of \$25,000 (one-third of \$75,000) of consideration to F pursuant to a sale. Therefore, F is treated as having sold \$55,000 of the fair market value of property Z to the partnership in exchange for \$30,000 in money and the partnership's assumption of \$25,000 of the qualified liability. Accordingly, F must recognize \$30,000 of gain on the sale (the excess of the \$55,000 amount realized over \$25,000 of F's adjusted basis for property Z (i.e., one-third of F's adjusted basis for the property, because F is treated as having sold one-third of the property to the partnership)).

*Example 7. Partnership's assumptions of liabilities encumbering properties transferred pursuant to a plan.* (i) Pursuant to a plan, G and H transfer property 1 and property 2, respectively, to an existing partnership in exchange for interests in the partnership. At the time the properties are transferred to the partnership, property 1 has a fair market

value of \$10,000 and an adjusted tax basis of \$6,000, and property 2 has a fair market value of \$10,000 and an adjusted tax basis of \$4,000. At the time properties 1 and 2 are transferred to the partnership, a \$6,000 non-recourse liability (*liability 1*) is secured by property 1 and a \$7,000 recourse liability of F (*liability 2*) is secured by property 2. Properties 1 and 2 are transferred to the partnership, and the partnership takes subject to liability 1 and assumes liability 2. G and H incurred liabilities 1 and 2 immediately prior to transferring properties 1 and 2 to the partnership and used the proceeds for personal expenditures. The liabilities are not qualified liabilities. Assume that G and H are each allocated \$2,000 of liability 1 in accordance with § 1.707-5(a)(2)(ii) (which determines a partner's share of a nonrecourse liability). Assume further that G's share of liability 2 is \$3,500 and H's share is \$0 in accordance with § 1.707-5(a)(2)(i) (which determines a partner's share of a recourse liability).

(ii) G and H transferred properties 1 and 2 to the partnership pursuant to a plan. Accordingly, the partnership's taking subject to liability 1 is treated as a transfer of only \$500 of consideration to G, (the amount by which liability 1 (\$6,000) exceeds G's share of liabilities 1 and 2 (\$5,500)), and the partnership's assumption of liability 2 is treated as a transfer of only \$5,000 of consideration to H (the amount by which liability 2 (\$7,000) exceeds H's share of liabilities 1 and 2 (\$2,000)). G is treated under the rule in § 1.707-3 as having sold \$500 of the fair market value of property 1 in exchange for the partnership's taking subject to liability 1 and H is treated as having sold \$5,000 of the fair market value of property 2 in exchange for the assumption of liability 2.

*Example 8. Partnership's assumption of liability pursuant to a plan to avoid sale treatment of partnership assumption of another liability.* (i) The facts are the same as in *Example 7*, except that—

(A) H transferred the proceeds of liability 2 to the partnership; and

(B) H incurred liability 2 in an attempt to reduce the extent to which the partnership's taking subject to liability 1 would be treated as a transfer of consideration to G (and thereby reduce the portion of G's transfer of property 1 to the partnership that would be treated as part of a sale).

(ii) Because the partnership assumed liability 2 with a principal purpose of reducing the extent to which the partnership's taking subject to liability 1 would be treated as a transfer of consideration to G, liability 2 is ignored in applying paragraph (a)(3) of this section. Accordingly, the partnership's taking subject to liability 1 is treated as a transfer of \$4,000 of consideration to G (the amount by which liability 1 (\$6,000) exceeds G's share of liability 1 (\$2,000)). On the other hand, the partnership's assumption of liability

2 is not treated as a transfer of any consideration to H because H's share of that liability equals \$7,000 as a result of H's transfer of \$7,000 in money to the partnership.

*Example 9. Partnership's assumptions of qualified liabilities encumbering properties transferred pursuant to a plan in addition to other consideration.* (i) Pursuant to a plan, I transfers property 1 and J transfers property 2 plus \$10,000 in cash to partnership IJ in exchange for equal interests in the partnership. At the time the properties are transferred to the partnership, property 1 has a fair market value of \$100,000, an adjusted tax basis of \$5,000, and is encumbered by a qualified liability of \$50,000 (*liability 1*). Property 2 has a fair market value of \$100,000, an adjusted tax basis of \$5,000, and is encumbered by a qualified liability of \$70,000 (*liability 2*). Pursuant to the plan, the partnership transferred to I \$10,000 in cash. That amount is consideration for I's transfer of property 1 to the partnership under § 1.707-3. In accordance with § 1.707-5(a)(2), I and J are each allocated \$25,000 of liability 1 and \$35,000 of liability 2.

(ii) Because the partnership transferred \$10,000 to I as consideration for the transfer of property, under § 1.707-5(a)(5), the partnership's assumption of liability 1 is treated as a transfer of additional consideration to I, even though liability 1 is a qualified liability, to the extent of the lesser of—

(A) The amount that the partnership would be treated as transferring to I if the liability were not a qualified liability; or

(B) The amount obtained by multiplying the qualified liability by I's net equity percentage with respect to property 1.

(iii) Because I and J transferred properties 1 and 2 to the partnership pursuant to a plan, treating I's qualified liability as a non-qualified liability under § 1.707-5(a)(5)(i)(A) enables I to apply the special rule applicable to transfers of encumbered property to a partnership by more than one partner pursuant to a plan under § 1.707-5(a)(4). Under this alternative test, the partnership's assumption of liability 1 encumbering property 1 is treated as a transfer of zero (\$0) additional consideration to I pursuant to a sale. This is because the amount of liability 1 (\$50,000) does not exceed the sum of I's share of liability 1 treated as a nonqualified liability (\$25,000) and I's share of liability 2 (\$35,000).

(iv) The alternative under § 1.707-5(a)(5)(i)(B) is the amount obtained by multiplying the qualified liability (\$50,000) by I's net equity percentage with respect to property 1. I's net equity percentage with respect to property 1 equals one-fifth, the fraction determined by dividing—

(A) The aggregate amount of money or other consideration (other than the qualified liability) transferred to I and treated as part of a sale of property 1 under § 1.707-3(a) the \$10,000 transfer of money; by

## § 1.707-5

## 26 CFR Ch. I (4-1-14 Edition)

(B) I's net equity in property 1 (\$50,000 *i.e.*, the excess of the \$100,000 fair market value over the \$50,000 qualified liability).

(v) Under this alternative test, the partnership's assumption of the qualified liability encumbering property 1 is treated as a transfer of \$10,000 (one-fifth of the \$50,000 qualified liability) of additional consideration to I pursuant to a sale.

(vi) Applying § 1.707-5(a)(5) to these facts, the partnership's assumption of liability 1 is treated as a transfer of additional consideration to I to the extent of the lesser of—

(A) zero; or

(B) \$10,000.

(vii) Therefore, the partnership's assumption of I's qualified liability encumbering property 1 is not treated as a transfer of any additional consideration to I pursuant to a sale, and I is treated as having only received \$10,000 of the fair market value of property 1 to the partnership in exchange for \$10,000 in cash. Accordingly, I must recognize \$9,500 of gain on the sale, that is, the excess of the \$10,000 amount realized over \$500 of I's adjusted tax basis for property 1 (one-tenth of I's adjusted tax basis for the property, because I is treated as having sold one-tenth of the property to the partnership). Since no other transfer to J was made as consideration for the transfer of property 2, the partnership's assumption of the qualified liability of J encumbering property 2 is not treated as part of a sale.

*Example 10. Treatment of debt-financed transfers of consideration by partnership.* (i) K transfers property Z to partnership KL in exchange for an interest therein on April 9, 1992. On September 13, 1992, the partnership incurs a liability of \$20,000. On November 17, 1992, the partnership transfers \$20,000 to K, and \$10,000 of this transfer is allocable under the rules of § 1.163-8T to proceeds of the partnership liability incurred on September 13, 1992. The remaining \$10,000 is paid from other partnership funds. Assume that, under section 752 and the corresponding regulations, the \$20,000 liability incurred on September 13, 1992, is a recourse liability of the partnership and K's share of that liability is \$10,000 on November 17, 1992.

(ii) Because a portion of the transfer made to K on November 17, 1992, is allocable under § 1.163-8T to proceeds of a partnership liability that was incurred by the partnership within 90 days of that transfer, K is required to take the transfer into account in applying the rules of this section and § 1.707-3 only to the extent that the amount of the transfer exceeds K's allocable share of the liability used to fund the transfer. K's allocable share of the \$20,000 liability used to fund \$10,000 of the transfer to K is \$5,000 (K's share of the liability (\$10,000) multiplied by the fraction obtained by dividing—

(A) The amount of the liability that is allocable to the distribution to K (\$10,000); by

(B) The total amount of such liability (\$20,000)).

(iii) Therefore, K is required to take into account only \$15,000 of the \$20,000 partnership transfer to K for purposes of this section and § 1.707-3. Under these facts, assuming the within-two-year presumption is not rebutted, this \$15,000 transfer will be treated under the rule in § 1.707-3 as part of a sale by K of property Z to the partnership.

*Example 11. Borrowing against pool of receivables.* (i) M generates receivables which have an adjusted basis of zero in the ordinary course of its business. For M to use receivables as security for a loan, a commercial lender requires M to transfer the receivables to a partnership in which M has a 90 percent interest. In January, 1992, M transfers to the partnership receivables with a face value of \$100,000. N (who is not related to M) transfers \$10,000 cash to the partnership in exchange for a 10 percent interest. The partnership borrows \$80,000, secured by the receivables, and makes a distribution of \$72,000 of the proceeds to M and \$8,000 of the proceeds to N within 90 days of incurring the liability. M's share of the liability under § 1.707-5(a)(2) is \$72,000 (90 percent×\$80,000).

(ii) Because the transfer of the loan proceeds to M is allocable under § 1.163-8T to proceeds of a partnership loan that was incurred by the partnership within 90 days of that transfer, M is required to take the transfer into account in applying the rules of this section and § 1.707-3 only to the extent that the amount of the transfer (\$72,000) exceeds M's allocable share of the liability used to fund the transfer. Because the distribution was a debt-financed transfer pursuant to a plan, M's allocable share of the liability is \$72,000 ( $\$72,000 \times \$80,000 / \$80,000$ ) under § 1.707-5(b)(2)(ii). Therefore, M is not required to take into account any of the loan proceeds for purposes of this section and § 1.707-3.

(iii) When the receivables are collected, M must be allocated the gain on the contributed receivables under section 704(c). However, the lender permits the partnership to distribute cash to the partners only to the extent of the value of new receivables contributed to the partnership. In 1993, M contributes additional receivables and receives a distribution of cash. The taxable income recognized by the partnership on the receivables is taxable income of the partnership arising in the ordinary course of the partnership's activities. To the extent the distribution does not exceed 90 percent (M's percentage interest in overall partnership profits) of the partnership's operating cash flow under § 1.707-4(b), the distribution to M is presumed not to be a part of a sale of receivables by M to the partnership, and the presumption is not rebutted under these facts.

[T.D. 8439, 57 FR 44983, Sept. 30, 1992]

**§ 1.707-6 Disguised sales of property by partnership to partner; general rules.**

(a) *In general.* Rules similar to those provided in § 1.707-3 apply in determining whether a transfer of property by a partnership to a partner and one or more transfers of money or other consideration by that partner to the partnership are treated as a sale of property, in whole or in part, to the partner.

(b) *Special rules relating to liabilities—*

(1) *In general.* Rules similar to those provided in § 1.707-5 apply to determine the extent to which an assumption of or taking subject to a liability by a partner, in connection with a transfer of property by a partnership, is considered part of a sale. Accordingly, if a partner assumes or takes property subject to a qualified liability (as defined in paragraph (b)(2) of this section) of a partnership, the partner is treated as transferring consideration to the partnership only to the extent provided in paragraph (b). If the partner assumes or takes subject to a liability that is not a qualified liability, the amount treated as consideration transferred to the partnership is the amount that the liability assumed or taken subject to by the partner exceeds the partner's share of that liability (determined under the rules of § 1.707-5(a)(2)) immediately before the transfer. Similar to the rules provided in § 1.707-5(a)(4), if more than one partner assumes or takes subject to a liability pursuant to a plan, the amount that is treated as a transfer of consideration by each partner is the amount by which all of the liabilities (other than qualified liabilities) assumed or taken subject to by the partner pursuant to the plan exceed the partner's share of all of those liabilities immediately before the assumption or taking subject to. This paragraph (b)(1) does not apply to any liability assumed or taken subject to by a partner with a principal purpose of reducing the extent to which any other liability assumed or taken subject to by a partner is treated as a transfer of consideration under this paragraph (b).

(2) *Qualified liabilities.* (i) If a transfer of property by a partnership to a partner is not otherwise treated as part of

a sale, the partner's assumption of or taking subject to a qualified liability is not treated as part of a sale. If a transfer of property by a partnership to the partner is treated as part of a sale without regard to the partner's assumption of or taking subject to a qualified liability, the partner's assumption of or taking subject to that liability is treated as a transfer of consideration made pursuant to a sale of such property to the partner only to the extent of the lesser of—

(A) The amount of consideration that the partner would be treated as transferring to the partnership under paragraph (b) of this section if the liability were not a qualified liability; or

(B) The amount obtained by multiplying the amount of the liability at the time of its assumption or taking subject to by the partnership's net equity percentage with respect to that property.

(ii) A partnership's net equity percentage with respect to an item of property encumbered by a qualified liability equals the percentage determined by dividing—

(A) The aggregate transfers to the partnership from the partner (other than any transfer described in this paragraph (b)(2)) that are treated as the proceeds realized from the sale of the transferred property to the partner; by

(B) The excess of the fair market value of the property at the time it is transferred to the partner over any qualified liabilities of the partnership that are assumed or taken subject to by the partner at that time.

(iii) For purposes of this section, the definition of a qualified liability is that provided in § 1.707-5(a)(6) with the following exceptions—

(A) In applying the definition, the qualified liability is one that is originally an obligation of the partnership and is assumed or taken subject to by the partner in connection with a transfer of property to the partner; and

(B) If the liability was incurred by the partnership more than two years prior to the earlier of the date the partnership agrees in writing to transfer the property or the date the partnership transfers the property to the

## § 1.707-7

## 26 CFR Ch. I (4-1-14 Edition)

partner, that liability is a qualified liability whether or not it has encumbered the transferred property throughout the two-year period.

(c) *Disclosure rules.* Similar to the rules provided in §§1.707-3(c)(2) and 1.707-5(a)(7)(ii), a partnership is to disclose to the Internal Revenue Service, in accordance with §1.707-8, the facts in the following circumstances:

(1) When a partnership transfers property to a partner and the partner transfers money or other consideration to the partnership within a two-year period (without regard to the order of the transfers) and the partnership treats the transfers as other than a sale for tax purposes; and

(2) When a partner assumes or takes subject to a liability of a partnership in connection with a transfer of property by the partnership to the partner, and the partnership incurred the liability within the two-year period prior to the earlier of the date the partnership agrees in writing to the transfer of property or the date the partnership transfers the property, and the partnership treats the liability as a qualified liability under rules similar to §1.707-5(a)(6)(i)(B).

(d) *Examples.* The following examples illustrate the rules of this section.

*Example 1. Sale of property by partnership to partner.* (i) A is a member of a partnership. The partnership transfers property X to A. At the time of the transfer, property X has a fair market value of \$1,000,000. One year after the transfer, A transfers \$1,100,000 to the partnership. Assume that under the rules of section 1274 the imputed principal amount of an obligation to transfer \$1,100,000 one year after the transfer of property X is \$1,000,000 on the date of the transfer.

(ii) Since the transfer of \$1,100,000 to the partnership by A is made within two years of the transfer of property X to A, under rules similar to those provided in §1.707-3(c), the transfers are presumed to be a sale unless the facts and circumstances clearly establish otherwise. If no facts exist that would rebut this presumption, on the date that the partnership transfers property X to A, the partnership is treated as having sold property X to A in exchange for A's obligation to transfer \$1,100,000 to the partnership one year later.

*Example 2. Assumption of liability by partner.* (i) B is a member of an existing partnership. The partnership transfers property Y to B. On the date of the transfer, property Y has a fair market value of \$1,000,000 and is encum-

bered by a nonrecourse liability of \$600,000. B takes the property subject to the liability. The partnership incurred the nonrecourse liability six months prior to the transfer of property Y to B and used the proceeds to purchase an unrelated asset. Assume that, under rule of §1.707-5(a)(2)(ii) (which determines a partner's share of a nonrecourse liability), B's share of the nonrecourse liability immediately before the transfer of property Y was \$100,000.

(ii) The liability is not allocable under the rules of §1.163-8T to capital expenditures with respect to the property transferred to B and was not incurred in the ordinary course of the trade or business in which the property transferred to the partner was used or held. Since the partnership incurred the nonrecourse liability within two years of the transfer to B, under rules similar to those provided in §1.707-5(a)(5), the liability is presumed to be incurred in anticipation of the transfer unless the facts and circumstances clearly establish the contrary. Assuming no facts exist to rebut this presumption, the liability taken subject to by B is not a qualified liability. The partnership is treated as having received, on the date of the transfer of property Y to B, \$500,000 (\$600,000 liability assumed by B less B's share of the \$100,000 liability immediately prior to the transfer) as consideration for the sale of one-half (\$500,000/\$1,000,000) of property Y to B. The partnership is also treated as having distributed to B, in B's capacity as a partner, the other one-half of property Y.

[T.D. 8439, 57 FR 44987, Sept. 30, 1992]

### § 1.707-7 Disguised sales of partnership interests. [Reserved]

### § 1.707-8 Disclosure of certain information.

(a) *In general.* The disclosure referred to in §1.707-3(c)(2) (regarding certain transfers made within two years of each other), §1.707-5(a)(7)(ii) (regarding a liability incurred within two years prior to a transfer of property), and §1.707-6(c) (relating to transfers of property from a partnership to a partner in situations analogous to those listed above) is to be made in accordance with paragraph (b) of this section.

(b) *Method of providing disclosure.* Disclosure is to be made on a completed Form 8275 or on a statement attached to the return of the transferor of property for the taxable year of the transfer that includes the following:

(1) A caption identifying the statement as disclosure under section 707;

(2) An identification of the item (or group of items) with respect to which disclosure is made;

(3) The amount of each item; and

(4) The facts affecting the potential tax treatment of the item (or items) under section 707.

(c) *Disclosure by certain partnerships.* If more than one partner transfers property to a partnership pursuant to a plan, the disclosure required by this section may be made by the partnership on behalf of all the transferors rather than by each transferor separately.

[T.D. 8439, 57 FR 44988, Sept. 30, 1992]

#### § 1.707-9 Effective dates and transitional rules.

(a) *Sections 1.707-3 through 1.707-6—(1) In general.* Except as provided in paragraph (a)(3) of this section, §§ 1.707-3 through 1.707-6 apply to any transaction with respect to which all transfers that are part of a sale of an item of property occur after April 24, 1991.

(2) *Transfers occurring on or before April 24, 1991.* Except as otherwise provided in paragraph (a)(3) of this section, in the case of any transaction with respect to which one or more of the transfers occurs on or before April 24, 1991, the determination of whether the transaction is a disguised sale of property (including a partnership interest) under section 707(a)(2) is to be made on the basis of the statute and the guidance provided regarding that provision in the legislative history of section 73 of the Tax Reform Act of 1984 (Pub. L. 98-369, 98 Stat. 494). See H.R. Rep. No. 861, 98th Cong., 2d Sess. 859-62 (1984); S. Prt. No. 169 (Vol. I), 98th Cong., 2d Sess. 223-32 (1984); H.R. Rep. No. 432 (Pt. 2), 98th Cong., 2d Sess. 1216-21 (1984).

(3) *Effective date of section 73 of the Tax Reform Act of 1984.* Sections 1.707-3 through 1.707-6 do not apply to any transfer of money or other consideration to which section 73(a) of the Tax Reform Act of 1984 (Pub. L. 98-369, 98 Stat. 494) does not apply pursuant to section 73(b) of that Act.

(b) *Section 1.707-8 disclosure of certain information.* The disclosure provisions described in § 1.707-8 apply to transactions with respect to which all trans-

fers that are part of a sale of property occur after September 30, 1992.

[T.D. 8439, 57 FR 44989, Sept. 30, 1992]

#### § 1.708-1 Continuation of partnership.

(a) *General rule.* For purposes of subchapter K, chapter 1 of the Code, an existing partnership shall be considered as continuing if it is not terminated.

(b) *Termination—(1) General rule.* A partnership shall terminate when the operations of the partnership are discontinued and no part of any business, financial operation, or venture of the partnership continues to be carried on by any of its partners in a partnership. For example, on November 20, 1956, A and B, each of whom is a 20-percent partner in partnership ABC, sell their interests to C, who is a 60-percent partner. Since the business is no longer carried on by any of its partners in a partnership, the ABC partnership is terminated as of November 20, 1956. However, where partners DEF agree on April 30, 1957, to dissolve their partnership, but carry on the business through a winding up period ending September 30, 1957, when all remaining assets, consisting only of cash, are distributed to the partners, the partnership does not terminate because of cessation of business until September 30, 1957.

(i) Upon the death of one partner in a 2-member partnership, the partnership shall not be considered as terminated if the estate or other successor in interest of the deceased partner continues to share in the profits or losses of the partnership business.

(ii) For the continuation of a partnership where payments are being made under section 736 (relating to payments to a retiring partner or a deceased partner's successor in interest), see paragraph (a)(6) of § 1.736-1.

(2) A partnership shall terminate when 50 percent or more of the total interest in partnership capital and profits is sold or exchanged within a period of 12 consecutive months. Such sale or exchange includes a sale or exchange to another member of the partnership. However, a disposition of a partnership interest by gift (including assignment to a successor in interest), bequest, or inheritance, or the liquidation of a partnership interest, is not a sale or

exchange for purposes of this subparagraph. Moreover, if the sale or exchange of an interest in a partnership (upper-tier partnership) that holds an interest in another partnership (lower-tier partnership) results in a termination of the upper-tier partnership, the upper-tier partnership is treated as exchanging its entire interest in the capital and profits of the lower-tier partnership. If the sale or exchange of an interest in an upper-tier partnership does not terminate the upper-tier partnership, the sale or exchange of an interest in the upper-tier partnership is not treated as a sale or exchange of a proportionate share of the upper-tier partnership's interest in the capital and profits of the lower-tier partnership. The previous two sentences apply to terminations of partnerships under section 708(b)(1)(B) occurring on or after May 9, 1997; however, the sentences may be applied to terminations occurring on or after May 9, 1996, provided that the partnership and its partners apply the sentences to the termination in a consistent manner. Furthermore, the contribution of property to a partnership does not constitute such a sale or exchange. See, however, paragraph (c)(3) of § 1.731-1. Fifty percent or more of the total interest in partnership capital and profits means 50 percent or more of the total interest in partnership capital plus 50 percent or more of the total interest in partnership profits. Thus, the sale of a 30-percent interest in partnership capital and a 60-percent interest in partnership profits is not the sale or exchange of 50 percent or more of the total interest in partnership capital and profits. If one or more partners sell or exchange interests aggregating 50 percent or more of the total interest in partnership capital and 50 percent or more of the total interest in partnership profits within a period of 12 consecutive months, such sale or exchange is considered as being within the provisions of this subparagraph. When interests are sold or exchanged on different dates, the percentages to be added are determined as of the date of each sale. For example, with respect to the ABC partnership, the sale by A on May 12, 1956, of a 30-percent interest in capital and profits to D, and the sale by B on March 27,

1957, of a 30-percent interest in capital and profits to E, is a sale of a 50-percent or more interest. Accordingly, the partnership is terminated as of March 27, 1957. However, if, on March 27, 1957, D instead of B, sold his 30-percent interest in capital and profits to E, there would be no termination since only one 30-percent interest would have been sold or exchanged within a 12-month period.

(3) For purposes of subchapter K, chapter 1 of the Code, a partnership taxable year closes with respect to all partners on the date on which the partnership terminates. See section 706(c)(1) and paragraph (c)(1) of § 1.706-1. The date of termination is:

(i) For purposes of section 708(b)(1)(A), the date on which the winding up of the partnership affairs is completed.

(ii) For purposes of section 708(b)(1)(B), the date of the sale or exchange of a partnership interest which, of itself or together with sales or exchanges in the preceding 12 months, transfers an interest of 50 percent or more in both partnership capital and profits.

(4) If a partnership is terminated by a sale or exchange of an interest, the following is deemed to occur: The partnership contributes all of its assets and liabilities to a new partnership in exchange for an interest in the new partnership; and, immediately thereafter, the terminated partnership distributes interests in the new partnership to the purchasing partner and the other remaining partners in proportion to their respective interests in the terminated partnership in liquidation of the terminated partnership, either for the continuation of the business by the new partnership or for its dissolution and winding up. In the latter case, the new partnership terminates in accordance with (b)(1) of this section. This paragraph (b)(4) applies to terminations of partnerships under section 708(b)(1)(B) occurring on or after May 9, 1997; however, this paragraph (b)(4) may be applied to terminations occurring on or after May 9, 1996, provided that the partnership and its partners apply this paragraph (b)(4) to the termination in a consistent manner. The provisions of

this paragraph (b)(4) are illustrated by the following example:

*Example.* (i) A and B each contribute \$10,000 cash to form AB, a general partnership, as equal partners. AB purchases depreciable Property X for \$20,000. Property X increases in value to \$30,000, at which time A sells its entire 50 percent interest to C for \$15,000 in a transfer that terminates the partnership under section 708(b)(1)(B). At the time of the sale, Property X had an adjusted tax basis of \$16,000 and a book value of \$16,000 (original \$20,000 tax basis and book value reduced by \$4,000 of depreciation). In addition, A and B each had a capital account balance of \$8,000 (original \$10,000 capital account reduced by \$2,000 of depreciation allocations with respect to Property X).

(ii) Following the deemed contribution of assets and liabilities by the terminated AB partnership to a new partnership (new AB) and the liquidation of the terminated AB partnership, the adjusted tax basis of Property X in the hands of new AB is \$16,000. See Section 723. The book value of Property X in the hands of new partnership AB is also \$16,000 (the book value of Property X immediately before the termination) and B and C each have a capital account of \$8,000 in new AB (the balance of their capital accounts in AB prior to the termination). See §1.704-1(b)(2)(iv)(I) (providing that the deemed contribution and liquidation with regard to the terminated partnership are disregarded in determining the capital accounts of the partners and the books of the new partnership). Additionally, under §301.6109-1(d)(2)(iii) of this chapter, new AB retains the taxpayer identification number of the terminated AB partnership.

(iii) Property X was not section 704(c) property in the hands of terminated AB and is therefore not treated as section 704(c) property in the hands of new AB, even though Property X is deemed contributed to new AB at a time when the fair market value of Property X (\$30,000) was different from its adjusted tax basis (\$16,000). See §1.704-3(a)(3)(i) (providing that property contributed to a new partnership under §1.708-1(b)(4) is treated as section 704(c) property only to the extent that the property was section 704(c) property in the hands of the terminated partnership immediately prior to the termination).

(5) If a partnership is terminated by a sale or exchange of an interest in the partnership, a section 754 election (including a section 754 election made by the terminated partnership on its final return) that is in effect for the taxable year of the terminated partnership in which the sale occurs, applies with respect to the incoming partner. There-

fore, the bases of partnership assets are adjusted pursuant to sections 743 and 755 prior to their deemed contribution to the new partnership. This paragraph (b)(5) applies to terminations of partnerships under section 708(b)(1)(B) occurring on or after May 9, 1997; however, this paragraph (b)(5) may be applied to terminations occurring on or after May 9, 1996, provided that the partnership and its partners apply this paragraph (b)(5) to the termination in a consistent manner.

(c) *Merger or consolidation*—(1) *General rule.* If two or more partnerships merge or consolidate into one partnership, the resulting partnership shall be considered a continuation of the merging or consolidating partnership the members of which own an interest of more than 50 percent in the capital and profits of the resulting partnership. If the resulting partnership can, under the preceding sentence, be considered a continuation of more than one of the merging or consolidating partnerships, it shall, unless the Commissioner permits otherwise, be considered the continuation solely of that partnership which is credited with the contribution of assets having the greatest fair market value (net of liabilities) to the resulting partnership. Any other merging or consolidating partnerships shall be considered as terminated. If the members of none of the merging or consolidating partnerships have an interest of more than 50 percent in the capital and profits of the resulting partnership, all of the merged or consolidated partnerships are terminated, and a new partnership results.

(2) *Tax returns.* The taxable years of any merging or consolidating partnerships which are considered terminated shall be closed in accordance with the provisions of section 706(c) and the regulations thereunder, and such partnerships shall file their returns for a taxable year ending upon the date of termination, *i.e.*, the date of merger or consolidation. The resulting partnership shall file a return for the taxable year of the merging or consolidating partnership that is considered as continuing. The return shall state that the resulting partnership is a continuation

of such merging or consolidating partnership, shall retain the employer identification number (EIN) of the partnership that is continuing, and shall include the names, addresses, and EINs of the other merged or consolidated partnerships. The respective distributive shares of the partners for the periods prior to and including the date of the merger or consolidation and subsequent to the date of merger or consolidation shall be shown as a part of the return.

(3) *Form of a merger or consolidation—*  
 (i) *Assets-over form.* When two or more partnerships merge or consolidate into one partnership under the applicable jurisdictional law without undertaking a form for the merger or consolidation, or undertake a form for the merger or consolidation that is not described in paragraph (c)(3)(ii) of this section, any merged or consolidated partnership that is considered terminated under paragraph (c)(1) of this section is treated as undertaking the assets-over form for Federal income tax purposes. Under the assets-over form, the merged or consolidated partnership that is considered terminated under paragraph (c)(1) of this section contributes all of its assets and liabilities to the resulting partnership in exchange for an interest in the resulting partnership, and immediately thereafter, the terminated partnership distributes interests in the resulting partnership to its partners in liquidation of the terminated partnership.

(ii) *Assets-up form.* Despite the partners' transitory ownership of the terminated partnership's assets, the form of a partnership merger or consolidation will be respected for Federal income tax purposes if the merged or consolidated partnership that is considered terminated under paragraph (c)(1) of this section distributes all of its assets to its partners (in a manner that causes the partners to be treated, under the laws of the applicable jurisdiction, as the owners of such assets) in liquidation of the partners' interests in the terminated partnership, and immediately thereafter, the partners in the terminated partnership contribute the distributed assets to the resulting partnership in exchange for interests in the resulting partnership.

(4) *Sale of an interest in the merging or consolidating partnership.* In a transaction characterized under the assets-over form, a sale of all or part of a partner's interest in the terminated partnership to the resulting partnership that occurs as part of a merger or consolidation under section 708(b)(2)(A), as described in paragraph (c)(3)(i) of this section, will be respected as a sale of a partnership interest if the merger agreement (or another document) specifies that the resulting partnership is purchasing interests from a particular partner in the merging or consolidating partnership and the consideration that is transferred for each interest sold, and if the selling partner in the terminated partnership, either prior to or contemporaneous with the transaction, consents to treat the transaction as a sale of the partnership interest. See section 741 and § 1.741-1 for determining the selling partner's gain or loss on the sale or exchange of the partnership interest.

(5) *Examples.* The following examples illustrate the rules in paragraphs (c)(1) through (4) of this section:

*Example 1.* Partnership AB, in whose capital and profits A and B each own a 50-percent interest, and partnership CD, in whose capital and profits C and D each own a 50-percent interest, merge on September 30, 1999, and form partnership ABCD. Partners A, B, C, and D are on a calendar year, and partnership AB and partnership CD also are on a calendar year. After the merger, the partners have capital and profits interests as follows: A, 30 percent; B, 30 percent; C, 20 percent; and D, 20 percent. Since A and B together own an interest of more than 50 percent in the capital and profits of partnership ABCD, such partnership shall be considered a continuation of partnership AB and shall continue to file returns on a calendar year basis. Since C and D own an interest of less than 50 percent in the capital and profits of partnership ABCD, the taxable year of partnership CD closes as of September 30, 1999, the date of the merger, and partnership CD is terminated as of that date. Partnership ABCD is required to file a return for the taxable year January 1 to December 31, 1999, indicating thereon that, until September 30, 1999, it was partnership AB. Partnership CD is required to file a return for its final taxable year, January 1 through September 30, 1999.

*Example 2.* (i) Partnership X, in whose capital and profits A owns a 40-percent interest

and B owns a 60-percent interest, and partnership Y, in whose capital and profits B owns a 60-percent interest and C owns a 40-percent interest, merge on September 30, 1999. The fair market value of the partnership X assets (net of liabilities) is \$100X, and the fair market value of the partnership Y assets (net of liabilities) is \$200X. The merger is accomplished under state law by partnership Y contributing its assets and liabilities to partnership X in exchange for interests in partnership X, with partnership Y then liquidating, distributing interests in partnership X to B and C.

(ii) B, a partner in both partnerships prior to the merger, owns a greater than 50-percent interest in the resulting partnership following the merger. Accordingly, because the fair market value of partnership Y's assets (net of liabilities) was greater than that of partnership X's, under paragraph (c)(1) of this section, partnership X will be considered to terminate in the merger. As a result, even though, for state law purposes, the transaction was undertaken with partnership Y contributing its assets and liabilities to partnership X and distributing interests in partnership X to its partners, pursuant to paragraph (c)(3)(i) of this section, for Federal income tax purposes, the transaction will be treated as if partnership X contributed its assets to partnership Y in exchange for interests in partnership Y and then liquidated, distributing interests in partnership Y to A and B.

*Example 3.* (i) The facts are the same as in *Example 2*, except that partnership X is engaged in a trade or business and has, as one of its assets, goodwill. In addition, the merger is accomplished under state law by having partnership X convey an undivided 40-percent interest in each of its assets to A and an undivided 60-percent interest in each of its assets to B, with A and B then contributing their interests in such assets to partnership Y. Partnership Y also assumes all of the liabilities of partnership X.

(ii) Under paragraph (c)(3)(ii) of this section, the form of the partnership merger will be respected so that partnership X will be treated as following the assets-up form for Federal income tax purposes.

*Example 4.* (i) Partnership X and partnership Y merge when the partners of partnership X transfer their partnership X interests to partnership Y in exchange for partnership Y interests. Immediately thereafter, partnership X liquidates into partnership Y. The resulting partnership is considered a continuation of partnership Y, and partnership X is considered terminated.

(ii) The partnerships are treated as undertaking the assets-over form described in paragraph (c)(3)(i) of this section because the partnerships undertook a form that is not the assets-up form described in paragraph (c)(3)(ii) of this section. Accordingly, for

Federal income tax purposes, partnership X is deemed to contribute its assets and liabilities to partnership Y in exchange for interests in partnership Y, and, immediately thereafter, partnership X is deemed to have distributed the interests in partnership Y to its partners in liquidation of their interests in partnership X.

*Example 5.* (i) A, B, and C are partners in partnership X. D, E, and F are partners in Partnership Y. Partnership X and partnership Y merge, and the resulting partnership is considered a continuation of partnership Y. Partnership X is considered terminated. Under state law, partnerships X and Y undertake the assets-over form of paragraph (c)(3)(i) of this section to accomplish the partnership merger. C does not want to become a partner in partnership Y, and partnership X does not have the resources to buy C's interest before the merger. C, partnership X, and partnership Y enter into an agreement specifying that partnership Y will purchase C's interest in partnership X for \$150 before the merger, and as part of the agreement, C consents to treat the transaction in a manner that is consistent with the agreement. As part of the merger, partnership X receives from partnership Y \$150 that will be distributed to C immediately before the merger, and interests in partnership Y in exchange for partnership X's assets and liabilities.

(ii) Because the merger agreement satisfies the requirements of paragraph (c)(4) of this section and C provides the necessary consent, C will be treated as selling its interest in partnership X to partnership Y for \$150 before the merger. See section 741 and § 1.741-1 to determine the amount and character of C's gain or loss on the sale or exchange of its interest in partnership X.

(iii) Because the merger agreement satisfies the requirements of paragraph (c)(4) of this section, partnership Y is considered to have purchased C's interest in partnership X for \$150 immediately before the merger. See § 1.704-1(b)(2)(iv)(I) for determining partnership Y's capital account in partnership X. Partnership Y's adjusted basis of its interest in partnership X is determined under section 742 and § 1.742-1. To the extent any built-in gain or loss on section 704(c) property in partnership X would have been allocated to C (including any allocations with respect to property revaluations under section 704(b) (reverse section 704(c) allocations)), see section 704 and § 1.704-3(a)(7) for determining the built-in gain or loss or reverse section 704(c) allocations apportionable to partnership Y. Similarly, after the merger is completed, the built-in gain or loss and reverse section 704(c) allocations attributable to C's interest are apportioned to D, E, and F under section 704(c) and § 1.704-3(a)(7).

(iv) Under paragraph (c)(3)(i) of this section, partnership X contributes its assets and

liabilities attributable to the interests of A and B to partnership Y in exchange for interests in partnership Y; and, immediately thereafter, partnership X distributes the interests in partnership Y to A and B in liquidation of their interests in partnership X. At the same time, partnership X distributes assets to partnership Y in liquidation of partnership Y's interest in partnership X. Partnership Y's bases in the distributed assets are determined under section 732(b).

(6) *Prescribed form not followed in certain circumstances.* (i) If any transactions described in paragraph (c)(3) or (4) of this section are part of a larger series of transactions, and the substance of the larger series of transactions is inconsistent with following the form prescribed in such paragraph, the Commissioner may disregard such form, and may recast the larger series of transactions in accordance with their substance.

(ii) *Example.* The following example illustrates the rules in paragraph (c)(6) of this section:

*Example.* A, B, and C are equal partners in partnership ABC. ABC holds no section 704(c) property. D and E are equal partners in partnership DE. B and C want to exchange their interests in ABC for all of the interests in DE. However, rather than exchanging partnership interests, DE merges with ABC by undertaking the assets-up form described in paragraph (c)(3)(ii) of this section, with D and E receiving title to the DE assets and then contributing the assets to ABC in exchange for interests in ABC. As part of a pre-arranged transaction, the assets acquired from DE are contributed to a new partnership, and the interests in the new partnership are distributed to B and C in complete liquidation of their interests in ABC. The merger and division in this example represent a series of transactions that in substance are an exchange of interests in ABC for interests in DE. Even though paragraph (c)(3)(ii) of this section provides that the form of a merger will be respected for Federal income tax purposes if the steps prescribed under the assets-up form are followed, and paragraph (d)(3)(i) of this section provides a form that will be followed for Federal income tax purposes in the case of partnership divisions, these forms will not be respected for Federal income tax purposes under these facts, and the transactions will be recast in accordance with their substance as a taxable exchange of interests in ABC for interests in DE.

(7) *Effective date.* This paragraph (c) is applicable to partnership mergers occurring on or after January 4, 2001.

However, a partnership may apply paragraph (c) of this section to partnership mergers occurring on or after January 11, 2000.

(d) *Division of a partnership*—(1) *General rule.* Upon the division of a partnership into two or more partnerships, any resulting partnership (as defined in paragraph (d)(4)(iv) of this section) or resulting partnerships shall be considered a continuation of the prior partnership (as defined in paragraph (d)(4)(ii) of this section) if the members of the resulting partnership or partnerships had an interest of more than 50 percent in the capital and profits of the prior partnership. Any other resulting partnership will not be considered a continuation of the prior partnership but will be considered a new partnership. If the members of none of the resulting partnerships owned an interest of more than 50 percent in the capital and profits of the prior partnership, none of the resulting partnerships will be considered a continuation of the prior partnership, and the prior partnership will be considered to have terminated. Where members of a partnership which has been divided into two or more partnerships do not become members of a resulting partnership which is considered a continuation of the prior partnership, such members' interests shall be considered liquidated as of the date of the division.

(2) *Tax consequences*—(i) *Tax returns.* The resulting partnership that is treated as the divided partnership (as defined in paragraph (d)(4)(i) of this section) shall file a return for the taxable year of the partnership that has been divided and retain the employer identification number (EIN) of the prior partnership. The return shall include the names, addresses, and EINs of all resulting partnerships that are regarded as continuing. The return shall also state that the partnership is a continuation of the prior partnership and shall set forth separately the respective distributive shares of the partners for the periods prior to and including the date of the division and subsequent to the date of division. All other resulting partnerships that are regarded as continuing and new partnerships shall file separate returns for the taxable year beginning on the day after the date of

the division with new EINs for each partnership. The return for a resulting partnership that is regarded as continuing and that is not the divided partnership shall include the name, address, and EIN of the prior partnership.

(ii) *Elections.* All resulting partnerships that are regarded as continuing are subject to preexisting elections that were made by the prior partnership. A subsequent election that is made by a resulting partnership does not affect the other resulting partnerships.

(3) *Form of a division*—(i) *Assets-over form.* When a partnership divides into two or more partnerships under applicable jurisdictional law without undertaking a form for the division, or undertakes a form that is not described in paragraph (d)(3)(ii) of this section, the transaction will be characterized under the assets-over form for Federal income tax purposes.

(A) *Assets-over form where at least one resulting partnership is a continuation of the prior partnership.* In a division under the assets-over form where at least one resulting partnership is a continuation of the prior partnership, the divided partnership (as defined in paragraph (d)(4)(i) of this section) contributes certain assets and liabilities to a recipient partnership (as defined in paragraph (d)(4)(iii) of this section) or recipient partnerships in exchange for interests in such recipient partnership or partnerships; and, immediately thereafter, the divided partnership distributes the interests in such recipient partnership or partnerships to some or all of its partners in partial or complete liquidation of the partners' interests in the divided partnership.

(B) *Assets-over form where none of the resulting partnerships is a continuation of the prior partnership.* In a division under the assets-over form where none of the resulting partnerships is a continuation of the prior partnership, the prior partnership will be treated as contributing all of its assets and liabilities to new resulting partnerships in exchange for interests in the resulting partnerships; and, immediately thereafter, the prior partnership will be treated as liquidating by distributing the interests in the new resulting partnerships to the prior partnership's partners.

(ii) *Assets-up form*—(A) *Assets-up form where the partnership distributing assets is a continuation of the prior partnership.* Despite the partners' transitory ownership of some of the prior partnership's assets, the form of a partnership division will be respected for Federal income tax purposes if the divided partnership (which, pursuant to § 1.708-1(d)(4)(i), must be a continuing partnership) distributes certain assets (in a manner that causes the partners to be treated, under the laws of the applicable jurisdiction, as the owners of such assets) to some or all of its partners in partial or complete liquidation of the partners' interests in the divided partnership, and immediately thereafter, such partners contribute the distributed assets to a recipient partnership or partnerships in exchange for interests in such recipient partnership or partnerships. In order for such form to be respected for transfers to a particular recipient partnership, all assets held by the prior partnership that are transferred to the recipient partnership must be distributed to, and then contributed by, the partners of the recipient partnership.

(B) *Assets-up form where none of the resulting partnerships are a continuation of the prior partnership.* If none of the resulting partnerships are a continuation of the prior partnership, then despite the partners' transitory ownership of some or all of the prior partnership's assets, the form of a partnership division will be respected for Federal income tax purposes if the prior partnership distributes certain assets (in a manner that causes the partners to be treated, under the laws of the applicable jurisdiction, as the owners of such assets) to some or all of its partners in partial or complete liquidation of the partners' interests in the prior partnership, and immediately thereafter, such partners contribute the distributed assets to a resulting partnership or partnerships in exchange for interests in such resulting partnership or partnerships. In order for such form to be respected for transfers to a particular resulting partnership, all assets held by the prior partnership that are transferred to the resulting partnership

must be distributed to, and then contributed by, the partners of the resulting partnership. If the prior partnership does not liquidate under the applicable jurisdictional law, then with respect to the assets and liabilities that, in form, are not transferred to a new resulting partnership, the prior partnership will be treated as transferring these assets and liabilities to a new resulting partnership under the assets-over form described in paragraph (d)(3)(i)(B) of this section.

(4) *Definitions*—(i) *Divided partnership*. For purposes of paragraph (d) of this section, the divided partnership is the continuing partnership which is treated, for Federal income tax purposes, as transferring the assets and liabilities to the recipient partnership or partnerships, either directly (under the assets-over form) or indirectly (under the assets-up form). If the resulting partnership that, in form, transferred the assets and liabilities in connection with the division is a continuation of the prior partnership, then such resulting partnership will be treated as the divided partnership. If a partnership divides into two or more partnerships and only one of the resulting partnerships is a continuation of the prior partnership, then the resulting partnership that is a continuation of the prior partnership will be treated as the divided partnership. If a partnership divides into two or more partnerships without undertaking a form for the division that is recognized under paragraph (d)(3) of this section, or if the resulting partnership that had, in form, transferred assets and liabilities is not considered a continuation of the prior partnership, and more than one resulting partnership is considered a continuation of the prior partnership, the continuing resulting partnership with the assets having the greatest fair market value (net of liabilities) will be treated as the divided partnership.

(ii) *Prior partnership*. For purposes of paragraph (d) of this section, the prior partnership is the partnership subject to division that exists under applicable jurisdictional law before the division.

(iii) *Recipient partnership*. For purposes of paragraph (d) of this section, a recipient partnership is a partnership that is treated as receiving, for Federal

income tax purposes, assets and liabilities from a divided partnership, either directly (under the assets-over form) or indirectly (under the assets-up form).

(iv) *Resulting partnership*. For purposes of paragraph (d) of this section, a resulting partnership is a partnership resulting from the division that exists under applicable jurisdictional law after the division and that has at least two partners who were partners in the prior partnership. For example, where a prior partnership divides into two partnerships, both partnerships existing after the division are resulting partnerships.

(5) *Examples*. The following examples illustrate the rules in paragraphs (d)(1), (2), (3), and (4) of this section:

*Example 1.* Partnership ABCD is in the real estate and insurance businesses. A owns a 40-percent interest, and B, C, and D each owns a 20-percent interest, in the capital and profits of the partnership. The partnership and the partners report their income on a calendar year. On November 1, 1999, they separate the real estate and insurance businesses and form two partnerships. Partnership AB takes over the real estate business, and partnership CD takes over the insurance business. Because members of resulting partnership AB owned more than a 50-percent interest in the capital and profits of partnership ABCD (A, 40 percent, and B, 20 percent), partnership AB shall be considered a continuation of partnership ABCD. Partnership AB is required to file a return for the taxable year January 1 to December 31, 1999, indicating thereon that until November 1, 1999, it was partnership ABCD. Partnership CD is considered a new partnership formed at the beginning of the day on November 2, 1999, and is required to file a return for the taxable year it adopts pursuant to section 706(b) and the applicable regulations.

*Example 2.* (i) Partnership ABCD owns properties W, X, Y, and Z, and divides into partnership AB and partnership CD. Under paragraph (d)(1) of this section, partnership AB is considered a continuation of partnership ABCD and partnership CD is considered a new partnership. Partnership ABCD distributes property Y to C and titles property Y in C's name. Partnership ABCD distributes property Z to D and titles property Z in D's name. C and D then contribute properties Y and Z, respectively, to partnership CD in exchange for interests in partnership CD. Properties W and X remain in partnership AB.

(ii) Under paragraph (d)(3)(ii) of this section, partnership ABCD will be treated as following the assets-up form for Federal income tax purposes.

*Example 3.* (i) The facts are the same as in *Example 2*, except partnership ABCD distributes property Y to C and titles property Y in C's name. C then contributes property Y to partnership CD. Simultaneously, partnership ABCD contributes property Z to partnership CD in exchange for an interest in partnership CD. Immediately thereafter, partnership ABCD distributes the interest in partnership CD to D in liquidation of D's interest in partnership ABCD.

(ii) Under paragraph (d)(3)(i) of this section, because partnership ABCD did not undertake the assets-up form with respect to all of the assets transferred to partnership CD, partnership ABCD will be treated as undertaking the assets-over form in transferring the assets to partnership CD. Accordingly, for Federal income tax purposes, partnership ABCD is deemed to contribute property Y and property Z to partnership CD in exchange for interests in partnership CD, and immediately thereafter, partnership ABCD is deemed to distribute the interests in partnership CD to partner C and partner D in liquidation of their interests in partnership ABCD.

*Example 4.* (i) Partnership ABCD owns three parcels of property: property X, with a value of \$500; property Y, with a value of \$300; and property Z, with a value of \$200. A and B each own a 40-percent interest in the capital and profits of partnership ABCD, and C and D each own a 10 percent interest in the capital and profits of partnership ABCD. On November 1, 1999, partnership ABCD divides into three partnerships (AB1, AB2, and CD) by contributing property X to a newly formed partnership (AB1) and distributing all interests in such partnership to A and B as equal partners, and by contributing property Z to a newly formed partnership (CD) and distributing all interests in such partnership to C and D as equal partners in exchange for all of their interests in partnership ABCD. While partnership ABCD does not transfer property Y, C and D cease to be partners in the partnership. Accordingly, after the division, the partnership holding property Y is referred to as partnership AB2.

(ii) Partnerships AB1 and AB2 both are considered a continuation of partnership ABCD, while partnership CD is considered a new partnership formed at the beginning of the day on November 2, 1999. Under paragraph (d)(3)(i)(A) of this section, partnership ABCD will be treated as following the assets-over form, with partnership ABCD contributing property X to partnership AB1 and property Z to partnership CD, and distributing the interests in such partnerships to the designated partners.

*Example 5.* (i) The facts are the same as in *Example 4*, except that partnership ABCD divides into three partnerships by operation of state law, without undertaking a form.

(ii) Under the last sentence of paragraph (d)(4)(i) of this section, partnership AB1 will be treated as the resulting partnership that is the divided partnership. Under paragraph (d)(3)(i)(A) of this section, partnership ABCD will be treated as following the assets-over form, with partnership ABCD contributing property Y to partnership AB2 and property Z to partnership CD, and distributing the interests in such partnerships to the designated partners.

*Example 6.* (i) The facts are the same as in *Example 4*, except that partnership ABCD divides into three partnerships by contributing property X to newly-formed partnership AB1 and property Y to newly-formed partnership AB2 and distributing all interests in each partnership to A and B in exchange for all of their interests in partnership ABCD.

(ii) Because resulting partnership CD is not a continuation of the prior partnership (partnership ABCD), partnership CD cannot be treated, for Federal income tax purposes, as the partnership that transferred assets (*i.e.*, the divided partnership), but instead must be treated as a recipient partnership. Under the last sentence of paragraph (d)(4)(i) of this section, partnership AB1 will be treated as the resulting partnership that is the divided partnership. Under paragraph (d)(3)(i)(A) of this section, partnership ABCD will be treated as following the assets-over form, with partnership ABCD contributing property Y to partnership AB2 and property Z to partnership CD, and distributing the interests in such partnerships to the designated partners.

*Example 7.* (i) Partnership ABCDE owns Blackacre, Whiteacre, and Redacre, and divides into partnership AB, partnership CD, and partnership DE. Under paragraph (d)(1) of this section, partnership ABCDE is considered terminated (and, hence, none of the resulting partnerships are a continuation of the prior partnership) because none of the members of the new partnerships (partnership AB, partnership CD, and partnership DE) owned an interest of more than 50 percent in the capital and profits of partnership ABCDE.

(ii) Partnership ABCDE distributes Blackacre to A and B and titles Blackacre in the names of A and B. A and B then contribute Blackacre to partnership AB in exchange for interests in partnership AB. Partnership ABCDE will be treated as following the assets-up form described in paragraph (d)(3)(ii)(B) of this section for Federal income tax purposes.

(iii) Partnership ABCDE distributes Whiteacre to C and D and titles Whiteacre in the names of C and D. C and D then contribute Whiteacre to partnership CD in exchange for interests in partnership CD. Partnership ABCDE will be treated as following the assets-up form described in paragraph (d)(3)(ii)(B) of this section for Federal income tax purposes.

(iv) Partnership ABCDE does not liquidate under state law so that, in form, the assets in new partnership DE are not considered to have been transferred under state law. Partnership ABCDE will be treated as undertaking the assets-over form described in paragraph (d)(3)(i)(B) of this section for Federal income tax purposes with respect to the assets of partnership DE. Thus, partnership ABCDE will be treated as contributing Redacre to partnership DE in exchange for interests in partnership DE; and, immediately thereafter, partnership ABCDE will be treated as distributing interests in partnership DE to D and E in liquidation of their interests in partnership ABCDE. Partnership ABCDE then terminates.

(6) *Prescribed form not followed in certain circumstances.* If any transactions described in paragraph (d)(3) of this section are part of a larger series of transactions, and the substance of the larger series of transactions is inconsistent with following the form prescribed in such paragraph, the Commissioner may disregard such form, and may recast the larger series of transactions in accordance with their substance.

(7) *Effective date.* This paragraph (d) is applicable to partnership divisions occurring on or after January 4, 2001. However, a partnership may apply paragraph (d) of this section to partnership divisions occurring on or after January 11, 2000.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 8717, 62 FR 25500, May 9, 1997; T.D. 8925, 65 FR 719, Jan. 4, 2001; 67 FR 57330, Sept. 10, 2002]

#### § 1.709-1 Treatment of organization and syndication costs.

(a) *General rule.* Except as provided in paragraph (b) of this section, no deduction shall be allowed under chapter 1 of the Code to a partnership or to any partner for any amounts paid or incurred, directly or indirectly, in partnership taxable years beginning after December 31, 1975, to organize a partnership, or to promote the sale of, or to sell, an interest in the partnership.

(b) *Election to amortize organizational expenses—(1) In general.* Under section 709(b), a partnership may elect to amortize organizational expenses as defined in section 709(b)(3) and § 1.709-2(a). In the taxable year in which a partnership begins business, an electing partnership may deduct an amount equal

to the lesser of the amount of the organizational expenses of the partnership, or \$5,000 (reduced (but not below zero) by the amount by which the organizational expenses exceed \$50,000). The remainder of the organizational expenses is deductible ratably over the 180-month period beginning with the month in which the partnership begins business. All organizational expenses of the partnership are considered in determining whether the organizational expenses exceed \$50,000, including expenses incurred on or before October 22, 2004.

(2) *Time and manner of making election.* A partnership is deemed to have made an election under section 709(b) to amortize organizational expenses as defined in section 709(b)(3) and § 1.709-2(a) for the taxable year in which the partnership begins business. A partnership may choose to forgo the deemed election by affirmatively electing to capitalize its organizational expenses on a timely filed Federal income tax return (including extensions) for the taxable year in which the partnership begins business. The election either to amortize organizational expenses under section 709(b) or to capitalize organizational expenses is irrevocable and applies to all organizational expenses of the partnership. A change in the characterization of an item as an organizational expense is a change in method of accounting to which sections 446 and 481(a) apply if the partnership treated the item consistently for two or more taxable years. A change in the determination of the taxable year in which the partnership begins business also is treated as a change in method of accounting if the partnership amortized organizational expenses for two or more taxable years.

(3) *Liquidation of partnership.* If there is a winding up and complete liquidation of the partnership prior to the end of the amortization period, the unamortized amount of organizational expenses is a partnership deduction in its final taxable year to the extent provided under section 165 (relating to losses). However, there is no partnership deduction with respect to its capitalized syndication expenses.

(4) *Examples.* The following examples illustrate the application of this section:

*Example 1. Expenditures of \$5,000 or less.* Partnership X, a calendar year taxpayer, incurs \$3,000 of organizational expenses after October 22, 2004, and begins business on July 1, 2011. Under paragraph (b)(2) of this section, Partnership X is deemed to have elected to amortize organizational expenses under section 709(b) in 2011. Therefore, Partnership X may deduct the entire amount of the organizational expenses in 2011, the taxable year in which Partnership X begins business.

*Example 2. Expenditures of more than \$5,000 but less than or equal to \$50,000.* The facts are the same as in *Example 1* except that Partnership X incurs organizational expenses of \$41,000. Under paragraph (b)(2) of this section, Partnership X is deemed to have elected to amortize organizational expenses under section 709(b) in 2011. Therefore, Partnership X may deduct \$5,000 and the portion of the remaining \$36,000 that is allocable to July through December of 2011 ( $\$36,000/180 \times 6 = \$1,200$ ) in 2011, the taxable year in which Partnership X begins business. Partnership X may amortize the remaining \$34,800 ( $\$36,000 - \$1,200 = \$34,800$ ) ratably over the remaining 174 months.

*Example 3. Subsequent change in the characterization of an item.* The facts are the same as in *Example 2* except that Partnership X realizes in 2013 that Partnership X incurred \$10,000 for an additional organizational expense erroneously deducted in 2011 under section 162 as a business expense. Under paragraph (b)(2) of this section, Partnership X is deemed to have elected to amortize organizational expenses under section 709(b) in 2011, including the additional \$10,000 of organizational expenses. Partnership X is using an impermissible method of accounting for the additional \$10,000 of organizational expenses and must change its method under § 1.446-1(e) and the applicable general administrative procedures in effect in 2013.

*Example 4. Subsequent redetermination of year in which business begins.* The facts are the same as in *Example 2* except that, in 2012, Partnership X deducted the organizational expenses allocable to January through December of 2012 ( $\$36,000/180 \times 12 = \$2,400$ ). In addition, in 2013 it is determined that Partnership X actually began business in 2012. Under paragraph (b)(2) of this section, Partnership X is deemed to have elected to amortize organizational expenses under section 709(b) in 2012. Partnership X impermissibly deducted organizational expenses in 2011, and incorrectly determined the amount of organizational expenses deducted in 2012. Therefore, Partnership X is using an impermissible method of accounting for the organizational expenses and must change its method under

§ 1.446-1(e) and the applicable general administrative procedures in effect in 2013.

*Example 5. Expenditures of more than \$50,000 but less than or equal to \$55,000.* The facts are the same as in *Example 1* except that Partnership X incurs organizational expenses of \$54,500. Under paragraph (b)(2) of this section, Partnership X is deemed to have elected to amortize organizational expenses under section 709(b) in 2011. Therefore, Partnership X may deduct \$500 ( $\$5,000 - \$4,500$ ) and the portion of the remaining \$54,000 that is allocable to July through December of 2011 ( $\$54,000/180 \times 6 = \$1,800$ ) in 2011, the taxable year in which Partnership X begins business. Partnership X may amortize the remaining \$52,200 ( $\$54,000 - \$1,800 = \$52,200$ ) ratably over the remaining 174 months.

*Example 6. Expenditures of more than \$55,000.* The facts are the same as in *Example 1* except that Partnership X incurs organizational expenses of \$450,000. Under paragraph (b)(2) of this section, Partnership X is deemed to have elected to amortize organizational expenses under section 709(b) in 2011. Therefore, Partnership X may deduct the amounts allocable to July through December of 2011 ( $\$450,000/180 \times 6 = \$15,000$ ) in 2011, the taxable year in which Partnership X begins business. Partnership X may amortize the remaining \$435,000 ( $\$450,000 - \$15,000 = \$435,000$ ) ratably over the remaining 174 months.

(5) *Effective/applicability date.* This section applies to organizational expenses paid or incurred after August 16, 2011. However, taxpayers may apply all the provisions of this section to organizational expenses paid or incurred after October 22, 2004, provided that the period of limitations on assessment of tax for the year the election under paragraph (b)(2) of this section is deemed made has not expired. For organizational expenses paid or incurred on or before September 8, 2008, taxpayers may instead apply § 1.709-1, as in effect prior to that date (§ 1.709-1 as contained in 26 CFR part 1 edition revised as of April 1, 2008).

[T.D. 7891, 48 FR 20048, May 4, 1983, as amended by T.D. 9411, 73 FR 38914, July 8, 2008; T.D. 9542, 76 FR 50890, Aug. 17, 2011; 76 FR 56973, Sept. 15, 2011]

#### § 1.709-2 Definitions.

(a) *Organizational expenses.* Section 709(b)(2) of the Internal Revenue Code defines organizational expenses as expenses which:

(1) Are incident to the creation of the partnership;

(2) Are chargeable to capital account; and

(3) Are of a character which, if expended incident to the creation of a partnership having an ascertainable life, would (but for section 709(a)) be amortized over such life.

An expenditure which fails to meet one or more of these three tests does not qualify as an organizational expense for purposes of section 709(b) and this section. To satisfy the statutory requirement described in paragraph (a)(1) of this section, the expense must be incurred during the period beginning at a point which is a reasonable time before the partnership begins business and ending with the date prescribed by law for filing the partnership return (determined without regard to any extensions of time) for the taxable year the partnership begins business. In addition, the expenses must be for creation of the partnership and not for operation or starting operation of the partnership trade or business. To satisfy the statutory requirement described in paragraph (a)(3) of this section, the expense must be for an item of a nature normally expected to benefit the partnership throughout the entire life of the partnership. The following are examples of organizational expenses within the meaning of section 709 and this section: Legal fees for services incident to the organization of the partnership, such as negotiation and preparation of a partnership agreement; accounting fees for services incident to the organization of the partnership; and filing fees. The following are examples of expenses that are not organizational expenses within the meaning of section 709 and this section (regardless of how the partnership characterizes them): Expenses connected with acquiring assets for the partnership or transferring assets to the partnership; expenses connected with the admission or removal of partners other than at the time the partnership is first organized; expenses connected with a contract relating to the operation of the partnership trade or business (even where the contract is between the partnership and one of its members); and syndication expenses.

(b) *Syndication expenses.* Syndication expenses are expenses connected with

the issuing and marketing of interests in the partnership. Examples of syndication expenses are brokerage fees; registration fees; legal fees of the underwriter or placement agent and the issuer (the general partner or the partnership) for securities advice and for advice pertaining to the adequacy of tax disclosures in the prospectus or placement memorandum for securities law purposes; accounting fees for preparation of representations to be included in the offering materials; and printing costs of the prospectus, placement memorandum, and other selling and promotional material. These expenses are not subject to the election under section 709(b) and must be capitalized.

(c) *Beginning business.* The determination of the date a partnership begins business for purposes of section 709 presents a question of fact that must be determined in each case in light of all the circumstances of the particular case. Ordinarily, a partnership begins business when it starts the business operations for which it was organized. The mere signing of a partnership agreement is not alone sufficient to show the beginning of business.

If the activities of the partnership have advanced to the extent necessary to establish the nature of its business operations, it will be deemed to have begun business. Accordingly, the acquisition of operating assets which are necessary to the type of business contemplated may constitute beginning business for these purposes. The term *operating assets*, as used herein, means assets that are in a state of readiness to be placed in service within a reasonable period following their acquisition.

[T.D. 7891, 48 FR 20049, May 4, 1983]

## CONTRIBUTIONS, DISTRIBUTIONS, AND TRANSFERS

### CONTRIBUTIONS TO A PARTNERSHIP

#### § 1.721-1 Nonrecognition of gain or loss on contribution.

(a) No gain or loss shall be recognized either to the partnership or to any of its partners upon a contribution of property, including installment obligations, to the partnership in exchange

for a partnership interest. This rule applies whether the contribution is made to a partnership in the process of formation or to a partnership which is already formed and operating. Section 721 shall not apply to a transaction between a partnership and a partner not acting in his capacity as a partner since such a transaction is governed by section 707. Rather than contributing property to a partnership, a partner may sell property to the partnership or may retain the ownership of property and allow the partnership to use it. In all cases, the substance of the transaction will govern, rather than its form. See paragraph (c)(3) of § 1.731-1. Thus, if the transfer of property by the partner to the partnership results in the receipt by the partner of money or other consideration, including a promissory obligation fixed in amount and time for payment, the transaction will be treated as a sale or exchange under section 707 rather than as a contribution under section 721. For the rules governing the treatment of liabilities to which contributed property is subject, see section 752 and § 1.752-1.

(b)(1) Normally, under local law, each partner is entitled to be repaid his contributions of money or other property to the partnership (at the value placed upon such property by the partnership at the time of the contribution) whether made at the formation of the partnership or subsequent thereto. To the extent that any of the partners gives up any part of his right to be repaid his contributions (as distinguished from a share in partnership profits) in favor of another partner as compensation for services (or in satisfaction of an obligation), section 721 does not apply. The value of an interest in such partnership capital so transferred to a partner as compensation for services constitutes income to the partner under section 61. The amount of such income is the fair market value of the interest in capital so transferred, either at the time the transfer is made for past services, or at the time the services have been rendered where the transfer is conditioned on the completion of the transferee's future services. The time when such income is realized depends on all the facts and circumstances, including any substantial restrictions or conditions

on the compensated partner's right to withdraw or otherwise dispose of such interest. To the extent that an interest in capital representing compensation for services rendered by the decedent prior to his death is transferred after his death to the decedent's successor in interest, the fair market value of such interest is income in respect of a decedent under section 691.

(2) To the extent that the value of such interest is: (i) Compensation for services rendered to the partnership, it is a guaranteed payment for services under section 707(c); (ii) compensation for services rendered to a partner, it is not deductible by the partnership, but is deductible only by such partner to the extent allowable under this chapter.

(c) *Underwritings of partnership interests*—(1) *In general*. For the purpose of section 721, if a person acquires a partnership interest from an underwriter in exchange for cash in a qualified underwriting transaction, the person who acquires the partnership interest is treated as transferring cash directly to the partnership in exchange for the partnership interest and the underwriter is disregarded. A qualified underwriting transaction is a transaction in which a partnership issues partnership interests for cash in an underwriting in which either the underwriter is an agent of the partnership or the underwriter's ownership of the partnership interests is transitory.

(2) *Effective date*. This paragraph (c) is effective for qualified underwriting transactions occurring on or after May 1, 1996.

(d) *Debt-for-equity exchange*—(1) *In general*. Except as otherwise provided in section 721 and the regulations under section 721, section 721 applies to a contribution of a partnership's indebtedness by a creditor to the debtor partnership in exchange for a capital or profits interest in the partnership (debt-for-equity exchange). See § 1.108-8(a) for rules in determining the debtor partnership's discharge of indebtedness income.

(2) *Exception*. Section 721 does not apply to a debt-for-equity exchange to

the extent the transfer of the partnership interest to the creditor is in exchange for the partnership's indebtedness for unpaid rent, royalties, or interest (including accrued original issue discount) that accrued on or after the beginning of the creditor's holding period for the indebtedness. The debtor partnership will not recognize gain or loss upon the transfer of a partnership interest to a creditor in a debt-for-equity exchange for unpaid rent, royalties, or interest (including accrued original issue discount).

(3) *Cross reference.* For rules in determining whether a partnership interest transferred to a creditor in a debt-for-equity exchange is treated as payment of interest or accrued original issue discount, see §§ 1.446-2 and 1.1275-2, respectively.

(4) *Effective/applicability date.* This paragraph (d) applies to debt-for-equity exchanges occurring on or after November 17, 2011.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 8665, 61 FR 19189, May 1, 1996; T.D. 9557, 76 FR 71259, Nov. 17, 2011]

#### § 1.721-2 Noncompensatory options.

(a) *Exercise of a noncompensatory option—(1) In general.* Notwithstanding § 1.721-1(b)(1), section 721 applies to the exercise (as defined in paragraph (g)(4) of this section) of a noncompensatory option (as defined in paragraph (f) of this section). Except as provided in paragraph (a)(2) of this section, section 721 applies to the exercise of a noncompensatory option when the holder pays the exercise price with either property or cash, regardless of whether the terms of the option require or permit cash payment. However, if the exercise price (as defined in paragraph (g)(5) of this section) of a noncompensatory option exceeds the capital account received by the option holder on the exercise of the option, then general tax principles will apply to determine the tax consequences of the transaction.

(2) *Exception.* Section 721 does not apply to the exercise of a noncompensatory option to the extent that the exercise price is satisfied with the partnership's obligation to the option holder for unpaid rent, royalties, or inter-

est (including accrued original issue discount) that accrued on or after the beginning of the option holder's holding period for the obligation. The issuing partnership will not recognize gain or loss upon the transfer of a partnership interest to an exercising option holder in satisfaction of such unpaid rent, royalties, or interest (including accrued original issue discount).

(b) *Transfer of property or satisfaction of an obligation in exchange for a noncompensatory option—(1) In general.* Except as provided in paragraph (b)(2) of this section, section 721 does not apply to a transfer of property to a partnership in exchange for a noncompensatory option, or to the satisfaction of a partnership obligation with a noncompensatory option.

(2) *Exception.* Section 721 does apply to a transfer of property to a partnership in exchange for convertible equity (as defined in paragraph (g)(3) of this section).

(c) *Lapse of a noncompensatory option.* Section 721 does not apply to the lapse of a noncompensatory option.

(d) *Cash settlement of a noncompensatory option.* Section 721 does not apply to the settlement of a noncompensatory option in cash or property other than a partnership interest in the issuing partnership.

(e) *Issuance of a partnership interest in satisfaction of indebtedness for interest on convertible debt.* Section 721 does not apply to the transfer of a partnership interest to a noncompensatory option holder upon conversion of convertible debt in the partnership to the extent that the transfer is in satisfaction of the partnership's indebtedness for unpaid interest (including accrued original issue discount) on the convertible debt that accrued on or after the beginning of the convertible debt holder's holding period for the indebtedness. The debtor partnership will not, however, recognize gain or loss upon such conversion. For rules in determining whether a partnership interest transferred to a creditor is treated as payment of interest or accrued original issue discount, see §§ 1.446-2 and 1.1275-2, respectively.

(f) *Scope.* The provisions of this section apply only to noncompensatory options. For purposes of this section,

the term *noncompensatory option* means an option (as defined in paragraph (g)(1) of this section) issued by a partnership (the issuing partnership), other than an option issued in connection with the performance of services.

(g) *Definitions.* The following definitions apply for the purposes of this section:

(1) *Option* means a contractual right to acquire an interest in the issuing partnership, including a call option, warrant, or other similar arrangement, the conversion feature of convertible debt (as defined in paragraph (g)(2) of this section), or the conversion feature of convertible equity (as defined in paragraph (g)(3) of this section). To achieve the purposes of this section, the Commissioner can treat other contractual agreements, including a futures contract, a forward contract, or a notional principal contract, as an option. A contract that otherwise constitutes an option will not fail to be treated as an option for purposes of this section merely because it may or must be settled in cash or property other than a partnership interest.

(2) *Convertible debt* is any indebtedness of a partnership that is convertible into an interest in the partnership that issued the debt.

(3) *Convertible equity* is equity in a partnership that is convertible into a different equity interest in the partnership that issued the convertible equity.

(4) *Exercise* means the exercise of an option in exchange for an interest in the issuing partnership or the conversion of convertible debt or convertible equity into an interest in the issuing partnership.

(5) *Exercise price* means, in the case of a call option, the exercise price of the call option; in the case of convertible equity, the converting partner's capital account with respect to that convertible equity, increased by the fair market value of cash or other property contributed to the partnership in connection with the conversion; and, in the case of convertible debt, the adjusted issue price (within the meaning of § 1.1275-1(b)) of the debt converted, increased by accrued but unpaid qualified stated interest on the debt and by the fair market value of cash or other

property contributed to the partnership in connection with the conversion.

(h) *Example.* The following example illustrates the provisions of this section:

*Example.* In Year 1, L and M form general partnership LM with cash contributions of \$5,000 each, which are used to purchase land, Property D, for \$10,000. In that same year, LM issues an option to N to buy a one-third interest in LM at any time before the end of Year 3. The exercise price of the option is \$5,000, payable in either cash or property. N transfers Property E with a basis of \$600 and a value of \$1,000 to the partnership in exchange for the option. N provides no other consideration for the option. Assume that N's option is a noncompensatory option under paragraph (f) of this section and that N is not treated as a partner with respect to the option. Under paragraph (b) of this section, section 721(a) does not apply to N's transfer of Property E to LM in exchange for the option. In accordance with § 1.1001-1, upon N's transfer of Property E to the partnership in exchange for the option, N recognizes \$400 of gain. Under open transaction principles applicable to noncompensatory options, the partnership does not recognize any income for the premium (the property received in exchange for the option). The partnership has a basis of \$1,000 in Property E. In Year 3, when the partnership property is valued at \$16,000, N exercises the option, contributing Property F with a basis of \$3,000 and a fair market value of \$5,000 to the partnership. Under paragraph (a) of this section, neither the partnership nor N recognizes gain upon N's contribution of property to the partnership upon the exercise of the option. Under section 723, the partnership has a basis of \$3,000 in Property F. The partnership does not recognize income for the premium (Property E) upon exercise of the option. See § 1.704-1(b)(2)(iv)(d)(4) and (s) for special rules applicable to capital account adjustments on the exercise of a noncompensatory option.

(i) *Effective/applicability date.* This section applies to noncompensatory options that are issued on or after February 5, 2013.

[T.D. 9612, 78 FR 8012, Feb. 5, 2013]

#### **§ 1.722-1 Basis of contributing partner's interest.**

The basis to a partner of a partnership interest acquired by a contribution of property, including money, to the partnership shall be the amount of money contributed plus the adjusted basis at the time of contribution of any property contributed. If the acquisition

## § 1.723-1

## 26 CFR Ch. I (4-1-14 Edition)

of an interest in partnership capital results in taxable income to a partner, such income shall constitute an addition to the basis of the partner's interest. See paragraph (b) of § 1.721-1. If the contributed property is subject to indebtedness or if liabilities of the partner are assumed by the partnership, the basis of the contributing partner's interest shall be reduced by the portion of the indebtedness assumed by the other partners, since the partnership's assumption of his indebtedness is treated as a distribution of money to the partner. Conversely, the assumption by the other partners of a portion of the contributor's indebtedness is treated as a contribution of money by them. See section 752 and § 1.752-1. See § 1.460-4(k)(3)(iv)(A) for rules relating to basis adjustments required where a contract accounted for under a long-term contract method of accounting is transferred in a contribution to which section 721(a) applies. The provisions of this section may be illustrated by the following examples:

*Example 1.* A acquired a 20-percent interest in a partnership by contributing property. At the time of A's contribution, the property had a fair market value of \$10,000, an adjusted basis to A of \$4,000, and was subject to a mortgage of \$2,000. Payment of the mortgage was assumed by the partnership. The basis of A's interest in the partnership is \$2,400, computed as follows:

Adjusted basis to A of property contributed .....	\$4,000
Less portion of mortgage assumed by other partners which must be treated as a distribution (80 percent of \$2,000) .....	1,600
Basis of A's interest .....	2,400

*Example 2.* If, in example 1 of this section, the property contributed by A was subject to a mortgage of \$6,000, the basis of A's interest would be zero, computed as follows:

Adjusted basis to A of property contributed .....	\$4,000
Less portion of mortgage assumed by other partners which must be treated as a distribution (80 percent of \$6,000) .....	4,800
	(800)

Since A's basis cannot be less than zero, the \$800 in excess of basis, which is considered as a distribution of money under section 752(b), is treated as capital gain from the sale or exchange or a partnership interest. See section 731(a).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 9137, 69 FR 42558, July 16, 2004]

### § 1.723-1 Basis of property contributed to partnership.

The basis to the partnership of property contributed to it by a partner is the adjusted basis of such property to the contributing partner at the time of the contribution. Since such property has the same basis in the hands of the partnership as it had in the hands of the contributing partner, the holding period of such property for the partnership includes the period during which it was held by the partner. See section 1223(2). For elective adjustments to the basis of partnership property arising from distributions or transfers of partnership interests, see sections 732(d), 734(b), and 743(b). See § 1.460-4(k)(3)(iv)(B)(2) for rules relating to adjustments to the basis of contracts accounted for using a long-term contract method of accounting that are acquired in certain contributions to which section 721(a) applies.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 9137, 69 FR 42558, July 16, 2004]

#### DISTRIBUTIONS BY A PARTNERSHIP

### § 1.731-1 Extent of recognition of gain or loss on distribution.

(a) *Recognition of gain or loss to partner*—(1) *Recognition of gain.* (i) Where money is distributed by a partnership to a partner, no gain shall be recognized to the partner except to the extent that the amount of money distributed exceeds the adjusted basis of the partner's interest in the partnership immediately before the distribution. This rule is applicable both to current distributions (i.e., distributions other than in liquidation of an entire interest) and to distributions in liquidation of a partner's entire interest in a partnership. Thus, if a partner with a basis for his interest of \$10,000 receives a distribution of cash of \$8,000 and property with a fair market value of \$3,000, no gain is recognized to him. If \$11,000 cash were distributed, gain would be recognized to the extent of \$1,000. No gain shall be recognized to a distributee partner with respect to a distribution of property (other than money) until he sells or otherwise disposes of such property, except to the extent otherwise provided by section

736 (relating to payments to a retiring partner or a deceased partner's successor in interest) and section 751 (relating to unrealized receivables and inventory items). See section 731(c) and paragraph (c) of this section.

(ii) For the purposes of sections 731 and 705, advances or drawings of money or property against a partner's distributive share of income shall be treated as current distributions made on the last day of the partnership taxable year with respect to such partner.

(2) *Recognition of loss.* Loss is recognized to a partner only upon liquidation of his entire interest in the partnership, and only if the property distributed to him consists solely of money, unrealized receivables (as defined in section 751(c)), and inventory items (as defined in section 751(d)(2)). The term *liquidation of a partner's interest*, as defined in section 761(d), is the termination of the partner's entire interest in the partnership by means of a distribution or a series of distributions. Loss is recognized to the distributee partner in such cases to the extent of the excess of the adjusted basis of such partner's interest in the partnership at the time of the distribution over the sum of:

(i) Any money distributed to him, and

(ii) The basis to the distributee, as determined under section 732, of any unrealized receivables and inventory items that are distributed to him.

If the partner whose interest is liquidated receives any property other than money, unrealized receivables, or inventory items, then no loss will be recognized. Application of the provisions of this subparagraph may be illustrated by the following examples:

*Example 1.* Partner A has a partnership interest in partnership ABC with an adjusted basis to him of \$10,000. He retires from the partnership and receives, as a distribution in liquidation of his entire interest, his share of partnership property. This share is \$5,000 cash and inventory with a basis to him (under section 732) of \$3,000. Partner A realizes a capital loss of \$2,000, which is recognized under section 731(a)(2).

*Example 2.* Partner B has a partnership interest in partnership BCD with an adjusted basis to him of \$10,000. He retires from the partnership and receives, as a distribution in liquidation of his entire interest, his share of

partnership property. This share is \$4,000 cash, real property (used in the trade or business) with an adjusted basis to the partnership of \$2,000, and unrealized receivables having a basis to him (under section 732) of \$3,000. No loss will be recognized to B on the transaction because he received property other than money, unrealized receivables, and inventory items. As determined under section 732, the basis to B for the real property received is \$3,000.

(3) *Character of gain or loss.* Gain or loss recognized under section 731(a) on a distribution is considered gain or loss from the sale or exchange of the partnership interest of the distributee partner, that is, capital gain or loss.

(b) *Gain or loss recognized by partnership.* A distribution of property (including money) by a partnership to a partner does not result in recognized gain or loss to the partnership under section 731. However, recognized gain or loss may result to the partnership from certain distributions which, under section 751(b), must be treated as a sale or exchange of property between the distributee partner and the partnership.

(c) *Exceptions.* (1) Section 731 does not apply to the extent otherwise provided by:

(i) Section 736 (relating to payments to a retiring partner or to a deceased partner's successor in interest) and

(ii) Section 751 (relating to unrealized receivables and inventory items).

For example, payments under section 736(a), which are considered as a distributive share or guaranteed payment, are taxable as such under that section.

(2) The receipt by a partner from the partnership of money or property under an obligation to repay the amount of such money or to return such property does not constitute a distribution subject to section 731 but is a loan governed by section 707(a). To the extent that such an obligation is canceled, the obligor partner will be considered to have received a distribution of money or property at the time of cancellation.

(3) If there is a contribution of property to a partnership and within a short period:

(i) Before or after such contribution other property is distributed to the contributing partner and the contributed property is retained by the partnership, or

(ii) After such contribution the contributed property is distributed to another partner,

such distribution may not fall within the scope of section 731. Section 731 does not apply to a distribution of property, if, in fact, the distribution was made in order to effect an exchange of property between two or more of the partners or between the partnership and a partner. Such a transaction shall be treated as an exchange of property.

**§ 1.731-2 Partnership distributions of marketable securities.**

(a) *Marketable securities treated as money.* Except as otherwise provided in section 731(c) and this section, for purposes of sections 731(a)(1) and 737, the term money includes marketable securities and such securities are taken into account at their fair market value as of the date of the distribution.

(b) *Reduction of amount treated as money—(1) Aggregation of securities.* For purposes of section 731(c)(3)(B) and this paragraph (b), all marketable securities held by a partnership are treated as marketable securities of the same class and issuer as the distributed security.

(2) *Amount of reduction.* The amount of the distribution of marketable securities that is treated as a distribution of money under section 731(c) and paragraph (a) of this section is reduced (but not below zero) by the excess, if any, of—

(i) The distributee partner's distributive share of the net gain, if any, which would be recognized if all the marketable securities held by the partnership were sold (immediately before the transaction to which the distribution relates) by the partnership for fair market value; over

(ii) The distributee partner's distributive share of the net gain, if any, which is attributable to the marketable securities held by the partnership immediately after the transaction, determined by using the same fair market value as used under paragraph (b)(2)(i) of this section.

(3) *Distributee partner's share of net gain.* For purposes of section 731(c)(3)(B) and paragraph (b)(2) of this

section, a partner's distributive share of net gain is determined—

(i) By taking into account any basis adjustments under section 743(b) with respect to that partner;

(ii) Without taking into account any special allocations adopted with a principal purpose of avoiding the effect of section 731(c) and this section; and

(iii) Without taking into account any gain or loss attributable to a distributed security to which paragraph (d)(1) of this section applies.

(c) *Marketable securities—(1) In general.* For purposes of section 731(c) and this section, the term *marketable securities* is defined in section 731(c)(2).

(2) *Actively traded.* For purposes of section 731(c) and this section, a financial instrument is actively traded (and thus is a marketable security) if it is of a type that is, as of the date of distribution, actively traded within the meaning of section 1092(d)(1). Thus, for example, if XYZ common stock is listed on a national securities exchange, particular shares of XYZ common stock that are distributed by a partnership are marketable securities even if those particular shares cannot be resold by the distributee partner for a designated period of time.

(3) *Interests in an entity—(i) Substantially all.* For purposes of section 731(c)(2)(B)(v) and this section, substantially all of the assets of an entity consist (directly or indirectly) of marketable securities, money, or both only if 90 percent or more of the assets of the entity (by value) at the time of the distribution of an interest in the entity consist (directly or indirectly) of marketable securities, money, or both.

(ii) *Less than substantially all.* For purposes of section 731(c)(2)(B)(vi) and this section, an interest in an entity is a marketable security to the extent that the value of the interest is attributable (directly or indirectly) to marketable securities, money, or both, if less than 90 percent but 20 percent or more of the assets of the entity (by value) at the time of the distribution of an interest in the entity consist (directly or indirectly) of marketable securities, money, or both.

(4) *Value of assets.* For purposes of section 731(c) and this section, the

value of the assets of an entity is determined without regard to any debt that may encumber or otherwise be allocable to those assets, other than debt that is incurred to acquire an asset with a principal purpose of avoiding or reducing the effect of section 731(c) and this section.

(d) *Exceptions*—(1) *In general*. Except as otherwise provided in paragraph (d)(2) of this section, section 731(c) and this section do not apply to the distribution of a marketable security if—

(i) The security was contributed to the partnership by the distributee partner;

(ii) The security was acquired by the partnership in a nonrecognition transaction, and the following conditions are satisfied—

(A) The value of any marketable securities and money exchanged by the partnership in the nonrecognition transaction is less than 20 percent of the value of all the assets exchanged by the partnership in the nonrecognition transaction; and

(B) The partnership distributed the security within five years of either the date the security was acquired by the partnership or, if later, the date the security became marketable; or

(iii) The security was not a marketable security on the date acquired by the partnership, and the following conditions are satisfied—

(A) The entity that issued the security had no outstanding marketable securities at the time the security was acquired by the partnership;

(B) The security was held by the partnership for at least six months before the date the security became marketable; and

(C) The partnership distributed the security within five years of the date the security became marketable.

(2) *Anti-stuffing rule*. Paragraph (d)(1) of this section does not apply to the extent that 20 percent or more of the value of the distributed security is attributable to marketable securities or money contributed (directly or indirectly) by the partnership to the entity to which the distributed security relates after the security was acquired by the partnership (other than marketable securities contributed by the partnership that were originally contributed

to the partnership by the distributee partner). For purposes of this paragraph (d)(2), money contributed by the distributing partnership does not include any money deemed contributed by the partnership as a result of section 752.

(3) *Successor security*. Section 731(c) and this section apply to the distribution of a marketable security acquired by the partnership in a nonrecognition transaction in exchange for a security the distribution of which immediately prior to the exchange would have been excepted under this paragraph (d) only to the extent that section 731(c) and this section otherwise would have applied to the exchanged security.

(e) *Investment partnerships*—(1) *In general*. Section 731(c) and this section do not apply to the distribution of marketable securities by an investment partnership (as defined in section 731(c)(3)(C)(i)) to an eligible partner (as defined in section 731(c)(3)(C)(iii)).

(2) *Eligible partner*—(i) *Contributed services*. For purposes of section 731(c)(3)(C)(iii) and this section, a partner is not treated as a partner other than an eligible partner solely because the partner contributed services to the partnership.

(ii) *Contributed partnership interests*. For purposes of determining whether a partner is an eligible partner under section 731(c)(3)(C), if the partner has contributed to the investment partnership an interest in another partnership that meets the requirements of paragraph (e)(4)(i) of this section after the contribution, the contributed interest is treated as property specified in section 731(c)(3)(C)(i).

(3) *Trade or business activities*. For purposes of section 731(c)(3)(C) and this section, a partnership is not treated as engaged in a trade or business by reason of—

(i) Any activity undertaken as an investor, trader, or dealer in any asset described in section 731(c)(3)(C)(i), including the receipt of commitment fees, break-up fees, guarantee fees, director's fees, or similar fees that are customary in and incidental to any activities of the partnership as an investor, trader, or dealer in such assets;

(ii) Reasonable and customary management services (including the receipt

of reasonable and customary fees in exchange for such management services) provided to an investment partnership (within the meaning of section 731(c)(3)(C)(i)) in which the partnership holds a partnership interest; or

(iii) Reasonable and customary services provided by the partnership in assisting the formation, capitalization, expansion, or offering of interests in a corporation (or other entity) in which the partnership holds or acquires a significant equity interest (including the provision of advice or consulting services, bridge loans, guarantees of obligations, or service on a company's board of directors), provided that the anticipated receipt of compensation for the services, if any, does not represent a significant purpose for the partnership's investment in the entity and is incidental to the investment in the entity.

(4) *Partnership tiers.* For purposes of section 731(c)(3)(C)(iv) and this section, a partnership (upper-tier partnership) is not treated as engaged in a trade or business engaged in by, or as holding (instead of a partnership interest) a proportionate share of the assets of, a partnership (lower-tier partnership) in which the partnership holds a partnership interest if—

(i) The upper-tier partnership does not actively and substantially participate in the management of the lower-tier partnership; and

(ii) The interest held by the upper-tier partnership is less than 20 percent of the total profits and capital interests in the lower-tier partnership.

(f) *Basis rules—(1) Partner's basis—(i) Partner's basis in distributed securities.* The distributee partner's basis in distributed marketable securities with respect to which gain is recognized by reason of section 731(c) and this section is the basis of the security determined under section 732, increased by the amount of such gain. Any increase in the basis of the marketable securities attributable to gain recognized by reason of section 731(c) and this section is allocated to marketable securities in proportion to their respective amounts of unrealized appreciation in the hands of the partner before such increase.

(ii) *Partner's basis in partnership interest.* The basis of the distributee part-

ner's interest in the partnership is determined under section 733 as if no gain were recognized by the partner on the distribution by reason of section 731(c) and this section.

(2) *Basis of partnership property.* No adjustment is made to the basis of partnership property under section 734 as a result of any gain recognized by a partner, or any step-up in the basis in the distributed marketable securities in the hands of the distributee partner, by reason of section 731(c) and this section.

(g) *Coordination with other sections—*

(1) *Sections 704(c)(1)(B) and 737—(i) In general.* If a distribution results in the application of sections 731(c) and one or both of sections 704(c)(1)(B) and 737, the effect of the distribution is determined by applying section 704(c)(1)(B) first, section 731(c) second, and finally section 737.

(ii) *Section 704(c)(1)(B).* The basis of the distributee partner's interest in the partnership for purposes of determining the amount of gain, if any, recognized by reason of section 731(c) (and for determining the basis of the marketable securities in the hands of the distributee partner) includes the increase or decrease, if any, in the partner's basis that occurs under section 704(c)(1)(B)(iii) as a result of a distribution to another partner of property contributed by the distributee partner in a distribution that is part of the same distribution as the marketable securities.

(iii) *Section 737—(A) Marketable securities as other property.* A distribution of marketable securities is treated as a distribution of property other than money for purposes of section 737 to the extent that the marketable securities are not treated as money under section 731(c). In addition, marketable securities contributed to the partnership are treated as property other than money in determining the contributing partner's net precontribution gain under section 737(b).

(B) *Basis increase under section 737.* The basis of the distributee partner's interest in the partnership for purposes of determining the amount of gain, if any, recognized by reason of section 731(c) (and for determining the basis of the marketable securities in the hands

of the distributee partner) does not include the increase, if any, in the partner's basis that occurs under section 737(c)(1) as a result of a distribution of property to the distributee partner in a distribution that is part of the same distribution as the marketable securities.

(2) *Section 708(b)(1)(B)*. If a partnership termination occurs under section 708(b)(1)(B), the successor partnership will be treated as if there had been no termination for purposes of section 731(c) and this section. Accordingly, a section 708(b)(1)(B) termination will not affect whether a partnership qualifies for any of the exceptions in paragraphs (d) and (e) of this section. In addition, a deemed distribution that may occur as a result of a section 708(b)(1)(B) termination will not be subject to section 731(c) and this section.

(h) *Anti-abuse rule*. The provisions of section 731(c) and this section must be applied in a manner consistent with the purpose of section 731(c) and the substance of the transaction. Accordingly, if a principal purpose of a transaction is to achieve a tax result that is inconsistent with the purpose of section 731(c) and this section, the Commissioner can recast the transaction for Federal tax purposes as appropriate to achieve tax results that are consistent with the purpose of section 731(c) and this section. Whether a tax result is inconsistent with the purpose of section 731(c) and this section must be determined based on all the facts and circumstances. For example, under the provisions of this paragraph (h)—

(1) A change in partnership allocations or distribution rights with respect to marketable securities may be treated as a distribution of the marketable securities subject to section 731(c) if the change in allocations or distribution rights is, in substance, a distribution of the securities;

(2) A distribution of substantially all of the assets of the partnership other than marketable securities and money to some partners may also be treated as a distribution of marketable securities to the remaining partners if the distribution of the other property and the withdrawal of the other partners is, in substance, equivalent to a distribu-

tion of the securities to the remaining partners; and

(3) The distribution of multiple properties to one or more partners at different times may also be treated as part of a single distribution if the distributions are part of a single plan of distribution.

(i) [Reserved]

(j) *Examples*. The following examples illustrate the rules of this section. Unless otherwise specified, all securities held by a partnership are marketable securities within the meaning of section 731(c); the partnership holds no marketable securities other than the securities described in the example; all distributions by the partnership are subject to section 731(a) and are not subject to sections 704(c)(1)(B), 707(a)(2)(B), 751(b), or 737; and no securities are eligible for an exception to section 731(c). The examples are as follows:

*Example 1. Recognition of gain.* (i) *A* and *B* form partnership *AB* as equal partners. *A* contributes property with a fair market value of \$1,000 and an adjusted tax basis of \$250. *B* contributes \$1,000 cash. *AB* subsequently purchases Security *X* for \$500 and immediately distributes the security to *A* in a current distribution. The basis in *A*'s interest in the partnership at the time of distribution is \$250.

(ii) The distribution of Security *X* is treated as a distribution of money in an amount equal to the fair market value of Security *X* on the date of distribution (\$500). (The amount of the distribution that is treated as money is not reduced under section 731(c)(3)(B) and paragraph (b) of this section because, if Security *X* had been sold immediately before the distribution, there would have been no gain recognized by *AB* and *A*'s distributive share of the gain would therefore have been zero.) As a result, *A* recognizes \$250 of gain under section 731(a)(1) on the distribution (\$500 distribution of money less \$250 adjusted tax basis in *A*'s partnership interest).

*Example 2. Reduction in amount treated as money—in general.* (i) *A* and *B* form partnership *AB* as equal partners. *AB* subsequently distributes Security *X* to *A* in a current distribution. Immediately before the distribution, *AB* held securities with the following fair market values, adjusted tax bases, and unrecognized gain or loss:

	Value	Basis	Gain (Loss)
Security <i>X</i> .....	100	70	30
Security <i>Y</i> .....	100	80	20

§ 1.731-2

	Value	Basis	Gain (Loss)
Security Z .....	100	110	(10)

(ii) If *AB* had sold the securities for fair market value immediately before the distribution to *A*, the partnership would have recognized \$40 of net gain (\$30 gain on Security *X* plus \$20 gain on Security *Y* minus \$10 loss on Security *Z*). *A*'s distributive share of this gain would have been \$20 (one-half of \$40 net gain). If *AB* had sold the remaining securities immediately after the distribution of Security *X* to *A*, the partnership would have \$10 of net gain (\$20 of gain on Security *Y* minus \$10 loss on Security *Z*). *A*'s distributive share of this gain would have been \$5 (one-half of \$10 net gain). As a result, the distribution resulted in a decrease of \$15 in *A*'s distributive share of the net gain in *AB*'s securities (\$20 net gain before distribution minus \$5 net gain after distribution).

(iii) Under paragraph (b) of this section, the amount of the distribution of Security *X* that is treated as a distribution of money is reduced by \$15. The distribution of Security *X* is therefore treated as a distribution of \$85 of money to *A* (\$100 fair market value of Security *X* minus \$15 reduction).

*Example 3. Reduction in amount treated as money—carried interest.* (i) *A* and *B* form partnership *AB*. *A* contributes \$1,000 and provides substantial services to the partnership in exchange for a 60 percent interest in partnership profits. *B* contributes \$1,000 in exchange for a 40 percent interest in partnership profits. *AB* subsequently distributes Security *X* to *A* in a current distribution. Immediately before the distribution, *AB* held securities with the following fair market values, adjusted tax bases, and unrecognized gain:

	Value	Basis	Gain
Security <i>X</i> .....	100	80	20
Security <i>Y</i> .....	100	90	10

(ii) If *AB* had sold the securities for fair market value immediately before the distribution to *A*, the partnership would have recognized \$30 of net gain (\$20 gain on Security *X* plus \$10 gain on Security *Y*). *A*'s distributive share of this gain would have been \$18 (60 percent of \$30 net gain). If *AB* had sold the remaining securities immediately after the distribution of Security *X* to *A*, the partnership would have \$10 of net gain (\$10 gain on Security *Y*). *A*'s distributive share of this gain would have been \$6 (60 percent of \$10 net gain). As a result, the distribution resulted in a decrease of \$12 in *A*'s distributive share of the net gain in *AB*'s securities (\$18 net gain before distribution minus \$6 net gain after distribution).

(iii) Under paragraph (b) of this section, the amount of the distribution of Security *X* that is treated as a distribution of money is

26 CFR Ch. I (4-1-14 Edition)

reduced by \$12. The distribution of Security *X* is therefore treated as a distribution of \$88 of money to *A* (\$100 fair market value of Security *X* minus \$12 reduction).

*Example 4. Reduction in amount treated as money—change in partnership allocations.* (i) *A* is admitted to partnership *ABC* as a partner with a 1 percent interest in partnership profits. At the time of *A*'s admission, *ABC* held no securities. *ABC* subsequently acquires Security *X*. *A*'s interest in partnership profits is subsequently increased to 2 percent for securities acquired after the increase. *A* retains a 1 percent interest in all securities acquired before the increase. *ABC* then acquires Securities *Y* and *Z* and later distributes Security *X* to *A* in a current distribution. Immediately before the distribution, the securities held by *ABC* had the following fair market values, adjusted tax bases, and unrecognized gain or loss:

	Value	Basis	Gain (Loss)
Security <i>X</i> .....	1,000	500	500
Security <i>Y</i> .....	1,000	800	200
Security <i>Z</i> .....	1,000	1,100	(100)

(ii) If *ABC* had sold the securities for fair market value immediately before the distribution to *A*, the partnership would have recognized \$600 of net gain (\$500 gain on Security *X* plus \$200 gain on Security *Y* minus \$100 loss on Security *Z*). *A*'s distributive share of this gain would have been \$7 (1 percent of \$500 gain on Security *X* plus 2 percent of \$200 gain on Security *Y* minus 2 percent of \$100 loss on Security *Z*).

(iii) If *ABC* had sold the remaining securities immediately after the distribution of Security *X* to *A*, the partnership would have \$100 of net gain (\$200 gain on Security *Y* minus \$100 loss on Security *Z*). *A*'s distributive share of this gain would have been \$2 (2 percent of \$200 gain on Security *Y* minus 2 percent of \$100 loss on Security *Z*). As a result, the distribution resulted in a decrease of \$5 in *A*'s distributive share of the net gain in *ABC*'s securities (\$7 net gain before distribution minus \$2 net gain after distribution).

(iv) Under paragraph (b) of this section, the amount of the distribution of Security *X* that is treated as a distribution of money is reduced by \$5. The distribution of Security *X* is therefore treated as a distribution of \$995 of money to *A* (\$1000 fair market value of Security *X* minus \$5 reduction).

*Example 5. Basis consequences—distribution of marketable security.* (i) *A* and *B* form partnership *AB* as equal partners. *A* contributes nondepreciable real property with a fair market value and adjusted tax basis of \$100.

(ii) *AB* subsequently distributes Security *X* with a fair market value of \$120 and an adjusted tax basis of \$90 to *A* in a current distribution. At the time of distribution, the

basis in A's interest in the partnership is \$100. The amount of the distribution that is treated as money is reduced under section 731(c)(3)(B) and paragraph (b)(2) of this section by \$15 (one-half of \$30 net gain in Security X). As a result, A recognizes \$5 of gain under section 731(a) on the distribution (excess of \$105 distribution of money over \$100 adjusted tax basis in A's partnership interest).

(iii) A's adjusted tax basis in Security X is \$95 (\$90 adjusted basis of Security X determined under section 732(a)(1) plus \$5 of gain recognized by A by reason of section 731(c)). The basis in A's interest in the partnership is \$10 as determined under section 733 (\$100 pre-distribution basis minus \$90 basis allocated to Security X under section 732).

*Example 6. Basis consequences—distribution of marketable security and other property.* (i) A and B form partnership AB as equal partners. A contributes nondepreciable real property, with a fair market value of \$100 and an adjusted tax basis of \$10.

(ii) AB subsequently distributes Security X with a fair market value and adjusted tax basis of \$40 to A in a current distribution and, as part of the same distribution, AB distributes Property Z to A with an adjusted tax basis and fair market value of \$40. At the time of distribution, the basis in A's interest in the partnership is \$10. A recognizes \$30 of gain under section 731(a) on the distribution (excess of \$40 distribution of money over \$10 adjusted tax basis in A's partnership interest).

(iii) A's adjusted tax basis in Security X is \$35 (\$5 adjusted basis determined under section 732(a)(2) plus \$30 of gain recognized by A by reason of section 731(c)). A's basis in Property Z is \$5, as determined under section 732(a)(2). The basis in A's interest in the partnership is \$0 as determined under section 733 (\$10 pre-distribution basis minus \$10 basis allocated between Security X and Property Z under section 732).

(iv) AB's adjusted tax basis in the remaining partnership assets is unchanged unless the partnership has a section 754 election in effect. If AB made such an election, the aggregate basis of AB's assets would be increased by \$70 (the difference between the \$80 combined basis of Security X and Property Z in the hands of the partnership before the distribution and the \$10 combined basis of the distributed property in the hands of A under section 732 after the distribution). Under section 731(c)(5), no adjustment is made to partnership property under section 734 as a result of any gain recognized by A by reason of section 731(c) or as a result of any step-up in basis in the distributed marketable securities in the hands of A by reason of section 731(c).

*Example 7. Coordination with section 737.* (i) A and B form partnership AB. A contributes Property A, nondepreciable real property

with a fair market value of \$200 and an adjusted basis of \$100 in exchange for a 25 percent interest in partnership capital and profits. AB owns marketable Security X.

(ii) Within five years of the contribution of Property A, AB subsequently distributes Security X, with a fair market value of \$120 and an adjusted tax basis of \$100, to A in a current distribution that is subject to section 737. As part of the same distribution, AB distributes Property Y to A with a fair market value of \$20 and an adjusted tax basis of \$0. At the time of distribution, there has been no change in the fair market value of Property A or the adjusted tax basis in A's interest in the partnership.

(iii) If AB had sold Security X for fair market value immediately before the distribution to A, the partnership would have recognized \$20 of gain. A's distributive share of this gain would have been \$5 (25 percent of \$20 gain). Because AB has no other marketable securities, A's distributive share of gain in partnership securities after the distribution would have been \$0. As a result, the distribution resulted in a decrease of \$5 in A's share of the net gain in AB's securities (\$5 net gain before distribution minus \$0 net gain after distribution). Under paragraph (b)(2) of this section, the amount of the distribution of Security X that is treated as a distribution of money is reduced by \$5. The distribution of Security X is therefore treated as a distribution of \$115 of money to A (\$120 fair market value of Security X minus \$5 reduction). The portion of the distribution of the marketable security that is not treated as a distribution of money (\$5) is treated as other property for purposes of section 737.

(iv) A recognizes total gain of \$40 on the distribution. A recognizes \$15 of gain under section 731(a)(1) on the distribution of the portion of Security X treated as money (\$115 distribution of money less \$100 adjusted tax basis in A's partnership interest). A recognizes \$25 of gain under section 737 on the distribution of Property Y and the portion of Security X that is not treated as money. A's section 737 gain is equal to the lesser of (i) A's precontribution gain (\$100) or (ii) the excess of the fair market value of property received (\$20 fair market value of Property Y plus \$5 portion of Security X not treated as money) over the adjusted basis in A's interest in the partnership immediately before the distribution (\$100) reduced (but not below zero) by the amount of money received in the distribution (\$115).

(v) A's adjusted tax basis in Security X is \$115 (\$100 basis of Security X determined under section 732(a) plus \$15 of gain recognized by reason of section 731(c)). A's adjusted tax basis in Property Y is \$0 under section 732(a). The basis in A's interest in the partnership is \$25 (\$100 basis before distribution minus \$100 basis allocated to Security X

## § 1.732-1

## 26 CFR Ch. I (4-1-14 Edition)

under section 732(a) plus \$25 gain recognized under section 737).

(k) *Effective date.* This section applies to distributions made on or after December 26, 1996. However, taxpayers may apply the rules of this section to distributions made after December 8, 1994, and before December 26, 1996.

[T.D. 8707, 61 FR 67938, Dec. 26, 1996; 62 FR 8086, Feb. 21, 1997]

### § 1.732-1 Basis of distributed property other than money.

(a) *Distributions other than in liquidation of a partner's interest.* The basis of property (other than money) received by a partner in a distribution from a partnership, other than in liquidation of his entire interest, shall be its adjusted basis to the partnership immediately before such distribution. However, the basis of the property to the partner shall not exceed the adjusted basis of the partner's interest in the partnership, reduced by the amount of any money distributed to him in the same transaction. The provisions of this paragraph may be illustrated by the following examples:

*Example 1.* Partner A, with an adjusted basis of \$15,000 for his partnership interest, receives in a current distribution property having an adjusted basis of \$10,000 to the partnership immediately before distribution, and \$2,000 cash. The basis of the property in A's hands will be \$10,000. Under sections 733 and 705, the basis of A's partnership interest will be reduced by the distribution to \$3,000 (\$15,000 less \$2,000 cash, less \$10,000, the basis of the distributed property to A).

*Example 2.* Partner R has an adjusted basis of \$10,000 for his partnership interest. He receives a current distribution of \$4,000 cash and property with an adjusted basis to the partnership of \$8,000. The basis of the distributed property to partner R is limited to \$6,000 (\$10,000, the adjusted basis of his interest, reduced by \$4,000, the cash distributed).

(b) *Distribution in liquidation.* Where a partnership distributes property (other than money) in liquidation of a partner's entire interest in the partnership, the basis of such property to the partner shall be an amount equal to the adjusted basis of his interest in the partnership reduced by the amount of any money distributed to him in the same transaction. Application of this rule may be illustrated by the following example:

*Example.* Partner B, with a partnership interest having an adjusted basis to him of \$12,000, retires from the partnership and receives cash of \$2,000, and real property with an adjusted basis to the partnership of \$6,000 and a fair market value of \$14,000. The basis of the real property to B is \$10,000 (B's basis for his partnership interest, \$12,000, reduced by \$2,000, the cash distributed).

(c) *Allocation of basis among properties distributed to a partner—*(1) *General rule—*(i) *Unrealized receivables and inventory items.* The basis to be allocated to properties distributed to a partner under section 732(a)(2) or (b) is allocated first to any unrealized receivables (as defined in section 751(c)) and inventory items (as defined in section 751(d)(2)) in an amount equal to the adjusted basis of each such property to the partnership immediately before the distribution. If the basis to be allocated is less than the sum of the adjusted bases to the partnership of the distributed unrealized receivables and inventory items, the adjusted basis of the distributed property must be decreased in the manner provided in paragraph (c)(2)(i) of this section. See § 1.460-4(k)(2)(iv)(D) for a rule determining the partnership's basis in a long-term contract accounted for under a long-term contract method of accounting.

(ii) *Other distributed property.* Any basis not allocated to unrealized receivables or inventory items under paragraph (c)(1)(i) of this section is allocated to any other property distributed to the partner in the same transaction by assigning to each distributed property an amount equal to the adjusted basis of the property to the partnership immediately before the distribution. However, if the sum of the adjusted bases to the partnership of such other distributed property does not equal the basis to be allocated among the distributed property, any increase or decrease required to make the amounts equal is allocated among the distributed property as provided in paragraph (c)(2) of this section.

(2) *Adjustment to basis allocation—*(i) *Decrease in basis.* Any decrease to the basis of distributed property required under paragraph (c)(1) of this section is allocated first to distributed property with unrealized depreciation in proportion to each property's respective

amount of unrealized depreciation before any decrease (but only to the extent of each property's unrealized depreciation). If the required decrease exceeds the amount of unrealized depreciation in the distributed property, the excess is allocated to the distributed property in proportion to the adjusted bases of the distributed property, as adjusted pursuant to the immediately preceding sentence.

(ii) *Increase in basis.* Any increase to the basis of distributed property required under paragraph (c)(1)(ii) of this section is allocated first to distributed property (other than unrealized receivables and inventory items) with unrealized appreciation in proportion to each property's respective amount of unrealized appreciation before any increase (but only to the extent of each property's unrealized appreciation). If the required increase exceeds the amount of unrealized appreciation in the distributed property, the excess is allocated to the distributed property (other than unrealized receivables or inventory items) in proportion to the fair market value of the distributed property.

(3) *Unrealized receivables and inventory items.* If the basis to be allocated upon a distribution in liquidation of the partner's entire interest in the partnership is greater than the adjusted basis to the partnership of the unrealized receivables and inventory items distributed to the partner, and if there is no other property distributed to which the excess can be allocated, the distributee partner sustains a capital loss under section 731(a)(2) to the extent of the unallocated basis of the partnership interest.

(4) *Examples.* The provisions of this paragraph (c) are illustrated by the following examples:

*Example 1.* A is a one-fourth partner in partnership PRS and has an adjusted basis in its partnership interest of \$650. PRS distributes inventory items and Assets X and Y to A in liquidation of A's entire partnership interest. The distributed inventory items have a basis to the partnership of \$100 and a fair market value of \$200. Asset X has an adjusted basis to the partnership of \$50 and a fair market value of \$400. Asset Y has an adjusted basis to the partnership and a fair market value of \$100. Neither Asset X nor Asset Y

consists of inventory items or unrealized receivables. Under this paragraph (c), A's basis in its partnership interest is allocated first to the inventory items in an amount equal to their adjusted basis to the partnership. A, therefore, has an adjusted basis in the inventory items of \$100. The remaining basis, \$550, is allocated to the distributed property first in an amount equal to the property's adjusted basis to the partnership. Thus, Asset X is allocated \$50 and Asset Y is allocated \$100. Asset X is then allocated \$350, the amount of unrealized appreciation in Asset X. Finally, the remaining basis, \$50, is allocated to Assets X and Y in proportion to their fair market values: \$40 to Asset X ( $400/500 \times \$50$ ), and \$10 to Asset Y ( $100/500 \times \$50$ ). Therefore, after the distribution, A has an adjusted basis of \$440 in Asset X and \$110 in Asset Y.

*Example 2.* B is a one-fourth partner in partnership PRS and has an adjusted basis in its partnership interest of \$200. PRS distributes Asset X and Asset Y to B in liquidation of its entire partnership interest. Asset X has an adjusted basis to the partnership and fair market value of \$150. Asset Y has an adjusted basis to the partnership of \$150 and a fair market value of \$50. Neither of the assets consists of inventory items or unrealized receivables. Under this paragraph (c), B's basis is first assigned to the distributed property to the extent of the partnership's basis in each distributed property. Thus, Asset X and Asset Y are each assigned \$150. Because the aggregate adjusted basis of the distributed property, \$300, exceeds the basis to be allocated, \$200, a decrease of \$100 in the basis of the distributed property is required. Assets X and Y have unrealized depreciation of zero and \$100, respectively. Thus, the entire decrease is allocated to Asset Y. After the distribution, B has an adjusted basis of \$150 in Asset X and \$50 in Asset Y.

*Example 3.* C, a partner in partnership PRS, receives a distribution in liquidation of its entire partnership interest of \$6,000 cash, inventory items having an adjusted basis to the partnership of \$6,000, and real property having an adjusted basis to the partnership of \$4,000. C's basis in its partnership interest is \$9,000. The cash distribution reduces C's basis to \$3,000, which is allocated entirely to the inventory items. The real property has a zero basis in C's hands. The partnership bases not carried over to C for the distributed properties are lost unless an election under section 754 is in effect requiring the partnership to adjust the bases of remaining partnership properties under section 734(b).

*Example 4.* Assume the same facts as in Example 3 of this paragraph except C receives a distribution in liquidation of its entire partnership interest of \$1,000 cash and inventory items having a basis to the partnership of \$6,000. The cash distribution reduces C's basis to \$8,000, which can be allocated only to the extent of \$6,000 to the inventory

## § 1.732-1

## 26 CFR Ch. I (4-1-14 Edition)

items. The remaining \$2,000 basis, not allocable to the distributed property, constitutes a capital loss to partner C under section 731(a)(2). If the election under section 754 is in effect, see section 734(b) for adjustment of the basis of undistributed partnership property.

(5) *Effective date.* This paragraph (c) applies to distributions of property from a partnership that occur on or after December 15, 1999.

(d) *Special partnership basis to transferee under section 732(d).* (1)(i) A transfer of a partnership interest occurs upon a sale or exchange of an interest or upon the death of a partner. Section 732(d) provides a special rule for the determination of the basis of property distributed to a transferee partner who acquired any part of his partnership interest in a transfer with respect to which the election under section 754 (relating to the optional adjustment to basis of partnership property) was not in effect.

(ii) Where an election under section 754 is in effect, see section 743(b) and §§ 1.743-1 and 1.732-2.

(iii) If a transferee partner receives a distribution of property (other than money) from the partnership within 2 years after he acquired his interest or part thereof in the partnership by a transfer with respect to which the election under section 754 was not in effect, he may elect to treat as the adjusted partnership basis of such property the adjusted basis such property would have if the adjustment provided in section 743(b) were in effect.

(iv) If an election under section 732(d) is made upon a distribution of property to a transferee partner, the amount of the adjustment with respect to the transferee partner is not diminished by any depletion or depreciation of that portion of the basis of partnership property which arises from the special basis adjustment under section 732(d), since depletion or depreciation on such portion for the period prior to distribution is allowed or allowable only if the optional adjustment under section 743(b) is in effect.

(v) If property is distributed to a transferee partner who elects under section 732(d), and if such property is not the same property which would have had a special basis adjustment, then such special basis adjustment

shall apply to any like property received in the distribution, provided that the transferee, in exchange for the property distributed, has relinquished his interest in the property with respect to which he would have had a special basis adjustment. This rule applies whether the property in which the transferee has relinquished his interest is retained or disposed of by the partnership. (For a shift of transferee's basis adjustment under section 743(b) to like property, see § 1.743-1(g).)

(vi) The provisions of this paragraph (d)(1) may be illustrated by the following example:

*Example.* (i) Transferee partner, T, purchased a one-fourth interest in partnership PRS for \$17,000. At the time T purchased the partnership interest, the election under section 754 was not in effect and the partnership inventory had a basis to the partnership of \$14,000 and a fair market value of \$16,000. T's purchase price reflected \$500 of this difference. Thus, \$4,000 of the \$17,000 paid by T for the partnership interest was attributable to T's share of partnership inventory with a basis of \$3,500. Within 2 years after T acquired the partnership interest, T retired from the partnership and received in liquidation of its entire partnership interest the following property:

	Assets	
	Adjusted basis to PRS	Fair market value
Cash .....	\$1,500	\$1,500
Inventory .....	3,500	4,000
Asset X .....	2,000	4,000
Asset Y .....	4,000	5,000

(ii) The fair market value of the inventory received by T was one-fourth of the fair market value of all partnership inventory and was T's share of such property. It is immaterial whether the inventory T received was on hand when T acquired the interest. In accordance with T's election under section 732(d), the amount of T's share of partnership basis that is attributable to partnership inventory is increased by \$500 (one-fourth of the \$2,000 difference between the fair market value of the property, \$16,000, and its \$14,000 basis to the partnership at the time T purchased its interest). This adjustment under section 732(d) applies only for purposes of distributions to T, and not for purposes of partnership depreciation, depletion, or gain or loss on disposition. Thus, the amount to be allocated among the properties received by T in the liquidating distribution is \$15,500 (\$17,000, T's basis for the partnership interest, reduced by the amount of cash received, \$1,500). This amount is allocated as follows:

the basis of the inventory items received is \$4,000, consisting of the \$3,500 common partnership basis, plus the basis adjustment of \$500 which T would have had under section 743(b). The remaining basis of \$11,500 (\$15,500 minus \$4,000) is allocated among the remaining property distributed to T by assigning to each property the adjusted basis to the partnership of such property and adjusting that basis by any required increase or decrease. Thus, the adjusted basis to T of Asset X is \$5,111 (\$2,000, the adjusted basis of Asset X to the partnership, plus \$2,000, the amount of unrealized appreciation in Asset X, plus \$1,111 (\$4,000/\$9,000 multiplied by \$2,500)). Similarly, the adjusted basis of Asset Y to T is \$6,389 (\$4,000, the adjusted basis of Asset Y to the partnership, plus \$1,000, the amount of unrealized appreciation in Asset Y, plus, \$1,389 (\$5,000/\$9,000 multiplied by \$2,500)).

(2) A transferee partner who wishes to elect under section 732(d) shall make the election with his tax return:

(i) For the year of the distribution, if the distribution includes any property subject to the allowance for depreciation, depletion, or amortization, or

(ii) For any taxable year no later than the first taxable year in which the basis of any of the distributed property is pertinent in determining his income tax, if the distribution does not include any such property subject to the allowance for depreciation, depletion or amortization.

(3) A taxpayer making an election under section 732(d) shall submit with the return in which the election is made a schedule setting forth the following:

(i) That under section 732(d) he elects to adjust the basis of property received in a distribution; and

(ii) The computation of the special basis adjustment for the property distributed and the properties to which the adjustment has been allocated. For rules of allocation, see section 755.

(4) A partner who acquired any part of his partnership interest in a transfer to which the election provided in section 754 was not in effect, is required to apply the special basis rule contained in section 732(d) to a distribution to him, whether or not made within 2 years after the transfer, if at the time of his acquisition of the transferred interest:

(i) The fair market value of all partnership property (other than money)

exceeded 110 percent of its adjusted basis to the partnership.

(ii) An allocation of basis under section 732(c) upon a liquidation of his interest immediately after the transfer of the interest would have resulted in a shift of basis from property not subject to an allowance for depreciation, depletion, or amortization, to property subject to such an allowance, and

(iii) A basis adjustment under section 743(b) would change the basis to the transferee partner of the property actually distributed.

(5) *Required statements.* If a transferee partner notifies a partnership that it plans to make the election under section 732(d) under paragraph (d)(3) of this section, or if a partnership makes a distribution to which paragraph (d)(4) of this section applies, the partnership must provide the transferee with such information as is necessary for the transferee properly to compute the transferee's basis adjustments under section 732(d).

(e) *Exception.* When a partnership distributes unrealized receivables (as defined in section 751(c)) or substantially appreciated inventory items (as defined in section 751(d)) in exchange for any part of a partner's interest in other partnership property (including money), or, conversely, partnership property (including money) other than unrealized receivables or substantially appreciated inventory items in exchange for any part of a partner's interest in the partnership's unrealized receivables or substantially appreciated inventory items, the distribution will be treated as a sale or exchange of property under the provisions of section 751(b). In such case, section 732 (including subsection(d) thereof) applies in determining the partner's basis of the property which he is treated as having sold to or exchanged with the partnership (as constituted after the distribution). The partner is considered as having received such property in a current distribution and, immediately thereafter, as having sold or exchanged it. See section 751(b) and paragraph (b) of § 1.751-1. However, section 732 does not apply in determining the basis of that part of property actually distributed to a partner which is treated as received by him

in a sale or exchange under section 751(b). Consequently, the basis of such property shall be its cost to the partner.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 8847, 64 FR 69907, Dec. 15, 1999; T.D. 9137, 69 FR 42558, July 16, 2004]

**§ 1.732-2 Special partnership basis of distributed property.**

(a) *Adjustments under section 734(b).* In the case of a distribution of property to a partner, the partnership bases of the distributed properties shall reflect any increases or decreases to the basis of partnership property which have been made previously under section 734(b) (relating to the optional adjustment to basis of undistributed partnership property) in connection with previous distributions.

(b) *Adjustments under section 743(b).* In the case of a distribution of property to a partner who acquired any part of his interest in a transfer as to which an election under section 754 was in effect, then, for the purposes of section 732 (other than subsection (d) thereof), the adjusted partnership bases of the distributed property shall take into account, in addition to any adjustments under section 734(b), the transferee's special basis adjustment for the distributed property under section 743(b). The application of this paragraph may be illustrated by the following example:

*Example.* Partner D acquired his interest in partnership ABD from a previous partner. Since the partnership had made an election under section 754, a special basis adjustment with respect to D is applicable to the basis of partnership property in accordance with section 743(b). One of the assets of the partnership at the time D acquired his interest was property X, which is later distributed to D in a current distribution. Property X has an adjusted basis to the partnership of \$1,000 and with respect to D it has a special basis adjustment of \$500. Therefore, for purposes of section 732(a)(1), the adjusted basis of such property to the partnership with respect to D immediately before its distribution is \$1,500. However, if property X is distributed to partner A, a nontransferee partner, its adjusted basis to the partnership for purposes of section 732(a)(1) is only \$1,000. In such case, D's \$500 special basis adjustment may shift over to other property. See § 1.743-1(g).

(c) *Adjustments to basis of distributed inventory and unrealized receivables.* Under section 732, the basis to be allocated to distributed properties shall be allocated first to any unrealized receivables and inventory items. If the distributee partner is a transferee of a partnership interest and has a special basis adjustment for unrealized receivables or inventory items under either section 743(b) or section 732(d), then the partnership adjusted basis immediately prior to distribution of any unrealized receivables or inventory items distributed to such partner shall be determined as follows: If the distributee partner receives his entire share of the fair market value of the inventory items or unrealized receivables of the partnership, the adjusted basis of such distributed property to the partnership, for the purposes of section 732, shall take into account the entire amount of any special basis adjustment which the distributee partner may have for such assets. If the distributee partner receives less than his entire share of the fair market value of partnership inventory items or unrealized receivables, then, for purposes of section 732, the adjusted basis of such distributed property to the partnership shall take into account the same proportion of the distributee's special basis adjustment for unrealized receivables or inventory items as the value of such items distributed to him bears to his entire share of the total value of all such items of the partnership. The provisions of this paragraph may be illustrated by the following example:

*Example.* Partner C acquired his 40-percent interest in partnership AC from a previous partner. Since the partnership had made an election under section 754, C has a special basis adjustment to partnership property under section 743(b). C retires from the partnership when the adjusted basis of his partnership interest is \$3,000. He receives from the partnership in liquidation of his entire interest, \$1,000 cash, certain capital assets, depreciable property, and certain inventory items and unrealized receivables. C has a special basis adjustment of \$800 with respect to partnership inventory items and of \$200 with respect to unrealized receivables. The common partnership basis for the inventory items distributed to him is \$500 and for the unrealized receivables is zero. If the value of inventory items and the unrealized receivables distributed to C in his 40 percent share

of the total value of all partnership inventory items and unrealized receivables, then, for purposes of section 732, the adjusted basis of such property in C's hands will be \$1,300 for the inventory items (\$500 plus \$800) and \$200 for the unrealized receivables (zero plus \$200). The remaining basis of \$500, which constitutes the basis of the capital assets and depreciable property distributed to C, is determined as follows: \$3,000 (total basis) less \$1,000 cash, or \$2,000 (the amount to be allocated to the basis of all distributed property), less \$1,500 (\$800 and \$200 special basis adjustments, plus \$500 common partnership basis, the amount allocated to inventory items and unrealized receivables). However, if the value of the inventory items and unrealized receivables distributed to C consisted of only 20 percent of the total fair market value of such property (i. e., only one-half of C's 40-percent share), then only one-half of C's special basis adjustment of \$800 for partnership inventory items and \$200 for unrealized receivables would be taken into account. In that case, the basis of the inventory items in C's hands would be \$650 (\$250, the common partnership basis for inventory items distributed to him, plus \$400, one-half of C's special basis adjustment for inventory items). The basis of the unrealized receivables in C's hands would be \$100 (zero plus \$100, one-half of C's special basis adjustment for unrealized receivables).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 8847, 64 FR 69908, Dec. 15, 1999]

**§ 1.732-3 Corresponding adjustment to basis of assets of a distributed corporation controlled by a corporate partner.**

The determination of whether a corporate partner has control of a distributed corporation for purposes of section 732(f) shall be made by applying the special aggregate stock ownership rules of § 1.1502-34.

[T.D. 8949, 66 FR 32902, June 19, 2001]

**§ 1.733-1 Basis of distributee partner's interest.**

In the case of a distribution by a partnership to a partner other than in liquidation of a partner's entire interest, the adjusted basis to such partner of his interest in the partnership shall be reduced (but not below zero) by the amount of any money distributed to such partner and by the amount of the basis to him of distributed property other than money as determined under section 732 and §§ 1.732-1 and 1.732-2.

**§ 1.734-1 Optional adjustment to basis of undistributed partnership property.**

(a) *General rule.* A partnership shall not adjust the basis of partnership property as the result of a distribution of property to a partner, unless the election provided in section 754 (relating to optional adjustment to basis of partnership property) is in effect.

(b) *Method of adjustment—(1) Increase in basis.* Where an election under section 754 is in effect and a distribution of partnership property is made, whether or not in liquidation of the partner's entire interest in the partnership, the adjusted basis of the remaining partnership assets shall be increased by:

(i) The amount of any gain recognized under section 731(a)(1) to the distributee partner, or

(ii) The excess of the adjusted basis to the partnership immediately before the distribution of any property distributed (including adjustments under section 743(b) or section 732(d) when applied) over the basis under section 732 (including such special basis adjustments) of such property to the distributee partner.

See § 1.460-4(k)(2)(iv)(D) for a rule determining the partnership's basis in a long-term contract accounted for under a long-term contract method of accounting. The provisions of this paragraph (b)(1) are illustrated by the following examples:

*Example 1.* Partner A has a basis of \$10,000 for his one-third interest in partnership ABC. The partnership has no liabilities and has assets consisting of cash of \$11,000 and property with a partnership basis of \$19,000 and a value of \$22,000. A receives \$11,000 in cash in liquidation of his entire interest in the partnership. He has a gain of \$1,000 under section 731(a)(1). If the election under section 754 is in effect, the partnership basis for the property becomes \$20,000 (\$19,000 plus \$1,000).

*Example 2.* Partner D has a basis of \$10,000 for his one-third interest in partnership DEF. The partnership balance sheet before the distribution shows the following:

ASSETS		
	Adjusted basis	Value
Cash .....	\$4,000	\$4,000
Property X .....	11,000	11,000
Property Y .....	15,000	18,000

§ 1.734-1

26 CFR Ch. I (4-1-14 Edition)

ASSETS—Continued

	Adjusted basis	Value
Total .....	30,000	33,000

LIABILITIES AND CAPITAL

	Adjusted basis	Value
Liabilities .....	\$0	\$0
Capital:		
D .....	10,000	11,000
E .....	10,000	11,000
F .....	10,000	11,000
Total .....	30,000	33,000

In liquidation of his entire interest in the partnership, D received property X with a partnership basis of \$11,000. D's basis for property X is \$10,000 under section 732(b). Where the election under section 754 is in effect, the excess of \$1,000 (the partnership basis before the distribution less D's basis for property X after distribution) is added to the basis of property Y. The basis of property Y becomes \$16,000 (\$15,000 plus \$1,000). If the distribution is made to a transferee partner who elects under section 732(d), see § 1.734-2.

(2) *Decrease in basis.* Where the election provided in section 754 is in effect and a distribution is made in liquidation of a partner's entire interest, the partnership shall decrease the adjusted basis of the remaining partnership property by:

(i) The amount of loss, if any, recognized under section 731(a)(2) to the distributee partner, or

(ii) The excess of the basis of the distributed property to the distributee, as determined under section 732 (including adjustments under section 743(b) or section 732(d) when applied) over the adjusted basis of such property to the partnership (including such special basis adjustments) immediately before such distribution.

The provisions of this subparagraph may be illustrated by the following examples:

*Example 1.* Partner G has a basis of \$11,000 for his one-third interest in partnership GHI. Partnership assets consist of cash of \$10,000 and property with a basis of \$23,000 and a value of \$20,000. There are no partnership liabilities. In liquidation of his entire interest in the partnership, G receives \$10,000 in cash. He has a loss of \$1,000 under section 731(a)(2). If the election under section 754 is in effect, the partnership basis for the property becomes \$22,000 (\$23,000 less \$1,000).

*Example 2.* Partner J has a basis of \$11,000 for his one-third interest in partnership JKL. The partnership balance sheet before the distribution shows the following:

ASSETS

	Adjusted basis	Value
Cash .....	\$5,000	\$5,000
Property X .....	10,000	10,000
Property Y .....	18,000	15,000
Total .....	33,000	30,000

LIABILITIES AND CAPITAL

	Adjusted basis	Value
Liabilities .....	\$0	\$0
Capital:		
J .....	11,000	10,000
K .....	11,000	10,000
L .....	11,000	10,000
Total .....	33,000	30,000

In liquidation of his entire interest in the partnership, J receives property X with a partnership basis of \$10,000. J's basis for property X under section 732(b) is \$11,000. Where the election under section 754 is in effect, the excess of \$1,000 (\$11,000 basis of property X to J, the distributee, less its \$10,000 adjusted basis to the partnership immediately before the distribution) decreases the basis of property Y in the partnership. Thus, the basis of property Y becomes \$17,000 (\$18,000 less \$1,000). If the distribution is made to a transferee partner who elects under section 732(d), see § 1.734-2.

(c) *Allocation of basis.* For allocation among the partnership properties of basis adjustments under section 734(b) and paragraph (b) of this section, see section 755 and § 1.755-1.

(d) *Returns.* A partnership which must adjust the bases of partnership properties under section 734 shall attach a statement to the partnership return for the year of the distribution setting forth the computation of the adjustment and the partnership properties to which the adjustment has been allocated.

(e) *Recovery of adjustments to basis of partnership property—(1) Increases in basis.* For purposes of section 168, if the basis of a partnership's recovery property is increased as a result of the distribution of property to a partner, then the increased portion of the basis must be taken into account as if it were newly-purchased recovery property placed in service when the distribution

occurs. Consequently, any applicable recovery period and method may be used to determine the recovery allowance with respect to the increased portion of the basis. However, no change is made for purposes of determining the recovery allowance under section 168 for the portion of the basis for which there is no increase.

(2) *Decreases in basis.* For purposes of section 168, if the basis of a partnership's recovery property is decreased as a result of the distribution of property to a partner, then the decrease in basis must be accounted for over the remaining recovery period of the property beginning with the recovery period in which the basis is decreased.

(3) *Effective date.* This paragraph (e) applies to distributions of property from a partnership that occur on or after December 15, 1999.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 8847, 64 FR 69908, Dec. 15, 1999; T.D. 9137, 69 FR 42559, July 16, 2004]

#### § 1.734-2 Adjustment after distribution to transferee partner.

(a) In the case of a distribution of property by the partnership to a partner who has obtained all or part of his partnership interest by transfer, the adjustments to basis provided in section 743(b) and section 732(d) shall be taken into account in applying the rules under section 734(b). For determining the adjusted basis of distributed property to the partnership immediately before the distribution where there has been a prior transfer of a partnership interest with respect to which the election provided in section 754 or section 732(d) is in effect, see §§ 1.732-1 and 1.732-2.

(b)(1) If a transferee partner, in liquidation of his entire partnership interest, receives a distribution of property (including money) with respect to which he has no special basis adjustment, in exchange for his interest in property with respect to which he has a special basis adjustment, and does not utilize his entire special basis adjustment in determining the basis of the distributed property to him under section 732, the unused special basis adjustment of the distributee shall be applied as an adjustment to the partner-

ship basis of the property retained by the partnership and as to which the distributee did not use his special basis adjustment. The provisions of this subparagraph may be illustrated by the following example:

*Example.* Upon the death of his father, partner S acquires by inheritance a half-interest in partnership ACS. Partners A and C each have a one-quarter interest. The assets of the partnership consist of \$10,000 cash and land used in farming worth \$10,000 with a basis of \$1,000 to the partnership. Since the partnership had made the election under section 754 at the time of transfer, partner S had a special basis adjustment of \$4,500 under section 743(b) with respect to his undivided half-interest in the real estate. The basis of S's partnership interest, in accordance with section 742, is \$10,000. S retires from the partnership and receives \$10,000 in cash in exchange for his entire interest. Since S has received no part of the real estate, his special basis adjustment of \$4,500 will be allocated to the real estate, the remaining partnership property, and will increase its basis to the partnership to \$5,500.

(2) The provisions of this paragraph do not apply to the extent that certain distributions are treated as sales or exchanges under section 751(b) (relating to unrealized receivables and substantially appreciated inventory items). See section 751(b) and paragraph (b) of § 1.751-1.

#### § 1.735-1 Character of gain or loss on disposition of distributed property.

(a) *Sale or exchange of distributed property*—(1) *Unrealized receivables.* Any gain realized or loss sustained by a partner on a sale or exchange or other disposition of unrealized receivables (as defined in paragraph (c)(1) of § 1.751-1) received by him in a distribution from a partnership shall be considered gain or loss from the sale or exchange of property other than a capital asset.

(2) *Inventory items.* Any gain realized or loss sustained by a partner on a sale or exchange of inventory items (as defined in section 751(d)(2)) received in a distribution from a partnership shall be considered gain or loss from the sale or exchange of property other than a capital asset if such inventory items are sold or exchanged within 5 years from the date of the distribution by the partnership. The character of any gain or loss from a sale or exchange by the distributee partner of such inventory

items after 5 years from the date of distribution shall be determined as of the date of such sale or exchange by reference to the character of the assets in his hands at that date (inventory items, capital assets, property used in a trade or business, etc.).

(b) *Holding period for distributed property.* A partner's holding period for property distributed to him by a partnership shall include the period such property was held by the partnership. The provisions of this paragraph do not apply for the purpose of determining the 5-year period described in section 735(a)(2) and paragraph (a)(2) of this section. If the property has been contributed to the partnership by a partner, then the period that the property was held by such partner shall also be included. See section 1223(2). For a partnership's holding period for contributed property, see § 1.723-1.

(c) *Effective date.* Section 735(a) applies to any property distributed by a partnership to a partner after March 9, 1954. See section 771(b)(2) and paragraph (b)(2) of § 1.771-1. However, see section 771(c).

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6832, 30 FR 8574, July 7, 1965]

**§ 1.736-1 Payments to a retiring partner or a deceased partner's successor in interest.**

(a) *Payments considered as distributive share or guaranteed payment.* (1)(i) Section 736 and this section apply only to payments made to a retiring partner or to a deceased partner's successor in interest in liquidation of such partner's entire interest in the partnership. See section 761(d). Section 736 and this section do not apply if the estate or other successor in interest of a deceased partner continues as a partner in its own right under local law. Section 736 and this section apply only to payments made by the partnership and not to transactions between the partners. Thus, a sale by partner A to partner B of his entire one-fourth interest in partnership ABCD would not come within the scope of section 736.

(ii) A partner retires when he ceases to be a partner under local law. However, for the purposes of subchapter K, chapter 1 of the Code, a retired partner

or a deceased partner's successor will be treated as a partner until his interest in the partnership has been completely liquidated.

(2) When payments (including assumption of liabilities treated as a distribution of money under section 752) are made to a withdrawing partner, that is, a retiring partner or the estate or other successor in interest of a deceased partner, the amounts paid may represent several items. In part, they may represent the fair market value at the time of his death or retirement of the withdrawing partner's interest in all the assets of the partnership (including inventory) unreduced by partnership liabilities. Also, part of such payments may be attributable to his interest in unrealized receivables and part to an arrangement among the partners in the nature of mutual insurance. When a partnership makes such payments, whether or not related to partnership income, to retire the withdrawing partner's entire interest in the partnership, the payments must be allocated between (i) payments for the value of his interest in assets, except unrealized receivables and, under some circumstances, good will (section 736(b)), and (ii) other payments (section 736(a)). The amounts paid for his interest in assets are treated in the same manner as a distribution in complete liquidation under sections 731, 732, and, where applicable, 751. See paragraph (b)(4)(ii) of § 1.751-1. The remaining partners are allowed no deduction for these payments since they represent either a distribution or a purchase of the withdrawing partner's capital interest by the partnership (composed of the remaining partners).

(3) Under section 736(a), the portion of the payments made to a withdrawing partner for his share of unrealized receivables, good will (in the absence of an agreement to the contrary), or otherwise not in exchange for his interest in assets under the rules contained in paragraph (b) of this section will be considered either:

(i) A distributive share of partnership income, if the amount of payment is determined with regard to income of the partnership; or

(ii) A guaranteed payment under section 707(c), if the amount of the payment is determined without regard to income of the partnership.

(4) Payments, to the extent considered as a distributive share of partnership income under section 736(a)(1), are taken into account under section 702 in the income of the withdrawing partner and thus reduce the amount of the distributive shares of the remaining partners. Payments, to the extent considered as guaranteed payments under section 736(a)(2), are deductible by the partnership under section 162(a) and are taxable as ordinary income to the recipient under section 61(a). See section 707(c).

(5) The amount of any payments under section 736(a) shall be included in the income of the recipient for his taxable year with or within which ends the partnership taxable year for which the payment is a distributive share, or in which the partnership is entitled to deduct such amount as a guaranteed payment. On the other hand, payments under section 736(b) shall be taken into account by the recipient for his taxable year in which such payments are made. See paragraph (b)(4) of this section.

(6) A retiring partner or a deceased partner's successor in interest receiving payments under section 736 is regarded as a partner until the entire interest of the retiring or deceased partner is liquidated. Therefore, if one of the members of a 2-man partnership retires under a plan whereby he is to receive payments under section 736, the partnership will not be considered terminated, nor will the partnership year close with respect to either partner, until the retiring partner's entire interest is liquidated, since the retiring partner continues to hold a partnership interest in the partnership until that time. Similarly, if a partner in a 2-man partnership dies, and his estate or other successor in interest receives payments under section 736, the partnership shall not be considered to have terminated upon the death of the partner but shall terminate as to both partners only when the entire interest of the decedent is liquidated. See section 708(b).

(b) *Payments for interest in partnership.* (1) Payments made in liquidation

of the entire interest of a retiring partner or deceased partner shall, to the extent made in exchange for such partner's interest in partnership property (except for unrealized receivables and good will as provided in subparagraphs (2) and (3) of this paragraph), be considered as a distribution by the partnership (and not as a distributive share or guaranteed payment under section 736(a)). Generally, the valuation placed by the partners upon a partner's interest in partnership property in an arm's length agreement will be regarded as correct. If such valuation reflects only the partner's net interest in the property (i.e., total assets less liabilities), it must be adjusted so that both the value of the partner's interest in property and the basis for his interest take into account the partner's share of partnership liabilities. Gain or loss with respect to distributions under section 736(b) and this paragraph will be recognized to the distributee to the extent provided in section 731 and, where applicable, section 751.

(2) Payments made to a retiring partner or to the successor in interest of a deceased partner for his interest in unrealized receivables of the partnership in excess of their partnership basis, including any special basis adjustment for them to which such partner is entitled, shall not be considered as made in exchange for such partner's interest in partnership property. Such payments shall be treated as payments under section 736(a) and paragraph (a) of this section. For definition of unrealized receivables, see section 751(c).

(3) For the purposes of section 736(b) and this paragraph, payments made to a retiring partner or to a successor in interest of a deceased partner in exchange for the interest of such partner in partnership property shall not include any amount paid for the partner's share of good will of the partnership in excess of its partnership basis, including any special basis adjustments for it to which such partner is entitled, except to the extent that the partnership agreement provides for a reasonable payment with respect to such good will. Such payments shall be considered as payments under section

736(a). To the extent that the partnership agreement provides for a reasonable payment with respect to good will, such payments shall be treated under section 736(b) and this paragraph. Generally, the valuation placed upon good will by an arm's length agreement of the partners, whether specific in amount or determined by a formula, shall be regarded as correct.

(4) Payments made to a retiring partner or to a successor in interest of a deceased partner for his interest in inventory shall be considered as made in exchange for such partner's interest in partnership property for the purposes of section 736(b) and this paragraph. However, payments for an interest in substantially appreciated inventory items, as defined in section 751(d), are subject to the rules provided in section 751(b) and paragraph (b) of § 1.751-1. The partnership basis in inventory items as to a deceased partner's successor in interest does not change because of the death of the partner unless the partnership has elected the optional basis adjustment under section 754. But see paragraph (b)(3)(iii) of § 1.751-1.

(5) Where payments made under section 736 are received during the taxable year, the recipient must segregate that portion of each such payment which is determined to be in exchange for the partner's interest in partnership property and treated as a distribution under section 736(b) from that portion treated as a distributive share or guaranteed payment under section 736(a). Such allocation shall be made as follows:

(i) If a fixed amount (whether or not supplemented by any additional amounts) is to be received over a fixed number of years, the portion of each payment to be treated as a distribution under section 736(b) for the taxable year shall bear the same ratio to the total fixed agreed payments for such year (as distinguished from the amount actually received) as the total fixed agreed payments under section 736(b) bear to the total fixed agreed payments under section 736 (a) and (b). The balance, if any, of such amount received in the same taxable year shall be treated as a distributive share or a guaranteed payment under section 736(a) (1) or (2). However, if the total amount re-

ceived in any one year is less than the amount considered as a distribution under section 736(b) for that year, then any unapplied portion shall be added to the portion of the payments for the following year or years which are to be treated as a distribution under section 736(b). For example, retiring partner W who is entitled to an annual payment of \$6,000 for 10 years for his interest in partnership property, receives only \$3,500 in 1955. In 1956, he receives \$10,000. Of this amount, \$3,500 (\$6,000 plus \$2,500 from 1955) is treated as a distribution under section 736 (b) for 1956; \$1,500, as a payment under section 736(a).

(ii) If the retiring partner or deceased partner's successor in interest receives payments which are not fixed in amount, such payments shall first be treated as payments in exchange for his interest in partnership property under section 736(b) to the extent of the value of that interest and, thereafter, as payments under section 736(a).

(iii) In lieu of the rules provided in subdivisions (i) and (ii) of this subparagraph, the allocation of each annual payment between section 736 (a) and (b) may be made in any manner to which all the remaining partners and the withdrawing partner or his successor in interest agree, provided that the total amount allocated to property under section 736(b) does not exceed the fair market value of such property at the date of death or retirement.

(6) Except to the extent section 751(b) applies, the amount of any gain or loss with respect to payments under section 736(b) for a retiring or deceased partner's interest in property for each year of payment shall be determined under section 731. However, where the total of section 736(b) payments is a fixed sum, a retiring partner or a deceased partner's successor in interest may elect (in his tax return for the first taxable year for which he receives such payments), to report and to measure the amount of any gain or loss by the difference between:

(i) The amount treated as a distribution under section 736(b) in that year, and

(ii) The portion of the adjusted basis of the partner for his partnership interest attributable to such distribution

## Internal Revenue Service, Treasury

## § 1.736-1

(i.e., the amount which bears the same proportion to the partner's total adjusted basis for his partnership interest as the amount distributed under section 736(b) in that year bears to the total amount to be distributed under section 736(b)).

A recipient who elects under this subparagraph shall attach a statement to his tax return for the first taxable year for which he receives such payments, indicating his election and showing the computation of the gain included in gross income.

(7) The provisions of this paragraph may be illustrated by the following examples:

*Example 1.* Partnership ABC is a personal service partnership and its balance sheet is as follows:

ASSETS		
	Adjusted basis per books	Market value
Cash .....	\$13,000	\$13,000
Unrealized receivables .....	0	30,000
Capital and section 1231 assets .....	20,000	23,000
Total .....	33,000	66,000

  

LIABILITIES AND CAPITAL		
	Per books	Value
Liabilities .....	\$3,000	\$3,000
Capital:		
A .....	10,000	21,000
B .....	10,000	21,000
C .....	10,000	21,000
Total .....	33,000	66,000

Partner A retires from the partnership in accordance with an agreement whereby his share of liabilities (\$1,000) is assumed. In addition he is to receive \$9,000 in the year of retirement plus \$10,000 in each of the two succeeding years. Thus, the total that A receives for his partnership interest is \$30,000 (\$29,000 in cash and \$1,000 in liabilities assumed). Under the agreement terminating A's interest, the value of A's interest in section 736(b) partnership property is \$12,000 (one-third of \$36,000, the sum of \$13,000 cash and \$23,000, the fair market value of capital and section 1231 assets). A's share in unrealized receivables is not included in his interest in partnership property described in section 736(b). Since the basis of A's interest is \$11,000 (\$10,000 plus \$1,000, his share of partnership liabilities), he will realize a capital gain of \$1,000 (\$12,000 minus \$11,000) from the

disposition of his interest in partnership property. The remaining \$18,000 (\$30,000 minus \$12,000) will constitute payments under section 736(a)(2) which are taxable to A as guaranteed payments under section 707(c). The payment for the first year is \$10,000, consisting of \$9,000 in cash, plus \$1,000 in liability assumed (section 752(b)). Thus, unless the partners agree otherwise under subparagraph (5)(iii) of this paragraph, each annual payment of \$10,000 will be allocated as follows: \$6,000 (18,000/30,000 of \$10,000) is a section 736(a)(2) payment and \$4,000 (12,000/30,000 of \$10,000) is a payment for an interest in section 736(b) partnership property. (The partnership may deduct the \$6,000 guaranteed payment made to A in each of the 3 years.) The gain on the payments for partnership property will be determined under section 731, as provided in subparagraph (6) of this paragraph. A will treat only \$4,000 of each payment as a distribution in a series in liquidation of his entire interest and, under section 731, will have a capital gain of \$1,000 when the last payment is made. However, if A so elects, as provided in subparagraph (6) of this paragraph, he may treat such gain as follows: Of each \$4,000 payment attributable to A's interest in partnership property, \$333 is capital gain (one-third of the total capital gain of \$1,000), and \$3,667 is a return of capital.

*Example 2.* Assume the same facts as in example 1 of this subparagraph except that the agreement between the partners provides for payments to A for 3 years of a percentage of annual income instead of a fixed amount. Unless the partners agree otherwise under subparagraph (5)(iii) of this paragraph, all payments received by A up to \$12,000 shall be treated under section 736(b) as payments for A's interest in partnership property. His gain of \$1,000 will be taxed only after he has received his full basis under section 731. Since the payments are not fixed in amount, the election provided in subparagraph (6) of this paragraph is not available. Any payments in excess of \$12,000 shall be treated as a distributive share of partnership income to A under section 736(a)(1).

*Example 3.* Assume the same facts as in example 1 of this subparagraph except that the partnership agreement provides that the payment for A's interest in partnership property shall include payment for his interest in the good will of the partnership. At the time of A's retirement, the partners determine the value of partnership good will to be \$9,000. The value of A's interest in partnership property described in section 736(b) is thus \$15,000 (one-third of \$45,000, the sum of \$13,000 cash, plus \$23,000, the value of capital and section 1231 assets, plus \$9,000 good will). From the disposition of his interest in partnership property, A will realize a capital gain of \$4,000 (\$15,000, minus \$11,000) the basis of his interest. The remaining \$15,000 (\$30,000

minus \$15,000) will constitute payments under section 736(a)(2) which are taxable to A as guaranteed payments under section 707(c).

*Example 4.* Assume the same facts as in example 1 of this subparagraph except that the capital and section 1231 assets consist of an item of section 1245 property (as defined in section 1245(a)(3)). Assume further that under paragraph (c)(4) of § 1.751-1 the section 1245 property is an unrealized receivable to the extent of \$2,000. Therefore, the value of A's interest in section 736(b) partnership property is only \$11,333 (one-third of \$34,000, the sum of \$13,000 cash and \$21,000, the fair market value of section 1245 property to the extent not an unrealized receivable). From the disposition of his interest in partnership property, A will realize a capital gain of \$333 (\$11,333 minus \$11,000, the basis of his interest). The remaining \$18,667 (\$30,000 minus \$11,333) will constitute payments under section 736(a)(2) which are taxable to A as guaranteed payments under section 707(c).

(c) *Cross reference.* See section 753 for treatment of payments under section 736(a) as income in respect of a decedent under section 691.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6832, 30 FR 8574, July 7, 1965]

**§ 1.737-1 Recognition of  
precontribution gain.**

(a) *Determination of gain*—(1) *In general.* A partner that receives a distribution of property (other than money) must recognize gain under section 737 and this section in an amount equal to the lesser of the excess distribution (as defined in paragraph (b) of this section) or the partner's net precontribution gain (as defined in paragraph (c) of this section). Gain recognized under section 737 and this section is in addition to any gain recognized under section 731.

(2) *Transactions to which section 737 applies.* Section 737 and this section apply only to the extent that a distribution by a partnership is a distribution to a partner acting in the capacity of a partner within the meaning of section 731, except that section 737 and this section do not apply to the extent that section 751(b) applies to the distribution.

(b) *Excess distribution*—(1) *Definition.* The excess distribution is the amount (if any) by which the fair market value of the distributed property (other than money) exceeds the distributee part-

ner's adjusted tax basis in the partner's partnership interest.

(2) *Fair market value of property.* The fair market value of the distributed property is the price at which the property would change hands between a willing buyer and a willing seller at the time of the distribution, neither being under any compulsion to buy or sell and both having reasonable knowledge of the relevant facts. The fair market value that a partnership assigns to distributed property will be regarded as correct, provided that the value is reasonably agreed to among the partners in an arm's-length negotiation and the partners have sufficiently adverse interests.

(3) *Distributee partner's adjusted tax basis*—(i) *General rule.* In determining the amount of the excess distribution, the distributee partner's adjusted tax basis in the partnership interest includes any basis adjustment resulting from the distribution that is subject to section 737 (for example, adjustments required under section 752) and from any other distribution or transaction that is part of the same distribution, except for—

(A) The increase required under section 737(c)(1) for the gain recognized by the partner under section 737; and

(B) The decrease required under section 733(2) for any property distributed to the partner other than property previously contributed to the partnership by the distributee partner. See § 1.704-4(e)(1) for a rule in the context of section 704(c)(1)(B). See also § 1.737-3(b)(2) for a special rule for determining a partner's adjusted tax basis in distributed property previously contributed by the partner to the partnership.

(ii) *Advances or drawings.* The distributee partner's adjusted tax basis in the partnership interest is determined as of the last day of the partnership's taxable year if the distribution to which section 737 applies is properly characterized as an advance or drawing against the partner's distributive share of income. See § 1.731-1(a)(1)(ii).

(c) *Net precontribution gain*—(1) *General rule.* The distributee partner's net precontribution gain is the net gain (if any) that would have been recognized

by the distributee partner under section 704(c)(1)(B) and § 1.704-4 if all property that had been contributed to the partnership by the distributee partner within five years of the distribution and is held by the partnership immediately before the distribution had been distributed by the partnership to another partner other than a partner who owns, directly or indirectly, more than 50 percent of the capital or profits interest in the partnership. See § 1.704-4 for provisions determining a contributing partner's gain or loss under section 704(c)(1)(B) on an actual distribution of contributed section 704(c) property to another partner.

(2) *Special rules*—(i) *Property contributed on or before October 3, 1989.* Property contributed to the partnership on or before October 3, 1989, is not taken into account in determining a partner's net precontribution gain. See § 1.704-4(c)(1) for a similar rule in the context of section 704(c)(1)(B).

(ii) *Section 734(b)(1)(A) adjustments.* For distributions to a distributee partner of money by a partnership with a section 754 election in effect that are part of the same distribution as the distribution of property subject to section 737, for purposes of paragraph (a) and (c)(1) of this section the distributee partner's net precontribution gain is reduced by the basis adjustments (if any) made to section 704(c) property contributed by the distributee partner under section 734(b)(1)(A). See § 1.737-3(c)(4) for rules regarding basis adjustments for partnerships with a section 754 election in effect.

(iii) *Transfers of a partnership interest.* The transferee of all or a portion of a contributing partner's partnership interest succeeds to the transferor's net precontribution gain, if any, in an amount proportionate to the interest transferred. See § 1.704-3(a)(7) and § 1.704-4(d)(2) for similar provisions in the context of section 704(c)(1)(A) and section 704(c)(1)(B).

(iv) *Section 704(c)(1)(B) gain recognized in related distribution.* A distributee partner's net precontribution gain is determined after taking into account any gain or loss recognized by the partner under section 704(c)(1)(B) and § 1.704-4 (or that would have been recognized by the partner except for the

like-kind exception in section 704(c)(2) and § 1.704-4(d)(3)) on an actual distribution to another partner of section 704(c) property contributed by the distributee partner that is part of the same distribution as the distribution to the distributee partner.

(v) *Section 704(c)(2) disregarded.* A distributee partner's net precontribution gain is determined without regard to the provisions of section 704(c)(2) and § 1.704-4(d)(3) in situations in which the property contributed by the distributee partner is not actually distributed to another partner in a distribution related to the section 737 distribution.

(d) *Character of gain.* The character of the gain recognized by the distributee partner under section 737 and this section is determined by, and is proportionate to, the character of the partner's net precontribution gain. For this purpose, all gains and losses on section 704(c) property taken into account in determining the partner's net precontribution gain are netted according to their character. Character is determined at the partnership level for this purpose, and any character with a net negative amount is disregarded. The character of the partner's gain under section 737 is the same as, and in proportion to, any character with a net positive amount. Character for this purpose is determined as if the section 704(c) property had been sold by the partnership to an unrelated third party at the time of the distribution and includes any item that would have been taken into account separately by the contributing partner under section 702(a) and § 1.702-1(a).

(e) *Examples.* The following examples illustrate the provisions of this section. Unless otherwise specified, partnership income equals partnership expenses (other than depreciation deductions for contributed property) for each year of the partnership, the fair market value of partnership property does not change, all distributions by the partnership are subject to section 737, and all partners are unrelated.

*Example 1. Calculation of excess distribution and net precontribution gain.* (i) On January 1, 1995, A, B, and C form partnership ABC as equal partners. A contributes Property A, depreciable real property with a fair market value of \$30,000 and an adjusted tax basis of

\$20,000. B contributes Property B, nondepreciable real property with a fair market value and adjusted tax basis of \$30,000. C contributes \$30,000 cash.

(ii) Property A has 10 years remaining on its cost recovery schedule and is depreciated using the straight-line method. The partnership uses the traditional method for allocating items under section 704(c) described in § 1.704-3(b)(1) for Property A. The partnership has book depreciation of \$3,000 per year (10 percent of the \$30,000 book basis in Property A) and each partner is allocated \$1,000 of book depreciation per year (one-third of the total annual book depreciation of \$3,000). The partnership also has tax depreciation of \$2,000 per year (10 percent of the \$20,000 adjusted tax basis in Property A). This \$2,000 tax depreciation is allocated equally between B and C, the noncontributing partners with respect to Property A.

(iii) At the end of 1997, the book value of Property A is \$21,000 (\$30,000 initial book value less \$9,000 aggregate book depreciation) and its adjusted tax basis is \$14,000 (\$20,000 initial tax basis less \$6,000 aggregate tax depreciation).

(iv) On December 31, 1997, Property B is distributed to A in complete liquidation of A's partnership interest. The adjusted tax basis of A's partnership interest at that time is \$20,000. The amount of the excess distribution is \$10,000, the difference between the fair market value of the distributed Property B (\$30,000) and A's adjusted tax basis in A's partnership interest (\$20,000). A's net precontribution gain is \$7,000, the difference between the book value of Property A (\$21,000) and its adjusted tax basis at the time of the distribution (\$14,000). A recognizes gain of \$7,000 on the distribution, the lesser of the excess distribution and the net precontribution gain.

*Example 2. Determination of distributee partner's basis.* (i) On January 1, 1995, A, B, and C form general partnership ABC as equal partners. A contributes Property A, nondepreciable real property with a fair market value of \$10,000 and an adjusted tax basis of \$4,000. B and C each contributes \$10,000 cash.

(ii) The partnership purchases Property B, nondepreciable real property with a fair market value of \$9,000, subject to a \$9,000 nonrecourse liability. This nonrecourse liability is allocated equally among the partners under section 752, increasing A's adjusted tax basis in A's partnership interest from \$4,000 to \$7,000.

(iii) On December 31, 1998, A receives \$2,000 cash and Property B, subject to the \$9,000 liability, in a current distribution.

(iv) In determining the amount of the excess distribution, the adjusted tax basis of A's partnership interest is adjusted to take into account the distribution of money and the shift in liabilities. A's adjusted tax basis is therefore increased to \$11,000 for this pur-

pose (\$7,000 initial adjusted tax basis, less \$2,000 distribution of money, less \$3,000 (decrease in A's share of the \$9,000 partnership liability), plus \$9,000 (increase in A's individual liabilities)). As a result of this basis adjustment, the adjusted tax basis of A's partnership interest (\$11,000) is greater than the fair market value of the distributed property (\$9,000) and therefore, there is no excess distribution. A recognizes no gain under section 737.

*Example 3. Net precontribution gain reduced for gain recognized under section 704(c)(1)(B).*

(i) On January 1, 1995, A, B, and C form partnership ABC as equal partners. A contributes Properties A1 and A2, nondepreciable real properties located in the United States each with a fair market value of \$10,000 and an adjusted tax basis of \$6,000. B contributes Property B, nondepreciable real property located outside the United States, with a fair market value and adjusted tax basis of \$20,000. C contributes \$20,000 cash.

(ii) On December 31, 1998, Property B is distributed to A in complete liquidation of A's interest and, as part of the same distribution, Property A1 is distributed to B in a current distribution.

(iii) A's net precontribution gain before the distribution is \$8,000 (\$20,000 fair market value of Properties A1 and A2 less \$12,000 adjusted tax basis of such properties). A recognizes \$4,000 of gain under section 704(c)(1)(B) and § 1.704-4 on the distribution of Property A1 to B (\$10,000 fair market value of Property A1 less \$6,000 adjusted tax basis of Property A1). This gain is taken into account in determining A's excess distribution and net precontribution gain. As a result, A's net precontribution gain is reduced from \$8,000 to \$4,000, and the adjusted tax basis in A's partnership interest is increased by \$4,000 to \$16,000.

(iv) A recognizes gain of \$4,000 on the receipt of Property B under section 737, an amount equal to the lesser of the excess distribution of \$4,000 (\$20,000 fair market value of Property B less \$16,000 adjusted tax basis of A's interest in the partnership) and A's remaining net precontribution gain of \$4,000.

*Example 4. Character of gain.* (i) On January 1, 1995, A, B, and C form partnership ABC as equal partners. A contributes the following nondepreciable property to the partnership:

	Fair market value	Adjusted tax basis
Property A1 .....	\$30,000	\$20,000
Property A2 .....	30,000	38,000
Property A3 .....	10,000	9,000

(ii) The character of gain or loss on Property A1 and Property A2 is long-term, U.S.-source capital gain or loss. The character of gain on Property A3 is long-term, foreign-source capital gain. B contributes Property B, nondepreciable real property with a fair

market value and adjusted tax basis of \$70,000. C contributes \$70,000 cash.

(iii) On December 31, 1998, Property B is distributed to A in complete liquidation of A's interest in the partnership. A recognizes \$3,000 of gain under section 737, an amount equal to the excess distribution of \$3,000 (\$70,000 fair market value of Property B less \$67,000 adjusted tax basis in A's partnership interest) and A's net precontribution gain of \$3,000 (\$70,000 aggregate fair market value of properties contributed by A less \$67,000 aggregate adjusted tax basis of such properties).

(iv) In determining the character of A's gain, all gains and losses on property taken into account in determining A's net precontribution gain are netted according to their character and allocated to A's recognized gain under section 737 based on the relative proportions of the net positive amounts. U.S.-source and foreign-source gains must be netted separately because A would have been required to take such gains into account separately under section 702. As a result, A's net precontribution gain of \$3,000 consists of \$2,000 of net long-term, U.S.-source capital gain (\$10,000 gain on Property A1 and \$8,000 loss on Property A2) and \$1,000 of net long-term, foreign-source capital gain (\$1,000 gain on Property A3).

(v) The character of A's gain under paragraph (d) of this section is therefore \$2,000 long-term, U.S.-source capital gain (\$3,000 gain recognized under section 737  $\times$  \$2,000 net long-term, U.S.-source capital gain/\$3,000 total net precontribution gain) and \$1,000 long-term, foreign-source capital gain (\$3,000 gain recognized under section 737  $\times$  \$1,000 net long-term, foreign-source capital gain/\$3,000 total net precontribution gain).

[T.D. 8642, 60 FR 66733, Dec. 26, 1995]

### § 1.737-2 Exceptions and special rules.

(a) *Section 708(b)(1)(B) terminations.* Section 737 and this section do not apply to the deemed distribution of interests in a new partnership caused by the termination of a partnership under section 708(b)(1)(B). A subsequent distribution of property by the new partnership to a partner of the new partnership that was formerly a partner of the terminated partnership is subject to section 737 to the same extent that a distribution from the terminated partnership would have been subject to section 737. See also § 1.704-4(c)(3) for a similar rule in the context of section 704(c)(1)(B). This paragraph (a) applies to terminations of partnerships under section 708(b)(1)(B) occurring on or after May 9, 1997; however, this para-

graph (a) may be applied to terminations occurring on or after May 9, 1996, provided that the partnership and its partners apply this paragraph (a) to the termination in a consistent manner.

(b) *Transfers to another partnership—*

(1) *Complete transfer.* Section 737 and this section do not apply to a transfer by a partnership (transferor partnership) of all of its assets and liabilities to a second partnership (transferee partnership) in an exchange described in section 721, followed by a distribution of the interest in the transferee partnership in liquidation of the transferor partnership as part of the same plan or arrangement. See § 1.704-4(c)(4) for a similar rule in the context of section 704(c)(1)(B).

(2) *Certain divisive transactions.* Section 737 and this section do not apply to a transfer by a partnership (transferor partnership) of all of the section 704(c) property contributed by a partner to a second partnership (transferee partnership) in an exchange described in section 721, followed by a distribution as part of the same plan or arrangement of an interest in the transferee partnership (and no other property) in complete liquidation of the interest of the partner that originally contributed the section 704(c) property to the transferor partnership.

(3) *Subsequent distributions.* A subsequent distribution of property by the transferee partnership to a partner of the transferee partnership that was formerly a partner of the transferor partnership is subject to section 737 to the same extent that a distribution from the transferor partnership would have been subject to section 737.

(c) *Incorporation of a partnership.* Section 737 and this section do not apply to an incorporation of a partnership by any method of incorporation (other than a method involving an actual distribution of partnership property to the partners followed by a contribution of that property to a corporation), provided that the partnership is liquidated as part of the incorporation transaction. See § 1.704-4(c)(5) for a similar rule in the context of section 704(c)(1)(B).

(d) *Distribution of previously contributed property*—(1) *General rule.* Any portion of the distributed property that consists of property previously contributed by the distributee partner (previously contributed property) is not taken into account in determining the amount of the excess distribution or the partner's net precontribution gain. The previous sentence applies on or after May 9, 1997. See § 1.737-3(b)(2) for a special rule for determining the basis of previously contributed property in the hands of a distributee partner who contributed the property to the partnership.

(2) *Limitation for distribution of previously contributed interest in an entity.* An interest in an entity previously contributed to the partnership is not treated as previously contributed property to the extent that the value of the interest is attributable to property contributed to the entity after the interest was contributed to the partnership. The preceding sentence does not apply to the extent that the property contributed to the entity was contributed to the partnership by the partner that also contributed the interest in the entity to the partnership.

(3) *Nonrecognition transactions, installment sales, contributed contracts, and capitalized costs*—(i) *Nonrecognition transactions.* Property received by the partnership in exchange for contributed section 704(c) property in a nonrecognition transaction is treated as the contributed property with regard to the contributing partner for purposes of section 737 to the extent that the property received is treated as section 704(c) property under § 1.704-3(a)(8). See § 1.704-4(d)(1) for a similar rule in the context of section 704(c)(1)(B).

(ii) *Installment sales.* An installment obligation received by the partnership in an installment sale (as defined in section 453(b)) of section 704(c) property is treated as the contributed property with regard to the contributing partner for purposes of section 737 to the extent that the installment obligation received is treated as section 704(c) property under § 1.704-3(a)(8). See § 1.704-4(d)(1) for a similar rule in the context of section 704(c)(1)(B).

(iii) *Contributed contracts.* Property acquired by a partnership pursuant to

a contract that is section 704(c) property is treated as the contributed property with regard to the contributing partner for purposes of section 737 to the extent that the acquired property is treated as section 704(c) property under § 1.704-3(a)(8). See § 1.704-4(d)(1) for a similar rule in the context of section 704(c)(1)(B).

(iv) *Capitalized costs.* Property to which the cost of section 704(c) property is properly capitalized is treated as section 704(c) property for purposes of section 737 to the extent that such property is treated as section 704(c) property under § 1.704-3(a)(8)(iv). See § 1.704-4(d)(1) for a similar rule in the context of section 704(c)(1)(B).

(4) *Undivided interests.* The distribution of an undivided interest in property is treated as the distribution of previously contributed property to the extent that the undivided interest does not exceed the undivided interest, if any, contributed by the distributee partner in the same property. See § 1.704-4(c)(6) for the application of section 704(c)(1)(B) in a similar context. The portion of the undivided interest in property retained by the partnership after the distribution, if any, that is treated as contributed by the distributee partner, is reduced to the extent of the undivided interest distributed to the distributee partner.

(e) *Examples.* The following examples illustrate the rules of this section. Unless otherwise specified, partnership income equals partnership expenses (other than depreciation deductions for contributed property) for each year of the partnership, the fair market value of partnership property does not change, all distributions by the partnership are subject to section 737, and all partners are unrelated.

*Example 1. Distribution of previously contributed property.* (i) On January 1, 1995, A, B, and C form partnership ABC as equal partners. A contributes the following nondepreciable real property to the partnership:

	Fair market value	Adjusted tax basis
Property A1 .....	\$20,000	\$10,000
Property A2 .....	10,000	6,000

(ii) A's total net precontribution gain on the contributed property is \$14,000 (\$10,000 on Property A1 plus \$4,000 on Property A2). B

## Internal Revenue Service, Treasury

## § 1.737-3

contributes \$10,000 cash and Property B, non-depreciable real property with a fair market value and adjusted tax basis of \$20,000. C contributes \$30,000 cash.

(iii) On December 31, 1998, Property A2 and Property B are distributed to A in complete liquidation of A's interest in the partnership. Property A2 was previously contributed by A and is therefore not taken into account in determining the amount of the excess distribution or A's net precontribution gain. The adjusted tax basis of Property A2 in the hands of A is also determined under section 732 as if that property were the only property distributed to A.

(iv) As a result of excluding Property A2 from these determinations, the amount of the excess distribution is \$10,000 (\$20,000 fair market value of distributed Property B less \$10,000 adjusted tax basis in A's partnership interest). A's net precontribution gain is also \$10,000 (\$14,000 total net precontribution gain less \$4,000 gain with respect to previously contributed Property A2). A therefore recognizes \$10,000 of gain on the distribution, the lesser of the excess distribution and the net precontribution gain.

*Example 2. Distribution of a previously contributed interest in an entity.* (i) On January 1, 1995, A, B, and C form partnership ABC as equal partners. A contributes Property A, nondepreciable real property with a fair market value of \$10,000 and an adjusted tax basis of \$5,000, and all of the stock of Corporation X with a fair market value and adjusted tax basis of \$500. B contributes \$500 cash and Property B, nondepreciable real property with a fair market value and adjusted tax basis of \$10,000. Partner C contributes \$10,500 cash. On December 31, 1996, ABC contributes Property B to Corporation X in a non-recognition transaction under section 351.

(ii) On December 31, 1998, all of the stock of Corporation X is distributed to A in complete liquidation of A's interest in the partnership. The stock is treated as previously contributed property with respect to A only to the extent of the \$500 fair market value of the Corporation X stock contributed by A. The fair market value of the distributed stock for purposes of determining the amount of the excess distribution is therefore \$10,000 (\$10,500 total fair market value of Corporation X stock less \$500 portion treated as previously contributed property). The \$500 fair market value and adjusted tax basis of the Corporation X stock is also not taken into account in determining the amount of the excess distribution and the net precontribution gain.

(iii) A recognizes \$5,000 of gain under section 737, the amount of the excess distribution (\$10,000 fair market value of distributed property less \$5,000 adjusted tax basis in A's partnership interest) and A's net precontribution gain (\$10,000 fair market

value of Property A less \$5,000 adjusted tax basis in Property A).

*Example 3. Distribution of undivided interest in property.* (i) On January 1, 1995, A and B form partnership AB as equal partners. A contributes \$500 cash and an undivided one-half interest in Property X. B contributes \$500 cash and an undivided one-half interest in Property X.

(ii) On December 31, 1998, an undivided one-half interest in Property X is distributed to A in a current distribution. The distribution of the undivided one-half interest in Property X is treated as a distribution of previously contributed property because A contributed an undivided one-half interest in Property X. As a result, A does not recognize any gain under section 737 on the distribution.

[T.D. 8642, 60 FR 66735, Dec. 26, 1995, as amended by T.D. 8717, 62 FR 25501, May 9, 1997; T.D. 9193, 70 FR 14395, Mar. 22, 2005; T.D. 9207, 70 FR 30342, May 26, 2005; T.D. 9193, 70 FR 45531, Aug. 8, 2005]

### § 1.737-3 Basis adjustments; Recovery rules.

(a) *Distributee partner's adjusted tax basis in the partnership interest.* The distributee partner's adjusted tax basis in the partnership interest is increased by the amount of gain recognized by the distributee partner under section 737 and this section. This increase is not taken into account in determining the amount of gain recognized by the partner under section 737(a)(1) and this section or in determining the amount of gain recognized by the partner under section 731(a) on the distribution of money in the same distribution or any related distribution. See § 1.704-4(e)(1) for a determination of the distributee partner's adjusted tax basis in a distribution subject to section 704(c)(1)(B).

(b) *Distributee partner's adjusted tax basis in distributed property—(1) In general.* The distributee partner's adjusted tax basis in the distributed property is determined under section 732 (a) or (b) as applicable. The increase in the distributee partner's adjusted tax basis in the partnership interest under paragraph (a) of this section is taken into account in determining the distributee partner's adjusted tax basis in the distributed property other than property previously contributed by the partner. See § 1.704-4(e)(2) for a determination of basis in a distribution subject to section 704(c)(1)(B).

(2) *Previously contributed property.* The distributee partner's adjusted tax basis in distributed property that the partner previously contributed to the partnership is determined as if it were distributed in a separate and independent distribution prior to the distribution that is subject to section 737 and § 1.737-1.

(c) *Partnership's adjusted tax basis in partnership property—*(1) *Increase in basis.* The partnership's adjusted tax basis in eligible property is increased by the amount of gain recognized by the distributee partner under section 737.

(2) *Eligible property.* Eligible property is property that—

(i) Entered into the calculation of the distributee partner's net precontribution gain;

(ii) Has an adjusted tax basis to the partnership less than the property's fair market value at the time of the distribution;

(iii) Would have the same character of gain on a sale by the partnership to an unrelated party as the character of any of the gain recognized by the distributee partner under section 737; and

(iv) Was not distributed to another partner in a distribution subject to section 704(c)(1)(B) and § 1.704-4 that was part of the same distribution as the distribution subject to section 737.

(3) *Method of adjustment.* For the purpose of allocating the basis increase under paragraph (c)(2) of this section among the eligible property, all eligible property of the same character is treated as a single group. Character for this purpose is determined in the same manner as the character of the recognized gain is determined under § 1.737-1(d). The basis increase is allocated among the separate groups of eligible property in proportion to the character of the gain recognized under section 737. The basis increase is then allocated among property within each group in the order in which the property was contributed to the partnership by the partner, starting with the property contributed first, in an amount equal to the difference between the property's fair market value and its adjusted tax basis to the partnership at the time of the distribution. For property that has the same character and

was contributed in the same (or a related) transaction, the basis increase is allocated based on the respective amounts of unrealized appreciation in such properties at the time of the distribution.

(4) *Section 754 adjustments.* The basis adjustments to partnership property made pursuant to paragraph (c)(1) of this section are not elective and must be made regardless of whether the partnership has an election in effect under section 754. Any adjustments to the bases of partnership property (including eligible property as defined in paragraph (c)(2) of this section) under section 734(b) pursuant to a section 754 election (other than basis adjustments under section 734(b)(1)(A) described in the following sentence) must be made after (and must take into account) the adjustments to basis made under paragraph (a) and paragraph (c)(1) of this section. Basis adjustments under section 734(b)(1)(A) that are attributable to distributions of money to the distributee partner that are part of the same distribution as the distribution of property subject to section 737 are made before the adjustments to basis under paragraph (a) and paragraph (c)(1) of this section. See § 1.737-1(c)(2)(ii) for the effect, if any, of basis adjustments under section 734(b)(1)(A) on a partner's net precontribution gain. See also § 1.704-4(e)(3) for a similar rule regarding basis adjustments pursuant to a section 754 election in the context of section 704(c)(1)(B).

(d) *Recovery of increase to adjusted tax basis.* Any increase to the adjusted tax basis of partnership property under paragraph (c)(1) of this section is recovered using any applicable recovery period and depreciation (or other cost recovery) method (including first-year conventions) available to the partnership for newly purchased property (of the type adjusted) placed in service at the time of the distribution.

(e) *Examples.* The following examples illustrate the rules of this section. Unless otherwise specified, partnership income equals partnership expenses (other than depreciation deductions for contributed property) for each year of the partnership, the fair market value of partnership property does not

change, all distributions by the partnership are subject to section 737, and all partners are unrelated.

*Example 1. Partner's basis in distributed property.* (i) On January 1, 1995, A, B, and C form partnership ABC as equal partners. A contributes Property A, nondepreciable real property with a fair market value of \$10,000 and an adjusted tax basis of \$5,000. B contributes Property B, nondepreciable real property with a fair market value and adjusted tax basis of \$10,000. C contributes \$10,000 cash.

(ii) On December 31, 1998, Property B is distributed to A in complete liquidation of A's interest in the partnership. A recognizes \$5,000 of gain under section 737, an amount equal to the excess distribution of \$5,000 (\$10,000 fair market value of Property B less \$5,000 adjusted tax basis in A's partnership interest) and A's net precontribution gain of \$5,000 (\$10,000 fair market value of Property A less \$5,000 adjusted tax basis of such property).

(iii) A's adjusted tax basis in A's partnership interest is increased by the \$5,000 of gain recognized under section 737. This increase is taken into account in determining A's basis in the distributed property. Therefore, A's adjusted tax basis in distributed Property B is \$10,000 under section 732(b).

*Example 2. Partner's basis in distributed property in connection with gain recognized under section 704(c)(1)(B).* (i) On January 1, 1995, A, B, and C form partnership ABC as equal partners. A contributes the following nondepreciable real property located in the United States to the partnership:

	Fair market value	Adjusted tax basis
Property A1 .....	\$10,000	5,000
Property A2 .....	10,000	2,000

(ii) B contributes \$10,000 cash and Property B, nondepreciable real property located outside the United States, with a fair market value and adjusted tax basis of \$10,000. C contributes \$20,000 cash.

(iii) On December 31, 1998, Property B is distributed to A in a current distribution and Property A1 is distributed to B in a current distribution. A recognizes \$5,000 of gain under section 704(c)(1)(B) and § 1.704-4 on the distribution of Property A1 to B, the difference between the fair market value of such property (\$10,000) and the adjusted tax basis in distributed Property A1 (\$5,000). The adjusted tax basis of A's partnership interest is increased by this \$5,000 of gain under section 704(c)(1)(B) and § 1.704-4(e)(1).

(iv) The increase in the adjusted tax basis of A's partnership interest is taken into account in determining the amount of the excess distribution. As a result, there is no excess distribution because the fair market

value of Property B (\$10,000) is less than the adjusted tax basis of A's interest in the partnership at the time of distribution (\$12,000). A therefore recognizes no gain under section 737 on the receipt of Property B. A's adjusted tax basis in Property B is \$10,000 under section 732(a)(1). The adjusted tax basis of A's partnership interest is reduced from \$12,000 to \$2,000 under section 733. See *Example 3* of § 1.737-1(e).

*Example 3. Partnership's basis in partnership property after a distribution with section 737 gain.* (i) On January 31, 1995, A, B, and C form partnership ABC as equal partners. A contributes the following nondepreciable property to the partnership:

	Fair market value	Adjusted tax basis
Property A1 .....	\$1,000	\$500
Property A2 .....	4,000	1,500
Property A3 .....	4,000	6,000
Property A4 .....	6,000	4,000

(ii) The character of gain or loss on Properties A1, A2, and A3 is long-term, U.S.-source capital gain or loss. The character of gain on Property A4 is long-term, foreign-source capital gain. B contributes Property B, nondepreciable real property with a fair market value and adjusted tax basis of \$15,000. C contributes \$15,000 cash.

(iii) On December 31, 1998, Property B is distributed to A in complete liquidation of A's interest in the partnership. A recognizes gain of \$3,000 under section 737, an amount equal to the excess distribution of \$3,000 (\$15,000 fair market value of Property B less \$12,000 adjusted tax basis in A's partnership interest) and A's net precontribution gain of \$3,000 (\$15,000 aggregate fair market value of the property contributed by A less \$12,000 aggregate adjusted tax basis of such property).

(iv) \$2,000 of A's gain is long-term, foreign-source capital gain (\$3,000 total gain under section 737 × \$2,000 net long-term, foreign-source capital gain/\$3,000 total net precontribution gain). \$1,000 of A's gain is long-term, U.S.-source capital gain (\$3,000 total gain under section 737 × \$1,000 net long-term, U.S.-source capital gain/\$3,000 total net precontribution gain).

(v) The partnership must increase the adjusted tax basis of the property contributed by A by \$3,000. All property contributed by A is eligible property. Properties A1, A2, and A3 have the same character and are grouped into a single group for purposes of allocating this basis increase. Property A4 is in a separate character group.

(vi) \$2,000 of the basis increase must be allocated to long-term, foreign-source capital assets because \$2,000 of the gain recognized by A was long-term, foreign-source capital gain. The adjusted tax basis of Property A4 is therefore increased from \$4,000 to \$6,000. \$1,000 of the increase must be allocated to

#### § 1.737-4

#### 26 CFR Ch. I (4-1-14 Edition)

Properties A1 and A2 because \$1,000 of the gain recognized by A is long-term, U.S.-source capital gain. No basis increase is allocated to Property A3 because its fair market value is less than its adjusted tax basis. The \$1,000 basis increase is allocated between Properties A1 and A2 based on the unrealized appreciation in each asset before such basis adjustment. As a result, the adjusted tax basis of Property A1 is increased by \$167 (\$1,000×\$500/\$3,000) and the adjusted tax basis of Property A2 is increased by \$833 (\$1,000×\$2,500/\$3,000).

[T.D. 8642, 60 FR 66736, Dec. 26, 1995; 61 FR 7214, Feb. 27, 1996]

#### § 1.737-4 Anti-abuse rule.

(a) *In general.* The rules of section 737 and §§ 1.737-1, 1.737-2, and 1.737-3 must be applied in a manner consistent with the purpose of section 737. Accordingly, if a principal purpose of a transaction is to achieve a tax result that is inconsistent with the purpose of section 737, the Commissioner can recast the transaction for federal tax purposes as appropriate to achieve tax results that are consistent with the purpose of section 737. Whether a tax result is inconsistent with the purpose of section 737 must be determined based on all the facts and circumstances. See § 1.704-4(f) for an anti-abuse rule and examples in the context of section 704(c)(1)(B). The anti-abuse rule and examples under section 704(c)(1)(B) and § 1.704-4(f) are relevant to section 737 and §§ 1.737-1, 1.737-2, and 1.737-3 to the extent that the net precontribution gain for purposes of section 737 is determined by reference to section 704(c)(1)(B).

(b) *Examples.* The following examples illustrate the rules of this section. The examples set forth below do not delineate the boundaries of either permissible or impermissible types of transactions. Further, the addition of any facts or circumstances that are not specifically set forth in an example (or the deletion of any facts or circumstances) may alter the outcome of the transaction described in the example. Unless otherwise specified, partnership income equals partnership expenses (other than depreciation deductions for contributed property) for each year of the partnership, the fair market value of partnership property does not change, all distributions by the

partnership are subject to section 737, and all partners are unrelated.

*Example 1. Increase in distributee partner's basis by temporary contribution; results inconsistent with the purpose of section 737.* (i) On January 1, 1995, A, B, and C form partnership ABC as equal partners. A contributes Property A1, nondepreciable real property with a fair market value of \$10,000 and an adjusted tax basis of \$1,000. B contributes Property B, nondepreciable real property with a fair market value of \$10,000 and an adjusted tax basis of \$10,000. C contributes \$10,000 cash.

(ii) On January 1, 1999, pursuant to a plan a principal purpose of which is to avoid gain under section 737, A transfers to the partnership Property A2, nondepreciable real property with a fair market value and adjusted tax basis of \$9,000. A treats the transfer as a contribution to the partnership pursuant to section 721 and increases the adjusted tax basis of A's partnership interest from \$1,000 to \$10,000. On January 1, 1999, the partnership agreement is amended and all other necessary steps are taken so that substantially all of the economic risks and benefits of Property A2 are retained by A. On February 1, 1999, Property B is distributed to A in a current distribution. If the contribution of Property A2 is treated as a contribution to the partnership for purposes of section 737, there is no excess distribution because the fair market value of distributed Property B (\$10,000) does not exceed the adjusted tax basis of A's interest in the partnership (\$10,000), and therefore section 737 does not apply. A's adjusted tax basis in distributed Property B is \$10,000 under section 732(a)(1) and the adjusted tax basis of A's partnership interest is reduced to zero under section 733.

(iii) On March 1, 2000, A receives Property A2 from the partnership in complete liquidation of A's interest in the partnership. A recognizes no gain on the distribution of Property A2 because the property was previously contributed property. See § 1.737-2(d).

(iv) Although A has treated the transfer of Property A2 as a contribution to the partnership that increased the adjusted tax basis of A's interest in the partnership, it would be inconsistent with the purpose of section 737 to recognize the transfer as a contribution to the partnership. Section 737 requires recognition of gain when the value of distributed property exceeds the distributee partner's adjusted tax basis in the partnership interest. Section 737 assumes that any contribution or other transaction that affects a partner's adjusted tax basis in the partnership interest is a contribution or transaction in substance and is not engaged in with a principal purpose of avoiding recognition of gain under section 737. Because the transfer of Property A2 to the partnership was not a contribution in substance and was made with a principal purpose of avoiding recognition

## Internal Revenue Service, Treasury

## § 1.741-1

of gain under section 737, the Commissioner can disregard the contribution of Property A2 for this purpose. As a result, A recognizes gain of \$9,000 under section 737 on the receipt of Property B, an amount equal to the lesser of the excess distribution of \$9,000 (\$10,000 fair market value of distributed Property B less the \$1,000 adjusted tax basis of A's partnership interest, determined without regard to the transitory contribution of Property A2) or A's net precontribution gain of \$9,000 on Property A1.

*Example 2. Increase in distributee partner's basis; section 752 liability shift; results consistent with the purpose of section 737.* (i) On January 1, 1995, A and B form general partnership AB as equal partners. A contributes Property A, nondepreciable real property with a fair market value of \$10,000 and an adjusted tax basis of \$1,000. B contributes Property B, nondepreciable real property with a fair market value and adjusted tax basis of \$10,000. The partnership also borrows \$10,000 on a recourse basis and purchases Property C. The \$10,000 liability is allocated equally between A and B under section 752, thereby increasing the adjusted tax basis in A's partnership interest to \$6,000.

(ii) On December 31, 1998, the partners agree that A is to receive Property B in a current distribution. If A were to receive Property B at that time, A would recognize \$4,000 of gain under section 737, an amount equal to the lesser of the excess distribution of \$4,000 (\$10,000 fair market value of Property B less \$6,000 adjusted tax basis in A's partnership interest) or A's net precontribution gain of \$9,000 (\$10,000 fair market value of Property A less \$1,000 adjusted tax basis of Property A).

(iii) With a principal purpose of avoiding such gain, A and B agree that A will be solely liable for the repayment of the \$10,000 partnership liability and take the steps necessary so that the entire amount of the liability is allocated to A under section 752. The adjusted tax basis in A's partnership interest is thereby increased from \$6,000 to \$11,000 to reflect A's share of the \$5,000 of liability previously allocated to B. As a result of this increase in A's adjusted tax basis, there is no excess distribution because the fair market value of distributed Property B (\$10,000) is less than the adjusted tax basis of A's partnership interest. Recognizing A's increased adjusted tax basis as a result of the shift in liabilities is consistent with the purpose of section 737 and this section. Section 737 requires recognition of gain only when the value of the distributed property exceeds the distributee partner's adjusted tax basis in the partnership interest. The \$10,000 recourse liability is a bona fide liability of the partnership that was undertaken for a substantial business purpose and A's and B's agreement that A will assume responsibility for repayment of that debt has substance.

Therefore, the increase in A's adjusted tax basis in A's interest in the partnership due to the shift in partnership liabilities under section 752 is respected, and A recognizes no gain under section 737.

[T.D. 8642, 60 FR 66738, Dec. 26, 1995]

### § 1.737-5 Effective dates.

Sections 1.737-1, 1.737-2, 1.737-3, and 1.737-4 apply to distributions by a partnership to a partner on or after January 9, 1995, except that § 1.737-2(d)(3)(iv) applies to distributions by a partnership to a partner on or after June 24, 2003.

[T.D. 9207, 70 FR 30342, May 26, 2005]

## TRANSFERS OF INTERESTS IN A PARTNERSHIP

### § 1.741-1 Recognition and character of gain or loss on sale or exchange.

(a) The sale or exchange of an interest in a partnership shall, except to the extent section 751(a) applies, be treated as the sale or exchange of a capital asset, resulting in capital gain or loss measured by the difference between the amount realized and the adjusted basis of the partnership interest, as determined under section 705. For treatment of selling partner's distributive share up to date of sale, see section 706(c)(2). Where the provisions of section 751 require the recognition of ordinary income or loss with respect to a portion of the amount realized from such sale or exchange, the amount realized shall be reduced by the amount attributable under section 751 to unrealized receivables and substantially appreciated inventory items, and the adjusted basis of the transferor partner's interest in the partnership shall be reduced by the portion of such basis attributable to such unrealized receivables and substantially appreciated inventory items. See section 751 and § 1.751-1.

(b) Section 741 shall apply whether the partnership interest is sold to one or more members of the partnership or to one or more persons who are not members of the partnership. Section 741 shall also apply even though the sale of the partnership interest results in a termination of the partnership under section 708(b). Thus, the provisions of section 741 shall be applicable (1) to the transferor partner in a 2-man

## § 1.742-1

## 26 CFR Ch. I (4-1-14 Edition)

partnership when he sells his interest to the other partner, and (2) to all the members of a partnership when they sell their interests to one or more persons outside the partnership.

(c) See section 351 for nonrecognition of gain or loss upon transfer of a partnership interest to a corporation controlled by the transferor.

(d) For rules relating to the treatment of liabilities on the sale or exchange of interests in a partnership see §§1.752-1 and 1.1001-2.

(e) For rules relating to the capital gain or loss recognized when a partner sells or exchanges an interest in a partnership that holds appreciated collectibles or section 1250 property with section 1250 capital gain, see §1.1(h)-1. This paragraph (e) applies to transfers of interests in partnerships that occur on or after September 21, 2000.

(f) For rules relating to dividing the holding period of an interest in a partnership, see §1.1223-3. This paragraph (f) applies to transfers of partnership interests and distributions of property from a partnership that occur on or after September 21, 2000.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 7741, 45 FR 81745, Dec. 12, 1980; T.D. 8902, 65 FR 57099, Sept. 21, 2000]

### § 1.742-1 Basis of transferee partner's interest.

The basis to a transferee partner of an interest in a partnership shall be determined under the general basis rules for property provided by part II (section 1011 and following), subchapter O, chapter 1 of the Code. Thus, the basis of a purchased interest will be its cost. The basis of a partnership interest acquired from a decedent is the fair market value of the interest at the date of his death or at the alternate valuation date, increased by his estate's or other successor's share of partnership liabilities, if any, on that date, and reduced to the extent that such value is attributable to items constituting income in respect of a decedent (see section 753 and paragraph (c)(3)(v) of §1.706-1 and paragraph (b) of §1.753-1) under section 691. See section 1014(c). For basis of contributing partner's interest, see section 722. The basis so determined is

then subject to the adjustments provided in section 705.

### § 1.743-1 Optional adjustment to basis of partnership property.

(a) *Generally.* The basis of partnership property is adjusted as a result of the transfer of an interest in a partnership by sale or exchange or on the death of a partner only if the election provided by section 754 (relating to optional adjustments to the basis of partnership property) is in effect with respect to the partnership. Whether or not the election provided in section 754 is in effect, the basis of partnership property is not adjusted as the result of a contribution of property, including money, to the partnership.

(b) *Determination of adjustment.* In the case of the transfer of an interest in a partnership, either by sale or exchange or as a result of the death of a partner, a partnership that has an election under section 754 in effect—

(1) Increases the adjusted basis of partnership property by the excess of the transferee's basis for the transferred partnership interest over the transferee's share of the adjusted basis to the partnership of the partnership's property; or

(2) Decreases the adjusted basis of partnership property by the excess of the transferee's share of the adjusted basis to the partnership of the partnership's property over the transferee's basis for the transferred partnership interest.

(c) *Determination of transferee's basis in the transferred partnership interest.* In the case of the transfer of a partnership interest by sale or exchange or as a result of the death of a partner, the transferee's basis in the transferred partnership interest is determined under section 742 and §1.742-1. See also section 752 and §§1.752-1 through 1.752-5.

(d) *Determination of transferee's share of the adjusted basis to the partnership of the partnership's property—(1) Generally.* A transferee's share of the adjusted basis to the partnership of partnership property is equal to the sum of the transferee's interest as a partner in the partnership's previously taxed capital,

plus the transferee's share of partnership liabilities. Generally, a transferee's interest as a partner in the partnership's previously taxed capital is equal to—

(i) The amount of cash that the transferee would receive on a liquidation of the partnership following the hypothetical transaction, as defined in paragraph (d)(2) of this section (to the extent attributable to the acquired partnership interest); increased by

(ii) The amount of tax loss (including any remedial allocations under § 1.704-3(d)), that would be allocated to the transferee from the hypothetical transaction (to the extent attributable to the acquired partnership interest); and decreased by

(iii) The amount of tax gain (including any remedial allocations under § 1.704-3(d)), that would be allocated to the transferee from the hypothetical transaction (to the extent attributable to the acquired partnership interest).

(2) *Hypothetical transaction defined.* For purposes of paragraph (d)(1) of this section, the hypothetical transaction means the disposition by the partnership of all of the partnership's assets, immediately after the transfer of the partnership interest, in a fully taxable transaction for cash equal to the fair market value of the assets. See § 1.460-4(k)(3)(v)(B) for a rule relating to the computation of income or loss that would be allocated to the transferee from a contract accounted for under a long-term contract method of accounting as a result of the hypothetical transaction.

(3) *Examples.* The provisions of this paragraph (d) are illustrated by the following examples:

*Example 1.* (i) A is a member of partnership PRS in which the partners have equal interests in capital and profits. The partnership has made an election under section 754, relating to the optional adjustment to the basis of partnership property. A sells its interest to T for \$22,000. The balance sheet of the partnership at the date of sale shows the following:

	Assets	
	Adjusted basis	Fair market value
Cash .....	\$5,000	\$5,000
Accounts receivable .....	10,000	10,000
Inventory .....	20,000	21,000

	Assets	
	Adjusted basis	Fair market value
Depreciable assets .....	20,000	40,000
Total .....	55,000	76,000

  

	Liabilities and Capital	
	Adjusted per books	Fair market value
Liabilities .....	\$10,000	\$10,000
Capital:		
A .....	15,000	22,000
B .....	15,000	22,000
C .....	15,000	22,000
Total .....	55,000	76,000

(ii) The amount of the basis adjustment under section 743(b) is the difference between the basis of T's interest in the partnership and T's share of the adjusted basis to the partnership of the partnership's property. Under section 742, the basis of T's interest is \$25,333 (the cash paid for A's interest, \$22,000, plus \$3,333, T's share of partnership liabilities). T's interest in the partnership's previously taxed capital is \$15,000 (\$22,000, the amount of cash T would receive if PRS liquidated immediately after the hypothetical transaction, decreased by \$7,000, the amount of tax gain allocated to T from the hypothetical transaction). T's share of the adjusted basis to the partnership of the partnership's property is \$18,333 (\$15,000 share of previously taxed capital, plus \$3,333 share of the partnership's liabilities). The amount of the basis adjustment under section 743(b) to partnership property therefore, is \$7,000, the difference between \$25,333 and \$18,333.

*Example 2.* A, B, and C form partnership PRS, to which A contributes land (Asset 1) with a fair market value of \$1,000 and an adjusted basis to A of \$400, and B and C each contribute \$1,000 cash. Each partner has \$1,000 credited to it on the books of the partnership as its capital contribution. The partners share in profits equally. During the partnership's first taxable year, Asset 1 appreciates in value to \$1,300. A sells its one-third interest in the partnership to T for \$1,100, when an election under section 754 is in effect. The amount of tax gain that would be allocated to T from the hypothetical transaction is \$700 (\$600 section 704(c) built-in gain, plus one-third of the additional gain). Thus, T's interest in the partnership's previously taxed capital is \$400 (\$1,100, the amount of cash T would receive if PRS liquidated immediately after the hypothetical transaction, decreased by \$700, T's share of gain from the hypothetical transaction). The amount of T's basis adjustment under section 743(b) to partnership property is \$700

(the excess of \$1,100, T's cost basis for its interest, over \$400, T's share of the adjusted basis to the partnership of partnership property).

(e) *Allocation of basis adjustment.* For the allocation of the basis adjustment under this section among the individual items of partnership property, see section 755 and the regulations thereunder.

(f) *Subsequent transfers.* Where there has been more than one transfer of a partnership interest, a transferee's basis adjustment is determined without regard to any prior transferee's basis adjustment. In the case of a gift of an interest in a partnership, the donor is treated as transferring, and the donee as receiving, that portion of the basis adjustment attributable to the gifted partnership interest. The provisions of this paragraph (f) are illustrated by the following example:

*Example.* (i) A, B, and C form partnership PRS. A and B each contribute \$1,000 cash, and C contributes land with a basis and fair market value of \$1,000. When the land has appreciated in value to \$1,300, A sells its interest to T1 for \$1,100 (one-third of \$3,300, the fair market value of the partnership property). An election under section 754 is in effect; therefore, T1 has a basis adjustment under section 743(b) of \$100.

(ii) After the land has further appreciated in value to \$1,600, T1 sells its interest to T2 for \$1,200 (one-third of \$3,600, the fair market value of the partnership property). T2 has a basis adjustment under section 743(b) of \$200. This amount is determined without regard to any basis adjustment under section 743(b) that T1 may have had in the partnership assets.

(iii) During the following year, T2 makes a gift to T3 of fifty percent of T2's interest in PRS. At the time of the transfer, T2 has a \$200 basis adjustment under section 743(b). T2 is treated as transferring \$100 of the basis adjustment to T3 with the gift of the partnership interest.

(g) *Distributions—(1) Distribution of adjusted property to the transferee—(i) Coordination with section 732.* If a partnership distributes property to a transferee and the transferee has a basis adjustment for the property, the basis adjustment is taken into account under section 732. See § 1.732-2(b).

(ii) *Coordination with section 734.* For certain adjustments to the common basis of remaining partnership prop-

erty after the distribution of adjusted property to a transferee, see § 1.734-2(b).

(2) *Distribution of adjusted property to another partner—(i) Coordination with section 732.* If a partner receives a distribution of property with respect to which another partner has a basis adjustment, the distributee does not take the basis adjustment into account under section 732.

(ii) *Reallocation of basis.* A transferee with a basis adjustment in property that is distributed to another partner reallocates the basis adjustment among the remaining items of partnership property under § 1.755-1(c).

(3) *Distributions in complete liquidation of a partner's interest.* If a transferee receives a distribution of property (whether or not the transferee has a basis adjustment in such property) in liquidation of its interest in the partnership, the adjusted basis to the partnership of the distributed property immediately before the distribution includes the transferee's basis adjustment for the property in which the transferee relinquished an interest (either because it remained in the partnership or was distributed to another partner). Any basis adjustment for property in which the transferee is deemed to relinquish its interest is reallocated among the properties distributed to the transferee under § 1.755-1(c).

(4) *Coordination with other provisions.* The rules of sections 704(c)(1)(B), 731, 737, and 751 apply before the rules of this paragraph (g).

(5) *Example.* The provisions of this paragraph (g) are illustrated by the following example:

*Example.* (i) A, B, and C are equal partners in partnership PRS. Each partner originally contributed \$10,000 in cash, and PRS used the contributions to purchase five nondepreciable capital assets. PRS has no liabilities. After five years, PRS's balance sheet appears as follows:

	Assets	
	Adjusted basis	Fair market value
Asset 1 .....	\$10,000	\$10,000
Asset 2 .....	4,000	6,000
Asset 3 .....	6,000	6,000
Asset 4 .....	7,000	4,000
Asset 5 .....	3,000	13,000
Total .....	30,000	39,000

## Internal Revenue Service, Treasury

## § 1.743-1

	Capital	
	Adjusted per books	Fair market value
Partner A .....	\$10,000	\$13,000
Partner B .....	10,000	13,000
Partner C .....	10,000	13,000
Total .....	30,000	39,000

(ii) A sells its interest to T for \$13,000 when PRS has an election in effect under section 754. T receives a basis adjustment under section 743(b) in the partnership property that is equal to \$3,000 (the excess of T's basis in the partnership interest, \$13,000, over T's share of the adjusted basis to the partnership of partnership property, \$10,000). The basis adjustment is allocated under section 755, and the partnership's balance sheet appears as follows:

	Assets		
	Adjusted basis	Fair market value	Basis adjustment
Asset 1 .....	\$10,000	\$10,000	\$0.00
Asset 2 .....	4,000	6,000	666.67
Asset 3 .....	6,000	6,000	0.00
Asset 4 .....	7,000	4,000	(1,000.00)
Asset 5 .....	3,000	13,000	3,333.33
Total .....	30,000	39,000	3,000.00

	Capital		
	Adjusted per books	Fair market value	Special basis
Partner T .....	\$10,000	\$13,000	\$3,000
Partner B .....	10,000	13,000	0
Partner C .....	10,000	13,000	0
Total .....	30,000	39,000	3,000

(iii) Assume that PRS distributes Asset 2 to T in partial liquidation of T's interest in the partnership. T has a basis adjustment under section 743(b) of \$666.67 in Asset 2. Under paragraph (g)(1)(i) of this section, T takes the basis adjustment into account under section 732. Therefore, T will have a basis in Asset 2 of \$4,666.67 following the distribution.

(iv) Assume instead that PRS distributes Asset 5 to C in complete liquidation of C's interest in PRS. T has a basis adjustment under section 743(b) of \$3,333.33 in Asset 5. Under paragraph (g)(2)(i) of this section, C does not take T's basis adjustment into account under section 732. Therefore, the partnership's basis for purposes of sections 732 and 734 is \$3,000. Under paragraph (g)(2)(ii) of this section, T's \$3,333.33 basis adjustment is reallocated among the remaining partnership assets under § 1.755-1(c).

(v) Assume instead that PRS distributes Asset 5 to T in complete liquidation of its interest in PRS. Under paragraph (g)(3) of this section, immediately prior to the distribu-

tion of Asset 5 to T, PRS must adjust the basis of Asset 5. Therefore, immediately prior to the distribution, PRS's basis in Asset 5 is equal to \$6,000, which is the sum of (A) \$3,000, PRS's common basis in Asset 5, plus (B) \$3,333.33, T's basis adjustment to Asset 5, plus (C) (\$333.33), the sum of T's basis adjustments in Assets 2 and 4. For purposes of sections 732 and 734, therefore, PRS will be treated as having a basis in Asset 5 equal to \$6,000.

(h) *Contributions of adjusted property—*  
(1) *Section 721(a) transactions.* If, in a transaction described in section 721(a), a partnership (the upper tier) contributes to another partnership (the lower tier) property with respect to which a basis adjustment has been made, the basis adjustment is treated as contributed to the lower-tier partnership, regardless of whether the lower-tier partnership makes a section 754 election. The lower tier's basis in the contributed assets and the upper tier's basis in the partnership interest received in the transaction are determined with reference to the basis adjustment. However, that portion of the basis of the upper tier's interest in the lower tier attributable to the basis adjustment must be segregated and allocated solely to the transferee partner for whom the basis adjustment was made. Similarly, that portion of the lower tier's basis in its assets attributable to the basis adjustment must be segregated and allocated solely to the upper tier and the transferee. A partner with a basis adjustment in property held by a partnership that terminates under section 708(b)(1)(B) will continue to have the same basis adjustment with respect to property deemed contributed by the terminated partnership to the new partnership under § 1.708-1(b)(1)(iv), regardless of whether the new partnership makes a section 754 election.

(2) *Section 351 transactions—*(i) *Basis in transferred property.* A corporation's adjusted tax basis in property transferred to the corporation by a partnership in a transaction described in section 351 is determined with reference to any basis adjustments to the property under section 743(b) (other than any basis adjustment that reduces a partner's gain under paragraph (h)(2)(ii) of this section).

(ii) *Partnership gain.* The amount of gain, if any, recognized by the partnership on a transfer of property by the partnership to a corporation in a transfer described in section 351 is determined without reference to any basis adjustment to the transferred property under section 743(b). The amount of gain, if any, recognized by the partnership on the transfer that is allocated to a partner with a basis adjustment in the transferred property is adjusted to reflect the partner's basis adjustment in the transferred property.

(iii) *Basis in stock.* The partnership's adjusted tax basis in stock received from a corporation in a transfer described in section 351 is determined without reference to the basis adjustment in property transferred to the corporation in the section 351 exchange. A partner with a basis adjustment in property transferred to the corporation, however, has a basis adjustment in the stock received by the partnership in the section 351 exchange in an amount equal to the partner's basis adjustment in the transferred property, reduced by any basis adjustment that reduced the partner's gain under paragraph (h)(2)(ii) of this section.

(iv) *Example.* The following example illustrates the principles of this paragraph (h)(2):

*Example.* (i) A, B, and C are equal partners in partnership PRS. The partnership's only asset, Asset 1, has an adjusted tax basis of \$60 and a fair market value of \$120. Asset 1 is a nondepreciable capital asset and is not section 704(c) property. A has a basis in its partnership interest of \$40, and a positive section 743(b) adjustment of \$20 in Asset 1. In a transaction to which section 351 applies, PRS contributes Asset 1 to X, a corporation, in exchange for \$15 in cash and X stock with a fair market value of \$105.

(ii) Under paragraph (h)(2)(ii) of this section, PRS realizes \$60 of gain on the transfer of Asset 1 to X (\$120, its amount realized, minus \$60, its adjusted basis), but recognizes only \$15 of that gain under section 351(b)(1). Of this amount, \$5 is allocated to each partner. A must use \$5 of its basis adjustment in Asset 1 to offset A's share of PRS's gain. Under paragraph (h)(2)(iii) of this section, PRS's basis in the stock received from X is \$60. However, A has a basis adjustment in the stock received by PRS equal to \$15 (its basis adjustment in Asset 1, \$20, reduced by the portion of the adjustment which reduced A's gain, \$5). Under paragraph (h)(2)(i) of this

section, X's basis in Asset 1 equals \$90 (PRS's common basis in the asset, \$60, plus the gain recognized by PRS under section 351(b)(1), \$15, plus A's basis adjustment under section 743(b), \$20, less the portion of the adjustment which reduced A's gain, \$5).

(i) [Reserved]

(j) *Effect of basis adjustment—(1) In general.* The basis adjustment constitutes an adjustment to the basis of partnership property with respect to the transferee only. No adjustment is made to the common basis of partnership property. Thus, for purposes of calculating income, deduction, gain, and loss, the transferee will have a special basis for those partnership properties the bases of which are adjusted under section 743(b) and this section. The adjustment to the basis of partnership property under section 743(b) has no effect on the partnership's computation of any item under section 703.

(2) *Computation of partner's distributive share of partnership items.* The partnership first computes its items of income, deduction, gain, or loss at the partnership level under section 703. The partnership then allocates the partnership items among the partners, including the transferee, in accordance with section 704, and adjusts the partners' capital accounts accordingly. The partnership then adjusts the transferee's distributive share of the items of partnership income, deduction, gain, or loss, in accordance with paragraphs (j)(3) and (4) of this section, to reflect the effects of the transferee's basis adjustment under section 743(b). These adjustments to the transferee's distributive shares must be reflected on Schedules K and K-1 of the partnership's return (Form 1065). These adjustments to the transferee's distributive shares do not affect the transferee's capital account. See § 1.460-4(k)(3)(v)(B) for rules relating to the effect of a basis adjustment under section 743(b) that is allocated to a contract accounted for under a long-term contract method of accounting in determining the transferee's distributive share of income or loss from the contract.

(3) *Effect of basis adjustment in determining items of income, gain, or loss—(i) In general.* The amount of a transferee's income, gain, or loss from the sale or exchange of a partnership asset in

which the transferee has a basis adjustment is equal to the transferee's share of the partnership's gain or loss from the sale of the asset (including any remedial allocations under §1.704-3(d)), minus the amount of the transferee's positive basis adjustment for the partnership asset (determined by taking into account the recovery of the basis adjustment under paragraph (j)(4)(i)(B) of this section) or plus the amount of the transferee's negative basis adjustment for the partnership asset (determined by taking into account the recovery of the basis adjustment under paragraph (j)(4)(ii)(B) of this section).

(ii) *Examples.* The following examples illustrate the principles of this paragraph (j)(3):

*Example 1.* A and B form equal partnership PRS. A contributes nondepreciable property with a fair market value of \$50 and an adjusted tax basis of \$100. PRS will use the traditional allocation method under §1.704-3(b). B contributes \$50 cash. A sells its interest to T for \$50. PRS has an election in effect to adjust the basis of partnership property under section 754. T receives a negative \$50 basis adjustment under section 743(b) that, under section 755, is allocated to the nondepreciable property. PRS then sells the property for \$60. PRS recognizes a book gain of \$10 (allocated equally between T and B) and a tax loss of \$40. T will receive an allocation of \$40 of tax loss under the principles of section 704(c). However, because T has a negative \$50 basis adjustment in the nondepreciable property, T recognizes a \$10 gain from the partnership's sale of the property.

*Example 2.* A and B form equal partnership PRS. A contributes nondepreciable property with a fair market value of \$100 and an adjusted tax basis of \$50. B contributes \$100 cash. PRS will use the traditional allocation method under §1.704-3(b). A sells its interest to T for \$100. PRS has an election in effect to adjust the basis of partnership property under section 754. Therefore, T receives a \$50 basis adjustment under section 743(b) that, under section 755, is allocated to the nondepreciable property. PRS then sells the nondepreciable property for \$90. PRS recognizes a book loss of \$10 (allocated equally between T and B) and a tax gain of \$40. T will receive an allocation of the entire \$40 of tax gain under the principles of section 704(c). However, because T has a \$50 basis adjustment in the property, T recognizes a \$10 loss from the partnership's sale of the property.

*Example 3.* A and B form equal partnership PRS. PRS will make allocations under section 704(c) using the remedial allocation method described in §1.704-3(d). A contributes nondepreciable property with a fair

market value of \$100 and an adjusted tax basis of \$150. B contributes \$100 cash. A sells its partnership interest to T for \$100. PRS has an election in effect to adjust the basis of partnership property under section 754. T receives a negative \$50 basis adjustment under section 743(b) that, under section 755, is allocated to the property. The partnership then sells the property for \$120. The partnership recognizes a \$20 book gain and a \$30 tax loss. The book gain will be allocated equally between the partners. The entire \$30 tax loss will be allocated to T under the principles of section 704(c). To match its \$10 share of book gain, B will be allocated \$10 of remedial gain, and T will be allocated an offsetting \$10 of remedial loss. T was allocated a total of \$40 of tax loss with respect to the property. However, because T has a negative \$50 basis adjustment to the property, T recognizes a \$10 gain from the partnership's sale of the property.

(4) *Effect of basis adjustment in determining items of deduction—(i) Increases—(A) Additional deduction.* The amount of any positive basis adjustment that is recovered by the transferee in any year is added to the transferee's distributive share of the partnership's depreciation or amortization deductions for the year. The basis adjustment is adjusted under section 1016(a)(2) to reflect the recovery of the basis adjustment.

(B) *Recovery period—(1) In general.* Except as provided in paragraph (j)(4)(i)(B)(2) of this section, for purposes of section 168, if the basis of a partnership's recovery property is increased as a result of the transfer of a partnership interest, then the increased portion of the basis is taken into account as if it were newly-purchased recovery property placed in service when the transfer occurs. Consequently, any applicable recovery period and method may be used to determine the recovery allowance with respect to the increased portion of the basis. However, no change is made for purposes of determining the recovery allowance under section 168 for the portion of the basis for which there is no increase.

(2) *Remedial allocation method.* If a partnership elects to use the remedial allocation method described in §1.704-3(d) with respect to an item of the partnership's recovery property, then the portion of any increase in the basis of the item of the partnership's recovery

§ 1.743-1

property under section 743(b) that is attributable to section 704(c) built-in gain is recovered over the remaining recovery period for the partnership's excess book basis in the property as determined in the final sentence of § 1.704-3(d)(2). Any remaining portion of the basis increase is recovered under paragraph (j)(4)(i)(B)(I) of this section.

(C) *Examples.* The provisions of this paragraph (j)(4)(i) are illustrated by the following examples:

*Example 1.* (i) A, B, and C are equal partners in partnership PRS, which owns Asset 1, an item of depreciable property that has a fair market value in excess of its adjusted tax basis. C sells its interest in PRS to T while PRS has an election in effect under section 754. PRS, therefore, increases the basis of Asset 1 with respect to T.

(ii) Assume that in the year following the transfer of the partnership interest to T, T's distributive share of the partnership's common basis depreciation deductions from Asset 1 is \$1,000. Also assume that, under paragraph (j)(4)(i)(B) of this section, the amount of the basis adjustment under section 743(b) that T recovers during the year is \$500. The total amount of depreciation deductions from Asset 1 reported by T is equal to \$1,500.

*Example 2.* (i) A and B form equal partnership PRS. A contributes property with an adjusted basis of \$100,000 and a fair market value of \$500,000. B contributes \$500,000 cash. When PRS is formed, the property has five years remaining in its recovery period. The partnership's adjusted basis of \$100,000 will, therefore, be recovered over the five years remaining in the property's recovery period. PRS elects to use the remedial allocation method under § 1.704-3(d) with respect to the property. If PRS had purchased the property at the time of the partnership's formation, the basis of the property would have been recovered over a 10-year period. The \$400,000 of section 704(c) built-in gain will, therefore, be amortized under § 1.704-3(d) over a 10-year period beginning at the time of the partnership's formation.

(ii)(A) Except for the depreciation deductions, PRS's expenses equal its income in each year of the first two years commencing with the year the partnership is formed. After two years, A's share of the adjusted basis of partnership property is \$120,000, while B's is \$440,000:

	Capital accounts			
	A		B	
	Book	Tax	Book	Tax
Initial Contribution ..	\$500,000	\$100,000	\$500,000	\$500,000

26 CFR Ch. I (4-1-14 Edition)

	Capital accounts			
	A		B	
	Book	Tax	Book	Tax
Depreciation Year 1 ....	(30,000)	.....	(30,000)	(20,000)
Remedial ....	.....	10,000	.....	(10,000)
	470,000	110,000	470,000	470,000
Depreciation Year 2 ....	(30,000)	.....	(30,000)	(20,000)
Remedial ....	.....	10,000	.....	(10,000)
	440,000	120,000	440,000	440,000

(B) A sells its interest in PRS to T for its fair market value of \$440,000. A valid election under section 754 is in effect with respect to the sale of the partnership interest. Accordingly, PRS makes an adjustment, pursuant to section 743(b), to increase the basis of partnership property. Under section 743(b), the amount of the basis adjustment is equal to \$320,000. Under section 755, the entire basis adjustment is allocated to the property.

(iii) At the time of the transfer, \$320,000 of section 704(c) built-in gain from the property was still reflected on the partnership's books, and all of the basis adjustment is attributable to section 704(c) built-in gain. Therefore, the basis adjustment will be recovered over the remaining recovery period for the section 704(c) built-in gain under § 1.704-3(d).

(ii) *Decreases—(A) Reduced deduction.* The amount of any negative basis adjustment allocated to an item of depreciable or amortizable property that is recovered in any year first decreases the transferee's distributive share of the partnership's depreciation or amortization deductions from that item of property for the year. If the amount of the basis adjustment recovered in any year exceeds the transferee's distributive share of the partnership's depreciation or amortization deductions from other items of partnership property is decreased. The transferee then recognizes ordinary income to the extent of the excess, if any, of the amount of the basis adjustment recovered in any year over the transferee's distributive share of the partnership's depreciation or amortization deductions from all items of property.

(B) *Recovery period.* For purposes of section 168, if the basis of an item of a

partnership's recovery property is decreased as the result of the transfer of an interest in the partnership, then the decrease is recovered over the remaining useful life of the item of the partnership's recovery property. The portion of the decrease that is recovered in any year during the recovery period is equal to the product of—

(1) The amount of the decrease to the item's adjusted basis (determined as of the date of the transfer); multiplied by

(2) A fraction, the numerator of which is the portion of the adjusted basis of the item recovered by the partnership in that year, and the denominator of which is the adjusted basis of the item on the date of the transfer (determined prior to any basis adjustments).

(C) *Examples.* The provisions of this paragraph (j)(4)(ii) are illustrated by the following examples:

*Example 1.* (i) A, B, and C are equal partners in partnership PRS, which owns Asset 2, an item of depreciable property that has a fair market value that is less than its adjusted tax basis. C sells its interest in PRS to T while PRS has an election in effect under section 754. PRS, therefore, decreases the basis of Asset 2 with respect to T.

(ii) Assume that in the year following the transfer of the partnership interest to T, T's distributive share of the partnership's common basis depreciation deductions from Asset 2 is \$1,000. Also assume that, under paragraph (j)(4)(ii)(B) of this section, the amount of the basis adjustment under section 743(b) that T recovers during the year is \$500. The total amount of depreciation deductions from Asset 2 reported by T is equal to \$500.

*Example 2.* (i) A and B form equal partnership PRS. A contributes property with an adjusted basis of \$100,000 and a fair market value of \$50,000. B contributes \$50,000 cash. When PRS is formed, the property has five years remaining in its recovery period. The partnership's adjusted basis of \$100,000 will, therefore, be recovered over the five years remaining in the property's recovery period. PRS uses the traditional allocation method under § 1.704-3(b) with respect to the property. As a result, B will receive \$5,000 of depreciation deductions from the property in each of years 1-5, and A, as the contributing partner, will receive \$15,000 of depreciation deductions in each of these years.

(ii) Except for the depreciation deductions, PRS's expenses equal its income in each of the first two years commencing with the year the partnership is formed. After two years, A's share of the adjusted basis of part-

nership property is \$70,000, while B's is \$40,000. A sells its interest in PRS to T for its fair market value of \$40,000. A valid election under section 754 is in effect with respect to the sale of the partnership interest. Accordingly, PRS makes an adjustment, pursuant to section 743(b), to decrease the basis of partnership property. Under section 743(b), the amount of the adjustment is equal to (\$30,000). Under section 755, the entire adjustment is allocated to the property.

(iii) The basis of the property at the time of the transfer of the partnership interest was \$60,000. In each of years 3 through 5, the partnership will realize depreciation deductions of \$20,000 from the property. Thus, one third of the negative basis adjustment (\$10,000) will be recovered in each of years 3 through 5. Consequently, T will be allocated, for tax purposes, depreciation of \$15,000 each year from the partnership and will recover \$10,000 of its negative basis adjustment. Thus, T's net depreciation deduction from the partnership in each year is \$5,000.

*Example 3.* (i) A, B, and C are equal partners in partnership PRS, which owns Asset 2, an item of depreciable property that has a fair market value that is less than its adjusted tax basis. C sells its interest in PRS to T while PRS has an election in effect under section 754. PRS, therefore, decreases the basis of Asset 2 with respect to T.

(ii) Assume that in the year following the transfer of the partnership interest to T, T's distributive share of the partnership's common basis depreciation deductions from Asset 2 is \$500. PRS allocates no other depreciation to T. Also assume that, under paragraph (j)(4)(ii)(B) of this section, the amount of the negative basis adjustment that T recovers during the year is \$1,000. T will report \$500 of ordinary income because the amount of the negative basis adjustment recovered during the year exceeds T's distributive share of the partnership's common basis depreciation deductions from Asset 2.

(5) *Depletion.* Where an adjustment is made under section 743(b) to the basis of partnership property subject to depletion, any depletion allowance is determined separately for each partner, including the transferee partner, based on the partner's interest in such property. See § 1.702-1(a)(8). For partnerships that hold oil and gas properties that are depleted at the partner level under section 613A(c)(7)(D), the transferee partner (and not the partnership) must make the basis adjustments, if any, required under section 743(b) with respect to such properties. See § 1.613A-3(e)(6)(iv).

(6) *Example.* The provisions of paragraph (j)(5) of this section are illustrated by the following example:

*Example.* A, B, and C each contributes \$5,000 cash to form partnership PRS, which purchases a coal property for \$15,000. A, B, and C have equal interests in capital and profits. C subsequently sells its partnership interest to T for \$100,000 when the election under section 754 is in effect. T has a basis adjustment under section 743(b) for the coal property of \$95,000 (the difference between T's basis, \$100,000, and its share of the basis of partnership property, \$5,000). Assume that the depletion allowance computed under the percentage method would be \$21,000 for the taxable year so that each partner would be entitled to \$7,000 as its share of the deduction for depletion. However, under the cost depletion method, at an assumed rate of 10 percent, the allowance with respect to T's one-third interest which has a basis to him of \$100,000 (\$5,000, plus its basis adjustment of \$95,000) is \$10,000, although the cost depletion allowance with respect to the one-third interest of A and B in the coal property, each of which has a basis of \$5,000, is only \$500. For partners A and B, the percentage depletion is greater than cost depletion and each will deduct \$7,000 based on the percentage depletion method. However, as to T, the transferee partner, the cost depletion method results in a greater allowance and T will, therefore, deduct \$10,000 based on cost depletion. See section 613(a).

(k) *Returns*—(1) *Statement of adjustments*—(i) *In general.* A partnership that must adjust the bases of partnership properties under section 743(b) must attach a statement to the partnership return for the year of the transfer setting forth the name and taxpayer identification number of the transferee as well as the computation of the adjustment and the partnership properties to which the adjustment has been allocated.

(ii) *Special rule.* Where an interest is transferred in a partnership which holds oil and gas properties that are depleted at the partner level under section 613A(c)(7)(D), the transferee must attach a statement to the transferee's return for the year of the transfer, setting forth the computation of the basis adjustment under section 743(b) which is allocable to such properties and the specific properties to which the adjustment has been allocated.

(iii) *Example.* The provisions of paragraph (k)(1)(ii) of this section are illustrated by the following example:

*Example.* (i) Partnership XYZ owns a single section 613A(c)(7)(D) domestic oil and gas property (Property) and other non-depletable assets. A, a partner in XYZ with an adjusted tax basis in Property of \$100 (excluding any prior adjustments under section 743(b)), sells its partnership interest to B for \$800 cash. Under § 1.613A-3(e)(6)(iv), A's adjusted basis of \$100 in Property carries over to B.

(ii) Under section 755, XYZ determines that Property accounts for 50% of the fair market value of all partnership assets. The remaining 50% of B's purchase price (\$400) is attributable to non-depletable property. XYZ must provide a statement to B containing the portion of B's adjusted basis attributable to non-depletable property (\$400). Under this paragraph (k)(1), XYZ must report basis adjustments under section 743(b) to non-depletable property. B must report basis adjustments under section 743(b) to Property.

(2) *Requirement that transferee notify partnership*—(i) *Sale or exchange.* A transferee that acquires, by sale or exchange, an interest in a partnership with an election under section 754 in effect for the taxable year of the transfer, must notify the partnership, in writing, within 30 days of the sale or exchange. The written notice to the partnership must be signed under penalties of perjury and must include the names and addresses of the transferee and (if ascertainable) of the transferor, the taxpayer identification numbers of the transferee and (if ascertainable) of the transferor, the relationship (if any) between the transferee and the transferor, the date of the transfer, the amount of any liabilities assumed or taken subject to by the transferee, and the amount of any money, the fair market value of any other property delivered or to be delivered for the transferred interest in the partnership, and any other information necessary for the partnership to compute the transferee's basis.

(ii) *Transfer on death.* A transferee that acquires, on the death of a partner, an interest in a partnership with an election under section 754 in effect for the taxable year of the transfer, must notify the partnership, in writing, within one year of the death of the deceased partner. The written notice to the partnership must be signed under penalties of perjury and must include the names and addresses of the deceased partner and the transferee, the taxpayer identification numbers of the

deceased partner and the transferee, the relationship (if any) between the transferee and the transferor, the deceased partner's date of death, the date on which the transferee became the owner of the partnership interest, the fair market value of the partnership interest on the applicable date of valuation set forth in section 1014, and the manner in which the fair market value of the partnership interest was determined.

(iii) *Nominee reporting.* If a partnership interest is transferred to a nominee which is required to furnish the statement under section 6031(c)(1) to the partnership, the nominee may satisfy the notice requirement contained in this paragraph (k)(2) by providing the statement required under § 1.6031(c)-1T, provided that the statement satisfies all requirements of § 1.6031(c)-1T and this paragraph (k)(2).

(3) *Reliance.* In making the adjustments under section 743(b) and any statement or return relating to such adjustments under this section, a partnership may rely on the written notice provided by a transferee pursuant to paragraph (k)(2) of this section to determine the transferee's basis in a partnership interest. The previous sentence shall not apply if any partner who has responsibility for federal income tax reporting by the partnership has knowledge of facts indicating that the statement is clearly erroneous.

(4) *Partnership not required to make or report adjustments under section 743(b) until it has notice of the transfer.* A partnership is not required to make the adjustments under section 743(b) (or any statement or return relating to those adjustments) with respect to any transfer until it has been notified of the transfer. For purposes of this section, a partnership is notified of a transfer when either—

(i) The partnership receives the written notice from the transferee required under paragraph (k)(2) of this section; or

(ii) Any partner who has responsibility for federal income tax reporting by the partnership has knowledge that there has been a transfer of a partnership interest.

(5) *Effect on partnership of the failure of the transferee to comply.* If the trans-

feree fails to provide the partnership with the written notice required by paragraph (k)(2) of this section, the partnership must attach a statement to its return in the year that the partnership is otherwise notified of the transfer. This statement must set forth the name and taxpayer identification number (if ascertainable) of the transferee. In addition, the following statement must be prominently displayed in capital letters on the first page of the partnership's return for such year, and on the first page of any schedule or information statement relating to such transferee's share of income, credits, deductions, etc.: "RETURN FILED PURSUANT TO § 1.743-1(k)(5)." The partnership will then be entitled to report the transferee's share of partnership items without adjustment to reflect the transferee's basis adjustment in partnership property. If, following the filing of a return pursuant to this paragraph (k)(5), the transferee provides the applicable written notice to the partnership, the partnership must make such adjustments as are necessary to adjust the basis of partnership property (as of the date of the transfer) in any amended return otherwise to be filed by the partnership or in the next annual partnership return of income to be regularly filed by the partnership. At such time, the partnership must also provide the transferee with such information as is necessary for the transferee to amend its prior returns to properly reflect the adjustment under section 743(b).

(1) *Effective date.* This section applies to transfers of partnership interests that occur on or after December 15, 1999.

[T.D. 8847, 64 FR 69909, Dec. 15, 1999; 65 FR 9220, Feb. 24, 2000, as amended by T.D. 9137, 69 FR 42559, July 16, 2004]

PROVISIONS COMMON TO PART II,  
SUBCHAPTER K, CHAPTER 1 OF THE CODE

**§ 1.751-1 Unrealized receivables and inventory items.**

(a) *Sale or exchange of interest in a partnership—(1) Character of amount realized.* To the extent that money or property received by a partner in exchange for all or part of his partnership interest is attributable to his share of

the value of partnership unrealized receivables or substantially appreciated inventory items, the money or fair market value of the property received shall be considered as an amount realized from the sale or exchange of property other than a capital asset. The remainder of the total amount realized on the sale or exchange of the partnership interest is realized from the sale or exchange of a capital asset under section 741. For definition of “unrealized receivables” and “inventory items which have appreciated substantially in value”, see section 751 (c) and (d). Unrealized receivables and substantially appreciated inventory items are hereafter in this section referred to as “section 751 property”. See paragraph (e) of this section.

(2) *Determination of gain or loss.* The income or loss realized by a partner upon the sale or exchange of its interest in section 751 property is the amount of income or loss from section 751 property (including any remedial allocations under § 1.704-3(d)) that would have been allocated to the partner (to the extent attributable to the partnership interest sold or exchanged) if the partnership had sold all of its property in a fully taxable transaction for cash in an amount equal to the fair market value of such property (taking into account section 7701(g)) immediately prior to the partner's transfer of the interest in the partnership. Any gain or loss recognized that is attributable to section 751 property will be ordinary gain or loss. The difference between the amount of capital gain or loss that the partner would realize in the absence of section 751 and the amount of ordinary income or loss determined under this paragraph (a)(2) is the transferor's capital gain or loss on the sale of its partnership interest. See § 1.460-4(k)(2)(iv)(E) for rules relating to the amount of ordinary income or loss attributable to a contract accounted for under a long-term contract method of accounting.

(3) *Statement required.* A partner selling or exchanging any part of an interest in a partnership that has any section 751 property at the time of sale or exchange must submit with its income tax return for the taxable year in which the sale or exchange occurs a

statement setting forth separately the following information—

(i) The date of the sale or exchange;

(ii) The amount of any gain or loss attributable to the section 751 property; and

(iii) The amount of any gain or loss attributable to capital gain or loss on the sale of the partnership interest.

(b) *Certain distributions treated as sales or exchanges*—(1) *In general.* (i) Certain distributions to which section 751(b) applies are treated in part as sales or exchanges of property between the partnership and the distributee partner, and not as distributions to which sections 731 through 736 apply. A distribution treated as a sale or exchange under section 751(b) is not subject to the provisions of section 707(b). Section 751(b) applies whether or not the distribution is in liquidation of the distributee partner's entire interest in the partnership. However, section 751(b) applies only to the extent that a partner either receives section 751 property in exchange for his relinquishing any part of his interest in other property, or receives other property in exchange for his relinquishing any part of his interest in section 751 property.

(ii) Section 751(b) does not apply to a distribution to a partner which is not in exchange for his interest in other partnership property. Thus, section 751(b) does not apply to the extent that a distribution consists of the distributee partner's share of section 751 property or his share of other property. Similarly, section 751(b) does not apply to current drawings or to advances against the partner's distributive share, or to a distribution which is, in fact, a gift or payment for services or for the use of capital. In determining whether a partner has received only his share of either section 751 property or of other property, his interest in such property remaining in the partnership immediately after a distribution must be taken into account. For example, the section 751 property in partnership ABC has a fair market value of \$100,000 in which partner A has an interest of 30 percent, or \$30,000. If A receives \$20,000 of section 751 property in a distribution, and continues to have a 30-percent interest in the \$80,000 of section

751 property remaining in the partnership after the distribution, only \$6,000 (\$30,000 minus \$24,000 (30 percent of \$80,000)) of the section 751 property received by him will be considered to be his share of such property. The remaining \$14,000 (\$20,000 minus \$6,000) received is in excess of his share.

(iii) If a distribution is, in part, a distribution of the distributee partner's share of section 751 property, or of other property (including money) and, in part, a distribution in exchange of such properties, the distribution shall be divided for the purpose of applying section 751(b). The rules of section 751(b) shall first apply to the part of the distribution treated as a sale or exchange of such properties, and then the rules of sections 731 through 736 shall apply to the part of the distribution not treated as a sale or exchange. See paragraph (b)(4)(ii) of this section for treatment of payments under section 736(a).

(2) *Distribution of section 751 property (unrealized receivables or substantially appreciated inventory items).* (i) To the extent that a partner receives section 751 property in a distribution in exchange for any part of his interest in partnership property (including money) other than section 751 property, the transaction shall be treated as a sale or exchange of such properties between the distributee partner and the partnership (as constituted after the distribution).

(ii) At the time of the distribution, the partnership (as constituted after the distribution) realizes ordinary income or loss on the sale or exchange of the section 751 property. The amount of the income or loss to the partnership will be measured by the difference between the adjusted basis to the partnership of the section 751 property considered as sold to or exchanged with the partner, and the fair market value of the distributee partner's interest in other partnership property which he relinquished in the exchange. In computing the partners' distributive shares of such ordinary income or loss, the income or loss shall be allocated only to partners other than the distributee and separately taken into account under section 702(a)(8).

(iii) At the time of the distribution, the distributee partner realizes gain or loss measured by the difference between his adjusted basis for the property relinquished in the exchange (including any special basis adjustment which he may have) and the fair market value of the section 751 property received by him in exchange for his interest in other property which he has relinquished. The distributee's adjusted basis for the property relinquished is the basis such property would have had under section 732 (including subsection (d) thereof) if the distributee partner had received such property in a current distribution immediately before the actual distribution which is treated wholly or partly as a sale or exchange under section 751(b). The character of the gain or loss to the distributee partner shall be determined by the character of the property in which he relinquished his interest.

(3) *Distribution of partnership property other than section 751 property.* (i) To the extent that a partner receives a distribution of partnership property (including money) other than section 751 property in exchange for any part of his interest in section 751 property of the partnership, the distribution shall be treated as a sale or exchange of such properties between the distributee partner and the partnership (as constituted after the distribution).

(ii) At the time of the distribution, the partnership (as constituted after the distribution) realizes gain or loss on the sale or exchange of the property other than section 751 property. The amount of the gain to the partnership will be measured by the difference between the adjusted basis to the partnership of the distributed property considered as sold to or exchanged with the partner, and the fair market value of the distributee partner's interest in section 751 property which he relinquished in the exchange. The character of the gain or loss to the partnership is determined by the character of the distributed property treated as sold or exchanged by the partnership. In computing the partners' distributive shares of such gain or loss, the gain or loss shall be allocated only to partners

other than the distributee and separately taken into account under section 702(a)(8).

(iii) At the time of the distribution, the distributee partner realizes ordinary income or loss on the sale or exchange of the section 751 property. The amount of the distributee partner's income or loss shall be measured by the difference between his adjusted basis for the section 751 property relinquished in the exchange (including any special basis adjustment which he may have), and the fair market value of other property (including money) received by him in exchange for his interest in the section 751 property which he has relinquished. The distributee partner's adjusted basis for the section 751 property relinquished is the basis such property would have had under section 732 (including subsection (d) thereof) if the distributee partner had received such property in a current distribution immediately before the actual distribution which is treated wholly or partly as a sale or exchange under section 751(b).

(4) *Exceptions.* (i) Section 751(b) does not apply to the distribution to a partner of property which the distributee partner contributed to the partnership. The distribution of such property is governed by the rules set forth in sections 731 through 736, relating to distributions by a partnership.

(ii) Section 751(b) does not apply to payments made to a retiring partner or to a deceased partner's successor in interest to the extent that, under section 736(a), such payments constitute a distributive share of partnership income or guaranteed payments. Payments to a retiring partner or to a deceased partner's successor in interest for his interest in unrealized receivables of the partnership in excess of their partnership basis, including any special basis adjustment for them to which such partner is entitled, constitute payments under section 736(a) and, therefore, are not subject to section 751(b). However, payments under section 736(b) which are considered as made in exchange for an interest in partnership property are subject to section 751(b) to the extent that they involve an exchange of substantially appreciated inventory items for other

property. Thus, payments to a retiring partner or to a deceased partner's successor in interest under section 736 must first be divided between payments under section 736(a) and section 736(b). The section 736(b) payments must then be divided, if there is an exchange of substantially appreciated inventory items for other property, between the payments treated as a sale or exchange under section 751(b) and payments treated as a distribution under sections 731 through 736. See subparagraph (1)(iii) of this paragraph, and section 736 and § 1.736-1.

(5) *Statement required.* A partnership which distributes section 751 property to a partner in exchange for his interest in other partnership property, or which distributes other property in exchange for any part of the partner's interest in section 751 property, shall submit with its return for the year of the distribution a statement showing the computation of any income, gain, or loss to the partnership under the provisions of section 751(b) and this paragraph. The distributee partner shall submit with his return a statement showing the computation of any income, gain, or loss to him. Such statement shall contain information similar to that required under paragraph (a)(3) of this section.

(c) *Unrealized receivables.* (1) The term *unrealized receivables*, as used in subchapter K, chapter 1 of the Code, means any rights (contractual or otherwise) to payment for:

(i) Goods delivered or to be delivered (to the extent that such payment would be treated as received for property other than a capital asset), or

(ii) Services rendered or to be rendered,

to the extent that income arising from such rights to payment was not previously includible in income under the method of accounting employed by the partnership. Such rights must have arisen under contracts or agreements in existence at the time of sale or distribution, although the partnership may not be able to enforce payment until a later time. For example, the term includes trade accounts receivable of a cash method taxpayer, and rights to payment for work or goods

begun but incomplete at the time of the sale or distribution.

(2) The basis for such unrealized receivables shall include all costs or expenses attributable thereto paid or accrued but not previously taken into account under the partnership method of accounting.

(3) In determining the amount of the sale price attributable to such unrealized receivables, or their value in a distribution treated as a sale or exchange, full account shall be taken not only of the estimated cost of completing performance of the contract or agreement, but also of the time between the sale or distribution and the time of payment.

(4)(i) With respect to any taxable year of a partnership ending after September 12, 1966 (but only in respect of expenditures paid or incurred after that date), the term *unrealized receivables*, for purposes of this section and sections 731, 736, 741, and 751, also includes potential gain from mining property defined in section 617(f)(2). With respect to each item of partnership mining property so defined, the potential gain is the amount that would be treated as gain to which section 617(d)(1) would apply if (at the time of the transaction described in section 731, 736, 741, or 751, as the case may be) the item were sold by the partnership at its fair market value.

(ii) With respect to sales, exchanges, or other dispositions after December 31, 1975, in any taxable year of a partnership ending after that date, the term *unrealized receivables*, for purposes of this section and sections 731, 736, 741, and 751, also includes potential gain from stock in a DISC as described in section 992(a). With respect to stock in such a DISC, the potential gain is the amount that would be treated as gain to which section 995(c) would apply if (at the time of the transaction described in section 731, 736, 741, or 751, as the case may be) the stock were sold by the partnership at its fair market value.

(iii) With respect to any taxable year of a partnership beginning after December 31, 1962, the term *unrealized receivables*, for purposes of this section and sections 731, 736, 741, and 751, also includes potential gain from section 1245 property. With respect to each

item of partnership section 1245 property (as defined in section 1245(a)(3)), potential gain from section 1245 property is the amount that would be treated as gain to which section 1245(a)(1) would apply if (at the time of the transaction described in section 731, 736, 741, or 751, as the case may be) the item of section 1245 property were sold by the partnership at its fair market value. See § 1.1245-1(e)(1). For example, if a partnership would recognize under section 1245(a)(1) gain of \$600 upon a sale of one item of section 1245 property and gain of \$300 upon a sale of its only other item of such property, the potential section 1245 income of the partnership would be \$900.

(iv) With respect to transfers after October 9, 1975, and to sales, exchanges, and distributions taking place after that date, the term *unrealized receivables*, for purposes of this section and sections 731, 736, 741, and 751, also includes potential gain from stock in certain foreign corporations as described in section 1248. With respect to stock in such a foreign corporation, the potential gain is the amount that would be treated as gain to which section 1248(a) would apply if (at the time of the transaction described in section 731, 736, 741, or 751, as the case may be) the stock were sold by the partnership at its fair market value.

(v) With respect to any taxable year of a partnership ending after December 31, 1963, the term *unrealized receivables*, for purposes of this section and sections 731, 736, 741, and 751, also includes potential gain from section 1250 property. With respect to each item of partnership section 1250 property (as defined in section 1250(c)), potential gain from section 1250 property is the amount that would be treated as gain to which section 1250(a) would apply if (at the time of the transaction described in section 731, 736, 741, or 751, as the case may be) the item of section 1250 property were sold by the partnership at its fair market value. See § 1.1250-1(f)(1).

(vi) With respect to any taxable year of a partnership beginning after December 31, 1969, the term *unrealized receivables*, for purposes of this section and sections 731, 736, 741, and 751, also

includes potential gain from farm recapture property as defined in section 1251(e)(1) (as in effect before enactment of the Tax Reform Act of 1984). With respect to each item of partnership farm recapture property so defined, the potential gain is the amount which would be treated as gain to which section 1251(c) (as in effect before enactment of the Tax Reform Act of 1984) would apply if (at the time of the transaction described in section 731, 736, 741, or 751, as the case may be) the item were sold by the partnership at its fair market value.

(vii) With respect to any taxable year of a partnership beginning after December 31, 1969, the term *unrealized receivables*, for purposes of this section and sections 731, 736, 741, and 751, also includes potential gain from farm land as defined in section 1252(a)(2). With respect to each item of partnership farm land so defined, the potential gain is the amount that would be treated as gain to which section 1252(a)(1) would apply if (at the time of the transaction described in section 731, 736, 741, or 751, as the case may be) the item were sold by the partnership at its fair market value.

(viii) With respect to transactions which occur after December 31, 1976, in any taxable year of a partnership ending after that date, the term *unrealized receivables*, for purposes of this section and sections 731, 736, 741, and 751, also includes potential gain from franchises, trademarks, or trade names referred to in section 1253(a). With respect to each such item so referred to in section 1253(a), the potential gain is the amount that would be treated as gain to which section 1253(a) would apply if (at the time of the transaction described in section 731, 736, 741, or 751, as the case may be) the items were sold by the partnership at its fair market value.

(ix) With respect to any taxable year of a partnership ending after December 31, 1975, the term *unrealized receivables*, for purposes of this section and sections 731, 736, 741, and 751, also includes potential gain under section 1254(a) from natural resource recapture property as defined in § 1.1254-1(b)(2). With respect to each separate partnership natural resource recapture property so

described, the potential gain is the amount that would be treated as gain to which section 1254(a) would apply if (at the time of the transaction described in section 731, 736, 741, or 751, as the case may be) the property were sold by the partnership at its fair market value.

(5) For purposes of subtitle A of the Internal Revenue Code, the basis of any potential gain described in paragraph (c)(4) of this section is zero.

(6)(i) If (at the time of any transaction referred to in paragraph (c)(4) of this section) a partnership holds property described in paragraph (c)(4) of this section and if—

(A) A partner had a special basis adjustment under section 743(b) in respect of the property;

(B) The basis under section 732 of the property if distributed to the partner would reflect a special basis adjustment under section 732(d); or

(C) On the date a partner acquired a partnership interest by way of a sale or exchange (or upon the death of another partner) the partnership owned the property and an election under section 754 was in effect with respect to the partnership, the partner's share of any potential gain described in paragraph (c)(4) of this section is determined under paragraph (c)(6)(ii) of this section.

(ii) The partner's share of the potential gain described in paragraph (c)(4) of this section in respect of the property to which this paragraph (c)(6)(ii) applies is that amount of gain that the partner would recognize under section 617(d)(1), 995(c), 1245(a), 1248(a), 1250(a), 1251(c) (as in effect before the Tax Reform Act of 1984), 1252(a), 1253(a), or 1254(a) (as the case may be) upon a sale of the property by the partnership, except that, for purposes of this paragraph (c)(6) the partner's share of such gain is determined in a manner that is consistent with the manner in which the partner's share of partnership property is determined; and the amount of a potential special basis adjustment under section 732(d) is treated as if it were the amount of a special basis adjustment under section 743(b). For example, in determining, for purposes of this paragraph (c)(6), the amount of gain that a partner would recognize

under section 1245 upon a sale of partnership property, the items allocated under § 1.1245-1(e)(3)(ii) are allocated to the partner in the same manner as the partner's share of partnership property is determined. See § 1.1250-1(f) for rules similar to those contained in § 1.1245-1(e)(3)(ii).

(d) *Inventory items which have substantially appreciated in value*—(1) *Substantial appreciation*. Partnership inventory items shall be considered to have appreciated substantially in value if, at the time of the sale or distribution, the total fair market value of all the inventory items of the partnership exceeds 120 percent of the aggregate adjusted basis for such property in the hands of the partnership (without regard to any special basis adjustment of any partner) and, in addition, exceeds 10 percent of the fair market value of all partnership property other than money. The terms “inventory items which have appreciated substantially in value” or “substantially appreciated inventory items” refer to the aggregate of all partnership inventory items. These terms do not refer to specific partnership inventory items or to specific groups of such items. For example, any distribution of inventory items by a partnership the inventory items of which as a whole are substantially appreciated in value shall be a distribution of substantially appreciated inventory items for the purposes of section 751(b), even though the specific inventory items distributed may not be appreciated in value. Similarly, if the aggregate of partnership inventory items are not substantially appreciated in value, a distribution of specific inventory items, the value of which is more than 120 percent of their adjusted basis, will not constitute a distribution of substantially appreciated inventory items. For the purpose of this paragraph, the “fair market value” of inventory items has the same meaning as “market” value in the regulations under section 471, relating to general rule for inventories.

(2) *Inventory items*. The term *inventory items* as used in subchapter K, chapter 1 of the Code, includes the following types of property:

(i) Stock in trade of the partnership, or other property of a kind which

would properly be included in the inventory of the partnership if on hand at the close of the taxable year, or property held by the partnership primarily for sale to customers in the ordinary course of its trade or business. See section 1221(1).

(ii) Any other property of the partnership which, on sale or exchange by the partnership, would be considered property other than a capital asset and other than property described in section 1231. Thus, accounts receivable acquired in the ordinary course of business for services or from the sale of stock in trade constitute inventory items (see section 1221(4)), as do any unrealized receivables.

(iii) Any other property retained by the partnership which, if held by the partner selling his partnership interest or receiving a distribution described in section 751(b), would be considered property described in subdivision (i) or (ii) of this subparagraph. Property actually distributed to the partner does not come within the provisions of section 751(d)(2)(C) and this subdivision.

(e) *Section 751 property and other property*. For the purposes of this section, *section 751 property* means unrealized receivables or substantially appreciated inventory items, and *other property* means all property (including money) except section 751 property.

(f) *Effective date*. Section 751 applies to gain or loss to a seller, distributee, or partnership in the case of a sale, exchange, or distribution occurring after March 9, 1954. For the purpose of applying this paragraph in the case of a taxable year beginning before January 1, 1955, a partnership or a partner may elect to treat as applicable any other section of subchapter K, chapter 1 of the Code. Any such election shall be made by a statement submitted not later than the time prescribed by law for the filing of the return for such taxable year, or August 21, 1956, whichever date is later (but not later than 6 months after the time prescribed by law for the filing of the return for such year). See section 771(b)(3) and paragraph (b)(3) of § 1.771-1. See also section 771(c) and paragraph (c) of § 1.771-1. The rules contained in paragraphs (a)(2) and (a)(3) of this section apply to transfers

## § 1.751-1

of partnership interests that occur on or after December 15, 1999.

(g) *Examples.* Application of the provisions of section 751 may be illustrated by the following examples:

*Example 1.* (i)(A) A and B are equal partners in personal service partnership PRS. B transfers its interest in PRS to T for \$15,000 when PRS's balance sheet (reflecting a cash receipts and disbursements method of accounting) is as follows:

	Assets	
	Adjusted basis	Fair market value
Cash .....	\$3,000	\$3,000
Loans Receivable .....	10,000	10,000
Capital Assets .....	7,000	5,000
Unrealized Receivables .....	0	14,000
<b>Total .....</b>	<b>20,000</b>	<b>32,000</b>

  

	Liabilities and Capital	
	Adjusted per books	Fair market value
Liabilities .....	\$2,000	\$2,000
Capital:		
A .....	9,000	15,000
B .....	9,000	15,000
<b>Total .....</b>	<b>20,000</b>	<b>32,000</b>

(B) None of the assets owned by PRS is section 704(c) property, and the capital assets are nondepreciable. The total amount realized by B is \$16,000, consisting of the cash received, \$15,000, plus \$1,000, B's share of the partnership liabilities assumed by T. See section 752. B's undivided half-interest in the partnership property includes a half-interest in the partnership's unrealized receivables items. B's basis for its partnership interest is \$10,000 (\$9,000, plus \$1,000, B's share of partnership liabilities). If section 751(a) did not apply to the sale, B would recognize \$6,000 of capital gain from the sale of the interest in PRS. However, section 751(a) does apply to the sale.

(ii) If PRS sold all of its section 751 property in a fully taxable transaction immediately prior to the transfer of B's partnership interest to T, B would have been allocated \$7,000 of ordinary income from the sale of PRS's unrealized receivables. Therefore, B will recognize \$7,000 of ordinary income with respect to the unrealized receivables. The difference between the amount of capital gain or loss that the partner would realize in the absence of section 751 (\$6,000) and the amount of ordinary income or loss determined under paragraph (a)(2) of this section (\$7,000) is the transferor's capital gain or loss on the sale of its partnership interest. In this case, B will recognize a \$1,000 capital loss.

## 26 CFR Ch. I (4-1-14 Edition)

*Example 2.* (a) *Facts.* Partnership ABC makes a distribution to partner C in liquidation of his entire one-third interest in the partnership. At the time of the distribution, the balance sheet of the partnership, which uses the accrual method of accounting, is as follows:

ASSETS		
	Adjusted basis per books	Market value
Cash .....	\$15,000	\$15,000
Accounts receivable .....	9,000	9,000
Inventory .....	21,000	30,000
Depreciable property .....	42,000	48,000
Land .....	9,000	9,000
<b>Total .....</b>	<b>96,000</b>	<b>11,000</b>

  

LIABILITIES AND CAPITAL		
	Per books	Value
Current liabilities .....	\$15,000	\$15,000
Mortgage payable .....	21,000	21,000
Capital:		
A .....	20,000	25,000
B .....	20,000	25,000
C .....	20,000	25,000
<b>Total .....</b>	<b>96,000</b>	<b>111,000</b>

The distribution received by C consists of \$10,000 cash and depreciable property with a fair market value of \$15,000 and an adjusted basis to the partnership of \$15,000.

(b) *Presence of section 751 property.* The partnership has no unrealized receivables, but the dual test provided in section 751(d)(1) must be applied to determine whether the inventory items of the partnership, in the aggregate, have appreciated substantially in value. The fair market value of all partnership inventory items, \$39,000 (inventory \$30,000, and accounts receivable \$9,000), exceeds 120 percent of the \$30,000 adjusted basis of such items to the partnership. The fair market value of the inventory items, \$39,000, also exceeds 10 percent of the fair market value of all partnership property other than money (10 percent of \$96,000 or \$9,600). Therefore, the partnership inventory items have substantially appreciated in value.

(c) *The properties exchanged.* Since C's entire partnership interest is to be liquidated, the provisions of section 736 are applicable. No part of the payment, however, is considered as a distributive share or as a guaranteed payment under section 736(a) because the entire payment is made for C's interest in partnership property. Therefore, the entire payment is for an interest in partnership property under section 736(b), and, to the extent applicable, subject to the rules of section 751. In the distribution, C received his

share of cash (\$5,000) and \$15,000 in depreciable property (\$1,000 less than his \$16,000 share). In addition, he received other partnership property (\$5,000 cash and \$12,000 liabilities assumed, treated as money distributed under section 752(b)) in exchange for his interest in accounts receivable (\$3,000), inventory (\$10,000), land (\$3,000), and the balance of his interest in depreciable property (\$1,000). Section 751(b) applies only to the extent of the exchange of other property for section 751 property (i.e., inventory items, which include trade accounts receivable). The section 751 property exchanged has a fair market value of \$13,000 (\$3,000 in accounts receivable and \$10,000 in inventory). Thus, \$13,000 of the total amount C received is considered as received for the sale of section 751 property.

(d) *Distributee partner's tax consequences.* C's tax consequences on the distribution are as follows:

(1) *The section 751(b) sale or exchange.* C's share of the inventory items is treated as if he received them in a current distribution, and his basis for such items is \$10,000 (\$7,000 for inventory and \$3,000 for accounts receivable) as determined under paragraph (b)(3)(iii) of this section. Then C is considered as having sold his share of inventory items to the partnership for \$13,000. Thus, on the sale of his share of inventory items, C realizes \$3,000 of ordinary income.

(2) *The part of the distribution not under section 751(b).* Section 751(b) does not apply to the balance of the distribution. Before the distribution, C's basis for his partnership interest was \$32,000 (\$20,000 plus \$12,000, his share of partnership liabilities). See section 752(a). This basis is reduced by \$10,000, the basis attributed to the section 751 property treated as distributed to C and sold by him to the partnership. Thus, C has a basis of \$22,000 for the remainder of his partnership interest. The total distribution to C was \$37,000 (\$22,000 in cash and liabilities assumed, and \$15,000 in depreciable property). Since C received no more than his share of the depreciable property, none of the depreciable property constitutes proceeds of the sale under section 751(b). C did receive more than his share of money. Therefore, the sale proceeds, treated separately in subparagraph (1) of this paragraph of this example, must consist of money and therefore must be deducted from the money distribution. Consequently, in liquidation of the balance of C's interest, he receives depreciable property and \$9,000 in money (\$22,000 less \$13,000). Therefore, no gain or loss is recognized to C on the distribution. Under section 732(b), C's basis for the depreciable property is \$13,000 (the remaining basis of his partnership interest, \$22,000, reduced by \$9,000, the money received in the distribution).

(e) *Partnership's tax consequences.* The tax consequences to the partnership on the distribution are as follows:

(1) *The section 751(b) sale or exchange.* The partnership consisting of the remaining members has no ordinary income on the distribution since it did not give up any section 751 property in the exchange. Of the \$22,000 money distributed (in cash and the assumption of C's share of liabilities), \$13,000 was paid to acquire C's interest in inventory (\$10,000 fair market value) and in accounts receivable (\$3,000). Since under section 751(b) the partnership is treated as buying these properties, it has a new cost basis for the inventory and accounts receivable acquired from C. Its basis for C's share of inventory and accounts receivable is \$13,000, the amount which the partnership is considered as having paid C in the exchange. Since the partnership is treated as having distributed C's share of inventory and accounts receivable to him, the partnership must decrease its basis for inventory and accounts receivable (\$30,000) by \$10,000, the basis of C's share treated as distributed to him, and then increase the basis for inventory and accounts receivable by \$13,000 to reflect the purchase prices of the items acquired. Thus, the basis of the partnership inventory is increased from \$21,000 to \$24,000 in the transaction. (Note that the basis of property acquired in a section 751(b) exchange is determined under section 1012 without regard to any elections of the partnership. See paragraph (e) of § 1.732-1.) Further, the partnership realizes no capital gain or loss on the portion of the distribution treated as a sale under section 751(b) since, to acquire C's interest in the inventory and accounts receivable, it gave up money and assumed C's share of liabilities.

(2) *The part of the distribution not under section 751(b).* In the remainder of the distribution to C which was not in exchange for C's interest in section 751 property, C received only other property as follows: \$15,000 in depreciable property (with a basis to the partnership of \$15,000) and \$9,000 in money (\$22,000 less \$13,000 treated under subparagraph (1) of this paragraph of this example). Since this part of the distribution is not an exchange of section 751 property for other property, section 751(b) does not apply. Instead, the provisions which apply are sections 731 through 736, relating to distributions by a partnership. No gain or loss is recognized to the partnership on the distribution. (See section 731(b).) Further, the partnership makes no adjustment to the basis of remaining depreciable property unless an election under section 754 is in effect. (See section 734(a).) Thus, the basis of the depreciable property before the distribution, \$42,000, is reduced by the basis of the depreciable property distributed, \$15,000, leaving a basis for the depreciable property in the partnership of \$27,000.

However, if an election under section 754 is in effect, the partnership must make the adjustment required under section 734(b) as follows: Since the adjusted basis of the distributed property to the partnership had been \$15,000, and is only \$13,000 in C's hands (see paragraph (d)(2) of this example), the partnership will increase the basis of the depreciable property remaining in the partnership by \$2,000 (the excess of the adjusted basis to the partnership of the distributed depreciable property immediately before the distribution over its basis to the distributee). Whether or not an election under section 754 is in effect, the basis for each of the remaining partner's partnership interests will be \$38,000 (\$20,000 original contribution, plus \$12,000, each partner's original share of the liabilities, plus \$6,000, the share of C's liabilities each assumed).

(f) *Partnership trial balance.* A trial balance of the AB partnership after the distribution in liquidation of C's entire interest would reflect the results set forth in the schedule below. Column I shows the amounts to be reflected in the records if an election is in effect under section 754 with respect to an optional adjustment under section 734(b) to the basis of undistributed partnership property. Column II shows the amounts to be reflected in the records where an election under section 754 is not in effect. Note that in column II, the total bases for the partnership assets do not equal the total of the bases for the partnership interests.

*Example 3. (a) Facts.* Assume that the distribution to partner C in example 2 of this paragraph in liquidation of his entire interest in partnership ABC consists of \$5,000 in cash and \$20,000 worth of partnership inventory with a basis of \$14,000.

	I		II	
	Sec. 754, Election in effect		Sec. 754, Election not in effect	
	Basis	Fair market value	Basis	Fair market value
Cash .....	\$5,000	\$5,000	\$5,000	\$5,000
Accounts receivable .....	9,000	9,000	9,000	9,000
Inventory .....	24,000	30,000	24,000	30,000
Depreciable property .....	29,000	33,000	27,000	33,000
Land .....	9,000	9,000	9,000	9,000
	76,000	86,000	74,000	86,000
Current liabilities	15,000	15,000	15,000	15,000
Mortgage .....	21,000	21,000	21,000	21,000
Capital:				
.....	20,000	25,000	20,000	25,000
.....	20,000	25,000	20,000	25,000
	76,000	86,000	76,000	86,000

(b) *Presence of section 751 property.* For the same reason as stated in paragraph (b) of ex-

ample 2, the partnership inventory items have substantially appreciated in value.

(c) *The properties exchanged.* In the distribution, C received his share of cash (\$5,000) and his share of appreciated inventory items (\$13,000). In addition, he received appreciated inventory with a fair market value of \$7,000 (and with an adjusted basis to the partnership of \$4,900) and \$12,000 in money (liabilities assumed). C has relinquished his interest in \$16,000 of depreciable property and \$3,000 of land. Although C relinquished his interest in \$3,000 of accounts receivable, such accounts receivable are inventory items and, therefore, that exchange was not an exchange of section 751 property for other property. Section 751(b) applies only to the extent of the exchange of other property for section 751 property (i.e., depreciable property or land for inventory items). Assume that the partners agree that the \$7,000 of inventory in excess of C's share was received by him in exchange for \$7,000 of depreciable property.

(d) *Distributee partner's tax consequences.* C's tax consequence on the distributions are as follows:

(1) *The section 751(b) sale or exchange.* C is treated as if he had received his 7/16ths share of the depreciable property in a current distribution. His basis for that share is \$6,125 (42,000/48,000 of \$7,000), as determined under paragraph (b)(2)(iii) of this section. Then C is considered as having sold his 7/16ths share of depreciable property to the partnership for \$7,000, realizing a gain of \$875.

(2) *The part of the distribution not under section 751(b).* Section 751(b) does not apply to the balance of the distribution. Before the distribution, C's basis for his partnership interest was \$32,000 (\$20,000, plus \$12,000, his share of partnership liabilities). See section 752(a). This basis is reduced by \$6,125, the basis of property treated as distributed to C and sold by him to the partnership. Thus, C will have a basis of \$25,875 for the remainder of his partnership interest. Of the \$37,000 total distribution to C, \$30,000 (\$17,000 in money, including liabilities assumed, and \$13,000 in inventory) is not within section 751(b). Under section 732(b), C's basis for the inventory with a fair market value of \$13,000 (which had an adjusted basis to the partnership of \$9,100) is limited to \$8,875, the amount of the remaining basis for his partnership interest, \$25,875, reduced by \$17,000, the money received. Thus, C's total aggregate basis for the inventory received is \$15,875 (\$7,000 plus \$8,875), and not its \$14,000 basis in the hands of the partnership.

(e) *Partnership's tax consequences.* The tax consequences to the partnership on the distribution are as follows:

(1) *The section 751(b) sale or exchange.* The partnership consisting of the remaining members has \$2,100 of ordinary income on the sale of the \$7,000 of inventory which had

a basis to the partnership of \$4,900 (21,000/30,000 of \$7,000). This \$7,000 of inventory was paid to acquire 7/16ths of C's interest in the depreciable property. Since, under section 751(b), the partnership is treated as buying this property from C, it has a new cost basis for such property. Its basis for the depreciable property is \$42,875 (\$42,000 less \$6,125, the basis of the 7/16ths share considered as distributed to C, plus \$7,000, the partnership purchase price for this share).

(2) *The part of the distribution not under section 751 (b).* In the remainder of the distribution to C which was not a sale or exchange of section 751 property for other property, the partnership realizes no gain or loss. See section 731(b). Further, under section 734(a), the partnership makes no adjustment to the basis of the accounts receivable or the 9/16ths interest in depreciable property which C relinquished. However, if an election under section 754 is in effect, the partnership must make the adjustment required under section 734(b) since the adjusted basis to the partnership of the inventory distributed had been \$9,100, and C's basis for such inventory after distribution is only \$8,875. The basis of the inventory remaining in the partnership must be increased by \$225. Whether or not an election under section 754 is in effect, the basis for each of the remaining partnership interests will be \$39,050 (\$20,000 original contribution, plus \$12,000, each partner's original share of the liabilities, plus \$6,000, the share of C's liabilities now assumed, plus \$1,050, each partner's share of ordinary income realized by the partnership upon that part of the distribution treated as a sale or exchange).

*Example 4. (a) Facts.* Assume the same facts as in example 3 of this paragraph, except that the partners did not identify the property which C relinquished in exchange for the \$7,000 of inventory which he received in excess of his share.

(b) *Presence of section 751 property.* For the same reasons stated in paragraph (b) of example 2 of this paragraph, the partnership inventory items have substantially appreciated in value.

(c) *The properties exchanged.* The analysis stated in paragraph (c) of example 3 of this paragraph is the same in this example, except that, in the absence of a specific agreement among the partners as to the properties exchanged, C will be presumed to have sold to the partnership a proportionate amount of each property in which he relinquished an interest. Thus, in the absence of an agreement, C has received \$7,000 of inventory in exchange for his release of 7/19ths of the depreciable property and 7/19ths of the land. (\$7,000, fair market value of property released, over \$19,000, the sum of the fair market values of C's interest in the land and C's interest in the depreciable property.)

(d) *Distributee partner's tax consequences.* C's tax consequences on the distribution are as follows:

(1) *The section 751(b) sale or exchange.* C is treated as if he had received his 7/19ths shares of the depreciable property and land in a current distribution. His basis for those shares is \$6,263 (51,000/57,000 of \$7,000, their fair market value), as determined under paragraph (b)(2)(iii) of this section. Then C is considered as having sold his 7/19ths shares of depreciable property and land to the partnership for \$7,000, realizing a gain of \$737.

(2) *The part of the distribution not under section 751(b).* Section 751(b) does not apply to the balance of the distribution. Before the distribution C's basis for his partnership interest was \$32,000 (\$20,000 plus \$12,000, his share of partnership liabilities). See section 752(a). This basis is reduced by \$6,263, the bases of C's shares of depreciable property and land treated as distributed to him and sold by him to the partnership. Thus, C will have a basis of \$25,737 for the remainder of his partnership interest. Of the total \$37,000 distributed to C, \$30,000 (\$17,000 in money, including liabilities assumed, and \$13,000 in inventory) is not within section 751(b). Under section 732(b), C's basis for the inventory (with a fair market value of \$13,000 and an adjusted basis to the partnership of \$9,100) is limited to \$8,737, the amount of the remaining basis for his partnership interest (\$25,737 less \$17,000, money received. Thus, C's total aggregate basis for the inventory he received is \$15,737 (\$7,000 plus \$8,737), and not the \$14,000 basis it had in the hands of the partnership.

(e) *Partnership's tax consequences.* The tax consequences to the partnership on the distribution are as follows:

(1) *The section 751(b) sale or exchange.* The partnership consisting of the remaining members has \$2,100 of ordinary income on the sale of \$7,000 of inventory which had a basis to the partnership of \$4,900 (21,000/30,000 of \$7,000). This \$7,000 of inventory was paid to acquire 7/19ths of C's interest in the depreciable property and land. Since, under section 751(b), the partnership is treated as buying this property from C, it has a new cost basis for such property. The bases of the depreciable property and land would be \$42,737 and \$9,000, respectively. The basis for the depreciable property is computed as follows: The common partnership basis of \$42,000 is reduced by the \$5,158 basis (42,000/48,000 of \$5,895) for C's 7/19ths interest constructively distributed and increased by \$5,895 (16,000/19,000 of \$7,000), the part of the purchase price allocated to the depreciable property. The basis of the land would be computed in the same way. The \$9,000 original partnership basis is reduced by \$1,105 basis (\$9,000/9,000 of \$1,105) of land constructively distributed to C, and increased by \$1,105 (3,000/19,000

of \$7,000), the portion of the purchase price allocated to the land.

(2) *The part of the distribution not under section 751(b).* In the remainder of the distribution to C which was not a sale or exchange of section 751 property for other property, the partnership realizes no gain or loss. See section 731(b). Further, under section 734(a), the partnership makes no adjustment to the basis of the accounts receivable or the 12/19ths interests in depreciable property and land which C relinquished. However, if an election under section 754 is in effect, the partnership must make the adjustment required under section 734(b) since the adjusted basis to the partnership of the inventory distributed had been \$9,100 and C's basis for such inventory after the distribution is only \$8,737. The basis of the inventory remaining in the partnership must be increased by the difference of \$363. Whether or not an election under section 754 is in effect, the basis for each of the remaining partnership interests will be \$39,050 (\$20,000 original contribution plus \$12,000, each partner's original share of the liabilities, plus \$6,000, the share of C's li-

abilities assumed, plus \$1,050, each partner's share of ordinary income realized by the partnership upon the part of the distribution treated as a sale or exchange).

*Example 5. (a) Facts.* Assume that partner C in example 2 of this paragraph agrees to reduce his interest in capital and profits from one-third to one-fifth for a current distribution consisting of \$5,000 in cash, and \$7,500 of accounts receivable with a basis to the partnership of \$7,500. At the same time, the total liabilities of the partnership are not reduced. Therefore, after the distribution, C's share of the partnership liabilities has been reduced by \$4,800 from \$12,000 (1/3 of \$36,000) to \$7,200 (1/5 of \$36,000).

(b) *Presence of section 751 property.* For the same reasons as stated in paragraph (b) of example 2 of this paragraph, the partnership inventory items have substantially appreciated in value.

(c) *The properties exchanged.* C's interest in the fair market value of the partnership properties before and after the distribution can be illustrated by the following table:

Item	C's interest Fair Market Value		C received		C relinquished
	One-third before	One-fifth after	Distribution of share	In excess of share	
Cash .....	\$5,000	\$2,000	\$3,000	\$2,000	.....
Liabilities assumed .....	(12,000)	(7,200)	.....	4,800	.....
Inventory items:					
Accounts receivable .....	3,000	300	2,700	4,800	.....
Inventory .....	10,000	6,000	.....	.....	\$4,000
Depreciable property .....	16,000	9,600	.....	.....	6,400
Land .....	3,000	1,800	.....	.....	1,200
<b>Total .....</b>	<b>25,000</b>	<b>12,500</b>	<b>5,700</b>	<b>11,600</b>	<b>11,600</b>

Although C relinquished his interest in \$4,000 of inventory and received \$4,800 of accounts receivable, both items constitute section 751 property and C has received only \$800 of accounts receivable for \$800 worth of depreciable property or for an \$800 undivided interest in land. In the absence of an agreement identifying the properties exchanged, it is presumed C received \$800 for proportionate shares of his interests in both depreciable property and land. To the extent that inventory was exchanged for accounts receivable, or to the extent cash was distributed for the release of C's interest in the balance of the depreciable property and land, the transaction does not fall within section 751(b) and is a current distribution under section 732(a). Thus, the remaining \$6,700 of accounts receivable are received in a current distribution.

(d) *Distributee partner's tax consequences.* C's tax consequences on the distribution are as follows:

(1) *The section 751(b) sale or exchange.* Assuming that the partners paid \$800 worth of

accounts receivable for \$800 worth of depreciable property, C is treated as if he received the depreciable property in a current distribution, and his basis for the \$800 worth of depreciable property is \$700 (42,000/48,000 of \$800, its fair market value), as determined under paragraph (b)(2)(iii) of this section. Then C is considered as having sold his \$800 share of depreciable property to the partnership for \$800. On the sale of the depreciable property, C realizes a gain of \$100. If, on the other hand, the partners had agreed that C exchanged an \$800 interest in the land for \$800 worth of accounts receivable, C would realize no gain or loss, because under paragraph (b)(2)(iii) of this section his basis for the land sold would be \$800. In the absence of an agreement, the basis for the depreciable property and land (which C is considered as having received in a current distribution and then sold back to the partnership) would be \$716 (51,000/57,000 of \$800). In that case, on the sale of the balance of the \$800 share of depreciable property and land, C would realize \$84 of gain (\$800 less \$716).

## Internal Revenue Service, Treasury

## § 1.751-1

(2) *The part of the distribution not under section 751(b).* Section 751(b) does not apply to the balance of the distribution. Under section 731, C does not realize either gain or loss on the balance of the distribution. The adjustments to the basis of C's interest are illustrated in the following table:

	If accounts receivable received for depreciable property	If accounts receivable received for land	If there is no agreement
Original basis for C's interest .....	\$32,000	\$32,000	\$32,000
Less basis of property distributed prior to sec. 751 (b) sale or exchange .....	- 700	- 800	- 716
	31,300	31,200	31,284
Less money received in distribution .....	- 9,800	- 9,800	- 9,800
	21,500	21,400	21,484
Less basis of property received in a current distribution under sec. 732 .....	- 6,700	- 6,700	- 6,700
Resulting basis for C's interest .....	14,800	14,700	14,784

C's basis for the \$1,500 worth of accounts receivable which he received in the distribution will be \$7,500, composed of \$800 for the portion purchased in the section 751(b) exchange, plus \$6,700, the basis carried over under section 732(a) for the portion received in the current distribution.

(e) *Partnership's tax consequences.* The tax consequences to the partnership on the distribution are as follows:

(1) *The section 751(b) sale or exchange.* The partnership realizes no gain or loss in the section 751 sale or exchange because it had a basis of \$800 for the accounts receivable for which it received \$800 worth of other property. If the partnership agreed to purchase \$800 worth of depreciable property, the partnership basis of depreciable property becomes \$42,100 (\$42,000 less \$700 basis of property constructively distributed to C, plus \$800, price of property purchased). If the partnership purchased land with the accounts receivable, there would be no change in the basis of the land to the partnership because the basis of land distributed was equal to its purchase price. If there were no agreement, the basis of the depreciable property and land would be \$51,084 (depreciable property, \$42,084 and land \$9,000). The basis for the depreciable property is computed as follows: The common partnership basis of \$42,000 is reduced by the \$590 basis (42,000/48,000 of \$674) for C's \$674 interest constructively distributed, and increased by \$674 (6,400/7,600 of \$800), the part of the purchase

price allocated to the depreciable property. The basis of the land would be computed in the same way. The \$9,000 original partnership basis is reduced by \$126 basis (9,000/9,000 of \$126) of the land constructively distributed to C, and increased by \$126 (1,200/7,600 of \$800), the portion of the purchase price allocated to the land.

(2) *The part of the distribution not under section 751(b).* The partnership will realize no gain or loss in the balance of the distribution under section 731. Since the property in C's hands after the distribution will have the same basis it had in the partnership, the basis of partnership property remaining in the partnership after the distribution will not be adjusted (whether or not an election under 754 is in effect).

*Example 6.* (a) *Facts.* Partnership ABC distributes to partner C, in liquidation of his entire one-third interest in the partnership, a machine which is section 1245 property with a recomputed basis (as defined in section 1245(a)(2)) of \$18,000. At the time of the distribution, the balance sheet of the partnership is as follows:

ASSETS		
	Adjusted basis per books	Market value
Cash .....	\$3,000	\$3,000
Machine (section 1245 property) ..	9,000	15,000
Land .....	18,000	27,000
Total .....	30,000	45,000

LIABILITIES AND CAPITAL		
	Per books	Value
Liabilities .....	\$0	\$0
Capital:		
A .....	10,000	15,000
B .....	10,000	15,000
C .....	10,000	15,000
Total .....	30,000	45,000

(b) *Presence of section 751 property.* The section 1245 property is an unrealized receivable of the partnership to the extent of the potential section 1245 income in respect of the property. Since the fair market value of the property (\$15,000) is lower than its recomputed basis (\$18,000), the excess of the fair market value over its adjusted basis (\$9,000), or \$6,000, is the potential section 1245 income of the partnership in respect of the property. The partnership has no other section 751 property.

(c) *The properties exchanged.* In the distribution C received his share of section 751 property (potential section 1245 income of \$2,000, i.e.,  $\frac{1}{3}$  of \$6,000) and his share of section 1245 property (other than potential section 1245 income) with a fair market value of

## § 1.752-0

\$3,000, i.e.,  $\frac{1}{3}$  of (\$15,000 minus \$6,000), and an adjusted basis of \$3,000, i.e.,  $\frac{1}{3}$  of \$9,000. In addition he received \$4,000 of section 751 property (consisting of \$4,000 (\$6,000 minus \$2,000) of potential section 1245 income) and section 1245 property (other than potential section 1245 income) with a fair market value of \$6,000 (\$9,000 minus \$3,000) and an adjusted basis of \$6,000 (\$9,000 minus \$3,000). C relinquished his interest in \$1,000 of cash and \$9,000 of land. Assume that the partners agree that the \$4,000 of section 751 property in excess of C's share was received by him in exchange for \$4,000 of land.

(d) *Distributee partner's tax consequences.* C's tax consequences on the distributions are as follows:

(1) *The section 751(b) sale or exchange.* C is treated as if he received in a current distribution  $\frac{4}{9}$ ths of his share of the land with a basis of \$2,667 ( $18,000/27,000 \times \$4,000$ ). Then C is considered as having sold his  $\frac{4}{9}$ ths share of the land to the partnership for \$4,000, realizing a gain of \$1,333. C's basis for the remainder of his partnership interest after the current distribution is \$7,333, i.e., the basis of his partnership interest before the current distribution (\$10,000) minus the basis of the land treated as distributed to him (\$2,667).

(2) *The part of the distribution not under section 751(b).* Of the \$15,000 total distribution to C, \$11,000 (\$2,000 of potential section 1245 income and \$9,000 section 1245 property other than potential section 1245 income) is not within section 751(b). Under section 732(b) and (c), C's basis for his share of potential section 1245 income is zero (see paragraph (c)(5) of this section) and his basis for \$9,000 of section 1245 property (other than potential section 1245 income) is \$7,333, i.e., the amount of the remaining basis for his partnership interest (\$7,333) reduced by the basis for his share of potential section 1245 income (zero). Thus C's total aggregate basis for the section 1245 property (fair market value of \$15,000) distributed to him is \$11,333 (\$4,000 plus \$7,333). For an illustration of the computation of his recomputed basis for the section 1245 property immediately after the distribution, see example 2 of paragraph (f)(3) of § 1.1245-4.

(e) *Partnership's tax consequences.* The tax consequences to the partnership on the distribution are as follows:

(1) *The section 751(b) sale or exchange.* Upon the sale of \$4,000 potential section 1245 income, with a basis of zero, for  $\frac{4}{9}$ ths of C's interest in the land, the partnership consisting of the remaining members has \$4,000 ordinary income under sections 751(b) and 1245(a)(1). See section 1245(b)(3) and (6)(A). The partnership's new basis for the land is \$19,333, i.e., \$18,000, less the basis of the  $\frac{4}{9}$ ths share considered as distributed to C (\$2,667), plus the partnership purchase price for this share (\$4,000).

## 26 CFR Ch. I (4-1-14 Edition)

(2) *The part of the distribution not under section 751(b).* The analysis under this subparagraph should be made in accordance with the principles illustrated in paragraph (e)(2) of examples 3, 4, and 5 of this paragraph.

### § 1.752-0 Table of contents.

This section lists the major paragraphs that appear in §§ 1.752-1 through 1.752-7.

#### § 1.752-1 Treatment of partnership liabilities.

- (a) Definitions.
  - (1) Recourse liability defined.
  - (2) Nonrecourse liability defined.
  - (3) Related person.
  - (4) Liability defined.
    - (i) In general.
    - (ii) Obligation.
    - (iii) Other liabilities.
    - (iv) Effective date.
  - (b) Increase in partner's share of liabilities.
  - (c) Decrease in partner's share of liabilities.
    - (d) Assumption of liability.
    - (e) Property subject to a liability.
    - (f) Netting of increases and decreases in liabilities resulting from same transaction.
    - (g) Example.
    - (h) Sale or exchange of partnership interest.
  - (i) Bifurcation of partnership liabilities.

#### § 1.752-2 Partner's share of recourse liabilities.

- (a) In general.
  - (b) Obligation to make a payment.
    - (1) In general.
    - (2) Treatment upon deemed disposition.
    - (3) Obligations recognized.
    - (4) Contingent obligations.
    - (5) Reimbursement rights.
    - (6) Deemed satisfaction or obligation.
  - (c) Partner or related person as lender.
    - (1) In general.
    - (2) Wrapped debt.
    - (d) De minimis exceptions.
      - (1) Partner as lender.
      - (2) Partner as guarantor.
    - (e) Special rule for nonrecourse liability with interest guaranteed by a partner.
      - (1) In general.
      - (2) Computation of present value.
      - (3) Safe harbor.
      - (d) De minimis exception.
      - (f) Examples.
      - (g) Time-value-of-money considerations.
        - (1) In general.
        - (2) Valuation of an obligation.

### § 1.752-1 Treatment of partnership liabilities.

(a) *Definitions.* For purposes of section 752, the following definitions apply:

(1) *Recourse liability defined.* A partnership liability is a recourse liability to the extent that any partner or related person bears the economic risk of loss for that liability under § 1.752-2.

(2) *Nonrecourse liability defined.* A partnership liability is a nonrecourse liability to the extent that no partner or related person bears the economic risk of loss for that liability under § 1.752-2.

(3) *Related person.* Related person means a person having a relationship to a partner that is described in § 1.752-4(b).

(4) *Liability defined*—(i) *In general.* An obligation is a liability for purposes of section 752 and the regulations thereunder (§ 1.752-1 liability), only if, when, and to the extent that incurring the obligation—

(A) Creates or increases the basis of any of the obligor's assets (including cash);

(B) Gives rise to an immediate deduction to the obligor; or

(C) Gives rise to an expense that is not deductible in computing the obligor's taxable income and is not properly chargeable to capital.

(ii) *Obligation.* For purposes of this paragraph and § 1.752-7, an obligation is any fixed or contingent obligation to make payment without regard to whether the obligation is otherwise taken into account for purposes of the Internal Revenue Code. Obligations include, but are not limited to, debt obligations, environmental obligations, tort obligations, contract obligations, pension obligations, obligations under a short sale, and obligations under derivative financial instruments such as options, forward contracts, futures contracts, and swaps.

(iii) *Other liabilities.* For obligations that are not § 1.752-1 liabilities, see §§ 1.752-6 and 1.752-7.

(iv) *Effective date.* Except as otherwise provided in § 1.752-7(k), this paragraph (a)(4) applies to liabilities that are incurred or assumed by a partnership on or after June 24, 2003.

(b) *Increase in partner's share of liabilities.* Any increase in a partner's share of partnership liabilities, or any increase in a partner's individual liabilities by reason of the partner's assumption of partnership liabilities, is treated as a contribution of money by that partner to the partnership.

(c) *Decrease in partner's share of liabilities.* Any decrease in a partner's share of partnership liabilities, or any decrease in a partner's individual liabilities by reason of the partnership's assumption of the individual liabilities of the partner, is treated as a distribution of money by the partnership to that partner.

(d) *Assumption of liability.* Except as otherwise provided in paragraph (e) of this section, a person is considered to assume a liability only to the extent that:

(1) The assuming person is personally obligated to pay the liability; and

(2) If a partner or related person assumes a partnership liability, the person to whom the liability is owed knows of the assumption and can directly enforce the partner's or related person's obligation for the liability, and no other partner or person that is a related person to another partner

would bear the economic risk of loss for the liability immediately after the assumption.

(e) *Property subject to a liability.* If property is contributed by a partner to the partnership or distributed by the partnership to a partner and the property is subject to a liability of the transferor, the transferee is treated as having assumed the liability, to the extent that the amount of the liability does not exceed the fair market value of the property at the time of the contribution or distribution.

(f) *Netting of increases and decreases in liabilities resulting from same transaction.* If, as a result of a single transaction, a partner incurs both an increase in the partner's share of the partnership liabilities (or the partner's individual liabilities) and a decrease in the partner's share of the partnership liabilities (or the partner's individual liabilities), only the net decrease is treated as a distribution from the partnership and only the net increase is treated as a contribution of money to the partnership. Generally, the contribution to or distribution from a partnership of property subject to a liability or the termination of the partnership under section 708(b) will require that increases and decreases in liabilities associated with the transaction be netted to determine if a partner will be deemed to have made a contribution or received a distribution as a result of the transaction. When two or more partnerships merge or consolidate under section 708(b)(2)(A), as described in §1.708-1(c)(3)(i), increases and decreases in partnership liabilities associated with the merger or consolidation are netted by the partners in the terminating partnership and the resulting partnership to determine the effect of the merger under section 752.

(g) *Example.* The following example illustrates the principles of paragraphs (b), (c), (e), and (f) of this section.

*Example 1. Property contributed subject to a liability; netting of increase and decrease in partner's share of liability.* B contributes property with an adjusted basis of \$1,000 to a general partnership in exchange for a one-third interest in the partnership. At the time of the contribution, the partnership does not have any liabilities outstanding and the property is subject to a recourse debt of \$150 and has a fair market value in excess of \$150.

After the contribution, B remains personally liable to the creditor and none of the other partners bears any of the economic risk of loss for the liability under state law or otherwise. Under paragraph (e) of this section, the partnership is treated as having assumed the \$150 liability. As a result, B's individual liabilities decrease by \$150. At the same time, however, B's share of liabilities of the partnership increases by \$150. Only the net increase or decrease in B's share of the liabilities of the partnership and B's individual liabilities is taken into account in applying section 752. Because there is no net change, B is not treated as having contributed money to the partnership or as having received a distribution of money from the partnership under paragraph (b) or (c) of this section. Therefore B's basis for B's partnership interest is \$1,000 (B's basis for the contributed property).

*Example 2. Merger or consolidation of partnerships holding property encumbered by liabilities.* (i) B owns a 70 percent interest in partnership T. Partnership T's sole asset is property X, which is encumbered by a \$900 liability. Partnership T's adjusted basis in property X is \$600, and the value of property X is \$1,000. B's adjusted basis in its partnership T interest is \$420. B also owns a 20 percent interest in partnership S. Partnership S's sole asset is property Y, which is encumbered by a \$100 liability. Partnership S's adjusted basis in property Y is \$200, the value of property Y is \$1,000, and B's adjusted basis in its partnership S interest is \$40.

(ii) Partnership T and partnership S merge under section 708(b)(2)(A). Under section 708(b)(2)(A) and §1.708-1(c)(1), partnership T is considered terminated and the resulting partnership is considered a continuation of partnership S. Partnerships T and S undertake the form described in §1.708-1(c)(3)(i) for the partnership merger. Under §1.708-1(c)(3)(i), partnership T contributes property X and its \$900 liability to partnership S in exchange for an interest in partnership S. Immediately thereafter, partnership T distributes the interests in partnership S to its partners in liquidation of their interests in partnership T. B owns a 25 percent interest in partnership S after partnership T distributes the interests in partnership S to B.

(iii) Under paragraph (f) of this section, B nets the increases and decreases in its share of partnership liabilities associated with the merger of partnership T and partnership S. Before the merger, B's share of partnership liabilities was \$650 (B had a \$630 share of partnership liabilities in partnership T and a \$20 share of partnership liabilities in partnership S immediately before the merger). B's share of S's partnership liabilities after the merger is \$250 (25 percent of S's total partnership liabilities of \$1,000). Accordingly, B has a \$400 net decrease in its share of S's partnership liabilities. Thus, B is treated as

receiving a \$400 distribution from partnership S under section 752(b). Because B's adjusted basis in its partnership S interest before the deemed distribution under section 752(b) is \$460 (\$420 + \$40), B will not recognize gain under section 731. After the merger, B's adjusted basis in its partnership S interest is \$60.

(h) *Sale or exchange of a partnership interest.* If a partnership interest is sold or exchanged, the reduction in the transferor partner's share of partnership liabilities is treated as an amount realized under section 1001 and the regulations thereunder. For example, if a partner sells an interest in a partnership for \$750 cash and transfers to the purchaser the partner's share of partnership liabilities in the amount of \$250, the seller realizes \$1,000 on the transaction.

(i) *Bifurcation of partnership liabilities.* If one or more partners bears the economic risk of loss as to part, but not all, of a partnership liability represented by a single contractual obligation, that liability is treated as two or more separate liabilities for purposes of section 752. The portion of the liability as to which one or more partners bear the economic risk of loss is a recourse liability and the remainder of the liability, if any, is a nonrecourse liability.

[T.D. 8380, 56 FR 66351, Dec. 23, 1991, as amended by T.D. 8925, 66 FR 723, Jan. 4, 2001; T.D. 9207, 70 FR 30343, May 26, 2005]

**§ 1.752-2 Partner's share of recourse liabilities.**

(a) *In general.* A partner's share of a recourse partnership liability equals the portion of that liability, if any, for which the partner or related person bears the economic risk of loss. The determination of the extent to which a partner bears the economic risk of loss for a partnership liability is made under the rules in paragraphs (b) through (k) of this section.

(b) *Obligation to make a payment—(1) In general.* Except as otherwise provided in this section, a partner bears the economic risk of loss for a partnership liability to the extent that, if the partnership constructively liquidated, the partner or related person would be obligated to make a payment to any person (or a contribution to the part-

nership) because that liability becomes due and payable and the partner or related person would not be entitled to reimbursement from another partner or person that is a related person to another partner. Upon a constructive liquidation, all of the following events are deemed to occur simultaneously:

(i) All of the partnership's liabilities become payable in full;

(ii) With the exception of property contributed to secure a partnership liability (see § 1.752-2(h)(2)), all of the partnership's assets, including cash, have a value of zero;

(iii) The partnership disposes of all of its property in a fully taxable transaction for no consideration (except relief from liabilities for which the creditors's right to repayment is limited solely to one or more assets of the partnership);

(iv) All items of income, gain, loss, or deduction are allocated among the partners; and

(v) The partnership liquidates.

(2) *Treatment upon deemed disposition.* For purposes of paragraph (b)(1) of this section, gain or loss on the deemed disposition of the partnership's assets is computed in accordance with the following:

(i) If the creditor's right to repayment of a partnership liability is limited solely to one or more assets of the partnership, gain or loss is recognized in an amount equal to the difference between the amount of the liability that is extinguished by the deemed disposition and the tax basis (or book value to the extent section 704(c) or § 1.704-1(b)(4)(i) applies) in those assets.

(ii) A loss is recognized equal to the remaining tax basis (or book value to the extent section 704(c) or § 1.704-1(b)(4)(i) applies) of all the partnership's assets not taken into account in paragraph (b)(2)(i) of this section.

(3) *Obligations recognized.* The determination of the extent to which a partner or related person has an obligation to make a payment under paragraph (b)(1) of this section is based on the facts and circumstances at the time of the determination. All statutory and contractual obligations relating to the partnership liability are taken into account for purposes of applying this section, including:

(i) Contractual obligations outside the partnership agreement such as guarantees, indemnifications, reimbursement agreements, and other obligations running directly to creditors or to other partners, or to the partnership;

(ii) Obligations to the partnership that are imposed by the partnership agreement, including the obligation to make a capital contribution and to restore a deficit capital account upon liquidation of the partnership; and

(iii) Payment obligations (whether in the form of direct remittances to another partner or a contribution to the partnership) imposed by state law, including the governing state partnership statute.

To the extent that the obligation of a partner to make a payment with respect to a partnership liability is not recognized under this paragraph (b)(3), paragraph (b) of this section is applied as if the obligation did not exist.

(4) *Contingent obligations.* A payment obligation is disregarded if, taking into account all the facts and circumstances, the obligation is subject to contingencies that make it unlikely that the obligation will ever be discharged. If a payment obligation would arise at a future time after the occurrence of an event that is not determinable with reasonable certainty, the obligation is ignored until the event occurs.

(5) *Reimbursement rights.* A partner's or related person's obligation to make a payment with respect to a partnership liability is reduced to the extent that the partner or related person is entitled to reimbursement from another partner or a person who is a related person to another partner.

(6) *Deemed satisfaction of obligation.* For purposes of determining the extent to which a partner or related person has a payment obligation and the economic risk of loss, it is assumed that all partners and related persons who have obligations to make payments actually perform those obligations, irrespective of their actual net worth, unless the facts and circumstances indicate a plan to circumvent or avoid the obligation. See paragraphs (j) and (k) of this section.

(c) *Partner or related person as lender—*

(1) *In general.* A partner bears the economic risk of loss for a partnership liability to the extent that the partner or a related person makes (or acquires an interest in) a nonrecourse loan to the partnership and the economic risk of loss for the liability is not borne by another partner.

(2) *Wrapped debt.* If a partnership liability is owed to a partner or related person and that liability includes (*i.e.*, is “wrapped” around) a nonrecourse obligation encumbering partnership property that is owed to another person, the partnership liability will be treated as two separate liabilities. The portion of the partnership liability corresponding to the wrapped debt is treated as a liability owed to another person.

(d) *De minimis exceptions—*(1) *Partner as lender.* The general rule contained in paragraph (c)(1) of this section does not apply if a partner or related person whose interest (directly or indirectly through one or more partnerships including the interest of any related person) in each item of partnership income, gain, loss, deduction, or credit for every taxable year that the partner is a partner in the partnership is 10 percent or less, makes a loan to the partnership which constitutes qualified nonrecourse financing within the meaning of section 465(b)(6) (determined without regard to the type of activity financed).

(2) *Partner as guarantor.* The general rule contained in paragraph (b)(1) of this section does not apply if a partner or related person whose interest (directly or indirectly through one or more partnerships including the interest of any related person) in each item of partnership income, gain, loss, deduction, or credit for every taxable year that the partner is a partner in the partnership is 10 percent or less, guarantees a loan that would otherwise be a nonrecourse loan of the partnership and which would constitute qualified nonrecourse financing within the meaning of section 465(b)(6) (without regard to the type of activity financed) if the guarantor had made the loan to the partnership.

(e) *Special rule for nonrecourse liability with interest guaranteed by a partner—*(1)

*In general.* For purposes of this section, if one or more partners or related persons have guaranteed the payment of more than 25 percent of the total interest that will accrue on a partnership nonrecourse liability over its remaining term, and it is reasonable to expect that the guarantor will be required to pay substantially all of the guaranteed future interest if the partnership fails to do so, then the liability is treated as two separate partnership liabilities. If this rule applies, the partner or related person that has guaranteed the payment of interest is treated as bearing the economic risk of loss for the partnership liability to the extent of the present value of the guaranteed future interest payments. The remainder of the stated principal amount of the partnership liability constitutes a nonrecourse liability. Generally, in applying this rule, it is reasonable to expect that the guarantor will be required to pay substantially all of the guaranteed future interest if, upon a default in payment by the partnership, the lender can enforce the interest guaranty without foreclosing on the property and thereby extinguishing the underlying debt. The guarantee of interest rule continues to apply even after the point at which the amount of guaranteed interest that will accrue is less than 25 percent of the total interest that will accrue on the liability.

(2) *Computation of present value.* The present value of the guaranteed future interest payments is computed using a discount rate equal to either the interest rate stated in the loan documents, or if interest is imputed under either section 483 or section 1274, the applicable federal rate, compounded semi-annually. The computation takes into account any payment of interest that the partner or related person may be required to make only to the extent that the interest will accrue economically (determined in accordance with section 446 and the regulations thereunder) after the date of the interest guarantee. If the loan document contains a variable rate of interest that is an interest rate based on current values of an objective interest index, the present value is computed on the assumption that the interest determined under the objective interest index on the date of

the computation will remain constant over the term of the loan. The term “objective interest index” has the meaning given to it in section 1275 and the regulations thereunder (relating to variable rate debt instruments). Examples of an objective interest index include the prime rate of a designated financial institution, LIBOR (London Interbank Offered Rate), and the applicable federal rate under section 1274(d).

(3) *Safe harbor.* The general rule contained in paragraph (e)(1) of this section does not apply to a partnership nonrecourse liability if the guarantee of interest by the partner or related person is for a period not in excess of the lesser of five years or one-third of the term of the liability.

(4) *De minimis exception.* The general rule contained in paragraph (e)(1) of this section does not apply if a partner or related person whose interest (directly or indirectly through one or more partnerships including the interest of any related person) in each item of partnership income, gain, loss, deduction, or credit for every taxable year that the partner is a partner in the partnership is 10 percent or less, guarantees the interest on a loan to that partnership which constitutes qualified nonrecourse financing within the meaning of section 465(b)(6) (determined without regard to the type of activity financed). An allocation of interest to the extent paid by the guarantor is not treated as a partnership item of deduction or loss subject to the 10 percent or less rule.

(f) *Examples.* The following examples illustrate the principles of paragraphs (a) through (e) of this section.

*Example 1. Determining when a partner bears the economic risk of loss.* A and B form a general partnership with each contributing \$100 in cash. The partnership purchases an office building on leased land for \$1,000 from an unrelated seller, paying \$200 in cash and executing a note to the seller for the balance of \$800. The note is a general obligation of the partnership, *i.e.*, no partner has been relieved from personal liability. The partnership agreement provides that all items are allocated equally except that tax losses are specially allocated 90% to A and 10% to B and that capital accounts will be maintained in accordance with the regulations under section 704(b), including a deficit capital account restoration obligation on liquidation.

## Internal Revenue Service, Treasury

## § 1.752-2

In a constructive liquidation, the \$800 liability becomes due and payable. All of the partnership's assets, including the building, are deemed to be worthless. The building is deemed sold for a value of zero. Capital accounts are adjusted to reflect the loss on the hypothetical disposition, as follows:

	A	B
Initial contribution .....	\$100	\$100
Loss on hypothetical sale .....	(900)	(100)
	(\$800)	\$0

Other than the partners' obligation to fund negative capital accounts on liquidation, there are no other contractual or statutory payment obligations existing between the partners, the partnership and the lender. Therefore, \$800 of the partnership liability is classified as a recourse liability because one or more partners bears the economic risk of loss for non-payment. B has no share of the \$800 liability since the constructive liquidation produces no payment obligation for B. A's share of the partnership liability is \$800 because A would have an obligation in that amount to make a contribution to the partnership.

*Example 2. Recourse liability; deficit restoration obligation.* C and D each contribute \$500 in cash to the capital of a new general partnership, CD. CD purchases property from an unrelated seller for \$1,000 in cash and a \$9,000 mortgage note. The note is a general obligation of the partnership, *i.e.*, no partner has been relieved from personal liability. The partnership agreement provides that profits and losses are to be divided 40% to C and 60% to D. C and D are required to make up any deficit in their capital accounts. In a constructive liquidation, all partnership assets are deemed to become worthless and all partnership liabilities become due and payable in full. The partnership is deemed to dispose of all its assets in a fully taxable transaction for no consideration. Capital accounts are adjusted to reflect the loss on the hypothetical disposition, as follows:

	C	D
Initial contribution .....	\$500	\$500
Loss on hypothetical sale .....	(4,000) (\$3,500)	(6,000) (\$5,500)

C's capital account reflects a deficit that C would have to make up to \$3,500 and D's capital account reflects a deficit that D would have to make up of \$5,500. Therefore, the \$9,000 mortgage note is a recourse liability because one or more partners bear the economic risk of loss for the liability. C's share of the recourse liability is \$3,500 and D's share is \$5,500.

*Example 3. Guarantee by limited partner; partner deemed to satisfy obligation.* E and F form a limited partnership. E, the general partner, contributes \$2,000 and F, the limited partner, contributes \$8,000 in cash to the partnership. The partnership agreement allocates losses 20% to E and 80% to F until F's capital account is reduced to zero, after which all losses are allocated to E. The partnership purchases depreciable property for \$25,000 using its \$10,000 cash and a \$15,000 recourse loan from a bank. F guarantees payment of the \$15,000 loan to the extent the loan remains unpaid after the bank has exhausted its remedies against the partnership. In a constructive liquidation, the \$15,000 liability becomes due and payable. All of the partnership's assets, including the depreciable property, are deemed to be worthless. The depreciable property is deemed sold for a value of zero. Capital accounts are adjusted to reflect the loss on the hypothetical disposition, as follows:

	E	F
Initial contribution .....	\$2,000	\$8,000
Loss on hypothetical sale .....	(17,000)	(8,000)
	(\$15,000)	\$0

E, as a general partner, would be obligated by operation of law to make a net contribution to the partnership of \$15,000. Because E is assumed to satisfy that obligation, it is also assumed that F would not have to satisfy F's guarantee. The \$15,000 mortgage is treated as a recourse liability because one or more partners bear the economic risk of loss. E's share of the liability is \$15,000, and F's share is zero. This would be so even if E's net worth at the time of the determination is less than \$15,000, unless the facts and circumstances indicate a plan to circumvent or avoid E's obligation to contribute to the partnership.

*Example 4. Partner guarantee with right of subrogation.* G, a limited partner in the GH partnership, guarantees a portion of a partnership liability. The liability is a general obligation of the partnership, *i.e.*, no partner has been relieved from personal liability. If under state law G is subrogated to the rights of the lender, G would have the right to recover the amount G paid to the recourse lender from the general partner. Therefore, G does not bear the economic risk of loss for the partnership liability.

*Example 5. Bifurcation of partnership liability; guarantee of part of nonrecourse liability.* A partnership borrows \$10,000, secured by a mortgage on real property. The mortgage note contains an exoneration clause which provides that in the event of default, the holder's only remedy is to foreclose on the property. The holder may not look to any other partnership asset or to any partner to

pay the liability. However, to induce the lender to make the loan, a partner guarantees payment of \$200 of the loan principal. The exoneration clause does not apply to the partner's guarantee. If the partner paid pursuant to the guarantee, the partner would be subrogated to the rights of the lender with respect to \$200 of the mortgage debt, but the partner is not otherwise entitled to reimbursement from the partnership or any partner. For purposes of section 752, \$200 of the \$10,000 mortgage liability is treated as a recourse liability of the partnership and \$9,800 is treated as a nonrecourse liability of the partnership. The partner's share of the recourse liability of the partnership is \$200.

*Example 6. Wrapped debt.* I, an individual, purchases real estate from an unrelated seller for \$10,000, paying \$1,000 in cash and giving a \$9,000 purchase mortgage note on which I has no personal liability and as to which the seller can look only to the property for satisfaction. At a time when the property is worth \$15,000, I sell the property to a partnership in which I is a general partner. The partnership pays for the property with a partnership purchase money mortgage note of \$15,000 on which neither the partnership nor any partner (or person related to a partner) has personal liability. The \$15,000 mortgage note is a wrapped debt that includes the \$9,000 obligation to the original seller. The liability is a recourse liability to the extent of \$6,000 because I am the creditor with respect to the loan and I bear the economic risk of loss for \$6,000. I's share of the recourse liability is \$6,000. The remaining \$9,000 is treated as a partnership nonrecourse liability that is owed to the unrelated seller.

*Example 7. Guarantee of interest by partner treated as part recourse and part nonrecourse.* On January 1, 1992, a partnership obtains a \$4,000,000 loan secured by a shopping center owned by the partnership. Neither the partnership nor any partner has any personal liability under the loan documents for repayment of the stated principal amount. Interest accrues at a 15 percent annual rate and is payable on December 31 of each year. The principal is payable in a lump sum on December 31, 2006. A partner guarantees payment of 50 percent of each interest payment required by the loan. The guarantee can be enforced without first foreclosing on the property. When the partnership obtains the loan, the present value (discounted at 15 percent, compounded annually) of the future interest payments is \$3,508,422, and of the future principal payment is \$491,578. If tested on that date, the loan would be treated as a partnership liability of \$1,754,211 ( $\$3,508,422 \times .5$ ) for which the guaranteeing partner bears the economic risk of loss and a partnership nonrecourse liability of \$2,245,789 ( $\$1,754,211 + \$491,578$ ).

*Example 8. Contingent obligation not recognized.* J and K form a general partnership

with cash contributions of \$2,500 each. J and K share partnership profits and losses equally. The partnership purchases an apartment building for its \$5,000 of cash and a \$20,000 nonrecourse loan from a commercial bank. The nonrecourse loan is secured by a mortgage on the building. The loan documents provide that the partnership will be liable for the outstanding balance of the loan on a recourse basis to the extent of any decrease in the value of the apartment building resulting from the partnership's failure properly to maintain the property. There are no facts that establish with reasonable certainty the existence of any liability on the part of the partnership (and its partners) for damages resulting from the partnership's failure properly to maintain the building. Therefore, no partner bears the economic risk of loss, and the liability constitutes a nonrecourse liability. Under § 1.752-3, J and K share this nonrecourse liability equally because they share all profits and losses equally.

(g) *Time-value-of-money considerations*—(1) *In general.* The extent to which a partner or related person bears the economic risk of loss is determined by taking into account any delay in the time when a payment or contribution obligation with respect to a partnership liability is to be satisfied. If a payment obligation with respect to a partnership liability is not required to be satisfied within a reasonable time after the liability becomes due and payable, or if the obligation to make a contribution to the partnership is not required to be satisfied before the later of—

(i) The end of the year in which the partner's interest is liquidated, or

(ii) 90 days after the liquidation, the obligation is recognized only to the extent of the value of the obligation.

(2) *Valuation of an obligation.* The value of a payment or contribution obligation that is not required to be satisfied within the time period specified in paragraph (g)(1) of this section equals the entire principal balance of the obligation only if the obligation bears interest equal to or greater than the applicable federal rate under section 1274(d) at the time of valuation, commencing on—

(i) In the case of a payment obligation, the date that the partnership liability to a creditor or other person to whom the obligation relates becomes due and payable, or

## Internal Revenue Service, Treasury

## § 1.752-2

(ii) In the case of a contribution obligation, the date of the liquidation of the partner's interest in the partnership. If the obligation does not bear interest at a rate at least equal to the applicable federal rate at the time of valuation, the value of the obligation is discounted to the present value of all payments due from the partner or related person (*i.e.*, the imputed principal amount computed under section 1274(b)). For purposes of making this present value determination, the partnership is deemed to have constructively liquidated as of the date on which the payment obligation is valued and the payment obligation is assumed to be a debt instrument subject to the rules of section 1274 (*i.e.*, the debt instrument is treated as if it were issued for property at the time of the valuation).

(3) *Satisfaction of obligation with partner's promissory note.* An obligation is not satisfied by the transfer to the obligee of a promissory note by a partner or related person unless the note is readily tradeable on an established securities market.

(4) *Example.* The following example illustrates the principle of paragraph (g) of this section.

*Example.* Value of obligation not required to be satisfied within specified time period. A, the general partner, and B, the limited partner, each contributes \$10,000 to partnership AB. AB purchases property from an unrelated seller for \$20,000 in cash and a \$70,000 recourse purchase money note. The partnership agreement provides that profits and losses are to be divided equally. A and B are required to make up any deficit in their capital accounts. While A is required to restore any deficit balance in A's capital account within 90 days after the date of liquidation of the partnership, B is not required to restore any deficit for two years following the date of liquidation. The deficit in B's capital account will not bear interest during that two-year period. In a constructive liquidation, all partnership assets are deemed to become worthless and all partnership liabilities become due and payable in full. The partnership is deemed to dispose of all its assets in a fully taxable transaction for no consideration. Capital accounts are adjusted to reflect the loss on the hypothetical disposition, as follows:

	A	B
Initial contribution .....	\$10,000	\$10,000

	A	B
Loss on hypothetical sale .....	(45,000)	(45,000)
	(35,000)	(35,000)

A's and B's capital accounts each reflect deficits of \$35,000. B's obligation to make a contribution pursuant to B's deficit restoration obligation is recognized only to the extent of the fair market value of that obligation at the time of the constructive liquidation because B is not required to satisfy that obligation by the later of the end of the partnership taxable year in which B's interest is liquidated or within 90 days after the date of the liquidation. Because B's obligation does not bear interest, the fair market value is deemed to equal the imputed principal amount under section 1274(b). Under section 1274(b), the imputed principal amount of a debt instrument equals the present value of all payments due under the debt instrument. Assume the applicable federal rate with respect to B's obligation is 10 percent compounded semiannually. Using this discount rate, the present value of the \$35,000 payment that B would be required to make two years after the constructive liquidation to restore the deficit balance in B's capital account equals \$28,795. To the extent that B's deficit restoration obligation is not recognized, it is assumed that B's obligation does not exist. Therefore, A, as the sole general partner, would be obligated by operation of law to contribute an additional \$6,205 of capital to the partnership. Accordingly, under paragraph (g) of this section, B bears the economic risk of loss for \$28,795 and A bears the economic risk of loss for \$41,205 (\$35,000 + \$6,205).

(h) *Partner providing property as security for partnership liability—(1) Direct pledge.* A partner is considered to bear the economic risk of loss for a partnership liability to the extent of the value of any the partner's or related person's separate property (other than a direct or indirect interest in the partnership) that is pledged as security for the partnership liability.

(2) *Indirect pledge.* A partner is considered to bear the economic risk of loss for a partnership liability to the extent of the value of any property that the partner contributes to the partnership solely for the purpose of securing a partnership liability. Contributed property is not treated as contributed solely for the purpose of securing a partnership liability unless substantially all of the items of income, gain, loss, and deduction attributable

to the contributed property are allocated to the contributing partner, and this allocation is generally greater than the partner's share of other significant items of partnership income, gain, loss, or deduction.

(3) *Valuation.* The extent to which a partner bears the economic risk of loss for a partnership liability as a result of a direct pledge described in paragraph (h)(1) of this section or an indirect pledge described in paragraph (h)(2) of this section is limited to the net fair market value of the property (pledged property) at the time of the pledge or contribution. If a partner provides additional pledged property, the addition is treated as a new pledge and the net fair market value of the pledged property (including but not limited to the additional property) must be determined at that time. For purposes of this paragraph (h), if pledged property is subject to one or more other obligations, those obligations must be taken into account in determining the net fair market value of pledged property at the time of the pledge or contribution.

(4) *Partner's promissory note.* For purposes of paragraph (h)(2) of this section, a promissory note of the partner or related person that is contributed to the partnership shall not be taken into account unless the note is readily tradeable on an established securities market.

(i) *Treatment of recourse liabilities in tiered partnerships.* If a partnership (the "upper-tier partnership") owns (directly or indirectly through one or more partnerships) an interest in another partnership (the "lower-tier partnership"), the liabilities of the lower-tier partnership are allocated to the upper-tier partnership in an amount equal to the sum of the following—

(1) The amount of the economic risk of loss that the upper-tier partnership bears with respect to the liabilities; and

(2) Any other amount of the liabilities with respect to which partners of the upper-tier partnership bear the economic risk of loss.

(j) *Anti-abuse rules—(1) In general.* An obligation of a partner or related person to make a payment may be disregarded or treated as an obligation of

another person for purposes of this section if facts and circumstances indicate that a principal purpose of the arrangement between the parties is to eliminate the partner's economic risk of loss with respect to that obligation or create the appearance of the partner or related person bearing the economic risk of loss when, in fact, the substance of the arrangement is otherwise. Circumstances with respect to which a payment obligation may be disregarded include, but are not limited to, the situations described in paragraphs (j)(2) and (j)(3) of this section.

(2) *Arrangements tantamount to a guarantee.* Irrespective of the form of a contractual obligation, a partner is considered to bear the economic risk of loss with respect to a partnership liability, or a portion thereof, to the extent that:

(i) The partner or related person undertakes one or more contractual obligations so that the partnership may obtain a loan;

(ii) The contractual obligations of the partner or related person eliminate substantially all the risk to the lender that the partnership will not satisfy its obligations under the loan; and

(iii) One of the principal purposes of using the contractual obligations is to attempt to permit partners (other than those who are directly or indirectly liable for the obligation) to include a portion of the loan in the basis of their partnership interests.

The partners are considered to bear the economic risk of loss for the liability in accordance with their relative economic burdens for the liability pursuant to the contractual obligations. For example, a lease between a partner and a partnership which is not on commercially reasonable terms may be tantamount to a guarantee by the partner of a partnership liability.

(3) *Plan to circumvent or avoid the obligation.* An obligation of a partner to make a payment is not recognized if the facts and circumstances evidence a plan to circumvent or avoid the obligation.

(4) *Example.* The following example illustrates the principle of paragraph (j)(3) of this section.

*Example.* Plan to circumvent or avoid obligation. A and B form a general partnership. A, a corporation, contributes \$20,000 and B

contributes \$80,000 to the partnership. A is obligated to restore any deficit in its partnership capital account. The partnership agreement allocates losses 20% to A and 80% to B until B's capital account is reduced to zero, after which all losses are allocated to A. The partnership purchases depreciable property for \$250,000 using its \$100,000 cash and a \$150,000 recourse loan from a bank. B guarantees payment of the \$150,000 loan to the extent the loan remains unpaid after the bank has exhausted its remedies against the partnership. A is a subsidiary, formed by a parent of a consolidated group, with capital limited to \$20,000 to allow the consolidated group to enjoy the tax losses generated by the property while at the same time limiting its monetary exposure for such losses. These facts, when considered together with B's guarantee, indicate a plan to circumvent or avoid A's obligation to contribute to the partnership. The rules of section 752 must be applied as if A's obligation to contribute did not exist. Accordingly, the \$150,000 liability is a recourse liability that is allocated entirely to B.

(k) *Effect of a disregarded entity*—(1) *In general.* In determining the extent to which a partner bears the economic risk of loss for a partnership liability, an obligation under paragraph (b)(1) of this section (§ 1.752-2(b)(1) payment obligation) of a business entity that is disregarded as an entity separate from its owner under sections 856(i) or 1361(b)(3) or §§ 301.7701-1 through 301.7701-3 of this chapter (disregarded entity) is taken into account only to the extent of the net value of the disregarded entity as of the allocation date (as defined in paragraph (k)(2)(iv) of this section) that is allocated to the partnership liability as determined under the rules of this paragraph (k). The rules of this paragraph (k) do not apply to a § 1.752-2(b)(1) payment obligation of a disregarded entity to the extent that the owner of the disregarded entity is otherwise required to make a payment (that satisfies the requirements of paragraph (b)(1) of this section) with respect to the obligation of the disregarded entity.

(2) *Net value of a disregarded entity*—(i) *Definition.* For purposes of this paragraph (k), the net value of a disregarded entity equals the following—

(A) The fair market value of all assets owned by the disregarded entity that may be subject to creditors' claims under local law (including the disregarded entity's enforceable rights

to contributions from its owner and the fair market value of an interest in any partnership other than the partnership for which net value is being determined, but excluding the disregarded entity's interest in the partnership for which the net value is being determined and the net fair market value of property pledged to secure a liability of the partnership under paragraph (h)(1) of this section); less

(B) All obligations of the disregarded entity that do not constitute § 1.752-2(b)(1) payment obligations of the disregarded entity.

(ii) *Timing of the net value determination*—(A) *Initial determination.* If a partnership interest is held by a disregarded entity, and the partnership has or incurs a liability, all or a portion of which may be allocable to the owner of the disregarded entity under this paragraph (k), the disregarded entity's net value must be initially determined on the allocation date described in paragraph (k)(2)(iv) of this section.

(B) *Other events.* If a partnership interest is held by a disregarded entity, and the partnership has or incurs a liability, all or a portion of which may be allocable to the owner of the disregarded entity under this paragraph (k), then, if one or more valuation events (as defined in paragraph (k)(2)(iii) of this section) occur during the partnership taxable year, except as provided in paragraph (k)(2)(iii)(E) of this section, the net value of the disregarded entity is determined on the allocation date described in paragraph (k)(2)(iv) of this section.

(iii) *Valuation events.* The following are valuation events for purposes of this paragraph (k):

(A) A more than de minimis contribution to a disregarded entity of property other than property pledged to secure a partnership liability under paragraph (h)(1) of this section, unless the contribution is followed immediately by a contribution of equal net value by the disregarded entity to the partnership for which the net value of the disregarded entity otherwise would be determined, taking into account any obligations assumed or taken subject to in connection with such contributions.

(B) A more than de minimis distribution from a disregarded entity of property other than property pledged to secure a partnership liability under paragraph (h)(1) of this section, unless the distribution immediately follows a distribution of equal net value to the disregarded entity by the partnership for which the net value of the disregarded entity otherwise would be determined, taking into account any obligations assumed or taken subject to in connection with such distributions.

(C) A change in the legally enforceable obligation of the owner of the disregarded entity to make contributions to the disregarded entity.

(D) The incurrence, refinancing, or assumption of an obligation of the disregarded entity that does not constitute a § 1.752-2(b)(1) payment obligation of the disregarded entity.

(E) The sale or exchange of a non-de minimis asset of the disregarded entity (in a transaction that is not in the ordinary course of business). In this case, the net value of the disregarded entity may be adjusted only to reflect the difference, if any, between the fair market value of the asset at the time of the sale or exchange and the fair market value of the asset when the net value of the disregarded entity was last determined. The adjusted net value is taken into account for purposes of § 1.752-2(k)(1) as of the allocation date.

(iv) *Allocation Date.* For purposes of this paragraph (k), the allocation date is the earlier of—

(A) The first date occurring on or after the date on which the requirement to determine the net value of a disregarded entity arises under paragraph (k)(2)(ii)(A) or (B) of this section on which the partnership otherwise determines a partner's share of partnership liabilities under §§ 1.705-1(a) and 1.752-4(d); or

(B) The end of the partnership's taxable year in which the requirement to determine the net value of a disregarded entity arises under paragraph (k)(2)(ii)(A) or (B) of this section.

(3) *Multiple liabilities.* If one or more disregarded entities have § 1.752-2(b)(1) payment obligations with respect to one or more liabilities of a partnership, the partnership must allocate the net value of each disregarded entity among

partnership liabilities in a reasonable and consistent manner, taking into account the relative priorities of those liabilities.

(4) *Reduction in net value of a disregarded entity.* For purposes of this paragraph (k), the net value of a disregarded entity is determined by taking into account a subsequent reduction in the net value of the disregarded entity if, at the time the net value of the disregarded entity is determined, it is anticipated that the net value of the disregarded entity will subsequently be reduced and the reduction is part of a plan that has as one of its principal purposes creating the appearance that a partner bears the economic risk of loss for a partnership liability.

(5) *Information to be provided by the owner of a disregarded entity.* A partner that may be treated as bearing the economic risk of loss for a partnership liability based upon a § 1.752-2(b)(1) payment obligation of a disregarded entity must provide information to the partnership as to the entity's tax classification and the net value of the disregarded entity that is appropriately allocable to the partnership's liabilities on a timely basis.

(6) *Examples.* The following examples illustrate the rules of this paragraph (k):

*Example 1. Disregarded entity with net value of zero.* (i) In 2007, A forms a wholly owned domestic limited liability company, LLC, with a contribution of \$100,000. A has no liability for LLC's debts, and LLC has no enforceable right to contribution from A. Under § 301.7701-3(b)(1)(ii) of this chapter, LLC is a disregarded entity. Also in 2007, LLC contributes \$100,000 to LP, a limited partnership with a calendar year taxable year, in exchange for a general partnership interest in LP, and B and C each contributes \$100,000 to LP in exchange for a limited partnership interest in LP. The partnership agreement provides that only LLC is required to make up any deficit in its capital account. On January 1, 2008, LP borrows \$300,000 from a bank and uses \$600,000 to purchase nondepreciable property. The \$300,000 debt is secured by the property and is also a general obligation of LP. LP makes payments of only interest on its \$300,000 debt during 2008. LP has a net taxable loss in 2008, and under §§ 1.705-1(a) and 1.752-4(d), LP determines its partners' shares of the \$300,000 debt at the end of its taxable year, December 31, 2008. As of that date, LLC holds no assets other than its interest in LP.

(ii) Because LLC is a disregarded entity, A is treated as the partner in LP for Federal tax purposes. Only LLC has an obligation to make a payment on account of the \$300,000 debt if LP were to constructively liquidate as described in paragraph (b)(1) of this section. Therefore, under this paragraph (k), A is treated as bearing the economic risk of loss for LP's \$300,000 debt only to the extent of LLC's net value. Because that net value is \$0 on December 31, 2008, when LP determines its partners' shares of its \$300,000 debt, A is not treated as bearing the economic risk of loss for any portion of LP's \$300,000 debt. As a result, LP's \$300,000 debt is characterized as nonrecourse under § 1.752-1(a) and is allocated as required by § 1.752-3.

*Example 2. Disregarded entity with positive net value.* (i) The facts are the same as in *Example 1* except that on January 1, 2009, A contributes \$250,000 to LLC. On January 5, 2009, LLC borrows \$100,000 and LLC shortly thereafter uses the \$350,000 to purchase unimproved land. LP makes payments of only interest on its \$300,000 debt during 2009. As of December 31, 2009, LLC holds its interest in LP and the land, the value of which has declined to \$275,000. LP has a net taxable loss in 2009, and under §§ 1.705-1(a) and 1.752-4(d), LP determines its partners' shares of the \$300,000 debt at the end of its taxable year, December 31, 2009.

(ii) A's contribution of \$250,000 to LLC on January 1, 2009, constitutes a more than de minimis contribution of property to LLC under paragraph (k)(2)(iii)(A) of this section and the debt incurred by LLC on January 5, 2009, is a valuation event under paragraph (k)(2)(iii)(D) of this section. Accordingly, under paragraph (k)(2)(ii) of this section, LLC's value must be redetermined as of the end of the partnership's taxable year. At that time LLC's net value is \$175,000 (\$275,000 land—\$100,000 debt). Accordingly, \$175,000 of LP's \$300,000 debt will be recharacterized as recourse under § 1.752-1(a) and allocated to A under this section, and the remaining \$125,000 of LP's \$300,000 debt will remain characterized as nonrecourse under § 1.752-1(a) and is allocated as required by § 1.752-3.

*Example 3. Multiple partnership liabilities.* (i) The facts are the same as in *Example 2* except that on January 1, 2010, A forms another wholly owned domestic limited liability company, LLC2, with a contribution of \$120,000. Shortly thereafter, LLC2 uses the \$120,000 to purchase stock in X corporation. A has no liability for LLC2's debts, and LLC2 has no enforceable right to contribution from A. Under § 301.7701-3(b)(1)(ii) of this chapter, LLC2 is a disregarded entity. On July 1, 2010, LP borrows \$100,000 from a bank and uses the \$100,000 to purchase nondepreciable property. The \$100,000 debt is secured by the property and is also a general obligation of LP. The \$100,000 debt is senior in priority to LP's existing \$300,000 debt. Also, on

July 1, 2010, LLC2 agrees to guarantee both LP's \$100,000 and \$300,000 debts. LP makes payments of only interest on both its \$100,000 and \$300,000 debts during 2010. LP has a net taxable loss in 2010 and, under §§ 1.705-1(a) and 1.752-4(d), must determine its partners' shares of its \$100,000 and \$300,000 debts at the end of its taxable year, December 31, 2010. As of that date, LLC holds its interest in LP and the land, and LLC2 holds the X corporation stock which has appreciated in value to \$140,000.

(ii) Both LLC and LLC2 have obligations to make a payment on account of LP's debts if LP were to constructively liquidate as described in paragraph (b)(1) of this section. Therefore, under paragraph (k)(1) of this section, A is treated as bearing the economic risk of loss for LP's \$100,000 and \$300,000 debts only to the extent of the net values of LLC and LLC2, as allocated among those debts in a reasonable and consistent manner pursuant to paragraph (k)(3) of this section.

(iii) No events have occurred that would allow a valuation of LLC under paragraph (k)(2)(iii) of this section. Therefore, LLC's net value remains \$175,000. LLC2's net value as of December 31, 2010, when LP determines its partners' shares of its liabilities, is \$140,000. Under paragraph (k)(3) of this section, LP must allocate the net values of LLC and LLC2 between its \$100,000 and \$300,000 debts in a reasonable and consistent manner. Because the \$100,000 debt is senior in priority to the \$300,000 debt, LP first allocates the net values of LLC and LLC2, pro rata, to its \$100,000 debt. Thus, LP allocates \$56,000 of LLC's net value and \$44,000 of LLC2's net value to its \$100,000 debt, and A is treated as bearing the economic risk of loss for all of LP's \$100,000 debt. As a result, all of LP's \$100,000 debt is characterized as recourse under § 1.752-1(a) and is allocated to A under this section. LP then allocates the remaining \$119,000 of LLC's net value and LLC2's \$96,000 net value to its \$300,000 debt, and A is treated as bearing the economic risk of loss for a total of \$215,000 of the \$300,000 debt. As a result, \$215,000 of LP's \$300,000 debt is characterized as recourse under § 1.752-1(a) and is allocated to A under this section, and the remaining \$85,000 of LP's \$300,000 debt is characterized as nonrecourse under § 1.752-1(a) and is allocated as required by § 1.752-3. This example illustrates one reasonable method of allocating net values of disregarded entities among multiple partnership liabilities.

*Example 4. Disregarded entity with interests in two partnerships.* (i) In 2007, B forms a wholly owned domestic limited liability company, LLC, with a contribution of \$175,000. B has no liability for LLC's debts and LLC has no enforceable right to contribution from B. Under § 301.7701-3(b)(1)(ii) of this chapter, LLC is a disregarded entity. LLC contributes \$50,000 to LP1 in exchange for a general partnership interest in LP1,

and \$25,000 to LP2 in exchange for a general partnership interest in LP2. LLC retains the \$100,000 in cash. Both LP1 and LP2 have taxable years than end on December 31 and, under both LP1's and LP2's partnership agreements, only LLC is required to make up any deficit in its capital account. During 2007, LP1 and LP2 incur partnership liabilities that are general obligations of the partnership. LP1 borrows \$300,000 (Debt 1), and LP2 borrows \$60,000 (Debt 2) and \$40,000 (Debt 3). Debt 2 is senior in priority to Debt 3. LP1 and LP2 make payments of only interest on Debts 1, 2, and 3 during 2007. As of the end of taxable year 2007, LP1 and LP2 each have a net taxable loss and must determine its partners' shares of partnership liabilities under §§1.705-1(a) and 1.752-4(d) as of December 31, 2007. As of that date, LLC's interest in LP1 has a fair market value of \$45,000, and LLC's interest in LP2 has a fair market value of \$15,000.

(ii) Because LLC is a disregarded entity, B is treated as the partner in LP1 and LP2 for federal tax purposes. Only LLC has an obligation to make a payment on account of Debts 1, 2, and 3 if LP1 and LP2 were to constructively liquidate as described in paragraph (b)(1) of this section. Therefore, under this paragraph (k), B is treated as bearing the economic risk of loss for LP1's and LP2's liabilities only to the extent of LLC's net value as of the allocation date, December 31, 2007.

(iii) LLC's net value with respect to LP1 is \$115,000 (\$100,000 cash + \$15,000 interest in LP2). Therefore, under paragraph (k)(1) of this section, B is treated as bearing the economic risk of loss for \$115,000 of Debt 1. Accordingly, \$115,000 of LP1's \$300,000 debt is characterized as recourse under §1.752-1(a) and is allocated to B under this section. The balance of Debt 1 (\$185,000) is characterized as nonrecourse under §1.752-1(a) and is allocated as required by §1.752-3.

(iv) LLC's net value with respect to LP2 is \$145,000 (\$100,000 cash + \$45,000 interest in LP1). Therefore, under paragraph (k)(1) of this section, B is treated as bearing the economic risk of loss with respect to Debts 2 and 3 only to the extent of \$145,000. Because Debt 2 is senior in priority to Debt 3, LP2 first allocates \$60,000 of LLC's net value to Debt 2. LP2 then allocates \$40,000 of LLC's net value to Debt 3. As a result, both Debts 2 and 3 are characterized as recourse under §1.752-1(a) and allocated to B. This example illustrates one reasonable method of allocating the net value of a disregarded entity among multiple partnership liabilities.

(l) *Effective dates.* Paragraph (a), the last sentence of paragraph (b)(6), and paragraphs (h)(3) and (k) of this section apply to liabilities incurred or assumed by a partnership on or after October 11, 2006, other than liabilities incurred or

assumed by a partnership pursuant to a written binding contract in effect prior to that date. The rules applicable to liabilities incurred or assumed (or subject to a binding contract in effect) prior to October 11, 2006 are contained in §1.752-2 in effect prior to October 11, 2006, (see 26 CFR part 1 revised as of April 1, 2006).

[T.D. 8380, 56 FR 66351, Dec. 23, 1991; 57 FR 4913, Feb. 10, 1992; 57 FR 5054, Feb. 12, 1992; 57 FR 5511, Feb. 14, 1992; T.D. 9289, 71 FR 59672, Oct. 11, 2006]

**§ 1.752-3 Partner's share of non-recourse liabilities.**

(a) *In general.* A partner's share of the nonrecourse liabilities of a partnership equals the sum of paragraphs (a)(1) through (a)(3) of this section as follows—

(1) The partner's share of partnership minimum gain determined in accordance with the rules of section 704(b) and the regulations thereunder;

(2) The amount of any taxable gain that would be allocated to the partner under section 704(c) (or in the same manner as section 704(c) in connection with a revaluation of partnership property) if the partnership disposed of (in a taxable transaction) all partnership property subject to one or more nonrecourse liabilities of the partnership in full satisfaction of the liabilities and for no other consideration; and

(3) The partner's share of the excess nonrecourse liabilities (those not allocated under paragraphs (a)(1) and (a)(2) of this section) of the partnership as determined in accordance with the partner's share of partnership profits. The partner's interest in partnership profits is determined by taking into account all facts and circumstances relating to the economic arrangement of the partners. The partnership agreement may specify the partners' interests in partnership profits for purposes of allocating excess nonrecourse liabilities provided the interests so specified are reasonably consistent with allocations (that have substantial economic effect under the section 704(b) regulations) of some other significant item of partnership income or gain. Alternatively, excess nonrecourse liabilities may be allocated among the partners in accordance with the manner in

which it is reasonably expected that the deductions attributable to those nonrecourse liabilities will be allocated. Additionally, the partnership may first allocate an excess nonrecourse liability to a partner up to the amount of built-in gain that is allocable to the partner on section 704(c) property (as defined under § 1.704-3(a)(3)(ii)) or property for which reverse section 704(c) allocations are applicable (as described in § 1.704-3(a)(6)(i)) where such property is subject to the nonrecourse liability to the extent that such built-in gain exceeds the gain described in paragraph (a)(2) of this section with respect to such property. This additional method does not apply for purposes of § 1.707-5(a)(2)(ii). To the extent that a partnership uses this additional method and the entire amount of the excess nonrecourse liability is not allocated to the contributing partner, the partnership must allocate the remaining amount of the excess nonrecourse liability under one of the other methods in this paragraph (a)(3). Excess nonrecourse liabilities are not required to be allocated under the same method each year.

(b) *Allocation of a single nonrecourse liability among multiple properties*—(1) *In general.* For purposes of determining the amount of taxable gain under paragraph (a)(2) of this section, if a partnership holds multiple properties subject to a single nonrecourse liability, the partnership may allocate the liability among the multiple properties under any reasonable method. A method is not reasonable if it allocates to any item of property an amount of the liability that, when combined with any other liabilities allocated to the property, is in excess of the fair market value of the property at the time the liability is incurred. The portion of the nonrecourse liability allocated to each item of partnership property is then treated as a separate loan under paragraph (a)(2) of this section. In general, a partnership may not change the method of allocating a single nonrecourse liability under this paragraph (b) while any portion of the liability is outstanding. However, if one or more of the multiple properties subject to the liability is no longer subject to the liability, the portion of the liability al-

located to that property must be reallocated among the properties still subject to the liability so that the amount of the liability allocated to any property does not exceed the fair market value of such property at the time of reallocation.

(2) *Reductions in principal.* For purposes of this paragraph (b), when the outstanding principal of a partnership liability is reduced, the reduction of outstanding principal is allocated among the multiple properties in the same proportion that the partnership liability originally was allocated to the properties under paragraph (b)(1) of this section.

(c) *Examples.* The following examples illustrate the principles of this section:

*Example 1. Partner's share of nonrecourse liabilities.* The AB partnership purchases depreciable property for a \$1,000 purchase money note that is nonrecourse liability under the rules of this section. Assume that this is the only nonrecourse liability of the partnership, and that no principal payments are due on the purchase money note for a year. The partnership agreement provides that all items of income, gain, loss, and deduction are allocated equally. Immediately after purchasing the depreciable property, the partners share the nonrecourse liability equally because they have equal interests in partnership profits. A and B are each treated as if they contributed \$500 to the partnership to reflect each partner's increase in his or her share of partnership liabilities (from \$0 to \$500). The minimum gain with respect to an item of partnership property subject to a nonrecourse liability equals the amount of gain that would be recognized if the partnership disposed of the property in full satisfaction of the nonrecourse liability and for no other consideration. Therefore, if the partnership claims a depreciation deduction of \$200 for the depreciable property for the year it acquires that property, partnership minimum gain for the year will increase by \$200 (the excess of the \$1,000 nonrecourse liability over the \$800 adjusted tax basis of the property). See section 704(b) and the regulations thereunder. A and B each have a \$100 share of partnership minimum gain at the end of that year because the depreciation deduction is treated as a nonrecourse deduction. See section 704(b) and the regulation thereunder. Accordingly, at the end of that year, A and B are allocated \$100 each of the nonrecourse liability to match their shares of partnership minimum gain. The remaining \$800 of the nonrecourse liability will be allocated equally between A and B (\$400 each).

## § 1.752-4

*Example 2. Excess nonrecourse liabilities allocated consistently with reasonably expected deductions.* The facts are the same as in *Example 1* except that the partnership agreement provides that depreciation deductions will be allocated to A. The partners agree to allocate excess nonrecourse liabilities in accordance with the manner in which it is reasonably expected that the deductions attributable to those nonrecourse liabilities will be allocated. Assuming that the allocation of all of the depreciation deductions to A is valid under section 704(b), immediately after purchasing the depreciable property, A's share of the nonrecourse liability is \$1,000. Accordingly, A is treated as if A contributed \$1,000 to the partnership.

*Example 3. Allocation of liability among multiple properties.* (i) A and B are equal partners in a partnership (PRS). A contributes \$70 of cash in exchange for a 50-percent interest in PRS. B contributes two items of property, X and Y, in exchange for a 50-percent interest in PRS. Property X has a fair market value (and book value) of \$70 and an adjusted basis of \$40, and is subject to a nonrecourse liability of \$50. Property Y has a fair market value (and book value) of \$120, an adjusted basis of \$40, and is subject to a nonrecourse liability of \$70. Immediately after the initial contributions, PRS refinances the two separate liabilities with a single \$120 nonrecourse liability. All of the built-in gain attributable to Property X (\$30) and Property Y (\$80) is section 704(c) gain allocable to B.

(ii) The amount of the nonrecourse liability (\$120) is less than the total book value of all of the properties that are subject to such liability (\$70 + \$120 = \$190), so there is no partnership minimum gain. § 1.704-2(d). Accordingly, no portion of the liability is allocated pursuant to paragraph (a)(1) of this section.

(iii) Pursuant to paragraph (b)(1) of this section, PRS decides to allocate the nonrecourse liability evenly between the Properties X and Y. Accordingly, each of Properties X and Y are treated as being subject to a separate \$60 nonrecourse liability for purposes of applying paragraph (a)(2) of this section. Under paragraph (a)(2) of this section, B will be allocated \$20 of the liability for each of Properties X and Y (in each case, \$60 liability minus \$40 adjusted basis). As a result, a portion of the liability is allocated pursuant to paragraph (a)(2) of this section as follows:

Partner	Property	Tier 1	Tier 2
A .....	X .....	\$0	\$0
	Y .....	0	0
B .....	X .....	0	20
	Y .....	0	20

(iv) PRS has \$80 of excess nonrecourse liability that it may allocate in any manner consistent with paragraph (a)(3) of this sec-

## 26 CFR Ch. I (4-1-14 Edition)

tion. PRS determines to allocate the \$80 of excess nonrecourse liabilities to the partners up to their share of the remaining section 704(c) gain on the properties, with any remaining amount of liabilities being allocated equally to A and B consistent with their equal interests in partnership profits. B has \$70 of remaining section 704(c) gain (\$10 on Property X and \$60 on Property Y), and thus will be allocated \$70 of the liability in accordance with this gain.

The remaining \$10 is divided equally between A and B. Accordingly, the overall allocation of the \$120 nonrecourse liability is as follows:

Partner	Tier 1	Tier 2	Tier 3	Total
A .....	\$0	\$0	\$5	\$5
B .....	0	40	75	115

[T.D. 8380, 56 FR 66355, Dec. 23, 1991, as amended by T.D. 8906, 65 FR 64890, Oct. 31, 2000]

### § 1.752-4 Special rules.

(a) *Tiered partnerships.* An upper-tier partnership's share of the liabilities of a lower-tier partnership (other than any liability of the lower-tier partnership that is owed to the upper-tier partnership) is treated as a liability of the upper-tier partnership for purposes of applying section 752 and the regulations thereunder to the partners of the upper-tier partnership.

(b) *Related person definition*—(1) *In general.* A person is related to a partner if the person and the partner bear a relationship to each other that is specified in section 267(b) or 707(b)(1), subject to the following modifications:

(i) Substitute “80 percent or more” for “more than 50 percent” each place it appears in those sections;

(ii) A person's family is determined by excluding brothers and sisters; and

(iii) Disregard sections 267(e)(1) and 267(f)(1)(A).

(2) *Person related to more than one partner*—(i) *In general.* If, in applying the related person rules in paragraph (b)(1) of this section, a person is related to more than one partner, paragraph (b)(1) of this section is applied by treating the person as related only to the partner with whom there is the highest percentage of related ownership. If two or more partners have the same percentage of related ownership and no other partner has a greater percentage, the liability is allocated equally among

the partners having the equal percentages of related ownership.

(ii) *Natural persons.* For purposes of determining the percentage of related ownership between a person and a partner, natural persons who are related by virtue of being members of the same family are treated as having a percentage relationship of 100 percent with respect to each other.

(iii) *Related partner exception.* Notwithstanding paragraph (b)(1) of this section (which defines related person), persons owning interests directly or indirectly in the same partnership are not treated as related persons for purposes of determining the economic risk of loss borne by each of them for the liabilities of the partnership. This paragraph (iii) does not apply when determining a partner's interest under the de minimis rules in §§ 1.752-2 (d) and (e).

(iv) *Special rule where entity structured to avoid related person status—(A) In general.* If—

(1) A partnership liability is owed to or guaranteed by another entity that is a partnership, an S corporation, a C corporation, or a trust;

(2) A partner or related person owns (directly or indirectly) a 20 percent or more ownership interest in the other entity; and

(3) A principal purpose of having the other entity act as a lender or guarantor of the liability was to avoid the determination that the partner that owns the interest bears the economic risk of loss for federal income tax purposes for all or part of the liability;

then the partner is treated as holding the other entity's interest as a creditor or guarantor to the extent of the partner's or related person's ownership interest in the entity.

(B) *Ownership interest.* For purposes of paragraph (b)(2)(iv)(A) of this section, a person's ownership interest in:

(1) A partnership equals the partner's highest percentage interest in any item of partnership loss or deduction for any taxable year;

(2) An S corporation equals the percentage of the outstanding stock in the S corporation owned by the shareholder;

(3) A C corporation equals the percentage of the fair market value of the

issued and outstanding stock owned by the shareholder; and

(4) A trust equals the percentage of the actuarial interests owned by the beneficial owner of the trust.

(C) *Example.* Entity structured to avoid related person status. A, B, and C form a general partnership, ABC. A, B, and C are equal partners, each contributing \$1,000 to the partnership. A and B want to loan money to ABC and have the loan treated as nonrecourse for purposes of section 752. A and B form partnership AB to which each contributes \$50,000. A and B share losses equally in partnership AB. Partnership AB loans partnership ABC \$100,000 on a nonrecourse basis secured by the property ABC buys with the loan. Under these facts and circumstances, A and B bear the economic risk of loss with respect to the partnership liability equally based on their percentage interest in losses of partnership AB.

(c) *Limitation.* The amount of an indebtedness is taken into account only once, even though a partner (in addition to the partner's liability for the indebtedness as a partner) may be separately liable therefor in a capacity other than as a partner.

(d) *Time of determination.* A partner's share of partnership liabilities must be determined whenever the determination is necessary in order to determine the tax liability of the partner or any other person. See § 1.705-1(a) for rules regarding when the adjusted basis of a partner's interest in the partnership must be determined.

[T.D. 8380, 56 FR 66356, Dec. 23, 1991]

#### § 1.752-5 Effective dates and transition rules.

(a) *In general.* Except as otherwise provided in §§ 1.752-1 through 1.752-4, unless a partnership makes an election under paragraph (b)(1) of this section to apply the provisions of §§ 1.752-1 through 1.752-4 earlier, §§ 1.752-1 through 1.752-4 apply to any liability incurred or assumed by a partnership on or after December 28, 1991, other than a liability incurred or assumed by the partnership pursuant to a written binding contract in effect prior to December 28, 1991 and at all times thereafter. However, § 1.752-3(a)(3) fifth, sixth, and seventh sentences, (b), and

(c) *Example 3*, do not apply to any liability incurred or assumed by a partnership prior to October 31, 2000. Nevertheless, § 1.752-3(a)(3) fifth, sixth, and seventh sentences, (b), and (c) *Example 3*, may be relied upon for any liability incurred or assumed by a partnership prior to October 31, 2000 for taxable years ending on or after October 31, 2000. In addition, § 1.752-1(f) last sentence and (g) *Example 2*, do not apply to any liability incurred or assumed by a partnership prior to January 4, 2001. Nevertheless, § 1.752-1(f) last sentence and (g) *Example 2*, may be relied on for any liability incurred or assumed by a partnership prior to January 4, 2001 and, unless the partnership makes an election under paragraph (b)(1) of this section, on or after December 28, 1991, other than a liability incurred or assumed by the partnership pursuant to a written binding contract in effect prior to December 28, 1991 and at all times thereafter. For liabilities incurred or assumed by a partnership prior to December 28, 1991 (or pursuant to a written binding contract in effect prior to December 28, 1991 and at all times thereafter), unless an election to apply these regulations has been made, see §§ 1.752-0T to 1.752-4T, set forth in 26 CFR 1.752-0T through 1.752-4T as contained in 26 CFR edition revised April 1, 1991, (TD 8237, TD 8274, and TD 8355) and § 1.752-1, set forth in 26 CFR 1.752-1 as contained in 26 CFR edition revised April 1, 1988 (TD 6175 and TD 6500).

(b) *Election*—(1) *In general*. A partnership may elect to apply the provisions of §§ 1.752-1 through 1.752-4 to all of its liabilities to which the provisions of those sections do not otherwise apply as of the beginning of the first taxable year of the partnership ending on or after December 28, 1991.

(2) *Time and manner of election*. An election under this paragraph (b) is made by attaching a written statement to the partnership return for the first taxable year of the partnership ending on or after December 28, 1991. The written statement must include the name, address, and taxpayer identification number of the partnership making the statement and contain a declaration that an election is being made under this paragraph (b).

(c) *Effect of section 708(b)(1)(B) termination on determining date liabilities are incurred or assumed*. For purposes of applying this section, a termination of the partnership under section 708(b)(1)(B) will not cause partnership liabilities incurred or assumed prior to the termination to be treated as incurred or assumed on the date of the termination.

[T.D. 8380, 56 FR 66356, Dec. 23, 1991, as amended by T.D. 8906, 65 FR 64890, Oct. 31, 2000; T.D. 8925, 66 FR 723, Jan. 4, 2001; T.D. 9207, 70 FR 30343, May 26, 2005]

**§ 1.752-6 Partnership assumption of partner's section 358(h)(3) liability after October 18, 1999, and before June 24, 2003.**

(a) *In general*. If, in a transaction described in section 721(a), a partnership assumes a liability (defined in section 358(h)(3)) of a partner (other than a liability to which section 752(a) and (b) apply), then, after application of section 752(a) and (b), the partner's basis in the partnership is reduced (but not below the adjusted value of such interest) by the amount (determined as of the date of the exchange) of the liability. For purposes of this section, the adjusted value of a partner's interest in a partnership is the fair market value of that interest increased by the partner's share of partnership liabilities under §§ 1.752-1 through 1.752-5.

(b) *Exceptions*—(1) *In general*. Except as provided in paragraph (b)(2) of this section, the exceptions contained in section 358(h)(2)(A) and (B) apply to this section.

(2) *Transactions described in Notice 2000-44*. The exception contained in section 358(h)(2)(B) does not apply to an assumption of a liability (defined in section 358(h)(3)) by a partnership as part of a transaction described in, or a transaction that is substantially similar to the transactions described in, Notice 2000-44 (2000-2 C.B. 255). See § 601.601(d)(2) of this chapter.

(c) *Example*. The following example illustrates the principles of paragraph (a) of this section:

*Example*. In 1999, A and B form partnership PRS. A contributes property with a value and basis of \$200, subject to a nonrecourse debt obligation of \$50 and a fixed or contingent obligation of \$100 that is not a liability

to which section 752(a) and (b) applies, in exchange for a 50% interest in PRS. Assume that, after the contribution, A's share of partnership liabilities under §§1.752-1 through 1.752-5 is \$25. Also assume that the \$100 liability is not associated with a trade or business contributed by A to PRS or with assets contributed by A to PRS. After the contribution, A's basis in PRS is \$175 (A's basis in the contributed land (\$200) reduced by the nonrecourse debt assumed by PRS (\$50), increased by A's share of partnership liabilities under §§1.752-1 through 1.752-5 (\$25)). Because A's basis in the PRS interest is greater than the adjusted value of A's interest, \$75 (the fair market value of A's interest (\$50) increased by A's share of partnership liabilities (\$25)), paragraph (a) of this section operates to reduce A's basis in the PRS interest (but not below the adjusted value of that interest) by the amount of liabilities described in section 358(h)(3) (other than liabilities to which section 752(a) and (b) apply) assumed by PRS. Therefore, A's basis in PRS is reduced to \$75.

(d) *Effective date*—(1) *In general*. This section applies to assumptions of liabilities occurring after October 18, 1999, and before June 24, 2003.

(2) *Election to apply §1.752-7*. The partnership may elect, under §1.752-7(k)(2), to apply the provisions referenced in §1.752-7(k)(2)(ii) to all assumptions of liabilities by the partnership occurring after October 18, 1999, and before June 24, 2003. Section 1.752-7(k)(2) describes the manner in which the election is made.

[T.D. 9207, 70 FR 30343, May 26, 2005]

**§ 1.752-7 Partnership assumption of partner's §1.752-7 liability on or after June 24, 2003.**

(a) *Purpose and structure*. The purpose of this section is to prevent the acceleration or duplication of loss through the assumption of obligations not described in §1.752-1(a)(4)(i) in transactions involving partnerships. Under paragraph (c) of this section, any such obligation that is assumed by a partnership from a partner in a transaction governed by section 721(a) is treated as section 704(c) property. Paragraphs (e), (f), and (g) of this section provide rules for situations where a partnership assumes such an obligation from a partner and, subsequently, that partner transfers all or part of the partnership interest, that partner receives a distribution in liquidation of the partner-

ship interest, or another partner assumes part or all of that obligation from the partnership. These rules prevent the duplication of loss by prohibiting the partnership and any person other than the partner from whom the obligation was assumed from claiming a deduction, loss, or capital expense to the extent of the built-in loss associated with the obligation. These rules also prevent the acceleration of loss by deferring the partner's deduction or loss attributable to the obligation (if any) until the satisfaction of the §1.752-7 liability (within the meaning of paragraph (b)(8) of this section). Paragraph (d) of this section provides a number of exceptions to paragraphs (e), (f), and (g) of this section, including a de minimis exception. Paragraph (i) provides a special rule for situations in which an amount paid to satisfy a §1.752-7 liability is capitalized into other partnership property. Paragraph (j) of this section provides special rules for tiered partnership transactions.

(b) *Definitions*. For purposes of this section, the following definitions apply:

(1) *Assumption*. The principles of §1.752-1(d) and (e) apply in determining if a §1.752-7 liability has been assumed.

(2) *Adjusted value*. The adjusted value of a partner's interest in a partnership is the fair market value of that interest increased by the partner's share of partnership liabilities under §§1.752-1 through 1.752-5.

(3) *§1.752-7 liability*—(i) *In general*. A §1.752-7 liability is an obligation described in §1.752-1(a)(4)(ii) to the extent that either—

(A) The obligation is not described in §1.752-1(a)(4)(i); or

(B) The amount of the obligation (under paragraph (b)(3)(ii) of this section) exceeds the amount taken into account under §1.752-1(a)(4)(i).

(ii) *Amount and share of §1.752-7 liability*. The amount of a §1.752-7 liability (or, for purposes of paragraph (b)(3)(i) of this section, the amount of an obligation) is the amount of cash that a willing assignor would pay to a willing assignee to assume the §1.752-7 liability in an arm's-length transaction. If the obligation arose under a contract in exchange for rights granted to the obligor under that contract, and those

## § 1.752-7

## 26 CFR Ch. I (4-1-14 Edition)

contractual rights are contributed to the partnership in connection with the partnership's assumption of the contractual obligation, then the amount of the § 1.752-7 liability or obligation is the amount of cash, if any, that a willing assignor would pay to a willing assignee to assume the entire contract. A partner's share of a partnership's § 1.752-7 liability is the amount of deduction that would be allocated to the partner with respect to the § 1.752-7 liability if the partnership disposed of all of its assets, satisfied all of its liabilities (other than § 1.752-7 liabilities), and paid an unrelated person to assume all of its § 1.752-7 liabilities in a fully taxable arm's-length transaction (assuming such payment would give rise to an immediate deduction to the partnership).

(iii) *Example.* In 2005, A, B, and C form partnership PRS. A contributes \$10,000,000 in exchange for a 25% interest in PRS and PRS's assumption of a debt obligation. The debt obligation was issued for cash and the issue price was equal to the stated redemption price at maturity (\$5,000,000). The debt obligation bears interest, payable quarterly, at a fixed rate of interest, which was a market rate of interest when the debt obligation was issued. At the time of the assumption, all accrued interest has been paid. Prior to the partnership assuming the obligation, interest rates decrease, resulting in the debt obligation bearing an above-market interest rate. Assume that, as a result of the decline in interest rates, A would have had to pay a willing assignee \$6,000,000 to assume the debt obligation. The assumption of the debt obligation by PRS from A is treated as an assumption of a § 1.752-1(a)(4)(i) liability in the amount of \$5,000,000 (the portion of the total amount of the debt obligation that has created basis in A's assets, that is, the \$5,000,000 that was issued in exchange for the debt obligation) and an assumption of a § 1.752-7 liability in the amount of \$1,000,000 (the difference between the total obligation, \$6,000,000, and the § 1.752-1(a)(4)(i) liability, \$5,000,000).

(4) *§ 1.752-7 liability transfer—(i) In general.* Except as provided in paragraph (b)(4)(ii) of this section, a § 1.752-7 liability transfer is any assumption

of a § 1.752-7 liability by a partnership from a partner in a transaction governed by section 721(a).

(ii) *Terminations under section 708(b)(1)(B).* In determining if a deemed contribution of assets and assumption of liability as a result of a technical termination is treated as a § 1.752-7 liability transfer, only § 1.752-7 liabilities that were assumed by the terminating partnership as part of an earlier § 1.752-7 liability transfer are taken into account and, then, only to the extent of the remaining built-in loss associated with that § 1.752-7 liability.

(5) *§ 1.752-7 liability partner—(i) In general.* A § 1.752-7 liability partner is a partner from whom a partnership assumes a § 1.752-7 liability as part of a § 1.752-7 liability transfer or any person who acquires a partnership interest from the § 1.752-7 liability partner in a transaction to which paragraph (e)(3) of this section applies.

(ii) *Tiered partnerships—(A) Assumption by a lower-tier partnership.* If, in a § 1.752-7 liability transfer, a partnership (lower-tier partnership) assumes a § 1.752-7 liability from another partnership (upper-tier partnership), then both the upper-tier partnership and the partners of the upper-tier partnership are § 1.752-7 liability partners. Therefore, paragraphs (e) and (f) of this section apply on a sale or liquidation of any partner's interest in the upper-tier partnership and on a sale or liquidation of the upper-tier partnership's interest in the lower-tier partnership. See paragraph (j)(3) of this section. If, in a § 1.752-7 liability transfer, the upper-tier partnership assumes a § 1.752-7 liability from a partner, and, subsequently, in another § 1.752-7 liability transfer, a lower-tier partnership assumes that § 1.752-7 liability from the upper-tier partnership, then the partner from whom the upper-tier partnership assumed the § 1.752-7 liability continues to be the § 1.752-7 liability partner of the lower-tier partnership with respect to the remaining built-in loss associated with that § 1.752-7 liability. Any new built-in loss associated with the § 1.752-7 liability that is created on the assumption of the § 1.752-7 liability from the upper-tier partnership by the lower-tier partnership is shared by all

the partners of the upper-tier partnership in accordance with their interests in the upper-tier partnership, and each partner of the upper-tier partnership is treated as a § 1.752-7 liability partner with respect to that new built-in loss. See paragraph (e)(3)(ii), *Example 3* of this section.

(B) *Distribution of partnership interest.* If, in a transaction described in § 1.752-7(e)(3), an interest in a partnership (lower-tier partnership) that has assumed a § 1.752-7 liability is distributed by a partnership (upper-tier partnership) that is the § 1.752-7 liability partner with respect to that liability, then the persons receiving interests in the lower-tier partnership are § 1.752-7 liability partners with respect to the lower-tier partnership to the same extent that they were prior to the distribution.

(6) *Remaining built-in loss associated with a § 1.752-7 liability.* (i) *In general.* The remaining built-in loss associated with a § 1.752-7 liability equals the amount of the § 1.752-7 liability as of the time of the assumption of the § 1.752-7 liability by the partnership, reduced by the portion of the § 1.752-7 liability previously taken into account by the § 1.752-7 liability partner under paragraph (j)(3) of this section and adjusted as provided in paragraph (c) of this section and § 1.704-3 for—

(A) Any portion of that built-in loss associated with the § 1.752-7 liability that is satisfied by the partnership on or prior to the testing date (whether capitalized or deducted); and

(B) Any assumption of all or part of the § 1.752-7 liability by the § 1.752-7 liability partner (including any assumption that occurs on the testing date).

(ii) *Partial dispositions and assumptions.* In the case of a partial disposition of the § 1.752-7 liability partner's partnership interest or a partial assumption of the § 1.752-7 liability by another partner, the remaining built-in loss associated with § 1.752-7 liability is pro rated based on the portion of the interest sold or the portion of the § 1.752-7 liability assumed.

(7) *§ 1.752-7 liability reduction—(i) In general.* The § 1.752-7 liability reduction is the amount by which the § 1.752-7 liability partner is required to reduce the basis in the partner's partnership

interest by operation of paragraphs (e), (f), and (g) of this section. The § 1.752-7 liability reduction is the lesser of—

(A) The excess of the § 1.752-7 liability partner's basis in the partnership interest over the adjusted value of that interest (as defined in paragraph (b)(2) of this section); or

(B) The remaining built-in loss associated with the § 1.752-7 liability (as defined in paragraph (b)(6) of this section without regard to paragraph (b)(6)(ii) of this section).

(ii) *Partial dispositions and assumptions.* In the case of a partial disposition of the § 1.752-7 liability partner's partnership interest or a partial assumption of the § 1.752-7 liability by another partner, the § 1.752-7 liability reduction is pro rated based on the portion of the interest sold or the portion of the § 1.752-7 liability assumed.

(8) *Satisfaction of § 1.752-7 liability—In general.* A § 1.752-7 liability is treated as satisfied (in whole or in part) on the date on which the partnership (or the assuming partner) would have been allowed to take the § 1.752-7 liability into account for federal tax purposes but for this section. For example, a § 1.752-7 liability is treated as satisfied when, but for this section, the § 1.752-7 liability would give rise to—

(i) An increase in the basis of the partnership's or the assuming partner's assets (including cash);

(ii) An immediate deduction to the partnership or to the assuming partner;

(iii) An expense that is not deductible in computing the partnership's or the assuming partner's taxable income and not properly chargeable to capital account; or

(iv) An amount realized on the sale or other disposition of property subject to that liability if the property was disposed of by the partnership or the assuming partner at that time.

(9) *Testing date.* The testing date is—

(i) For purposes of paragraph (e) of this section, the date of the sale, exchange, or other disposition of part or all of the § 1.752-7 liability partner's partnership interest;

(ii) For purposes of paragraph (f) of this section, the date of the partnership's distribution in liquidation of the

## § 1.752-7

## 26 CFR Ch. I (4-1-14 Edition)

§1.752-7 liability partner's partnership interest; and

(iii) For purposes of paragraph (g) of this section, the date of the assumption (or partial assumption) of the §1.752-7 liability by a partner other than the §1.752-7 liability partner.

(10) *Trade or business*—(i) *In general*. A trade or business is a specific group of activities carried on by a person for the purpose of earning income or profit, other than a group of activities consisting of acquiring, holding, dealing in, or disposing of financial instruments, if the activities included in that group include every operation that forms a part of, or a step in, the process of earning income or profit. Such group of activities ordinarily includes the collection of income and the payment of expenses. The group of activities must constitute the carrying on of a trade or business under section 162(a) (determined as though the activities were conducted by an individual).

(ii) *Examples*. The following examples illustrate the provisions of this paragraph (b)(10):

*Example 1.* Corporation Y owns, manages, and derives rental income from an office building and also owns vacant land that may be subject to environmental liabilities. Corporation Y contributes the land subject to the environmental liabilities to PRS in a transaction governed by section 721(a). PRS plans to develop the land as a landfill. The contribution of the vacant land does not constitute the contribution of a trade or business because Corporation Y did not conduct any significant business or development activities with respect to the land prior to the contribution.

*Example 2.* For the past 5 years, Corporation X has owned and operated gas stations in City A, City B, and City C. Corporation X transfers all of the assets associated with the operation of the gas station in City A to PRS for interests in PRS and the assumption by PRS of the §1.752-7 liabilities associated with that gas station. PRS continues to operate the gas station in City A after the contribution. The contribution of the gas station to PRS constitutes the contribution of a trade or business.

*Example 3.* For the past 7 years, Corporation Z has engaged in the manufacture and sale of household products. Throughout this period, Corporation Z has maintained a research department for use in connection with its manufacturing activities. The research department has 10 employees actively engaged in the development of new products. Corporation Z contributes the research de-

partment to PRS in exchange for a PRS interest and the assumption by PRS of pension liabilities with respect to the employees of the research department. PRS continues the research operations on a contractual basis with several businesses, including Corporation Z. The contribution of the research operations to PRS constitutes a contribution of a trade or business.

(c) *Application of section 704(b) and (c) to assumed §1.752-7 liabilities*—(1) *In general*—(i) *Section 704(c)*. Except as otherwise provided in this section, sections 704(c)(1)(A) and (B), section 737, and the regulations thereunder, apply to §1.752-7 liabilities. See §1.704-3(a)(12). However, §1.704-3(a)(7) does not apply to any person who acquired a partnership interest from a §1.752-7 liability partner in a transaction to which paragraph (e)(1) of this section applies.

(ii) *Section 704(b)*. Section 704(b) and §1.704-1(b) apply to a post-contribution change in the value of a §1.752-7 liability. If there is a decrease in the value of a §1.752-7 liability that is reflected in the capital accounts of the partners under §1.704-1(b)(2)(iv)(f), the amount of the decrease constitutes an item of income for purposes of section 704(b) and §1.704-1(b). Conversely, if there is an increase in the value of a §1.752-7 liability that is reflected in the capital accounts of the partners under §1.704-1(b)(2)(iv)(f), the amount of the increase constitutes an item of loss for purposes of section 704(b) and §1.704-1(b).

(2) *Example*. The following example illustrates the provisions of this paragraph (c):

*Example.* (i) *Facts*. In 2004, A, B, and C form partnership PRS. A contributes Property 1 with a fair market value and basis of \$400X, subject to a §1.752-7 liability of \$100X, for a 25% interest in PRS. B contributes \$300X cash for a 25% interest in PRS, and C contributes \$600X cash for a 50% interest in PRS. Assume that the partnership complies with the substantial economic effect safe harbor of §1.704-1(b)(2). Under §1.704-1(b)(2)(iv)(b), A's capital account is credited with \$300X (the fair market value of Property 1, \$400X, less the §1.752-7 liability assumed by PRS, \$100X). In accordance with §§1.752-7(c)(1)(i) and 1.704-3, the partnership can use any reasonable method for section 704(c) purposes. In this case, the partnership elects the traditional method under §1.704-3(b) and also elects to treat the deductions or losses attributable to the §1.752-7 liability as coming first from the built-in loss. In 2005,

## Internal Revenue Service, Treasury

## § 1.752-7

PRS earns \$200X of income and uses it to satisfy the § 1.752-7 liability which has increased in value to \$200X. Assume that the cost to PRS of satisfying the § 1.752-7 liability is de-

ductible by PRS. The \$200X of partnership income is allocated according to the partnership agreement, \$50X to A, \$50X to B, and \$100X to C.

\$300	\$400	\$300	\$300	\$600	\$600	Initial Contribution
50	50	50	50	100	100	Income
(25)	(125)	(25)	(25)	(50)	(50)	Satisfaction of Liability
<u>\$325</u>	<u>\$325</u>	<u>\$325</u>	<u>\$325</u>	<u>\$650</u>	<u>\$650</u>	

(ii) *Analysis.* Pursuant to paragraph (c) of this section, \$100X of the deduction attributable to the satisfaction of the § 1.752-7 liability is specially allocated to A, the § 1.752-7 liability partner, under section 704(c)(1)(A) and § 1.704-3. No book item corresponds to this tax allocation. The remaining \$100X of deduction attributable to the satisfaction of the § 1.752-7 liability is allocated, for both book and tax purposes, according to the partnership agreement, \$25X to A, \$25X to B, and \$50X to C. If the partnership, instead, satisfied the § 1.752-7 liability over a number of years, the first \$100X of deduction with respect to the § 1.752-7 liability would be allocated to A, the § 1.752-7 liability partner, before any deduction with respect to the § 1.752-7 liability would be allocated to the other partners. For example, if PRS were to satisfy \$50X of the § 1.752-7 liability, the \$50X deduction with respect to the § 1.752-7 liability would be allocated to A for tax purposes only. No deduction would arise for book purposes. If PRS later paid a further \$100X in satisfaction of the § 1.752-7 liability, \$50X of the deduction with respect to the § 1.752-7 liability would be allocated, solely for tax purposes, to A and the remaining \$50X would be allocated, for both book and tax purposes, according to the partnership agreement. Under these circumstances, the partnership's method of allocating the built-in loss associated with the § 1.752-7 liability is reasonable.

(d) *Special rules for transfers of partnership interests, distributions of partnership assets, and assumptions of the § 1.752-7 liability after a § 1.752-7 liability transfer*—(1) *In general.* Except as provided in paragraphs (d)(2) and (i) of this section, paragraphs (e), (f), and (g) of this section apply to certain partnership transactions occurring after a § 1.752-7 liability transfer.

(2) *Exceptions*—(i) *In general.* Paragraphs (e), (f), and (g) of this section do not apply—

(A) If the partnership assumes the § 1.752-7 liability as part of a contribution to the partnership of the trade or business with which the liability is associated, and the partnership continues to carry on that trade or business after the contribution (for the definition of a trade or business, see paragraph (b)(10) of this section); or

(B) If, immediately before the testing date, the amount of the remaining built-in loss with respect to all § 1.752-7 liabilities assumed by the partnership (other than § 1.752-7 liabilities assumed by the partnership with an associated trade or business) in one or more § 1.752-7 liability transfers is less than the lesser of 10% of the gross value of partnership assets or \$1,000,000.

(ii) *Examples.* The following examples illustrate the principles of this paragraph (d)(2):

*Example 1.* For the past 5 years, Corporation X, a C corporation, has been engaged in Business A and Business B. In 2004, Corporation X contributes Business A, in a transaction governed by section 721(a), to PRS in exchange for a PRS interest and the assumption by PRS of pension liabilities with respect to the employees engaged in Business A. PRS plans to carry on Business A after the contribution. Because PRS has assumed the pension liabilities as part of a contribution to PRS of the trade or business with which the liabilities are associated, the treatment of the pension liabilities is not affected by paragraphs (e), (f), and (g) of this section with respect to any transaction occurring after the § 1.752-7 liability transfer of the pension liabilities.

*Example 2.* (i) *Facts.* The facts are the same as in *Example 1*, except that PRS also assumes from Corporation X certain pension liabilities with respect to the employees of Business B. At the time of the assumption,

# § 1.752-7

# 26 CFR Ch. I (4-1-14 Edition)

the amount of the pension liabilities with respect to the employees of Business A is \$3,000,000 (the A liabilities) and the amount of the pension liabilities associated with the employees of Business B (the B liabilities) is \$2,000,000. Two years later, Corporation X sells its interest in PRS to Y for \$9,000,000. At the time of the sale, the remaining built-

in loss associated with the A liabilities is \$2,100,000, the remaining built-in loss associated with the B liabilities is \$900,000, and the gross value of PRS's assets (excluding § 1.752-7 liabilities) is \$20,000,000. Assume that PRS has no § 1.752-7 liabilities other than those assumed from Corporation X.

## PRS Balance Sheet at Time of X's Sale of PRS Interest (in millions)

<u>Assets</u>	<u>Liabilities</u>	
\$20		Gross Assets
		(including Business A)
	(\$2.1)	A Liabilities
	( 0.9)	B Liabilities

(ii) *Analysis.* The only liabilities assumed by PRS from Corporation X that were not assumed as part of Corporation X's contribution of Business A were the B liabilities. Immediately before the testing date, the remaining built-in loss associated with the B liabilities (\$900,000) was less than the lesser of 10% of the gross value of PRS's assets (\$2,000,000) or \$1,000,000. Therefore, paragraph (d)(2)(i)(B) of this section applies to exclude Corporation X's sale of the PRS interest to Y from the application of paragraph (e) of this section.

(e) *Transfer of § 1.752-7 liability partner's partnership interest—(1) In general.* Except as provided in paragraphs (d)(2), (e)(3), and (i) of this section, immediately before the sale, exchange, or other disposition of all or a part of a § 1.752-7 liability partner's partnership interest, the § 1.752-7 liability partner's basis in the partnership interest is reduced by the § 1.752-7 liability reduction (as defined in paragraph (b)(7) of this section). No deduction, loss, or capital expense is allowed to the partnership on the satisfaction of the § 1.752-7 liability (within the meaning of paragraph (b)(8) of this section) to the extent of the remaining built-in loss associated with the § 1.752-7 liability (as defined in paragraph (b)(6) of this section). For purposes of section 705(a)(2)(B) and § 1.704-1(b)(2)(ii)(b) only, the remaining built-in loss associated with the § 1.752-7 liability is not treated as a nondeductible, noncapital expenditure of the partnership. Therefore, the remaining partners' capital accounts

and bases in their partnership interests are not reduced by the remaining built-in loss associated with the § 1.752-7 liability. If the partnership (or any successor) notifies the § 1.752-7 liability partner of the satisfaction of the § 1.752-7 liability, then the § 1.752-7 liability partner is entitled to a loss or deduction. The amount of that deduction or loss is, in the case of a partial satisfaction of the § 1.752-7 liability, the amount that the partnership would, but for this section, take into account on the partial satisfaction of the § 1.752-7 liability (but not, in total, more than the § 1.752-7 liability reduction) or, in the case of a complete satisfaction of the § 1.752-7 liability, the remaining § 1.752-7 liability reduction. To the extent of the amount that the partnership would, but for this section, take into account on the satisfaction of the § 1.752-7 liability, the character of that deduction or loss is determined as if the § 1.752-7 liability partner had satisfied the liability. To the extent that the § 1.752-7 liability reduction exceeds the amount that the partnership would, but for this section, take into account on the satisfaction of the § 1.752-7 liability, the character of the § 1.752-7 liability partner's loss is capital.

(2) *Examples.* The following examples illustrate the principles of paragraph (e)(1) of this section:

## Internal Revenue Service, Treasury

## § 1.752-7

*Example 1. (i) Facts.* In 2004, A, B, and C form partnership PRS. A contributes Property 1 with a fair market value of \$5,000,000 and basis of \$4,000,000 subject to a §1.752-7 liability of \$2,000,000 in exchange for a 25% interest in PRS. B contributes \$3,000,000 cash in exchange for a 25% interest in PRS, and C contributes \$6,000,000 cash in exchange for a 50% interest in PRS. In 2006, when PRS has a section 754 election in effect, A sells A's interest in PRS to D for \$3,000,000. At the time

of the sale, the basis of A's PRS interest is \$4,000,000, the remaining built-in loss associated with the §1.752-7 liability is \$2,000,000, and PRS has no liabilities (as defined in §1.752-1(a)(4)). Assume that none of the exceptions of paragraph (d)(2) of this section apply and that the satisfaction of the §1.752-7 liability would have given rise to a deductible expense to A. In 2007, PRS pays \$3,000,000 to satisfy the liability.

PRS Balance Sheet (in millions)					
Assets			Liabilities/Equity		
Value	Basis		Value	Basis	
\$5	\$4	Property 1			
\$9	\$9	Cash	\$2	-	§1.752-7 Liability
					Partner's Equity:
			\$3	\$4	A
			\$3	\$3	B
			\$6	\$6	C

(ii) *Sale of A's PRS interest.* Immediately before the sale of the PRS interest to D, A's basis in the PRS interest is reduced (to \$3,000,000) by the §1.752-7 liability reduction, *i.e.*, the lesser of the excess of A's basis in the PRS interest (\$4,000,000) over the adjusted value of that interest (\$3,000,000), \$1,000,000, or the remaining built-in loss associated with the §1.752-7 liability, \$2,000,000. Therefore, A neither realizes nor recognizes any gain or loss on the sale of the PRS interest to D. D's basis in the PRS interest is \$3,000,000. D's share of the adjusted basis of

partnership property, as determined under §1.743-1(d), equals D's interest in the partnership's previously taxed capital of \$2,000,000 (the amount of cash that D would receive on a liquidation of the partnership, \$3,000,000, increased by the amount of tax loss that would be allocated to D in the hypothetical transaction, \$0, and reduced by the amount of tax gain that would be allocated to D in the hypothetical transaction, \$1,000,000). Therefore, the positive basis adjustment under section 743(b) is \$1,000,000.

Computation of §1.752-7 Liability Reduction (in millions)

1. Basis of A's PRS interest	\$4
2. Less adjusted value of A's PRS interest	(3)
3. Difference	\$1
4. Remaining built-in loss from §1.752-7 liability	<u>2</u>
5. §1.752-7 liability reduction (lesser of 3 or 4)	\$1

Gain/Loss on Sale of A's PRS Interest (in millions)

1. Amount realized on sale	\$3
2. Less basis of PRS interest	
Original	4
§1.752-7 liability reduction	<u>1</u>
Difference	(3)
3. Gain/Loss	<u>0</u>

(iii) *Satisfaction of §1.752-7 liability.* Neither PRS nor any of its partners is entitled to a deduction, loss, or capital expense upon the satisfaction of the §1.752-7 liability to the extent of the remaining built-in loss associated with the §1.752-7 liability (\$2,000,000). PRS is entitled to a deduction, however, for the amount by which the cost of satisfying the §1.752-7 liability exceeds the remaining

built-in loss associated with the §1.752-7 liability. Therefore, in 2007, PRS may deduct \$1,000,000 (cost to satisfy the §1.752-7 liability, \$3,000,000, less the remaining built-in loss associated with the §1.752-7 liability, \$2,000,000). If PRS notifies A of the satisfaction of the §1.752-7 liability, then A is entitled to an ordinary deduction in 2007 of \$1,000,000 (the §1.752-7 liability reduction).

PRS's Deduction on Satisfaction of Liability (in millions)

1. Amount paid by PRS to satisfy §1.752-7 liability	\$3
2. Remaining built-in loss for §1.752-7 liability	(2)
3. Difference	\$1

*Example 2.* The facts are the same as in *Example 1* except that, at the time of A's sale of the PRS interest to D, PRS has a non-recourse liability of \$4,000,000, of which A's share is \$1,000,000. A's basis in PRS is \$5,000,000. At the time of the sale of the PRS interest to D, the adjusted value of A's interest is \$4,000,000 (the fair market value of the interest (\$3,000,000), increased by A's share of partnership liabilities (\$1,000,000)). The difference between the basis of A's interest (\$5,000,000) and the adjusted value of that interest (\$4,000,000) is \$1,000,000. Therefore, the §1.752-7 liability reduction is \$1,000,000 (the lesser of this difference or the remaining built-in loss associated with the §1.752-7 li-

ability, \$2,000,000). Immediately before the sale of the PRS interest to D, A's basis is reduced from \$5,000,000 to \$4,000,000. A's amount realized on the sale of the PRS interest to D is \$4,000,000 (\$3,000,000 paid by D, increased under section 752(d) by A's share of partnership liabilities, or \$1,000,000). Therefore, A neither realizes nor recognizes any gain or loss on the sale. D's basis in the PRS interest is \$4,000,000. Because D's share of the adjusted basis of partnership property is \$3,000,000 (D's share of the partnership's previously taxed capital, \$2,000,000, plus D's share of partnership liabilities, \$1,000,000), the basis adjustment under section 743(b) is \$1,000,000.

## Internal Revenue Service, Treasury

## § 1.752-7

3. Gain/Loss	0

*Example 3.* The facts are the same as in *Example 1*, except that the satisfaction of the §1.752-7 liability would have given rise to a capital expense to A or PRS. Neither PRS nor any of its partners are entitled to a capital expense upon the satisfaction of the §1.752-7 liability to the extent of the remaining built-in loss associated with the §1.752-7 liability (\$2,000,000). PRS may, however, increase the basis of appropriate partnership assets by the amount by which the cost of satisfying the §1.752-7 liability exceeds the remaining built-in loss associated with the §1.752-7 liability. Therefore, in 2007, PRS may capitalize \$1,000,000 (cost to satisfy the §1.752-7 liability, \$3,000,000, less the remain-

ing built-in loss associated with the §1.752-7 liability, \$2,000,000) to the appropriate partnership assets. If A is notified by PRS that the §1.752-7 liability has been satisfied, then A is entitled to a capital loss in 2007 as provided in paragraph (e)(1) of this section, the year of the satisfaction of the §1.752-7 liability.

(3) *Exception for nonrecognition transactions*—(i) *In general.* Paragraph (e)(1) of this section does not apply where a §1.752-7 liability partner transfers all or part of the partner's partnership interest in a transaction in which the

transferee's basis in the partnership interest is determined in whole or in part by reference to the transferor's basis in the partnership interest. In addition, paragraph (e)(1) of this section does not apply to a distribution of an interest in the partnership (lower-tier partnership) that has assumed the § 1.752-7 liability by a partnership that is the § 1.752-7 liability partner (upper-tier partnership) if the partners of the upper-tier partnership that were § 1.752-7 liability partners with respect to the lower-tier partnership prior to the distribution continue to be § 1.752-7 liability partners with respect to the lower-tier partnership after the distribution. See paragraphs (b)(4)(ii) and (j)(3) of this section for rules on the application of this section to partners of the § 1.752-7 liability partner.

(ii) *Examples.* The following examples illustrate the provisions of this paragraph (e)(3):

*Example 1. Transfer of partnership interest to lower-tier partnership.* (i) *Facts.* In 2004, X contributes undeveloped land with a value and basis of \$2,000,000 and subject to environmental liabilities of \$1,500,000 to partnership LTP in exchange for a 50% interest in LTP. LTP develops the land as a landfill. In 2005, in a transaction governed by section 721(a), X contributes the LTP interest to UTP in exchange for a 50% interest in UTP. In 2008, X sells the UTP interest to A for \$500,000. At the time of the sale, X's basis in UTP is \$2,000,000, the remaining built-in loss associated with the environmental liability is \$1,500,000, and the gross value of UTP's assets is \$2,500,000. The environmental liabilities were not assumed by LTP as part of a contribution by X to LTP of a trade or business with which the liabilities were associated. (See paragraph (b)(10)(ii), *Example 1* of this section.)

(ii) *Analysis.* Because UTP's basis in the LTP interest is determined by reference to X's basis in the LTP interest, X's contribution of the LTP interest to UTP is exempted from the rules of paragraph (e)(1) of this section. Under paragraph (j)(1) of this section, X's contribution of the LTP interest to UTP is treated as a contribution of X's share of the assets of LTP and UTP's assumption of X's share of the LTP liabilities (including § 1.752-7 liabilities). Therefore, X's transfer of the LTP interest to UTP is a § 1.752-7 liability transfer. The § 1.752-7 liabilities deemed transferred by X to UTP are not associated with a trade or business transferred to UTP for purposes of paragraph (d)(2)(i)(A) of this section, because they were not associated with a trade or business transferred by X to

LTP as part of the original § 1.752-7 liability transfer. See paragraph (j)(2) of this section. Because none of the exceptions described in paragraph (d)(2) of this section apply to X's taxable sale of the UTP interest to A in 2008, paragraph (e)(1) of this section applies to that sale.

*Example 2. Transfer of partnership interest to corporation.* The facts are the same as in *Example 1*, except that, rather than transferring the LTP interest to UTP in 2005, X contributes the LTP interest to Corporation Y in an exchange to which section 351 applies. Because Corporation Y's basis in the LTP interest is determined by reference to X's basis in that interest, X's contribution of the LTP interest is exempted from the rules of paragraph (e)(1) of this section. But see section 358(h) and § 1.358-7 for appropriate basis adjustments.

*Example 3. Partnership merger.* (i) *Facts.* In 2004, A, B, C, and D form equal partnership PRS1. A contributes Blackacre with a value and basis of \$2,000,000 to PRS1 and PRS1 assumes from A \$1,500,000 of pension liabilities unrelated to Blackacre. B, C, and D each contribute \$500,000 cash to PRS1. PRS1 uses the cash contributed by B, C, and D (\$1,500,000) to purchase Whiteacre. In 2006, PRS1 merges into PRS2 in an assets-over merger under § 1.708-1(c)(3). Assume that, under § 1.708-1(c), PRS2 is the surviving partnership and PRS1 is the terminating partnership. At the time of the merger, the value of Blackacre is still \$2,000,000, the remaining built-in loss with respect to the pension liabilities is still \$1,500,000, but the value of Whiteacre has declined to \$500,000.

(ii) *Deemed assumption by PRS2 of PRS1 liabilities.* Under § 1.708-1(c)(3), the merger is treated as a contribution of the assets and liabilities of PRS1 to PRS2, followed by a distribution of the PRS2 interests by PRS1 in liquidation of PRS1. Because PRS2 assumes a § 1.752-7 liability (the pension liabilities) of PRS1, PRS1 is a § 1.752-7 liability partner of PRS2. Under paragraph (b)(5)(ii)(A) of this section, A is also § 1.752-7 liability partner of PRS2 to the extent of the remaining \$1,500,000 built-in loss associated with the pension liabilities. B, C, and D are not § 1.752-7 liability partners with respect to PRS1. If the amount of the pension liabilities had increased between the date of PRS1's assumption of those liabilities from A and the date of the merger of PRS1 into PRS2, then B, C, and D would be § 1.752-7 liability partners with respect to PRS2 to the extent of their respective shares of that increase. See paragraph (b)(5)(ii) of this section.

(iii) *Deemed distribution of PRS2 interests.* Paragraph (e)(1) does not apply to PRS1's deemed distribution of the PRS2 interests, because, under paragraph (b)(5)(ii)(B) of this section, all of the partners that were § 1.752-7 liability partners with respect to PRS2 before the distribution, i.e., A, continue to be

§1.752-7 liability partners after the distribution. After the distribution, A's share of the pension liabilities now held by PRS2 will continue to be \$1,500,000.

*Example 4. Partnership division; no shifting of §1.752-7 liability.* The facts are the same as in *Example 3*, except that PRS1 does not merge with PRS2, but instead contributes Blackacre to PRS2 in exchange for PRS2 interests and the assumption by PRS2 of the pension liabilities. Immediately thereafter, PRS1 distributes the PRS2 interests to A and B in liquidation of their interests in PRS1. The analysis is the same as in *Example 3*. After the assumption of the pension liabilities by PRS2, A is a §1.752-7 liability partner with respect to PRS2. After the distribution of a PRS2 interest to A, A continues to be a §1.752-7 liability partner with respect to PRS2, and the amount of A's built-in loss with respect to the §1.752-7 liabilities continues to be \$1,500,000. Therefore, paragraph (e)(1) of this section does not apply to the distribution of the PRS2 interests to A and B.

*Example 5. Partnership division; shifting of §1.752-7 liability.* The facts are the same as in *Example 4*, except that PRS1 distributes the PRS2 interests not to A and B, but to C and D, in liquidation of their interests in PRS1. After this distribution, A does not continue to be a §1.752-7 liability partner of PRS2, because A no longer has an interest in PRS2. Therefore, paragraph (e)(1) of this section applies to the distribution of the PRS2 interests to C and D.

(f) *Distribution in liquidation of §1.752-7 liability partner's partnership interest—*  
(1) *In general.* Except as provided in paragraphs (d)(2) and (i) of this section, immediately before a distribution in liquidation of a §1.752-7 liability partner's partnership interest, the §1.752-7 liability partner's basis in the partnership interest is reduced by the §1.752-7 liability reduction (as defined in paragraph (b)(7) of this section). This rule applies before section 737. No deduction, loss, or capital expense is allowed to the partnership on the satisfaction of the §1.752-7 liability (within the meaning of paragraph (b)(8) of this section) to the extent of the remaining built-in loss associated with the §1.752-7 liability (as defined in paragraph (b)(6) of this section). For purposes of section 705(a)(2)(B) and §1.704-1(b)(2)(ii)(b) only, the remaining built-in loss associated with the §1.752-7 liability is not treated as a nondeductible, noncapital expenditure of the partnership. Therefore, the remaining

partners' capital accounts and bases in their partnership interests are not reduced by the remaining built-in loss associated with the §1.752-7 liability. If the partnership (or any successor) notifies the §1.752-7 liability partner of the satisfaction of the §1.752-7 liability, then the §1.752-7 liability partner is entitled to a loss or deduction. The amount of that deduction or loss is, in the case of a partial satisfaction of the §1.752-7 liability, the amount that the partnership would, but for this section, take into account on the partial satisfaction of the §1.752-7 liability (but not, in total, more than the §1.752-7 liability reduction) or, in the case of a complete satisfaction of the §1.752-7 liability, the remaining §1.752-7 liability reduction. To the extent of the amount that the partnership would, but for this section, take into account on satisfaction of the §1.752-7 liability, the character of that deduction or loss is determined as if the §1.752-7 liability partner had satisfied the liability. To the extent that the §1.752-7 liability reduction exceeds the amount that the partnership would, but for this section, take into account on satisfaction of the §1.752-7 liability, the character of the §1.752-7 liability partner's loss is capital.

(2) *Example.* The following example illustrates the provision of this paragraph (f):

*Example.* (i) *Facts.* In 2004, A, B, and C form partnership PRS. A contributes Property 1 with a fair market value and basis of \$5,000,000 subject to a §1.752-7 liability of \$2,000,000 for a 25% interest in PRS. B contributes \$3,000,000 cash for a 25% interest in PRS, and C contributes \$6,000,000 cash for a 50% interest in PRS. In 2012, when PRS has a section 754 election in effect, PRS distributes Property 2, which has a basis and fair market value of \$3,000,000, to A in liquidation of A's PRS interest. At the time of the distribution, the fair market value of A's PRS interest is still \$3,000,000, the basis of that interest is still \$5,000,000, and the remaining built-in loss associated with the §1.752-7 liability is still \$2,000,000. Assume that none of the exceptions of paragraph (d)(2) of this section apply to the distribution and that the satisfaction of the §1.752-7 liability would have given rise to a deductible expense to A. In 2013, PRS pays \$1,000,000 to satisfy the entire §1.752-7 liability.

			B
			C

(ii) *Liquidation of A's PRS interest.* Immediately before the distribution of Property 2 to A, A's basis in the PRS interest is reduced (to \$3,000,000) by the §1.752-7 liability reduction, i.e., the lesser of the excess of A's basis in the PRS interest (\$5,000,000) over the adjusted value (\$3,000,000) of that interest (\$2,000,000) or the remaining built-in loss as-

sociated with the §1.752-7 liability (\$2,000,000). Therefore, A's basis in Property 2 under section 732(b) is \$3,000,000. Because this is the same as the partnership's basis in Property 2 immediately before the distribution, the partnership's basis adjustment under section 734(b) is \$0.

Computation of §1.752-7 Liability Reduction (in millions)

1. Basis of A's PRS interest	\$5
2. Less adjusted value of A's PRS interest	(3)
3. Difference	\$2
4. Remaining built-in loss	
from §1.752-7 liability	2
5. §1.752-7 liability reduction	
(lesser of 3 or 4)	\$2

(iii) *Satisfaction of §1.752-7 liability.* PRS is not entitled to a deduction, loss, or capital expense on the satisfaction of the §1.752-7 liability to the extent of the remaining built-in loss associated with the §1.752-7 liability (\$2,000,000). Because this amount exceeds the amount paid by PRS to satisfy the §1.752-7 liability (\$1,000,000), PRS is not entitled to

any deduction for the §1.752-7 liability in 2013. If, however, PRS notifies A of the satisfaction of the §1.752-7 liability, A is entitled to an ordinary deduction in 2013 of \$1,000,000 (the amount paid in satisfaction of the §1.752-7 liability) and a capital loss of \$1,000,000 (the remaining §1.752-7 liability reduction).

PRS's Deduction on Satisfaction of Liability (in millions)

Amount paid by PRS to satisfy §1.752-7 liability	\$1
Remaining built-in loss for §1.752-7 liability	(2)
Difference (but not below zero)	\$0

(g) *Assumption of §1.752-7 liability by a partner other than §1.752-7 liability partner—(1) In general.* If this paragraph (g) applies, section 704(c)(1)(B) does not

apply to an assumption of a §1.752-7 liability from a partnership by a partner other than the §1.752-7 liability partner. The rules of paragraph (g)(2) of

this section apply only if the §1.752-7 liability partner is a partner in the partnership at the time of the assumption of the §1.752-7 liability from the partnership. The rules of paragraphs (g)(3) and (4) of this section apply to any assumption of the §1.752-7 liability by a partner other than the §1.752-7 liability partner, whether or not the §1.752-7 liability partner is a partner in the partnership at the time of the assumption from the partnership.

(2) *Consequences to §1.752-7 liability partner.* If, at the time of an assumption of a §1.752-7 liability from a partnership by a partner other than the §1.752-7 liability partner, the §1.752-7 liability partner remains a partner in the partnership, then the §1.752-7 liability partner's basis in the partnership interest is reduced by the §1.752-7 liability reduction (as defined in paragraph (b)(7) of this section). If the assuming partner (or any successor) notifies the §1.752-7 liability partner of the satisfaction of the §1.752-7 liability (within the meaning of paragraph (b)(8) of this section), then the §1.752-7 liability partner is entitled to a deduction or loss. The amount of that deduction or loss is, in the case of a partial satisfaction of the §1.752-7 liability, the amount that the assuming partner would, but for this section, take into account on the satisfaction of the §1.752-7 liability (but not, in total, more than the §1.752-7 liability reduction) or, in the case of a complete satisfaction of the §1.752-7 liability, the remaining §1.752-7 liability reduction. To the extent of the amount that the assuming partner would, but for this section, take into account on the satisfaction of the §1.752-7 liability, the character of that deduction or loss is determined as if the §1.752-7 liability partner had satisfied the liability. To the extent that the §1.752-7 liability reduction exceeds the amount that the assuming partner would, but for this section, take into account on the satisfaction of the §1.752-7 liability, the character of the §1.752-7 liability partner's loss is capital.

(3) *Consequences to partnership.* Immediately after the assumption of the §1.752-7 liability from the partnership by a partner other than the §1.752-7 liability partner, the partnership must

reduce the basis of partnership assets by the remaining built-in loss associated with the §1.752-7 liability (as defined in paragraph (b)(6) of this section). The reduction in the basis of partnership assets must be allocated among partnership assets as if that adjustment were a basis adjustment under section 734(b).

(4) *Consequences to assuming partner.* No deduction, loss, or capital expense is allowed to an assuming partner (other than the §1.752-7 liability partner) on the satisfaction of the §1.752-7 liability assumed from a partnership to the extent of the remaining built-in loss associated with the §1.752-7 liability. Instead, upon the satisfaction of the §1.752-7 liability, the assuming partner must adjust the basis of the partnership interest, any assets (other than cash, accounts receivable, or inventory) distributed by the partnership to the partner, or gain or loss on the disposition of the partnership interest, as the case may be. These adjustments are determined as if the assuming partner's basis in the partnership interest at the time of the assumption were increased by the lesser of the amount paid (or to be paid) to satisfy the §1.752-7 liability or the remaining built-in loss associated with the §1.752-7 liability. However, the assuming partner cannot take into account any adjustments to depreciable basis, reduction in gain, or increase in loss until the satisfaction of the §1.752-7 liability.

(5) *Example.* The following example illustrates the provisions of this paragraph (g):

*Example.* (i) *Facts.* In 2004, A, B, and C form partnership PRS. A contributes Property 1, a nondepreciable capital asset with a fair market value and basis of \$5,000,000, in exchange for a 25% interest in PRS and assumption by PRS of a §1.752-7 liability of \$2,000,000. B contributes \$3,000,000 cash for a 25% interest in PRS, and C contributes \$6,000,000 cash for a 50% interest in PRS. PRS uses the cash contributed to purchase Property 2. In 2007, PRS distributes Property 1, subject to the §1.752-7 liability to B in liquidation of B's interest in PRS. At the time of the distribution, A's interest in PRS still has a value of \$3,000,000 and a basis of \$5,000,000, and B's interest in PRS still has a value and basis of \$3,000,000. Also at that time, Property 1 still has a value and basis of \$5,000,000, Property 2 still

**§ 1.752-7**

**26 CFR Ch. I (4-1-14 Edition)**

has a value and basis of \$9,000,000, and the remaining built-in loss associated with the §1.752-7 liability still is \$2,000,000. Assume that none of the exceptions of paragraph (d)(2)(i) of this section apply to the assumption of the §1.752-7 liability by B and that

the satisfaction of the §1.752-7 liability by A would have given rise to a deductible expense to A. In 2010, B pays \$1,000,000 to satisfy the entire §1.752-7 liability. At that time, B still owns Property 1, which has a basis of \$3,000,000.

PRS Balance Sheet (in millions)

<u>Assets</u>		<u>Liabilities/Equity</u>	
<u>Value</u>	<u>Basis</u>	<u>Value</u>	<u>Basis</u>
\$5	\$5	Property 1	
\$9	\$9	Property 2	
		\$2	-
			\$1.752-7 Liability
			Partner's Equity:
		\$3	\$5
			A
		\$3	\$3
			B
		\$6	\$6
			C

(ii) *Assumption of § 1.752-7 liability by B.* Section 704(c)(1)(B) does not apply to the assumption of the §1.752-7 liability by B. Instead, A's basis in the PRS interest is reduced (to \$3,000,000) by the §1.752-7 liability reduction, *i.e.*, the lesser of the excess of A's basis in the PRS interest (\$5,000,000) over the adjusted value (\$3,000,000) of that interest (\$2,000,000), or the remaining built-in loss associated with the §1.752-7 liability as of the time of the assumption (\$2,000,000). PRS's

basis in Property 2 is reduced (to \$7,000,000) by the \$2,000,000 remaining built-in loss associated with the §1.752-7 liability. B's basis in Property 1 under section 732(b) is \$3,000,000 (B's basis in the PRS interest). This is \$2,000,000 less than PRS's basis in Property 1 before the distribution of Property 1 to B. If PRS has a section 754 election in effect for 2007, PRS may increase the basis of Property 2 under section 734(b) by \$2,000,000.

§ 1.752-7 Liability Reduction (in millions)

1. Basis of A's PRS interest	\$5
2. Less adjusted value of A's PRS interest	(3)
3. Difference	\$2
4. Remaining built-in loss from §1.752-7 liability	<u>2</u>
5. §1.752-7 liability reduction (lesser of 3 or 4)	\$2

A's Basis in PRS after Assumption by B (in millions)

1. Basis before assumption	\$5
2. Less §1.752-7 liability reduction	(2)
3. Basis after assumption	\$3

PRS's Basis in Property 2 after Assumption by B (in millions)

1. Basis before assumption	\$9
2. Less remaining built-in loss from §1.752-7 liability	(2)
3. Plus section 734(b) adjustment (if partnership has a section 754 election)	<u>2</u>
4. Basis after assumption	\$9

(iii) *Satisfaction of § 1.752-7 liability.* B is not entitled to a deduction on the satisfaction of the § 1.752-7 liability in 2010 to the extent of the remaining built-in loss associated with the § 1.752-7 liability (\$2,000,000). As this amount exceeds the amount paid by B to satisfy the § 1.752-7 liability, B is not entitled to any deduction on the satisfaction of the § 1.752-7 liability in 2010. B may, however, increase the basis of Property 1 by the lesser of the remaining built-in loss associated with the § 1.752-7 liability (\$2,000,000) or the amount paid to satisfy the § 1.752-7 liability (\$1,000,000). Therefore, B's basis in Property 1 is increased to \$4,000,000. If B notifies A of the satisfaction of the § 1.752-7 liability, then A is entitled to an ordinary deduction in 2010 of \$1,000,000 (the amount paid in satisfaction of the § 1.752-7 liability) and a capital loss of \$1,000,000 (the remaining § 1.752-7 liability reduction).

(h) *Notification by the partnership (or successor) of the satisfaction of the*

*§ 1.752-7 liability.* For purposes of paragraphs (e), (f), and (g) of this section, notification by the partnership (or successor) of the satisfaction of the § 1.752-7 liability must be attached to the § 1.752-7 liability partner's return (whether an original or an amended return) for the year in which the loss is being claimed and must include—

(1) The amount paid in satisfaction of the § 1.752-7 liability, and whether the amounts paid were in partial or complete satisfaction of the § 1.752-7 liability;

(2) The name and address of the person satisfying the § 1.752-7 liability;

(3) The date of the payment on the § 1.752-7 liability; and

(4) The character of the loss to the § 1.752-7 liability partner with respect to the § 1.752-7 liability.

(i) *Special rule for amounts that are capitalized prior to the occurrence of an event described in paragraphs (e), (f), or (g)—(1) In general.* If all or a portion of a § 1.752-7 liability is properly capitalized (capitalized basis) prior to an event described in paragraph (e), (f), or (g) of this section, then, before an event described in paragraph (e), (f), or

## § 1.752-7

## 26 CFR Ch. I (4-1-14 Edition)

(g) of this section, the partnership may take the capitalized basis into account for purposes of computing cost recovery and gain or loss on the sale of the asset to which the basis has been capitalized (and for any other purpose for which the basis of the asset is relevant), but after an event described in paragraph (e), (f), or (g) of this section, the partnership may not take any remaining capitalized basis into account for tax purposes.

(2) *Example.* The following example illustrates the provisions of this paragraph (i):

*Example.* (i) *Facts.* In 2004, A and B form partnership PRS. A contributes Property 1, a nondepreciable capital asset, with a fair market value and basis of \$5,000,000, in exchange for a 25% interest in PRS and an assumption by PRS of a §1.752-7 liability of

\$2,000,000. B contributes \$9,000,000 in cash in exchange for a 75% interest in PRS. PRS uses \$7,000,000 of the cash to purchase Property 2, also a nondepreciable capital asset. In 2007, when PRS's assets have not changed, PRS satisfies the §1.752-7 liability by paying \$2,000,000. Assume that PRS is required to capitalize the cost of satisfying the §1.752-7 liability. In 2008, A sells his interest in PRS to C for \$3,000,000. At the time of the sale, the basis of A's interest is still \$5,000,000.

(ii) *Analysis.* On the sale of A's interest to C, A realizes a loss of \$2,000,000 on the sale of the PRS interest (the excess of \$5,000,000, the basis of the partnership interest, over \$3,000,000, the amount realized on sale). The remaining built-in loss associated with the §1.752-7 liability at that time is zero because all of the §1.752-7 liability as of the time of the assumption of the §1.752-7 liability by the partnership was capitalized by the partnership. The partnership may not take any remaining capitalized basis into account for tax purposes.

### Gain/Loss on Sale of A's PRS Interest (in millions)

1.	Amount realized on sale	\$3
2.	Less basis of PRS interest	
	Original Basis	\$5
	§1.752-7 liability reduction	\$0
	Difference	<u>(\$5)</u>
3.	Gain/Loss	<u>(\$2)</u>

(iii) *Partial Satisfaction.* Assume that, prior to the sale of A's interest in PRS to C, PRS had paid \$1,500,000 to satisfy a portion of the §1.752-7 liability. Therefore, immediately before the sale of the PRS interest to C, A's basis in the PRS interest would be reduced (to \$4,500,000) by the \$500,000 remaining built-in loss associated with the §1.752-7 liability (\$2,000,000 less the \$1,500,000 portion capitalized by the partnership as that time). On the sale of the PRS interest, A realizes a loss of \$1,500,000 (the excess of \$4,500,000, the basis of the PRS interest, over \$3,000,000, the amount

realized on the sale). Neither PRS nor any of its partners is entitled to a deduction, loss, or capital expense upon the satisfaction of the §1.752-7 liability to the extent of the remaining built-in loss associated with the §1.752-7 liability (\$500,000). If PRS notifies A of the satisfaction of the remaining portion of the §1.752-7 liability, then A is entitled to a deduction or loss of \$500,000 (the remaining §1.752-7 liability reduction). The partnership may not take any remaining capitalized basis into account for tax purposes.

Gain/Loss on Sale of A's PRS Interest (in millions)

1. Amount realized on sale	\$3
2. Less basis of PRS interest	
Original Basis	\$5
§1.752-7 liability reduction	<u>(\$0.5)</u>
Difference	<u>(\$4.5)</u>
3. Gain/Loss	<u>(\$1.5)</u>

(j) *Tiered partnerships*—(1) *Look-through treatment*. For purposes of this section, a contribution by a partner of an interest in a partnership (lower-tier partnership) to another partnership (upper-tier partnership) is treated as a contribution by the partner of the partner's share of each of the lower-tier partnership's assets and an assumption by the upper-tier partnership of the partner's share of the lower-tier partnership's liabilities (including §1.752-7 liabilities). See paragraph (e)(3)(ii) *Example 1* of this section. In addition, a partnership is treated as having its share of any §1.752-7 liabilities of the partnerships in which it has an interest.

(2) *Trade or business exception*. If a partnership (upper-tier partnership) assumes a §1.752-7 liability of a partner, and, subsequently, another partnership (lower-tier partnership) assumes that §1.752-7 liability from the upper-tier partnership, then the §1.752-7 liability is treated as associated only with any trade or business contributed to the upper-tier partnership by the §1.752-7 liability partner. The same rule applies where a partnership assumes a §1.752-7 liability of a partner, and, subsequently, the §1.752-7 liability partner transfers that partnership interest to another partnership. See paragraph (e)(3)(ii) *Example 1* of this section.

(3) *Partnership as a §1.752-7 liability partner*. If a transaction described in paragraph (e), (f), or (g) of this section occurs with respect to a partnership (upper-tier partnership) that is a §1.752-7 liability partner of another partnership (lower-tier partnership), then such transaction will also be treated as a transaction described in paragraph (e), (f), or (g) of this section, as appropriate, with respect to the partners of the upper-tier partnership,

regardless of whether the upper-tier partnership assumed the §1.752-7 liability from those partners. (See paragraph (b)(5) of this section for rules relating to the treatment of transactions by the partners of the upper-tier partnership). In such a case, each partner's share of the §1.752-7 liability reduction in the upper-tier partnership is equal to that partner's share of the §1.752-7 liability. The partners of the upper-tier partnership at the time of the transaction described in paragraph (e), (f), or (g) of this section, and not the upper-tier partnership, are entitled to the deduction or loss on the satisfaction of the §1.752-7 liability. Similar principles apply where the upper-tier partnership is itself owned by one or a series of partnerships. This paragraph does not apply to the extent that §1.752-7(j)(4) applied to the assumption of the §1.752-7 liability by the lower-tier partnership.

(4) *Transfer of §1.752-7 liability by partnership to another partnership or corporation after a transaction described in paragraph (e), (f), or (g)*—(i) *In general*. If, after a transaction described in paragraph (e), (f), or (g) of this section with respect to a §1.752-7 liability assumed by a partnership (the upper-tier partnership), another partnership or a corporation assumes the §1.752-7 liability from the upper-tier partnership (or the assuming partner) in a transaction in which the basis of property is determined, in whole or in part, by reference to the basis of the property in the hands of the upper-tier partnership (or assuming partner), then—

(A) The upper-tier partnership (or assuming partner) must reduce its basis in any corporate stock or partnership interest received by the remaining built-in loss associated with the §1.752-

## § 1.752-7

## 26 CFR Ch. I (4-1-14 Edition)

7 liability, at the time of the transaction described in paragraph (e), (f), or (g) of this section (but the partners of the upper-tier partnership do not reduce their bases or capital accounts in the upper-tier partnership); and

(B) No deduction, loss, or capital expense is allowed to the assuming partnership or corporation on the satisfaction of the § 1.752-7 liability to the extent of the remaining built-in loss associated with the § 1.752-7 liability.

(ii) *Subsequent transfers.* Similar rules apply to subsequent assumptions of the § 1.752-7 liability in transactions in which the basis of property is determined, in whole or in part, by reference to the basis of the property in the hands of the transferor. If, subsequent to an assumption of the § 1.752-7 liability by a partnership in a transaction to which paragraph (j)(4)(i) of this section applies, the § 1.752-7 liability is assumed from the partnership by a partner other than the partner from whom the partnership assumed the § 1.752-7 liability, then the rules of paragraph (g) of this section apply.

(5) *Example.* The following example illustrates the provisions of paragraphs (j)(3) and (4) of this section:

*Example.* (i) *Assumption of § 1.752-7 liability by UTP and transfer of § 1.752-7 liability partner's interest in UTP.* In 2004, A, B, and C form partnership UTP. A contributes Property 1 with a fair market value and basis of \$5,000,000 subject to a § 1.752-7 liability of \$2,000,000 in exchange for a 25% interest in UTP. B contributes \$3,000,000 cash in exchange for a 25% interest in UTP, and C contributes \$6,000,000 cash in exchange for a 50% interest in UTP. UTP invests the \$9,000,000 cash in Property 2. In 2006, A sells A's interest in UTP to D for \$3,000,000. At the time of the sale, the basis of A's UTP interest is \$5,000,000, the remaining built-in loss associated with the § 1.752-7 liability is \$2,000,000, and UTP has no liabilities other than the § 1.752-7 liabilities assumed from A. Assume that none of the exceptions of paragraph (d)(2) of this section apply and that the satisfaction of the § 1.752-7 liability would give rise to a deductible expense to A and to UTP. Under paragraph (e) of this section, immediately before the sale of the UTP interest to D, A's basis in UTP is reduced to \$3,000,000 by the \$2,000,000 § 1.752-7 liability reduction. Therefore, A neither realizes nor recognizes any gain or loss on the sale of the UTP interest to D. D's basis in the UTP interest is \$3,000,000.

### UTP Balance Sheet Prior to A's Sale (in millions)

<u>Assets</u>			<u>Liabilities/Equity</u>	
<u>Value</u>	<u>Basis</u>		<u>Value</u>	<u>Basis</u>

	§ 1.752-7 liability reduction	(\$2)
	Difference	(\$3)
3.	Gain/Loss	\$0

# Internal Revenue Service, Treasury

# § 1.752-7

(ii) *Assumption of §1.752-7 liability by LTP from UTP.* In 2008, at a time when the estimated amount of the §1.752-7 liability has increased to \$3,500,000, UTP contributes Property 1 and Property 2, subject to the §1.752-7 liability, to LTP in exchange for a 50% interest in LTP. At the time of the contribution, Property 1 still has a value and basis of \$5,000,000 and Property 2 still has a value and basis of \$9,000,000. UTP's basis in LTP under section 722 is \$14,000,000. Under paragraph (j)(4)(i) of this section, UTP must reduce its basis in LTP by the \$2,000,000 remaining built-in loss associated with the §1.752-7 liability (as of the time of the sale of the UTP interest by A). The partners in UTP are not required to reduce their bases in UTP by this

amount. UTP is a §1.752-7 liability partner of LTP with respect to the entire \$3,500,000 §1.752-7 liability assumed by LTP. However, as A is no longer a partner of UTP, none of the partners of UTP (as of the time of the assumption of the §1.752-7 liability by LTP) are §1.752-7 liability partners of LTP with respect to the \$2,000,000 remaining built-in loss associated with the §1.752-7 liability (as of the time of the sale of the UTP interest by A). The UTP partners (as of the time of the assumption of the §1.752-7 liability by LTP) are §1.752-7 liability partners of LTP with respect to the \$1,500,000 increase in the amount of the §1.752-7 liability of UTP since the assumption of that §1.752-7 liability by UTP from A.

## UTP Balance Sheet Immediately Before Contribution to LTP (in millions)

<u>Assets</u>		<u>Liabilities/Equity</u>		
<u>Value</u>	<u>Basis</u>	<u>Value</u>	<u>Basis</u>	
\$5	\$5			Property 1
\$9	\$9			Property 2
				\$1.752-7 Liability
		\$2		Assumed from A
		<u>\$1.5</u>		Additional
		\$3.5		Total
				Partner's Equity:
		\$2.625	\$3	D (25%)
		\$2.625	\$3	B (25%)
		<u>\$5.25</u>	<u>\$6</u>	C (50%)
		\$10.5	\$12	Total Equity

## UTP's Basis in LTP Immediately After Contribution (in millions)

1. Basis in assets	\$14
2. Less remaining built-in loss at time of A's sale	<u>(\$ 2)</u>
3. UTP's basis in LTP	\$12

(iii) *Sale by UTP of LTP interest.* In 2010, UTP sells its interest in LTP to E for \$10,500,000. At the time of the sale, the LTP interest still has a value of \$10,500,000 and a basis of \$12,000,000, and the remaining built-in loss associated with the §1.752-7 liability is \$3,500,000. Under paragraph (e) of this section, immediately before the sale, UTP must reduce its basis in the LTP interest by the §1.752-7 liability reduction. Under paragraph (a)(4) of this section, the remaining built-in loss associated with the §1.752-7 liability is \$1,500,000 (remaining built-in loss associated with the §1.752-7 liability, \$3,500,000, reduced by the amount of the §1.752-7 liability taken

into account under paragraph (j)(4) of this section, \$2,000,000). The difference between the basis of the LTP interest held by UTP (\$12,000,000) and the adjusted value of that interest (\$10,500,000) is also \$1,500,000. Therefore, the §1.752-7 liability reduction is \$1,500,000 and UTP's basis in the LTP interest must be reduced to \$10,500,000. In addition, UTP's partners must reduce their bases in their UTP interests by their proportionate shares of the §1.752-7 liability reduction. Thus, the basis of each of B's and D's interest in UTP must be reduced by \$375,000 and

# § 1.752-7

# 26 CFR Ch. I (4-1-14 Edition)

the basis of C's interest in UTP must be reduced by \$750,000. In 2011, D sells the UTP interest to F.

## Computation of §1.752-7 Liability Reduction (in millions)

1. Basis of UTP's LTP interest	\$12
2. Less adjusted value of UTP's LTP interest	(\$10.5)
3. Difference between 1 and 2	\$ 1.5
4. Remaining built-in loss from §1.752-7 liability	\$ 1.5
5. §1.752-7 liability reduction (lesser of 3 or 4)	\$ 1.5

## Gain/Loss on Sale of UTP's PRS Interest to E (in millions)

1. Amount realized on sale	\$10.5
2. Less basis of PRS interest	
Original	\$12
§1.752-7 liability reduction	(\$ 1.5)
Difference	(\$10.5)
3. Gain/Loss	\$ 0

## Partner's Bases in UTP Interests after Sale of LTP Interest (in millions)

	B	C	D
Basis prior to sale	\$3	\$6	\$3
Share of §1.752-7 liability			
Reduction	(\$0.375)	(\$0.75)	(\$0.375)
Basis after sale	\$2.625	\$5.25	\$2.625

(iv) *Deduction, expense, or loss associated with the §1.752-7 liability by LTP.* In 2012, LTP pays \$3,500,000 to satisfy the §1.752-7 liability. Under paragraphs (e) and (j)(4) of this section, LTP is not entitled to any deduction with respect to the §1.752-7 liability. Under paragraph (j)(3) of this section, UTP also is not entitled to any deduction with respect to the §1.752-7 liability. If LTP notifies A, B, C and D of the satisfaction of the §1.752-7 liability, then A is entitled to a deduction in 2012 of \$2,000,000, B and D are each entitled to deductions in 2012 of \$375,000, and C is entitled to a deduction in 2012 of \$750,000.

(k) *Effective dates—(1) In general.* This section applies to §1.752-7 liability transfers occurring on or after June 24, 2003. For assumptions occurring after October 18, 1999, and before June 24, 2003, see §1.752-6. For §1.752-7 liability transfers occurring on or after June 24, 2003 and before May 26, 2005, taxpayers may rely on the exception for trading and investment partnerships in paragraph (b)(8)(ii) of §1.752.7 (2003-28 I.R.B. 46; 68 FR 37434).

(2) *Election to apply this section to assumptions of liabilities occurring after October 18, 1999 and before June 24, 2003—(i) In general.* A partnership may elect to apply this section to all assumptions of liabilities (including §1.752-7 liabilities) occurring after October 18, 1999, and before June 24, 2003. Such an election is binding on the partnership and all of its partners. A partnership making such an election must apply all of the provisions of §1.752-1 and §1.752-7, including §1.358-5T, §1.358-7, §1.704-1(b)(1)(ii) and (b)(2)(iv)(b), §1.704-2(b)(3), §1.704-3(a)(7), (a)(8)(iv), and (a)(12), §1.704-4(d)(1)(iv), §1.705-1(a)(8), §1.732-2(d)(3)(iv), and §1.737-5.

(ii) *Manner of making election.* A partnership makes an election under this paragraph (k)(2) by attaching the following statement to its timely filed return: [Insert name and employer identification number of electing partnership] elects under §1.752-7 of the Income Tax Regulations to be subject to

the rules of § 1.358-5T, § 1.358-7, § 1.704-1(b)(1)(ii) and (b)(2)(iv)(b), § 1.704-2(b)(3), § 1.704-3(a)(7), (a)(8)(iv), and (a)(12), § 1.704-4(d)(1)(iv), § 1.705-1(a)(8), § 1.732-2(d)(3)(iv), and § 1.737-5 with respect to all liabilities (including § 1.752-7 liabilities) assumed by the partnership after October 18, 1999 and before June 24, 2003. In the statement, the partnership must list, with respect to each liability (including each § 1.752-7 liability) assumed by the partnership after October 18, 1999 and before June 24, 2003—

(A) The name, address, and taxpayer identification number of the partner from whom the liability was assumed;

(B) The date on which the liability was assumed by the partnership;

(C) The amount of the liability as of the time of its assumption; and

(D) A description of the liability.

(iii) *Filing of amended returns.* An election under this paragraph (k)(2) will be valid only if the partnership and its partners promptly amend any returns for open taxable years that would be affected by the election.

(iv) *Time for making election.* An election under this paragraph (k)(2) must be filed with any timely filed Federal income tax return filed by the partnership on or after September 24, 2003 and on or before December 31, 2005.

[T.D. 9207, 70 FR 30344, May 26, 2005; 70 FR 39654, July 11, 2005]

#### § 1.753-1 Partner receiving income in respect of decedent.

(a) *Income in respect of a decedent under section 736(a).* All payments coming within the provisions of section 736(a) made by a partnership to the estate or other successor in interest of a deceased partner are considered income in respect of the decedent under section 691. The estate or other successor in interest of a deceased partner shall be considered to have received income in respect of a decedent to the extent that amounts are paid by a third person in exchange for rights to future payments from the partnership under section 736(a). When a partner who is receiving payments under section 736(a) dies, section 753 applies to any remaining payments under section 736(a) made to his estate or other successor in interest.

(b) *Other income in respect of a decedent.* When a partner dies, the entire portion of the distributive share which is attributable to the period ending with the date of his death and which is taxable to his estate or other successor constitutes income in respect of a decedent under section 691. This rule applies even though that part of the distributive share for the period before death which the decedent withdrew is not included in the value of the decedent's partnership interest for estate tax purposes. See paragraph (c) (3) of § 1.706-1.

(c) *Example.* The provisions of this section may be illustrated by the following example:

*Example.* A and the decedent B were equal partners in a business having assets (other than money) worth \$40,000 with an adjusted basis of \$10,000. Certain partnership business was well advanced towards completion before B's death and, after B's death but before the end of the partnership year, payment of \$10,000 was made to the partnership for such work. The partnership agreement provided that, upon the death of one of the partners, all partnership property, including unfinished work, would pass to the surviving partner, and that the surviving partner would pay the estate of the decedent the undrawn balance of his share of partnership earnings to the date of death, plus \$10,000 in each of the three years after death. B's share of earnings to the date of his death was \$4,000, of which he had withdrawn \$3,000. B's distributive share of partnership income of \$4,000 to the date of his death is income in respect of a decedent (although only the \$1,000 undrawn at B's death will be reflected in the value of B's partnership interest on B's estate tax return). Assume that the value of B's interest in partnership property at the date of his death was \$22,000, composed of the following items: B's one-half share of the assets of \$40,000, plus \$2,000, B's interest in partnership cash. It should be noted that B's \$1,000 undrawn share of earnings to the date of his death is not a separate item but will be paid from partnership assets. Under the partnership agreement, A is to pay B's estate a total of \$31,000. The difference of \$9,000 between the amount to be paid by A (\$31,000) and the value of B's interest in partnership property (\$22,000) comes within section 736(a) and, thus, also constitutes income in respect of a decedent. (However, the \$17,000 difference between the \$5,000 basis for B's share of the partnership property and its \$22,000 value at the date of his death does not constitute income in respect of a decedent.) If, before the close of the partnership taxable year, A pays B's estate \$11,000, of which they

agree to allocate \$3,000 as the payment under section 736(a), B's estate will include \$7,000 in its gross income (B's \$4,000 distributive share plus \$3,000 payment under section 736(a)). In computing the deduction under section 691(c), this \$7,000 will be considered as the value for estate tax purposes of such income in respect of a decedent, even though only \$4,000 (\$1,000 of distributive share not withdrawn, plus \$3,000, payment under section 736(a)) of this amount can be identified on the estate tax return as part of the partnership interest.

(d) *Effective date.* The provisions of section 753 apply only in the case of payments made with respect to decedents whose death occurred after December 31, 1954. See section 771(b)(4) and paragraph (b)(4) of § 1.771-1.

**§ 1.754-1 Time and manner of making election to adjust basis of partnership property.**

(a) *In general.* A partnership may adjust the basis of partnership property under sections 734(b) and 743(b) if it files an election in accordance with the rules set forth in paragraph (b) of this section. An election may not be filed to make the adjustments provided in either section 734(b) or section 743(b) alone, but such an election must apply to both sections. An election made under the provisions of this section shall apply to all property distributions and transfers of partnership interests taking place in the partnership taxable year for which the election is made and in all subsequent partnership taxable years unless the election is revoked pursuant to paragraph (c) of this section.

(b) *Time and method of making election.* (1) An election under section 754 and this section to adjust the basis of partnership property under sections 734(b) and 743(b), with respect to a distribution of property to a partner or a transfer of an interest in a partnership, shall be made in a written statement filed with the partnership return for the taxable year during which the distribution or transfer occurs. For the election to be valid, the return must be filed not later than the time prescribed by paragraph (e) of § 1.6031-1 (including extensions thereof) for filing the return for such taxable year (or before August 23, 1956, whichever is later). Notwithstanding the preceding two sentences,

if a valid election has been made under section 754 and this section for a preceding taxable year and not revoked pursuant to paragraph (c) of this section, a new election is not required to be made. The statement required by this subparagraph shall (i) set forth the name and address of the partnership making the election, (ii) be signed by any one of the partners, and (iii) contain a declaration that the partnership elects under section 754 to apply the provisions of section 734(b) and section 743(b). For rules regarding extensions of time for filing elections, see § 1.9100-1.

(2) The principles of this paragraph may be illustrated by the following example:

*Example.* A, a U.S. citizen, is a member of partnership ABC, which has not previously made an election under section 754 to adjust the basis of partnership property. The partnership and the partners use the calendar year as the taxable year. A sells his interest in the partnership to D on January 1, 1971. The partnership may elect under section 754 and this section to adjust the basis of partnership property under sections 734(b) and 743(b). Unless an extension of time to make the election is obtained under the provisions of § 1.9100-1, the election must be made in a written statement filed with the partnership return for 1971 and must contain the information specified in subparagraph (1) of this paragraph. Such return must be filed by April 17, 1972 (unless an extension of time for filing the return is obtained). The election will apply to all distributions of property to a partner and transfers of an interest in the partnership occurring in 1971 and subsequent years, unless revoked pursuant to paragraph (c) of this section.

(c) *Revocation of election.*—(1) *In general.* A partnership having an election in effect under this section may revoke such election with the approval of the district director for the internal revenue district in which the partnership return is required to be filed. A partnership which wishes to revoke such an election shall file with the district director for the internal revenue district in which the partnership return is required to be filed an application setting forth the grounds on which the revocation is desired. The application shall be filed not later than 30 days after the close of the partnership taxable year with respect to which revocation is intended to take effect and shall

be signed by any one of the partners. Examples of situations which may be considered sufficient reason for approving an application for revocation include a change in the nature of the partnership business, a substantial increase in the assets of the partnership, a change in the character of partnership assets, or an increased frequency of retirements or shifts of partnership interests, so that an increased administrative burden would result to the partnership from the election. However, no application for revocation of an election shall be approved when the purpose of the revocation is primarily to avoid stepping down the basis of partnership assets upon a transfer or distribution.

(2) *Revocations effective on December 15, 1999.* Notwithstanding paragraph (c)(1) of this section, any partnership having an election in effect under this section for its taxable year that includes December 15, 1999, may revoke such election effective for transfers or distributions occurring on or after December 15, 1999, by attaching a statement to the partnership's return for such year. For the revocation to be valid, the statement must be filed not later than the time prescribed by § 1.6031(a)-1(e) (including extensions thereof) for filing the return for such taxable year, and must set forth the name and address of the partnership revoking the election, be signed by any one of the partners who is authorized to sign the partnership's federal income tax return, and contain a declaration that the partnership revokes its election under section 754 to apply the provisions of section 734(b) and 743(b). In addition, the following statement must be prominently displayed in capital letters on the first page of the partnership's return for such year: "RETURN FILED PURSUANT TO § 1.754-1(c)(2)."

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7208, 37 FR 20686, Oct. 3, 1972; T.D. 8847, 64 FR 69916, Dec. 15, 1999; 65 FR 9220, Feb. 24, 2000]

#### § 1.755-1 Rules for allocation of basis.

(a) *In general*—(1) *Scope.* This section provides rules for allocating basis adjustments under sections 743(b) and 734(b) among partnership property. If

there is a basis adjustment to which this section applies, the basis adjustment is allocated among the partnership's assets as follows. First, the partnership must determine the value of each of its assets under paragraphs (a)(2) through (5) of this section. Second, the basis adjustment is allocated between the two classes of property described in section 755(b). These classes of property consist of capital assets and section 1231(b) property (capital gain property), and any other property of the partnership (ordinary income property). For purposes of this section, properties and potential gain treated as unrealized receivables under section 751(c) and the regulations thereunder shall be treated as separate assets that are ordinary income property. Third, the portion of the basis adjustment allocated to each class is allocated among the items within the class. Basis adjustments under section 743(b) are allocated among partnership assets under paragraph (b) of this section. Basis adjustments under section 734(b) are allocated among partnership assets under paragraph (c) of this section.

(2) *Coordination of sections 755 and 1060.* If there is a basis adjustment to which this section applies, and the assets of the partnership constitute a trade or business (as described in § 1.1060-1(b)(2)), then the partnership is required to use the residual method to assign values to the partnership's section 197 intangibles. To do so, the partnership must, first, determine the value of partnership assets other than section 197 intangibles under paragraph (a)(3) of this section. The partnership then must determine partnership gross value under paragraph (a)(4) of this section. Last, the partnership must assign values to the partnership's section 197 intangibles under paragraph (a)(5) of this section. For purposes of this section, the term *section 197 intangibles* includes all section 197 intangibles (as defined in section 197), as well as any goodwill or going concern value that would not qualify as a section 197 intangible under section 197.

(3) *Values of properties other than section 197 intangibles.* For purposes of this section, the fair market value of each item of partnership property other

than section 197 intangibles shall be determined on the basis of all the facts and circumstances, taking into account section 7701(g).

(4) *Partnership gross value*—(i) *Basis adjustments under section 743(b)*—(A) *In general.* Except as provided in paragraph (a)(4)(ii) of this section, in the case of a basis adjustment under section 743(b), partnership gross value generally is equal to the amount that, if assigned to all partnership property, would result in a liquidating distribution to the partner equal to the transferee's basis in the transferred partnership interest immediately following the relevant transfer (reduced by the amount, if any, of such basis that is attributable to partnership liabilities).

(B) *Special situations.* In certain circumstances, such as where income or loss with respect to particular section 197 intangibles are allocated differently among partners, partnership gross value may vary depending on the values of particular section 197 intangibles held by the partnership. In these special situations, the partnership must assign value, first, among section 197 intangibles (other than goodwill and going concern value) in a reasonable manner that is consistent with the ordering rule in paragraph (a)(5) of this section and would cause the appropriate liquidating distribution under paragraph (a)(4)(i)(A) of this section. If the actual fair market values, determined on the basis of all the facts and circumstances, of all section 197 intangibles (other than goodwill and going concern value) is not sufficient to cause the appropriate liquidating distribution, then the fair market value of goodwill and going concern value shall be presumed to equal an amount that if assigned to goodwill and going concern value would cause the appropriate liquidating distribution.

(C) *Income in respect of a decedent.* Solely for the purpose of determining partnership gross value under this paragraph (a)(4)(i), where a partnership interest is transferred as a result of the death of a partner, the transferee's basis in its partnership interest is determined without regard to section 1014(c), and is deemed to be adjusted for that portion of the interest, if any, that is attributable to items rep-

resenting income in respect of a decedent under section 691.

(ii) *Basis adjustments under section 743(b) resulting from substituted basis transactions.* This paragraph (a)(4)(ii) applies to basis adjustments under section 743(b) that result from exchanges in which the transferee's basis in the partnership interest is determined in whole or in part by reference to the transferor's basis in the interest or to the basis of other property held at any time by the transferee (substituted basis transactions). In the case of a substituted basis transaction, partnership gross value equals the value of the entire partnership as a going concern, increased by the amount of partnership liabilities at the time of the exchange giving rise to the basis adjustment.

(iii) *Basis adjustments under section 734(b).* In the case of a basis adjustment under section 734(b), partnership gross value equals the value of the entire partnership as a going concern immediately following the distribution causing the adjustment, increased by the amount of partnership liabilities immediately following the distribution.

(5) *Determining the values of section 197 intangibles*—(i) *Two classes.* If the aggregate value of partnership property other than section 197 intangibles (as determined in paragraph (a)(3) of this section) is equal to or greater than partnership gross value (as determined in paragraph (a)(4) of this section), then all section 197 intangibles are deemed to have a value of zero for purposes of this section. In all other cases, the aggregate value of the partnership's section 197 intangibles (the residual section 197 intangibles value) is deemed to equal the excess of partnership gross value over the aggregate value of partnership property other than section 197 intangibles. The residual section 197 intangibles value must be allocated between two asset classes in the following order—

(A) Among section 197 intangibles other than goodwill and going concern value; and

(B) To goodwill and going concern value.

(ii) *Values assigned to section 197 intangibles other than goodwill and going concern value.* The fair market value assigned to a section 197 intangible

(other than goodwill and going concern value) shall not exceed the actual fair market value (determined on the basis of all the facts and circumstances) of that asset on the date of the relevant transfer. If the residual section 197 intangibles value is less than the sum of the actual fair market values (determined on the basis of all the facts and circumstances) of all section 197 intangibles (other than goodwill and going concern value) held by the partnership, then the residual section 197 intangibles value must be allocated among the individual section 197 intangibles (other than goodwill and going concern value) as follows. The residual section 197 intangibles value is assigned first to any section 197 intangibles (other than goodwill and going concern value) having potential gain that would be treated as unrealized receivables under the flush language of section 751(c) (flush language receivables) to the extent of the basis of those section 197 intangibles and the amount of income arising from the flush language receivables that the partnership would recognize if the section 197 intangibles were sold for their actual fair market values (determined based on all the facts and circumstances) (collectively, the flush language receivables value). If the value assigned to section 197 intangibles (other than goodwill and going concern value) is less than the flush language receivables value, then the assigned value is allocated among the properties giving rise to the flush language receivables in proportion to the flush language receivables value in those properties. Any remaining residual section 197 intangibles value is allocated among the remaining portions of the section 197 intangibles (other than goodwill and going concern value) in proportion to the actual fair market values of such portions (determined based on all the facts and circumstances).

(iii) *Value assigned to goodwill and going concern value.* The fair market value of goodwill and going concern value is the amount, if any, by which the residual section 197 intangibles value exceeds the aggregate value of the partnership's section 197 intangibles (other than goodwill and going concern value).

(6) *Examples.* The provisions of paragraphs (a)(2) through (5) are illustrated by the following examples, which assume that the partnerships have an election in effect under section 754 at the time of the transfer and that the assets of each partnership constitute a trade or business (as described in § 1.1060-1(b)(2)). Except as provided, no partnership asset (other than inventory) is property described in section 751(a), and partnership liabilities are secured by all partnership assets. The examples are as follows:

*Example 1.* (i) A is the sole general partner in PRS, a limited partnership having three equal partners. PRS has goodwill and going concern value, two section 197 intangibles other than goodwill and going concern value (Intangible 1 and Intangible 2), and two other assets with fair market values (determined using all the facts and circumstances) as follows: inventory worth \$1,000,000 and a building (a capital asset) worth \$2,000,000. The fair market value of each of Intangible 1 and Intangible 2 is \$50,000. PRS has one liability of \$1,000,000, for which A bears the entire risk of loss under section 752 and the regulations thereunder. D purchases A's partnership interest for \$650,000, resulting in a basis adjustment under section 743(b). After the purchase, D bears the entire risk of loss for PRS's liability under section 752 and the regulations thereunder. Therefore, D's basis in its interest in PRS is \$1,650,000.

(ii) D's basis in the transferred partnership interest (reduced by the amount of such basis that is attributable to partnership liabilities) is \$650,000 (\$1,650,000—\$1,000,000). Under paragraph (a)(4)(i) of this section, partnership gross value is \$2,950,000 (the amount that, if assigned to all partnership property, would result in a liquidating distribution to D equal to \$650,000).

(iii) Under paragraph (a)(3) of this section, the inventory has a fair market value of \$1,000,000, and the building has a fair market value of \$2,000,000. Thus, the aggregate value of partnership property other than section 197 intangibles, \$3,000,000, is equal to or greater than partnership gross value, \$2,950,000. Accordingly, under paragraphs (a)(3) and (5) of this section, the value assigned to each of the partnership's assets is as follows: inventory, \$1,000,000; building, \$2,000,000; Intangibles 1 and 2, \$0; and goodwill and going concern value, \$0. D's section 743(b) adjustment must be allocated under paragraph (b) of this section using these assigned fair market values.

*Example 2.* (i) Assume the same facts as in *Example 1*, except that the fair market values of Intangible 1 and Intangible 2 are each \$300,000, and that D purchases A's interest in

PRS for \$1,000,000. After the purchase, D's basis in its interest in PRS is \$2,000,000.

(ii) D's basis in the transferred partnership interest (reduced by the amount of such basis that is attributable to partnership liabilities) is \$1,000,000 (\$2,000,000—\$1,000,000). Under paragraph (a)(4)(i) of this section, partnership gross value is \$4,000,000 (the amount that, if assigned to all partnership property, would result in a liquidating distribution to D equal to \$1,000,000).

(iii) Under paragraph (a)(5) of this section, the residual section 197 intangibles value is \$1,000,000 (the excess of partnership gross value, \$4,000,000, over the aggregate value of assets other than section 197 intangibles, \$3,000,000 (the sum of the value of the inventory, \$1,000,000, and the value of the building, \$2,000,000)). The partnership must determine the values of section 197 assets by allocating the residual section 197 intangibles value among the partnership's assets. The residual section 197 intangibles value is assigned first to section 197 intangibles other than goodwill and going concern value, and then to goodwill and going concern value. Thus, \$300,000 is assigned to each of Intangible 1 and Intangible 2, and \$400,000 is assigned to goodwill and going concern value (the amount by which the residual section 197 intangibles value, \$1,000,000, exceeds the fair market value of section 197 intangibles other than goodwill and going concern value, \$600,000). D's section 743(b) adjustment must be allocated under paragraph (b) of this section using these assigned fair market values.

*Example 3.* (i) Assume the same facts as in *Example 1*, except that the fair market values of Intangible 1 and Intangible 2 are each \$300,000, and that D purchases A's interest in PRS for \$750,000. After the purchase, D's basis in its interest in PRS is \$1,750,000. Also assume that Intangible 1 was originally purchased for \$300,000, and that its adjusted basis has been decreased to \$50,000 as a result of amortization. Assume that, if PRS were to sell Intangible 1 for \$300,000, it would recognize \$250,000 of gain that would be treated as an unrealized receivable under the flush language in section 751(c).

(ii) D's basis in the transferred partnership interest (reduced by the amount of such basis that is attributable to partnership liabilities) is \$750,000 (\$1,750,000—\$1,000,000). Under paragraph (a)(4)(i) of this section, partnership gross value is \$3,250,000 (the amount that, if assigned to all partnership property, would result in a liquidating distribution to D equal to \$750,000).

(iii) Under paragraph (a)(5) of this section, the residual section 197 intangibles value is \$250,000 (the amount by which partnership gross value, \$3,250,000, exceeds the aggregate value of partnership property other than section 197 intangibles, \$3,000,000). Intangible 1 has potential gain that would be treated as unrealized receivables under the flush lan-

guage of section 751(c). The flush language receivables value in Intangible 1 is \$300,000 (the sum of PRS's basis in Intangible 1, \$50,000, and the amount of ordinary income, \$250,000, that the partnership would recognize if Intangible 1 were sold for its actual fair market value). Because the residual section 197 intangibles value, \$250,000, is less than the flush language receivables value of Intangible 1, Intangible 1 is assigned a value of \$250,000, and Intangible 2 and goodwill and going concern value are assigned a value of zero. D's section 743(b) adjustment must be allocated under paragraph (b) of this section using these assigned fair market values.

*Example 4.* Assume the same facts as in *Example 1*, except that the fair market values of Intangible 1 and Intangible 2 are each \$300,000, and that A does not sell its interest in PRS. Instead, A contributes its interest in PRS to E, a newly formed corporation wholly-owned by A, in a transaction described in section 351. Assume that the contribution results in a basis adjustment under section 743(b) (other than zero). PRS determines that its value as a going concern immediately following the contribution is \$3,000,000. Under paragraph (a)(4)(ii) of this section, partnership gross value is \$4,000,000 (the value of PRS as a going concern, \$3,000,000, increased by the partnership's liability, \$1,000,000, immediately after the contribution). Under paragraph (a)(5) of this section, the residual section 197 intangibles value is \$1,000,000 (the amount by which partnership gross value, \$4,000,000, exceeds the aggregate value of partnership property other than section 197 intangibles, \$3,000,000). Of the residual section 197 intangibles value, \$300,000 is assigned to each of Intangible 1 and Intangible 2, and \$400,000 is assigned to goodwill and going concern value (the amount by which the residual section 197 intangibles value, \$1,000,000, exceeds the fair market value of section 197 intangibles other than goodwill and going concern value, \$600,000). E's section 743(b) adjustment must be allocated under paragraph (b)(5) of this section using these assigned fair market values.

*Example 5.* G is the sole general partner in PRS, a limited partnership having three equal partners (G, H, and I). PRS has goodwill and going concern value, two section 197 intangibles other than goodwill and going concern value (Intangible 1 and Intangible 2), and two capital assets with fair market values (determined using all the facts and circumstances) as follows: Vacant land worth \$1,000,000, and a building worth \$2,000,000. The fair market value of each of Intangible 1 and Intangible 2 is \$300,000. PRS has one liability of \$1,000,000, for which G bears the entire risk of loss under section 752 and the regulations thereunder. PRS distributes the land to H in liquidation of H's interest in PRS. Immediately prior to the distribution, PRS's basis

in the land is \$800,000, and H's basis in its interest in PRS is \$750,000. The distribution causes the partnership to increase the basis of its remaining property by \$50,000 under section 734(b)(1)(B). PRS determines that its value as a going concern immediately following the distribution is \$2,000,000. Under paragraph (a)(4)(iii) of this section, partnership gross value is \$3,000,000 (the value of PRS as a going concern, \$2,000,000, increased by the partnership's liability, \$1,000,000, immediately after the distribution). Under paragraph (a)(5) of this section, the residual section 197 intangibles value of PRS's section 197 intangibles is \$1,000,000 (the amount by which partnership gross value, \$3,000,000, exceeds the aggregate value of partnership property other than section 197 intangibles, \$2,000,000). Of the residual section 197 intangibles value, \$300,000 is assigned to each of Intangible 1 and Intangible 2, and \$400,000 is assigned to goodwill and going concern value (the amount by which the residual section 197 intangibles value, \$1,000,000, exceeds the fair market value of section 197 intangibles other than goodwill and going concern value, \$600,000). PRS's section 734(b) adjustment must be allocated under paragraph (c) of this section using these assigned fair market values.

(b) *Adjustments under section 743(b)*—(1) *Generally.* (i) *Application.* For basis adjustments under section 743(b) resulting from substituted basis transactions, paragraph (b)(5) of this section shall apply. For basis adjustments under section 743(b) resulting from all other transfers, paragraphs (b)(2) through (4) of this section shall apply. Except as provided in paragraph (b)(5) of this section, the portion of the basis adjustment allocated to one class of property may be an increase while the portion allocated to the other class is a decrease. This would be the case even though the total amount of the basis adjustment is zero. Except as provided in paragraph (b)(5) of this section, the portion of the basis adjustment allocated to one item of property within a class may be an increase while the portion allocated to another is a decrease. This would be the case even though the basis adjustment allocated to the class is zero.

(ii) *Hypothetical transaction.* For purposes of paragraphs (b)(2) through (b)(4) of this section, the allocation of the basis adjustment under section 743(b) between the classes of property and among the items of property within each class are made based on the allo-

cations of income, gain, or loss (including remedial allocations under § 1.704-3(d)) that the transferee partner would receive (to the extent attributable to the acquired partnership interest) if, immediately after the transfer of the partnership interest, all of the partnership's property were disposed of in a fully taxable transaction for cash in an amount equal to the fair market value of such property (the hypothetical transaction). See § 1.460-4(k)(3)(v)(B) for a rule relating to the computation of income or loss that would be allocated to the transferee from a contract accounted for under a long-term contract method of accounting as a result of the hypothetical transaction.

(2) *Allocations between classes of property*—(i) *In general.* The amount of the basis adjustment allocated to the class of ordinary income property is equal to the total amount of income, gain, or loss (including any remedial allocations under § 1.704-3(d)) that would be allocated to the transferee (to the extent attributable to the acquired partnership interest) from the sale of all ordinary income property in the hypothetical transaction. The amount of the basis adjustment to capital gain property is equal to—

(A) The total amount of the basis adjustment under section 743(b); less

(B) The amount of the basis adjustment allocated to ordinary income property under the preceding sentence; provided, however, that in no event may the amount of any decrease in basis allocated to capital gain property exceed the partnership's basis (or in the case of property subject to the remedial allocation method, the transferee's share of any remedial loss under § 1.704-3(d) from the hypothetical transaction) in capital gain property. In the event that a decrease in basis allocated to capital gain property would otherwise exceed the partnership's basis in capital gain property, the excess must be applied to reduce the basis of ordinary income property.

(ii) *Examples.* The provisions of this paragraph (b)(2) are illustrated by the following examples:

*Example 1.* (i) A and B form equal partnership PRS. A contributes \$50,000 and Asset 1, a nondepreciable capital asset with a fair market value of \$50,000 and an adjusted tax

§ 1.755-1

basis of \$25,000. B contributes \$100,000. PRS uses the cash to purchase Assets 2, 3, and 4. After a year, A sells its interest in PRS to T for \$120,000. At the time of the transfer, A's share of the partnership's basis in partnership assets is \$75,000. Therefore, T receives a \$45,000 basis adjustment.

(ii) Immediately after the transfer of the partnership interest to T, the adjusted basis and fair market value of PRS's assets are as follows:

	Assets	
	Adjusted basis	Fair market value
Capital Gain Property:		
Asset 1 .....	\$25,000	\$75,000
Asset 2 .....	100,000	117,500
Ordinary Income Property:		
Asset 3 .....	40,000	45,000
Asset 4 .....	10,000	2,500
Total .....	175,000	240,000

(iii) If PRS sold all of its assets in a fully taxable transaction at fair market value immediately after the transfer of the partnership interest to T, the total amount of capital gain that would be allocated to T is equal to \$46,250 (\$25,000 section 704(c) built-in gain from Asset 1, plus fifty percent of the \$42,500 appreciation in capital gain property). T would also be allocated a \$1,250 ordinary loss from the sale of the ordinary income property.

(iv) The amount of the basis adjustment that is allocated to ordinary income property is equal to (\$1,250) (the amount of the loss allocated to T from the hypothetical sale of the ordinary income property).

(v) The amount of the basis adjustment that is allocated to capital gain property is equal to \$46,250 (the amount of the basis adjustment, \$45,000, less (\$1,250), the amount of loss allocated to T from the hypothetical sale of the ordinary income property).

*Example 2.* (i) A and B form equal partnership PRS. A and B each contribute \$1,000 cash which the partnership uses to purchase Assets 1, 2, 3, and 4. After a year, A sells its partnership interest to T for \$1,000. T's basis adjustment under section 743(b) is zero.

(ii) Immediately after the transfer of the partnership interest to T, the adjusted basis and fair market value of PRS's assets are as follows:

	Assets	
	Adjusted basis	Fair market value
Capital Gain Property:		
Asset 1 .....	\$500	\$750
Asset 2 .....	500	500
Ordinary Income Property:		
Asset 3 .....	500	250
Asset 4 .....	500	500

26 CFR Ch. I (4-1-14 Edition)

	Assets	
	Adjusted basis	Fair market value
Total .....	2,000	2,000

(iii) If, immediately after the transfer of the partnership interest to T, PRS sold all of its assets in a fully taxable transaction at fair market value, T would be allocated a loss of \$125 from the sale of the ordinary income property. Thus, the amount of the basis adjustment to ordinary income property is (\$125). The amount of the basis adjustment to capital gain property is \$125 (zero, the amount of the basis adjustment under section 743(b), less (\$125), the amount of the basis adjustment allocated to ordinary income property).

(3) *Allocation within the class*—(i) *Ordinary income property.* The amount of the basis adjustment to each item of property within the class of ordinary income property is equal to—

(A) The amount of income, gain, or loss (including any remedial allocations under §1.704-3(d)) that would be allocated to the transferee (to the extent attributable to the acquired partnership interest) from the hypothetical sale of the item; reduced by

(B) The product of—

(1) Any decrease to the amount of the basis adjustment to ordinary income property required pursuant to the last sentence of paragraph (b)(2)(i) of this section; multiplied by

(2) A fraction, the numerator of which is the fair market value of the item of property to the partnership and the denominator of which is the total fair market value of all of the partnership's items of ordinary income property.

(ii) *Capital gain property.* The amount of the basis adjustment to each item of property within the class of capital gain property is equal to—

(A) The amount of income, gain, or loss (including any remedial allocations under §1.704-3(d)) that would be allocated to the transferee (to the extent attributable to the acquired partnership interest) from the hypothetical sale of the item; minus

(B) The product of—

(1) The total amount of gain or loss (including any remedial allocations under §1.704-3(d)) that would be allocated to the transferee (to the extent

attributable to the acquired partnership interest) from the hypothetical sale of all items of capital gain property, minus the amount of the positive basis adjustment to all items of capital gain property or plus the amount of the negative basis adjustment to capital gain property; multiplied by

(2) A fraction, the numerator of which is the fair market value of the item of property to the partnership, and the denominator of which is the fair market value of all of the partnership's items of capital gain property.

(iii) *Special rules*—(A) *Assets in which partner has no interest.* An asset with respect to which the transferee partner has no interest in income, gain, losses, or deductions shall not be taken into account in applying paragraph (b)(3)(ii)(B) of this section.

(B) *Limitation in decrease of basis.* In no event may the amount of any decrease in basis allocated to an item of capital gain property under paragraph (b)(3)(ii)(B) of this section exceed the partnership's adjusted basis in that item (or in the case of property subject to the remedial allocation method, the transferee's share of any remedial loss under § 1.704-3(d) from the hypothetical transaction). In the event that a decrease in basis allocated under paragraph (b)(3)(ii)(B) of this section to an item of capital gain property would otherwise exceed the partnership's adjusted basis in that item, the excess must be applied to reduce the remaining basis, if any, of other capital gain assets pro rata in proportion to the bases of such assets (as adjusted under this paragraph (b)(3)).

(iv) *Examples.* The provisions of this paragraph (b)(3) are illustrated by the following examples:

*Example 1.* (i) Assume the same facts as Example 1 in paragraph (b)(2)(ii) of this section. Of the \$45,000 basis adjustment, \$46,250 was allocated to capital gain property. The amount allocated to ordinary income property was (\$1,250).

(ii) Asset 1 is a capital gain asset, and T would be allocated \$37,500 from the sale of Asset 1 in the hypothetical transaction. Therefore, the amount of the adjustment to Asset 1 is \$37,500.

(iii) Asset 2 is a capital gain asset, and T would be allocated \$8,750 from the sale of Asset 2 in the hypothetical transaction.

Therefore, the amount of the adjustment to Asset 2 is \$8,750.

(iv) Asset 3 is ordinary income property, and T would be allocated \$2,500 from the sale of Asset 3 in the hypothetical transaction. Therefore, the amount of the adjustment to Asset 3 is \$2,500.

(v) Asset 4 is ordinary income property, and T would be allocated (\$3,750) from the sale of Asset 4 in the hypothetical transaction. Therefore, the amount of the adjustment to Asset 4 is (\$3,750).

*Example 2.* (i) Assume the same facts as Example 1 in paragraph (b)(2)(ii) of this section, except that A sold its interest in PRS to T for \$110,000 rather than \$120,000. T, therefore, receives a basis adjustment under section 743(b) of \$35,000. Of the \$35,000 basis adjustment, (\$1,250) is allocated to ordinary income property, and \$36,250 is allocated to capital gain property.

(ii) Asset 3 is ordinary income property, and T would be allocated \$2,500 from the sale of Asset 3 in the hypothetical transaction. Therefore, the amount of the adjustment to Asset 3 is \$2,500.

(iii) Asset 4 is ordinary income property, and T would be allocated (\$3,750) from the sale of Asset 4 in the hypothetical transaction. Therefore, the amount of the adjustment to Asset 4 is (\$3,750).

(iv) Asset 1 is a capital gain asset, and T would be allocated \$37,500 from the sale of Asset 1 in the hypothetical transaction. Asset 2 is a capital gain asset, and T would be allocated \$8,750 from the sale of Asset 2 in the hypothetical transaction. The total amount of gain that would be allocated to T from the sale of the capital gain assets in the hypothetical transaction is \$46,250, which exceeds the amount of the basis adjustment allocated to capital gain property by \$10,000. The amount of the adjustment to Asset 1 is \$33,604 (\$37,500 minus \$3,896 (\$10,000×\$75,000/\$192,500)). The amount of the basis adjustment to Asset 2 is \$2,646 (\$8,750 minus \$6,104 (\$10,000×\$117,500/\$192,500)).

(4) *Income in respect of a decedent*—(i) *In general.* Where a partnership interest is transferred as a result of the death of a partner, under section 1014(c) the transferee's basis in its partnership interest is not adjusted for that portion of the interest, if any, which is attributable to items representing income in respect of a decedent under section 691. See § 1.742-1. Accordingly, if a partnership interest is transferred as a result of the death of a partner, and the partnership holds assets representing income in respect of a decedent, no part of the basis adjustment under section 743(b) is allocated to these assets. See § 1.743-1(b).

(ii) The provisions of this paragraph (b)(4) are illustrated by the following example:

*Example.* (i) A and B are equal partners in personal service partnership PRS. In 2004, as a result of B's death, B's partnership interest is transferred to T when PRS's balance sheet (reflecting a cash receipts and disbursements method of accounting) is as follows (based on all the facts and circumstances):

ASSETS		
	Adjusted basis	Fair market value
Section 197 Intangible .....	\$2,000	\$5,000
Unrealized Receivables .....	0	15,000
Total .....	\$2,000	\$20,000
Liabilities and Capital		
	Adjusted per books	Fair market value
Capital:		
A .....	1,000	10,000
B .....	1,000	10,000
Total .....	\$2,000	\$20,000

(ii) None of the assets owned by PRS is section 704(c) property, and the section 197 intangible is not amortizable. The fair market value of T's partnership interest on the applicable date of valuation set forth in section 1014 is \$10,000. Of this amount, \$2,500 is attributable to T's 50% share of the partnership's section 197 intangible, and \$7,500 is attributable to T's 50% share of the partnership's unrealized receivables. The partnership's unrealized receivables represent income in respect of a decedent. Accordingly, under section 1014(c), T's basis in its partnership interest is not adjusted for that portion of the interest which is attributable to the unrealized receivables. Therefore, T's basis in its partnership interest is \$2,500.

(iii) Under paragraph (a)(4)(i)(C) of this section, solely for purposes of determining partnership gross value, T's basis in its partnership interest is deemed to be \$10,000. Under paragraph (a)(4)(i) of this section, partnership gross value is \$20,000 (the amount that, if assigned to all partnership property, would result in a liquidating distribution to T equal to \$10,000).

(iv) Under paragraph (a)(5) of this section, the residual section 197 intangibles value is \$5,000 (the excess of partnership gross value, \$20,000, over the aggregate value of assets other than section 197 intangibles, \$15,000). The residual section 197 intangibles value is assigned first to section 197 intangibles other than goodwill and going concern value, and then to goodwill and going concern value.

Thus, \$5,000 is assigned to the section 197 intangible, and \$0 is assigned to goodwill and going concern value. T's section 743(b) adjustment must be allocated using these assigned fair market values.

(v) At the time of the transfer, B's share of the partnership's basis in partnership assets is \$1,000. Accordingly, T receives a \$1,500 basis adjustment under section 743(b). Under this paragraph (b)(4), the entire basis adjustment is allocated to the partnership's section 197 intangible.

(5) *Substituted basis transactions*—(i) *In general.* This paragraph (b)(5) applies to basis adjustments under section 743(b) that result from exchanges in which the transferee's basis in the partnership interest is determined in whole or in part by reference to the transferor's basis in that interest. For exchanges on or after June 9, 2003, this paragraph (b)(5) also applies to basis adjustments under section 743(b) that result from exchanges in which the transferee's basis in the partnership interest is determined by reference to other property held at any time by the transferee. For example, this paragraph (b)(5) applies if a partnership interest is contributed to a corporation in a transaction to which section 351 applies, if a partnership interest is contributed to a partnership in a transaction to which section 721(a) applies, or if a partnership interest is distributed by a partnership in a transaction to which section 731(a) applies.

(ii) *Allocations between classes of property.* If the total amount of the basis adjustment under section 743(b) is zero, then no adjustment to the basis of partnership property will be made under this paragraph (b)(5). If there is an increase in basis to be allocated to partnership assets, such increase must be allocated to capital gain property or ordinary income property, respectively, only if the total amount of gain or loss (including any remedial allocations under § 1.704-3(d)) that would be allocated to the transferee (to the extent attributable to the acquired partnership interest) from the hypothetical sale of all such property would result in a net gain or net income, as the case may be, to the transferee. Where, under the preceding sentence, an increase in basis may be allocated to both capital gain assets and ordinary income assets, the increase shall be allocated to each

class in proportion to the net gain or net income, respectively, which would be allocated to the transferee from the sale of all assets in each class. If there is a decrease in basis to be allocated to partnership assets, such decrease must be allocated to capital gain property or ordinary income property, respectively, only if the total amount of gain or loss (including any remedial allocations under § 1.704-3(d)) that would be allocated to the transferee (to the extent attributable to the acquired partnership interest) from the hypothetical sale of all such property would result in a net loss to the transferee. Where, under the preceding sentence, a decrease in basis may be allocated to both capital gain assets and ordinary income assets, the decrease shall be allocated to each class in proportion to the net loss which would be allocated to the transferee from the sale of all assets in each class.

(iii) *Allocations within the classes—(A) Increases.* If there is an increase in basis to be allocated within a class, the increase must be allocated first to properties with unrealized appreciation in proportion to the transferee's share of the respective amounts of unrealized appreciation before such increase (but only to the extent of the transferee's share of each property's unrealized appreciation). Any remaining increase must be allocated among the properties within the class in proportion to the transferee's share of the amount that would be realized by the partnership upon the hypothetical sale of each asset in the class.

(B) *Decreases.* If there is a decrease in basis to be allocated within a class, the decrease must be allocated first to properties with unrealized depreciation in proportion to the transferee's shares of the respective amounts of unrealized depreciation before such decrease (but only to the extent of the transferee's share of each property's unrealized depreciation). Any remaining decrease must be allocated among the properties within the class in proportion to the transferee's shares of their adjusted bases (as adjusted under the preceding sentence).

(C) *Limitation in decrease of basis.* Where, as the result of a transaction to which this paragraph (b)(5) applies, a

decrease in basis must be allocated to capital gain assets, ordinary income assets, or both, and the amount of the decrease otherwise allocable to a particular class exceeds the transferee's share of the adjusted basis to the partnership of all depreciated assets in that class, the transferee's negative basis adjustment is limited to the transferee's share of the partnership's adjusted basis in all depreciated assets in that class.

(D) *Carryover adjustment.* Where a transferee's negative basis adjustment under section 743(b) cannot be allocated to any asset, because the adjustment exceeds the transferee's share of the adjusted basis to the partnership of all depreciated assets in a particular class, the adjustment is made when the partnership subsequently acquires property of a like character to which an adjustment can be made.

(iv) *Examples.* The provisions of this paragraph (b)(5) are illustrated by the following examples:

*Example 1.* A is a member of partnership LTP, which has made an election under section 754. The three partners in LTP have equal interests in capital and profits. Solely in exchange for a partnership interest in UTP, A contributes its interest in LTP to UTP in a transaction described in section 721. At the time of the transfer, A's basis in its partnership interest (\$5,000) equals its share of inside basis (also \$5,000). Under section 723, UTP's basis in its interest in LTP is \$5,000. LTP's only two assets on the date of contribution are inventory with a basis of \$5,000 and a fair market value of \$7,500, and a nondepreciable capital asset with a basis of \$10,000 and a fair market value of \$7,500. The amount of the basis adjustment under section 743(b) to partnership property is \$0 (\$5,000, UTP's basis in its interest in LTP, minus \$5,000, UTP's share of LTP's basis in partnership assets). Because UTP acquired its interest in LTP in a substituted basis transaction, and the total amount of the basis adjustment under section 743(b) is zero, UTP receives no special basis adjustments under section 743(b) with respect to the partnership property of LTP.

*Example 2.* (i) A purchases a partnership interest in LTP at a time when an election under section 754 is not in effect. The three partners in LTP have equal interests in capital and profits. During a later year for which LTP has an election under section 754 in effect, and in a transaction that is unrelated to A's purchase of the LTP interest, A contributes its interest in LTP to UTP in a transaction described in section 721 (solely in

exchange for a partnership interest in UTP). At the time of the transfer, A's adjusted basis in its interest in LTP is \$20,433. Under section 721, A recognizes no gain or loss as a result of the contribution of its partnership interest to UTP. Under section 723, UTP's basis in its partnership interest in LTP is \$20,433. The balance sheet of LTP on the date of the contribution shows the following:

	Assets	
	Adjusted basis	Fair market value
Cash .....	\$5,000	\$5,000
Accounts receivable .....	10,000	10,000
Inventory .....	20,000	21,000
Nondepreciable capital asset ....	20,000	40,000
Total .....	55,000	76,000

  

	Liabilities and Capital	
	Adjusted per books	Fair market value
Liabilities .....	\$10,000	\$10,000
Capital:		
A .....	15,000	22,000
B .....	15,000	22,000
C .....	15,000	22,000
Total .....	55,000	76,000

(ii) The amount of the basis adjustment under section 743(b) is the difference between the basis of UTP's interest in LTP and UTP's share of the adjusted basis to LTP of partnership property. UTP's interest in the previously taxed capital of LTP is \$15,000 (\$22,000, the amount of cash UTP would receive if LTP liquidated immediately after the hypothetical transaction, decreased by \$7,000, the amount of tax gain allocated to UTP from the hypothetical transaction). UTP's share of the adjusted basis to LTP of partnership property is \$18,333 (\$15,000 share of previously taxed capital, plus \$3,333 share of LTP's liabilities). The amount of the basis adjustment under section 743(b) to partnership property therefore, is \$2,100 (\$20,433 minus \$18,333).

(iii) The total amount of gain that would be allocated to UTP from the hypothetical sale of capital gain property is \$6,666.67 (one-third of the excess of the fair market value of LTP's nondepreciable capital asset, \$40,000, over its basis, \$20,000). The total amount of gain that would be allocated to UTP from the hypothetical sale of ordinary income property is \$333.33 (one-third of the excess of the fair market value of LTP's inventory, \$21,000, over its basis, \$20,000). Under this paragraph (b)(5), LTP must allocate \$2,000 (\$6,666.67 divided by \$7,000 times \$2,100) of UTP's basis adjustment to the nondepreciable capital asset. LTP must allocate \$100 (\$333.33 divided by \$7,000 times \$2,100) of UTP's basis adjustment to the inventory.

(c) *Adjustments under section 734(b)*—

(1) *Allocations between classes of property*—(i) *General rule*. Where there is a distribution of partnership property resulting in an adjustment to the basis of undistributed partnership property under section 734(b)(1)(B) or (b)(2)(B), the adjustment must be allocated to remaining partnership property of a character similar to that of the distributed property with respect to which the adjustment arose. Thus, when the partnership's adjusted basis of distributed capital gain property immediately prior to distribution exceeds the basis of the property to the distributee partner (as determined under section 732), the basis of the undistributed capital gain property remaining in the partnership is increased by an amount equal to the excess. Conversely, when the basis to the distributee partner (as determined under section 732) of distributed capital gain property exceeds the partnership's adjusted basis of such property immediately prior to the distribution, the basis of the undistributed capital gain property remaining in the partnership is decreased by an amount equal to such excess. Similarly, where there is a distribution of ordinary income property, and the basis of the property to the distributee partner (as determined under section 732) is not the same as the partnership's adjusted basis of the property immediately prior to distribution, the adjustment is made only to undistributed property of the same class remaining in the partnership.

(ii) *Special rule*. Where there is a distribution resulting in an adjustment under section 734(b)(1)(A) or (b)(2)(A) to the basis of undistributed partnership property, the adjustment is allocated only to capital gain property.

(2) *Allocations within the classes*—(i) *Increases*. If there is an increase in basis to be allocated within a class, the increase must be allocated first to properties with unrealized appreciation in proportion to their respective amounts of unrealized appreciation before such increase (but only to the extent of each property's unrealized appreciation). Any remaining increase must be allocated among the properties within the class in proportion to their fair market values.

(ii) *Decreases.* If there is a decrease in basis to be allocated within a class, the decrease must be allocated first to properties with unrealized depreciation in proportion to their respective amounts of unrealized depreciation before such decrease (but only to the extent of each property's unrealized depreciation). Any remaining decrease must be allocated among the properties within the class in proportion to their adjusted bases (as adjusted under the preceding sentence).

(3) *Limitation in decrease of basis.* Where a decrease in the basis of partnership assets is required under section 734(b)(2) and the amount of the decrease exceeds the adjusted basis to the partnership of property of the required character, the basis of such property is reduced to zero (but not below zero).

(4) *Carryover adjustment.* Where, in the case of a distribution, an increase or a decrease in the basis of undistributed property cannot be made because the partnership owns no property of the character required to be adjusted, or because the basis of all the property of a like character has been reduced to zero, the adjustment is made when the partnership subsequently acquires property of a like character to which an adjustment can be made.

(5) *Cross reference.* See § 1.460-4(k)(3)(v)(B) for a rule relating to the computation of unrealized appreciation or depreciation in a contract accounted for under a long-term contract method of accounting.

(6) *Example.* The following example illustrates this paragraph (c):

*Example.* (i) A, B, and C form equal partnership PRS. A contributes \$50,000 and Asset 1, nondepreciable capital gain property with a fair market value of \$50,000 and an adjusted tax basis of \$25,000. B and C each contributes \$100,000. PRS uses the cash to purchase Assets 2, 3, 4, 5, and 6. Assets 2 and 3 are nondepreciable capital assets, and Assets 4, 5, and 6 are inventory that has not appreciated substantially in value within the meaning of section 751(b)(3). Assets 4, 5, and 6 are the only assets held by the partnership that are subject to section 751. The partnership has an election in effect under section 754. After seven years, the adjusted basis and fair market value of PRS's assets are as follows:

	Assets	
	Adjusted basis	Fair market value
Capital Gain Property:		
Asset 1 .....	\$ 25,000	\$ 75,000
Asset 2 .....	100,000	117,500
Asset 3 .....	50,000	60,000
Ordinary Income Property:		
Asset 4 .....	40,000	45,000
Asset 5 .....	50,000	60,000
Asset 6 .....	10,000	2,500
Total .....	275,000	360,000

(ii) *Allocation between classes.* Assume that PRS distributes Assets 3 and 5 to A in complete liquidation of A's interest in the partnership. A's basis in the partnership interest was \$75,000. The partnership's basis in Assets 3 and 5 was \$50,000 each. A's \$75,000 basis in its partnership interest is allocated between Assets 3 and 5 under sections 732(b) and (c). A will, therefore, have a basis of \$25,000 in Asset 3 (capital gain property), and a basis of \$50,000 in Asset 5 (section 751 property). The distribution results in a \$25,000 increase in the basis of capital gain property. There is no change in the basis of ordinary income property.

(iii) *Allocation within class.* The amount of the basis increase to capital gain property is \$25,000 and must be allocated among the remaining capital gain assets in proportion to the difference between the fair market value and basis of each. The fair market value of Asset 1 exceeds its basis by \$50,000. The fair market value of Asset 2 exceeds its basis by \$17,500. Therefore, the basis of Asset 1 will be increased by \$18,519 (\$25,000, multiplied by \$50,000, divided by \$67,500), and the basis of Asset 2 will be increased by \$6,481 (\$25,000 multiplied by \$17,500, divided by \$67,500).

(d) *Required statements.* See § 1.743-1(k)(2) for provisions requiring the transferee of a partnership interest to provide information to the partnership relating to the transfer of an interest in the partnership. See § 1.743-1(k)(1) for a provision requiring the partnership to attach a statement to the partnership return showing the computation of a basis adjustment under section 743(b) and the partnership properties to which the adjustment is allocated under section 755. See § 1.732-1(d)(3) for a provision requiring a transferee partner to attach a statement to its return showing the computation of a basis adjustment under section 732(d) and the partnership properties to which the adjustment is allocated under section 755.

## § 1.761-1

## 26 CFR Ch. I (4-1-14 Edition)

See § 1.732-1(d)(5) for a provision requiring the partnership to provide information to a transferee partner reporting a basis adjustment under section 732(d).

(e) *Effective Date*—(1) *Generally*. Except as provided in paragraphs (b)(5) and (e)(2) of this section, this section applies to transfers of partnership interests and distributions of property from a partnership that occur on or after December 15, 1999.

(2) *Special rules*. Paragraphs (a) and (b)(3)(iii) of this section apply to transfers of partnership interests and distributions of property from a partnership that occur on or after June 9, 2003.

[T.D. 8847, 64 FR 69916, Dec. 15, 1999; 65 FR 9220, Feb. 24, 2000, as amended by T.D. 9059, 68 FR 34295, June 9, 2003; T.D. 9137, 69 FR 42559, July 16, 2004]

### DEFINITIONS

#### § 1.761-1 Terms defined.

(a) *Partnership*. The term *partnership* means a partnership as determined under §§ 301.7701-1, 301.7701-2, and 301.7701-3 of this chapter.

(b) *Partner*. The term *partner* means a member of a partnership.

(c) *Partnership agreement*. For the purposes of subchapter K, a partnership agreement includes the original agreement and any modifications thereof agreed to by all the partners or adopted in any other manner provided by the partnership agreement. Such agreement or modifications can be oral or written. A partnership agreement may be modified with respect to a particular taxable year subsequent to the close of such taxable year, but not later than the date (not including any extension of time) prescribed by law for the filing of the partnership return. As to any matter on which the partnership agreement, or any modification thereof, is silent, the provisions of local law shall be considered to constitute a part of the agreement.

(d) *Liquidation of partner's interest*. The term *liquidation of a partner's interest* means the termination of a partner's entire interest in a partnership by means of a distribution, or a series of distributions, to the partner by the partnership. A series of distributions will come within the meaning of this term whether they are made in one

year or in more than one year. Where a partner's interest is to be liquidated by a series of distributions, the interest will not be considered as liquidated until the final distribution has been made. For the basis of property distributed in one liquidating distribution, or in a series of distributions in liquidation, see section 732(b). A distribution which is not in liquidation of a partner's entire interest, as defined in this paragraph, is a current distribution. Current distributions, therefore, include distributions in partial liquidation of a partner's interest, and distributions of the partner's distributive share. See paragraph (a)(1)(ii) of § 1.731-1.

(e) *Distribution of partnership interest*. For purposes of section 708(b)(1)(B) and § 1.708-1(b)(1)(iv), the deemed distribution of an interest in a new partnership by a partnership that terminates under section 708(b)(1)(B) is not a sale or exchange of an interest in the new partnership. However, the deemed distribution of an interest in a new partnership by a partnership that terminates under section 708(b)(1)(B) is treated as an exchange of the interest in the new partnership for purposes of section 743. This paragraph (e) applies to terminations of partnerships under section 708(b)(1)(B) occurring on or after May 9, 1997; however, this paragraph (e) may be applied to terminations occurring on or after May 9, 1996, provided that the partnership and its partners apply this paragraph (e) to the termination in a consistent manner.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 7208, 37 FR 20686, Oct. 3, 1972; T.D. 8697, 61 FR 66588, Dec. 18, 1996; T.D. 8717, 62 FR 25501, May 9, 1997]

#### § 1.761-2 Exclusion of certain unincorporated organizations from the application of all or part of subchapter K of chapter 1 of the Internal Revenue Code.

(a) *Exclusion of eligible unincorporated organizations*—(1) *In general*. Under conditions set forth in this section, an unincorporated organization described in subparagraph (2) or (3) of this paragraph may be excluded from the application of all or a part of the provisions of subchapter K of chapter 1 of the Code. Such organization must be

availed of (i) for investment purposes only and not for the active conduct of a business, or (ii) for the joint production, extraction, or use of property, but not for the purpose of selling services or property produced or extracted. The members of such organization must be able to compute their income without the necessity of computing partnership taxable income. Any syndicate, group, pool, or joint venture which is classifiable as an association, or any group operating under an agreement which creates an organization classifiable as an association, does not fall within these provisions.

(2) *Investing partnership.* Where the participants in the joint purchase, retention, sale, or exchange of investment property:

- (i) Own the property as coowners,
- (ii) Reserve the right separately to take or dispose of their shares of any property acquired or retained, and
- (iii) Do not actively conduct business or irrevocably authorize some person or persons acting in a representative capacity to purchase, sell, or exchange such investment property, although each separate participant may delegate authority to purchase, sell, or exchange his share of any such investment property for the time being for his account, but not for a period of more than a year, then

such group may be excluded from the application of the provisions of subchapter K under the rules set forth in paragraph (b) of this section.

(3) *Operating agreements.* Where the participants in the joint production, extraction, or use of property:

- (i) Own the property as coowners, either in fee or under lease or other form of contract granting exclusive operating rights, and
- (ii) Reserve the right separately to take in kind or dispose of their shares of any property produced, extracted, or used, and
- (iii) Do not jointly sell services or the property produced or extracted, although each separate participant may delegate authority to sell his share of the property produced or extracted for the time being for his account, but not for a period of time in excess of the minimum needs of the industry, and in no event for more than 1 year, then

such group may be excluded from the application of the provisions of subchapter K under the rules set forth in paragraph (b) of this section. However, the preceding sentence does not apply to any unincorporated organization one of whose principal purposes is cycling, manufacturing, or processing for persons who are not members of the organization. In addition, except as provided in paragraph (d)(2)(i) of this section, this paragraph (a)(3) does not apply to any unincorporated organization that produces natural gas under a joint operating agreement, unless all members of the unincorporated organization comply with paragraph (d) of this section.

(b) *Complete exclusion from subchapter K—(1) Time for making election for exclusion.* Any unincorporated organization described in subparagraph (1) and either (2) or (3) of paragraph (a) of this section which wishes to be excluded from all of subchapter K must make the election provided in section 761(a) not later than the time prescribed by paragraph (e) of § 1.6031-1 (including extensions thereof) for filing the partnership return for the first taxable year for which exclusion from subchapter K is desired. Notwithstanding the prior sentence such organization may be deemed to have made the election in the manner prescribed in subparagraph (2)(ii) of this paragraph.

(2) *Method of making election.* (i) Except as provided in subdivision (ii) of this subparagraph, any unincorporated organization described in subparagraphs (1) and either (2) or (3) of paragraph (a) of this section which wishes to be excluded from all of subchapter K must make the election provided in section 761(a) in a statement attached to, or incorporated in, a properly executed partnership return, Form 1065, which shall contain the information required in this subdivision. Such return shall be filed with the internal revenue officer with whom a partnership return, Form 1065, would be required to be filed if no election were made. Where, for the purpose of determining such officer, it is necessary to determine the internal revenue district (or service center serving such district) in which the electing organization has its principal office or place of business,

the principal office or place of business of the person filing the return shall be considered the principal office or place of business of the organization. The partnership return must be filed not later than the time prescribed by paragraph (e) of § 1.6031-1 (including extensions thereof) for filing the partnership return with respect to the first taxable year for which exclusion from subchapter K is desired. Such partnership return shall contain, in lieu of the information required by Form 1065 and by the instructions relating thereto, only the name or other identification and the address of the organization together with information on the return, or in the statement attached to the return, showing the names, addresses, and identification numbers of all the members of the organization; a statement that the organization qualifies under subparagraphs (1) and either (2) or (3) of paragraph (a) of this section; a statement that all of the members of the organization elect that it be excluded from all of subchapter K; and a statement indicating where a copy of the agreement under which the organization operates is available (or if the agreement is oral, from whom the provisions of the agreement may be obtained).

(ii) If an unincorporated organization described in subparagraphs (1) and either (2) or (3) of paragraph (a) of this section does not make the election provided in section 761(a) in the manner prescribed by subdivision (i) of this subparagraph, it shall nevertheless be deemed to have made the election if it can be shown from all the surrounding facts and circumstances that it was the intention of the members of such organization at the time of its formation to secure exclusion from all of subchapter K beginning with the first taxable year of the organization. Although the following facts are not exclusive, either one of such facts may indicate the requisite intent:

(a) At the time of the formation of the organization there is an agreement among the members that the organization be excluded from subchapter K beginning with the first taxable year of the organization, or

(b) The members of the organization owning substantially all of the capital

interests report their respective shares of the items of income, deductions, and credits of the organization on their respective returns (making such elections as to individual items as may be appropriate) in a manner consistent with the exclusion of the organization from subchapter K beginning with the first taxable year of the organization.

(3) *Effect of election*—(i) *In general*. An election under this section to be excluded will be effective unless within 90 days after the formation of the organization (or by October 15, 1956, whichever is later) any member of the organization notifies the Commissioner that the member desires subchapter K to apply to such organization, and also advises the Commissioner that he has so notified all other members of the organization by registered or certified mail. Such election is irrevocable as long as the organization remains qualified under subparagraphs (1) and either (2) or (3) of paragraph (a) of this section, or unless approval of revocation of the election is secured from the Commissioner. Application for permission to revoke the election must be submitted to the Commissioner of Internal Revenue, Attention: T:I, Washington, DC 20224, no later than 30 days after the beginning of the first taxable year to which the revocation is to apply.

(ii) *Special rule*. Notwithstanding subdivision (i) of this subparagraph, an election deemed made pursuant to subparagraph (2)(ii) of this paragraph will not be effective in the case of an organization which had a taxable year ending on or before November 30, 1972, if any member of the organization notifies the Commissioner that the member desires subchapter K to apply to such organization, and also advises the Commissioner that he has so notified all other members of the organization by registered or certified mail. Such notification to the Commissioner must be made on or before January 2, 1973 and must include the names and addresses of all of the members of the organization.

(c) *Partial exclusion from subchapter K*. An unincorporated organization which wishes to be excluded from only certain sections of subchapter K must submit to the Commissioner, no later than 90

days after the beginning of the first taxable year for which partial exclusion is desired, a request for permission to be excluded from certain provisions of subchapter K. The request shall set forth the sections of subchapter K from which exclusion is sought and shall state that such organization qualifies under subparagraphs (1) and either (2) or (3) of paragraph (a) of this section, and that the members of the organization elect to be excluded to the extent indicated. Such exclusion shall be effective only upon approval of the election by the Commissioner and subject to the conditions he may impose.

(d) *Rules for gas producers that produce natural gas under joint operating agreements*—(1) *Joint operating agreements and gas balancing.* Co-owners of a property producing natural gas enter into a joint operating agreement (JOA) to define the rights and obligations of each co-producer of the gas in place. The JOA determines, among other things, each co-producer's proportionate share of the natural gas as it is produced from the reservoir, together with the associated production expenses. A gas imbalance arises when a co-producer does not take its proportionate share of current gas production under the JOA (underproducer) and another co-producer takes more than its proportionate share of current production (overproducer). The co-producers often enter into a gas balancing agreement (GBA) as an addendum to their JOA to establish their rights and obligations when a gas imbalance arises. A GBA typically allows the overproducer to take the amount of the gas imbalance (overproduced gas) and entitles the underproducer to recoup the overproduced gas either from the volume of the gas remaining in the reservoir or by a cash balancing payment.

(2) *Permissible gas balancing methods*—(i) *General requirement.* All co-producers of natural gas operating under the same JOA must use the cumulative gas balancing method, as described in paragraph (d)(3) of this section, unless they use the annual gas balancing method described in paragraph (d)(4) of this section. A co-producer's failure to comply with the provisions of this paragraph (d)(2)(i) generally constitutes the use of an impermissible method of ac-

counting, requiring a change to a permissible method under §1.446-1(e)(3) with any terms and conditions as may be imposed by the Commissioner. The co-producers' election to be excluded from all or part of subchapter K will not be revoked, unless the Commissioner determines that there was willful failure to comply with the requirements of this paragraph (d)(2)(i).

(ii) *Change in method of accounting; adoption of method of accounting*—(A) *In general.* The annual gas balancing method and the cumulative gas balancing method are methods of accounting. Accordingly, a change to or from either of these methods is a change in method of accounting that requires the consent of the Commissioner. See section 446(e) and §1.446-1(e). For purposes of this section, each JOA is treated as a separate trade or business. Paragraph (d)(2)(ii)(B) of this section provides rules for adopting either permissible method of accounting. Paragraph (d)(2)(ii)(C) of this section provides rules on the timing of required changes to either permissible method during the transitional period, and paragraph (d)(5) of this section contains the procedural provisions for making a change in method of accounting required in paragraph (d)(2)(ii)(C) of this section.

(B) *Adoption of method of accounting.* A co-producer must adopt a permissible method for each JOA entered into on or after the start of the co-producer's first taxable year beginning after December 31, 1994 (or, in the case of the use of the annual gas balancing method by co-producers not having the same taxable year, the start of the first taxable year beginning after December 31, 1994, of the co-producer whose taxable year begins latest in the calendar year). If a co-producer is adopting the cumulative method, the co-producer may adopt the method by using the method on its timely filed return for the taxable year of adoption. A co-producer may adopt the annual gas balancing method with the permission of the Commissioner under guidelines set forth in paragraph (d)(4)(ii) of this section.

(C) *Required change in method of accounting for certain joint operating agreements.* This paragraph (d)(2)(ii)(C) applies to certain JOAs entered into prior

to 1996. Except in the case of a part-year change in method of accounting or in the case of the cessation of a JOA (both of which are described in this paragraph (d)(2)(ii)(C)), for each JOA entered into prior to a co-producer's first taxable year beginning after December 31, 1994, and in effect as of the beginning of that year, the co-producer must change its method of accounting for sales of gas and its treatment of certain related deductions and credits to a permissible method as of the start of its first taxable year beginning after December 31, 1994. In the case of a JOA of co-producers that do not all have the same taxable year and that choose the annual gas balancing method, if the JOA is entered into prior to the first taxable year beginning after December 31, 1994 of the co-producer whose taxable year begins latest in the calendar year and the JOA is in effect as of January 1, 1996, a change to the annual gas balancing method by each co-producer under that JOA is made as of January 1, 1996 (part-year change in method of accounting). If the co-producers would have made a part-year change to the annual gas balancing method but for the fact that their JOA ceased to be in effect before January 1, 1996 (cessation of a JOA), the co-producers do not change their method of accounting with respect to the JOA. Rather, for their taxable years in which the JOA ceases to be in effect, the co-producers use their current method of accounting with respect to that JOA.

(3) *Cumulative gas balancing method*—

(i) *In general.* The cumulative gas balancing method (cumulative method), solely for purposes of reporting income from gas sales and certain related deductions and credits, treats each co-producer under the same JOA as the sole owner of its percentage share of the total gas in the reservoir and disregards the ownership arrangement described in the JOA for gas as it is produced from the reservoir. Each co-producer is considered to be taking only its share of the total gas in the reservoir as long as the gas remaining in the reservoir is sufficient to satisfy the ownership rights of the co-producers in their percentage shares of the total gas in the reservoir. After a co-producer has taken its entire share of the total

gas in the reservoir, any additional gas taken by that co-producer (taking co-producer) is treated as having been taken from its other co-producers' shares of the total gas in the reservoir. The effect of being treated as a taking co-producer under the cumulative method is that the taking co-producer generally may not claim an allowance for depletion and a production credit on its sales of its other co-producers' percentage shares of the total gas in the reservoir.

(ii) *Requirements*—(A) *Reporting of income from sales of gas.* Under the cumulative method, each co-producer must include in gross income under its overall method of accounting the amount of its sales from all gas produced from the reservoir, including sales of gas taken from another co-producer's share of the gas in the reservoir.

(B) *Reporting of deduction of taking co-producer.* A taking co-producer deducts the amount of a payment (in cash or property, other than gas produced under the JOA) made to another co-producer for sales of that co-producer's gas, but only for the taxable year in which the payment is made. Thus, an accrual method taking co-producer is not permitted a deduction for any obligation it has to pay another co-producer for sales of that co-producer's gas until a payment is made. See paragraph (d)(3)(iii)(B) of this section for a rule requiring a reduction of the amount of the deduction described in this paragraph (d)(3)(ii)(B) if the taking co-producer had mistakenly claimed a depletion deduction relating to those sales.

(C) *Reporting of income by other co-producers.* Any co-producer that is entitled to receive a payment from a taking co-producer must include the amount of the payment in gross income as proceeds from the sale of its gas only for the taxable year that the payment is actually received, regardless of its overall method of accounting.

(D) *Reporting of production expenses.* Each co-producer deducts its proportionate share of production expenses, as provided in the JOA, under its regular method of accounting for the expenses.

(iii) *Special rules for production credits and depletion deductions under the cumulative method*—(A) *In general.* Under the cumulative method, a co-producer's depletion allowance and production credit for a taxable year are based on its income from gas sales and production of gas from its percentage share of the total gas in the reservoir, and are not based on its current proportionate share of income and production as determined under the JOA. Thus, in general, a taking co-producer is not allowed a production credit or an allowance for depletion on its sales of gas in excess of its percentage share of the total gas in the reservoir. However, the Service will not disallow depletion deductions or production credits claimed by a taking co-producer on the gas of other co-producers if the taking co-producer had a reasonable but mistaken belief that the deductions or credits were claimed with respect to the taking co-producer's percentage share of total gas in the reservoir and the taking co-producer makes the appropriate reductions and additions to tax required in paragraphs (d)(3)(iii)(B) and (d)(3)(iii)(C) of this section. The reasonableness of the mistaken belief is determined at the time of filing the return claiming the deductions or credits. A co-producer receiving a payment for sales of its gas from a taking co-producer claims a production credit and an allowance for depletion relating to those sales only for the taxable year in which the amount of the payment is included in its gross income.

(B) *Reduction of taking co-producer's payment deduction for depletion claimed on another co-producer's gas.* If a taking co-producer claims an allowance for depletion on another co-producer's gas, the taking co-producer must reduce its deduction claimed in a later year for making a payment to the other co-producer for sales of that co-producer's gas by the amount of any percentage depletion deduction allowed on the gas sales to which the payment relates. If the percentage limitation of section 613A(d)(1) applied to disallow a depletion deduction for a previous year, the taking co-producer must reduce the amount of any carried over depletion deduction allowable in the year of the payment or in a future year by the por-

tion of the carried over depletion deduction, if any, that relates to another co-producer's gas.

(C) *Addition to tax of taking co-producer for production credit claimed on another co-producer's gas.* If a taking co-producer claims a production credit on another co-producer's gas, the taking co-producer must add to its tax for the taxable year that it makes a payment to the other co-producer for sales of that co-producer's gas any production credit allowed in an earlier taxable year on the gas sales to which the payment relates, but only to the extent the credit allowed actually reduced the taking co-producer's tax in any earlier year. The taking co-producer also must reduce the amount of its minimum tax credit allowable by reason of section 53(d)(1)(B)(iii) in the year of the payment or in a future year by the portion of the credit, if any, that relates to another co-producer's gas.

(iv) *Anti-abuse rule.* If the Commissioner determines that co-producers using the cumulative method have arranged or altered their taking of production for a taxable year with a principal purpose of shifting the income, deductions, or credits relating to that production to avoid tax, the co-producers' election to be excluded from all or part of subchapter K will be revoked for that year and for subsequent years. In determining that a principal purpose was to avoid tax, the Commissioner will examine all the facts and circumstances surrounding the use of the cumulative method by the co-producers. See *Examples 3 and 4* of paragraph (d)(6) of this section.

(4) *Annual gas balancing method*—(i) *In general.* The annual gas balancing method (annual method) takes into account each co-producer's ownership rights and obligations, as described in the JOA, with respect to the co-producer's current proportionate share of gas as it is produced from the reservoir. Under the annual method, gas imbalances relating to a JOA must be eliminated annually through a balancing payment, which may be in the form of cash, gas produced under the same JOA, or other property. If all the co-producers under a JOA have the same taxable year, any gas imbalance remaining at the end of a taxable year

must be eliminated by a balancing payment from the overproducer to the underproducer by the due date of the overproducer's tax return for that taxable year (including extensions). If all the co-producers under a JOA do not have the same taxable year, any gas imbalance remaining at the end of a calendar year must be eliminated by a balancing payment from the overproducer to the underproducer by September 15 of the following calendar year. The annual method may be used only if the Commissioner's permission is obtained. Paragraph (d)(4)(ii) of this section provides guidelines for applying for this permission. The annual method is not available for a JOA with respect to which any co-producer made an election under paragraph (d)(5)(i)(B)(3) of this section (to take an aggregate section 481(a) adjustment for all JOAs of a co-producer into account in the year of change).

(ii) *Obtaining the Commissioner's permission to use the annual method.* A request for the Commissioner's permission to adopt the annual method for a new JOA must be in writing and must set forth the names of all the co-producers under the JOA and the respective taxable year of adoption. See paragraphs (d)(2)(ii) and (d)(5)(ii) of this section for the rules for a change in method of accounting to the annual method. In addition, the request must contain an explanation of how the co-producers will report income from gas sales, the making or receiving of a balancing payment, production expenses, depletion deductions, and production credits. Permission will be granted under appropriate conditions, including, but not limited to, an agreement in writing by all co-producers to use the annual method and to eliminate any gas imbalances annually in accordance with paragraph (d)(4)(i) of this section.

(5) *Transitional rules for making a change in method of accounting required in paragraph (d)(2)(ii)(C) of this section—*  
(i) *Change in method of accounting to the cumulative method—(A) Automatic consent to change in method of accounting to the cumulative method.* A co-producer changing to the cumulative method for any JOA entered into prior to its first taxable year beginning after December

31, 1994, and in effect as of the beginning of that year is granted the consent of the Commissioner to change its method of accounting with respect to each JOA to the cumulative method, provided the co-producer—

(1) Makes the change on its timely filed return for its first taxable year beginning after December 31, 1994;

(2) Attaches a completed and signed Form 3115 to the co-producer's tax return for the year of change, stating that, pursuant to § 1.761-2(d)(2)(ii) of the regulations, the co-producer is changing its method of accounting for sales of gas and its treatment of certain related deductions and credits under each JOA to the cumulative method;

(3) In the case of a co-producer making an election under paragraph (d)(5)(i)(B)(3) of this section to take the aggregate section 481(a) adjustment into account in the year of change, attaches the statement described in paragraph (d)(5)(i)(B)(3)(ii) of this section; and

(4) In the case of a co-producer not making an election under paragraph (d)(5)(i)(B)(3) of this section, attaches a list of each JOA with respect to which there is a section 481(a) adjustment computed in accordance with paragraph (d)(5)(i)(B)(2)(i) of this section.

(B) *Section 481(a) adjustment—(1) Application of section 481(a).* A change in method of accounting to the cumulative method under the automatic consent procedure in paragraph (d)(5)(i)(A) of this section is a change in method of accounting to which the provisions of section 481(a) apply. Thus, a section 481(a) adjustment must be taken into account in the manner provided by this paragraph (d)(5)(i)(B) to prevent the omission or duplication of income. Paragraph (d)(5)(i)(B)(2) of this section provides the general rules for computing the amount of the section 481(a) adjustment of a co-producer relating to a particular JOA and for taking the section 481(a) adjustment into account. Paragraph (d)(5)(i)(B)(3) of this section provides rules for electing to take a co-producer's section 481(a) adjustment computed on an aggregate basis for all JOAs into account in the year of change. Paragraph (d)(5)(i)(C) of

this section provides rules to coordinate the taking of a depletion deduction or a production credit with the inclusion of a section 481(a) adjustment arising from a change in method of accounting to the cumulative method under this paragraph (d)(5)(i).

(2) *Computation of the section 481(a) adjustment relating to a joint operating agreement—(i) In general.* The section 481(a) adjustment of a co-producer relating to a JOA is computed as of the first day of the co-producer's year of change and is equal to the difference between the amount of income reported under the co-producer's former method of accounting for all taxable years prior to the year of change and the amount of income that would have been reported if the co-producer's new method had been used in all those taxable years.

(ii) *Section 481(a) adjustment period.* Except to the extent that paragraph (d)(5)(i)(B)(3) of this section applies, a co-producer's section 481(a) adjustment relating to a JOA, whether positive or negative, is taken into account in computing taxable income ratably over the 6-taxable-year period beginning with the year of change (the section 481(a) adjustment period). If the co-producer has been in existence less than 6 taxable years, the adjustment is taken into account over the number of years the co-producer has been in existence. If the co-producer ceases to engage in the trade or business that gave rise to the section 481(a) adjustment at any time during the section 481(a) adjustment period, the entire remaining balance of the section 481(a) adjustment relating to that trade or business must be taken into account in the year of the cessation. For purposes of this paragraph (d)(5)(i)(B)(2)(ii), production under each JOA is treated as a separate trade or business. The determination as to whether the co-producer ceases to engage in its trade or business is to be made under the principles of § 1.446-1(e)(3)(ii) and its underlying administrative procedures. For example, the permanent cessation of production under a co-producer's JOA constitutes the cessation of a trade or business of the co-producer. Accordingly, for the year that production under a JOA permanently ceases, the remaining bal-

ance of the section 481(a) adjustment relating to the JOA must be taken into account.

(3) *Election to take aggregate section 481(a) adjustment for all joint operating agreements into account in the year of change—(i) In general.* A co-producer may elect to take into account its section 481(a) adjustment, computed on an aggregate basis for all of its JOAs, whether negative or positive, in the year of change, provided the co-producer uses the cumulative method for all of its JOAs entered into prior to its first taxable year beginning after December 31, 1994, and in effect as of the beginning of that year. The aggregate section 481(a) adjustment of a co-producer is equal to the difference between the amount of income reported under the co-producer's former method of accounting for all taxable years prior to the year of change and the amount of income that would have been reported if the co-producer's new method had been used in all of those taxable years for all JOAs for which the co-producer changes its method of accounting. An election made under this paragraph (d)(5)(i)(B)(3) is irrevocable. If any person who, together with another person, would be treated as a single taxpayer under section 41(f)(1) (A) or (B) makes an election under this paragraph (d)(5)(i)(B)(3), all persons within that single taxpayer group will be treated as if they had made an election under this paragraph (d)(5)(i)(B)(3) and, as such, will be irrevocably bound by that election. If a co-producer does not make an election under this paragraph, each JOA entered into prior to the start of its first taxable year beginning after December 31, 1994, and in effect as of the beginning of that year must be accounted for separately in computing the section 481(a) adjustment and taxable income of the co-producer for any year to which this paragraph (d) applies.

(ii) *Time and manner for making the election.* An election under this paragraph (d)(5)(i)(B)(3) is made by attaching a statement to the co-producer's timely filed return for its year of change indicating that the co-producer is electing under § 1.761-2(d)(5)(i)(B)(3)

to take its aggregate section 481(a) adjustment into account in the year of change.

(C) *Treatment of section 481(a) adjustment as a sale for purposes of computing a production credit and as gross income from the property for purposes of depletion deductions.* Any positive section 481(a) adjustment arising as a result of a change in method of accounting for gas imbalances under this paragraph (d)(5)(i) and taken into account in computing taxable income under paragraph (d)(5)(i)(B) of this section is considered a sale by the taxpayer for purposes of computing any production credit in the year that the adjustment is taken into account. Similarly, the positive section 481(a) adjustment is considered gross income from the property and taxable income from the property for purposes of computing depletion deductions in the year the adjustment is taken into account. Sales amounts used in computing any production credit in any year in which a negative section 481(a) adjustment is taken into account in computing taxable income under paragraph (d)(5)(i)(B) of this section must be reduced by the amount of the negative section 481(a) adjustment taken into account in that year. Similarly, gross income from the property and taxable income from the property used in computing any depletion deduction in any year in which the negative section 481(a) adjustment is taken into account must be reduced by the amount of the negative adjustment. For these purposes, any taxpayer that makes an aggregate section 481(a) adjustment election under paragraph (d)(5)(i)(B)(3) of this section must allocate the adjustment among its properties in any reasonable manner that prevents a duplication or omission of depletion deductions.

(ii) *Change in method of accounting to the annual method—(A) In general.* A co-producer changing to the annual method in accordance with paragraph (d)(2)(ii) of this section must request a change under § 1.446-1(e)(3) and will be subject to any terms and conditions as may be imposed by the Commissioner.

(B) *Section 481(a) adjustment.* A change in method of accounting to the annual method is a change in method of accounting to which the provisions

of section 481(a) apply. Thus, a section 481(a) adjustment must be taken into account to prevent the omission or duplication of income. If all the co-producers under a JOA have the same taxable year, the section 481(a) adjustment involved in a change to the annual method by a co-producer relating to the JOA is computed as of the first day of the co-producer's year of change. If the co-producers under a JOA do not all have the same taxable year (that is, in the case of a part-year change described in paragraph (d)(2)(ii)(C) of this section), the change in method of accounting occurs on January 1, 1996, and the section 481(a) adjustment is computed on that date.

(iii) *Untimely change in method of accounting to comply with this section.* Unless a co-producer required by this section to change its method of accounting complies with the provisions of this paragraph (d)(5) for its first applicable taxable year within the time prescribed by this paragraph (d)(5), the co-producer must take the section 481(a) adjustment into account under the provisions of any applicable administrative procedure that is prescribed by the Commissioner specifically for purposes of complying with this section. Absent such an administrative procedure, a co-producer must request a change under § 1.446-1(e)(3) and will be subject to any terms and conditions as may be imposed by the Commissioner.

(6) *Examples.* The following examples illustrate the application of the cumulative method described in paragraph (d)(3) of this section.

*Example 1.* Operation of the cumulative method. (i) L, a corporation using the cash receipts and disbursements method of accounting, and M, a corporation using an accrual method, file returns on a calendar year basis. On January 1, 1995, L and M enter into a JOA to produce natural gas as an unincorporated organization from a reservoir located in State Y. The JOA allocates reservoir production 60 percent to L and 40 percent to M. L and M enter into a GBA as an addendum to the JOA. L and M agree to use the cumulative method to account for gas sales from the reservoir and elect under section 761(a) and this section to exclude the organization from the application of subchapter K. Production from the reservoir is eligible for the section 29 credit for producing fuel from a nonconventional source. L and M produce and sell the following

## Internal Revenue Service, Treasury

## § 1.761-2

amounts of natural gas (in mmcf) until 2000 during which year production from the reservoir ceases:

	1995	1996	1997	1998	1999	2000
L .....	720	480	600	-0-	-0-	-0-
M .....	240	60	120	160	80	40

(ii) By the end of 1996, neither L nor M has fully produced its percentage share of the total gas in the reservoir. In 1997, L produces a total of 600 mmcf of gas at the rate of 50 mmcf per month. Prior to filing its return for 1997, L determines that it fully produced its percentage share of gas in the reservoir as of June 30, 1997. Pursuant to the GBA executed by L and M, L pays M at the end of 2000 for the 300 mmcf of M's gas (as determined under the cumulative method) that L sold in the last half of 1997.

(iii) For 1995, L and M must include in their gross income the amounts relating to gas sales of 720 mmcf and 240 mmcf, respectively. For 1996, L and M must include the amounts relating to gas sales of 480 mmcf and 60 mmcf, respectively. For both 1995 and 1996, L and M compute an allowance for depletion and a section 29 credit based upon gas taken and sold by each from the reservoir for each taxable year.

(iv) For 1997, L and M must include in gross income the amounts relating to their gas sales of 600 mmcf and 120 mmcf, respectively. Under paragraph (d)(3)(iii)(A) of this section, L computes an allowance for depletion and the section 29 credit based only on production from L's proportionate share of gas in the reservoir (that is, based on L's production through June 30, 1997). Accordingly, for 1997, L claims depletion and the section 29 credit only with respect to 300 mmcf of gas (50 mmcf per month  $\times$  6 months). For 1997, because M has not fully produced from its percentage share of the total gas in the reservoir as of the end of 1997, M claims depletion and the section 29 credit on the 120 mmcf that M produced in 1997.

(v) In 1998 and 1999, M must include in gross income the amounts relating to M's sales of gas, that is, 160 mmcf for 1998 and 80 mmcf for 1999. For 2000, M must include in gross income the amount relating to sales of 340 mmcf of gas, which consists of its own sales of 40 mmcf plus the payment for 300 mmcf of gas that L made to M for having sold from M's share of the total gas in the reservoir during the last half of 1997. Because M produced from its percentage share of the total gas in the reservoir during 1998, 1999, and 2000, M claims a depletion deduction and a section 29 credit on its income and production for those years, that is, 160 mmcf for 1998, 80 mmcf for 1999, and 40 mmcf for 2000. Additionally, for 2000, M claims depletion and the section 29 credit relating to the payment that M received from L for the 300

mmcf of M's gas that L sold in the last half of 1997. Under paragraph (d)(3)(ii)(B) of this section, L's deduction for its payment to M for the 300 mmcf of M's gas that L sold in 1997 is allowable only for 2000.

*Example 2. Adjustments under the cumulative method for depletion deductions and production credits that were claimed for sales in excess of a co-producer's percentage share of total gas in the reservoir.* (i) L, a corporation using the cash receipts and disbursements method of accounting, and M, a corporation using an accrual method, file returns on a calendar year basis. On January 1, 1995, L and M enter into a JOA to produce natural gas as an unincorporated organization from a reservoir located in State Y. The JOA allocates reservoir production 60 percent to L and 40 percent to M. L and M enter into a GBA as an addendum to the JOA. L and M agree to use the cumulative method to account for gas sales from the reservoir and elect under section 761(a) and this section to exclude the organization from the application of subchapter K. Production from the reservoir is eligible for the section 29 credit for producing fuel from a nonconventional source. L and M produce and sell the following amounts of natural gas (in mmcf) until 2000 during which year production from the reservoir ceases:

	1995	1996	1997	1998	1999	2000
L .....	720	480	600	60	60	-0-
M .....	240	60	120	60	60	40

(ii) In addition, L does not realize until December 31, 1999, that L fully produced its percentage share of the total gas in the reservoir as of June 30, 1997. At the time of filing its returns for 1997 and 1998, L reasonably believes that during 1997 and 1998, respectively, it did not fully produce its percentage share of the total gas in the reservoir. Thus, L claims depletion and the section 29 credit for its total sales of 600 mmcf in 1997 and 60 mmcf in 1998. Pursuant to the GBA executed by L and M, L pays M at the end of 2000 for the 420 mmcf of M's gas (as determined under the cumulative method) that L sold (300 mmcf in the last half of 1997 (assuming that production was at a rate of 50 mmcf per month), 60 mmcf in 1998, and 60 mmcf in 1999).

(iii) In 1997 and 1998, L and M include in gross income the amounts relating to their respective sales of gas, that is, for L 600 mmcf for 1997 and 60 mmcf for 1998, and for M 120 mmcf for 1997 and 60 mmcf for 1998.

(iv) For 1999, L must include in gross income the amount of its sales of 60 mmcf, but may not claim depletion or the section 29 credit on those sales. For 1999, M must include in gross income the amount of its sales of 60 mmcf and claims depletion and the section 29 credit with respect to those 60 mmcf.

(v) For 2000, M must include in gross income the amount relating to gas sales of 460 mmcf, that is, the amount of M's own gas sales of 40 mmcf and the amount of the payment received from L for the 420 mmcf of M's gas that L sold (consisting of 300 mmcf in 1997, 60 mmcf in 1998, and 60 mmcf in 1999). Under paragraph (d)(3)(iii)(A) of this section, M computes a depletion deduction and a production credit relating to the amount of M's actual gas sales for 2000 and the payment received from L, that is, relating to a total of 460 mmcf of gas (M's sales of 40 mmcf for 2000, plus L's payment for 420 mmcf of gas). Under paragraph (d)(3)(ii)(B) of this section, L's deduction for making its payment to M for 420 mmcf of gas is allowable only for 2000. Under paragraph (d)(3)(iii)(B) of this section, L must reduce its deduction by the amount of any percentage depletion deductions allowed on its sales of M's gas, that is, relating to 360 mmcf of gas (300 mmcf for 1997 and 60 mmcf for 1998). In addition, under paragraph (d)(3)(iii)(C) of this section, L must increase its tax for 2000 by the amount of any section 29 credit L claimed on its sales of M's gas, but only to the extent that the credit claimed actually reduced L's tax in any earlier year.

*Example 3. Non-abusive altering of the taking of production for a taxable year.* (i) C and D enter into a JOA and a GBA on December 1, 1994, for gas production from a reservoir. The JOA allocates production at 50 percent to C and 50 percent to D. C and D agree in writing to use the cumulative method to account for gas sales. Additionally, C and D elect under section 761(a) and this section to exclude their organization from the application of subchapter K. C and D arrange to sell all their production under annually renewable contracts. In 1995, C and D each sell 480 mmcf of gas from the reservoir.

(ii) In November 1995, D is notified that its contract with its purchaser will not be renewed for 1996. D is unable to find a new purchaser for its gas for 1996. In December 1995, D notifies C that it will not be taking production from the reservoir in 1996. Pursuant to the GBA, C then contracts with its current gas purchaser to sell an additional 20 mmcf per month in 1996. Accordingly, C sells 720 mmcf in 1996 (60 mmcf per month  $\times$  12 months). Under the facts described in this example, a principal purpose of altering the taking of production is not to avoid tax. Accordingly, the co-producers' election under section 761(a) will not be revoked by reason of altering the taking of production.

*Example 4. Abusive altering of the taking of production for a taxable year.* The facts are the same as in *Example 3(i)*. For 1996, C anticipates that C's regular tax (reduced by the credits allowable under sections 27 and 28) will not exceed C's tentative minimum tax. Accordingly, under section 29(b)(6), C's credit allowed under section 29(a) for sales of its

gas will be zero. For 1997, C anticipates that its credit allowed under section 29(a) will not be limited by section 29(b)(6). On the other hand, D anticipates that any credit it may claim under section 29(a) for 1996, even including a credit based on sales of C's share of current production under the JOA, will not be limited by section 29(b)(6). However, for 1997, D anticipates that its credit under section 29(a) will be limited by section 29(b)(6). On January 1, 1996, C and D agree that D will contract with its purchaser to sell the entire 960 mmcf produced from the reservoir in 1996 and that C will contract with its purchaser to sell the entire 960 mmcf produced from the reservoir in 1997. Under these facts, a principal purpose of altering the taking of production is to avoid tax. Accordingly, the co-producers' election under section 761(a) will be revoked for 1996 and for subsequent years.

(7) *Effective date.* Except in the case of a part-year change to the annual method or the cessation of a JOA, both of which are described in paragraph (d)(2)(ii)(C) of this section, the provisions of this paragraph (d) apply to all taxable years beginning after December 31, 1994, of any producer that is a member of an unincorporated organization that produces natural gas under a JOA in effect on or after the start of the producer's first taxable year beginning after December 31, 1994. In the case of a part-year change, the provisions of this paragraph (d) apply on and after January 1, 1996. In the case of the cessation of a JOA, the co-producers use their current method of accounting with respect to that JOA until the JOA ceases to be in effect.

(e) *Cross reference.* For requirements with respect to the filing of a return on Form 1065 by a partnership, see § 1.6031-1.

[T.D. 7208, 37 FR 20687, Oct. 3, 1972; 37 FR 23161, Oct. 31, 1972, as amended by T.D. 8578, 59 FR 66183, Dec. 23, 1994; 60 FR 11028, Mar. 1, 1995]

### § 1.761-3 Certain option holders treated as partners.

(a) *Noncompensatory option treated as a partnership interest—(1) General rule.* A noncompensatory option (as defined in paragraph (b)(2) of this section) is treated as a partnership interest for all Federal tax purposes if, on the date of a measurement event (as defined in paragraph (c) of this section) with respect to the option—

(i) The noncompensatory option (and any agreements associated with it) provides the option holder with rights that are substantially similar to the rights afforded a partner (as determined under paragraph (d) of this section); and

(ii) There is a strong likelihood that the failure to treat the holder of the noncompensatory option as a partner would result in a substantial reduction in the present value of the partners' and noncompensatory option holder's aggregate Federal tax liabilities (as determined under paragraph (e) of this section).

(2) *Continuing applicability of general principles of law.* The fact that an option is not treated as a partnership interest under this section does not prevent the option from being treated as a partnership interest under general principles of Federal tax law.

(3) *Timing of characterization.* If a noncompensatory option is treated under this section as a partnership interest, that treatment applies, as the case may be, upon the issuance of the option, or immediately before any other measurement event that gave rise to the characterization under paragraph (a)(1) of this section.

(4) *Effect of characterization.* If a noncompensatory option is treated as a partnership interest under this section or under general principles of law, the option holder will be treated as a partner with respect to the partnership interest and will receive a distributive share of the partnership's income, gain, loss, deduction, or credit (or items thereof), as determined in accordance with that partner's interest in the partnership (taking into account all facts and circumstances) in accordance with § 1.704-1(b)(3). Once a noncompensatory option is treated as a partnership interest, in no event may it be characterized as an option thereafter.

(b) *Definitions.* For purposes of this section:

(1) *Look-through entity.* *Look-through entity* means an entity described in § 1.704-1(b)(2)(iii)(d)(2).

(2) *Noncompensatory option.* *Noncompensatory option* means an option (as defined in paragraph (b)(3) of this section) issued by a partnership, other than an option issued in connection

with the performance of services. For purposes of applying this section, an option that would be a noncompensatory option under this paragraph if it had been issued by a partnership is a noncompensatory option if the option was issued by an eligible entity (as defined in § 301.7701-3(a)) that would become a partnership under § 301.7701-3(f)(2) if the noncompensatory option holder were treated as a partner. Also for purposes of applying this section, if a noncompensatory option is issued by such an eligible entity, then the eligible entity is treated as a partnership.

(3) *Option.* An *option* is a contractual right to acquire an interest in the issuing partnership, including a call option, warrant, or other similar arrangement. In addition, an option includes convertible debt (as defined in § 1.721-2(g)(2)) and convertible equity (as defined in § 1.721-2(g)(3)). To achieve the purposes of this section, the Commissioner can treat other contractual agreements, including a forward contract, a futures contract, or a notional principal contract, as an option. A contract that otherwise constitutes an option will not fail to be treated as an option for purposes of this section merely because it may or must be settled in cash or property other than a partnership interest.

(4) *Underlying partnership interest.* *Underlying partnership interest* means the interest in the issuing partnership that would be acquired by the noncompensatory option holder upon exercise of the noncompensatory option.

(c) *Measurement event*—(1) *General rule.* Except as provided in paragraph (c)(2) of this section, a measurement event with respect to a noncompensatory option is any of the following events:

(i) Issuance of the noncompensatory option;

(ii) An adjustment of the terms (modification) of the noncompensatory option or of the underlying partnership interest (as defined in paragraph (b)(4) of this section) (including an adjustment pursuant to the terms of the noncompensatory option or the underlying partnership interest);

(iii) Transfer of the noncompensatory option if either:

(A) The option may be exercised (or settled) more than 12 months after its issuance, or

(B) The transfer is pursuant to a plan in existence at the time of the issuance or modification of the noncompensatory option that has as a principal purpose the substantial reduction of the present value of the aggregate Federal tax liabilities of the partners and the noncompensatory option holder (under paragraph (a)(1)(ii) of this section);

(2) *Events not treated as measurement events.* A measurement event does not include the following events:

(i) A transfer of the noncompensatory option at death, between spouses or former spouses under section 1041, or in a transaction that is disregarded for Federal tax purposes;

(ii) A modification that neither materially increases the likelihood that the noncompensatory option will be exercised (as described in paragraph (d)(2) of this section) nor provides the noncompensatory option holder with partner attributes (as described in paragraph (d)(3) of this section);

(iii) A change in the strike price of a noncompensatory option or in the interests in the issuing partnership that may be issued or transferred pursuant to the noncompensatory option, made pursuant to a bona fide, reasonable adjustment formula that has the intended effect of preventing dilution of the interests of the noncompensatory option holder;

(iv) Any other event as provided in guidance published in the Internal Revenue Bulletin.

(d) *Rights substantially similar to partner rights—(1) In general.* A noncompensatory option provides the holder with rights that are substantially similar to the rights afforded to a partner if either the option is reasonably certain to be exercised or the option holder possesses partner attributes.

(2) *Reasonable certainty of exercise—(i) General rule.* The determination of whether a noncompensatory option is reasonably certain to be exercised at the time of a measurement event is based on all the facts and circumstances, including—

(A) The fair market value of the partnership interest that is the subject of the noncompensatory option;

(B) The strike price of the noncompensatory option;

(C) The term of the noncompensatory option;

(D) The volatility of the value or income of the issuing partnership or the underlying partnership interest;

(E) Anticipated distributions by the partnership during the term of the noncompensatory option;

(F) Any other special option features, such as a strike price that fluctuates;

(G) The existence of related options, including reciprocal options; and

(H) Any other arrangements affecting or undertaken with a principal purpose of affecting the likelihood that the noncompensatory option will be exercised.

(ii) *Safe harbors—(A) General rule.* Except as provided in paragraph (d)(2)(ii)(C) of this section, a noncompensatory option is not considered reasonably certain to be exercised if, as of the date of a measurement event with respect to the noncompensatory option—

(1) The option may be exercised no more than 24 months after the date of the measurement event and the strike price is equal to or greater than 110 percent of the fair market value of the underlying partnership interest on the date of the measurement event; or

(2) The terms of the option provide that the strike price of the option is equal to or greater than the fair market value of the underlying partnership interest on the exercise date.

(B) *Options exercisable at fair market value.* For purposes of paragraph (d)(2)(ii)(A) of this section, an option whose strike price is determined by a formula is considered to have a strike price equal to or greater than the fair market value of the underlying partnership interest on the exercise date if the formula is agreed upon by the parties when the option is issued in a bona fide attempt to arrive at the fair market value on the exercise date and is to be applied based on the facts and circumstances in existence on the exercise date.

(C) *Exception.* The safe harbors of paragraph (d)(2)(ii)(A) of this section

do not apply if the parties to the noncompensatory option had a principal purpose described in paragraph (c)(1)(iii)(B) of this section with respect to a measurement event for that option (or, if multiple options were issued pursuant to a plan, a measurement event with respect to any option issued pursuant to that plan).

(D) *Failure to satisfy safe harbor.* Failure of an option to satisfy one of the safe harbors of paragraph (d)(2)(ii)(A) does not affect the determination of whether an option is treated as reasonably certain to be exercised.

(3) *Partner attributes*—(i) *General rule.* The determination of whether a holder of a noncompensatory option possesses partner attributes is based on all the facts and circumstances, including whether the option holder, directly or indirectly, through the option agreement or a related agreement, is provided with voting rights or managerial rights in the partnership.

(ii) *Certain factors that conclusively establish partner attributes.* For purposes of this section, a noncompensatory option holder has partner attributes if, based on all the facts and circumstances—

(A) The option holder is provided with rights (through the option agreement or a related agreement) that are similar to rights ordinarily afforded to a partner to participate in partnership profits through present possessory rights to share in current operating or liquidating distributions with respect to the underlying partnership interests; or

(B) The option holder, directly or indirectly, undertakes obligations (through the option agreement or a related agreement) that are similar to obligations undertaken by a partner to bear partnership losses.

(iii) *Special rules.* The following rules apply for purposes of paragraphs (d)(3)(i) and (d)(3)(ii) of this section:

(A) Rights in the issuing partnership possessed by a noncompensatory option holder solely by virtue of owning an interest in the issuing partnership are not taken into account, provided that those rights are no greater than the rights granted to other partners owning substantially similar interests in the partnership and who do not hold

noncompensatory options in the partnership.

(B) If all of the partners owning substantially similar interests in the issuing partnership also hold noncompensatory options in the partnership, or if none of the other partners owns substantially similar interests in the partnership, then all facts and circumstances will be considered in determining whether the rights in the partnership possessed by the option holder are possessed solely by virtue of owning a partnership interest. If those rights are possessed solely by virtue of owning a partnership interest, they are not taken into account.

(C) A noncompensatory option holder will not ordinarily be considered to possess partner attributes solely because the noncompensatory option agreement significantly controls or restricts, or the noncompensatory option holder has the ability to significantly control or restrict, a partnership decision that could substantially affect the value of the underlying partnership interest. In particular, the following abilities of the option holder will not be treated as partner attributes:

(1) The ability to impose reasonable restrictions on partnership distributions or dilutive issuances of partnership equity or options while the noncompensatory option is outstanding.

(2) The ability to choose the partnership's section 704(c) method for partnership properties.

(D) When the applicable measurement event is a transfer described in paragraph (c)(1) of this section, the partner attributes of the transferee, not the transferor, are taken into account.

(E) The option holder will be treated as owning all partnership interests and noncompensatory options issued by the partnership that are owned by any person related to the option holder. For purposes of the preceding sentence, a person related to the option holder is defined as any person bearing a relationship to the option holder described in section 267(b) or 707(b).

(e) *Substantial tax reduction requirement*—(1) *General rule.* The determination of whether there is a strong likelihood that the failure to treat a noncompensatory option holder as a partner would result in a substantial reduction in the present value of the partners' and the noncompensatory option holder's aggregate Federal tax liabilities is based on all the facts and circumstances, including—

(i) The interaction of the allocations of the issuing partnership and the partners' and noncompensatory option holder's Federal tax attributes (taking into account tax consequences that result from the interaction of the allocations with the partners' and noncompensatory option holder's Federal tax attributes that are unrelated to the partnership);

(ii) The absolute amount of the Federal tax reduction;

(iii) The amount of the reduction relative to overall Federal tax liability; and

(iv) The timing of items of income and deductions.

(2) *Special rules.* For purposes of applying paragraph (e)(1) of this section to a partner or noncompensatory option holder that is—

(i) A look-through entity (as defined in paragraph (b)(1) of this section), the Federal tax consequences that result from the interaction of allocations of the partnership and the Federal tax attributes of any person that is an owner, or in the case of a trust or estate, the beneficiary, of an interest in such a partner or noncompensatory option holder, whether directly, or indirectly through one or more look-through entities, must be taken into account; or

(ii) A member of a consolidated group (within the meaning of § 1.1502-1(h)), the tax consequences that result from the interaction of the issuing partnership's allocations and the tax attributes of the consolidated group and the tax attributes of another member with respect to a separate return year must be taken into account.

(f) *Example.* The following example illustrates the provisions of this section. For purposes of the example, assume that PRS is a partnership for Federal tax purposes, none of the noncompensatory option holders or partners are

related persons, and that general principles of law do not apply to treat the noncompensatory option as a partnership interest. The example reads as follows:

*Example. Active trade or business.* PRS is engaged in an active real estate business, the amount of income, gain, loss, and deductions from which cannot be predicted with any reasonable certainty. In exchange for a premium of \$10x, PRS issues a noncompensatory option to A to acquire a 10 percent interest in PRS for \$110x at any time during a 3-year period commencing on the date on which the option is issued. At the time of the issuance of the noncompensatory option, a 10 percent interest in PRS has a fair market value of \$100x. Due to the nature of PRS's business, the value of a 10 percent PRS interest in 3 years is not reasonably predictable as of the time the noncompensatory option is issued. Assuming there are no other facts affecting the certainty of the option's exercise, it is not reasonably certain that A's option will be exercised. Therefore, assuming that A does not possess partner attributes as described in paragraph (d)(3) of this section, A's noncompensatory option is not treated as a partnership interest under paragraph (a)(1) of this section.

(g) *Effective/applicability date.* This section applies to noncompensatory options issued on or after February 5, 2013.

[T.D. 9612, 78 FR 8013, Feb. 5, 2013, as amended at 78 FR 17869, Mar. 25, 2013]

EFFECTIVE DATE FOR SUBCHAPTER K,  
CHAPTER 1 OF THE CODE

**§ 1.771-1 Effective date.**

(a) *General rule.* Except as provided in paragraph (b) or (c) of this section, the provisions of subchapter K, chapter 1 of the Code, shall apply to any taxable year of a partnership beginning after December 31, 1954, and to any part of a partner's taxable year falling within such partnership taxable year. The provisions of the Internal Revenue Code of 1939 relating to partnerships shall apply to any taxable year of a partnership beginning before January 1, 1955, and to any part of a partner's taxable year falling within such partnership taxable year. If a partnership and the partners are on different taxable years, subchapter K shall become effective at the same time both for the partnership and for the partners.

(b) *Special rules.* Certain provisions of section 771 apply after specific dates in 1954, as follows:

(1) *Adoption of taxable year.* Section 706(b) (relating to the adoption of taxable years by partners and partnerships), shall apply to any partnership which adopts or changes to, and any partner who changes to, a taxable year beginning on or after April 2, 1954. For the purpose of applying this subparagraph, the rules of section 708 (relating to the continuation of partnerships) shall apply. For example, if two or more partnerships merge after April 1, 1954, and the new partnership uses the taxable year of the partnership of which it is deemed to be the successor under section 708(b)(2)(A), it will not need prior approval to continue to use such taxable year even though such year may be different from the taxable years of the partners. Such a partnership is not "adopting" or "changing" its taxable year.

(2) *Property distributed by a partnership.* Section 735(a), relating to the character of gain or loss on disposition of property distributed by a partnership to a partner, shall apply only to property distributed after March 9, 1954. Although a partnership whose taxable year begins before January 1, 1955, generally will be subject to the provisions of the Internal Revenue Code of 1939, any unrealized receivables or inventory items distributed by any such partnership after March 9, 1954, will be subject to the provisions of section 735(a), and the gain or loss on the subsequent disposition of such property will be ordinary gain or loss rather than capital gain or loss. In the case of property distributed before March 10, 1954, section 735(a) will not apply, even though the property is disposed of by the distributee partner after that date, unless the partnership elects under paragraph (c) of this section to apply section 735.

(3) *Unrealized receivables and inventory items.* Section 751 (providing for the realization of ordinary income on certain transfers or distributions of unrealized receivables or substantially appreciated inventory items) shall be applicable to any such transfer or distribution occurring after March 9, 1954. For the purpose of applying section 751 in

the case of a taxable year beginning before January 1, 1955, a partnership or partner may elect to treat as applicable any other section of subchapter K. See paragraph (f) of § 1.751-1.

(4) *Partner receiving income in respect of a decedent.* Section 753, which provides that the amount includible in the gross income of a successor in interest of a deceased partner under section 736(a) shall be considered income in respect of a decedent under section 691, shall apply only in the case of payments made with respect to decedents whose death occurred after December 31, 1954.

(c) *Optional treatment of certain distributions.* (1) For a partnership taxable year beginning after December 31, 1953, and before January 1, 1955, a partnership may elect to apply the rules of certain sections of subchapter K with respect to current distributions made by the partnership in such year. These sections are 731, 732 (a), (c), and (e), 733, 735, and 751 (b), (c), and (d). If an election is made, it shall apply to the partnership and all its members for all current distributions made by the partnership during the taxable year. Such distributions shall also be subject to the rules of section 705 (relating to determination of basis of a partner's interest), 752 (relating to treatment of certain liabilities), and 761(d) (relating to the definition of liquidation of a partner's interest), to the extent that such sections apply to current distributions.

(2) An election under this paragraph shall be made by a statement filed with the partnership return for the taxable year to which such election applies, or before August 23, 1956, whichever date is later. The statement shall be signed by all members of the partnership and the election once made shall be binding on the partnership and on all of its members.

## INSURANCE COMPANIES

### LIFE INSURANCE COMPANIES

#### DEFINITION; TAX IMPOSED

### § 1.801-1 Definitions.

(a) *Life insurance company.* The term *life insurance company* as used in subtitle A of the Code is defined in section 801. For the purpose of determining

whether a company is a “life insurance company” within the meaning of that term as used in section 801, it must first be determined whether the company is taxable as an insurance company under the Code. For the definition of an “insurance company”, see paragraph (b) of this section. In determining whether an insurance company is a life insurance company, the life insurance reserves (as defined in section 803(b)) plus any unearned premiums and unpaid losses on noncancellable life, health, or accident policies, not included in “life insurance reserves” must comprise more than 50 percent of its total reserves (as defined in section 801). An insurance company writing only noncancellable life, health, or accident policies and having no “life insurance reserves” may qualify as a life insurance company if its unearned premiums and unpaid losses on such policies comprise more than 50 percent of its total reserves. A noncancellable insurance policy means a contract which the insurance company is under an obligation to renew or continue at a specified premium and with respect to which a reserve in addition to the unearned premium must be carried to cover that obligation. For the purpose of the preceding sentence, the term “unearned premium” means the amount which will cover the cost of carrying the insurance risk for the period for which the premium has been paid in advance. A burial or funeral benefit insurance company qualifying as a life insurance company engaged directly in the manufacture of funeral supplies or the performance of funeral services will be taxable under section 821 or section 831 as an insurance company other than life.

(b) *Insurance companies.* (1) Insurance companies include both stock and mutual companies, as well as mutual benefit insurance companies. A voluntary unincorporated association of employees formed for the purpose of relieving sick and aged members and the dependents of deceased members is an insurance company, whether the fund for such purpose is created wholly by membership dues or partly by contributions from the employer. A corporation which merely sets aside a fund for the insurance of its employees

is not required to file a separate return for such fund, but the income therefrom shall be included in the return of the corporation.

(2) Though its name, charter powers, and subjection to State insurance laws are significant in determining the business which a corporation is authorized and intends to carry on, the character of the business actually done in the taxable year determines whether it is taxable as an insurance company under the Code. For example, during the year 1954 the M Corporation, incorporated under the insurance laws of the State of R, carried on the business of lending money in addition to guaranteeing the payment of principal and interest of mortgage loans. Of its total income for the year, one-third was derived from its insurance business of guaranteeing the payment of principal and interest of mortgage loans and two-thirds was derived from its noninsurance business of lending money. The M Corporation is not an insurance company for the year 1954 within the meaning of the Code and the regulations thereunder.

#### § 1.801-2 Taxable years affected.

Section 1.801-1 is applicable only to taxable years beginning after December 31, 1953, and before January 1, 1955, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, before amendments. Sections 1.801-3 through 1.801-7 are applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112). Section 1.801-8 is applicable only to taxable years beginning after December 31, 1961, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112) and section 3 of the Act of October 23, 1962 (76 Stat. 1134).

[T.D. 6886, 31 FR 8681, June 23, 1966]

**§ 1.801-3 Definitions.**

For purposes of part I, subchapter L, chapter 1 of the Code, this section defines the following terms, which are to be used in determining if a taxpayer is a life insurance company (as defined in section 801(a) and paragraph (b) of this section):

(a) *Insurance company.* (1) The term *insurance company* means a company whose primary and predominant business activity during the taxable year is the issuing of insurance or annuity contracts or the reinsuring of risks underwritten by insurance companies. Thus, though its name, charter powers, and subjection to State insurance laws are significant in determining the business which a company is authorized and intends to carry on, it is the character of the business actually done in the taxable year which determines whether a company is taxable as an insurance company under the Internal Revenue Code.

(2) Insurance companies include both stock and mutual companies, as well as mutual benefit insurance companies. For taxable years beginning before January 1, 1970, a voluntary unincorporated association of employees, including an association fulfilling the requirements of section 801(b)(2)(B) (as in effect for such years), formed for the purpose of relieving sick and aged members and the dependents of deceased members, is an insurance company, whether the fund for such purpose is created wholly by membership dues or partly by contributions from the employer. A corporation which merely sets aside a fund for the insurance of its employees is not an insurance company, and the income from such fund shall be included in the return of the corporation.

(b) *Life insurance company.* (1) The term *life insurance company*, as used in subtitle A of the Code, is defined in section 801(a). For the purpose of determining whether a company is a "life insurance company" within the meaning of that term as used in section 801(a), it must first be determined whether the company is taxable as an insurance company (as defined in paragraph (a) of this section). An insurance company shall be taxed as a life insurance company if it is engaged in the

business of issuing life insurance and annuity contracts (either separately or combined with health and accident insurance), or noncancellable contracts of health and accident insurance, and its life insurance reserves (as defined in section 801(b) and § 1.801-4), plus unearned premiums, and unpaid losses (whether or not ascertained), on noncancellable life, health, or accident policies not included in life insurance reserves, comprise more than 50 percent of its total reserves (as defined in section 801(c) and § 1.801-5). For purposes of determining whether it satisfies the percentage requirements of the preceding sentence, a company shall first make any adjustments to life insurance reserves and total reserves required by section 806(a) (relating to adjustments for certain changes in reserves and assets) and then as required by section 801(d) (relating to adjustments in reserves for policy loans). For examples of the adjustments required under section 806(a), see paragraph (b)(4) of § 1.806-3. For an example of the adjustments required under section 801(d), see paragraph (c) of § 1.801-6. Furthermore, if an insurance company which computes its life insurance reserves on a preliminary term basis elects to revalue such reserves on a net level premium basis under section 818(c), such revalued basis shall be disregarded for purposes of section 801.

(2) An insurance company writing only noncancellable life, health, or accident policies and having no "life insurance reserves" may qualify as a life insurance company if its unearned premiums, and unpaid losses (whether or not ascertained), on such policies comprise more than 50 percent of its total reserves.

(3) Section 801(f) provides that a burial or funeral benefit insurance company engaged directly in the manufacture of funeral supplies or the performance of funeral services shall not be taxable under section 802 but shall be taxable under section 821 or section 831 as an insurance company other than life.

(c) *Noncancellable life, health, or accident insurance policy.* The term *noncancellable life, health, or accident insurance policy* means a health and accident contract, or a health and accident

#### § 1.801-4

#### 26 CFR Ch. I (4-1-14 Edition)

contract combined with a life insurance or annuity contract, which the insurance company is under an obligation to renew or continue at a specified premium and with respect to which a reserve in addition to the unearned premiums (as defined in paragraph (e) of this section) must be carried to cover that obligation. Such a health and accident contract shall be considered noncancellable even though it states a termination date at a stipulated age, if, with respect to the health and accident contract, such age termination date is 60 or over. Such a contract, however, shall not be considered to be noncancellable after the age termination date stipulated in the contract has passed. However, if the age termination date stipulated in the contract occurs during the period covered by a premium received by the life insurance company prior to such date, and the company cannot cancel or modify the contract during such period, the age termination date shall be deemed to occur at the expiration of the period for which the premium has been received.

(d) *Guaranteed renewable life, health, and accident insurance policy.* The term *guaranteed renewable life, health, and accident insurance policy* means a health and accident contract, or a health and accident contract combined with a life insurance or annuity contract, which is not cancellable by the company but under which the company reserves the right to adjust premium rates by classes in accordance with its experience under the type of policy involved, and with respect to which a reserve in addition to the unearned premiums (as defined in paragraph (e) of this section) must be carried to cover that obligation. Section 801(e) provides that such policies shall be treated in the same manner as noncancellable life, health, and accident insurance policies. For example, the age termination date requirements applicable to noncancellable health and accident insurance policies shall also apply to guaranteed renewable life, health, and accident insurance policies. See paragraph (c) of this section.

(e) *Unearned premiums.* The term *unearned premiums* means those amounts which shall cover the cost of carrying

the insurance risk for the period for which the premiums have been paid in advance. Such term includes all unearned premiums, whether or not required by law.

(f) *Life insurance reserves.* For the definition of the term “life insurance reserves”, see section 801(b) and § 1.801-4.

(g) *Unpaid losses (whether or not ascertained).* The term *unpaid losses (whether or not ascertained)* means a reasonable estimate of the amount of the losses (based upon the facts in each case and the company’s experience with similar cases):

(1) Reported and ascertained by the end of the taxable year but where the amount of the loss has not been paid by the end of the taxable year,

(2) Reported by the end of the taxable year but where the amount thereof has not been either ascertained or paid by the end of the taxable year, or

(3) Which have occurred by the end of the taxable year but which have not been reported or paid by the end of the taxable year.

(h) *Total reserves.* For the definition of the term *total reserves*, see section 801(c) and § 1.801-5.

(i) *Amount of reserves.* For purposes of subsections (a), (b), and (c) of section 801 and this section, section 801(b)(5) provides that the amount of any reserve (or portion thereof) for any taxable year shall be the mean of such reserve (or portion thereof) at the beginning and end of the taxable year.

[T.D. 6513, 25 FR 12655, Dec. 10, 1960, as amended by T.D. 7172, 37 FR 5619, Mar. 17, 1972]

#### § 1.801-4 Life insurance reserves.

(a) *Life insurance reserves defined.* For purposes of part I, subchapter L, chapter 1 of the Code, the term *life insurance reserves* (as defined in section 801(b)) means those amounts:

(1) Which are computed or estimated on the basis of recognized mortality or morbidity tables and assumed rates of interest;

(2) Which are set aside to mature or liquidate, either by payment or reinsurance, future unaccrued claims arising from life insurance, annuity, and noncancellable health and accident insurance contracts (including life insurance or annuity contracts combined

with noncancellable health and accident insurance) involving, at the time with respect to which the reserve is computed, life, health, or accident contingencies; and

(3) Which, except as otherwise provided by section 801(b)(2) and paragraphs (b) and (c) of this section, are required by law. For the meaning of the term “reserves required by law”, see paragraph (b) of § 1.801-5.

For purposes of determining life insurance reserves, only those amounts shall be taken into account which must be reserved either by express statutory provisions or by rules and regulations of the insurance department of a State, Territory, or the District of Columbia when promulgated in the exercise of a power conferred by statute. Moreover, such amounts must actually be held by the company during the taxable year for which the reserve is claimed. However, reserves held by the company with respect to the net value of risks reinsured in other solvent companies (whether or not authorized) shall be deducted from the company's life insurance reserves. For example, if an ordinary life policy with a reserve of \$100 is reinsured in another solvent company on a yearly renewable term basis, and the reserve on such yearly renewable term policy is \$10, the reinsured company shall include \$90 (\$100 minus \$10) in determining its life insurance reserves. Generally, life insurance reserves, as in the case of level premium life insurance, are held to supplement the future premium receipts when the latter, alone, are insufficient to cover the increased risk in the later years. For examples of reserves which qualify as life insurance reserves, see paragraph (d) of this section. For examples of reserves which do not qualify as life insurance reserves, see paragraph (e) of this section.

(b) *Certain reserves which need not be required by law.* Section 801(b)(2) sets forth certain reserves which, though not required by law, may still qualify as life insurance reserves, provided, however, that they first satisfy the requirements of section 801(b)(1) (A) and (B) and paragraph (a) (1) and (2) of this section. Thus, reserves need not be required by law:

(1) In the case of policies covering life, health, and accident insurance combined in one policy issued on the weekly premium payment plan, continuing for life and not subject to cancellation, and

(2) For taxable years beginning before January 1, 1970, in the case of policies issued by an organization which met the requirements of section 501(c)(9) (as it existed prior to amendment by the Tax Reform Act of 1969) other than the requirement of subparagraph (B) thereof.

(c) *Assessment companies.* Section 801(b)(3) provides that in the case of an assessment life insurance company or association, the term *life insurance reserves* includes:

(1) Sums actually deposited by such company or association with officers of a State or Territory pursuant to law as guaranty or reserve funds, and

(2) Any funds maintained, under the charter or articles of incorporation or association of such company or association (or bylaws approved by the State insurance commissioner) of such company or association, exclusively for the payment of claims arising under certificates of membership or policies issued upon the assessment plan and not subject to any other use.

For purposes of part I, subchapter L, chapter 1 of the Code, the reserves described in this paragraph shall be included as life insurance reserves even though such reserves do not meet the requirements of section 801(b) and paragraph (a) of this section. However, for such reserves to be included as life insurance reserves, they must be deposited or maintained to liquidate future unaccrued claims arising from life insurance, annuity, or noncancellable health and accident insurance contracts (including life insurance or annuity contracts combined with noncancellable health and accident insurance) involving, at the time with respect to which the reserve is deposited or maintained, life, health, or accident contingencies. The rate of interest assumed in calculating the reserves described in this paragraph shall be 3 percent, regardless of the rate of interest (if any) specified in the contract in respect of such reserves.

(d) *Reserves which qualify as life insurance reserves.* The following reserves, provided they meet the requirements of section 801(b) and paragraph (a) of this section, are illustrative of reserves which shall be included as life insurance reserves:

(1) Reserves held under life insurance contracts.

(2) Reserves held under annuity contracts (including reserves held under variable annuity contracts as described in section 801(g)(1)).

(3) Reserves held under noncancellable health and accident insurance contracts (as defined in paragraph (c) of § 1.801-3) and reserves held under guaranteed renewable health and accident insurance contracts (as defined in paragraph (d) of § 1.801-3).

(4) Reserves held either separately or combined under contracts described in subparagraphs (1), (2), or (3) of this paragraph.

(5) Reserves held under deposit administration contracts. Generally, the reserves held by a life insurance company on both the active and retired lives under deposit administration contracts will meet the requirements of section 801(b) and paragraph (a) of this section.

However, reserves held by the company with respect to the net value of risks reinsured in other solvent companies (whether or not authorized) shall be deducted from the company's life insurance reserves. See paragraph (a) of this section.

(e) *Reserves and liabilities which do not qualify as life insurance reserves.* The following are illustrative of reserves and liabilities which do not meet the requirements of section 801(b) and paragraph (a) of this section and, accordingly, shall not be included as life insurance reserves:

(1) Liability for supplementary contracts not involving at the time with respect to which the liability is computed, life, health, or accident contingencies.

(2) In the case of cancellable health and accident policies and similar cancellable contracts, the unearned premiums and unpaid losses (whether or not ascertained).

(3) The unearned premiums, and unpaid losses (whether or not

ascertained), on noncancellable life, health, or accident policies (and guaranteed renewable life, health, and accident policies) not included in life insurance reserves. (However, such amounts shall be taken into account under section 801(a)(2) for purposes of determining whether an insurance company is a life insurance company.)

(4) The deficiency reserve (as defined in section 801(b)(4)) for each individual contract, that is, that portion of the reserve for such contract equal to the amount (if any) by which:

(i) The present value of the future net premiums required for such contract, exceeds

(ii) The present value of the future actual premiums and consideration charged for such contract.

(5) Reserves required to be maintained to provide for the ordinary operating expenses of a business which must be currently paid by every company from its income if its business is to continue, such as taxes, salaries, and unpaid brokerage.

(6) Liability for premiums received in advance.

(7) Liability for premium deposit funds.

(8) Liability for annual and deferred dividends declared or apportioned.

(9) Liability for dividends left on deposit at interest.

(10) Liability for accrued but unsettled policy claims whether known or unreported.

(11) A mandatory securities valuation reserve.

(f) *Adjustments to life insurance reserves.* In the event it is determined on the basis of the facts of a particular case that premiums deferred and uncollected and premiums due and unpaid are not properly accruable for the taxable year under section 809 and, accordingly, are not properly includible under assets (as defined in section 805(b)(4)) for the taxable year, appropriate reduction shall be made in the life insurance reserves. This reduction shall be made when the insurance company has calculated life insurance reserves on the assumption that the premiums on all policies are paid annually or that all

## Internal Revenue Service, Treasury

## § 1.801-5

premiums due on or prior to the date of the annual statement have been paid.

[T.D. 6513, 25 FR 12656, Dec. 10, 1960, as amended by T.D. 7172, 37 FR 5619, Mar. 17, 1972]

### § 1.801-5 Total reserves.

(a) *Total reserves defined.* For purposes of section 801(a) and § 1.801-3, the term “total reserves” is defined in section 801(c) as the sum of:

(1) Life insurance reserves (as defined in section 801(b) and § 1.801-4),

(2) Unearned premiums (as defined in paragraph (e) of § 1.801-3), and unpaid losses (whether or not ascertained) (as defined in paragraph (g) of § 1.801-3), not included in life insurance reserves, and

(3) All other insurance reserves required by law.

The term “total reserves” does not, however, include deficiency reserves (within the meaning of section 801(b)(4), and paragraph (e)(4) of § 1.801-4), even though such deficiency reserves are required by State law. In determining total reserves, a company is permitted to make use of the highest aggregate reserve required by any State or Territory or the District of Columbia in which it transacts business, but the reserve must have been actually held during the taxable year for which the reserve is claimed. For example, during the taxable year 1958 a life insurance company sells life insurance and annuity contracts in States A and B. State A requires reserves of 10 against the life and 5 against the annuity business. State B requires reserves of 9 against the life and 7 against the annuity business. Assuming the company actually holds these reserves during the taxable year 1958, its highest aggregate reserve for such taxable year is the 16 required by State B. Thus, the company is not permitted to compute its highest aggregate reserve by taking State A's requirement of 10 against its life insurance business and adding it to State B's requirement of 7 against its annuity business.

(b) *Reserves required by law defined.* For purposes of part I, subchapter L, chapter 1 of the Code, the term *reserves required by law* means reserves which are required either by express statutory provisions or by rules and regula-

tions of the insurance department of a State, Territory, or the District of Columbia when promulgated in the exercise of a power conferred by statute, and which are reported in the annual statement of the company and accepted by state regulatory authorities as held for the fulfillment of the claims of policyholders or beneficiaries.

(c) *Information to be filed.* In any case where reserves are claimed, sufficient information must be filed with the return to enable the district director to determine the validity of the claim. See section 6012 and paragraph (c) of § 1.6012-2. If the basis (for Federal income tax purposes) for determining the amount of any of the life insurance reserves as of the close of the taxable year differs from the basis for such determination as of the beginning of the taxable year then the following information must be filed with respect to all such changes in basis:

(1) The nature of the life insurance reserve (i.e., life, annuity, etc.);

(2) The mortality or morbidity table, assumed rate of interest, method used in computing or estimating such reserve on the old basis, and the amount of such reserve at the beginning and close of the taxable year computed on the old basis;

(3) The mortality or morbidity table, assumed rate of interest, method used in computing or estimating such reserve on the new basis, and the amount of such reserve at the close of the taxable year computed on the new basis;

(4) The deviation, if any, from recognized mortality or morbidity tables, or recognized methods of computation;

(5) The reasons for the change in basis of such reserve; and

(6) Whether such change in the reserve has been approved or accepted by the regulatory authorities of the State of domicile, and if so, a copy of the letter, certificate, or other evidence of such approval or acceptance.

(d) *Illustration of principles.* The provisions of section 801 relating to the percentage requirements for qualification as a life insurance company may be illustrated by the following example:

*Example.* The books of Y, an insurance company, selling life insurance,

## § 1.801-6

noncancellable health and accident insurance, and cancellable accident and health insurance, reflect (after adjustment under sections 806(a) and 801(d)) the following facts for the taxable year 1958:

	Jan. 1	Dec. 31	Mean of year
1. Life insurance reserves .....	\$3,000	\$5,000	\$4,000
2. Unearned premiums, and unpaid losses (whether or not ascertained), on noncancellable accident and health insurance not included in life insurance reserves .....	400	600	500
3. Unearned premiums, and unpaid losses (whether or not ascertained), on cancellable accident and health insurance .....	1,800	2,200	2,000
4. All other insurance reserves required by law .....	900	1,100	1,000
5. Total reserves .....			7,500

The rules provided by section 801 require that the sum of the mean of the year figures in items 1 and 2 comprise more than 50 percent of the mean of the year figure in item 5 for an insurance company to qualify as a life insurance company. Thus, Y would qualify as a life insurance company for the taxable year 1958 as the sum of the mean of the year figures in items 1 and 2 (\$4,500) comprise 60 percent of the mean of the year figure in item 5 (\$7,500).

[T.D. 6513, 25 FR 12657, Dec. 10, 1960]

### § 1.801-6 Adjustments in reserves for policy loans.

(a) *In general.* Section 801(d) provides that for purposes only of determining whether or not an insurance company is a life insurance company (as defined in section 801(a) and paragraph (b) of § 1.801-3), the life insurance reserves (as defined in section 801(b) and § 1.801-4), and the total reserves (as defined in section 801(c) and paragraph (a) of § 1.801-5), shall each be reduced by an amount equal to the mean of the aggregates, at the beginning and end of the taxable year, of the policy loans outstanding with respect to contracts for which life insurance reserves are maintained. Such reduction shall be made after any adjustments required under section 806(a) and § 1.806-3 have been made.

(b) *Policy loans defined.* The term *policy loans* includes loans made by the insurance company, by whatever name called, for which the reserve on a contract is the collateral.

## 26 CFR Ch. I (4-1-14 Edition)

(c) *Illustration of principles.* The provisions of section 801(d) and this section may be illustrated by the following example:

*Example.* The books of T, an insurance company, selling only life insurance and cancellable accident and health insurance, reflect (after adjustment under section 806 (a)) the following facts for the taxable year 1958:

	Jan. 1	Dec. 31	Mean of year
1. Life insurance reserves .....	\$1,000	\$2,000	\$1,500
2. Policy loans .....	50	850	450
3. Life insurance reserves less policy loans .....			1,050
4. Unearned premiums, and unpaid losses (whether or not ascertained), on cancellable accident and health insurance .....	900	1,600	1,250
5. Total reserves adjusted for policy loans (item 3 plus item 4) .....			2,300

As the rules provided by section 801 (a) and (d) require that the figure in item 3 (\$1,050) be more than 50 percent of the mean of the year figure in item 5 (\$2,300) for an insurance company to qualify as a life insurance company, T would not qualify as a life insurance company for the taxable year 1958.

[T.D. 6513, 25 FR 12657, Dec. 10, 1960]

### § 1.801-7 Variable annuities.

(a) *In general.* (1) Section 801(g)(1) provides that for purposes of part I, subchapter L, chapter 1 of the Code, an annuity contract includes a contract which provides for the payment of a variable annuity computed on the basis of recognized mortality tables and the investment experience of the company issuing such a contract. A variable annuity differs from the ordinary or fixed dollar annuity in that the annuity benefits payable under a variable annuity contract vary with the insurance company's investment experience with respect to such contracts while the annuity benefits paid under a fixed dollar annuity contract are guaranteed irrespective of the company's actual investment earnings.

(2) The reserves held with respect to the annuity contracts described in section 801(g)(1) and subparagraph (1) of this paragraph shall qualify as life insurance reserves within the meaning of section 801(b)(1) and paragraph (a) of

§ 1.801-4 provided such reserves are required by law (as defined in paragraph (b) of § 1.801-5) and are set aside to mature or liquidate, either by payment or reinsurance, future unaccrued claims arising from such contracts involving, at the time with respect to which the reserve is computed, life, health, or accident contingencies. Accordingly, a company issuing variable annuity contracts shall qualify as a life insurance company for Federal income tax purposes if it satisfies the requirements of section 801(a) (relating to the definition of a life insurance company) and paragraph (b) of § 1.801-3.

(b) *Special rules for variable annuities—*

(1) *Adjusted reserves rate; assumed rate.* The adjusted reserves rate for any taxable year with respect to the annuity contracts described in section 801(g)(1) and paragraph (a)(1) of this section, and the rate of interest assumed by the taxpayer for any taxable year in calculating the reserve on any such contract, shall be a rate equal to the current earnings rate determined under section 801(g)(3) and subparagraph (2) of this paragraph. However, any change in the rate of interest assumed by the taxpayer in calculating the reserve on a variable annuity contract for any taxable year which is attributable to an increase or decrease in the current earnings rate, shall not be treated as a change of basis in computing reserves for purposes of section 806(b) (relating to certain changes in reserves) or section 810 (d)(1) (relating to adjustment for change in computing reserves).

(2) *Current earnings rate.* (i) The current earnings rate for any taxable year with respect to the annuity contracts described in section 801(g)(1) and paragraph (a)(1) of this section shall be the current earnings rate determined under section 805(b)(2) and paragraph (a)(2) of § 1.805-5 with respect to such contracts, reduced by the percentage obtained by dividing (a) the amount of the actuarial margin charge on all such variable annuity contracts issued by the taxpayer, by (b) the mean of the reserves for such contracts.

(ii) For purposes of section 801(g)(3) and subdivision (i) of this subparagraph, the term *actuarial margin charge* means any amount retained by the company from gross investment in-

come pursuant to the terms of the variable annuity contract in excess of any portion of the investment expenses which is attributable to such contract and which is deductible under section 804(c) and paragraph (b) of § 1.804-4.

(3) *Increases and decreases in reserves.*

(i) Section 801(g)(4) provides that for purposes of section 810 (a) and (b) (relating to adjustments for increases or decreases in certain reserves), the sum of the items described in section 810(c) and paragraph (b) of § 1.810-2 taken into account as of the close of the taxable year shall be adjusted:

(a) By subtracting therefrom the sum of any amounts added from time to time (for the taxable year) to the reserves for variable annuity contracts described in section 801(g)(1) and paragraph (a)(1) of this section by reason of realized or unrealized appreciation in the value of the assets held in relation thereto, and

(b) By adding thereto the sum of any amounts subtracted from time to time (for the taxable year) from such reserves by reason of realized or unrealized depreciation in the value of such assets.

(ii) The application of section 801(g)(4) and subdivision (i) of this subparagraph may be illustrated by the following example:

*Example.* Company M, a life insurance company issuing only variable annuity contracts of the type described in section 801(g)(1) and paragraph (a)(1) of this section, increased its life insurance reserves held with respect to such contracts during the taxable year 1959 by \$275,000. Of the total increase in the reserves, \$100,000 was attributable to premium receipts, \$50,000 to dividends and interest, \$100,000 to unrealized appreciation in the value of the assets held in relation to such reserves, and \$25,000 to realized capital gains on the sale of such assets. As of the close of the taxable year 1959, the reserves held by company M with respect to all variable annuity contracts amounted to \$1,275,000. However, under section 801(g)(4) and subdivision (i) of this subparagraph, this amount must be reduced by the \$100,000 unrealized asset value appreciation and the \$25,000 of realized capital gains. Accordingly, for purposes of section 810 (a) and (b), the amount of these reserves which is to be taken into account as of the close of the taxable year 1959 under section 810(c) is \$1,150,000 (\$1,275,000 less \$125,000).

(c) *Companies issuing variable annuities and other contracts.* (1) In the case of a life insurance company which issues both annuity contracts described in section 801(g)(1) and paragraph (a)(1) of this section and other contracts, the policy and other contract liability requirements (as defined in section 805(a) and paragraph (b) of § 1.805-4) of such a company for any taxable year shall be considered to be the sum of:

(i) The policy and other contract liability requirements computed with respect to the items which relate to such variable annuity contracts, and

(ii) The policy and other contract liability requirements computed by excluding the items taken into account under subdivision (i) of this subparagraph.

(2) [Reserved for regulations to be issued under section 801(g)(5)(B).]

(d) *Termination.* Paragraphs (1), (2), (3), (4), and (5) of section 801(g) and paragraphs (a), (b), (c), and (d) of this section shall not apply with respect to any taxable year beginning after December 31, 1962.

[T.D. 6610, 27 FR 8717, Aug. 31, 1962]

**§ 1.801-8 Contracts with reserves based on segregated asset accounts.**

(a) *Definitions*—(1) *Annuity contracts include variable annuity contracts.* Section 801(g)(1)(A) provides that for purposes of part I, subchapter L, chapter 1 of the Code, an annuity contract includes a contract which provides for the payment of a variable annuity computed on the basis of recognized mortality tables and the investment experience of the company issuing such a contract. A variable annuity differs from the ordinary or fixed dollar annuity in that the annuity benefits payable under a variable annuity contract vary with the insurance company's investment experience with respect to such contracts while the annuity benefits paid under a fixed dollar annuity contract are guaranteed irrespective of the company's actual investment earnings.

(2) *Contracts with reserves based on a segregated asset account.* (i) For purposes of part I, section 801(g)(1)(B) defines the term *contract with reserves based on a segregated asset account* as a contract (individual or group):

(a) Which provides for the allocation of all or part of the amounts received under the contract to an account which, pursuant to State law or regulation, is segregated from the general asset accounts of the company,

(b) Which provides for the payment of annuities, and

(c) Under which the amounts paid in, or the amount paid as annuities, reflect the investment return and the market value of the segregated asset account.

(ii) The term *contract with reserves based on a segregated asset account* includes a contract such as a variable annuity contract, which reflects the investment return and the market value of the segregated asset account, even though such contract provides for the payment of an annuity computed on the basis of recognized mortality tables, but the term includes such contract only for the period during which it satisfies the requirements of section 801(g)(1)(B) and subdivision (i) of this subparagraph. However, such term does not include a pension contract written on the basis of the so-called new-money concept. Thus, for example, such term does not include a pension contract whereby reserves are credited on the basis of the company's new high yield investments. Furthermore, such term does not include a contract which during the taxable year contains a right to participate in the divisible surplus of the company where such right merely reflects the company's investment return. Nevertheless, the term does include a contract which meets the requirements of section 801(g)(1)(B) and of this subparagraph even if part of the amounts received are, for example, allocated to reserves under provisions of the contract which are written on the basis of the new-money concept. However, such reserves do not qualify as a segregated asset account referred to in section 801(g) and this section.

(iii) If at any time during the taxable year a contract otherwise satisfying the requirements of section 801(g)(1)(B) and subdivision (i) of this subparagraph ceases to reflect current investment return and current market value, such contract shall not be considered as meeting the requirements of section 801(g)(1)(B)(iii) and subdivision (i)(c) of

this subparagraph after such cessation. Thus, a contract with reserves based on a segregated asset account includes a contract under which the reflection of investment return and market value terminates at the beginning of the annuity payments, but only for the period prior to such termination. For example, if the purchaser of a variable annuity contract which meets such requirements elects an option which provides for the payment of a fixed dollar annuity, then such contract shall be considered as satisfying such requirements only for the period prior to the time such contract ceases to reflect current investment return and current market value. Furthermore, a group annuity contract which satisfies the requirements of section 801(g)(1)(B) and subdivision (i) of this subparagraph shall be considered as continuing to meet such requirements even though a certificate holder under the group contract elects an option which provides for the payment of a fixed dollar annuity. However, the annuity attributable to such certificate holder shall not be considered as satisfying such requirements as of the time such annuity ceases to reflect current investment return and current market value. On the other hand, a group annuity contract which does not reflect current market value shall not be considered as satisfying such requirements even though a certificate holder under the group contract elects an option which provides for the payment of a variable annuity. However, the variable annuity attributable to such certificate holder shall be considered as satisfying such requirements as of the time such variable annuity commences to reflect current investment return and current market value.

(b) *Life insurance reserves.* Section 801(g)(2) provides that for purposes of section 801(b)(1)(A), the reflection of the investment return and the market value of the segregated asset account shall be considered an assumed rate of interest. Thus, the reserves held with respect to contracts described in section 801(g)(1) and paragraph (a) of this section shall qualify as life insurance reserves within the meaning of section 801(b)(1) and paragraph (a) of § 1.801-4 provided such reserves are required by

law (as defined in paragraph (b) of § 1.801-5) and are set aside to mature or liquidate, either by payment or reinsurance, future unaccrued claims arising from such contracts with reserves based on segregated asset accounts involving, at the time with respect to which the reserve is computed, life, health, or accident contingencies. Accordingly, a company issuing contracts with reserves based on segregated asset accounts shall qualify as a life insurance company for Federal income tax purposes if it satisfies the requirements of section 801(a) (relating to the definition of a life insurance company) and paragraph (b) of § 1.801-3.

(c) *Separate accounting.* (1) For purposes of part I, section 801(g)(3) provides that a life insurance company (as defined in section 801(a) and paragraph (b) of § 1.801-3) which issues contracts with reserves based on segregated asset accounts (as defined in section 801(g)(1)(B) and paragraph (a)(2) of this section) shall separately account for each and every income, exclusion, deduction, asset, reserve, and other liability item which is properly attributable to such segregated asset accounts. In those cases where such items are not directly accounted for, separate accounting shall be made:

(i) According to the method regularly employed by the company, if such method is reasonable, and

(ii) In all other cases in a manner which, in the opinion of the district director, is reasonable.

A method of separate accounting for such items as are not accounted for directly will be deemed "regularly employed" by a life insurance company if the method was consistently followed in prior taxable years, or if, in the case of a company which has never before issued contracts with reserves based on segregated asset accounts, the company initiates in the first taxable year for which it issues such contracts a reasonable method of separate accounting for such items and consistently follows such method thereafter. Ordinarily, a company regularly employs a method of accounting in accordance with the statute of the State, Territory, or the District of Columbia, in which it operates.

(2) Every life insurance company issuing contracts with reserves based on segregated asset accounts shall keep such permanent records and other data relating to such contracts as is necessary to enable the district director to determine the correctness of the application of the rules prescribed in section 301(g) and this section and to ascertain the accuracy of the computations involved.

(d) *Investment yield.* (1) For purposes of part I, section 801(g)(4)(A) provides that the policy and other contract liability requirements (as determined under section 805), and the life insurance company's share of investment yield (as determined under sections 804(a) or 809(b)), shall be separately computed:

(i) With respect to the items separately accounted for in accordance with section 801(g)(3) and paragraph (c) of this section, and

(ii) Excluding the items taken into account under subdivision (i) of this subparagraph.

Thus, for purposes of determining both taxable investment income and gain or loss from operations, a life insurance company shall separately compute the life insurance company's share of the investment yield on the assets in its segregated asset account without regard to the policy and other contract liability requirements of, and the investment income attributable to, contracts with reserves that are not based on the segregated asset account. Such separate computations shall be made after any allocation required under section 801(g)(4)(B) and subparagraph (2) of this paragraph.

(2)(i) Section 801(g)(4)(B) provides that if the net short-term capital gain (as defined in section 1222(5)) exceeds the net long-term capital loss (as defined in section 1222(8)), determined without regard to any separate computations under section 801(g)(4)(A) and subparagraph (1) of this paragraph, then such excess shall be allocated between section 801(g)(4)(A) (i) and (ii) and subparagraph (1) (i) and (ii) of this paragraph. Such allocation shall be in proportion to the respective contributions to such excess of the items taken into account under each such section and subparagraph. The allocation

under this subparagraph shall be made before the separate computations prescribed by section 801(g)(4)(A) and subparagraph (1) of this paragraph.

(ii) The operation of the allocation required under section 801(g)(4)(B) and subdivision (i) of this subparagraph may be illustrated by the following examples:

*Example 1.* For the taxable year 1962, T, a life insurance company which issues regular life insurance and annuity contracts and contracts with reserves based on segregated asset accounts, had (without regard to section 801(g)(4)(A)) realized short-term capital gains of \$10,000 and short-term capital losses of \$10,000 attributable to its general asset accounts and realized short-term capital gains of \$12,000 attributable to its segregated asset accounts. For the taxable year 1962, the excess of the net short-term capital gain (\$10,000+\$12,000-\$10,000, or \$12,000) over the net long-term capital loss (0) was \$12,000. Of the excess of \$12,000, 100 percent was contributed by the segregated asset accounts. Applying the provisions of section 801(g)(4)(B), T would allocate the entire \$12,000 to its segregated asset accounts for such taxable year.

*Example 2.* The facts are the same as in example 1 except that for the taxable year 1962, T had (without regard to section 801(g)(4)(A)) realized short-term capital losses of \$8,000 attributable to its general asset accounts and realized long-term capital gains of \$1,000 and long-term capital losses of \$5,000 attributable to its segregated asset accounts. For the taxable year 1962, the excess of the net short-term capital gain (\$10,000+\$12,000-\$8,000, or \$14,000) over the net long-term capital loss (\$5,000-\$1,000, or \$4,000) was \$10,000. Of the excess of \$10,000, the general asset accounts contributed 20 percent (\$2,000 (\$10,000-\$8,000)÷\$10,000) and the segregated asset accounts contributed 80 percent (\$8,000 (\$12,000-\$4,000)÷\$10,000). Applying the provisions of section 801(g)(4)(B), T would allocate \$2,000 (\$10,000×20 percent) to its general asset accounts and \$8,000 (\$10,000×80 percent) to its segregated asset accounts for such taxable year.

*Example 3.* W is a life insurance company which issues regular life insurance and annuity contracts and contracts with reserves based on either of two segregated asset accounts, Separate Account C or Separate Account D. For the taxable year 1962, W had (without regard to section 801(g)(4)(A)) realized short-term capital gains of \$16,000 and long-term capital losses of \$15,000 attributable to its general asset accounts, long-term capital gains of \$12,000 and short-term capital losses of \$6,000 attributable to Separate Account C and long-term capital gains of \$7,000 and short-term capital losses of \$5,000 attributable to Separate Account D.

## Internal Revenue Service, Treasury

## § 1.801-8

For the taxable year 1962, the excess of the net short-term capital gain (\$16,000 - \$6,000 - \$5,000) over the net long-term capital loss (0) was \$5,000. Of the \$5,000 excess, 20 percent (\$16,000 - \$15,000 + \$5,000) was contributed by the general asset accounts, leaving 80 percent as the amount contributed by the segregated asset accounts. Applying the provisions of section 801(g)(4)(B) W would allocate \$1,000 (20 percent of \$5,000) to the general asset accounts, leaving \$4,000 (80 percent of \$5,000) to be allocated among the segregated asset accounts, Separate Account C and Separate Account D. W would allocate \$3,000 of the \$4,000 to Separate Account C computed as follows:

$$\$3,000 = \frac{(\$4,000) \times (\$12,000 - \$6,000)}{(\$12,000 - \$6,000) + (\$7,000 - \$5,000)}$$

W would allocate \$1,000 of the \$4,000 to Separate Account D computed as follows:

$$\$1,000 = \frac{(\$4,000) \times (\$7,000 - \$5,000)}{(\$12,000 - \$6,000) + (\$7,000 - \$5,000)}$$

(e) *Policy and other contract liability requirements.* (1) For purposes of part I, section 801(g)(5)(A) provides that with respect to life insurance reserves based on segregated asset accounts (as defined in section 801(g)(1)(B) and paragraph (a)(2) of this section), the adjusted reserves rate and the current earnings rate for purposes of section 805(b), and the rate of interest assumed by the taxpayer for purposes of sections 805(c) and 809(a)(2), shall be a rate equal to the current earnings rate determined under section 805(b)(2) and paragraph (a)(2) of § 1.805-5 with respect to the items separately accounted for in accordance with section 801(g)(3), reduced by the percentage obtained by dividing:

(i) Any amount retained with respect to all of the reserves based on a segregated asset account by the life insurance company from gross investment income (as defined in section 804(b) and paragraph (a) of § 1.804-3) on segregated assets, to the extent such retained amount exceeds the deductions allowable under section 804(c) which are attributable to such reserves, by

(ii) The means of such reserves.

(2) For purposes of part I, section 801(g)(5)(B) provides that with respect to reserves based on segregated asset accounts other than life insurance reserves, there shall be included as interest paid within the meaning of section

805(e)(1) and paragraph (b)(1) of § 1.805-8, an amount equal to the product of the means of such reserves multiplied by the rate of interest assumed as defined in section 801(g)(5)(A) and subparagraph (1) of this paragraph.

(3) For purposes of this paragraph, any change in the rate of interest assumed by the taxpayer in calculating the reserve on a contract with reserves based on a segregated asset account for any taxable year beginning after December 31, 1961, which is attributable to an increase or decrease in the current earnings rate, shall not be treated as a change of basis in computing reserves for purposes of section 806(b) (relating to certain changes in reserves) or section 810 (d)(1) (relating to adjustment for change in computing reserves).

(4) The provisions of section 801(g) (3) through (5) may be illustrated by the following example. For purposes of this example, it is assumed that all computations have been carried out to a sufficient number of decimal places to insure substantial accuracy and to eliminate any significant error in the resulting tax liability.

*Example.* The books of R, a life insurance company, discloses the following facts with respect to items of investment yield, deductions, assets, and reserves for the taxable year 1962:

(a) *Excerpts from Company Financial Statements.*

	Company regular account	Separate account A	Separate account B
(1) Investment yield			
Interest wholly tax-exempt .....	\$100,000	\$3,000	\$1,000
Interest—other .....	10,000,000	8,000	15,000
Dividends received .....	200,000	25,000	27,000
Other items of investment yield ....	100,000	2,000	1,000
Gross investment income .....	10,400,000	38,000	44,000
Less deductions (sec. 804(c)) .....	1,000,000	4,000	4,400
Investment yield ....	9,400,000	34,000	39,600
(2) Assets and reserves:			
(i) Assets:			
Jan. 1, 1962 ...	190,000,000	.....	.....
Dec. 31, 1962 ..	210,000,000	1,600,000	1,800,000
Mean .....	200,000,000	800,000	900,000
(ii) Life insurance reserves:			
Jan. 1, 1962 ...	152,000,000	.....	.....
Dec. 31, 1962 ..	168,000,000	1,600,000	1,640,000

§ 1.801-8

26 CFR Ch. I (4-1-14 Edition)

(1) Investment yield	Company regular account	Separate account A	Separate account B
Mean .....	160,000,000	800,000	820,000
(iii) Reserves based on segregated asset accounts other than life insurance reserves:			
Jan. 1, 1962 ...	.....	.....	.....
Dec. 31, 1962 ..	.....	.....	120,000
Mean .....	.....	.....	60,000

(b) *Additional facts.* In addition to the facts assumed in (a) above, assume the following: The company retained with respect to reserves based upon segregated asset accounts a total of \$4,720 from gross investment income on Separate Account A and \$5,720 from gross investment income on Separate Account B. With respect to the Company Regular Account computed without regard to the items in either of the separate accounts, the policy and other contract liability requirement is \$6,580,000 and the required interest is \$5,640,000. There are no items of interest paid with respect to the separate accounts other than those computed under section 801(g)(5)(B). Based on these facts, the current earnings rate (sec. 805(b)); adjusted reserves rate (sec. 805(b)); and rate of interest assumed (secs. 805(c) and 809(a)(2)); and the policy and other contract liability requirements are determined for each of the Separate Accounts A and B (and the policy and other contract liability requirements for the Company Regular Account) as set forth in items (c) through (1) below.

(c) *Separate Account A.* The current earnings rate determined under section 805(b)(2) with respect to the items separately accounted for under Separate Account A, prior to the reduction provided for under section 801(g)(5)(A), is 4.25 percent (the investment yield, \$34,000, divided by the mean of the assets, \$800,000). The company retained with respect to such reserves from gross investment income on Separate Account A a total of \$4,720. The company had deductions allowable under section 804(c) with respect to such account of \$4,000. Accordingly, for purposes of section 801(g)(5)(A)(i), the amount retained by the company was \$720 (the total amount retained of \$4,720 less the deductions allowable under section 804(c) of \$4,000). The reduction percentage for purposes of section 801(g)(5)(A) is 0.09 percent (the amount retained of \$720 divided by the mean of the life insurance reserves of \$800,000). Therefore, the adjusted reserves rate and the current earnings rate for purposes of section 805(b), and the rate of interest assumed for purposes of sections 805(c) and 809(a)(2) is equal to 4.16 percent (the current earnings rate of 4.25 percent less the reduction percentage of 0.09 percent).

The policy and other contract liability requirements with respect to Separate Account A is determined as follows: For purposes of section 805(a)(1) and (2), the amount is \$33,280 (the mean of the life insurance reserves, \$800,000, multiplied by the current earnings rate, as determined under section 801(g)(5)(A), 4.16 percent). Thus, the policy and other contract liability requirement for Separate Account A is \$33,280.

(d) *Separate Account B.* The current earnings rate determined under section 805(b)(2) with respect to the items separately accounted for under Separate Account B, prior to the reduction provided for under section 801(g)(5)(A), is 4.40 percent (the investment yield, \$39,600 divided by the mean of the assets, \$900,000). The company retained with respect to such reserves from gross investment income on Separate Account B a total of \$5,720. The company had deductions allowable under section 804(c) with respect to such account of \$4,400. Accordingly, for purposes of section 801(g)(5)(A)(i) the amount retained by the company was \$1,320 (the total amount retained of \$5,720 less the deductions allowable under section 804(c) of \$4,400). The reduction percentage for purposes of section 801(g)(5)(A) is 0.15 percent (the amount retained of \$1,320 divided by the mean of the reserves based on Separate Account B of \$880,000 (\$820,000 plus \$60,000)). Therefore, the adjusted reserves rate and the current earnings rate for purposes of section 805(b), and the rate of interest assumed for purposes of section 805(c) and 809(a)(2) is equal to 4.25 percent (the current earnings rate of 4.40 percent less the reduction percentage of 0.15 percent).

With respect to reserves based on segregated asset accounts other than life insurance reserves, Separate Account B had such reserves at December 31, 1962, of \$120,000. The mean of such reserves was \$60,000. The rate of interest assumed with respect to such reserves is 4.25 percent, as computed above. Accordingly, there shall be included as interest paid within the meaning of section 805(e)(1) the amount of \$2,550 (the mean of such reserves, \$60,000 multiplied by the rate of interest assumed of 4.25 percent).

The policy and other contract liability requirements with respect to Separate Account B is determined as follows:

(1) For purposes of section 805(a)(1) and (2), the amount is \$34,850 (the mean of the life insurance reserves, \$820,000, multiplied by the current earnings rate, as determined under section 801(g)(5)(A), 4.25 percent).

(2) For purposes of section 805(a)(3), the amount is \$2,550 (the mean of the reserves based on Separate Account B other than life insurance reserves, \$60,000, multiplied by the rate of interest assumed, as determined under section 801(g)(5)(A), 4.25 percent). It has been assumed that there was no other interest paid on Separate Account B within

## Internal Revenue Service, Treasury

## § 1.801-8

the meaning of section 805(e). If there was other interest paid with respect to Separate Account B that met the requirements of section 805(e), however, then such interest would be included under section 805(a)(3). Thus, the policy and other contract liability requirement for Separate Account B is \$37,400 (\$34,850+\$2,550).

(e) *Company Regular Account.* The policy and other contract liability requirements with respect to the Company Regular Account is \$6,580,000 (this amount is determined by the company in the manner provided by section 805 (and the regulations thereunder) without regard to either Separate Account A or Separate Account B).

(f) *Policyholders' share and company's share of investment yield—section 804.* The policyholders' and company's share of investment yield and taxable investment income are computed as follows:

Investment yield (from item (a)(1))	Company regular account (30 percent times each amount in item (a)(1))	Separate account A (2.1176 percent times each amount in item (a)(1))	Separate account B (5.556 percent times each amount in item (a)(1))
Interest wholly tax-exempt .....	\$30,000	\$63.53	\$55.56
Interest—other .....	3,000,000	169.41	833.40
Dividends received .....	60,000	529.40	1,500.12
Other items of gross investment income. ....	30,000	42.35	55.56
	3,120,000	804.69	2,444.64
Less deductions .....	300,000	84.70	244.46
Investment yield .....	2,820,000	719.99	2,200.18

(h) *Taxable investment income.* The company's taxable investment income (without regard to any excess of net long-term capital

(1) *Company Regular Account*  
 Policyholders' share of investment yield. 70% (\$6,580,000÷\$9,400,000).  
 Company's share of investment yield (100% less 70%). 30%.

(2) *Separate Account A*  
 Policyholders' share of investment yield. 97.8824% (\$33,280 ÷\$34,000).  
 Company's share of investment yield (100% less 97.8824%). 2.1176%.

(3) *Separate Account B*  
 Policyholders' share of investment yield. 94.444% (\$37,400 ÷\$39,600).  
 Company's share of investment yield (100% less 94.444%). 5.556%.

(g) *The company's share of investment yield under section 804 is determined as follows:*

gain over net short-term capital loss) is determined as follows:

Life insurance company's share of investment yield (\$2,820,000÷\$719.99+ \$2,200.18) .....	\$2,822,920.17
Less:	
Company's share of interest wholly tax-exempt (\$30,000÷ \$63.53+\$55.56)=\$30,119.09	
85 percent of company's share of dividends received (but not to exceed 85% of taxable investment income computed without regard to this deduction) (85%×\$62,029.52) (\$60,000+\$529.40+\$1,500.12)=\$52,725.09	
Small business deduction (10% of investment yield, \$9,473,600, not to exceed \$25,000) =\$25,000.00	107,844.18
Taxable investment income .....	2,715,075.99

(i) *Required interest—section 809(a)(2)—(1) Separate Account A.* The rate of interest assumed by the company, with respect to Separate Account A is 4.16 percent (see (c) above). The required interest for purposes of section 809(a)(2) is determined as follows:

Life insurance reserves: 4.16% (rate assumed) times \$800,000 (mean of life insurance reserves) ..... \$33,280.00

(2) *Separate Account B.* The rate of interest assumed by the company with respect to Separate Account B is 4.25 percent (see (d) above). The required interest for purposes of section 809(a)(2) is determined as follows:

(i) Life insurance reserves: 4.25% (rate assumed) times \$820,000 (mean of life insurance reserves) ..... \$34,850.00  
 (ii) Other section 810(c) reserves: 4.25% (rate assumed) times \$60,000 (mean of reserves other than life insurance reserves) ..... \$2,550.00  
 \$37,400.00

(3) *Company Regular Account.* The required interest with respect to the Company Regular Account is \$5,640,000 (this amount is assumed for purposes of this example, but it would be determined by the company in the

§ 1.801-8

26 CFR Ch. I (4-1-14 Edition)

manner provided by section 809 without regard to either Separate Account A or Separate Account B).

(j) *Policyholders' share and company's share of investment yield—section 809.* The policy-

holders' share and the company's share of investment yield for purposes of section 809 is determined as follows:

(1) <i>Company Regular Account:</i>	
Policyholders' share of investment yield .....	60% (\$5,640,000÷\$9,400,000).
Company's share of investment yield (100 percent—60%) .....	40%.
(2) <i>Separate Account A:</i>	
Policyholders' share of investment yield .....	97.8824% (\$33,280÷\$34,000).
Company's share of investment yield (100%—97.8824 percent) .....	2.1176%.
(3) <i>Separate Account B:</i>	
Policyholders' share of investment yield .....	94.444% (\$37,400÷\$39,600).
Company's share of investment yield (100%—94.444%) .....	5.556%.

(k) *The company's share of investment yield under section 809 is determined as follows:*

Investment yield (from item (a)(1))	Company regular account (40 percent times each amount in item (a)(1))	Separate account A (2.1176 percent times each amount in item (a)(1))	Separate account B (5.556 percent times each amount in item (a)(1))
Interest wholly tax-exempt .....	\$40,000	\$63.53	\$55.56
Interest—other .....	4,000,000	169.41	833.40
Dividends received .....	80,000	529.40	1,500.12
Other items of gross investment in- come .....	40,000	42.35	55.56
Less deductions .....	4,160,000	804.69	2,444.64
	400,000	84.70	244.46
Investment yield .....	3,760,000	719.99	2,200.18

(1) *Deductions under section 809(d)(8).* For purposes of section 809(d)(8), the life insurance company's share of each of such items is determined as follows:

(1) Wholly tax-exempt interest (\$40,000+\$63.53+\$55.56) .....	\$40,119.09
(2) Dividends received 85%× (\$80,000+\$529.40+\$1,500.12) (it is as- sumed for purposes of this example that this amount does not exceed 85% of the gain from operations as computed under sec. 809(d)(8)(B)) .....	\$82,029.52 69,725.09

(f) *Increases and decreases in reserves.*  
(1) Section 801(g)(6) provides that for purposes of section 810 (a) and (b) (relating to adjustments for increases or decreases in certain reserves), the sum of the items described in section 810(c) and paragraph (b) of § 1.810-2 taken into account as of the close of the taxable year shall be adjusted:

(i) By subtracting therefrom the sum of any amounts added from time to time (for the taxable year) to the reserves separately accounted for in accordance with section 801(g)(3) and paragraph (c) of this section by reason of realized or unrealized appreciation in value of the assets held in relation thereto, and

(ii) By adding thereto the sum of any amounts subtracted from time to time (for the taxable year) from such reserves by reason of realized or unrealized depreciation in the value of such assets.

(2) The provisions of subparagraph (1) of this paragraph may be illustrated by the following example:

*Example.* Company M, a life insurance company issuing only contracts with reserves based on segregated asset accounts as defined in section 801(g)(1)(B) and paragraph (a)(2) of this section (other than contracts described in section 805(d)(1) (A), (B), (C), or (D)), increased its life insurance reserves held with respect to such contracts during the taxable year 1962 by \$275,000. Of the total increase in the reserves, \$100,000 was attributable to premium receipts, \$50,000 to dividends and interest, \$100,000 to unrealized appreciation in the value of the assets held in relation to such reserves, and \$25,000 to realized capital gains on the sale of such assets. As of the close of the taxable year 1962, the reserves held by company M with respect to all such contracts amounted to \$1,275,000. However, under section 801(g)(6) and this subparagraph, this amount must be reduced by the \$100,000 unrealized asset value appreciation and the \$25,000 of realized capital gains.

Accordingly, for purposes of section 810(a) and (b), the amount of these reserves which is to be taken into account as of the close of the taxable year 1962 under section 810(c) is \$1,150,000 (\$1,275,000 less \$125,000). However, for purposes of section 810 (a) and (b), the amount of these reserves which is to be taken into account as of the beginning of the taxable year 1963 under section 810(c) is \$1,275,000 (the amount as of the close of the taxable year 1962 before reduction of \$125,000 for unrealized appreciation and realized capital gains).

(3)(i) Under section 801(g)(6), the deduction allowable for items described in section 809(d) (1) and (7) (relating to death benefits and assumption reinsurance, respectively) with respect to segregated asset accounts shall be reduced to the extent that the amount of such items is increased for the taxable year by appreciation (or shall be increased to the extent that the amount of such items is decreased for the taxable year by depreciation) not reflected in adjustments required to be made under subparagraph (1) of this paragraph.

(ii) The provisions of this subparagraph may be illustrated by the following example:

*Example.* On June 30, 1962, X, a life insurance company, reinsured a portion of its insurance contracts with reserves based on segregated asset accounts with Y, a life insurance company, under an agreement whereby Y agreed to assume and become solely liable under the contracts reinsured. The reserves on the contracts reinsured by X were \$90,000, of which \$10,000 was attributable to unrealized appreciation in the value of the assets held in relation to such reserves. However, no amounts had been added to the reserves by reason of the unrealized appreciation of \$10,000 and consequently, the \$10,000 was not reflected in adjustments to reserves under section 809(g)(6) or subparagraph (1) of this paragraph. Under the reinsurance agreement, X made a payment of \$90,000 in cash to Y for assuming such contracts. Applying the provisions of section 809(d)(7), and assuming no other such reinsurance transactions by X during the taxable year, X would have an allowable deduction of \$90,000 as a result of this payment on June 30, 1962. However, applying the provisions of section 801(g)(6) and this subparagraph, the actual deduction allowed would be \$80,000 (\$90,000 less \$10,000). See section 806 (a) and § 1.806-3 for the adjustments in reserves and assets to be made by X and Y as a result of this transaction. For the treatment by Y of this \$90,000 payment, see section 809(c)(1) and paragraph (a)(1)(i) of § 1.809-4.

(g) *Basis of assets held for certain pension plan contracts.* Section 801(g)(7) provides that in the case of contracts described in section 805(d)(1) (A), (B), (C), (D), or (E) (relating to the definition of pension plan reserves), the basis of each asset in a segregated asset account shall (in addition to all other adjustments to basis) be (i) increased by the amount of any appreciation in value, and (ii) decreased by the amount of any depreciation in value; but only to the extent that such appreciation and depreciation are reflected in the increases and decreases in reserves, or other items described in section 801(g)(6), with respect to such contracts. Thus, there shall be no capital gains tax payable by a life insurance company on appreciation realized on assets in a segregated asset account to the extent such appreciation has been reflected in reserves, or other items described in section 801(g)(6), for contracts described in section 805(d)(1) (A), (B), (C), (D), or (E) based on segregated asset accounts.

(h) *Additional separate computation—*  
(1) *Assets and total insurance liabilities.* A life insurance company which issues contracts with reserves based on segregated asset accounts (as defined in section 801(g)(1)(B) and paragraph (a)(2) of this section) shall separately compute and report with its return the assets and total insurance liabilities which are properly attributable to all of such segregated asset accounts. Each foreign corporation carrying on a life insurance business which issues such contracts shall separately compute and report with its return assets held in the United States and total insurance liabilities on United States business which are properly attributable to all of such segregated asset accounts.

(2) *Foreign life insurance companies.* For adjustment under section 819 in the case of a foreign life insurance company which issues contracts based on segregated asset accounts under section 801(g), see § 1.819-2(b)(4).

[T.D. 6886, 31 FR 8681, June 23, 1966, as amended by T.D. 6970, 33 FR 12044, Aug. 24, 1968; T.D. 7501, 42 FR 42341, Aug. 23, 1977]

## § 1.802(b)-1

## 26 CFR Ch. I (4-1-14 Edition)

### § 1.802(b)-1 Tax on life insurance companies.

(a) For taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954, section 802(b) imposes a tax on the 1954 life insurance company taxable income of all life insurance companies (including a foreign life insurance company carrying on a life insurance business within the United States if with respect to its United States business it would qualify as a life insurance company under section 801). The tax so imposed is equal to  $3\frac{3}{4}$  percent of the amount of such income not in excess of \$200,000, plus  $6\frac{1}{2}$  percent of the amount of such income in excess of \$200,000. For the definition of the term "1954 life insurance company taxable income", see § 1.805-1.

(b) The taxable income of life insurance companies differs from the taxable income of other corporations. See section 803. Life insurance companies are entitled, in computing life insurance company taxable income, to the special deductions provided in part VIII (section 241 and following), except section 248, subchapter B, chapter 1 of the Code. The gross income, the deduction under section 803 (g)(1) for wholly tax-exempt interest, and the deduction under section 242 for partially tax-exempt interest, are decreased by the appropriate amortization of premium and increased by the appropriate accrual of discount attributable to the taxable year on bonds, notes, debentures, or other evidences of indebtedness held by a life insurance company. See section 803 (i) and § 1.803-6. Such companies are not subject to the provisions of subchapter P (section 1201 and following), chapter 1 of the Code, relating to capital gains and losses, nor to the provisions of section 171 (amortizable bond premium).

(c) All provisions of the Code and of the regulations in this part not inconsistent with the specific provision of sections 801 to 807, inclusive, are applicable to the assessment and collection of the tax imposed by section 802, and life insurance companies are subject to the same penalties as are provided in the case of returns and payment of income tax by other corporations. The return shall be on Form 1120L.

(d) Foreign life insurance companies not carrying on an insurance business within the United States are not taxable under section 802, but are taxable as other foreign corporations. See section 881.

### § 1.802-2 Taxable years affected.

Section 1.802(b)-1 is applicable only to taxable years beginning after December 31, 1953, and before January 1, 1955, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, before amendments. Sections 1.802-3 through 1.802-5 (other than paragraph (f)(2) of § 1.802-3), except as otherwise provided therein, are applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112) and section 235(c)(1) of the Revenue Act of 1964 (78 Stat. 126). Paragraph (f)(2) of § 1.802-3 is applicable only to taxable years beginning after December 31, 1961, and all reference to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112), section 3 of the Act of October 23, 1962 (76 Stat. 1134) and section 235(c)(1) of the Revenue Act of 1964 (78 Stat. 126).

[T.D. 6886, 31 FR 8685, June 23, 1966]

### § 1.802-3 Tax imposed on life insurance companies.

(a) *In general.* For taxable years beginning after December 31, 1957, section 802(a)(1) imposes a tax on the life insurance company taxable income (as defined in section 802(b) and paragraph (a) of § 1.802-4) of every life insurance company (including a foreign life insurance company carrying on a life insurance business within the United States if with respect to its United States business it would qualify as a life insurance company under section 801(a)). The tax imposed by section 802(a)(1) is payable upon the basis of returns rendered by the life insurance

companies liable thereto. See subchapter A, chapter 61 (section 6001 and following) of the Code.

(b) *Tax imposed.* The tax imposed by section 802(a)(1) consists of a normal tax and a surtax computed as provided in section 11 as though the life insurance company taxable income (as defined in section 802(b)) were the taxable income referred to in section 11.

(c) *Normal tax.* The normal tax is computed by applying to the life insurance company taxable income the regular corporate normal tax rate (as in effect for the taxable year) provided by section 11(b).

(d) *Surtax.* The surtax is computed by applying the regular corporate surtax rate (as in effect for the taxable year) provided by section 11(c) to the amount by which the life insurance company taxable income exceeds the surtax exemption for the taxable year as determined under section 11(d). See sections 269 and 1551 and the regulations thereunder, for certain circumstances in which the surtax exemption may be disallowed in whole or in part.

(e) *Special rule for 1959 and 1960.* See section 802(a)(3) and paragraph (a) of § 1.802-5 for a transitional rule applicable in certain cases in determining tax liability for the taxable years 1959 and 1960 by reason of the operation of section 802(b)(3).

(f) *Tax imposed in case of certain capital gains—*(1) *Taxable years beginning after December 31, 1958, and before January 1, 1962.* For taxable years beginning after December 31, 1958, and before January 1, 1962, if the net long-term capital gain (as defined in section 1222(7)) of any life insurance company exceeds its net short-term capital loss (as defined in section 1222(6)), section 802(a)(2) imposes a separate tax equal to 25 percent of such excess. This separate 25 percent tax rate applies whether or not there is life insurance company taxable income, taxable investment income, or a gain or loss from operations for the taxable year. For taxable years beginning after December 31, 1958, and before January 1, 1962, only the excess (if any) of net short-term capital gain (as defined in section 1222(5)) over net long-term capital loss (as defined in section 1222(8)) shall be taken into account in computing tax-

able investment income and gain or loss from operations. See sections 804(b) and 809(b). Except as modified by section 817 (rules relating to certain gains and losses), the general rules of the Code relating to gains and losses (such as the rules for determining the amount, characterization, and treatment thereof) shall apply with respect to life insurance companies.

(2) *Alternative tax in case of capital gains for taxable years beginning after December 31, 1961.* For taxable years beginning after December 31, 1961, if the net long-term capital gain (as defined in section 1222(7)) of any life insurance company exceeds its net short-term capital loss (as defined in section 1222(6)), section 802(a)(2) imposes an alternative tax in lieu of the tax imposed by section 802(a)(1), if and only if such alternative tax is less than the tax imposed by section 802(a)(1). The alternative tax is the sum of:

(i) A partial tax, computed as provided by section 802(a)(1), on the life insurance company taxable income determined by reducing the taxable investment income, and the gain from operations, by the amount of the excess of its net long-term capital gain over its net short-term capital loss, and

(ii)(a) In the case of a taxable year beginning before January 1, 1970, an amount equal to 25 percent of such excess, or

(b) In the case of a taxable year beginning after December 31, 1969, an amount determined as provided in section 1201(a) and paragraph (a)(3) of § 1.1201-1 on such excess.

In the computation of the partial tax, the deductions provided by sections 170 (as modified by section 809(a)(3)), 243, 244, 245 (as modified by sections 804(a)(5) and 809(d)(8)(B)), and the limitation provided by section 809(f), shall not be recomputed as a result of the reduction of taxable investment income, and gain from operations, by the amount of such excess. Except as modified by section 817 (rules relating to certain gains and losses), the general rules of the Code relating to gains and losses (such as the rules for determining the amount, characterization and treatment thereof) shall apply

## § 1.802-4

## 26 CFR Ch. I (4-1-14 Edition)

with respect to life insurance companies.

(g) *Foreign life insurance companies.* Foreign life insurance companies not carrying on an insurance business within the United States are not taxable under section 802, but are taxable as other foreign corporations. See section 881.

(h) *Assessment and collection of tax imposed.* All provisions of the Internal Revenue Code and of the regulations in this part not inconsistent with the specific provisions of sections 801 to 820, inclusive, are applicable to the assessment and collection of the tax imposed by section 802(a), and life insurance companies are subject to the same penalties as are provided in the case of returns and payment of income tax by other corporations. The return shall be on Form 1120L.

(i) *Illustration of principles.* The provisions of section 802(a), other than paragraph (3) thereof, and this section may be illustrated by the following example:

*Example.* For the taxable year 1959, T, a life insurance company, has life insurance company taxable income of \$300,000 (including \$25,000 of net short-term capital gain) and \$80,000 of net long-term capital gain. The tax of T under section 802(a) for 1959 is \$170,500 (\$90,000 normal tax, \$60,500 surtax, and \$20,000 capital gains tax) computed as follows:

COMPUTATION OF NORMAL TAX	
Life insurance company taxable income .....	\$300,000
Normal tax (30% of \$300,000) .....	90,000
COMPUTATION OF SURTAX	
Life insurance company taxable income .....	\$300,000
Less: Exemption from surtax .....	25,000
Excess of life insurance company taxable income subject to surtax .....	275,000
Surtax (22% of \$275,000) .....	60,500
COMPUTATION OF CAPITAL GAINS TAX	
Excess of net long-term capital gain over net short-term capital loss .....	\$80,000
Capital gains tax (25% of \$80,000) .....	20,000

(j) *Cross reference.* In the case of a taxable year of a life insurance company ending after December 31, 1963, for which an election under section 1562(a)(1) by a controlled group of corporations is effective, the additional tax imposed by section 1562 may apply. See section 1562 and the regulations thereunder.

[T.D. 6513, 25 FR 12658, Dec. 10, 1960, as amended by T.D. 6845, 30 FR 9740, Aug. 5, 1965; T.D. 6886, 31 FR 8685, June 23, 1966; T.D. 7337, 39 FR 44972, Dec. 30, 1974]

## § 1.802-4 Life insurance company taxable income.

(a) *Life insurance company taxable income defined.* Section 802(b) defines the term *life insurance company taxable income*, for purposes of part I, subchapter L, chapter 1 of the Code, as the sum of:

(1) The taxable investment income (as defined in section 804), or, if smaller, the gain from operations (as defined in section 809),

(2) If the gain from operations exceeds the taxable investment income, an amount equal to 50 percent of such excess, plus

(3) The amount subtracted from the policyholders surplus account for the taxable year, as determined under section 815.

If for any taxable year there is a loss from operations (as defined in section 809(b)(2)), the amount taken into account under paragraphs (1) and (2) of section 802(b) and subparagraphs (1) and (2) of this paragraph shall be zero. However, even in such a case, there may still be an amount includible in life insurance company taxable income (and hence an amount subject to tax) by reason of an amount includible under section 802(b)(3) and subparagraph (3) of this paragraph.

(b) *Illustration of principles.* The provisions of section 802(b) and this section may be illustrated by the following examples:

*Example 1.* For the taxable year 1959, Y, a life insurance company, has taxable investment income of \$250,000, and a gain from operations of \$175,000. Y made no subtractions from the policyholders surplus account during such taxable year. For the taxable year 1959, Y has life insurance company taxable income of \$175,000.

*Example 2.* The facts are the same as in example 1 except that for the taxable year 1959, Y has a gain from operations of \$400,000. For the taxable year 1959, Y has life insurance company taxable income of \$325,000, computed by adding taxable investment income (\$250,000) and 50 percent (\$75,000) of the amount (\$150,000) by which the gain from operations (\$400,000) exceeds the taxable investment income (\$250,000).

*Example 3.* For the taxable year 1959, W, a life insurance company, has taxable investment income of zero (0) and a gain from operations of \$90,000. W made no subtractions from the policyholders surplus account during such taxable year. For the taxable year 1959, W has life insurance company taxable

## Internal Revenue Service, Treasury

## § 1.803-1

income of \$45,000, computed by adding taxable investment income (0) and 50 percent (\$45,000) of the amount (\$90,000) by which the gain from operations (\$90,000) exceeds the taxable investment income (0).

*Example 4.* For the taxable year 1961, Z, a life insurance company, has taxable investment income of \$100,000, a policyholders surplus account of \$50,000 as of the beginning of such taxable year, a loss from operations (as defined in section 809(b)(2)) of \$25,000, and subtractions from the policyholders surplus account in the amount of \$20,000. For the taxable year 1961, Z has life insurance company taxable income of \$20,000, as only the amount (\$20,000) subtracted from the policyholders surplus account is taken into account.

[T.D. 6513, 25 FR 12658, Dec. 10, 1960]

### § 1.802-5 Special rule for 1959 and 1960.

(a) *Transitional rule.* Section 802(a)(3) provides a transitional rule for the determination of the tax liability of a life insurance company for the taxable years 1959 and 1960 by reason of the operation of section 802(b)(3). Except as limited by section 802(a)(3) and paragraph (b) of this section, any increase in a life insurance company's tax that is attributable to the operation of section 802(b)(3) is taken into account only to the extent of one-third and two-thirds for the taxable years 1959 and 1960, respectively. To the extent there is an increase in a life insurance company's tax that is attributable to the operation of section 802(b)(3) which is not taken into account for the taxable years 1959 and 1960 because of the transitional rule provided by section 802(a)(3) and this paragraph, such amounts shall be included in "other accounts" under section 815(a)(3). For taxable years commencing after December 31, 1960, the full amount of any increase in tax due to the operation of section 802(b)(3) shall be imposed without any further transitional reduction.

(b) *Limitations.* The transitional rule provided by section 802(a)(3) is limited solely to an increase in tax under section 802(b)(3) that is occasioned by the operation of section 815(c)(3) (relating to subtractions from the policyholders surplus account by reason of distributions to shareholders). This rule is further limited to actual distributions that are made by life insurance companies in 1959 or 1960 and does not extend

to other distributions that are treated under section 815(d)(2)(B) as made by life insurance companies in 1959 or 1960. Furthermore, section 802(a)(3) shall not apply to any increase in tax under section 802(b)(3) that is attributable to other subtractions from the policyholders surplus account by reason of the operation of the special rules contained in section 815(d). However, the transitional rule provided by section 802(a)(3) does apply in the case of a distribution to which section 815(e)(1)(B) (ii) applies.

(c) *Illustration of principles.* The provisions of section 802(a)(3) and this section may be illustrated by the following example:

*Example.* For the taxable year 1960, X, a life insurance company, had taxable investment income of \$9,000, gain from operations of \$27,000, and subtractions from the policyholders surplus account of \$22,000. Based upon these figures, X had life insurance company taxable income of \$40,000 for 1960, of which \$18,000 was includible under section 802(b) (1) and (2) and \$22,000 under section 802(b)(3). Applying the tax imposed by section 802(a)(1) (at rates as in effect for 1960), without regard to the transitional rule of section 802(a)(3), X would have a tax liability of \$15,300 (\$40,000 multiplied by 52 percent, less \$5,500). However, applying the transitional rule of section 802(a)(3), the actual tax liability of X, for 1960, would be \$12,000, computed as follows:

(1) Total tax liability (without regard to sec. 802(a)(3)) .....	\$15,300
(2) Life insurance company taxable income .....	\$40,000
(3) Amount subtracted from policyholders surplus account .....	22,000
(4) Item (2) less item (3) .....	18,000
(5) Tax on amount includible under sec. 802(b) (1) and (2) (30% of \$18,000) .....	5,400
(6) Tax attributable to sec. 802(b)(3) (item (1) less item (5)) .....	9,900
(7) Less: 33⅓ percent of tax attributable to sec. 802(b)(3) (1/3 of \$9,900) .....	3,300
(8) Tax liability for 1960 after application of sec. 802(a)(3) (item (1) less item (7)) .....	12,000

[T.D. 6513, 25 FR 12659, Dec. 10, 1960]

### § 1.803-1 Life insurance reserves.

(a) The term "life insurance reserves" is defined in section 803(b). Generally, such reserves, as in the case of level premium life insurance, are held to supplement the future premium receipts when the latter, alone, are insufficient to cover the increased risk in the later years. In the case of

cancellable health and accident policies and similar cancellable contracts, the unearned premiums held to cover the risk for the unexpired period covered by the premiums are not included in life insurance reserves. Unpaid loss reserves for noncancellable health and accident policies are included in life insurance reserves if they are computed or estimated on the basis of recognized mortality or morbidity tables and assumed rates of interest.

(b) In the case of an assessment life insurance company or association, life insurance reserves include sums actually deposited by such company or association with State or Territorial officers pursuant to law as guaranty or reserve funds, and any funds maintained under the charter or articles of incorporation or association of such company or association, or bylaws (approved by the State insurance commissioner) of such company or association, exclusively for the payment of claims arising under certificates of membership or policies issued upon the assessment plan and not subject to any other use.

(c) Life insurance reserves, except as otherwise provided in section 803(b), must be required by law either by express statutory provisions or by rules and regulations of the insurance department of a State, Territory, or the District of Columbia when promulgated in the exercise of a power conferred by statute but such requirement, without more, is not conclusive; for example, life insurance reserves do not include reserves required to be maintained to provide for the ordinary running expenses of a business which must be currently paid by every company from its income if its business is to continue, such as taxes, salaries, and unpaid brokerage; nor do they include the net value of risks reinsured in other solvent companies; liability for premiums paid in advance; liability for annual and deferred dividends declared or apportioned; liability for dividends left on deposit at interest; liability for accrued but unsettled policy claims whether known or unreported; liability for supplementary contracts not involving, at the time with respect to which the liability is computed, life, health, or accident contingencies.

(d) In any case where reserves are claimed, sufficient information must be filed with the return to enable the district director to determine the validity of the claim. Only reserves which are required by law or insurance department ruling, which are peculiar to insurance companies, and which are dependent upon interest earnings for their maintenance will, except as otherwise specifically provided in section 803(b), be considered as life insurance reserves. A company is permitted to make use of the highest aggregate reserve required by any State or Territory or the District of Columbia in which it transacts business, but the reserve must have been actually held.

(e) In the case of life insurance companies issuing policies covering life, health, and accident insurance combined in one policy issued on the weekly premium payment plan, continuing for life and not subject to cancellation, it is required that reserve funds thereon be based upon recognized mortality or morbidity tables covering disability benefits of the kind contained in policies issued by this particular class of companies but they need not be required by law.

**§ 1.803-2 Adjusted reserves.**

For the purpose of determining "required interest" for taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954, certain reserves computed on a preliminary term method are to be adjusted by increasing such reserves by 7 percent. The reserves to be thus adjusted are reserves computed on preliminary term methods, such as the Illinois Standard, or the Select and Ultimate methods. Only reserves on policies in the modification period are to be so adjusted. Where reserves under a preliminary term method are the same as on the level premium method, and in the case of reserves for extended or paid-up insurance, no adjustment is to be made. The reserves are thus adjusted, and the rate of interest on which they are computed, should be reported in Schedule A, Form 1120L.

**§ 1.803-3 Interest paid or accrued.**

Interest paid or accrued is one of the elements to be used in computing the

amount of “required interest” for purposes of determining the reserve interest credit provided in section 805. See § 1.805-1. Interest paid or accrued consists of (a) interest paid or accrued on indebtedness (except indebtedness incurred or continued to purchase or carry tax-exempt securities as set forth in section 803(f)(1)) and (b) amounts in the nature of interest paid or accrued on certain contracts, as provided in section 803(f)(2). Interest on indebtedness includes interest on dividends held on deposit and surrendered during the taxable year but does not include interest paid or accrued on deferred dividends. Life insurance reserves as defined in § 1.803-1 are not indebtedness. Dividends left with the company to accumulate at interest are a debt and not a reserve liability. Amounts in the nature of interest include so-called excess-interest dividends as well as guaranteed interest paid or accrued within the taxable year on insurance or annuity contracts (or contracts arising out of insurance or annuity contracts) which, at the time of payment, do not involve life, health, or accident contingencies. It is immaterial whether the optional mode of settlement specified in the insurance or annuity contract arises from an option exercised by the insured during his or her lifetime or from an option exercised by a beneficiary after the policy has matured, frequently referred to as a supplementary contract not involving life contingencies; for example, a contract to pay the insurance benefit in 10 annual installments. No distinction is made based on the person choosing the method of payment, and the full amount of the interest paid or accrued and not merely the guaranteed interest is considered as interest paid or accrued.

**§ 1.803-4 Taxable income and deductions.**

(a) *In general.* The taxable income of a life insurance company is its gross amount of income received or accrued during the taxable year from interest, dividends, and rents, less the deductions provided in section 803(g) for wholly tax-exempt interest, investment expenses, real estate expenses, depreciation, and the special deduc-

tions provided in part VIII (section 241 and following, except section 248), subchapter B, chapter 1 of the Code. In addition to the limitations on deductions relating to real estate owned and occupied by a life insurance company provided in section 803(h), the limitations on the adjustment for amortization of premium and accrual of discount provided in section 803(i), and the limitation on the deduction for investment expenses where general expenses are allocated to investment income provided in section 803(g)(2), life insurance companies are subject to the limitations on deductions relating to wholly tax-exempt income provided in section 265. Life insurance companies are not entitled to the net operating loss deduction provided in section 172.

(b) *Wholly tax-exempt interest.* Interest which in the case of other taxpayers is excluded from gross income by section 103 but included in the gross income of a life insurance company by section 803(a)(2) is allowed as a deduction from gross income by section 803(g)(1).

(c) *Investment expenses.* (1) As used in the Code, the term *general expenses* means any expense paid or incurred for the benefit of more than one department of the company rather than for the benefit of a particular department thereof. Any assignment of such expense to the investment department of the company for which a deduction is claimed under section 803(g)(2) subjects the entire deduction for investment expenses to the limitation provided in that section. The accounting procedure employed is not conclusive as to whether any assignment has in fact been made. Investment expenses do not include Federal income and excess profits taxes.

(2) If no general expenses are assigned to or included in investment expenses the deduction may consist of investment expenses paid or incurred during the taxable year in which case an itemized schedule of such expenses must be appended to the return.

(3) Invested assets for the purpose of section 803(g)(2) and this section are those which are owned and used, and to the extent used, for the purpose of producing the income specified in section

## § 1.803-5

## 26 CFR Ch. I (4-1-14 Edition)

803(a)(2). They do not include real estate owned and occupied, and to the extent owned and occupied, by the company. If general expenses are assigned to or included in investment expenses, the maximum allowance will not be granted unless it is shown to the satisfaction of the district director that such allowance is justified by a reasonable assignment of actual expenses.

(d) *Taxes and expenses with respect to real estate.* The deduction for taxes and expenses under section 803(g)(3) includes taxes and expenses paid or accrued during the taxable year exclusively upon or with respect to real estate owned by the company and any sum representing taxes imposed upon a shareholder of the company upon his interest as shareholder which is paid or accrued by the company without reimbursement from the shareholder. No deduction shall be allowed, however, for taxes, expenses, and depreciation upon or with respect to any real estate owned by the company except to the extent used for the purpose of producing investment income. See paragraph (c) of this section. As to real estate owned and occupied by the company, see § 1.803-5.

(e) *Depreciation.* The deduction allowed for depreciation is, except as provided in section 803(h), identical with that allowed other corporations by section 167. The amount allowed by section 167 in the case of life insurance companies is limited to depreciation sustained on the property used, and to the extent used, for the purpose of producing the income specified in section 803(a)(2).

### § 1.803-5 Real estate owned and occupied.

The amount allowable as a deduction for taxes, expenses, and depreciation upon or with respect to any real estate owned and occupied in whole or in part by a life insurance company is limited to an amount which bears the same ratio to such deduction (computed without regard to this limitation) as the rental value of the space not so occupied bears to the rental value of the entire property. For example, if the rental value of the space not occupied by the company is equal to one-half of the rental value of the entire property,

the deduction for taxes, expenses, and depreciation is one-half of the taxes, expenses, and depreciation on account of the entire property. Where a deduction is claimed as provided in this section, the parts of the property occupied and the parts not occupied by the company, together with the respective rental values thereof, must be shown in a statement accompanying the return.

### § 1.803-6 Amortization of premium and accrual of discount.

(a) Section 803(i) provides for certain adjustments on account of amortization of premium and accrual of discount on bonds, notes, debentures, or other evidences of indebtedness held by a life insurance company. Such adjustments are limited to the amount of appropriate amortization or accrual attributable to the taxable year with respect to such securities which are not in default as to principal or interest and which are amply secured. The question of ample security will be resolved according to the rules laid down from time to time by the National Association of Insurance Commissioners. The adjustment for amortization of premium decreases, and for accrual of discount increases, (1) the gross income, (2) the deduction for wholly tax-exempt interest, and (3) the deduction for partially tax-exempt interest.

(b) The premium for any such security is the excess of its acquisition value over its maturity value and the discount is the excess of its maturity value over its acquisition value. The acquisition value of any such security is its cost (including buying commissions or brokerage but excluding any amounts paid for accrued interest) if purchased for cash, or if not purchased for cash, then its fair market value. The maturity value of any such security is the amount payable thereunder either at the maturity date or an earlier call date. The earlier call date of any such security may be the earliest call date specified therein as a day certain, the earliest interest payment date if it is callable or payable at such date, the earliest date at which it is callable at par, or such other call or payment date, prior to maturity, specified in the security as may be selected by the life insurance company. A life

insurance company which adjusts amortization of premium or accrual of discount with reference to a particular call or payment date must make the adjustments with reference to the value on such date and may not, after selecting such date, use a different call or payment date, or value, in the calculation of such amortization or discount with respect to such security unless the security was not in fact called or paid on such selected date.

(c) The adjustments for amortization of premium and accrual of discount will be determined:

(1) According to the method regularly employed by the company, if such method is reasonable, or

(2) According to the method prescribed by this section.

A method of amortization of premium or accrual of discount will be deemed "regularly employed" by a life insurance company if the method was consistently followed in prior taxable years, or if, in the case of a company which has never before made such adjustments, the company initiates in the first taxable year for which the adjustments are made a reasonable method of amortization of premium or accrual of discount and consistently follows such method thereafter. Ordinarily, a company regularly employs a method in accordance with the statute of some State, Territory, or the District of Columbia, in which it operates.

(d) The method of amortization and accrual prescribed by this section is as follows:

(1) The premium (or discount) shall be determined in accordance with this section; and

(2) The appropriate amortization of premium (or accrual of discount) attributable to the taxable year shall be an amount which bears the same ratio to the premium (or discount) as the number of months in the taxable year during which the security was owned by the life insurance company bears to the number of months between the date of acquisition of the security and its maturity or earlier call date, determined in accordance with this section. For the purpose of this section, a fractional part of a month shall be disregarded unless it amounts to more

than half a month, in which case it shall be considered as a month.

#### § 1.803-7 Taxable years affected.

Sections 1.803-1 through 1.803-6 are applicable only to taxable years beginning after December 31, 1953, and before January 1, 1955, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, before amendments.

[T.D. 6513, 25 FR 12660, Dec. 10, 1960]

#### INVESTMENT INCOME

#### § 1.804-3 Gross investment income of a life insurance company.

(a) *Gross investment income defined.* For purposes of part I, subchapter L, chapter 1 of the Code, section 804(b) defines the term *gross investment income* of a life insurance company as the sum of the following:

(1) The gross amount of income from:

(i) Interest (including tax-exempt interest and partially tax-exempt interest), as described in § 1.61-7. Interest shall be adjusted for amortization of premium and accrual of discount in accordance with the rules prescribed in section 818(b) and the regulations thereunder.

(ii) Dividends, as described in § 1.61-9.

(iii) Rents and royalties, as described in § 1.61-8.

(iv) The entering into of any lease, mortgage, or other instrument or agreement from which the life insurance company may derive interest, rents, or royalties.

(v) The alteration or termination of any instrument or agreement described in subdivision (iv) of this subparagraph.

For example, gross investment income includes amounts received as commitment fees, as a bonus for the entering into of a lease, or as a penalty for the early payment of a mortgage.

(2) In the case of a taxable year beginning after December 31, 1958, the amount (if any) by which the net short-term capital gain (as defined in section 1222(5)) exceeds the net long-term capital loss (as defined in section 1222(8)), and

(3) The gross income from any trade or business (other than an insurance

business) carried on by the life insurance company, or by a partnership of which the life insurance company is a partner.

(b) *No double inclusion of income.* In computing the gross income from any trade or business (other than an insurance business) carried on by the life insurance company, or by a partnership of which the life insurance company is a partner, any item described in section 804(b)(1) and paragraph (a)(1) of this section shall not be considered as gross income arising from the conduct of such trade or business or partnership, but shall be taken into account under section 804(b)(1) and paragraph (a)(1) of this section.

(c) *Exclusion of net long-term capital gains.* Any net long-term capital gains from the sale or exchange of a capital asset (or any gain considered to be from the sale or exchange of a capital asset under applicable law) shall be excluded from the gross investment income of a life insurance company. However, section 804(b)(2) and paragraph (a)(2) of this section provide that the amount (if any) by which the net short-term capital gain exceeds the net long-term capital loss shall be included in the gross investment income of a life insurance company.

[T.D. 6513, 25 FR 12661, Dec. 10, 1960]

**§ 1.804-4 Investment yield of a life insurance company.**

(a) *Investment yield defined.* Section 804(c) defines the term “investment yield” of a life insurance company for purposes of part I, subchapter L, chapter 1 of the Code. Investment yield means gross investment income (as defined in section 804(b) and paragraph (a) of § 1.804-3), less the deductions provided in section 804(c) and paragraph (b) of this section for investment expenses, real estate expenses, depreciation, depletion, and trade or business (other than an insurance business) expenses. However, such expenses are deductible only to the extent that they relate to investment income and the deduction of such expenses is not disallowed by any other provision of subtitle A of the Code. For example, investment expenses are not allowable unless they are ordinary and necessary expenses within the meaning of section

162, and under section 265, no deduction is allowable for interest on indebtedness incurred or continued to purchase or carry obligations the interest on which is wholly exempt from taxation under chapter 1 of the Code. A deduction shall not be permitted with respect to the same item more than once.

(b) *Deductions from gross investment income—(1) Investment expenses.* (i) Section 804(c)(1) provides for the deduction of investment expenses by a life insurance company in determining investment yield. “Investment expenses” are those expenses of the taxable year which are fairly chargeable against gross investment income. For example, investment expenses include salaries and expenses paid exclusively for work in looking after investments, and amounts expended for printing, stationery, postage, and stenographic work incident to the collection of interest. An itemized schedule of such expenses shall be attached to the return.

(ii) Any assignment of general expenses to the investment department of a life insurance company for which a deduction is claimed under section 804(c)(1) subjects the entire deduction for investment expenses to the limitation provided in that section and subdivision (iii) of this subparagraph. As used in section 804(c)(1), the term *general expenses* means any expense paid or incurred for the benefit of more than one department of the company rather than for the benefit of a particular department thereof. For example, if real estate taxes, depreciation, or other expenses attributable to office space owned by the company and utilized by it in connection with its investment function are assigned to investment expenses, such items shall be deductible as general expenses assigned to or included in investment expenses and as such shall be subject to the limitation of section 804(c)(1) and subdivision (iii) of this subparagraph. Similarly, if an expense, such as a salary, is attributable to more than one department, including the investment department, such expense may be properly allocated among these departments. If such expenses are allocated, the amount properly allocable to the investment department shall be deductible as general

expenses assigned to or included in investment expenses and as such shall be subject to the limitation of section 804(c)(1) and subdivision (iii) of this subparagraph. If general expenses are in part assigned to or included in investment expenses, the maximum allowance (as determined under section 804(c)(1)) shall not be granted unless it is shown to the satisfaction of the district director that such allowance is justified by a reasonable assignment of actual expenses. The accounting procedure employed is not conclusive as to whether any assignment has in fact been made. Investment expenses do not include Federal income and excess profits taxes, if any. In cases where the investment expenses allowable as deductions under section 804(c)(1) exceed the limitation contained therein, see section 809(d)(9).

(iii) If any general expenses are in part assigned to or included in investment expenses, the total deduction under section 804(c)(1) shall not exceed the sum of:

(a) One-fourth of one percent of the mean of the assets (as defined in section 805(b)(4) and paragraph (a)(4) of § 1.805-5) held at the beginning and end of the taxable year,

(b) The amount of the mortgage service fees for the taxable year, plus

(c) Whichever of the following is the greater:

(1) One-fourth of the amount by which the investment yield (computed without any deduction for investment expenses allowed by section 804(c)(1)) exceeds 3¾ percent of the mean of the assets (as defined in section 805(b)(4)) held at the beginning and end of the taxable year, reduced by the amount of the mortgage service fees for the taxable year, or

(2) One-fourth of one percent of the mean of the value of mortgages held at the beginning and end of the taxable year for which there are no mortgage service fees for the taxable year. For purposes of the preceding sentence, the term *mortgages held* refers to mortgages, and other similar liens, on real property which are held by the company as security for "mortgage loans". For purposes of section 804(c)(1)(B) and (C)(i) and (b) and (c)(1) of this subdivision, the term *mortgage service fees* in-

cludes mortgage origination fees. Such mortgage origination fees shall be amortized in accordance with the rules prescribed in section 818(b) and the regulations thereunder.

(iv) The operation of the limitation contained in section 804(c)(1) and subdivision (iii) of this subparagraph may be illustrated by the following example:

*Example.* The books of S, a life insurance company, reflect the following items for the taxable year 1958:

Investment expenses (including general expenses assigned to or included in investment expenses) .....	\$125,000
Mean of the assets held at the beginning and end of the taxable year .....	20,000,000
Mortgage service fees .....	25,000
Investment yield computed without regard to investment expenses .....	1,200,000
Mean of the value of mortgages held at the beginning and end of the taxable year for which there are no mortgage service fees ..	6,000,000

In order to determine the limitation on investment expenses, S would make up the following schedule:

1. Mean of the assets held at the beginning and end of the taxable year .....	\$20,000,000
2. One-fourth of 1 percent of item 1 (1/4 of 1% of \$20,000,000) .....	50,000
3. Mortgage service fees .....	25,000
4. The greater of (a) or (b): (a)(i) Investment yield computed without regard to investment expenses .....	\$1,200,000
(ii) Three and three-fourths percent of item 1 ( $3\frac{3}{4}\% \times \$20,000,000$ ) .....	750,000
(iii) Excess of (i) over (ii) (\$1,200,000 minus \$750,000) .....	450,000
(iv) One-fourth of (iii) ( $1/4 \times \$450,000$ ) .....	112,500
(v) Less: Mortgage service fees (item 3) .....	25,000
(vi) Excess of (iv) over (v) (\$112,500 minus \$25,000) .....	87,500
(b) One-fourth of 1 percent of the mean of the value of mortgages held at the beginning and end of the taxable year for which there are no mortgage service fees (1/4 of $1\% \times \$6,000,000$ ) .....	15,000
5. The greater of item 4 (a) or (b) .....	87,500
6. Limitation on investment expenses (items 2, 3, and 4(a)) .....	162,500

As the investment expenses (including general expenses assigned to or included in investment expenses) of S for the taxable year 1958 (\$125,000) do not exceed the limitation on such expenses (\$162,500), S would be entitled to deduct the entire \$125,000 under section 804(c)(1).

(2) *Real estate expenses and taxes.* The deduction for expenses and taxes under section 804(c)(2) includes taxes (as defined in section 164) and other expenses for the taxable year exclusively on or with respect to real estate owned by the company. For example, no deduction shall be allowed under section 804(c)(2) for amounts allowed as a deduction under section 164(e) (relating to taxes of shareholders paid by a corporation). No deduction shall be allowed under section 804(c)(2) for any amount paid out for new buildings, or for permanent improvements or betterments made to increase the value of any property. An itemized schedule of such taxes and expenses shall be attached to the return. See subparagraph (4) of this paragraph for limitation of such deduction.

(3) *Depreciation.* The deduction allowed for depreciation is, except as provided in section 804(c)(3) and subparagraph (4) of this paragraph, identical to that allowed other corporations by section 167. Such amount allowed as a deduction from gross investment income in determining investment yield is limited to depreciation sustained on the property used, and to the extent used, for the purpose of producing the income specified in section 804(b). An election with respect to any of the methods of depreciation provided in section 167 shall not be affected in any way by the enactment of the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112). However, in appropriate cases, the method of depreciation may be changed with the consent of the Commissioner. See section 167(e) and § 1.167(e)-1. See subparagraph (4) of this paragraph for limitation of such deduction. See section 809(d)(12) and the regulations thereunder for the treatment of depreciable property used in the operation of a life insurance business.

(4) *Limitation on deductions allowable under section 804 (c)(2) and (c)(3).* Section 804(c)(3) provides that the amount allowable as a deduction for taxes, expenses, and depreciation on or with respect to any real estate owned and occupied for insurance purposes in whole or in part by a life insurance company shall be limited to an amount which bears the same ratio to such deduction

(computed without regard to this limitation) as the rental value of the space not so occupied bears to the rental value of the entire property. For example, T, a life insurance company, owns a twenty-story downtown home office building. The rental value of each floor of the building is identical. T rents nine floors to various tenants, one floor is utilized by it in operating its investment department, and the remaining ten floors are occupied by it in carrying on its insurance business. Since floor space equivalent to eleven-twentieths, or 55 percent, of the rental value of the entire property is owned and occupied for insurance purposes by the company, the deductions allowable under section 804(c)(2) and (3) for taxes, depreciation, and other real estate expenses shall be limited to nine-twentieths, or 45 percent, of the taxes, depreciation, and other real estate expenses on account of the entire property. However, the portion of such allowable deductions attributable to the operation of the investment department (one-twentieth, or 5 percent) may be deductible as general expenses assigned to or included in investment expenses and as such shall be subject to the limitations of section 804(c)(1). Where a deduction is claimed as provided in this section, the parts of the property occupied and the parts not occupied by the company in carrying on its insurance business, together with the respective rental values thereof, must be shown in a schedule accompanying the return.

(5) *Depletion.* The deduction for depletion (and depreciation) provided in section 804(c)(4) is identical to that allowed other corporations by section 611. The amount allowed by section 611 in the case of a life insurance company is limited to depletion (and depreciation) sustained on the property used, and to the extent used, for the purpose of producing the income specified in section 804(b). See section 611 and § 1.611-5 for special rules relating to the depreciation of improvements in the case of mines, oil and gas wells, other natural deposits, and timber.

(6) *Trade or business deductions.* (i) Under section 804(c)(5), the deductions allowed by subtitle A of the Code (without regard to this part) which are

attributable to any trade or business (other than an insurance business) carried on by the life insurance company, or by a partnership of which the life insurance company is a partner are, subject to the limitations in subdivisions (ii), (iii), and (iv) of this subparagraph, allowable as deductions from the gross investment income of a life insurance company in determining its investment yield. Such deductions are allowable, however, only to the extent that they are attributable to the production of income which is included in the life insurance company's gross investment income by reason of section 804(b)(3). However, since any interest, dividends, rents, and royalties received by any trade or business (other than an insurance business) carried on by the life insurance company, or by a partnership of which the life insurance company is a partner, is included in the life insurance company's gross investment income by reason of section 804(b)(1) and paragraph (b) of § 1.804-3, any expenses fairly chargeable against the production of such income may be deductible under section 804(c) (1), (2), (3), or (4). The allowable deductions may exceed the gross income from such business.

(ii) In computing the deductions under section 804(c)(5), there shall be excluded losses:

(a) From (or considered as from) sales or exchanges of capital assets,

(b) From sales or exchanges of property used in the trade or business (as defined in section 1231(b)), and

(c) From the compulsory or involuntary conversion (as a result of destruction, in whole or in part, theft or seizure, or an exercise of the power of requisition or condemnation or the threat or imminence thereof) of property used in the trade or business (as so defined).

(iii) Any item, to the extent attributable to the carrying on of the insurance business, shall not be taken into account. For example, if a life insurance company operates a radio station primarily to advertise its own insurance services, a portion of the expenses of the radio station shall not be allowed as a deduction. The portion disallowed shall be an amount which bears the same ratio to the total expenses of the station as the value of advertising furnished to the insurance

company bears to the total value of services rendered by the station.

(iv) The deduction for net operating losses provided in section 172, and the special deductions for corporations provided in part VIII, subchapter B, chapter 1 of the Code, shall not be allowed.

[T.D. 6513, 25 FR 12662, Dec. 10, 1960]

#### § 1.806-1 Adjustment for certain reserves.

(a) For taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954, a life insurance company writing contracts other than life insurance or annuity contracts (either separately or combined with noncancellable health and accident insurance contracts) must add to its life insurance company taxable income (as a factor in determining 1954 adjusted taxable income) an amount equal to eight times the amount of the adjustment for certain reserves provided in paragraph (b) of this section.

(b) The adjustment for certain reserves referred to in paragraph (a) of this section shall be an amount equal to  $3\frac{3}{4}$  percent of the mean of the unearned premiums and unpaid losses at the beginning and end of the taxable year on such other contracts as are not included in life insurance reserves. If such unearned premiums, however, are less than 25 percent of the net premiums written during the taxable year on such other contracts, then the adjustment shall be  $3\frac{3}{4}$  percent of 25 percent of the net premiums written during the taxable year on such other contracts plus  $3\frac{3}{4}$  percent of the mean of the unpaid losses at the beginning and end of the taxable year on such other contracts. As used in this section, the term "unearned premiums" has the same meaning as in section 832(b)(4) and § 1.832-1.

#### § 1.806-2 Taxable years affected.

Section 1.806-1 is applicable only to taxable years beginning after December 31, 1953, and before January 1, 1955, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, before amendments. Sections 1.806-3

### § 1.806-3

### 26 CFR Ch. I (4-1-14 Edition)

and 1.806-4 are applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112).

[T.D. 6513, 25 FR 12668, Dec. 10, 1960]

#### § 1.806-3 Certain changes in reserves and assets.

(a) *In general.* For purposes of part I, subchapter L, chapter 1 of the Code, section 806(a) provides that if there is a change in life insurance reserves (as defined in section 801(b)), during the taxable year, which is attributable to the transfer between the taxpayer and another person of liabilities under contracts taken into account in computing such life insurance reserves, then the means of such reserves, and the mean of the assets, shall be appropriately adjusted to reflect the amounts involved in such transfer. For example, the adjustments required under section 806(a) are applicable to transfers in which one life insurance company purchases or acquires a part or all of the business of another life insurance company under an arrangement whereby the purchaser or transferee becomes solely liable on the contracts transferred. This provision shall apply in the case of assumption reinsurance but not in the case of indemnity reinsurance or reinsurance ceded. Thus, no adjustments shall be required under section 806(a) when, in the ordinary course of business, an indemnity reinsurance contract is entered into with another company (on a yearly renewable term basis, on a coinsurance basis, or otherwise) whereby there is a sharing of risks under one or more individual contracts. It will be necessary for each life insurance company participating in a transfer described in section 806(a) to make the adjustments required by such section. Such adjustments shall be made without regard to whether or not the transferor of the liabilities was the original insurer.

(b) *Manner in which adjustments shall be made—*(1) *Daily basis.* The means of the life insurance reserves, and the mean of the assets, shall be appropriately adjusted, on a daily basis, to

reflect the amounts involved in a transfer described in section 806(a) and paragraph (a) of this section. The transferor and the transferee shall be treated as having held such life insurance reserves and assets for a fraction of the year in which the transfer occurs.

(2) *Determination of period held.* In determining the fraction which represents the fractional year that such reserves and assets were held, the numerator shall be the number of days during the taxable year which such reserves and assets were actually held, and the denominator shall be the number of days in the calendar year of the transfer. In computing the period held for purposes of the numerator, the day on which such reserves and assets are transferred is included by the transferor and excluded by the transferee.

(3) *Adjustments to the means of life insurance reserves and assets not transferred.* All life insurance reserves and assets transferred during the taxable year, within the meaning of section 806(a), shall be excluded from the beginning and end of the taxable year balances of the transferor and transferee, respectively. The amount of assets to be excluded from the beginning of the taxable year balance of the transferor shall be an amount equal to the value of such reserves at the beginning of the taxable year. The amount of assets to be excluded from the end of the taxable year balance of the transferee shall be an amount equal to the value of such reserves at the end of the taxable year. The means of the life insurance reserves and assets not so transferred shall be determined in the ordinary manner, that is, the arithmetic means. There shall be added to these means an amount to appropriately adjust them, on a daily basis, for the life insurance reserves and assets that were transferred during the taxable year. This adjustment shall be determined by multiplying (i) the mean of the transferred life insurance reserves (or assets, as the case may be) at the beginning of the taxable year (or, if acquired later, at the beginning of the period held as defined in subparagraph (2) of this paragraph) and the end of the period held as defined in subparagraph (2) of this paragraph (or

## Internal Revenue Service, Treasury

## § 1.806-3

at the end of the taxable year, if held at such time) by (ii) the fraction determined under subparagraph (2) of this paragraph.

(4) *Examples.* The application of this paragraph may be illustrated by the following examples:

*Example 1.* On March 14, 1958, the M Company, a life insurance company, transferred to the N Company, a life insurance company, pursuant to an assumption reinsurance agreement, all of its life insurance reserves, and related assets, on one block of policies. The reserves (and assets) for this block were held by the M Company on January 1, 1958, and totaled \$60,000; on March 14, the reserves (and assets) totaled \$64,000. The M Company had life insurance reserves of \$1,000,000 at the beginning of 1958 (including those subsequently transferred) and \$1,040,000 at the end of 1958. The M Company had assets of \$1,300,000 at the beginning of 1958 (including those subsequently transferred) and \$1,380,000 at the end of 1958. The mean of M's life insurance reserves for the taxable year 1958 is computed as follows:

Reserves at 1-1-58 .....	\$1,000,000	
Exclude reserves (at beginning of year) on contracts transferred to N .....	60,000	
Recomputed amount at 1-1-58 .....		\$940,000
Reserves at 12-31-58 .....		1,040,000
Sum .....		1,980,000
Mean .....		990,000
Adjustment for reserves transferred on 3-14-58:		
Reserves at 1-1-58 on contracts transferred to N .....	\$60,000	
Reserves at 3-14-58 on such contracts .....	64,000	
Sum .....	124,000	
Mean .....	62,000	
Fraction taken into account .....	73/365	
Adjustment (73/365×\$62,000) .....		\$12,400
Mean of M's life insurance reserves after section 806(a) adjustment .....		1,002,400

*Example 2.* Assuming the facts to be the same as in example 1, the mean of M's assets for the taxable year 1958 is computed as follows:

Assets at 1-1-58 .....	\$1,300,000	
Exclude assets (at beginning of year) on contracts transferred to N .....	60,000	
Recomputed amount at 1-1-58 ..	\$1,240,000	
Assets at 12-31-58 .....		1,380,000
Sum .....		2,620,000
Mean .....		1,310,000

Adjustments for assets transferred on 3-14-58:

Assets at 1-1-58 on contracts transferred to N .....	\$60,000	
Assets at 3-14-58 on such contracts .....	64,000	
Sum .....	124,000	
Mean .....	62,000	
Fraction taken into account .....	73/365	
Adjustment (73/365×\$62,000) - ..		\$12,400
Mean of M's assets after section 806(a) adjustment .....		1,322,400

*Example 3.* Assume the facts are the same as in example 1. At the end of 1958, N Company had life insurance reserves (and assets) of \$80,000 on the contracts transferred on March 14, 1958. The N Company had life insurance reserves of \$6,000,000 at the beginning of 1958 and \$6,400,000 at the end of 1958 (including those transferred). The N Company had assets of \$6,800,000 at the beginning of 1958 and \$7,300,000 at the end of 1958 (including those on the contracts transferred). The mean of N's life insurance reserves for the taxable year 1958 is computed as follows:

Reserves at 1-1-58 .....	\$6,000,000	
Reserves at 12-31-58 .....	\$6,400,000	
Exclude reserves (at end of year) on contracts transferred from M .....	80,000	
Recomputed amount at 12-31-58 .....		6,320,000
Sum .....		12,320,000
Mean .....		6,160,000
Adjustment for reserves transferred on 3-14-58:		
Reserves at 3-14-58 on contracts transferred from M .....	\$64,000	
Reserves at 12-31-58 on such contracts .....	80,000	
Sum .....	144,000	
Mean .....	72,000	
Fraction taken into account .....	292/365	
Adjustment (292/365×\$72,000) ....		57,600
Mean of N's life insurance reserves after section 806(a) adjustment .....		6,217,600

*Example 4.* Assuming the facts to be the same as in example 3, the mean of N's assets for the taxable year 1958 is computed as follows:

Assets at 1-1-58 .....	\$6,800,000	
Assets at 12-31-58 .....	\$7,300,000	
Exclude assets (at end of year) on contracts transferred from M .....	80,000	
Recomputed amount at 12-31-58 .....		7,220,000
Sum .....		14,020,000
Mean .....		7,010,000

## § 1.806-4

Adjustments for assets transferred on 3-14-58:		
Assets at 3-14-58 on contracts transferred from M .....	\$64,000	
Assets at 12-31-58 on such contracts .....	80,000	
Sum .....	144,000	
Mean .....	72,000	
Fraction taken into account .....	292/365	
Adjustment (292/365×\$72,000) .....	\$57,600	
Mean of N's assets after section 806(a) adjustment .....	7,067,600	

*Example 5.* The facts are the same as in example 1, except that on October 19, 1958, company N transfers to company P, a life insurance company, all of the life insurance reserves, and related assets, on the block of policies it had received from company M on March 14, 1958. The reserves (and assets) for this block totaled \$76,000 on October 19, 1958. The means of company M's life insurance reserves and assets, as computed in examples 1 and (2), respectively, would be unchanged by the transfer of October 19, 1958. Since company N did not own this block of policies at either the beginning or end of the taxable year, it would not have to recompute its beginning or end of the taxable year reserves or assets. Company N will, however, have to adjust (or increase) the mean of its life insurance reserves and assets on account of the policies it received from company M. This adjustment will be \$42,000, which is determined by multiplying the means of the life insurance reserves (or assets) on these policies as of March 15, 1958, and October 19, 1958, \$70,000  $(\$64,000 + \$76,000 = \$140,000 \div 2)$  by the fraction 219/365 (the numerator of 219 is determined by excluding the day of the transfer to N, March 14, 1958, and including the day of the transfer from N to P, October 19, 1958). Company P will have to recompute its end of the year life insurance reserves and assets (in the same manner as illustrated in examples 3 and 4). Assuming the end of the year reserves (and assets) on this block of policies is \$80,000, company P will have an adjustment under section 806 (a) of \$15,600, which is determined by multiplying the means of the reserves on these policies as of October 20, 1958, and December 31, 1958, \$78,000  $(\$76,000 + \$80,000 = \$156,000 \div 2)$  by the fraction 73/365.

[T.D. 6513, 25 FR 12663, Dec. 10, 1960]

### § 1.806-4 Change of basis in computing reserves.

(a) *In general.* For purposes of subpart B, part I, subchapter L, chapter 1 of the Code, section 806(b) provides that if the basis for determining the amount of any item referred to in section 810(c) (relating to items taken into account)

## 26 CFR Ch. I (4-1-14 Edition)

as of the close of the taxable year differs from the basis for such determination as of the beginning of the taxable year, then in determining taxable investment income the amount of the item as of the close of the taxable year shall be the amount computed on the old basis, and the amount of the item as of the beginning of the next taxable year shall be the amount computed on the new basis. For purposes of the preceding sentence, an election under section 818(c) shall not be treated as a change in basis for determining the amount of an item referred to in section 810(c). A change of basis in computing any of the items referred to in section 810(c) is not a change of accounting method requiring the consent of the Secretary or his delegate under section 446(e).

(b) *Illustration of change of basis in computing reserves.* The application of section 806(b) and paragraph (a) of this section may be illustrated by the following examples:

*Example 1.* Assume that the life insurance reserves of Y, a life insurance company, at the beginning of the taxable year 1959 are \$100 and that during such taxable year a portion of the reserves is strengthened (by reason of a change in mortality or interest assumptions, or otherwise), so that at the end of the taxable year 1959 the reserves (computed on the new basis) are \$130 but computed on the old basis would be \$120. Assume further that at the close of the next taxable year, 1960, the reserves (computed on the new basis) are \$142. Under the provisions of section 806(b) and paragraph (a) of this section, the mean of such reserves for the taxable year of the reserve strengthening, namely 1959, is \$110 (the mean of \$100, the balance at the beginning of the taxable year 1959, and \$120, the balance at the end of the taxable year 1959 computed on the old basis). The mean of such reserves for the next taxable year, 1960, is \$136 (the mean of \$130, the balance at the beginning of the taxable year 1960 computed on the new basis, and \$142, the balance at the end of the taxable year 1960 computed on the new basis).

*Example 2.* The life insurance reserves of S, a life insurance company, computed with respect to contracts for which such reserves are determined on a recognized preliminary term basis amount to \$50 on January 1, 1959, and \$80 on December 31, 1959. For the taxable year 1959, S elects to revalue such reserves on a net level premium basis under section 818(c). Such reserves computed under section 818(c) amount to \$60 on January 1, 1959, and

## Internal Revenue Service, Treasury

## § 1.807-2

\$96 on December 31, 1959. Under the provisions of paragraph (a) of this section, the mean of such reserves for the taxable year 1959 is \$78 (the mean of \$60, the balance at the beginning of the taxable year 1959 computed under section 818(c), and \$96, the balance at the end of the taxable year 1959 computed under section 818(c).

[T.D. 6513, 25 FR 12669, Dec. 10, 1960]

### § 1.807-1 Mortality and morbidity tables.

(a) *Tables to be used.* If there are no commissioners' standard tables applicable to an insurance contract when the contract is issued, then the mortality and morbidity tables set forth in this subsection are used to compute reserves under section 807(d)(2) for the contract.

Type of Contract	Table
1. Group term life insurance (active life reserves).	1960 Commissioners' Standard Group Mortality Table.
2. Group life insurance (active life reserves); accidental death benefits.	1959 Accidental Death Benefits Table.
3. Permanent and paid-up group life insurance (active life reserves).	Same table as are applicable to males for ordinary life insurance.
4a. Group life insurance disability income benefits (active life reserves).	The tables of period 2 disablement rates and the 1930 to 1950 termination rates of the 1952 Disability Study of the Society of Actuaries.
4b. Group life insurance disability income benefits (disabled life reserves).	The 1930 to 1950 termination rates of the 1952 Disability study of the Society of Actuaries.
5. Group life insurance; survivor income benefits insurance.	Same tables as are applicable to group annuities.
6. Group life insurance; extended death benefits for disabled lives.	1970 Intercompany Group Life Disability Valuation Table.
7. Credit life insurance .....	1958 Commissions' Extended Term Table.
8. Supplementary contracts involving life contingencies.	Same tables as are applicable to individual immediate annuities.
9. Noncancellable accident and health insurance (active life reserves); benefits issued before 1984.	Tables used for NAIC annual statement reserves as of December 31, 1983.
10a. Noncancellable accident and health insurance (active life reserves); group disability benefits issued after 1983 and individual disability benefits issued after 1983 and before 1989.	1964 Commissioners' Disability Tables.
10b. Noncancellable accident and health insurance (active life reserves); individual disability benefits issued after 1988.	1985 Commissioners' Individual Disability Table A or Commissioners' Individual Disability Table B.

Type of Contract	Table
11. Noncancellable accident and health insurance (active life reserves); accidental death benefits issued after 1983.	1959 Accidental Death Benefits Tables.
12. Noncancellable accident and health insurance (active life reserves); all benefits issued after 1983 other than disability and accidental death.	Tables used for NAIC annual statement reserves.
13a. Noncancellable accident and health insurance (claim reserves); group disability benefits for all years of issue and individual disability benefits for years before 1989.	1964 Commissioners' Disability Tables.
13b. Noncancellable accident and health insurance (claim reserves); individual disability benefits for years after 1988.	1985 Commissioners' Individual Disability Table A or Commissioners' Individual Disability Table B.
14. Noncancellable accident and health insurance (claim reserves); all benefits other than disability for all years of issue.	Tables used for annual statement reserves.

(b) *Adjustments.* An appropriate adjustment may be made to the tables in paragraph (a) of this section to reflect risks (such as substandard risks) incurred under the contract which are not otherwise taken into account.

(c) *Special rule where more than 1 table or option applicable.* If, with respect to any category of risks, there are 2 or more tables (or options under 1 or more tables) in paragraph (a) of this section, the table (and option thereunder) which generally yields the lowest reserves shall be used to compute reserves under section 807(d)(2) for the contract.

(d) *Effective date.* This section is effective for taxable years beginning after December 31, 1983, except that the 1985 Commissioners' Individual Disability Tables A and B shall be treated (for purposes of section 807(d)(5)(B) and for purposes of determining the issue dates of contracts for which they shall be used) as if the tables were new prevailing commissioners' standard tables adopted by the twenty-sixth State on December 26, 1989.

[T.D. 8278, 54 FR 52934, Dec. 26, 1989; 55 FR 1768, Jan. 18, 1990]

### § 1.807-2 Cross-reference.

For special rules regarding the treatment of modified guaranteed contracts

## § 1.809-1

## 26 CFR Ch. I (4-1-14 Edition)

(as defined in section 817A and § 1.817A-1(a)(1)), *see* § 1.817A-1.

[T.D. 9058, 68 FR 24350, May 7, 2003]

### GAIN AND LOSS FROM OPERATIONS

#### § 1.809-1 Taxable years affected.

Sections 1.809 through 1.809-8, except as otherwise provided therein, are applicable only to taxable years beginning after December 31, 1957, and all reference to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112), the Act of June 27, 1961 (75 Stat. 120), the Act of October 10, 1962 (76 Stat. 808); the Act of October 23, 1962 (76 Stat. 1134), and section 214(b)(4) of the Revenue Act of 1964 (78 Stat. 55).

[T.D. 6992, 34 FR 827, Jan. 18, 1969]

#### § 1.809-2 Exclusion of share of investment yield set aside for policyholders.

(a) *In general.* Section 809 provides the rules for determining the gain or loss from operations of a life insurance company, which amount is necessary to determine life insurance company taxable income. In order to determine gain or loss from operations, a life insurance company must first determine the share of each and every item of its investment yield (as defined in section 804(c) and paragraph (a) of § 1.804-4) set aside for policyholders (as computed under section 809(a)(1) and paragraph (b) of this section), as this share is excluded from gain or loss from operations (as defined in section 809(b) (1) and (2) and paragraphs (a) and (b) of § 1.809-3, respectively). The life insurance company shall then add its share of each and every item of its investment yield to the sum of the items comprising gross amount (as described in section 809(c) and paragraph (a) of § 1.809-4). In addition, the life insurance company shall, for taxable years beginning after December 31, 1961, add the amount (if any) by which its net long-term capital gain exceeds its net short-term loss. From the sum so computed (which includes the capital gains item only for taxable years beginning after December 31, 1961) there shall then be subtracted the deductions provided in

section 809(d) and paragraph (a) of § 1.809-5. The amount thus obtained is the gain or loss from operations for the taxable year.

(b) *Computation of share of investment yield set aside for policyholders.* Section 809(a)(1) provides that the share of each and every item of investment yield (including tax-exempt interest, partially tax-exempt interest, and dividends received) of any life insurance company set aside for policyholders shall not be included in gain or loss from operations. For this purpose, the percentage used in determining the share of each of these items comprising the investment yield set aside for policyholders shall be determined by dividing the required interest (as defined in section 809(a)(2) and paragraph (d) of this section) by the investment yield (as defined in section 804(c) and paragraph (a) of § 1.804-4). The percentage thus obtained is then applied to each and every item of the investment yield so that the share of each and every item of investment yield set aside for policyholders shall be excluded from gain or loss from operations. However, if in any case the required interest exceeds the investment yield, then the share of any item set aside for policyholders shall be 100 percent.

(c) *Computation of life insurance company's share of investment yield.* For purposes of subpart C, part I, subchapter L, chapter 1 of the Code, section 809(b)(3) provides that the percentage used in determining the life insurance company's share of each and every item of investment yield (including tax-exempt interest, partially tax-exempt interest, and dividends received) shall be obtained by subtracting the percentage obtained under paragraph (b) of this section from 100 percent. For example, if the policyholders' percentage (as determined under section 809(a)(1) and paragraph (b) of this section) is 72.38 percent, then the life insurance company's share is 27.62 percent (100 percent minus 72.38 percent). In such a case, if the amount of a particular item is \$200, then the life insurance company's share of such item included in determining gain or loss from operations is \$55.24 (\$200 multiplied by 27.62 percent) and the share of such item set aside for policyholders

(which is excluded from gain or loss from operations) is \$144.76 (\$200 multiplied by 72.38 percent). For purposes of determining gain or loss from operations, the life insurance company's share of each and every item of investment yield (including tax-exempt interest, partially tax-exempt interest, and dividends received) shall be added to the sum of the items comprising gross amount (as described in section 809(c) and paragraph (a) of § 1.809-4).

(d) *Required interest defined.* (1) For purposes of part I, section 809(a)(2) defines the term *required interest* for any taxable year as the sum of the products obtained by multiplying (i) each rate of interest required, or assumed by the taxpayer, in calculating the reserves described in section 810(c), by (ii) the means of the amount of such reserves computed at that rate at the beginning and end of the taxable year. In the case of the reserves described in section 810(c)(1), such rate of interest shall be the same as that used by the taxpayer for purposes of paragraph (b) of § 1.801-5 (relating to the definition of reserves required by law) with respect to such reserves. In the case of the reserves described in section 810(c)(2) through (5), such rate of interest shall be the same as that actually paid, credited, or accrued by the taxpayer with respect to such reserves. Thus, the required interest for any taxable year includes the elements of interest paid (as defined in section 805(e)) with respect to the reserves described in section 810(c).

(2) For purposes of computing required interest under section 809(a)(2) and subparagraph (1) of this paragraph, the amount of life insurance reserves taken into account shall be adjusted first as required by section 818(c) (relating to an election with respect to life insurance reserves computed on a preliminary term basis) and then as required by section 806(a) (relating to adjustments for certain changes in reserves and assets) before applying the rate of interest required, or assumed by the taxpayer, thereto. However, in the case of the adjustments required by section 810(d) as a result of a change in the basis of computing reserves, the adjustments to any of the reserves described in section 810(c) shall be taken into account in accordance with the

rules prescribed in section 810(d) and § 1.810-3.

[T.D. 6535, 26 FR 525, Jan. 20, 1961, as amended by T.D. 6886, 31 FR 8687, June 23, 1966]

### § 1.809-3 Gain and loss from operations defined.

(a) *Gain from operations.* For purposes of part I, subchapter L, chapter 1 of the Code, section 809(b)(1) defines the term *gain from operations* as the excess of the sum of (1) the life insurance company's share of each and every item of investment yield (including tax-exempt interest, partially tax-exempt interest, and dividends received), (2) the items of gross amount taken into account under section 809(c) and paragraph (a) of § 1.809-4, and (3) for taxable years beginning after December 31, 1961, the amount (if any) by which the net long-term capital gain exceeds the net short-term capital loss, over the sum of the deductions provided by section 809(d) and § 1.809-5.

(b) *Loss from operations.* For purposes of part I, section 809(b)(2) defines the term *loss from operations* as the excess of the sum of the deductions provided by section 809(d) and § 1.809-5 over the sum of (1) the life insurance company's share of each and every item of investment yield (including tax-exempt interest, partially tax-exempt interest, and dividends received), (2) the items of gross amount taken into account under section 809(c) and paragraph (a) of § 1.809-4, and (3) for taxable years beginning after December 31, 1961, the amount (if any) by which the net long-term capital gain exceeds the net short-term capital loss.

(c) *Illustration of principles.* The provisions of section 809(b) (1) through (3) and paragraphs (a) and (b) of this section may be illustrated by the following example:

*Example.* For the taxable year 1958, T, a life insurance company, had investment yield of \$900,000, including \$150,000 of dividends received from domestic corporations subject to taxation under chapter 1 of the Code, \$10,000 of wholly tax-exempt interest, and \$78,000 of partially tax-exempt interest. T also had items of gross amount under section 809(c) in the amount of \$12,000,000 and deductions under section 809(d) of \$6,963,500 (exclusive of any deductions for wholly tax-exempt interest, partially tax-exempt interest, and dividends received). For such taxable year, the

# § 1.809-4

# 26 CFR Ch. I (4-1-14 Edition)

share of each and every item of investment yield set aside for policyholders was 80 percent and the company's share of each and every item of investment yield was 20 percent. Based upon these figures, T had a gain from operations of \$5,180,000 for the taxable year 1958, computed as follows:

	Col. 1	Col. 2 (80% × Col. 1) exclusion of policy- holder's share	Col. 3 (20% × Col. 1) com- pany's share
Interest wholly tax-ex- empt .....	\$10,000	\$8,000	\$2,000
Interest partially tax-ex- empt .....	78,000	62,400	15,600
Dividends received .....	50,000	120,000	30,000
Other items of invest- ment yield .....	662,000	529,600	132,400
Investment yield .....	900,000	720,000	180,000
Gross amount (sum of items under sec. 809(c)) .....			\$12,000,000
Total .....			12,180,000
Less:			
Deductions under sec. 809(d)(8):			
Company's share of in- terest wholly tax-ex- empt .....		\$2,000	
30/52 of company's share of interest par- tially tax-exempt (30/52 ×\$15,600) .....		9,000	
85% of company's share of dividends received (but not to exceed 85% of gain from operations as computed under sec. 809(d)(8)(B)) (85%×\$30,000) .....		25,500	
All other deductions under sec. 809(d) .....		6,963,500	
			7,000,000
Gain from operations .....			5,180,000

(d) *Exception.* (1) In accordance with section 809(b)(4), if it is established in any case to the satisfaction of the Commissioner, or by a determination of The Tax Court of the United States, or of any other court of competent jurisdiction, which has become final, that the application of the definition of gain from operations contained in section 809(b)(1) results in the imposition of tax on:

(i) Any interest which under section 103 is excluded from gross income,

(ii) Any amount of interest which under section 242 (as modified by section 804(a)(3)) is allowable as a deduction, or

(iii) Any amount of dividends received which under sections 243, 244, and 245 (as modified by section 809(d)(8)(B)) is allowable as a deduction,

adjustment shall be made to the extent necessary to prevent such imposition.

(2) For the date upon which a decision by the Tax Court becomes final, see section 7481. For the date upon which a judgment of any other court becomes final, see paragraph (c) of § 1.1313(a)-1.

[T.D. 6535, 26 FR 526, Jan. 20, 1961, as amended by T.D. 6886, 31 FR 8687, June 28, 1966]

## § 1.809-4 Gross amount.

(a) *Items taken into account.* For purposes of determining gain or loss from operations under section 809(b) (1) and (2), respectively, section 809(c) specifies three categories of items which shall be taken into account. Such items are in addition to the life insurance company's share of the investment yield (as determined under section 809(a)(1) and paragraph (c) of § 1.809-2), and the amount (if any) by which the net long-term capital gain exceeds the net short-term capital loss (such capital gains item is included in determining gain or loss from operations only for taxable years beginning after December 31, 1961). The additional three categories of items taken into account are:

(1) *Premiums.* (i) The gross amount of all premiums and other consideration on insurance and annuity contracts (including contracts supplementary thereto); less return premiums and premiums and other consideration arising out of reinsurance ceded. The term *gross amount of all premiums* means the premiums and other consideration provided in the insurance or annuity contract. Thus, the amount to be taken into account shall be the total of the premiums and other consideration provided in the insurance or annuity contract without any deduction for commissions, return premiums, reinsurance, dividends to policyholders, dividends left on deposit with the company, discounts on premiums paid in advance, interest applied in reduction of premiums (whether or not required

to be credited in reduction of premiums under the terms of the contract), or any other item of similar nature. Such term includes advance premiums, premiums deferred and uncollected and premiums due and unpaid, deposits, fees, assessments, and consideration in respect of assuming liabilities under contracts not issued by the taxpayer (such as a payment or transfer of property in an assumption reinsurance transaction as defined in paragraph (a)(7)(ii) of §1.809-5). The term also includes amounts a life insurance company charges itself representing premiums with respect to liability for insurance and annuity benefits for its employees (including full-time life insurance salesmen within the meaning of section 7701(a)(20)).

(ii) The term *return premiums* means amounts returned or credited which are fixed by contract and do not depend on the experience of the company or the discretion of the management. Thus, such term includes amounts refunded due to policy cancellations or erroneously computed premiums. Furthermore, amounts of premiums or other consideration returned to another life insurance company in respect of reinsurance ceded shall be included in return premiums. For the treatment of amounts which do not meet the requirements of return premiums, see section 811 (relating to dividends to policyholders).

(iii) For purposes of section 809(c)(1) and this subparagraph, the term *reinsurance ceded* means an arrangement whereby the taxpayer (the reinsured) remains solely liable to the policyholder, whether all or only a portion of the risk has been transferred to the reinsurer. Such term includes indemnity reinsurance transactions but does not include assumption reinsurance transactions. See paragraph (a)(7)(ii) of §1.809-5 for the definition of assumption reinsurance.

(2) *Decreases in certain reserves.* Each net decrease in reserves which is required by section 810 (a) and (d)(1) or 811(b)(2) to be taken into account for the taxable year as a net decrease for purposes of section 809(c)(2).

(3) *Other amounts.* All amounts, not included in computing investment yield and not otherwise taken into ac-

count under section 809(c) (1) or (2), shall be taken into account under section 809(c)(3) to the extent that such amounts are includible in gross income under subtitle A of the Code. See section 61 (relating to gross income defined) and the regulations thereunder.

(b) *Treatment of net long-term capital gains.* For taxable years beginning before January 1, 1962, any net long-term capital gains (as defined in section 1222(7)) from the sale or exchange of a capital asset (or any gain considered to be from the sale or exchange of a capital asset under applicable law) shall be excluded from the determination of gain or loss from operations of a life insurance company. On the other hand, with respect to taxable years beginning after December 31, 1961, the amount (if any) by which the net long-term capital gain exceeds the net short-term capital loss (as defined in section 1222(6)) shall be taken into account in determining gain or loss from operations under section 809. However, for any taxable year beginning after December 31, 1958, the excess of net short-term capital gain (as defined in section 1222(5)) over net long-term capital loss (as defined in section 1222(8)) is included in computing investment yield (as defined in section 804(c)) and, to that extent, is taken into account in determining gain or loss from operations under section 809.

[T.D. 6535, 26 FR 527, Jan. 20, 1961, as amended by T.D. 6610, 27 FR 8718, Aug. 31, 1962, T.D. 6886, 31 FR 8687, June 23, 1966]

#### § 1.809-5 Deductions.

(a) *Deductions allowed.* Section 809(d) provides the following deductions for purposes of determining gain or loss from operations under section 809(b) (1) and (2), respectively:

(1) *Death benefits, etc.* All claims and benefits accrued (less reinsurance recoverable), and all losses incurred (whether or not ascertained), during the taxable year on insurance and annuity contracts (including contracts supplementary thereto). The term *all claims and benefits accrued* includes, for example, matured endowments and amounts allowed on surrender. The term *losses incurred (whether or not ascertained)* includes a reasonable estimate of the amount of the losses (based

upon the facts in each case and the company's experience with similar cases) incurred but not reported by the end of the taxable year as well as losses reported but where the amount thereof cannot be ascertained by the end of the taxable year.

(2) *Increases in certain reserves.* The net increase in reserves which is required by section 810 (b) and (d)(1) to be taken into account for the taxable year as a net increase for purposes of section 809(d)(2).

(3) *Dividends to policyholders.* The deduction for dividends to policyholders as determined under section 811(b) and § 1.811-2. Except as provided in section 809(d)(3) and this subparagraph, no amount shall be allowed as a deduction in respect of dividends to policyholders under section 809(d). See section 809(f) and § 1.809-7 for limitation of such deduction.

(4) *Operations loss deduction.* The operations loss deduction as determined under section 812.

(5) *Certain nonparticipating contracts.*

(i) An amount equal to the greater of:

(a) 10 percent of the increase for the taxable year in certain life insurance reserves for nonparticipating contracts (other than group contracts); or

(b) 3 percent of the premiums for the taxable year attributable to nonparticipating contracts (other than group contracts) which are issued or renewed for periods of 5 years or more.

(ii) For purposes of section 809(d)(5) and this subparagraph, the term *nonparticipating contracts* means those contracts which during the taxable year contain no right to participate in the divisible surplus of the company. For example, if at any time during the taxable year for which the deduction allowed under section 809(d)(5) and this subparagraph is claimed such contracts have rights to dividends or similar distributions (as defined in section 811(a) and paragraph (a) of § 1.811-2), such contracts shall no longer be deemed nonparticipating contracts and, therefore, no deduction shall be allowed. Thus, if a class of contracts having no right to participate in the divisible surplus of the company is in force for nine years and on March 10, 1958, it is announced that such contracts shall be accorded dividend rights as of August 1, 1958, no

deduction shall be allowed under section 809(d)(5) and this subparagraph for the taxable year 1958 or any succeeding taxable year, whether or not dividends are actually paid on such contracts. However, if the announcement of March 10, 1958, states that such contracts shall be accorded dividend rights as of January 1, 1959, a deduction under section 809(d)(5) and this subparagraph shall be allowed for the taxable year 1958 but not for any succeeding taxable year.

(iii) For purposes of section 809(d)(5) and this subparagraph, the term *reserves for nonparticipating contracts* means such part of the life insurance reserves (as defined in section 801(b) and § 1.801-4), other than that portion of such reserves which is allocable to annuity features, as relates to nonparticipating contracts (as defined in subdivision (ii) of this subparagraph). The amount of life insurance reserves taken into account shall be adjusted first as required by section 818(c) (relating to an election with respect to life insurance reserves computed on a preliminary term basis) and then as required by section 806(a) (relating to adjustments for certain changes in reserves and assets). In the case of the adjustments required by section 810(d) (relating to adjustment for change in computing reserves), the increase in life insurance reserves attributable to reserve strengthening shall be taken into account in accordance with the rules prescribed in section 810(d) and § 1.810-3.

(iv) For purposes of section 809(d)(5) and this subparagraph, the term *premiums* means the net amount of the premiums and other consideration attributable to nonparticipating contracts (as defined in subdivision (ii) of this subparagraph) which are taken into account under section 809(c)(1). For this purpose, premiums include only such amounts attributable to such contracts which are issued or renewed for periods of 5 years or more, but does not include that portion of the premiums which is allocable to annuity features. No portion of a premium shall be deemed allocable to annuity features solely because a contract, such as an endowment contract, provides that at maturity the insured shall have an

## Internal Revenue Service, Treasury

## § 1.809-5

option to take an annuity. The determination of whether a contract meets the 5-year requirement shall be made as of the date the contract is issued, or as of the date it is renewed, whichever is applicable. Thus, a 20-year nonparticipating endowment policy shall qualify for the deduction under section 809(d)(5), even though the insured subsequently dies at the end of the second year, since the policy is issued for a period of 5 years or more. However, a 1-year renewable term contract shall not qualify, since as of the date it is issued (or of any renewal date) it is not issued (or renewed) for a period of 5 years or more. In like manner, a policy originally issued for a 3-year period and subsequently renewed for an additional 3-year period shall not qualify. However, if this policy is renewed for a period of 5 years or more, the policy shall qualify for the deduction under section 809(d)(5) from the date it is renewed.

(v) The provisions of section 809(d)(5) and this subparagraph may be illustrated by the following example:

*Example.* Assume the following facts with respect to X, a life insurance company, for the taxable year 1958:

Life insurance reserves on nonparticipating contracts without annuity features (other than group contracts) at 1-1-58 .....	\$150,000
Life insurance reserves on nonparticipating contracts without annuity features (other than group contracts) at 12-31-58 .....	225,000
Annuity reserves on nonparticipating contracts (other than group contracts) at 1-1-58 .....	48,000
Annuity reserves on nonparticipating contracts (other than group contracts) at 12-31-58 .....	57,000
Premiums on nonparticipating contracts without annuity features (other than group contracts) issued or renewed for 5 years or more .....	85,000
Premiums on nonparticipating contracts allocable to annuity features (other than group contracts) issued or renewed for 5 years or more .....	14,000
Return premiums on nonparticipating contracts without annuity features (other than group contracts) .....	5,000

In order to determine the deduction under section 809(d)(5) (without regard to the limitation of section 809(f)), X would make up the following schedule:

(1) Life insurance reserves on nonparticipating contracts without annuity features (other than group contracts) at 12-31-58 ....	\$225,000
(2) Life insurance reserves on nonparticipating contracts without annuity features (other than group contracts) at 1-1-58 .....	150,000
(3) Excess of item (1) over item (2) (\$225,000 minus \$150,000) .....	75,000

(4) 10 percent of item (3) (10%×\$75,000) .....	7,500
(5) Net premiums on nonparticipating contracts without annuity features issued or renewed for 5 years or more (other than group contracts) (gross premiums on such contracts (\$85,000) minus return premiums (\$5,000) on such contracts) .....	80,000
(6) 3 percent of item (5) (3%×\$80,000) .....	2,400
(7) The greater of item (4) or item (6) .....	7,500
(8) Tentative deduction under sec. 809(d)(5) (computed without regard to the limitation of sec. 809(f)) .....	7,500

(vi) See section 809(f) and § 1.809-7 for limitation of the deduction provided by this subparagraph.

(6) *Certain accident and health insurance and group life insurance.* (i) For taxable years beginning before January 1, 1963, an amount equal to two percent of the premiums for the taxable year attributable to group life insurance contracts, group accident and health insurance contracts, or group accident and health insurance contracts with a life feature. For taxable years beginning after December 31, 1962, the deduction shall be an amount equal to two percent of the premiums for the taxable year attributable to group life insurance contracts, accident and health insurance contracts (other than those to which section 809(d)(5) applies), or accident and health insurance contracts with a life feature (other than those to which section 809(d)(5) applies). For purposes of section 809(d)(6) and this subparagraph, the term "premiums" means the net amount of the premiums and other consideration attributable to such contracts taken into account under section 809(c)(1). The deduction allowed by section 809(d)(6) and this subparagraph for the taxable year and all preceding taxable years shall not exceed 50 percent of the net amount of the premiums attributable to such contracts for the taxable year. For example, assume that premiums attributable to group life insurance and group accident and health insurance contracts are \$103,000 for the taxable year 1962. Assume further that there are \$3,000 of return premiums attributable to such contracts for the taxable year. Under the provisions of

section 809(d)(6) and this subparagraph, a deduction (determined without regard to section 809(f) of \$2,000 (2 percent of \$100,000 (\$103,000 - \$3,000)) is allowed. Assuming that the company continues to receive net premiums of \$100,000 attributable to such contracts for 15 years, the cumulative amount of these deductions is \$30,000 (\$2,000 for 15 years). If, in the sixteenth year, net premiums attributable to such contracts amount to \$60,000, no deduction shall be allowed under section 809(d)(6) and this subparagraph since the cumulative amount of these deductions (\$30,000) equals 50 percent of the current year's premiums (\$60,000) from such contracts.

(ii) In computing the deduction under section 809(d)(6), the determination as to when the 50 percent limitation on such deduction has been reached shall be based upon the amount allowed as a deduction for the taxable year and all preceding taxable years after the application of the limitation provided in section 809(f) and § 1.809-7. Thus, if in the example set forth in paragraph (c) of § 1.809-7 the application of the limitation provided by section 809(f) limited the deduction allowed for the taxable year under section 809(d)(6) to \$3,250,000, then for purposes of determining the 50 percent limitation on such deduction, only \$3,250,000 (the amount allowed) shall be taken into account.

(iii) For purposes of determining whether the 50 percent limitation applies to any taxable year, the deduction provided by section 809(d)(6) for all preceding taxable years shall be taken into account, irrespective of whether or not the life insurance company claimed a deduction for these amounts for such preceding taxable years.

(iv) See section 809(f) and § 1.809-7 for limitation of the deduction provided by this subparagraph.

(7) *Assumption by another person of liabilities under insurance, etc., contracts.*

(i) The consideration (other than consideration arising out of reinsurance ceded as defined in paragraph (a)(1)(iii) of § 1.809-4) in respect of the assumption by another person of liabilities under insurance and annuity contracts (including contracts supplementary thereto) of the taxpayer.

(ii) For purposes of section 809(d)(7) and this subparagraph, the term *assumption reinsurance* means an arrangement whereby another person (the reinsurer) becomes solely liable to the policyholders on the contracts transferred by the taxpayer. Such term does not include indemnity reinsurance or reinsurance ceded (as defined in paragraph (a)(1)(iii) of § 1.809-4).

(iii) The provisions of section 809(d)(7) and this subparagraph may be illustrated by the following example:

*Example.* During the taxable year 1958, T, a life insurance company, transferred a block of insurance policies and made a payment of \$50,000 to R, a life insurance company, under an arrangement whereby R became solely liable to the policyholders on the policies transferred by T. Under the provisions of section 809(d)(7) and this subparagraph, T is allowed a deduction of \$50,000 for the taxable year 1958. For the treatment by R of this \$50,000 payment, see section 809(c)(1) and paragraph (a)(1)(i) of § 1.809-4. See section 806(a) and § 1.806-3 for the adjustments in reserves and assets to be made by T and R as a result of this transaction.

(8) *Tax-exempt interest, dividends, etc.*

(i) Each of the following items:

(a) The life insurance company's share of interest which under section 103 is excluded from gross income;

(b) The deduction for partially tax-exempt interest provided by section 242 (as modified by section 804(a)(3) and paragraph (d)(2)(i) of § 1.804-2) computed with respect to the life insurance company's share of such interest; and

(c) The deductions for dividends received provided by sections 243, 244, and 245 (as modified by section 809(d)(8)(B) and subdivision (ii) of this subparagraph) computed with respect to the life insurance company's share of the dividends received.

(ii) The modification contained in section 809(d)(8)(B) provides the method for applying section 246(b) (relating to limitation on aggregate amount of deductions for dividends received) for purposes of section 809(d)(8)(A)(iii) and subdivision (i)(c) of this subparagraph. Under this method, the sum of the deductions allowed by sections 243(a)(1) (relating to dividends received by corporations), 244(a) (relating to dividends received on certain preferred stock), and 245 (relating to dividends received from certain foreign corporations)

shall be limited to 85 percent of the gain from operations computed without regard to:

(a) The deductions provided by section 809(d) (3), (5), and (6);

(b) The operations loss deductions provided by section 812; and

(c) The deductions allowed by sections 243(a)(1), 244(a), and 245.

If a life insurance company has a loss from operations (as determined under sec. 812) for the taxable year, the limitation provided in section 809(d)(8)(B) and this subdivision shall not be applicable for such taxable year. In that event, the deductions provided by sections 243(a)(1), 244(a), and 245 shall be allowable for all tax purposes to the life insurance company for such taxable year without regard to such limitation. If the life insurance company does not have a loss from operations for the taxable year, however, the limitation shall be applicable for all tax purposes for such taxable year. In determining whether a life insurance company has a loss from operations for the taxable year under section 812, the deductions allowed by sections 243(a)(1), 244(a), and 245 shall be computed without regard to the limitation provided in section 809(d)(8)(B) and this subdivision.

(9) *Investment expenses, etc.* (i) The amount of investment expenses to the extent not allowed as a deduction under section 804(c)(1) in computing investment yield. For example, if a deduction in the amount of \$100,000 is claimed for investment expenses, which amount includes general expenses assigned to or included in investment expenses, and due to the operation of the limitation provided by section 804(c)(1) only \$85,000 is allowed, then the excess (\$15,000) shall be allowed as a deduction under section 809(d)(9) and this subparagraph.

(ii) The amount (if any) by which the sum of the deductions allowable under section 804(c) exceeds the gross investment income. For example, if gross investment income under section 804(b) equals \$400,000, and the sum of the deductions allowable under section 804(c) equals \$425,000, then the excess (\$25,000) shall be allowed as a deduction under section 809(d)(9) and this subparagraph.

(iii) In determining the amount of the deductions allowed under subdivisions (i) and (ii) of this subparagraph, a life insurance company shall first take such deductions to the full extent allowable under section 804(c)(1), and any amount which is allowed as a deduction under section 804(c) shall not again be allowed as a deduction under section 809(d)(9).

(10) *Small business deduction.* The small business deduction as determined under section 804(a)(4).

(11) *Certain mutualization distributions.* The amount of distributions to shareholders actually made by the life insurance company in 1958, 1959, 1960, and 1961 in acquisition of stock pursuant to a plan of mutualization adopted by the company before January 1, 1958. If such deduction is claimed, there must be attached to the return of the company claiming such deduction a certified copy of the plan of mutualization and proof that such plan was adopted prior to January 1, 1958. See section 809(g) and § 1.809-8 for limitation of such deduction.

(12) *Other deductions.* Except as modified by section 809(e) and § 1.809-6, all other deductions allowed under subtitle A of the Code for purposes of computing taxable income to the extent not allowed as a deduction in computing investment yield. For example, a life insurance company shall be allowed a deduction under section 809(d)(12) and this subparagraph for amounts representing premiums charged itself with respect to liability for insurance and annuity benefits for its employees (including full-time life insurance salesmen within the meaning of section 7701(a)(20)) in accordance with the rules prescribed in sections 162 and 404 and the regulations thereunder, to the extent that a deduction for such amounts is not allowed under section 804(c)(1) and paragraph (b)(1) of § 1.804-4 or section 809(d)(9) and subparagraph (9) of this paragraph.

(b) *Denial of double deduction.* Nothing in section 809(d) shall permit the same item to be deducted more than once in determining gain or loss from operations. For example, if an item is allowed as a deduction for the taxable year by reason of its being a loss incurred within such taxable year

(whether or not ascertained) under section 809(d)(1), such item, or any portion thereof, shall not also be allowed as a deduction for such taxable year under section 809(d)(2).

[T.D. 6535, 26 FR 527, Jan. 20, 1961, as amended by T.D. 6610, 27 FR 8718, Aug. 31, 1962; T.D. 6886, 31 FR 8687, June 23, 1966; T.D. 6992, 34 FR 827, Jan. 18, 1969]

**§ 1.809-6 Modifications.**

Under section 809(e), the deductions allowed under section 809(d)(12) and paragraph (a)(12) of § 1.809-5 (relating to other deductions) are subject to the following modifications:

(a) *Interest.* No deduction shall be allowed under section 163 for interest in respect of items described in section 810(c) since such interest is taken into account in the determination of required interest under section 809.

(b) *Bad debts.* No deduction shall be allowed for an addition to reserves for bad debts under section 166(c). However, a deduction for specific bad debts shall be allowed to the extent that such deduction is allowed under section 166 and the regulations thereunder. In the case of a loss incurred on the sale of mortgaged or pledged property, see § 1.166-6 of this chapter.

(c) *Charitable, etc., contributions and gifts.* (1) The deduction by a life insurance company in any taxable year for a charitable contribution (as defined in section 170(c)) shall be limited to 5 percent of the gain from operations (as determined under section 809(b)(1)), computed without regard to any deductions for:

- (i) Charitable contributions under section 170;
- (ii) Dividends to policyholders under section 811(b);
- (iii) Certain nonparticipating contracts under section 809(d)(5);
- (iv) Group life insurance contracts and group accident and health insurance contracts under section 809(d)(6);
- (v) Tax-exempt interest, dividends, etc., under section 809(d)(8); and
- (vi) Any operations loss carryback to the taxable year under section 812.

(2) In applying the first sentence of section 170(b)(2) as contained in section 170 or, in the case of taxable years beginning after December 31, 1969, section 170(d)(2)(B) as contained in section

170A, any excess of the charitable contributions made by a life insurance company in a taxable year over the amount deductible in such year under the limitation contained in subparagraph (1) of this paragraph, shall be reduced to the extent that such excess:

(i) Reduces life insurance company taxable income (computed without regard to section 802(b)(3)) for the purpose of determining the offsets referred to in section 812(b)(2); and

(ii) Increases an operations loss carryover under section 812 for a succeeding taxable year.

(3) The application of the rules provided in section 809(e)(3) and this paragraph may be illustrated by the following example:

*Example.* Assume that life insurance company P is organized on January 1, 1958, and has a loss from operations for that year in the amount of \$100,000 which is an operations loss carryover to 1959. In 1959, company P has a gain from operations and tax base (computed without regard to section 802(b)(3)) of \$100,000 before the allowance of a deduction for a \$5,000 charitable contribution made in 1959 and before the application of the operations loss carryover from 1958. Under section 170(b)(2), the operations loss carryover from 1958 is first applied to eliminate the \$100,000 gain from operations and tax base in 1959 and the \$5,000 charitable contribution carryover would (except for the limitation contained in this paragraph) become a charitable contribution carryover to 1960. However, for the purpose of computing the offsets referred to in section 812(b)(2), the \$5,000 charitable contribution is applied to reduce the gain from operations and tax base for 1959 to \$95,000 before the application of the operations carryover from 1958. Since only \$95,000 of the \$100,000 loss from operations in 1958 is an offset for 1959, the remaining \$5,000 becomes an operations loss carryover to 1960. Accordingly, under the limitation contained in this paragraph, the charitable contributions carryover provided under the second sentence of section 170(b)(2) is eliminated.

(d) *Amortizable bond premium.* No deduction shall be allowed under section 171 for the amortization of bond premiums since a special deduction for such premiums is specifically taken into account under section 818(b).

(e) *Net operating loss deduction.* No deduction shall be allowed under section 172 since section 812 allows an “operations loss deduction”.

(f) *Partially tax-exempt interest.* No deduction shall be allowed under section

## Internal Revenue Service, Treasury

## § 1.809-7

242 for partially tax-exempt interest since section 809(d)(8) allows a deduction for such interest.

(g) *Dividends received.* No deduction shall be allowed under sections 243, 244, and 245 for dividends received since section 809(d)(8) allows a deduction for such dividends.

[T.D. 6535, 26 FR 529, Jan. 20, 1961, as amended by T.D. 7207, 37 FR 20797, Oct. 5, 1972]

### § 1.809-7 Limitation on certain deductions.

(a) *In general.* Section 809(f)(1) limits the deductions under section 809(d) (3), (5), and (6), relating to deductions for dividends to policyholders, certain nonparticipating contracts, and group life, accident, and health insurance contracts, respectively. This limitation provides that the amount of such deductions shall not exceed the sum of (1) the amount (if any) by which the gain from operations for the taxable year (determined without regard to such deductions) exceeds the taxpayer's taxable investment income for such year, plus (2) \$250,000.

(b) *Application of limitation.* Section 809(f)(2) provides a priority system for applying the limitation contained in section 809(f)(1) and paragraph (a) of this section. Under this priority system, the limitation shall be applied in the following order:

(1) For taxable years beginning before January 1, 1962:

(i) First to the amount of the deduction under section 809(d)(6) (relating to group life, accident, and health insurance);

(ii) Then to the amount of the deduction under section 809(d)(5) (relating to certain nonparticipating contracts); and

(iii) Finally to the amount of the deduction under section 809(d)(3) (relating to dividends to policyholders).

(2) For taxable years beginning after December 31, 1961, the limitation shall be applied in the following order:

(i) First to the amount of the deduction under section 809(d)(3);

(ii) Then to the amount of the deduction under section 809(d)(6); and

(iii) Finally to the amount of the deduction under section 809(d)(5).

Thus, for taxable years beginning after December 31, 1961, the limitation and priority system would operate first to disallow a deduction under section 809(d)(5), then a deduction under section 809(d)(6), and finally a deduction under section 809(d)(3). For purposes of applying the 50 percent limitation contained in section 809(d)(6) with respect to a taxable year beginning after December 31, 1961, the amount of the deductions for taxable years beginning before January 1, 1962, shall be determined by applying the priority system contained in subparagraph (1) of this paragraph.

(c) *Illustration of principles.* The operation of the limitation and priority system provided by section 809(f) and this section may be illustrated by the following examples:

*Example 1.* Assume the following facts with respect to M, a life insurance company, for the taxable year 1958:

Gain from operations computed without regard to the deductions under sec. 809(d) (3), (5), and (6) .....	\$100,000,000
Taxable investment income .....	83,000,000
Tentative deduction for group life, accident, and health insurance under sec. 809(d)(6) .....	4,000,000
Tentative deduction for certain nonparticipating contracts under sec. 809(d)(5) .....	6,000,000
Tentative deduction for dividends to policyholders under sec. 809(d)(3) .....	10,000,000

In order to determine the limitation on the deductions under section 809(d) (3), (5), and (6), M would make up the following schedule:

(1) Statutory amount provided under sec. 809(f)(1) .....	\$250,000
(2) Gain from operations computed without regard to the deductions under sec. 809(d) (3), (5), and (6) .....	\$100,000,000
(3) Taxable investment income .....	83,000,000
(4) Excess of item (2) over item (3) .....	17,000,000
(5) Limitation on deductions under sec. 809(d) (3), (5), and (6) (item (1) plus item (4)) .....	17,250,000
Since the total tentative deductions under section 809(d) (3), (5), and (6) (\$20,000,000) exceeds the limitation on such deductions (\$17,250,000), M would make up the following schedule to determine the application of the priority system:	
(6) Maximum possible deduction under sec. 809(d) (3), (5), and (6) (item (5)) .....	\$17,250,000
(7) Deduction for group life, accident, and health insurance under sec. 809(d)(6) (not in excess of item (6)) .....	4,000,000

(8) Maximum possible deduction under sec. 809(d)(5) (item (6) less item (7)) .....	13,250,000
(9) Deduction for certain nonparticipating contracts under sec. 809(d)(5) (not in excess of item (8)) .....	6,000,000
(10) Maximum possible deduction under sec. 809(d)(3) (item (8) less item (9)) .....	7,250,000
(11) Deduction for dividends to policyholders under sec. 809(d)(3) (not in excess of item (10)) .....	7,250,000

Thus, as a result of the application of the limitation and priority system for the taxable year 1958, M shall be allowed a deduction of \$4,000,000 under section 809(d)(6), \$6,000,000 under section 809(d)(5), and only \$7,250,000 of the \$10,000,000 tentative deduction under section 809(d)(3).

*Example 2.* The facts are the same as in example 1, except that the taxable year is 1962. Since the total tentative deductions under section 809(d) (3), (5), and (6) (\$20,000,000) exceeds the limitation on such deductions (\$17,250,000), M would make up the following schedule to determine the application of the priority system:

(1) Maximum possible deductions under sec. 809(d) (3), (5), and (6) (item (5) in example 1) .....	\$17,250,000
(2) Deduction for dividends to policyholders under sec. 809(d)(3) (not in excess of item (1)) .....	10,000,000
(3) Maximum possible deduction under sec. 809(d)(6) (item (1) less item (2)) .....	7,250,000
(4) Deduction for certain accident, health, and group life insurance under sec. 809(d)(6) (not in excess of item (3)) .....	4,000,000
(5) Maximum possible deduction under sec. 809(d)(5) (item (4) less item (5)) .....	3,250,000
(6) Deduction for certain nonparticipating contracts under sec. 809(d)(5) (not in excess of item (5)) .....	3,250,000

Thus, as a result of the application of the limitation and priority system for the taxable year 1962, M shall be allowed a deduction of \$10,000,000 under section 809(d)(3), \$4,000,000 under section 809(d)(6), and only \$3,250,000 of the \$6,000,000 tentative deduction under section 809(d)(5).

[T.D. 6535, 26 FR 530, Jan. 20, 1961, as amended by T.D. 6886, 31 FR 8688, June 23, 1966]

#### § 1.809-8 Limitation on deductions for certain mutualization distributions.

(a) *Deduction not to reduce taxable investment income.* Section 809(g)(1) limits the deduction under section 809(d)(11) for certain mutualization distributions. This limitation provides that such deduction shall not exceed the amount (if any) by which the gain from operations for the taxable year, computed without regard to such deduction (but after the application of the limitation contained in section 809(f) and § 1.809-7), exceeds the taxpayer's taxable investment income for such year.

(b) *Deduction not to reduce tax below that imposed by 1957 law.* Section 809(g)(2) further limits the deduction under section 809(d)(11). Under section 809(g)(2), such deduction shall be allowed only to the extent that it (after the application of all other deductions) does not reduce the tax imposed by section 802(a)(1) for the taxable year below the amount of tax which would have been imposed for such taxable year if the law in effect for 1957 applied for such taxable year. If such deduction is claimed for 1958 (or 1959), the company shall attach to its return a schedule showing what its tax for 1958 (or 1959) would have been had such tax been computed under the law in effect for 1957.

(c) *Application of section 815.* Section 809(g)(3) provides that any portion of a distribution which is allowed as a deduction under section 809(d)(11) shall not be treated as a distribution to shareholders for purposes of section 815; except that in the case of any distributions made in 1959, such portion shall be treated as a distribution with respect to which a reduction is required under section 815(e)(2)(B) (relating to adjustment in allocation ratio for certain distributions after December 31, 1958).

[T.D. 6535, 26 FR 530, Jan. 20, 1961]

#### § 1.809-9 Computation of the differential earnings rate and the recomputed differential earnings rate.

(a) *In general.* Neither the differential earnings rate under section 809(c) nor the recomputed differential earnings rate that is used in computing the recomputed differential earnings amount under section 809(f)(3) may be less than zero.

(b) *Definitions—(1) Recomputed differential earnings amount.* The recomputed differential earnings amount, with respect to any taxable year, is the amount equal to the product of—

(i) The life insurance company's average equity base for the taxable year; multiplied by

(ii) The recomputed differential earnings rate for that taxable year.

(2) *Recomputed differential earnings rate.* The recomputed differential earnings rate for any taxable year equals the excess of—

(i) The imputed earnings rate for the taxable year; over

(ii) The average mutual earning rate for the calendar year in which the taxable year begins.

(c) *Effective date.* The regulations are effective for all taxable years beginning after December 31, 1986.

[T.D. 8499, 58 FR 64899, Dec. 10, 1993]

#### § 1.809-10 Computation of equity base.

(a) *In general.* For purposes of section 809, the equity base of a life insurance company includes the amount of any asset valuation reserve and the amount of any interest maintenance reserve.

(b) *Effective date.* This section is effective for taxable years ending after December 31, 1991.

[T.D. 8484, 58 FR 47061, Sept. 7, 1993, as amended by T.D. 8564, 59 FR 49579, Sept. 29, 1994]

#### § 1.810-1 Taxable years affected.

Sections 1.810-2 through 1.810-4 are applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112).

[T.D. 6535, 26 FR 531, Jan. 20, 1961]

#### § 1.810-2 Rules for certain reserves.

(a) *Adjustment for decrease or increase in certain reserve items—*(1) *Adjustment for decrease.* Section 810(a) provides that if the sum of the items described in section 810(c) and paragraph (b) of this section at the beginning of the taxable year exceeds the sum of such items at the end of the taxable year (reduced by the amount of investment yield not included in gain or loss from operations for the taxable year by reason of section 809(a)(1)), the amount of such excess shall be taken into account

as a net decrease referred to in section 809(c)(2) and paragraph (a)(2) of § 1.809-4 in determining gain or loss from operations.

(2) *Adjustment for increase.* Section 810(b) provides that if the sum of the items described in section 810(c) and paragraph (b) of this section at the end of the taxable year (reduced by the amount of investment yield not included in gain or loss from operations for the taxable year by reason of section 809(a)(1)) exceeds the sum of such items at the beginning of the taxable year, the amount of such excess shall be taken into account as a net increase referred to in section 809(d)(2) and paragraph (a)(2) of § 1.809-5 in determining gain or loss from operations.

(b) *Items taken into account.* The items described in section 810(c) and referred to in section 810 (a) and (b) and paragraph (a) of this section are:

(1) The life insurance reserves (as defined in section 801(b) and § 1.801-4);

(2) The unearned premiums and unpaid losses included in total reserves under section 801(c)(2) and § 1.801-5;

(3) The amounts (discounted at the rates of interest assumed by the company) necessary to satisfy the obligations under insurance or annuity contracts (including contracts supplementary thereto), but only if such obligations do not involve (at the time with respect to which the computation is made under this subparagraph) life, health, or accident contingencies;

(4) Dividend accumulations, and other amounts, held at interest in connection with insurance or annuity contracts (including contracts supplementary thereto); and

(5) Premiums received in advance, and liabilities for premium deposit funds.

(6) Special contingency reserves under contracts of group term life insurance or group health and accident insurance which are established and maintained for the provision of insurance on retired lives, for premium stabilization, or for a combination thereof.

For purposes of this paragraph, the same item shall be counted only once and deficiency reserves (as defined in section 801(b)(4) and paragraph (e)(4) of

## § 1.810-2

## 26 CFR Ch. I (4-1-14 Edition)

§ 1.801-4) shall not be taken into account.

(c) *Special rules.* For purposes of section 810 (a) and (b) and paragraph (a) of this section, in determining whether there is a net increase or decrease in the sum of the items described in section 810(c) and paragraph (b) of this section for the taxable year, the following rules shall apply:

(1) *Computation of net increase or decrease in reserves.* The sum of the items described in section 810(c) and paragraph (b) of this section at the beginning of the taxable year shall be the aggregate of the sums of each of such items at the beginning of the taxable year. The sum of the items described in section 810(c) and paragraph (b) of this section at the end of the taxable year shall be the aggregate of the sums of each of such items at the end of the taxable year. However, in order to determine whether there is a net increase or decrease in such items for the taxable year, the aggregate of the sums of the items at the end of the taxable year must first be reduced by the amount of investment yield not included in gain or loss from operations for the taxable year by reason of section 809(a)(1).

(2) *Effect of change in basis in computing reserves.* Any increase or decrease in the sum of the items described in section 810(c) and paragraph (b) of this section for the taxable year which is attributable to a change in the basis used in computing such items during the taxable year shall not be taken into account under section 810 (a) or (b) and paragraph (a) of this section but shall be taken into account in the manner prescribed in section 810(d) and paragraph (a) of § 1.810-3.

(3) *Effect of section 818(c) election.* If a company which computes its life insurance reserves on a preliminary term basis elects to revalue such reserves on a net level premium basis under section 818(c), the sum of such reserves at the beginning and end of all taxable years (including the first taxable year) for which the election applies shall be the sum of such reserves computed on such net level premium basis.

(4) *Cross references.* For taxable years beginning before January 1, 1970, see section 810(e) (as in effect for such

years) and § 1.810-4 for special rules for determining the net increase or decrease in the sum of the items described in section 810(c) and paragraph (b) of this section in the case of certain voluntary employees' beneficiary associations. For similar special rules in the case of life insurance companies issuing variable annuity contracts, see section 801(g)(4) and the regulations thereunder.

(d) *Illustration of principles.* The provisions of section 810 (a) and (b) and this section may be illustrated by the following examples:

*Example 1.* Assume the following facts with respect to R, a life insurance company:

Sum of items described in section 810(c) (1) through (6) at beginning of taxable year .....	\$940
Sum of items described in section 810(c) (1) through (6) at end of taxable year .....	1,060
Required interest (as defined in section 809(a)(2)) .....	70
Investment yield (as defined in section 804(c)) ..	100
Amount of investment yield not included in gain or loss from operations for the taxable year by reason of section 809(a)(1) .....	70

In order to determine the adjustment for decrease or increase in the sum of the items described in section 810(c) for the taxable year, R must first reduce the sum of such items at the end of the taxable year (\$1,060) by the amount of investment yield (\$70) not included in gain or loss from operations for the taxable year by reason of section 809(a)(1). Since the adjusted sum of such items at the end of the taxable year, \$990 (\$1,060 minus \$70), exceeds the sum of such items at the beginning of the taxable year, \$940, the excess of \$50 (\$990 minus \$940) shall be taken into account as a net increase under section 809(d)(2) and paragraph (a)(2) of § 1.809-5 in determining gain or loss from operations.

*Example 2.* Assume the facts are the same as in example 1, except that the sum of the items described in section 810(c) at the beginning of the taxable year is \$1000. Since the sum of the items described in section 810(c) at the beginning of taxable year, \$1000, exceeds the sum of such items at the end of the taxable year after adjustment for the amount of investment yield not included in gain or loss from operations for the taxable year by reason of section 809(a)(1), \$990 (\$1060 minus \$70), the excess of \$10 (\$1000 minus \$990) shall be taken into account as a net decrease under section 809 (c)(2) and paragraph (a)(2) of § 1.809-4 in determining gain or loss from operations.

*Example 3.* Assume the following facts with respect to S, a life insurance company:

Sum of items described in section 810(c) (1) through (6) at beginning of taxable year .....	\$1,970
Sum of items described in section 810(c) (1) through (6) at the end of taxable year .....	2,040

## Internal Revenue Service, Treasury

## § 1.810-3

Required interest (as defined in section 809(a)(2)) .....	60
Investment yield (as defined in section 804(c)) ..	40
Amount of investment yield not included in gain or loss from operations by reason of section 809(a)(1) .....	40

Under the provisions of section 809(a)(1), since the required interest (\$60) exceeds the investment yield (\$40), the share of each and every item of investment yield set aside for policyholders and not included in gain or loss from operations for the taxable year shall be 100 percent. Thus, applying the provisions of section 810 (a) and (b), the sum of the items described in section 810(c) at the end of the taxable year (\$2,040) must first be reduced by the entire amount of the investment yield (\$40) in order to determine the net increase or decrease in the sum of such items for the taxable year. Since the adjusted sum of such items at the end of the taxable year, \$2,000 (\$2,040 minus \$40), is greater than the sum of such items at the beginning of the taxable year, \$1,970, the excess of \$30 (\$2,000 minus \$1,970) shall be taken into account as a net increase under section 809(d)(2) and paragraph (a)(2) of § 1.809-5 in determining gain or loss from operations. No additional deduction is allowed under section 809(d) for the amount (\$20) by which the required interest exceeds the investment yield for the taxable year.

*Example 4.* Assume the facts are the same as in example 1, except that as a result of a change in the basis used in computing an item described in section 810(c) during the taxable year, the sum of such items at the end of the taxable year is \$1,200. Under the provisions of paragraph (c)(2) of this section, any increase or decrease in the sum of the section 810(c) items for the taxable year which is attributable to a change in the basis used in computing such items during the taxable year shall not be taken into account under section 810 (a) and (b). Thus, for purposes of section 810 (a) and (b), the sum of the items described in section 810(c) at the end of the taxable year shall be \$1,060 (the amount computed without regard to the change in basis) and S shall treat the \$50 computed in the manner described in example 1 as a net increase under section 809(d)(2) and paragraph (a)(2) of § 1.809-5 in determining its gain or loss from operations for the taxable year. The amount of the increase in the section 810(c) items which is attributable to the change in basis during the taxable year, \$140 (\$1,200 minus \$1,060), shall be taken into account in the manner prescribed in section 810(d) and paragraph (a) of § 1.810-3.

*Example 5.* The life insurance reserves of M, a life insurance company, computed with respect to contracts for which such reserves are determined on a recognized preliminary term basis amount to \$100 on January 1, 1960, and \$110 on December 31, 1960. For the tax-

able year 1960, M elects to revalue such reserves on a net level premium basis under section 818(c). Such reserves computed under section 818(c) amount to \$115 on January 1, 1960, and \$127 on December 31, 1960. Under the provisions of paragraph (c)(3) of this section, a company which makes the section 818(c) election must use the net level premium basis in computing the sum of its life insurance reserves at the beginning and end of all taxable years for which the election applies. Thus, for purposes of section 810 (a) and (b), in determining whether there is a net increase or decrease in the sum of the section 810(c) items for the taxable year 1960, M shall include \$115 as its reserves with respect to such contracts under section 810(c)(1) at the beginning of the taxable year and \$127 as its reserves with respect to such contracts under section 810(c)(1) at the end of the taxable year.

[T.D. 6535, 26 FR 531, Jan. 20, 1961, as amended by T.D. 7163, 37 FR 4189, Feb. 29, 1972; T.D. 7172, 37 FR 5619, Mar. 17, 1972]

### § 1.810-3 Adjustment for change in computing reserves.

(a) *Reserve strengthening or weakening.* Section 810(d)(1) provides that if the basis for determining any item referred to in section 810(c) and paragraph (b) of § 1.810-2 at the end of any taxable year differs from the basis for such determination at the end of the preceding taxable year, then so much of the difference between:

(1) The amount of the item at the end of the taxable year, computed on the new basis, and

(2) The amount of the item at the end of the taxable year, computed on the old basis,

as is attributable to contracts issued before the taxable year shall be taken into account as follows:

(i) If the amount of the item at the end of the taxable year computed on the new basis exceeds the amount of the item at the end of the taxable year computed on the old basis,  $\frac{1}{10}$  of such excess shall be taken into account, for each of the succeeding 10 taxable years as a net increase to which section 809(d)(2) and paragraph (a)(2) of § 1.809-5 applies; or

(ii) If the amount of the item at the end of the taxable year computed on the old basis exceeds the amount of the item at the end of the taxable year computed on the new basis,  $\frac{1}{10}$  of such excess shall be taken into account, for

### § 1.810-3

### 26 CFR Ch. I (4-1-14 Edition)

each of the 10 succeeding taxable years, as a net decrease to which section 809 (c)(2) and paragraph (a)(2) of § 1.809-4 applies.

(b) *Illustration of principles.* The provisions of section 810(d)(1) and paragraph (a) of this section may be illustrated by the following examples:

*Example 1.* Assume that the amount of an item described in section 810(c) of L, a life insurance company, at the beginning of the taxable year 1959 is \$100. Assume that at the end of the taxable year 1959, as a result of a change in the basis used in computing such item during the taxable year, the amount of the item (computed on the new basis) is \$200 but computed on the old basis would have been \$150. Since the amount of the item at the end of the taxable year computed on the new basis, \$200, exceeds the amount of the item at the end of the taxable year computed on the old basis, \$150, by \$50,  $\frac{1}{10}$  of the amount of such excess, or \$5, shall be taken into account as a net increase referred to in section 809(d)(2) and paragraph (a)(2) of § 1.809-5 in determining gain or loss from operations for each of the 10 taxable years immediately following the taxable year 1959. Any increase (or decrease) in the sum of the section 810(c) items computed on the old basis at the end of the taxable year 1959 (\$150) after adjustment for investment yield not included in gain or loss from operations for the taxable year by reason of section 809(a)(1), over the sum of such items computed on the old basis at the beginning of the taxable year 1959 (\$100), shall be taken into account in the manner prescribed in section 810 (a) or (b) and § 1.810-2 for purposes of determining L's gain or loss from operations for 1959.

*Example 2.* Assume the facts are the same as in example 1, and that the sum of the items described in section 810(c) (computed on the new basis) is \$200 on January 1, 1960, and \$260 on December 31, 1960. Under the provisions of section 810(d)(1), as a result of the reserve strengthening attributable to the change in basis which occurred in 1959, L would include \$5 (computed in the manner described in example 1) as a net increase under section 809(d)(2) and paragraph (a)(2) of § 1.809-5 in determining its gain or loss from operations for 1960. In addition to this amount, any increase (or decrease) in the sum of the items described in section 810(c) at the end of the taxable year 1960 (\$260) after adjustment for investment yield not included in gain or loss from operations for the taxable year by reason of section 809(a)(1), over the sum of such items at the beginning of the taxable year 1960 (\$200), shall be taken into account in the manner prescribed in section 810 (a) or (b) and § 1.810-2 for purposes of

determining L's gain or loss from operations for 1960.

(c) *Termination as life insurance company.* Section 810(d)(2) provides, subject to the provisions of section 381(c)(22) and the regulations thereunder (relating to carryovers in certain corporate readjustments), that if for any taxable year a company which previously was a life insurance company no longer meets the requirements of section 801(a) and paragraph (b) of § 1.801-3 (relating to the definition of a life insurance company), the balance of any adjustments remaining to be made under section 810(d)(1) and paragraph (a) of this section shall be taken into account for the preceding taxable year.

(d) *Illustration of principles.* The provisions of section 810(d)(2) and paragraph (c) of this section may be illustrated by the following example:

*Example.* Assume the facts are the same as in example 1 of paragraph (b) of this section, except that for the taxable year 1962, L no longer meets the requirements of section 801(a) (relating to the definition of a life insurance company) and that the provisions of section 381(c)(22) are not applicable. Under the provisions of section 810 (d)(2), the entire balance of the adjustment remaining to be made with respect to the change in basis which occurred in 1959,  $\frac{8}{10}$  of \$50, or \$40, shall be taken into account for the taxable year 1961, the last year L was a life insurance company. Thus, for the taxable year 1961, the total amount to be taken into account by L as a net increase referred to in section 809(d)(2) and paragraph (a)(2) of § 1.809-5 in determining its gain or loss from operations shall be \$45. Of this amount, \$5 ( $\frac{1}{10}$  of \$50) represents the amount determined under the provisions of section 810(d)(1), and \$40 represents the amount determined under the provisions of section 810(d)(2).

(e) *Effect of preliminary term election.* (1) Section 810(d)(3) provides that if a company which computes its life insurance reserves on a preliminary term basis elects to revalue such reserves on a net level premium basis under section 818(c), such election shall not be treated as a change in basis within the meaning of section 810(d)(1) and paragraph (a) of this section. Thus, any increase or decrease in reserves attributable to such election shall not be taken into account under section 810(d)(1) and paragraph (a) of this section but shall be taken into account in the manner prescribed in section 810 (a)

## Internal Revenue Service, Treasury

## § 1.810-3

and (b) and paragraph (a) of § 1.810-2. See paragraph (c)(3) of § 1.810-2.

(2) Section 810(d)(3) further provides that where an election under section 818(c) would apply to an item referred to in section 810(c) but for the fact that the basis used in computing such item has actually been changed, any increase or decrease in such item attributable to such actual change in basis shall be subject to the adjustment required under section 810(d)(1) and paragraph (a) of this section. In such a case, however, for purposes of section 810(d)(1)(B) and paragraph (a)(2) of this section, the amount of such item at the end of the taxable year computed on the old basis shall be the amount of such item at the end of the taxable year computed as if the election under section 818(c) applied in respect of such item for the taxable year.

(f) *Illustration of principles.* The provisions of section 810(d)(3) and paragraph (e) of this section may be illustrated by the following examples:

*Example 1.* Assume that S, a life insurance company which computes its life insurance reserves on a 3-percent assumed rate and the Commissioner's reserve valuation method (one of the recognized preliminary term reserve methods), elects to revalue such reserves on a net level premium method under section 818(c) and that the significant facts are as follows:

	Jan. 1, 1958	Dec. 31, 1958
Book reserves at 3-percent assumed rate, Commissioner's reserve valuation method .....	100	118
Reserves at 3-percent assumed rate, after restatement under section 818(c) .....	110	131

Under the provisions of section 810(d)(3), an election under section 818(c) is not treated as a change in basis for purposes of section 810(d)(1). Accordingly, the increase of \$21 (\$131 minus \$110) attributable to such election shall not be subject to the adjustment provided by section 810(d)(1) but shall be taken into account in the manner prescribed in section 810(b). For purposes of determining the amount to be taken into account under section 810(b), the reserves with respect to the contracts subject to the section 818(c) election shall be \$110 at the beginning of the taxable year 1958 and \$131 at the end of the taxable year 1958. However, as a result of making the election under section 818(c), the difference (\$10) between the reserves computed on the preliminary term basis on

January 1, 1958 (\$100) and the reserves restated on the net level premium basis on January 1, 1958 (\$110) shall not be taken into account under section 809(d) for the year 1958, or for any subsequent taxable year.

*Example 2.* Assume the facts are the same as in example 1, except that during the taxable year 1959, S actually changed from the preliminary term basis to a net level premium basis which was identical with the net level premium basis used under the section 818(c) election and that the significant facts are as follows:

	Jan. 1, 1959	Dec. 31, 1959
Book reserves at 3-percent assumed rate, Commissioner's reserve valuation method .....	118	127
Reserves at 3-percent assumed rate, after restatement under section 818(c) .....	131	142
Strengthened reserves at 3-percent assumed rate and net level premium method .....		142

Under the provisions of section 810(d)(3), if a company which has made an election under section 818(c) which has not been revoked actually changes the basis used by it in computing the reserves subject to such election, any increase or decrease in reserves attributable to such change in basis shall be taken into account in the manner prescribed in section 810(d)(1). Since S actually changed to the same basis which it used in computing its reserves under section 818(c), the reserves at the end of the taxable year computed on the new basis (\$142) are the same as the reserves at the end of the taxable year computed on the old basis (\$142), i.e., the basis which would have applied under section 818(c) if the election applied for 1959. Accordingly, no adjustment under section 810(d)(1) is required.

*Example 3.* Assume the facts are the same as in example 1, except that during the taxable year 1960, S actually changed the basis used by it in computing its reserves on a certain block of contracts subject to the election under section 818(c) and that the significant facts with respect to this block of contracts are as follows:

	Jan. 1, 1960	Dec. 31, 1960
Book reserves at 3-percent assumed rate, Commissioner's reserve valuation method .....	50	63
Reserves at 3-percent assumed rate, after restatement under section 818(c) .....	60	75
Strengthened reserves at 2-percent assumed rate and net level premium method .....		95

Under the provisions of section 810(d)(3), the amount of the reserves subject to the section

## § 1.810-4

## 26 CFR Ch. I (4-1-14 Edition)

818(c) election at the end of the taxable year computed on the old basis shall be the amount of such reserves at the end of the taxable year determined under section 818(c) (\$75). Since the reserves at the end of the taxable year computed on the new basis, \$95, exceed the reserves at the end of the taxable year computed on the old basis, \$75, by \$20,  $\frac{1}{10}$  of the excess of \$20, or \$2, shall be taken into account as a net increase referred to in section 809(d)(2) and paragraph (a)(2) of § 1.809-5 in determining gain or loss from operations for each of the 10 taxable years immediately following the taxable year 1960. For purposes of determining whether there is a net increase or decrease in the sum of the items described in section 810(c) for the taxable year 1960 under section 810 (a) or (b), the sum of the reserves with respect to such block of contracts shall be \$60 at the beginning of the taxable year and \$75 at the end of the taxable year (the amount of such reserves computed under section 818(c) at the beginning and end of the taxable year). The difference (\$10) between the reserves computed on the preliminary term basis on January 1, 1960 (\$50) and the reserves restated on the net level premium basis on January 1, 1960 (\$60) shall not be taken into account under section 809(d) for the year 1960, or for any subsequent taxable year.

[T.D. 6535, 26 FR 532, Jan. 20, 1961]

### § 1.810-4 Certain decreases in reserves of voluntary employees' beneficiary associations.

(a) *Decreases due to voluntary lapses of policies issued before January 1, 1958.* (1) Section 810(e) provides that if for any taxable year a life insurance company which meets the requirements of section 501(c)(9), other than the requirement of subparagraph (B) thereof, makes an election in the manner provided in section 810(e)(3) and paragraph (b) of this section, only  $11\frac{1}{2}$  percent of any decrease in life insurance reserves (as defined in section 801(b) and § 1.801-4) attributable to the voluntary lapse on or after January 1, 1958, of any policy issued prior to that date shall be taken into account under section 810 (a) or (b) and paragraph (a) of § 1.810-2 in determining the net increase or decrease in the sum of the items described in section 810(c) during the taxable year. In applying the preceding sentence, the decrease in the reserve for any policy shall be determined by reference to the amount of such reserve at the beginning of the taxable year, reduced by any amount allowable as a

deduction under section 809(d)(1) and paragraph (a)(1) of § 1.809-5 in respect of such policy by reason of such lapse. The election under section 810(e) shall be adhered to in computing the company's gain or loss from operation for the taxable year for which the election is made and for all subsequent taxable years, unless consent to revoke such election is obtained from the Commissioner.

(2) The application of the election provided under section 810(e) and subparagraph (1) of this paragraph may be illustrated by the following example:

*Example.* For the taxable year 1960, M, a life insurance company which meets the requirements of section 501(c)(9), other than the requirement of subparagraph (B) thereof, makes the election under section 810(e). Assume the following facts with respect to a policy issued in 1955 which voluntarily lapsed during the taxable year:

(1) Life insurance reserve on January 1, 1960 .....	\$600
(2) Amount allowable as a deduction under sec. 809(d)(1) .....	200
(3) Decrease in life insurance reserves for sec. 810(e) purposes (item (1) minus item (2)) .....	400
(4) Amount taken into account under sec. 810 (a) and (b) by reason of sec. 810(e) election ( $11\frac{1}{2}\%$ × \$400) .....	46

Under the provisions of section 810(e) and subparagraph (1) of this paragraph, M would include \$46 as its life insurance reserve with respect to such policy under section 810(c)(1) at the beginning of the taxable year 1960 for purposes of determining the net increase or decrease in the sum of the items described in section 810(c) for the taxable year under section 810 (a) or (b).

(b) *Time and manner of making election.* The election provided by section 810(e)(3) shall be made in a statement attached to the life insurance company's income tax return for the first taxable year for which the company desires the election to apply. The return and statement must be filed not later than the date prescribed by law (including extensions thereof) for filing the return for such taxable year. However, if the last day prescribed by law (including extensions thereof) for filing a return for the first taxable year for which the company desires the election to apply falls before January 20, 1961, the election provided by section 810(e)(3) may be made for such year by filing the statement and an amended return for such taxable year (and all

## Internal Revenue Service, Treasury

## § 1.811-2

subsequent taxable years for which returns have been filed) before April 21, 1961. The statement shall indicate that the company meets the requirements of section 501(c)(9), other than the requirement of subparagraph (B) thereof, and has made the election provided under section 810(e) and paragraph (a) of this section. The statement shall set forth the following information with respect to each policy described in paragraph (a) of this section which has voluntarily lapsed during such year:

- (1) Type of policy.
- (2) Date issued.
- (3) Date lapsed.
- (4) Reason for lapse.
- (5) Policy reserve as of beginning of taxable year.
- (6) Deduction allowable under section 809(d)(1) and paragraph (a)(1) of § 1.809-5 during taxable year by reason of lapse.
- (7) Decrease in policy reserve for section 810(e) purposes (excess of (5) over (6)).

In addition, the statement shall set forth the total of the amounts referred to in subparagraph (7) of this paragraph with respect to all policies described in paragraph (a) of this section which have voluntarily lapsed during the taxable year.

(c) *Scope of election.* An election made under section 810(e)(3) and paragraph (a) of this section shall be effective for the taxable year for which made and for all succeeding taxable years, unless consent to revoke the election is obtained from the Commissioner. However, for taxable years beginning prior to January 20, 1961, a company may revoke the election provided by section 810(e)(3) without obtaining consent from the Commissioner by filing, before April 21, 1961, a statement that the company desires to revoke such election. An amended return reflecting such revocation must accompany the statement for all taxable years for which returns have been filed with respect to such election.

(d) *Disallowance of carryovers from pre-1958 losses from operations.* For any taxable year for which the election provided under section 810(e)(3) and paragraph (b) of this section is effective, the provisions of section 812(b)(1) and § 1.812-4 shall not apply with respect to

any loss from operations for any taxable year beginning before January 1, 1958.

(e) *Effective date; cross reference.* The provisions of section 810(e) (as in effect for such years) and this section apply only with respect to taxable years beginning before January 1, 1970. For provisions relating to certain funded pension trusts applicable to taxable years beginning after December 31, 1969, see section 501(c)(18) and the regulations thereunder.

[T.D. 6535, 26 FR 533, Jan. 20, 1961, as amended by T.D. 7172, 37 FR 5619, Mar. 17, 1972]

### § 1.811-1 Taxable years affected.

Section 1.811-2, except as otherwise provided therein, is applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112).

[T.D. 6535, 26 FR 534, Jan. 20, 1961]

### § 1.811-2 Dividends to policyholders.

(a) *Dividends to policyholders defined.* Section 811(a) defines the term *dividends to policyholders*, for purposes of part I, subchapter L, chapter 1 of the Code, to mean dividends and similar distributions to policyholders in their capacity as such. The term includes amounts returned to policyholders where the amount is not fixed in the contract but depends on the experience of the company or the discretion of the management. In general, any payment not fixed in the contract which is made with respect to a participating contract (that is, a contract which during the taxable year contains a right to participate in the divisible surplus of the company) shall be treated as a dividend to policyholders. Similarly, any amount refunded or allowed as a rate credit with respect to either a participating or a nonparticipating contract shall be treated as a dividend to policyholders if such amount depends on the experience of the company. However, the term does not include interest paid (as defined in section 805(e) and paragraph (b) of § 1.805-8) or return premiums (as defined in section 809(c) and

paragraph (a)(1)(ii) of § 1.809-4). Thus, so-called excess-interest dividends and amounts returned by one life insurance company to another in respect of reinsurance ceded shall not be treated as dividends to policyholders even though such amounts are not fixed in the contract but depend upon the experience of the company or the discretion of the management.

(b) *Amount of deduction*—(1) *In general.* Section 811(b)(1) provides, subject to the limitation of section 809(f), that the deduction for dividends to policyholders for any taxable year shall be an amount equal to the dividends to policyholders paid during the taxable year:

(i) Increased by the excess of the amounts held as reserves for dividends to policyholders at the end of the taxable year for payment during the year following the taxable year, over the amounts held as reserves for dividends to policyholders at the end of the preceding taxable year for payment during the taxable year, or

(ii) Decreased by the excess of the amounts held as reserves for dividends to policyholders at the end of the preceding taxable year for payment during the taxable year, over the amounts held as reserves for dividends to policyholders at the end of the taxable year for payment during the year following the taxable year.

For the rule as to when dividends are considered paid, see section 561 and the regulations thereunder. For the determination of the amounts held as reserves for dividends to policyholders, see paragraph (c) of this section. For special provisions relating to the treatment of dividends to policyholders paid with respect to policies reinsured under modified coinsurance contracts, see section 820(c)(5) and the regulations thereunder.

(2) *Certain amounts to be treated as net decreases.* Section 811(b)(2) provides that if the amount determined under subparagraph (1)(ii) of this paragraph exceeds the dividends to policyholders paid during the taxable year, the amount of such excess shall be a net decrease referred to in section 809(c)(2).

(c) *Reserves for dividends to policyholders defined*—(1) *In general.* The term *reserves for dividends to policyholders*, as

used in section 811(b)(1) (A) and (B) and paragraph (b)(1) of this section, means only those amounts:

(i) Actually held, or set aside as provided in subparagraph (2) of this paragraph and thus treated as actually held, by the company at the end of the taxable year, and

(ii) With respect to which, at the end of the taxable year or, if set aside, within the period prescribed in subparagraph (2) of this paragraph, the company is under an obligation, which is either fixed or determined according to a formula which is fixed and not subject to change by the company, to pay such amounts as dividends to policyholders (as defined in section 811(a) and paragraph (a) of this section) during the year following the taxable year.

(2) *Amounts set aside.* (i) In the case of a life insurance company (as defined in section 801(a) and paragraph (b) of § 1.801-3), all amounts set aside before the 16th day of the 3d month of the year following the taxable year for payment as dividends to policyholders (as defined in section 811(a) and paragraph (a) of this section) during the year following such taxable year shall be treated as amounts actually held at the end of the taxable year.

(ii) In the case of a mutual savings bank subject to the tax imposed by section 594, all amounts set aside before the 16th day of the 4th month of the year following the taxable year for payment as dividends to policyholders (as defined in section 811(a) and paragraph (a) of this section) during the year following such taxable year shall be treated as amounts actually held at the end of the taxable year.

(3) *1958 reserve for dividends to policyholders.* For purposes of section 811(b) and paragraph (b) of this section, the amounts held at the end of 1957 as reserves for dividends to policyholders payable during 1958 shall be determined as if part I, subchapter L, chapter 1 of the Code (as in effect for 1958) applied for 1957. Any adjustment in the reserves for dividends to policyholders at the beginning of 1957 required as a result of an understatement or overstatement of such reserves by the company shall be made to the balance of such reserves as of the beginning of 1957. For example, if at the beginning of 1957 the

reserves for dividends to policyholders are stated to be \$100 and it is subsequently determined that such reserves should have been \$90, the reserves at the beginning of 1957 shall be reduced by \$10. Under no circumstances shall an adjustment required with regard to the beginning 1957 reserves be made to the reserves at the end of 1957.

(4) *Information to be filed.* Every company claiming a deduction for dividends to policyholders shall keep such permanent records as are necessary to establish the amount of dividends actually paid during the taxable year. Such company shall also keep a copy of the dividend resolution and any necessary supporting data relating to the amounts of dividends declared and to the amounts held or set aside as reserves for dividends to policyholders during the taxable year. The company shall file with its return a concise statement of the pertinent facts relating to its dividend policy for the year, the amount of dividends actually paid during the taxable year, and the amounts held or set aside as reserves for dividends to policyholders during the taxable year.

(d) *Illustration of principles.* The provisions of section 811(b) and this section may be illustrated by the following examples:

*Example 1.* On December 31, 1959, M, a life insurance company, held \$200 as reserves for dividends to policyholders due and payable in 1960. On March 10, 1960, M set aside an additional \$50 as reserves for dividends to policyholders due and payable in 1960. During the taxable year 1960, M paid \$240 as dividends to its policyholders and at the end of the taxable year 1960, held \$175 as reserves for dividends to policyholders due and payable in 1961. No additional amount was set aside before March 16, 1961, as reserves for dividends to policyholders due and payable in 1961. For the taxable year 1960, subject to the limitation of section 809(f), M's deduction for dividends to policyholders is \$165, computed as follows:

(1) Dividends paid to policyholders during the taxable year 1960 .....	\$240
(2) Decreased by the excess of item (a) over item (b):	
(a) Reserves for dividends to policyholders as of 12-31-59 (including amounts set aside as provided in paragraph (c)(2) of this section) .....	\$250
(b) Reserves for dividends to policyholders as of 12-31-60 .....	175

75

(3) Deduction for dividends to policyholders under sec. 811(b) (computed without regard to the limitation of sec. 809(f)) .....	\$165
---	-------

*Example 2.* On December 31, 1960, S, a life insurance company, held \$100 as reserves for dividends to policyholders due and payable in 1961. During the taxable year 1961, S paid \$125 as dividends to its policyholders and at the end of the taxable year 1961, held \$110 as reserves for dividends to policyholders due and payable in 1962. No additional amount was set aside for dividends to policyholders as provided in paragraph (c)(2) of this section before March 16, 1961, or March 16, 1962. For the taxable year 1961, subject to the limitation of section 809(f), S's deduction for dividends to policyholders is \$135, computed as follows:

(1) Dividends paid to policyholders during the taxable year 1961 .....	\$125
(2) Increased by the excess of item (a) over item (b):	
(a) Reserves for dividends to policyholders as of 12-31-61 .....	\$110
(b) Reserves for dividends to policyholders as of 12-31-60 .....	100
	10
(3) Deduction for dividends to policyholders under sec. 811(b) (computed without regard to the limitation of sec. 809(f)) .....	\$135

*Example 3.* Assume the facts are the same as in example 2, except that on December 31, 1960, the amount held as reserves for dividends to policyholders due and payable in 1961 is \$250. For the taxable year 1961, S's deduction for dividends to policyholders is zero, computed as follows:

(1) Dividends paid to policyholders during the taxable year 1961 .....	\$125
(2) Decreased by the excess of item (a) over item (b):	
(a) Reserves for dividends to policyholders as of 12-31-60 .....	\$250
(b) Reserves for dividends to policyholders as of 12-31-61 .....	110
	140
(3) Deduction for dividends to policyholders under sec. 811(b) (computed without regard to the limitation of sec. 809(f)) .....	\$0

Under the provisions of section 811(b)(2) and paragraph (b)(2) of this section, since the decrease in the reserves for dividends to policyholders during the taxable year, \$140 (\$250 minus \$110), exceeds the dividends to policyholders paid during the taxable year 1961, \$125, S shall include \$15 (the amount of such excess) as a net decrease under section 809(c)(2) and paragraph (a)(2) of § 1.809-4 in determining its gain or loss from operations for 1961.

[T.D. 6535, 26 FR 534, Jan. 20, 1961]

## § 1.811-3

## 26 CFR Ch. I (4-1-14 Edition)

### § 1.811-3 Cross-reference.

For special rules regarding the treatment of modified guaranteed contracts (as defined in section 817A and § 1.817A-1(a)(1)), see § 1.817A-1.

[T.D. 9058, 68 FR 24350, May 7, 2003]

### § 1.812-1 Taxable years affected.

Sections 1.812-2 through 1.812-8, except as otherwise provided therein, are applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112) and the Act of October 23, 1962 (76 Stat. 1134).

[T.D. 6886, 31 FR 8689, June 23, 1966]

### § 1.812-2 Operations loss deduction.

(a) *Allowance of deduction.* Section 812 provides that a life insurance company shall be allowed a deduction in computing gain or loss from operations for any taxable year beginning after December 31, 1957, in an amount equal to the aggregate of the operations loss carryovers and operations loss carrybacks to such taxable year. This deduction is referred to as the operations loss deduction. The loss from operations (computed under section 809), is the basis for the computation of the operations loss carryovers and operations loss carrybacks and ultimately for the operations loss deduction itself. Section 809(e)(5) provides that the net operating loss deduction provided in section 172 shall not be allowed a life insurance company since the operations loss deduction provided in section 812 and this paragraph shall be allowed in lieu thereof.

(b) *Steps in computation of operations loss deduction.* The three steps to be taken in the ascertainment of the operations loss deduction for any taxable year beginning after December 31, 1957, are as follows:

(1) Compute the loss from operations for any preceding or succeeding taxable year from which a loss from operations may be carried over or carried back to such taxable year.

(2) Compute the operations loss carryovers to such taxable year from

such preceding taxable years and the operations loss carrybacks to such taxable year from such succeeding taxable years.

(3) Add such operations loss carryovers and carrybacks in order to determine the operations loss deduction for such taxable year.

(c) *Statement with tax return.* Every life insurance company claiming an operations loss deduction for any taxable year shall file with its return for such year a concise statement setting forth the amount of the operations loss deduction claimed and all material and pertinent facts relative thereto, including a detailed schedule showing the computation of the operations loss deduction.

(d) *Ascertainment of deduction dependent upon operations loss carryback.* If a life insurance company is entitled in computing its operations loss deduction to a carryback which it is not able to ascertain at the time its return is due, it shall compute the operations loss deduction on its return without regard to such operations loss carryback. When the life insurance company ascertains the operations loss carryback, it may within the applicable period of limitations file a claim for credit or refund of the overpayment, if any, resulting from the failure to compute the operations loss deduction for the taxable year with the inclusion of such carryback; or it may file an application under the provisions of section 6411 for a tentative carryback adjustment.

(e) *Law applicable to computations.* The following rules shall apply to all taxable years beginning after December 31, 1957:

(1) In determining the amount of any operations loss carryback or carryover to any taxable year, the necessary computations involving any other taxable year shall be made under the law applicable to such other taxable year.

(2) The loss from operations for any taxable year shall be determined under the law applicable to that year without regard to the year to which it is to be carried and in which, in effect, it is to be deducted as part of the operations loss deduction.

(3) The amount of the operations loss deduction which shall be allowed for

## Internal Revenue Service, Treasury

## § 1.812-4

any taxable year shall be determined under the law applicable for that year.

(f) *Special rules.* For purposes of taxable years beginning after December 31, 1954, and before January 1, 1958:

- (1) The amount of any:
  - (i) Loss from operations;
  - (ii) Operations loss carryback; and
  - (iii) Operations loss carryover

shall be computed as if part I, subchapter L, chapter 1 of the Code (as in effect for 1958) and section 381(c)(22) applied to such taxable years.

(2) A loss from operations (determined in accordance with the provisions of section 812(b)(1)(C) and this paragraph) for such taxable years shall in no way affect the tax liability of any life insurance company for such taxable years. However, such loss may, to the extent allowed as an operations loss carryover under section 812, affect the tax liability of a life insurance company for a taxable year beginning after December 31, 1957. For example, for the taxable year 1956, X, a life insurance company, has a loss from operations (determined in accordance with the provisions of section 812(b)(1)(C) and this paragraph). Such loss shall in no way affect X's tax liability for the taxable years 1956 (the year of the loss), 1955 (a year to which such loss shall be carried back), or 1957 (a year to which such loss shall be carried forward). However, to the extent allowed under section 812, any amount of the loss for 1956 remaining after such carryback and carryforward shall be taken into account in determining X's tax liability for taxable years beginning after December 31, 1957.

[T.D. 6535, 26 FR 536, Jan. 20, 1961]

### § 1.812-3 Computation of loss from operations.

(a) *Modification of deductions.* A loss from operations is sustained by a life insurance company in any taxable year, if and to the extent that, for such year, there is an excess of the sum of the deductions provided by section 809(d) over the sum of (1) the life insurance company's share of each and every item of investment yield (including tax-exempt interest, partially tax-exempt interest, and dividends received) as determined under section 809(b)(3), and (2) the sum of the items of

gross amount taken into account under section 809(c). In determining the loss from operations for purposes of section 812:

(i) No deduction shall be allowed under section 812 for the operations loss deduction.

(ii) The 85 percent limitation on dividends received provided by section 246 (b) as modified by section 809(d)(8)(B) shall not apply to the deductions otherwise allowed under:

(a) Section 243(a) in respect to dividends received by corporations.

(b) Section 244 in respect of dividends received on certain preferred stock of public utilities, and

(c) Section 245 in respect of dividends received from certain foreign corporations.

(b) *Illustration of principles.* The application of paragraph (a) of this section may be illustrated by the following example:

*Example.* For the taxable year 1960, X, a life insurance company, has items taken into account under section 809(c) amounting to \$150,000, its share of the investment yield amounts to \$250,000, and total deductions allowed by section 809(d) of \$375,000, exclusive of any operations loss deduction and exclusive of any deduction for dividends received. In 1960, X received as its share of dividends entitled to the benefits of section 243(a) the amount of \$100,000. These dividends are included in X's share of the investment yield. X has no other deductions to which section 812(c) applies. On the basis of these facts, X has a loss from operations for the taxable year 1960 of \$60,000, computed as follows:

Deductions for 1960 .....	\$375,000
Plus: Deduction for dividends received computed without regard to the limitation provided by sec. 246(b), as modified by sec. 809(d)(8)(B) (85% of \$100,000) .....	85,000
Total deductions as modified by sec. 812(c) .....	460,000
Less: Sum of sec. 809(c) items and X's share of investment yield (including \$100,000 of dividends) .....	400,000
Loss from operations for 1960 .....	(60,000)

[T.D. 6535, 26 FR 536, Jan. 20, 1961]

### § 1.812-4 Operations loss carrybacks and operations loss carryovers.

(a) *In general—(1) Years to which loss may be carried.* In order to compute the operations loss deduction of a life insurance company the company must first determine the part of any losses

from operations for any preceding or succeeding taxable years which are carryovers or carrybacks to the taxable year in issue. Except as otherwise provided by this paragraph, a loss from operations for taxable years beginning after December 31, 1954, shall be carried back to each of the 3 taxable years preceding the loss year and shall be carried forward to each of the 5 taxable years succeeding the loss year. Except as limited by section 812(e)(2) and paragraph (b) of § 1.812-6, if the life insurance company is a new company (as defined in section 812(e)(1)) for the loss year, the loss from operations shall be carried back to each of the 3 taxable years preceding the loss year and shall be carried forward to each of the 8 taxable years succeeding the loss year. In determining the span of years for which a loss from operations may be carried, taxable years in which a company does not qualify as a life insurance company (as defined in section 801(a)), or is not treated as a new company, shall be taken into account.

(2) *Special transitional rules.* (i) A loss from operations for any taxable year beginning before January 1, 1958, shall not be carried back to any taxable year beginning before January 1, 1955. Furthermore, a loss from operations for any taxable year beginning after December 31, 1957, shall not be carried back to any taxable year beginning before January 1, 1958.

(ii) If for any taxable year a life insurance company has made an election under section 810(e) (relating to certain decreases in reserves for voluntary employees' beneficiary associations) which is effective for such taxable year, the provisions of section 812(b)(1) and subparagraph (1) of this paragraph shall not apply with respect to any loss from operations for any taxable year beginning before January 1, 1958.

(3) *Illustration of principles.* The provisions of section 812(b)(1) and of this paragraph may be illustrated by the following examples:

*Example 1.* P, a life insurance company, organized in 1940, has a loss from operations of \$1,000 in 1958. This loss cannot be carried back, but shall be carried forward to each of the 5 taxable years following 1958.

*Example 2.* Q, a life insurance company, organized in 1940, has a loss from operations of \$1,200 in 1959. This loss shall be carried back

to the taxable year 1958 and then shall be carried forward to each of the 5 taxable years following 1959.

*Example 3.* R, a life insurance company, organized in 1940, has a loss from operations of \$1,300 for the taxable year 1956. This loss shall first be carried back to the taxable year 1955 and then shall be carried forward to each of the 5 taxable years following 1956. The loss for 1956, carryback to 1955, and carryover to 1957 shall each be computed as if part I, subchapter L, chapter 1 of the Code (as in effect for 1958) applied to such taxable years.

*Example 4.* S, a life insurance company, organized in 1958 and meeting the provisions of section 812(e) (rules relating to new companies), has a loss from operations of \$1,400 for the taxable year 1958. This loss cannot be carried back, but shall be carried forward to each of the 8 taxable years following 1958, provided, however, S is not a nonqualified corporation at any time during the loss year (1958) or any taxable year thereafter.

*Example 5.* T, a life insurance company, organized in 1954 and meeting the provisions of section 812(e) (rules relating to new companies), has a loss from operations of \$1,500 for the taxable year 1956. This loss shall first be carried back to the taxable year 1955 and then carried forward to each of the 8 taxable years following 1956, provided, however, T is not a nonqualified corporation at any time during the loss year (1956) or any taxable year thereafter. The loss for 1956, carryback to 1955, and carryover to 1957 shall each be computed as if part I of subchapter L (as in effect for 1958) applied to such taxable years.

(4) *Periods of less than 12 months.* A fractional part of a year which is a taxable year under sections 441(b) and 7701(a)(23) is a preceding or a succeeding taxable year for the purpose of determining under section 812 the first, second, etc., preceding or succeeding taxable year. For the determination of the loss from operations for periods of less than 12 months, see section 818(d) and the regulations thereunder.

(5) *Amount of loss to be carried.* The amount which is carried back or carried over to any taxable year is the loss from operations to the extent it was not absorbed in the computation of gain from operations for other taxable years, preceding such taxable year, to which it may be carried back or carried over. For the purpose of determining the gain from operations for any such preceding taxable year, the various operations loss carryovers and carrybacks to such taxable year are considered to be applied in reduction of

the gain from operations in the order of the taxable years from which such losses are carried over or carried back, beginning with the loss for the earliest taxable year.

(6) *Corporate acquisitions.* For the computation of the operations loss carryovers in the case of certain acquisitions of the assets of a life insurance company by another life insurance company, see section 381(c)(22) and the regulations thereunder.

(b) *Portion of loss from operations which is a carryback or a carryover to the taxable year in issue—(1) Manner of computation.* (i) A loss from operations shall first be carried back to the earliest taxable year permissible under section 812(b) and paragraph (a) of this section for which such loss is allowable as a carryback or a carryover. The entire amount of the loss from operation shall be carried back to such earliest year.

(ii) Section 812(b)(2) provides that the portion of the loss from operations which shall be carried to each of the taxable years subsequent to the earliest taxable year shall be the excess (if any) of the amount of the loss from operations over the sum of the offsets (as defined in section 812(d) and paragraph (a) of § 1.812-5) for all prior taxable years to which the loss from operations may be carried.

(2) *Illustration of principles.* The application of this paragraph may be illustrated by the following example:

*Example.* T, a life insurance company (which is not a new company as defined in section 812(e)(1)), has a loss from operations for 1960. The entire amount of the loss from operations for 1960 shall first be carried back to 1958. The amount of the carryback to 1959 is the excess (if any) of the 1960 loss over the offset for 1958. The amount of the carryover to 1961 is the excess (if any) of the 1960 loss over the sum of the offsets for 1958 and 1959. The amount of the 1960 loss remaining (if any) to be carried over to 1962, 1963, or 1964 shall be computed in a like manner.

[T.D. 6535, 26 FR 537, Jan. 20, 1961]

#### § 1.812-5 Offset.

(a) *Offset defined.* Section 812(d) defines the term “offset” for purposes of section 812(b)(2) and paragraph (b)(1)(ii) of § 1.812-4. For any taxable year the offset is only that portion of the increase in the operations loss deduction

for the taxable year which is necessary to reduce the life insurance company taxable income (computed without regard to section 802(b)(3)) for such year to zero. For purposes of the preceding sentence, the offset shall be determined with the modifications prescribed in paragraph (b) of this section. Such modifications shall be made independently of, and without reference to, the modifications required by paragraph (a) of § 1.812-3 for purposes of computing the loss from operations itself.

(b) *Modifications—(1) Operations loss deduction—(i) In general.* Section 812(d)(2) provides that for purposes of section 812(d)(1) (relating to the definition of offset), the operations loss deduction for any taxable year shall be computed by taking into account only such losses from operations otherwise allowable as carryovers or as carrybacks to such taxable year as were sustained in taxable years preceding the taxable year in which the life insurance company sustained the loss from operations from which the offset is to be deducted. Thus, for such purposes the loss from operations for the loss year or for any taxable year thereafter shall not be taken into account.

(ii) *Illustration of principles.* The provisions of this subparagraph may be illustrated by the following example:

*Example.* In computing the operations loss deduction for 1960, Y, a life insurance company, has a carryover from 1958 of \$9,000, a carryover from 1959 of \$6,000, a carryback from 1961 of \$18,000, and a carryback from 1962 of \$10,000, or an aggregate of \$43,000 in carryovers and carrybacks. Thus, the operations loss deduction for 1960, for purposes of determining the tax liability for 1960, is \$43,000. However, in computing the offset for 1960 which is subtracted from the loss from operations for 1961 for the purpose of determining the portion of such loss which may be carried over to subsequent taxable years, the operations loss deduction for 1960 is \$15,000, that is, the aggregate of the \$9,000 carryover from 1958 and the \$6,000 carryover from 1959. In computing the operations loss deduction for such purpose, the \$18,000 carryback from 1961 and the \$10,000 carryback from 1962 are disregarded. In computing the offset for 1960, however, which is subtracted from the loss from operations for 1962 for the purpose of determining the portion of such 1962 loss which may be carried

over for subsequent taxable years, the operations loss deduction for 1960 is \$33,000, that is, the aggregate of the \$9,000 carryover from 1958, the \$6,000 carryover from 1959, and the \$18,000 carryback from 1961. In computing the operations loss deduction for such purpose, the \$10,000 carryback from 1962 is disregarded.

(2) *Recomputation of deductions limited by section 809(f)*—(i) *In general.* If in any taxable year a life insurance company has deductions under section 809(d) (3), (5), and (6), as limited by section 809(f), and sustains a loss from operations in a succeeding taxable year which may be carried back as an operations loss deduction, such limitation and deductions shall be recomputed. This recomputation is required since the carryback must be taken into account for purposes of determining such limitation and deductions.

(ii) *Illustration of principles.* The provisions of this subparagraph may be illustrated by the following example:

(a) *Facts.* The books of P, a life insurance company, reveal the following facts:

Taxable year	Taxable investment income	Gain from operations	Loss from operations
1959 .....	\$9,000,000	\$10,000,000	.....
1960 .....	.....	.....	(\$9,800,000)

The gain from operations thus shown is computed without regard to any operations loss deduction or deductions under section 809(d) (3), (5), and (6), as limited by section 809(f). Assume that for the taxable year 1959, P has (without regard to the limitation of section 809(f) or the operations loss deduction for 1959) a deduction under section 809(d)(3) of \$2,500,000 for dividends to policyholders and no deductions under section 809(d) (5) or (6).

(b) *Determination of section 809(f) limitation and deduction for dividends to policyholders without regard to the operations loss deduction for 1959.* In order to determine gain or loss from operations for 1959, P must determine the deduction for dividends to policyholders for such year. Under the provisions of section 809(f), the amount of such deduction shall not exceed the sum of (1) the amount (if any) by which the gain from operations for such year (determined without regard to such deduction) exceeds P's taxable investment income for such year, plus (2) \$250,000. Since the gain from operations as thus determined (\$10,000,000) exceeds the taxable investment income (\$9,000,000) by \$1,000,000, the limitation on such deduction is \$1,250,000 (\$1,000,000 plus \$250,000). Accordingly, only \$1,250,000 of the \$2,500,000 deduction for dividends to policyholders shall be allowed. The gain from operations for such year is \$8,750,000 (\$10,000,000 minus \$1,250,000).

The gain from operations for such year is \$8,750,000 (\$10,000,000 minus \$1,250,000).

(c) *Recomputation of section 809(f) limitation and deduction for dividends to policyholders after application of the operations loss deduction for 1959.* Since P has sustained a loss from operations for 1960 which shall be carried back to 1959 as an operations loss deduction, it must recompute the section 809(f) limitation and deduction for dividends to policyholders. Taking into account the \$9,800,000 operations loss deduction for 1959 reduces gain from operations for such year to \$200,000 (\$10,000,000 minus \$9,800,000). Since the gain from operations as thus determined (\$200,000) is less than the taxable investment income (\$9,000,000), the limitation on the deduction for dividends to policyholders is \$250,000. Thus, only \$250,000 of the \$2,500,000 deduction for dividends to policyholders shall be allowed. The gain from operations for such year as thus determined is \$9,750,000 (\$10,000,000 minus \$250,000) since for purposes of this determination the operations loss deduction for 1959 is not taken into account (see section 812(c)(1)). Accordingly, the offset for 1959 is \$9,750,000 (the increase in the operations loss deduction for 1959, computed without regard to the carryback for 1960, which reduces life insurance company taxable income for 1959 to zero); thus, the portion of the 1960 loss from operations which shall be carried forward to 1961 is \$50,000 (the excess of the 1960 loss (\$9,800,000) over the offset for 1959 (\$9,750,000)).

(3) *Minimum limitation.* The life insurance company taxable income, as modified under this paragraph, shall in no case be considered less than zero.

[T.D. 6535, 26 FR 537, Jan. 20, 1961]

#### § 1.812-6 New company defined.

Section 812(e) provides that for purposes of part I, subchapter L, chapter 1 of the Code, a life insurance company is a "new company" for any taxable year only if such taxable year begins not more than 5 years after the first day on which it (or any predecessor if section 381(c)(22) applies or would have applied if in effect) was authorized to do business as an insurance company.

[T.D. 7326, 39 FR 35354, Oct. 1, 1974]

#### § 1.812-7 Application of subtitle A and subtitle F.

Section 812(f) provides that except as modified by section 809(e) (relating to modifications of deduction items otherwise allowable under subtitle A of the Code) subtitles A and F of the Code

## Internal Revenue Service, Treasury

## § 1.812-8

shall apply to operations loss carrybacks and carryovers, and to the operations loss deduction, in the same manner and to the same extent that such subtitles apply in respect of net operation loss carrybacks, net operating loss carryovers, and the net operating loss deduction of corporations generally. For the computation of the operations loss carrybacks and carryovers, and of the operations loss deduction in the case of certain acquisitions of the assets of a life insurance company by another life insurance company, see section 381(c)(22) and the regulations thereunder.

[T.D. 6535, 26 FR 539, Jan. 20, 1961]

### § 1.812-8 Illustration of operations loss carrybacks and carryovers.

The application of § 1.812-4 may be illustrated by the following example:

(a) *Facts.* The books of M, a life insurance company, organized in 1940, reveal the following facts:

Taxable year	Taxable investment income	Gain from operations	Loss from operations
1958 .....	\$11,000	\$15,000	.....
1959 .....	23,000	30,000	.....
1960 .....	.....	.....	(\$75,000)
1961 .....	25,000	20,000	.....
1962 .....	.....	.....	(150,000)
1963 .....	22,000	30,000	.....
1964 .....	40,000	35,000	.....
1965 .....	62,000	75,000	.....
1966 .....	25,000	17,000	.....
1967 .....	39,000	53,000	.....

The gain from operations thus shown is computed without regard to any operations loss deduction. The assumption is also made that none of the other modifications prescribed in paragraph (b) of § 1.812-5 apply. There are no losses from operations for 1955, 1956, 1957, 1968, 1969, 1970.

(b) *Loss sustained in 1960.* The portions of the \$75,000 loss from operations for 1960 which shall be used as carrybacks to 1958 and 1959 and as carryovers to 1961, 1962, 1963, 1964, and 1965 are computed as follows:

(1) *Carryback to 1958.* The carryback to this year is \$75,000, that is, the amount of the loss from operations.

(2) *Carryback to 1959.* The carryback to this year is \$60,000 (the excess of the loss for 1960 over the offset for 1958), computed as follows:

Loss from operations .....	\$75,000
Less:	
Offset for 1958 (the \$15,000 gain from operations for such year computed without the deduction of the carryback from 1960) .....	15,000

Carryback .....	60,000
-----------------	--------

(3) *Carryover to 1961.* The carryover to this year is \$30,000 (the excess, if any, of the loss for 1960 over the sum of the offsets for 1958 and 1959), computed as follows:

Loss from operations .....	\$75,000
Less:	
Offset for 1958 (the \$15,000 gain from operations for such year computed without the deduction of the carryback from 1960) .....	\$15,000
Offset for 1959 (the \$30,000 gain from operations for such year computed without the deduction of the carryback from 1960 or the carryback from 1962) .....	30,000
Sum of offsets .....	45,000
Carryover .....	30,000

(4) *Carryover to 1962.* The carryover to this year is \$10,000 (the excess, if any, of the loss for 1960 over the sum of the offsets for 1958, 1959, and 1961), computed as follows:

Loss from operations .....	\$75,000
Less:	
Offset for 1958 (the \$15,000 gain from operations for such year computed without the deduction of the carryback from 1960) .....	\$15,000
Offset for 1959 (the \$30,000 gain from operations for such year computed without the deduction of the carryback from 1960 or the carryback from 1962) .....	80,000
Offset for 1961 (the \$20,000 gain from operations for such year computed without the deduction of the carryover from 1960 or the carryback from 1962) .....	20,000
Sum of offsets .....	65,000
Carryover .....	10,000

(5) *Carryover to 1963.* The carryover to this year is \$10,000 (the excess, if any, of the loss for 1960 over the sum of the offsets for 1958, 1959, 1961, and 1962), computed as follows:

Loss from operations .....	\$75,000
Less:	
Offset for 1958 (the \$15,000 gain from operations for such year computed without the deduction of the carryback from 1960) .....	\$15,000
Offset for 1959 (the \$30,000 gain from operations for such year computed without the deduction of the carryback from 1960 or the carryback from 1962) .....	30,000
Offset for 1961 (the \$20,000 gain from operations for such year computed without the deduction of the carryover from 1960 or the carryback from 1962) .....	20,000

§ 1.812-8

26 CFR Ch. I (4-1-14 Edition)

Offset for 1962 (a year in which a loss from operations was sustained) .....	0
Sum of offsets .....	65,000
Carryover .....	10,000

(6) *Carryover to 1964.* The carryover to this year is \$0 (the excess, if any, of the loss from 1960 over the sum of the offsets for 1958, 1959, 1961, 1962, and 1963), computed as follows:

Loss from operations .....	\$75,000
Less:	
Offset for 1958 (the \$15,000 gain from operations for such year computed without the deduction of the carryback from 1960) .....	\$15,000
Offset for 1959 (the \$30,000 gain from operations for such year computed without the deduction of the carryback from 1960 or the carryback from 1962) .....	30,000
Offset for 1961 (the \$20,000 gain from operations for such year computed without the deduction of the carryover from 1960 or the carryback from 1962) .....	20,000
Offset for 1962 (a year in which a loss from operations was sustained) .....	0
Offset for 1963 (the \$30,000 gain from operations for such year computed without the deduction of the carryover from 1960 or the carryback from 1962) .....	30,000
Sum of offsets .....	95,000
Carryover .....	0

(7) *Carryover to 1965.* The carryover to this year is \$0 (the excess, if any, of the loss from 1960 over the sum of the offsets for 1958, 1959, 1961, 1962, 1963, and 1964), computed as follows:

Loss from operations .....	\$75,000
Less:	
Offset for 1958 (the \$15,000 gain from operations for such year computed without the deduction of the carryback from 1960) .....	\$15,000
Offset for 1959 (the \$30,000 gain from operations for such year computed without the deduction for the carryback from 1960 or the carryback from 1962) .....	30,000
Offset for 1961 (the \$20,000 gain from operations for such year computed without the deduction for the carryover from 1960 or the carryback from 1962) .....	20,000
Offset for 1962 (a year in which a loss from operations was sustained) .....	0

Offset for 1963 (the \$30,000 gain from operations for such year computed without the deduction for the carryover from 1960 or the carryover from 1962) .....	30,000
Offset for 1964 (the \$35,000 gain from operations for such year computed without the deduction of the carryover from 1960 or the carryover from 1962) .....	35,000
Sum of offsets .....	130,000
Carryover .....	0

(c) *Loss sustained in 1962.* The portions of the \$150,000 loss from operations for 1962 which shall be used as carrybacks to 1959, 1960, and 1961 and as carryovers to 1963, 1964, 1965, 1966, and 1967 are computed as follows:

(1) *Carryback to 1959.* The carryback to this year is \$150,000, that is, the amount of the loss from operations.

(2) *Carryback to 1960.* The carryback to this year is \$150,000 (the excess, if any, of the loss from 1962 over the offset for 1959), computed as follows:

Loss from operations .....	\$150,000
Less:	
Offset for 1959 (the \$30,000 gain from operations for such year reduced by the carryback to such year of \$60,000 from 1960, the carryback from 1962 to 1959 not being taken into account) .....	0
Carryback .....	150,000

(3) *Carryback to 1961.* The carryback to this year is \$150,000 (the excess, if any, of the loss from 1962 over the sum of the offsets for 1959 and 1960), computed as follows:

Loss from operations .....	\$150,000
Less:	
Offset for 1959 (the \$30,000 gain from operations for such year reduced by the carryback to such year of \$60,000 from 1960, the carryback from 1962 to 1959 not being taken into account) .....	0
Offset for 1960 (a year in which a loss from operations was sustained) .....	0
Sum of offsets .....	0
Carryback .....	150,000

(4) *Carryover to 1963.* The carryover to this year is \$150,000 (the excess, if any, of the loss from 1962 over the sum of the offsets for 1959, 1960, and 1961), computed as follows:

Loss from operations .....	\$150,000
Less:	
Offset for 1959 (the \$30,000 gain from operations for such year reduced by the carryback to such year of \$60,000 from 1960, the carryback from 1962 to 1959 not being taken into account) .....	0
Offset for 1960 (a year in which a loss from operations was sustained) .....	0

## Internal Revenue Service, Treasury

## § 1.812-8

Offset for 1961 (the \$20,000 gain from operations for such year reduced by the carryover to such year of \$30,000 from 1960, the carryback from 1962 to 1961 not being taken into account) .....	0
Sum of offsets .....	0
Carryover .....	150,000

(5) *Carryover to 1964.* The carryover to this year is \$130,000 (the excess, if any, of the loss from 1962 over the sum of the offsets for 1959, 1960, 1961, and 1963), computed as follows:

Loss from operations .....	\$150,000
Less:	
Offset for 1959 (the \$30,000 gain from operations for such year reduced by the carryback to such year of \$60,000 from 1960, the carryback from 1962 to 1959 not being taken into account) .....	0
Offset for 1960 (a year in which a loss from operations was sustained) .....	0

**DISTRIBUTIONS TO SHAREHOLDERS**

**§ 1.815-1 Taxable years affected.**

Sections 1.815-2 through 1.815-6, except as otherwise provided therein, are applicable only to taxable years begin-

ning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112), the Act of October 10, 1962 (76 Stat. 808), and the Act of October 23, 1962 (76 Stat. 1134).

[T.D. 6886, 31 FR 8689, June 23, 1966]

**§ 1.815-2 Distributions to shareholders.**

(a) *In general.* Section 815 provides that every stock life insurance company subject to the tax imposed by section 802 shall establish and maintain two special surplus accounts for Federal income tax purposes. These special accounts are the shareholders surplus account (as defined in section 815(b) and § 1.815-3) and the policyholders surplus account (as defined in section 815(c) and § 1.815-4). To the extent that a distribution to shareholders (as defined in paragraph (c) of this section) is treated as being made out of the shareholders surplus account, no tax is imposed on the company with respect to such distribution. However, to the extent that a distribution to shareholders is treated as being made out of the policyholders surplus account, the amount subtracted from the policyholders surplus account by reason of such distribution shall be taken into account in determining life insurance company taxable income under section 802(b).

(b) *Priority system for distributions to shareholders.* (1) For purposes of section 815 (other than subsection (e) thereof relating to certain mutualizations) and section 802(b)(3) (relating to the determination of life insurance company taxable income), any distribution made to shareholders after December 31, 1958, shall be treated in the following manner:

(i) Distributions shall be treated as first being made out of the shareholders surplus account (as defined in section 815(b) and § 1.815-3);

(ii) Once the shareholders surplus account has been reduced to zero, distributions shall then be treated as being made out of the policyholders surplus account (as defined in section 815(c) and § 1.815-4) until that account has been reduced to zero; and

(iii) Finally, any distributions in excess of the amounts in the shareholders surplus account and the policyholders surplus account shall be treated as being made out of other accounts (as defined in § 1.815-5).

(2) For purposes of subparagraph (1) of this paragraph, in order to determine whether a distribution (or any portion thereof) shall be treated as being made out of the shareholders sur-

plus account, policyholders surplus account, or other accounts, the amount in such accounts at the end of any taxable year shall be the cumulative balance in such accounts at the end of the taxable year, computed without diminution by reason of a distribution (or any portion thereof) during the taxable year which is treated as being made out of such accounts. For example, on January 1, 1960, S, a stock life insurance company, had \$1,000 in its shareholders surplus account and \$3,000 in its policyholders surplus account. On November 1, 1960, S distributed \$4,000 to its shareholders. Under the provisions of section 815(b)(2) and paragraph (b) of § 1.815-3, S added \$5,000 to its shareholders surplus account for the taxable year 1960. Since the distributions to shareholders during the taxable year 1960, \$4,000, does not exceed the cumulative balance in the shareholders surplus account at the end of the taxable year, computed without diminution by reason of distributions treated as made out of such account during the taxable year, \$6,000 (\$1,000 plus \$5,000), the entire distribution is treated as being made out of the shareholders surplus account.

(3) Except in the case of a distribution in cash and as otherwise provided herein, the amount to be charged to the special surplus accounts referred to in subparagraph (1) of this paragraph with respect to any distributions to shareholders (as defined in section 815(a) and paragraph (c) of this section) shall be the fair market value of the property distributed, determined as of the date of distribution. However, for the amount of the adjustment to earnings and profits reflecting such distributions, see section 312 and the regulations thereunder. For a special rule relating to the determination of the amount to be charged to such special surplus accounts in the case of a distribution by a foreign life insurance company carrying on a life insurance business within the United States, see section 819(c)(1) and the regulations thereunder.

(c) *Distributions to shareholders defined.* (1) Except as otherwise provided in section 815(f) and subparagraph (2) of this paragraph, the term *distribution*, as used in section 815(a) and paragraph (b)

of this section, means any distribution of property made by a life insurance company to its shareholders. For purposes of the preceding sentence, the term *property* means any property (including money, securities, and indebtedness to the company) other than stock, or rights to acquire stock, in the company making the distribution. Thus, for example, the term includes a distribution which is considered a dividend under section 316, but is not limited to the extent that such distribution must be made out of the accumulated or current earnings and profits of the company making the distribution. For example, except as otherwise provided in section 815(f) and subparagraph (2) of this paragraph, there is a distribution within the meaning of this paragraph in any case in which a corporation acquires the stock of a shareholder in exchange for property in a redemption treated as a distribution in exchange for stock under section 302(a) or treated as a distribution of property under section 302(d). For special rules relating to distributions to shareholders in acquisition of stock pursuant to a plan of mutualization, see section 815(e) and paragraph (e) of § 1.815-6.

(2) The term *distribution*, as used in section 815(a) and paragraph (b) of this section, does not (except for purposes of section 815(a)(3) and (e)(2)(B)) include any distribution in redemption of stock issued prior to January 1, 1958, where such stock was at all times on and after the date of its issuance and on and before the date of its redemption limited as to the amount of dividends payable and was callable, at the option of the issuer, at a price not in excess of 105 percent of the sum of its issue price plus the amount of contribution to surplus (if any) made by the original purchaser at the time of his purchase.

[T.D. 6535, 26 FR 542, Jan. 20, 1961, as amended by T.D. 7189, 37 FR 12793, June 29, 1972]

**§ 1.815-3 Shareholders surplus account.**

(a) *In general.* Every stock life insurance company subject to the tax imposed by section 802 shall establish and maintain a shareholders surplus account. This account shall be estab-

lished as of January 1, 1958, and the beginning or opening balance of the shareholders surplus account on that date shall be zero.

(b) *Additions to shareholders surplus account.* (1) The amount added to the shareholders surplus account for any taxable year beginning after December 31, 1957, shall be the amount by which the sum of:

(i) The life insurance company taxable income (computed without regard to section 802(b)(3)),

(ii) In the case of a taxable year beginning after December 31, 1958, the amount (if any) by which the net long-term capital gain exceeds the net short-term capital loss, reduced (in the case of a taxable year beginning after December 31, 1961) by the amount referred to in subdivision (i) of this subparagraph,

(iii) The deduction for partially tax-exempt interest provided by section 242 (as modified by section 804(a)(3)), the deductions for dividends received provided by sections 243, 244, and 245 (as modified by section 809(d)(8)(B)), and the amount of interest excluded from gross income under section 103, and

(iv) The small business deduction provided by section 809(d)(10). Exceeds the taxes imposed for the taxable year by section 802(a), computed without regard to section 802(b)(3).

(c) *Subtractions from shareholders surplus account*—(1) *In general.* There shall be subtracted from the cumulative balance in the shareholders surplus account at the end of any taxable year, computed without diminution by reason of distributions made during the taxable year, the amount which is treated as being distributed out of such account under section 815(a) and paragraph (b) of § 1.815-2.

(2) *Special rule; distributions in 1958.* There shall be subtracted from the shareholders surplus account (to the extent thereof) for any taxable year beginning in 1958 the amount of the distributions to shareholders made by the company during 1958. For example, assume S, a stock life insurance company, had additions to its shareholders surplus account (as determined under section 815(b)(2) and paragraph (b) of this section) for the taxable year 1958 of \$10,000, and actually distributed as

## Internal Revenue Service, Treasury

## § 1.815-4

dividends to its shareholders \$8,000 during the year 1958. The balance in S's shareholders surplus account as of January 1, 1959, shall be \$2,000. If S had distributed \$12,000 as dividends in 1958, the balance in its shareholders surplus account as of January 1, 1959, would be zero and the other accounts referred to in section 815(a)(3) and paragraph (b)(1)(iii) of § 1.815-2 would be reduced by \$2,000.

(d) *Illustration of principles.* The application of section 815(b) and this section may be illustrated by the following example:

*Example.* The books of S, a stock life insurance company, reflect the following items for the taxable year 1960.

Balance in shareholders surplus account as of 1-1-60 .....	\$5,000
Life insurance company taxable income computed without regard to sec. 802(b)(3) .....	4,000
Excess of net long-term capital gain over net short-term capital loss .....	1,700
Tax-exempt interest included in gross investment income under sec. 804(b) .....	100
Small business deduction (determined under sec. 809(d)(10)) .....	200
Tax liability under sec. 802(a) (1) and (2) computed without regard to sec. 802(b)(3) .....	1,625
Amount distributed to shareholders .....	9,000

For purposes of determining the amount to be subtracted from its shareholders surplus account for the taxable year, S would first make up the following schedule in order to determine the cumulative balance in the shareholders surplus account at the end of the taxable year, computed without diminution by reason of distributions made during the taxable year:

(1) Balance in shareholders surplus account as of 1-1-60 .....	\$5,000
(2) Additions to account:	
(a) Life insurance company taxable income computed without regard to sec. 802(b)(3) .....	\$4,000
(b) Excess of net long-term capital gain over net short-term capital loss .....	1,700
(c) Tax-exempt interest included in gross investment income under sec. 804(b) ...	100
(d) Small business deduction (determined under sec. 809(d)(10)) .....	200
Total .....	6,000
Less:	
Tax liability under sec. 802(a) (1) and (2) computed without regard to sec. 802(b)(3) .....	1,625
	4,375
(3) Cumulative balance in shareholders surplus account as of 12-31-60 (item (1) plus item (2)) .....	9,375

Since the amount distributed to shareholders during the taxable year, \$9,000, does not exceed the cumulative balance in the shareholders surplus account at the end of the taxable year, computed without diminution by reason of distributions made during the taxable year, \$9,375, under the provisions of section 815(a), the entire distribution shall be treated as being made out of the shareholders surplus account. Thus, \$9,000 shall be subtracted from the shareholders surplus account (leaving a balance of \$375 in such account at the end of the taxable year) and S shall incur no additional tax liability by reason of the distribution to its shareholders during the taxable year 1960.

[T.D. 6535, 26 FR 542, Jan. 20, 1961, as amended by T.D. 7189, 37 FR 12793, June 29, 1972]

#### § 1.815-4 Policyholders surplus account.

(a) *In general.* Every stock life insurance company subject to the tax imposed by section 802 shall establish and maintain a policyholders surplus account. This account shall be established as of January 1, 1959, and the beginning or opening balance of the policyholders surplus account on that date shall be zero.

(b) *Additions to policyholders surplus account.* The amount added to the policyholders surplus account for any taxable year beginning after December 31, 1958, shall be the sum of:

(1) An amount equal to 50 percent of the amount by which the gain from operations for the taxable year exceeds the taxable investment income,

(2) The deduction allowed or allowable under section 809(d)(5) (as limited by section 809(f)) for certain non-participating contracts, and

(3) The deduction allowed or allowable under section 809(d)(6) (as limited by section 809(f)) for taxable years beginning before January 1, 1963, for group life and group accident and health insurance contracts, and for taxable years beginning after December 31, 1962, for accident and health insurance and group life insurance contracts.

(c) *Subtractions from policyholders surplus account—(1) In general.* There shall be subtracted from the cumulative balance in the policyholders surplus account at the end of any taxable year, computed without diminution by reason of distributions made during the

taxable year, an amount equal to the sum of:

(i) The amount which (without regard to subdivision (ii) of this subparagraph) is treated under section 815(a) as distributed out of the policyholders surplus account for the taxable year, plus

(ii) The amount (determined without regard to section 802(a)(3)) by which the tax imposed for taxable years beginning before January 1, 1962, by section 802(a)(1), and for taxable years beginning after December 31, 1961, by section 802(a), is increased by reason of section 802(b)(3).

In addition, there shall be subtracted from the policyholders surplus account for the taxable year those amounts which, at the close of the taxable year, are subtracted or treated as subtracted from the policyholders surplus account under section 815(d) (1) and (4) and paragraphs (a) and (d) of § 1.815-6. For purposes of this paragraph, the subtractions from the policyholders surplus account shall be treated as made in the following order:

(a) First the amount determined under section 815(c)(3) by reason of distributions to shareholders during the taxable year which are treated as being made out of the policyholders surplus account;

(b) Next the amount elected to be subtracted from the policyholders surplus account for the taxable year under section 815(d)(1);

(c) Then the amount which is treated as a subtraction from the policyholders surplus account for the taxable year by reason of the limitation provided in section 815(d)(4); and

(d) Finally the amount taken into account upon termination as a life insurance company as provided in section 815(d)(2).

(2) *Method of computing amount subtracted from policyholders surplus account*—(i) *Where life insurance company taxable income, computed without regard to section 802(b)(3), exceeds \$25,000.* If the life insurance company taxable income for any taxable year computed under section 802(b), computed without regard to section 802(b)(3), exceeds \$25,000, the amount subtracted from the policyholders surplus account shall be determined by multiplying the

amount treated as distributed out of such account by a ratio, the numerator of which is 100 percent and the denominator of which is 100 percent minus the sum of the normal tax rate and the surtax rate for the taxable year.

(ii) *Where life insurance company taxable income does not exceed \$25,000.* If the life insurance company taxable income for any taxable year, computed under section 802(b), does not exceed \$25,000, the amount subtracted from the policyholders surplus account shall be determined by multiplying the amount treated as distributed out of such account by a ratio, the numerator of which is 100 percent and the denominator of which is 100 percent minus the normal tax rate for the taxable year.

(iii) *Where life insurance company taxable income, computed without regard to section 802(b)(3) does not exceed \$25,000, but computed with regard to section 802(b)(3) does exceed \$25,000.* If the life insurance company taxable income for any taxable year, computed without regard to section 802(b)(3) does not exceed \$25,000, but computed with regard to section 802(b)(3) does exceed \$25,000, the amount subtracted from the policyholders surplus account shall be determined in the following manner:

(a) First, determine the amount by which \$25,000 exceeds the amount determined under section 802(b) (1) and (2);

(b) Then, multiply the amount determined under (a) by a ratio, the numerator of which is 100 percent minus the normal tax rate and the denominator of which is 100 percent;

(c) Next, determine the amount by which the amount treated as distributed out of the policyholders surplus account exceeds the amount determined under (b) and multiply such excess by a ratio, the numerator of which is 100 percent and the denominator of which is 100 percent minus the sum of the normal tax rate and the surtax rate; and

(d) Finally, add the amounts determined under (a) and (c).

(3) *Illustration of principles.* The application of section 815(c)(3) and subparagraph (2) of this paragraph may be illustrated by the following examples:

## Internal Revenue Service, Treasury

## § 1.815-4

*Example 1.* The life insurance company taxable income of S, a stock life insurance company, computed without regard to section 802(b)(3), exceeds \$25,000 for the taxable year 1959. Assume that of the amount distributed by S to its shareholders during the taxable year, \$9,600 (as determined under section 815(a) and without regard to section 815(c)(3)(B)) is treated as distributed out of the policyholders surplus account. Since the sum of the normal tax rate (30%) and the surtax rate (22%) in effect for 1959 is 52 percent, S shall subtract \$20,000 from its policyholders surplus account for the taxable year 1959, computed as follows:

$$\$9,600 \times 100 / (100 - 52) = \$9,600 \times 100 / 48 = \$20,000$$

Of this amount, \$9,600 is due to the application of section 815(c)(3)(A) and \$10,400 to the application of section 815(c)(3)(B).

*Example 2.* Assume that for the taxable year 1960, S, a stock life insurance company, has taxable investment income of \$1,000 and a gain from operations of \$2,000. Assume further that of the amount distributed by S to its shareholders during the taxable year, \$3,500 (as determined under section 815(a) and without regard to section 815(c)(3)(B)) is treated as distributed out of the policyholders surplus account. Since S's life insurance company taxable income does not exceed \$25,000 for the taxable year and the normal tax rate in effect for 1960 is 30 percent, S shall subtract \$5,000 from its policyholders surplus account for the taxable year 1960, computed as follows:

$$\$3,500 \times 100 / (100 - 30) = \$3,500 \times 100 / 70 = \$5,000$$

Of this amount, \$3,500 is due to the application of section 815(c)(3)(A), and \$1,500 to the application of section 815(c)(3)(B).

*Example 3.* For the taxable year 1960, the life insurance company taxable income of S, a stock life insurance company, computed without regard to section 802(b)(3), is \$10,000. Assume that of the amount distributed by S to its shareholders during the taxable year, \$12,000 (as determined under section 815(a) and without regard to section 815(c)(3)(B)) is treated as distributed out of the policyholders surplus account. Since the life insurance company taxable income of S, computed with regard to section 802(b)(3), exceeds \$25,000, in order to determine the amount to be subtracted from its policyholders surplus account, S would make up the following schedule:

(1) \$25,000 minus life insurance company taxable income, computed without regard to sec. 802(b)(3) (\$25,000 minus \$10,000) .....	\$15,000
(2) Item (1) multiplied by 100 percent minus the normal tax rate as in effect for 1960, over 100 percent (\$15,000 × (100 - 30) ÷ 100) .....	10,500

(3) Amount by which the amount treated as distributed out of policyholders surplus account (\$12,000) exceeds item (2) (\$10,500), multiplied by 100 percent over 100 percent minus the sum of the normal tax rate and the surtax rate as in effect for 1960 (\$1,500 × 100 ÷ (100 - 52)) .....	3,125
(4) Item (1) plus item (3) (\$15,000 plus \$3,125) ...	18,125

For the taxable year 1960, S shall subtract \$18,125 from its policyholders surplus account. Of this amount, \$10,500 represents the distribution from the policyholders surplus account which is taxed at a 30 percent tax rate and \$1,500 the distribution from the policyholders surplus account which is taxed at a 52 percent tax rate. Thus, of the amount subtracted from the policyholders surplus account for the taxable year 1960, \$12,000 is due to the application of section 815(c)(3)(A), and \$6,125 to the application of section 815(c)(3)(B).

(d) *Illustration of principles.* The application of section 815(c) and this section may be illustrated by the following example:

*Example.* The books of S, a stock life insurance company, reflect the following items for the taxable year 1960:

Taxable investment income .....	\$25,000
Gain from operations .....	30,000
Tax base (sec. 802(b)(1) and (2)) .....	27,500
Deduction for certain nonparticipating policies provided by sec. 809(d)(5) (as limited by sec. 809(f)) .....	600
Deduction for group policies provided by sec. 809(d)(6) (as limited by sec. 809(f)) .....	400
Amount distributed to shareholders .....	60,000
Cumulative balance in shareholders surplus account as of 12-31-60 .....	36,000
Balance in policyholders surplus account as of 1-1-60 .....	48,000

For purposes of determining the amount to be subtracted from its policyholders surplus account for the taxable year, S would first make up the following schedule in order to determine the cumulative balance in the policyholders surplus account at the end of the taxable year, computed without diminution by reason of distributions made during the taxable year:

(1) Balance in policyholders surplus account as of 1-1-60 .....	\$48,000
(2) Additions to account:	
(a) 50 percent of the amount by which the gain from operations (\$30,000) exceeds the taxable investment income (\$25,000) (1/2 × \$5,000) .....	\$2,500
(b) The deduction for certain nonparticipating contracts provided by sec. 809(d)(5) (as limited by sec. 809(f)) .....	600
(c) The deduction for group contracts provided by sec. 809(d)(6) (as limited by sec. 809(f)) .....	400

## § 1.815-5

	3,500
(3) Cumulative balance in policyholders account as of 12-31-60 (item (1) plus item (2)) .....	51,500

Under the provisions of section 815(a), since the amount distributed to shareholders during the taxable year, \$60,000, exceeds the cumulative balance in the shareholders surplus at the end of the taxable year, computed without diminution by reason of distributions during the taxable year, \$36,000, the shareholders surplus account shall first be reduced to zero. The remaining \$24,000 (\$60,000 minus \$36,000) of the distribution shall then be treated as made out of the policyholders surplus account. Thus, since the tax base under section 802(b)(1) and (2) is in excess of \$25,000, the total amount to be subtracted from the policyholders surplus account at the end of the taxable year would be \$50,000 (\$24,000×100÷(100-52)). Of this amount \$26,000 (\$50,000 minus \$24,000) represents the tax on the portion of the distribution to shareholders which is treated as being out of the policyholders surplus account.

(e) *Special rule for 1959 and 1960.* For a special transitional rule applicable to any increase in tax liability under section 802(b)(3) for the taxable years 1959 and 1960 which is due solely to the operation of section 815(c)(3) and this section, see section 802(a)(3) and § 1.802-5.

[T.D. 6535, 26 FR 543, Jan. 20, 1961, as amended by T.D. 6886, 31 FR 8689, June 23, 1966]

## § 1.815-5 Other accounts defined.

The term *other accounts*, as used in section 815(a)(3) and paragraph (b) of § 1.815-2, means all amounts which are not specifically included in the shareholders surplus account under section 815(b) and paragraph (b) of § 1.815-3, or in the policyholders surplus account under section 815(c) and paragraph (b) of § 1.815-4. Thus, for example, other accounts includes amounts representing the increase in tax due to the operation of section 802(b)(3) which is not taken into account for the taxable years 1959 and 1960 because of the special transitional rule provided in section 802(a)(3) and § 1.802-5, earnings and profits accumulated prior to January 1, 1958, paid-in surplus, capital, etc. To the extent that a distribution (or any portion thereof) is treated as being made out of other accounts, no tax is imposed on the company with respect to such distribution.

[T.D. 6535, 26 FR 544, Jan. 20, 1961]

## 26 CFR Ch. I (4-1-14 Edition)

## § 1.815-6 Special rules.

(a) *Election to transfer amounts from policyholders surplus account to shareholders surplus account—(1) In general.* Section 815(d)(1) permits a life insurance company to elect, after the close of any taxable year for which it is a life insurance company, to subtract any amount (or any portion thereof) in its policyholders surplus account as of the close of the taxable year. The effect of such election is to subject the company to tax on the amounts elected to be subtracted for the taxable year for which the election applies. The amount so subtracted, less the amount of tax imposed with respect to such amount by reason of section 802(b)(3), shall be added to the shareholders surplus account as of the beginning of the taxable year following the taxable year for which the election applies and no further tax shall be imposed upon the company if the amount elected to be transferred to the shareholders surplus account is subsequently distributed to shareholders.

(2) *Manner and effect of election.* (i) The election provided by section 815(d)(1) and this section shall be made in a statement attached to the life insurance company's income tax return for any taxable year for which the company desires the election to apply. The statement shall include the name and address of the taxpayer, shall be signed by the taxpayer (or his duly authorized representative), and shall be filed not later than the date prescribed by law (including extensions thereof) for filing the return for such taxable year. In addition, the statement shall indicate that the company has made the election provided under section 815(d)(1) for the taxable year and the amount elected to be subtracted from the policyholders surplus account.

(ii) An election made under section 815(d)(1)(B) and subdivision (i) of this subparagraph shall be effective only with respect to the taxable year for which the election is made. Thus, the company must make a new election for each taxable year for which it desires the election to apply. Once such an election has been made for any taxable year it may not be revoked.

(3) The application of subparagraph (1) of this paragraph may be illustrated by the following example:

*Example.* For the taxable year 1960, the life insurance company taxable income of S, a stock life insurance company, computed without regard to section 802(b)(3), exceeds \$25,000. Assume that S elects to subtract \$20,000 from its policyholders surplus account under section 815(d)(1) for the taxable year. Since S is subject to a 52 percent tax rate, the tax on the amount elected to be subtracted from the policyholders surplus account (as of the close of the taxable year 1960) is \$10,400 (\$20,000×52 percent). Thus, the amount to be added to the shareholders surplus account as of January 1, 1961, is \$9,600 (the amount subtracted from the policyholders surplus account by virtue of the section 815(d)(1) election, less the tax imposed upon such amount by reason of section 802(b)(3), or \$20,000 minus \$10,400).

(b) *Termination as life insurance company—(1) Effect of termination.* Except as provided in section 381(c)(22) (relating to carryovers in certain corporate readjustments), section 815(d)(2)(A) provides that if for any taxable year the taxpayer is not an insurance company (as defined in paragraph (a) of § 1.801-3), or if for any two successive taxable years the taxpayer is not a life insurance company (as defined in section 801(a) and paragraph (b) of § 1.801-3), the amount taken into account under section 802(b)(3) for the last preceding year for which the company was a life insurance company shall be increased (after the application of section 815(d)(2)(B)) by the entire balance in the policyholders surplus account at the close of such last preceding taxable year.

(2) *Effect of certain distributions.* If for any taxable year the taxpayer is an insurance company (as defined in paragraph (a) of § 1.801-3) but is not a life insurance company (as defined in section 801(a) and paragraph (b) of § 1.801-3), section 815(d)(2)(B) provides that any distribution to shareholders during such taxable year shall be treated as having been made on the last day of the last preceding taxable year for which the company was a life insurance company.

(3) *Examples.* The application of section 815(d)(2) and this paragraph may be illustrated by the following examples:

*Example 1.* At the end of the taxable year 1959, the balance in the policyholders surplus account of S, a life insurance company within the meaning of section 801(a) and paragraph (b) of § 1.801-3, is \$12,000. If S fails to qualify as an insurance company (as defined in paragraph (a) of § 1.801-3) for the taxable year 1960, and section 381(c)(22) does not apply, under the provisions of section 815(d)(2)(A), the entire balance of \$12,000 in the policyholders surplus account at the end of 1959, the last year S was a life insurance company, shall be taken into account under section 802(b)(3) for purposes of determining S's tax liability for the taxable year 1959.

*Example 2.* Assume the facts are the same as in example 1, except that for the taxable years 1960 and 1961, S qualifies as an insurance company (as defined in paragraph (a) of § 1.801-3) but does not qualify as a life insurance company within the meaning of section 801(a) and paragraph (b) of § 1.801-3. Assume further that as a result of a distribution by S to its shareholders in 1960, \$4,800 (as determined under section 815(a) and without regard to section 815(c)(3)(B)) is treated as distributed out of the policyholders surplus account. Under the provisions of section 815(d)(2)(B), if section 381(c)(22) does not apply, any distribution to shareholders during the taxable years 1960 and 1961 shall be treated as having been made on December 31, 1959 (the last day of the last preceding taxable year for which S was a life insurance company). Thus, assuming S is subject to a 52 percent tax rate on additions to life insurance company taxable income, \$10,000 (\$4,800 plus \$5,200, the tax on the portion of the distribution treated as made out of the policyholders surplus account) shall be treated as being subtracted from the policyholders surplus account at the end of 1959 and shall be taken into account under section 802(b)(3) for purposes of determining S's tax liability for the taxable year 1959. Under the provisions of section 815(d)(2)(A), the entire balance of \$2,000 (\$12,000 minus \$10,000) in the policyholders surplus account at the end of 1959 (after the application of section 815(d)(2)(B)), shall also be taken into account under section 802(b)(3) for purposes of determining S's tax liability for the taxable year 1959.

(c) *Treatment of certain indebtedness.* Section 815(d)(3) provides that if a taxpayer makes any payment in discharge of its indebtedness and such indebtedness is attributable to a distribution by the taxpayer to its shareholders after February 9, 1959, the amount of such payment shall be treated as a distribution in cash to shareholders both for purposes of section 802(b)(3) and section 815. However, this paragraph shall only

apply to the extent that the distribution of such indebtedness to shareholders was treated as being out of accounts other than the shareholders and policyholders surplus accounts at the time of distribution.

(d) *Limitation on amount in policyholders surplus account*—(1) *In general.* Section 815(d)(4) provides a limitation on the amount that any life insurance company may accumulate in its policyholders surplus account. If the policyholders surplus account at the end of any taxable year (computed without regard to this paragraph) exceeds whichever of the following is the greatest:

(i) 15 percent of life insurance reserves (as defined in section 801(b) and paragraph (a) of § 1.801-4) at the end of the taxable year.

(ii) 25 percent of the amount by which the life insurance reserves at the end of the taxable year exceed the life insurance reserves at the end of 1958, or

(iii) 50 percent of the net amount of the premiums and other consideration taken into account for the taxable year under section 809(c)(1),

then such excess shall be treated as a subtraction from the policyholders surplus account as of the end of such taxable year. The amount so treated as subtracted, less the amount of tax imposed with respect to such amount by reason of section 802(b)(3), shall be added to the shareholders surplus account at the beginning of the succeeding taxable year.

(2) *Example.* The application of the limitation contained in subparagraph (1) of this paragraph may be illustrated by the following example:

*Example.* The books of S, a stock life insurance company, reflect the following items for the taxable year 1960:

Balance in policyholders surplus account, computed without regard to sec. 815(d)(4), as of 12-31-60 .....	\$175
Life insurance reserves (as defined in sec. 801(b)) as of 12-31-60 .....	4,500
Life insurance reserves (as defined in sec. 801(b)) as of 12-31-58 .....	3,900
Premiums and other consideration taken into account for the taxable year under sec. 809(c)(1) .....	310

In order to determine the limitations on the amount that it may accumulate in its policyholders surplus account at the end of the taxable year under section 815(d)(4), S would make up the following schedule:

(1) 15 percent of life insurance reserves at the end of the taxable year (15%×\$4,500) .....	\$675
(2) 25 percent of amount by which life insurance reserves at the end of the taxable year (\$4,500) exceed life insurance reserves as of 12-31-58 (\$3,900) (25%×\$600) .....	150
(3) 50 percent of premiums and other consideration taken into account under sec. 809(c)(1) for the taxable year (50%×\$310) .....	155
(4) Limitation on policyholders surplus account (the greatest of items (1), (2), or (3)) .....	675

Since the balance in the policyholders surplus account at the end of the taxable year 1960, \$175, does not exceed the limitation provided by section 815(d)(4), \$675, S is not required to make any further adjustment to its policyholders surplus account at the end of the taxable year.

(e) *Special rule for certain mutualizations*—(1) *In general.* Section 815(e) provides a rule for determining priorities which shall operate in place of section 815(a) and paragraph (b) of § 1.815-2 where a life insurance company makes any distribution to its shareholders after December 31, 1958, in acquisition of stock pursuant to a plan of mutualization. Section 815(e)(1) provides that such a distribution shall first be treated as being made out of paid-in capital and paid-in surplus, and, to the extent thereof, no tax shall be imposed on the company with respect to such distribution. Thereafter, distributions made pursuant to such plan of mutualization shall be treated as made in two allocable parts. One part shall be treated as being made out of other accounts (as defined in § 1.815-5) and the company shall incur no tax with respect to such portion of the distribution. The other part shall be treated as a distribution to which section 815(a) and paragraph (b) of § 1.815-2 applies. Thus, such portion of the distribution shall be treated as first being made out of the shareholders surplus account (as defined in section 815(b) and § 1.815-3), to the extent thereof, and then out of the policyholders surplus account (as defined in section 815(c) and § 1.815-4), to the extent thereof. See paragraph (a) of § 1.815-2. For purposes of this paragraph, a distribution shall be considered as being made pursuant to a plan of mutualization only if the requirements of applicable State law for the adoption of such plan (as, for

## Internal Revenue Service, Treasury

## § 1.815-6

example, approval by the requisite majority of the board of directors, shareholders, and policyholders) have been fulfilled.

(2) *Allocation ratio.* Section 815(e)(2)(A) provides an allocation ratio which when applied to the amount distributed under a plan of mutualization in excess of the balance in the paid-in capital and paid-in surplus accounts determines the portion of such excess to be treated as distributed out of the shareholders surplus account, policyholders surplus account, or other accounts. The numerator of this ratio is the excess of the assets of the company (as defined in section 805(b)(4) and paragraph (a)(4) of §1.805-5) over the total liabilities (including reserves), both determined as of December 31, 1958, and adjusted in the manner provided in subparagraph (3) of this paragraph. The denominator of this ratio is the amount included in the numerator plus the amounts in the shareholders surplus account and policyholders surplus account, all determined as of the beginning of the year of the distribution.

(3) *Adjustment for certain distributions.* Section 815(e)(2)(B) provides that if between 1958 and the year of distribution the taxpayer has been treated as having made a distribution (under a plan of mutualization or otherwise) which is treated as a return of paid-in capital and paid-in surplus or as out of other accounts (as defined in §1.815-5), the aggregate amount of any such prior distributions must be subtracted from the numerator and denominator in all cases where the allocation ratio provided by subparagraph (2) of this paragraph applies.

(f) *Recomputation required as a result of a subsequent loss from operations under section 812—(1) In general.* Any amounts added to or subtracted from the special surplus accounts referred to in section 815(a) and paragraph (b) of §1.815-2 for any taxable year shall be adjusted to the extent necessary to properly reflect a subsequent loss from operations which under section 812 is carried back to the taxable year for which such additions or subtractions were made.

(2) *Example.* The application of subparagraph (1) of this paragraph may be illustrated by the following example:

*Example.* Assume that for the taxable years 1959 through 1961, the books of S, a stock life insurance company subject to a 30 percent tax rate for all taxable years involved, reflect the following items:

	1959	1960	1961
Taxable investment income .....	\$40.00	\$40.00	\$40.00
Gain from operations .....	60.00	60.00	60.00
Tax base (sec. 802(b)(1) and (2)) .....	50.00	50.00	50.00
Tax (sec. 802(b)(1) and (2) base) .....	15.00	15.00	15.00
Shareholders surplus account—			
At beginning of year ...	0	35.00	37.00
Added at beginning of year by reason of election under sec. 815(d)(1) .....	0	7.00	0
Added for year (without regard to election under sec. 815(d)(1)) .....	35.00	35.00	35.00
Subtracted (distributions) .....	0	40.00	40.00
Policyholders surplus account—			
At beginning of year ...	0	0	10.00
Added for year .....	10.00	10.00	10.00
Subtracted (distributions) .....	0	0	0
Subtracted (by reason of election under sec. 815(d)(1)) .....	10.00	0	0
Tax base (sec. 802(b)(3)) .....	10.00	0	0
Tax (sec. 802(b)(3) base) .....	3.00	0	0

Assume further that S has a loss from operations for the taxable year 1962 of \$25. Under the provisions of section 812, the \$25 loss from operations would be carried back to the taxable year 1959 and would reduce the 1959 tax base under section 802(b)(1) and (2) to \$35 (\$60 minus \$25). After adjustments reflecting the 1962 loss from operations, the results for the taxable years 1959 through the beginning of 1962 would be as follows:

	1959	1960	1961	1962
Taxable investment income .....	\$40.00	\$40.00	\$40.00	.....
Gain from operations .....	35.00	60.00	60.00	.....
Tax base (sec. 802(b)(1) and (2)) ...	35.00	50.00	50.00	.....
Tax (sec. 802(b)(1) and (2) base) .....	10.50	15.00	15.00	.....
Shareholders surplus account—				
At beginning of year	0	24.50	19.50	\$14.50
Added for year (without regard to election under sec. 815(d)(1)) .....	24.50	35.00	35.00	.....

# § 1.817-1

# 26 CFR Ch. I (4-1-14 Edition)

	1959	1960	1961	1962
Added by reason of election under sec. 815(d)(1) .....	0	0	0	.....
Subtracted (distributions) .....	0	40.00	40.00	.....
Policyholders surplus account—				
At beginning of year	0	0	10.00	20.00
Added for year .....	0	10.00	10.00	.....
Subtracted (distributions) .....	0	0	0	.....
Subtracted (by reason of election under sec. 815(d)(1)) .....	0	0	0	.....
Tax base (sec. 802(b)(3)) .....	0	0	0	.....
Tax (sec. 802(b)(3) base) .....	0	0	0	.....

As a result of the loss from operations for 1962, the election under section 815(d)(1) for the taxable year 1959 has become inapplicable in its entirety since the balance in the policyholders surplus account at the end of 1959, as recomputed, is zero. Thus, S would be entitled to a total refund of \$7.50 for the taxable year 1959. Of this amount, \$4.50 is due to the recomputation of the section 802(b)(1) and (2) tax base and \$3 to the amount of tax paid by reason of the election under section 815(d)(1).

[T.D. 6535, 26 FR 545, Jan. 20, 1961]

## MISCELLANEOUS PROVISIONS

### § 1.817-1 Taxable years affected.

Except as otherwise provided therein, §§1.817-2 through 1.817-4 are applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112) and section 3 of the Act of October 23, 1962 (76 Stat. 1134).

[T.D. 6886, 31 FR 8689, June 23, 1966]

### § 1.817-2 Treatment of capital gains and losses.

(a) *In general.* For taxable years beginning after December 31, 1958, and before January 1, 1962, if the net long-term capital gain (as defined in section 1222(7)) of any life insurance company exceeds its net short-term capital loss (as defined in section 1222(6)), section 802(a)(2) prior to its amendment by section 3 of the Act of October 23, 1962 (76 Stat. 1134), imposes a separate tax

equal to 25 percent of such excess. For taxable years beginning after December 31, 1961, if the net long-term capital gain of any life insurance company exceeds its net short-term capital loss, section 802(a)(2) imposes an alternative tax in lieu of the tax imposed by section 802(a)(1), if and only if such alternative tax is less than the tax imposed by section 802(a)(1). Except as modified by section 817 (rules relating to certain gains and losses), the general rules of the Code relating to gains and losses, such as subchapter O (relating to gain or loss on disposition of property), subchapter P (relating to capital gains and losses), etc., shall apply with respect to life insurance companies.

(b) *Modification of section 1221 and 1231.* (1) In the case of a life insurance company, section 817(a)(1) provides that for purposes of applying section 1231(a) (relating to property used in the trade or business and involuntary conversions), the term *property used in the trade or business* shall be treated as including only:

(i) Property used in carrying on an insurance business, of a character subject to the allowance for depreciation under section 167 (even though fully depreciated), held for more than 1 year (6 months for taxable years beginning before 1977; 9 months taxable years beginning in 1977), and real property used in carrying on an insurance business, held for more than 1 year (6 months for taxable years beginning before 1977; 9 months taxable years beginning in 1977), and which is not:

(a) Property of a kind which would properly be includible in the inventory of the taxpayer if on hand at the close of the taxable year;

(b) Property held by the taxpayer primarily for sale to customers in the ordinary course of business; or

(c) A copyright, a literary, musical, or artistic composition, a letter or memorandum, or similar property held by a taxpayer described in section 1221(3). In the case of a letter, memorandum, or property similar to a letter or memorandum, this subdivision (c) applies only to sales and other dispositions occurring after July 25, 1969.

(ii) The cutting or disposal of timber, or the disposal of coal or iron ore, to the extent considered arising from a

sale or exchange by reason of the provisions of section 631 and the regulations thereunder.

(2) In the case of a life insurance company, section 817(a)(2) provides that for purposes of applying section 1221(2) (relating to the exclusion of certain property from the term capital asset), the reference to property used in trade or business shall be treated as including only property used in carrying on an insurance business.

(3) Section 1231(a), as modified by section 817(a)(1) and subparagraph (1) of this paragraph, shall apply to recognized gains and losses from the following:

(i) The sale, exchange, or involuntary conversion of the following property, if held for more than 1 year (6 months for taxable years beginning before 1977; 9 months taxable years beginning in 1977):

(a) The home office and branch office buildings (including land) owned and occupied by the life insurance company;

(b) Furniture and equipment owned by the life insurance company and used in the home office and branch office buildings occupied by the life insurance company; and

(c) Automobiles and other depreciable personal property used in connection with the operations conducted in the home office and branch office buildings occupied by the life insurance company.

(ii) The involuntary conversion of capital assets held for more than 1 year (6 months for taxable years beginning before 1977; 9 months taxable years beginning in 1977).

(iii) The cutting or disposal of timber, or the disposal of coal or iron ore, to the extent considered arising from a sale or exchange by reason of the provisions of section 631 and the regulations thereunder.

(4) Section 1221(2), as modified by section 817(a)(2) and subparagraph (2) of this paragraph, shall include only the following property;

(i) The home office and branch office buildings (including land) owned and occupied by the life insurance company;

(ii) Furniture and equipment owned by the life insurance company and used

in the home office and branch office buildings occupied by the life insurance company; and

(iii) Automobiles and other depreciable personal property used in connection with the operations conducted in the home office and branch office buildings occupied by the life insurance company.

(5) If an asset described in subparagraph (3) (i)(a), (b), or (c) or subparagraph (4) of this paragraph, or any portion thereof, is also an "investment asset" (an asset from which gross investment income, as defined in section 804(b), is derived), such asset, or portion thereof, shall not be treated as an asset used in carrying on an insurance business. Accordingly, the gains or losses from the sale or exchange (or considered as from the sale or exchange) of depreciable assets attributable to any trade or business, other than the insurance trade or business, carried on by the life insurance company, such as operating a radio station, housing development, or a farm, or renting various pieces of real estate shall be treated as gains or losses from the sale or exchange of a capital asset unless such asset is involuntarily converted (within the meaning of paragraph (e) of § 1.123-1).

(c) *Illustration of principles.* The provisions of section 817(a) and this section may be illustrated by the following examples:

*Example 1.* L, a life insurance company, has recognized gains and losses for the taxable year 1959 from the sale or involuntary conversion of the following items:

	Gains	Losses
Stocks, held for more than 6 months .....	\$100,000 .....	
Bonds, held for more than 6 months .....		\$5,000
Housing development, held for more than 6 months .....		400,000
Branch office building owned and occupied by L, held for more than 6 months .....		115,000
Furniture and equipment used in the investment department, held for more than 6 months .....	30,000 .....	
Radio station, held for more than 6 months .....	200,000 .....	
Involuntary conversion of apartment building, held for more than 6 months .....	7,000 .....	

The recognized gains and losses from the sale of the stocks, bonds, housing development,

and radio station shall be treated as gains and losses from the sale of capital assets since such items are capital assets within the meaning of section 1221 (as modified by section 817(a)(2)). Accordingly, the provisions of section 1231 shall not apply to the sale of such capital assets. However, the provisions of section 1231 (as modified by section 817(a)(1)) shall apply to the sale of the branch office building and the furniture and equipment, and the apartment building involuntarily converted. Since the aggregate of the recognized losses (\$115,000) exceeds the aggregate of the recognized gains (\$37,000), the gains and losses are treated as ordinary gains and losses.

*Example 2.* Y, a life insurance company, owns a twenty-story home office building, having an adjusted basis of \$15,000,000, ten floors of which it rents to various tenants, one floor of which is utilized by it in operating its investment department, and the remaining nine floors of which are occupied by it in carrying on its insurance business. If in 1960, Y sells the building for \$10,000,000, Y must first apportion its basis between that portion of the building (one-half) used in carrying on an insurance business, and that portion of the building (one-half) classified as an "investment asset", before it can determine the character of the loss attributable to each portion of the building. For such purpose, the one floor utilized by Y in operating its investment department is treated as used in carrying on an insurance business. Assuming that each portion of the building bears an equal (one-half) relation to the basis of the entire building, Y (without regard to section 817(b)) would have a \$2,500,000 ordinary loss on that portion used in carrying on an insurance business (assuming that Y had no gains subject to section 1231), and a \$2,500,000 capital loss on that portion of the building classified as an investment asset.

[T.D. 6558, 26 FR 2782, Apr. 4, 1961, as amended by T.D. 6841, 30 FR 9308, July 27, 1965; T.D. 6886, 31 FR 8689, June 23, 1966; T.D. 7369, 40 FR 29840, July 16, 1975; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

**§ 1.817-3 Gain on property held on December 31, 1958, and certain substituted property acquired after 1958.**

(a) *Limitation on gain recognized on property held on December 31, 1958.* (1) Section 817(b)(1) limits the amount of gain that shall be recognized on the sale or other disposition of property other than insurance and annuity contracts (and contracts supplementary thereto) and property described in section 1221(1) (relating to stock in trade or inventory-type property) if:

(i) The property was held (or treated as held within the meaning of paragraph (c)(1) of this section) by a life insurance company on December 31, 1958;

(ii) The taxpayer has been a life insurance company at all times on and after December 31, 1958, including the date of the sale or other disposition of the property; and

(iii) The fair market value of the property on December 31, 1958, exceeds the adjusted basis for determining gain as of such date.

The gain on the sale or other disposition of such property shall be limited to an amount (but not less than zero) equal to the amount by which the gain (determined without regard to section 817(b)(1)) exceeds the difference between fair market value of such property on December 31, 1958, and the adjusted basis for determining gain as of such date. Accordingly, the tax imposed under section 802(a) shall apply with respect to the amount of gain so limited. In addition, in the case of a stock life insurance company, the amount of such gain shall be taken into account under section 815(b)(2)(A)(ii) for purposes of determining the amount to be added to the shareholders surplus account (as defined in section 815(b) and § 1.815-3) for the taxable year. Furthermore, the amount of the gain (determined without regard to section 817(b)(1) and this paragraph) which is not taken into account under section 802(a) and under paragraph (f) of § 1.802-3 by reason of the application of section 817(b)(1) shall be included in other accounts (as defined in § 1.815-5) by such a company for the taxable year.

(2) Section 817(b)(1) and subparagraph (1) of this paragraph shall not apply for purposes of determining loss with respect to property held on December 31, 1958.

(b) *Illustration of principles.* The application of section 817(b)(1) and paragraph (a) of this section may be illustrated by the following examples:

*Example 1.* On December 31, 1958, J, a stock life insurance company, owned stock of Z Corporation and on such date the stock had an adjusted basis for determining gain of \$5,000 and a fair market value of \$6,000. On August 1, 1959, the company sells such stock

for \$8,000. Assuming J qualifies as a life insurance company for the taxable year 1959, and applying the provisions of section 817(b)(1) and paragraph (a) of this section, the gain recognized (assuming no adjustment to basis for the period since December 31, 1958) on the sale shall be limited to \$2,000 (the amount by which the gain realized, \$3,000, exceeds the difference, \$1,000, between the fair market value, \$6,000, and the adjusted basis, \$5,000, for determining gain on December 31, 1958). Thus, J shall take into account \$2,000 under section 815(b)(2)(A)(ii) for purposes of determining the amount to be added to its shareholders surplus account for the taxable year and shall include \$1,000 in other accounts for the taxable year.

*Example 2.* The facts are the same as in example 1, except that the selling price is \$5,800. In such case, no gain shall be recognized even though there is a realized gain of \$800 since such realized gain does not exceed the difference (\$1,000) between the fair market value (\$6,000) and the adjusted basis (\$5,000) for determining gain on December 31, 1958. Furthermore, no loss shall be realized or recognized as a result of this transaction. Thus, J shall include \$800 in other accounts for the taxable year and shall not take into account any amount under section 815(b)(2)(A)(ii).

*Example 3.* The facts are the same as in example 1, except that the adjusted basis for determining loss is \$5,000 and the selling price is \$4,500. In such case, since J has sustained a loss, section 817(b)(1) does not apply.

(c) *Certain substituted property acquired after December 31, 1958.* Section 817(b)(2) provides that if a life insurance company acquires property after December 31, 1958, in exchange for property actually held by the company on December 31, 1958, and the property acquired has a substituted basis within the meaning of section 1016(b) and § 1.1016-10, the following rules shall apply:

(1) For purposes of section 817(b)(1), such acquired property shall be deemed as having been held continuously by the taxpayer since the beginning of the holding period thereof as determined under section 1223;

(2) The fair market value and adjusted basis referred to in section 817(b)(1) shall be that of that property for which the holding period taken into account includes December 31, 1958;

(3) Section 817(b)(1) shall apply only if the property or properties, the holding periods of which are taken into account, were held only by life insurance companies after December 31, 1958, dur-

ing the holding periods so taken into account;

(4) The difference between the fair market value and adjusted basis referred to in section 817(b)(1) shall be reduced (but not below zero) by the excess of (i) the gain that would have been recognized but for section 817(b) on all prior sales or other dispositions after December 31, 1958, of properties referred to in section 817(b)(2)(C) over (ii) the gain that was recognized on such sales or other dispositions; and

(5) The basis of such acquired property shall be determined as if the gain which would have been recognized but for section 817(b) were recognized gain.

For purposes of section 817(b)(2) and this paragraph, the term *property* does not include insurance and annuity contracts (and contracts supplementary thereto) and property described in section 1221(1) (relating to stock in trade or inventory-type property). Furthermore, the provisions of section 817(b)(1) and paragraph (a)(1) of this section shall not apply for purposes of determining loss with respect to property described in section 817(b)(2) and this paragraph.

(d) *Illustration of principles.* The application of section 817(b)(2) and paragraph (c) of this section may be illustrated by the following example:

*Example.* Assume that W, a life insurance company, owns property B on December 31, 1958, at which time its adjusted basis was \$1,000 and its fair market value was \$1,800. On January 31, 1960, in a transaction to which section 1031 (relating to exchange of property held for productive use or investment) applies, W receives property H having a fair market value of \$1,700 plus \$300 in cash in exchange for property B. The gain realized on the transaction, without regard to section 817(b) is \$1,000 (assuming no adjustments to basis for the period since December 31, 1958). Under the provisions of section 817(b)(1) the gain is limited to \$200. The entire \$200 shall be recognized since such amount is less than the amount of gain (\$300) which would be recognized under section 1031. Applying the provisions of section 817(b)(2) and paragraph (c) of this section, the basis of property H shall be determined as if the entire \$300 of cash received is recognized gain. Thus, the basis of property H under section 1031 is \$1,000 (\$1,000 (the basis of property B) minus \$300 (the amount of money received) plus \$300 (the recognized gain of \$200 plus \$100 which would have been recognized but for section 817(b))). If W later sells property H for \$2,200 cash,

# § 1.817-4

## 26 CFR Ch. I (4-1-14 Edition)

and assuming no further adjustments to its basis of \$1,000, the gain realized is \$1,200, but due to the application of section 817(b)(2) the amount of gain recognized is \$500, computed as follows:

Selling price .....	\$2,200	
Less: Adjusted basis as of date of sale .....	1,000	
Gain realized .....		1,200
Fair market value as of 12-31-58 .....	\$1,800	
Adjusted basis as of 12-31-58 .....	1,000	
Excess of fair market value over adjusted basis .....	800	
Less: Excess of gain which would have been recognized on all prior dispositions but for sec. 817(b) over gain recognized on all prior dispositions (\$300 minus \$200) .....	100	
Gain recognized .....		500

[T.D. 6558, 26 FR 2783, Apr. 4, 1961, as amended by T.D. 6886, 31 FR 8689, June 23, 1966]

### § 1.817-4 Special rules.

(a) *Limitation on capital loss carryovers.* Section 817(c) provides that a net capital loss (as defined in section 1222(10)) for any taxable year beginning before January 1, 1959, shall not be taken into account. For any taxable year beginning after December 31, 1958, the provisions of part II, subchapter P, chapter 1 of the Code (relating to the treatment of capital losses) shall be applicable to life insurance companies for purposes of determining the tax imposed by section 802(a) and § 1.802-3 (relating to the imposition of tax in case of capital gains).

(b) *Gain on transactions occurring prior to January 1, 1959.* For purposes of part I, subchapter L, chapter 1 of the Code, section 817(d) provides that:

(1) There shall be excluded from tax any gain from the sale or exchange of a capital asset, and any gain considered as gain from sale or exchange of a capital asset, which results from sales or other dispositions of property prior to January 1, 1959; and

(2) Any gain after December 31, 1958, resulting from the sale or other disposition of property prior to January 1, 1959, which, but for this subparagraph would be taken into account under section 1231, shall not be taken into account under section 1231.

For example, if a life insurance company makes an installment sale of a capital asset prior to January 1, 1959,

and payments are received after such date, any capital gain attributable to such sale shall not be taken into account for purposes of section 802(a). Furthermore, any gain referred to in subparagraphs (1) and (2) and the preceding sentence shall not be taken into account in determining the excess of the net short-term capital gain over the net long-term capital loss (and for taxable years beginning after December 31, 1961, the excess of the net long-term capital gain over the net short-term capital loss) for purposes of computing taxable investment income under section 804(a)(2) or gain or loss from operations under section 809(b).

(c) *Certain reinsurance transactions in 1958.* For purposes of part I, section 817(e) provides that where a life insurance company reinsures (or sells) all of its insurance contracts of a particular type, such as an entire industrial department, in either a single transaction, or in a series of related transactions, all of which occurred during 1958, and the reinsuring (or purchasing) company or companies assume all liabilities under such contracts, such reinsurance (or sale) shall be treated as the sale of a capital asset. However, such transaction shall be subject to the provisions of section 806(a) and § 1.806-3 (relating to adjustments for certain changes in reserves and assets).

(d) *Certain other reinsurance transactions.* (1) For any taxable year beginning after December 31, 1958, the reinsurance of all or a part of the insurance contracts of a particular type by a life insurance company, in either a single transaction, or in a series of related transactions, occurring in any such taxable year, whereby the reinsuring company or companies assume all liabilities under such contracts, shall not be treated as the sale or exchange of a capital asset but shall be subject to the provisions of section 806(a) and 809 and the regulations thereunder. However, if in connection with a transaction described in the preceding sentence the reinsured or reinsurer transfers an asset which is a capital asset within the meaning of section 1221 (as modified by section 817(a)(2)), such transfer shall be treated as the sale or exchange of a capital asset by the transferor.

(2)(i) The consideration paid by the reinsured to the reinsurer in connection with a transaction described in subparagraph (1) of this paragraph shall be treated as an item of deduction under section 809(d)(7). However any amount received by the reinsured from the reinsurer shall be applied against and reduce (but not below zero) the amount of such consideration, and to the extent that it exceeds such consideration, shall be treated as an item of gross amount under section 809(c)(3).

(ii) In connection with an assumption reinsurance (as defined in paragraph (a)(7)(ii) of § 1.809-5) transaction, a reinsurer shall in any taxable year beginning after December 31, 1957:

(A) Treat the consideration received from the reinsured in any such taxable year as an item of gross amount under section 809(c)(1), and

(B) Treat any amount paid to the reinsured for the purchase of such contracts, to the extent such amount meets the requirements of section 162, as a deferred expense that may be amortized over the reasonably estimated life (as defined in paragraph (d)(2)(iv) of this section) of the contracts reinsured and treat the portion of the expense so amortized in each taxable year as a deduction under section 809(d)(12) irrespective of the taxable year in which such amount was paid to the reinsured.

(iii) For purposes of paragraph (d)(2)(ii) of this section where the reinsured transfers to the reinsurer in connection with the assumption reinsurance transaction a net amount which is less than the increase in the reinsurer's reserves resulting from the transaction, the reinsurer shall be treated as:

(A) Having received from the reinsured consideration in an amount equal to the net amount of the increase in the reinsurer's reserves resulting from the transaction, and

(B) Having paid the reinsured an amount for the purchase of the contracts equal to the excess of the amount of such increase in the reinsurer's reserves over the net amount received from the reinsured.

(iv) For purposes of this subparagraph, the term *reasonably estimated life* means the period during which the contract reinsured remains in force. Such

period shall be based on the facts in each case (such as age, health, and sex of the insured, type of contract reinsured, etc.) and the assuming company's experience (such as mortality, lapse rate, etc.) with similar risks.

(3) The provisions of this paragraph may be illustrated by the following examples:

*Example 1.* On June 30, 1959, X, a life insurance company, reinsured a portion of its insurance contracts with Y, a life insurance company, under an agreement whereby Y agreed to assume and to become solely liable under the contracts reinsured. The reserves on the contracts reinsured by X were \$100,000. Under the reinsurance agreement X agreed to pay Y \$100,000 for assuming such contracts and Y agreed to pay X \$17,000 for the right to receive future premium payments under this block of contracts. Rather than exchange payments of money, X agreed to pay Y a net amount of \$83,000 in cash. Assuming that the reasonably estimated life of the contracts reinsured is 17 years, that there are no other insurance transactions by X or Y during the taxable year, and assuming that X and Y compute the reserves on the contracts reinsured on the same basis, X has income of \$100,000 under section 809(c)(2) as a result of the net decrease in its reserves. X has a net deduction of \$83,000 (\$100,000 - \$17,000) under section 809(d)(7). For the taxable year 1959, Y has income of \$100,000 under section 809(c)(1) as a result of the consideration received from X and a deduction of \$100,000 under section 809(d)(2) for the net increase in reserves and \$1,000 (\$17,000 divided by 17, the reasonably estimated life of the contracts reinsured), under section 809(d)(12). The remaining \$16,000 shall be amortized over the next 16 succeeding taxable years (16 × \$1,000 = \$16,000) under section 809(d)(12) at the rate of \$1,000 for each such taxable year.

*Example 2.* The facts are the same as in example 1, except X agreed to pay Y a consideration of \$100,000 in cash for assuming these contracts and Y paid X a bonus of \$17,000 in cash and that this bonus meets the requirements of section 162. Assuming that the reasonably estimated life of the contracts reinsured is 17 years, X has income of \$100,000 under section 809(c)(2) as a result of this net decrease in its reserves and a deduction of \$83,000 under section 809(d)(7) for the amount of the consideration (\$100,000) paid to Y for assuming these contracts, reduced by the bonus (\$17,000) received from Y. For the taxable year 1959, Y has income of \$100,000 under section 809(c)(1) as a result of the consideration received from X and deductions of \$100,000 under section 809(d)(2) for the net increase in reserves and \$1,000 (the bonus of

## § 1.817-5

\$17,000 divided by 17, the reasonably estimated life of the contracts reinsured), under section 809(d)(12). The remaining amount of the bonus (\$16,000) shall be amortized over the next 16 succeeding taxable years ( $16 \times \$1,000 = \$16,000$ ) under section 809(d)(12) at the rate of \$1,000 for each such taxable year.

**Example 3.** The facts are the same as in Example 1, except that the reinsurance agreement does not specifically provide that X agreed to pay Y \$100,000 for assuming the contracts reinsured and Y agreed to pay X \$17,000 for the right to receive future premium payments under such contracts. Instead, X agreed to pay Y a net amount of \$83,000 in cash for assuming such contracts. Nevertheless, Y is treated as having received from X consideration equal to \$100,000, the amount of the increase in Y's reserves, and as having paid \$17,000 (\$100,000 less \$83,000) for the purchase of such contracts. Therefore, for the taxable year 1959, Y has income of \$100,000 under section 809(c)(1). Y also has a deduction of \$100,000 under section 809(d)(2) for the net increase in its reserves and an amortization deduction under section 809(d)(12) of \$1,000 (\$17,000 divided by 17, the reasonably estimated life of the contracts reinsured). The remaining \$16,000 shall be amortized by Y over the next 16 succeeding years at the rate of \$1,000 for each such year. For 1959, X has income of \$100,000 under section 809(c)(2) as a result of the net decrease in its reserves and a deduction of \$83,000 under section 809(d)(7) for the net amount of consideration paid to Y for assuming the contracts reinsured.

**Example 4.** The facts are the same as in example 1, except that X agreed to pay Y a consideration of \$130,000 in cash for assuming such contracts. Based upon these facts, X has income of \$100,000 under section 809(c)(2) as a result of this net decrease in its reserves and a deduction of \$130,000 under section 809(d)(7) for the amount of the consideration paid to Y for assuming these contracts. Y has income of \$130,000 under section 809(c)(1) as a result of the consideration received from X and a deduction of \$100,000 under section 809(d)(2) for the net increase in its reserves.

**Example 5.** On August 1, 1960, R, a life insurance company, reinsured all of its insurance policies with S, a life insurance company, under an agreement whereby S agreed to assume and become solely liable under the contracts reinsured. The reserves on the contracts reinsured by R were \$3,000,000. Under the reinsurance agreement, R agreed to pay S a consideration of \$3,000,000 in stocks and bonds for assuming such contracts. Assuming no other insurance transactions by R or S during the taxable year, that R and S compute the reserves on the contracts reinsured on the same basis, and that R has a recognized gain (after the application of the limitation of section 817(b)(1)) of \$20,000 due to appreciation in value of the assets trans-

## 26 CFR Ch. I (4-1-14 Edition)

ferred, the results to each company are as follows:

Company R (reinsured)	
Net decrease in reserves (sec. 809(c)(2)) .....	\$3,000,000
Capital gain (as limited by sec. 817(b)(1)) to be taxed separately under sec. 802(a)(2) .....	20,000
Consideration paid by R to S in respect of S's assuming liabilities under contracts issued by R (sec. 809(d)(7)) .....	\$3,000,000
INCOME	
Company S (reinsurer)	
Consideration received by S in respect of assuming liabilities under contracts issued by R (sec. 809(c)(1)) .....	\$3,000,000
DEDUCTIONS	
Net increase in reserves (sec. 809(d)(2)) .....	\$3,000,000

[T.D. 6558, 26 FR 2783, Apr. 4, 1961, as amended by T.D. 6625, 27 FR 12543, Dec. 19, 1962; T.D. 6886, 31 FR 8689, June 23, 1966; T.D. 41 FR 5100, Feb. 4, 1976]

### § 1.817-5 Diversification requirements for variable annuity, endowment, and life insurance contracts.

(a) *Consequences of nondiversification*—(1) *In general.* Except as provided in paragraph (a)(2) of this section, for purposes of subchapter L, section 72, and section 7702(a), a variable contract (as defined in section 817(d)), other than a pension plan contract (as defined in section 818(a)), which is based on one or more segregated asset accounts shall not be treated as an annuity, endowment, or life insurance contract for any calendar quarter period for which the investments of any such account are not adequately diversified. For this purpose, a variable contract shall be treated as based on a segregated asset account for a calendar quarter period if amounts received under the contract (or earnings thereon) are allocated to the segregated asset account at any time during the period. In addition, a variable contract that is not treated as an annuity, endowment, or life insurance contract for any period by reason of this paragraph (a)(1) shall not be treated as an annuity, endowment, or life insurance contract for any subsequent period even if the investments are adequately diversified for such subsequent period. If a variable contract which is a life insurance or endowment contract under other applicable (e.g., State or foreign) law is not treated as a life insurance or endowment contract under section 7702(a), the income on the contract for any taxable year of the policyholder is treated as ordinary income received or

accrued by the policyholder during such year in accordance with section 7702 (g) and (h). Likewise, if a variable contract is not treated as an annuity contract under section 72, the income on the contract for any taxable year of the policyholder shall be treated as ordinary income received or accrued by the policyholder during such year in the same manner as a life insurance or endowment contract under section 7702 (g) and (h).

(2) *Inadvertent failure to diversify.* The investments of a segregated asset account shall be treated as satisfying the requirements of paragraph (b) of this section for one or more periods, provided the following conditions are satisfied—

(i) The issuer or holder must show the Commissioner that the failure of the investments to satisfy the requirements of paragraph (b) of this section for such period or periods was inadvertent,

(ii) The investments of the account must satisfy the requirements of paragraph (b) of this section within a reasonable time after the discovery of such failure, and

(iii) The issuer or holder of the variable contract must agree to make such adjustments or pay such amounts as may be required by the Commissioner with respect to the period or periods during which the investments of the account did not satisfy the requirements of paragraph (b) of this section.

(b) *Diversification of investments*—(1) *In general.* (i) Except as otherwise provided in this paragraph and paragraph (c) of this section, the investments of a segregated asset account shall be considered adequately diversified for purposes of this section and section 817(h) only if—

(A) No more than 55% of the value of the total assets of the account is represented by any one investment;

(B) No more than 70% of the value of the total assets of the account is represented by any two investments;

(C) No more than 80% of the value of the total assets of the account is represented by any three investments; and

(D) No more than 90% of the value of the total assets of the account is represented by any four investments.

(ii) For purposes of this section—

(A) All securities of the same issuer, all interests in the same real property project, and all interests in the same commodity are each treated as a single investment; and

(B) In the case of government securities, each government agency or instrumentality shall be treated as a separate issuer.

(iii) See paragraph (f) of this section for circumstances in which a segregated asset account is treated as the owner of assets held indirectly through certain pass-through entities and corporations taxed under subchapter M, chapter 1 of the Code.

(2) *Safe harbor.* A segregated asset account will be considered adequately diversified for purposes of this section and section 817(h) if—

(i) The account meets the requirements of section 851 (b)(4) and the regulations thereunder; and

(ii) No more than 55% of the value of the total assets of the account is attributable to cash, cash items (including receivables), government securities, and securities of other regulated investment companies.

(3) *Alternative diversification requirements for variable life insurance contracts.* (i) A segregated asset account with respect to variable life insurance contracts will be considered adequately diversified for purposes of this section and section 817(h) if the requirements of paragraph (b)(1) or (b)(2) of this section are satisfied or if the assets of such account, other than Treasury securities, satisfy the percentage limitations prescribed in paragraph (b)(1) of this section increased by the product of (A) .5 and (B) the percentage of the value of the total assets of the account that is represented by Treasury securities. In determining whether the assets of an account, other than Treasury securities, satisfy the increased percentage limitations, such limitations are applied as if the Treasury securities were not included in the account (*i.e.*, the increased percentage limitations are not applied to Treasury securities and the value of the total assets of the account is reduced by the value of the Treasury securities).

(ii) The provisions of this paragraph (b)(3) may be illustrated by the following examples:

*Example 1.* On the last day of a quarter of a calendar year, a segregated asset account with respect to variable life insurance contracts holds assets having a total value of \$100,000. The assets of the account are represented by Treasury securities having a total value of \$90,000 and securities of Corporation A having a total value of \$10,000. The 55% limit described in paragraph (b)(1)(i) of this section would be increased by 45% (0.5×90%) to 100%, and would then be applied to the assets of the account other than Treasury securities. Because no more than 100% of the value of the assets other than Treasury securities is represented by securities of Corporation A, the investments of the account will be considered adequately diversified.

*Example 2.* On the last day of a quarter of a calendar year, a segregated asset account with respect to variable life insurance contracts holds assets having a total value of \$100,000. The assets of the account are represented by Treasury securities having a total value of \$60,000, securities of Corporation A having a total value of \$30,000, and securities of Corporation B having a total value of \$10,000. The 55% and 70% limits described in paragraph (b)(1)(i) of this section would be increased by 30% (0.5×60%) to 85% and 100%, respectively, and would then be applied to the assets of the account other than Treasury securities. Securities of Corporation A represent 75%, and securities of Corporation B represent 25%, of the value of the assets of the account other than Treasury securities. Because no more than 85% of the value of the assets other than Treasury securities is represented by securities of Corporation A or B and no more than 100% of the value of the assets other than Treasury securities is represented by securities of Corporations A and B, the investments of the account will be considered adequately diversified.

(c) *Periods for which an account is adequately diversified*—(1) *In general.* A segregated asset account that satisfies the requirements of paragraph (b) of this section on the last day of a quarter of a calendar year (*i.e.*, March 31, June 30, September 30, and December 31) or within 30 days after such last day shall be considered adequately diversified for such quarter.

(2) *Start-up period.* (i) Except as provided in paragraph (c)(2)(iv) of this section, a segregated asset account that is not a real property account on its first anniversary shall be considered adequately diversified until such first anniversary.

(ii) Except as provided in paragraph (c)(2)(iv) of this section, a segregated

asset account that is a real property account on its first anniversary shall be considered adequately diversified until the earlier of its fifth anniversary or the anniversary on which the account ceases to be a real property account.

(iii) For purposes of paragraph (c)(2)(i) and (ii) of this section, the anniversary of a segregated asset account is the anniversary of the date on which any amount received under a life insurance or annuity contract, other than a pension plan contract (as defined in section 818 (a)), is first allocated to the account.

(iv) If more than 30 percent of the amount allocated to a segregated asset account as of the last day of a calendar quarter is attributable to contracts entered into more than one year before such date, paragraph (c)(2)(i) of this section shall not apply to the segregated asset account for any period after such date. Similarly, if more than 30 percent of the amount allocated to a segregated asset account as of the last day of a calendar quarter is attributable to contracts entered into more than 5 years before such date, paragraph (c)(2)(ii) of this section shall not apply to the segregated asset account for any period after such date. For purposes of this paragraph (c)(2), amounts transferred to the account from a diversified account (determined without regard to this paragraph (c)(2)) or as a result of an exchange pursuant to section 1035 in which the issuer of the contract received in the exchange is not related in a manner specified in section 267(b) to the issuer of the contract transferred in the exchange are not treated as—

(A) Amounts attributable to contracts entered into more than one year before such date, in the case of accounts subject to paragraph (c)(2)(i) of this section, or

(B) Amounts attributable to contracts entered into more than five years before such date, in the case of accounts subject to paragraph (c)(2)(ii) of this section.

(3) *Liquidation period.* A segregated asset account that satisfies the requirements of paragraph (b) of this section on the date a plan of liquidation is

adopted shall be considered adequately diversified for—

(i) The one-year period beginning on the date the plan of liquidation is adopted if the account is not a real property account on such date; or

(ii) The two-year period beginning on the date the plan of liquidation is adopted if the account is a real property account on such date.

(d) *Market fluctuations.* A segregated asset account that satisfies the requirements of paragraph (b) of this section at the end of any calendar quarter (or within 30 days after the end of such calendar quarter) shall not be considered nondiversified in a subsequent quarter because of a discrepancy between the value of its assets and the diversification requirements unless such discrepancy exists immediately after the acquisition of any asset and such discrepancy is wholly or partly the result of such acquisition.

(e) *Segregated asset account.* For purposes of section 817(h) and this section, a segregated asset account shall consist of all assets the investment return and market value of each of which must be allocated in an identical manner to any variable contract invested in any of such assets. See paragraph (g) for examples illustrating the application of this paragraph (e).

(f) *Look-through rule for assets held through certain investment companies, partnerships, or trusts—(1) In general.* If this paragraph (f) applies, a beneficial interest in a regulated investment company, a real estate investment trust, a partnership, or a trust that is treated under sections 671 through 679 as owned by the grantor or another person (“investment company, partnership, or trust”) shall not be treated as a single investment of a segregated asset account. Instead, a pro rata portion of each asset of the investment company, partnership, or trust shall be treated, for purposes of this section, as an asset of the segregated asset account. For purposes of this section, the ratable interest of a partner in a partnership’s assets shall be determined in accordance with the partner’s capital interest in the partnership.

(2) *Applicability—(i) Certain investment companies, partnerships, and trusts.* This paragraph (f) shall apply to an invest-

ment company, partnership, or trust if—

(A) All the beneficial interests in the investment company, partnership, or trust (other than those described in paragraph (f)(3) of this section) are held by one or more segregated asset accounts of one or more insurance companies; and

(B) Public access to such investment company, partnership, or trust is available exclusively (except as otherwise permitted in paragraph (f)(3) of this section) through the purchase of a variable contract. Solely for this purpose, the status of a contract as a variable contract will be determined without regard to section 817(h) and this section.

(ii) *Trusts holding Treasury securities.* This paragraph (f) shall also apply to a trust that is treated under section 671 through 679 as owned by the grantor or another person if substantially all of the assets of the trust are represented by Treasury securities.

(3) *Interests not held by segregated asset accounts.* Satisfaction of the requirements of paragraph (f)(2)(i) of this section shall not be prevented by reason of beneficial interests in the investment company, partnership, or trust that are—

(i) Held by the general account of a life insurance company or a corporation related in a manner specified in section 267(b) to a life insurance company, but only if the return on such interests is computed in the same manner as the return on an interest held by a segregated asset account is computed (determined without regard to expenses attributable to variable contracts), there is no intent to sell such interests to the public, and a segregated asset account of such life insurance company also holds or will hold a beneficial interest in the investment company, partnership, or trust;

(ii) Held by the manager, or a corporation related in a manner specified in section 267(b) to the manager, of the investment company, partnership, or trust, but only if the holding of the interests is in connection with the creation or management of the investment company, partnership, or trust,

the return on such interest is computed in the same manner as the return on an interest held by a segregated asset account is computed (determined without regard to expenses attributable to variable contracts), and there is no intent to sell such interests to the public;

(iii) Held by the trustee of a qualified pension or retirement plan;

(iv) Held by a qualified tuition program as defined in section 529;

(v) Held by the trustee of a pension plan established and maintained outside of the United States, as defined in section 7701(a)(9), primarily for the benefit of individuals substantially all of whom are nonresident aliens, as defined in section 7701(b)(1)(B);

(vi) Held by an account which, pursuant to Puerto Rican law or regulation, is segregated from the general asset accounts of the life insurance company that owns the account, provided the requirements of section 817(d) and (h) are satisfied. Solely for purposes of this paragraph (f)(3)(vi), the requirement under section 817(d)(1) that the account be segregated pursuant to State law or regulation shall be disregarded and § 1.817-5(f)(1) shall be applied without regard to the Puerto Rican segregated asset account; or

(vii) Held by the public, or treated as owned by policyholders pursuant to Rev. Rul. 81-225, 1981-2 C.B. 12, but only if (A) the investment company, partnership, or trust was closed to the public in accordance with Rev. Rul. 82-55, 1982-1 C.B. 12, or (B) all the assets of the segregated asset account are attributable to premium payments made by policyholders prior to September 26, 1981, to premium payments made in connection with a qualified pension or retirement plan, or to any combination of such premium payments.

(g) *Examples.* The provisions of paragraphs (e) and (f) of this section may be illustrated by the following examples.

*Example 1.* (i) The assets underlying variable contracts issued by a life insurance company consist of two groups of assets: (a) a diversified portfolio of debt securities and (b) interests in P, a partnership. All of the beneficial interests in P are held by one or more segregated asset accounts of one or more insurance companies and public access to P is available exclusively through the purchase of a variable contract. The variable

contracts provide that policyholders may specify which portion of each premium is to be invested in the debt securities and which portion is to be invested in P interests. The portfolio of debt securities and the assets of P, considered separately, each satisfy the diversification requirements of paragraph (b) of this section.

(ii) As a result of the ability of policyholders to allocate premiums among the two groups of assets, the investment return and market value of the interests in P and the debt securities may be allocated to different variable contracts in a non-identical manner. Accordingly, under paragraph (e) of this section, the interests in P are treated as part of a single segregated asset account ("Account 1") and the debt securities are treated as part of a different segregated asset account ("Account 2").

(iii) Since P is described in paragraph (f)(2)(i) of this section, interests in P will not be treated as a single investment of Account 1. Rather, Account 1 is treated as owning a pro rata portion of the assets of P.

(iv) Since Account 1 and Account 2 each satisfy the requirements of paragraph (b) of this section, variable contracts that are based on either or both accounts are treated as annuity, endowment, or life insurance contracts.

*Example 2.* The facts are the same as in example 1 except that some of the beneficial interests in P are held by persons not described in paragraph (f)(3) of this section. Since P is not described in paragraph (f)(2) of this section, interests in P will be treated as a single investment of Account 1. As a result, Account 1 does not satisfy the requirements of paragraph (b) of this section. Variable contracts based in whole or in part on Account 1 are not treated as annuity, endowment, or life insurance contracts. Variable contracts that are not based on Account 1 at any time during the period in which such account fails to satisfy the requirements of paragraph (b) of this section (*i.e.*, contracts based entirely on Account 2), are treated as annuity, endowment, or life insurance contracts. See paragraph (a)(1).

*Example 3.* The facts are the same as in example 2 except that the variable contracts do not permit policyholders to allocate premiums between or among the debt securities and interests in P. Thus, the investment return and market value of the interests in P and the debt securities must be allocated to the same variable contracts and in an identical manner. Under paragraph (e) of this section, the interests in P and the debt securities are treated as part of a single segregated asset account. If the interests in P and the debt securities, considered together, satisfy the requirements of paragraph (b) of

## Internal Revenue Service, Treasury

## § 1.817-5

this section, contracts based on this segregated asset account will be treated as annuity, endowment, or life insurance contracts.

(h) *Definitions.* The terms defined below shall, for purposes of this section, have the meanings set forth in such definitions:

(1) *Government security*—(i) *General rule.* The term *government security* shall mean any security issued or guaranteed or insured by the United States or an instrumentality of the United States; or any certificate of deposit for any of the foregoing. Any security or certificate or deposit insured or guaranteed only in part by the United States or an instrumentality thereof is treated as issued by the United States or its instrumentality only to the extent so insured or guaranteed, and as issued by the direct obligor to the extent not so insured or guaranteed. For purposes of this paragraph (h)(1), an instrumentality of the United States shall mean any person that is treated for purposes of 15 U.S.C. 80a-2 (16), as amended, as a person controlled or supervised by and acting as an instrumentality of the Government of the United States pursuant to authority granted by the Congress of the United States.

(ii) *Example.* A segregated asset account purchases a certificate of deposit in the amount of \$150,000 from bank A. Deposits in bank A are insured by the Federal Deposit Insurance Corporation, an instrumentality of the United States, to the extent of \$100,000 per depositor. The certificate of deposit is treated as a government security to the extent of the \$100,000 insured amount and is treated as a security issued by bank A to the extent of the \$50,000 excess of the value of the certificate of deposit over the insured amount.

(2) *Treasury security*—(i) *General rule.* For purposes of paragraph (b)(3) of this section and section 817(h)(3), the term *Treasury security* shall mean a security the direct obligor of which is the United States Treasury.

(ii) *Example.* A segregated asset account purchases put and call options on U.S. Treasury securities issued by the Options Clearing Corporation. The options are not Treasury securities for

purposes of paragraph (b)(3) and section 817(h)(3) because the direct obligor of the options is not the United States Treasury.

(3) *Real property.* The term *real property* shall mean any property that is treated as real property under 1.856-3 (d) except that it shall not include interests in real property.

(4) *Real property account.* A segregated asset account is a real property account on an anniversary of the account (within the meaning of paragraph (c)(2)(iii) of this section) or on the date a plan of liquidation is adopted if not less than the applicable percentage of the total assets of the account is represented by real property or interests in real property on such anniversary or date. For this purpose, the applicable percentage is 40% for the period ending on the first anniversary of the date on which premium income is first received, 50% for the year ending on the second anniversary, 60% for the year ending on the third anniversary, 70% for the year ending on the fourth anniversary, and 80% thereafter. A segregated asset account will also be treated as a real property account on its first anniversary if on or before such first anniversary the issuer has stated in the contract or prospectus or in a submission to a regulatory agency, an intention that the assets of the account will be primarily invested in real property or interests in real property, provided that at least 40% of the total assets of the account are so invested within six months after such first anniversary.

(5) *Commodity.* The term *commodity* shall mean any type of personal property other than a security.

(6) *Security.* The term *security* shall include a cash item and any partnership interest, whether or not registered under a Federal or State law regulating the offering or sale of securities. The term shall not include any interest in real property, or any interest in a commodity.

(7) *Interest in real property.* The term *interest in real property* shall include the ownership and co-ownership of land or improvements thereon and leaseholds of land or improvements thereon. Such term shall not, however, include mineral, oil, or gas royalty interests, such

as a retained economic interest in coal or iron ore with respect to which the special provisions of section 631(c) apply. The term “interest in real property” also shall include options to acquire land or improvements thereon, and options to acquire leaseholds of land or improvements thereon.

(8) *Interest in a commodity.* The term *interest in a commodity* shall include the ownership and co-ownership of any type of personal property other than a security, and any leaseholds thereof. Such term shall include mineral, oil, and gas royalty interests, including any fractional undivided interest therein. Such term also shall include any put, call, straddle, option, or privilege on any type of personal property other than a security.

(9) *Value.* The term *value* shall mean, with respect to investments for which market quotations are readily available, the market value of such investments; and with respect to other investments, fair value as determined in good faith by the managers of the segregated asset account.

(10) *Terms used in section 851.* To the extent not inconsistent with this paragraph (h) all terms used in this section shall have the same meaning as when used in section 851.

(i) *Effective date.*—(1) *In general.* This section is effective for taxable years beginning after December 31, 1983.

(2) *Exceptions.* (i) If, at all times after December 31, 1983, an insurance company would be considered the owner of the assets of a segregated asset account under the principles of Rev. Rul. 81-225, 1981-2 C.B. 12, this section will not apply to such account until December 15, 1986.

(ii) This section will not apply to any variable contract to which Rev. Rul. 77-85, 1977-1 C.B. 12, or Rev. Rul. 81-225, 1981-2 C.B. 12, did not apply by reason of the limited retroactive effect of such rulings.

(iii) In determining whether a segregated asset account is adequately diversified for any calendar quarter ending before July 1, 1988, debt instruments that are issued, guaranteed, or insured by the United States or an instrumentality of the United States shall not be treated as government securities if such debt instruments are

secured by a mortgage on real property (other than real property owned by the United States or an instrumentality of the United States) or represent an interest in a pool of debt instruments secured by such mortgages.

(iv) This section shall not apply until January 1, 1989, with respect to a variable contract (as defined in section 817(d)) that (1) provides for the payment of an immediate annuity (as defined in section 72(u)(4)); (2) was outstanding on September 12, 1986; and (3) the segregated asset account on which it was based was, on September 12, 1986, wholly invested in deposits insured by the Federal Deposit Insurance Corporation or the Federal Savings and Loan Insurance Corporation.

(v) A segregated asset account in existence before March 1, 2005, will be considered to be adequately diversified if—

(A) As of March 1, 2005, the account was adequately diversified within the meaning of section 817(h) and this regulation as in effect prior to that date; and

(B) By December 31, 2005, the account is adequately diversified within the meaning of section 817(h) and this regulation.

##### § 1.817A-1 Certain modified guaranteed contracts.

(a) Definitions.

(1) Modified guaranteed contract.

(2) Temporary guarantee period.

(3) Equity-indexed modified guaranteed contract.

(4) Non-equity-indexed modified guaranteed contract.

(5) Current market rate for non-equity-indexed modified guaranteed contract.

(6) Current market rate for equity-indexed modified guaranteed contract. [Reserved]

(b) Applicable interest rates for non-equity-indexed modified guaranteed contracts.

(1) Tax reserves during temporary guarantee period.

(2) Required interest during temporary guarantee period.

(3) Application of section 811(d).

## Internal Revenue Service, Treasury

## § 1.817A-1

(4) Periods after the end of the temporary guarantee period.

(5) Examples.

(c) Applicable interest rates for equity-indexed modified guaranteed contracts. [Reserved]

(d) Effective date.

[T.D. 9058, 68 FR 24350, May 7, 2003]

### § 1.817A-1 Certain modified guaranteed contracts.

(a) *Definitions*—(1) *Modified guaranteed contract*. The term *modified guaranteed contract* (MGC) is defined in section 817A(d) as an annuity, life insurance, or pension plan contract (other than a variable contract described in section 817) under which all or parts of the amounts received under the contract are allocated to a segregated account. Assets and reserves in this segregated account must be valued from time to time with reference to market values for annual statement purposes. Further, an MGC must provide either for a net surrender value or for a policyholder's fund (as defined in section 807(e)(1)). If only a portion of a contract is not described in section 817, such portion is treated as a separate contract for purposes of applying section 817A.

(2) *Temporary guarantee period*. An MGC may temporarily guarantee a return other than the permanently guaranteed crediting rate for a period specified in the contract (the *temporary guarantee period*). During the temporary guarantee period, the amount paid to the policyholder upon surrender is usually increased or decreased by a market value adjustment, which is determined by a formula set forth under the terms of the MGC.

(3) *Equity-indexed modified guaranteed contract*. An equity-indexed MGC is an MGC, as defined in paragraph (a)(1) of this section, that provides a return during or at the end of the temporary guarantee period based on the performance of stocks, other equity instruments, or equity-based derivatives.

(4) *Non-equity-indexed modified guaranteed contract*. A non-equity-indexed MGC is an MGC, as defined in paragraph (a)(1) of this section, that provides a return during or at the end of the temporary guarantee period not based on the performance of stocks,

other equity instruments, or equity-based derivatives.

(5) *Current market rate for non-equity-indexed modified guaranteed contracts*. The current market rate for a non-equity-indexed MGC issued by an insurer (whether issued in that tax year or a previous one) is the appropriate Treasury constant maturity interest rate published by the Board of Governors of the Federal Reserve System for the month containing the last day of the insurer's taxable year. The appropriate rate is that rate published for Treasury securities with the shortest published maturity that is greater than (or equal to) the remaining duration of the current temporary guarantee period under the MGC.

(6) *Current market rate for equity-indexed modified guaranteed contracts*. [Reserved]

(b) *Applicable interest rates for non-equity-indexed modified guaranteed contracts*—(1) *Tax reserves during temporary guarantee period*. An insurance company is required to determine the tax reserves for an MGC under sections 807(c)(3) or (d)(2). During a non-equity-indexed MGC's temporary guarantee period, the applicable interest rate to be used under sections 807(c)(3) and (d)(2)(B) is the current market rate, as defined in paragraph (a)(5) of this section.

(2) *Required interest during temporary guarantee period*. During the temporary guarantee period of a non-equity-indexed MGC, the applicable interest rate to be used to determine required interest under section 812(b)(2)(A) is the same current market rate, defined in paragraph (a)(5) of this section, that applies for that period for purposes of sections 807(c)(3) or (d)(2)(B).

(3) *Application of section 811(d)*. An additional reserve computation rule applies under section 811(d) for contracts that guarantee certain interest payments beyond the end of the taxable year. Section 811(d) is waived for non-equity-indexed MGCs.

(4) *Periods after the end of the temporary guarantee period*. For periods after the end of the temporary guarantee period, sections 807(c)(3), 807(d)(2)(B), 811(d) and 812(b)(2)(A) are

## § 1.818-1

## 26 CFR Ch. I (4-1-14 Edition)

not modified when applied to non-equity-indexed MGCs. None of these sections are affected by the definition of current market rate contained in paragraph (a)(5) of this section once the temporary guarantee period has expired.

(5) *Examples.* The following examples illustrate this paragraph (b):

*Example 1.* (i) *IC*, a life insurance company as defined in section 816, issues a MGC (the Contract) on August 1 of 1996. The Contract is an annuity contract that gives rise to life insurance reserves, as defined in section 816(b). *IC* is a calendar year taxpayer. The Contract guarantees that interest will be credited at 8 percent per year for the first 8 contract years and 4 percent per year thereafter. During the 8-year temporary guarantee period, the Contract provides for a market value adjustment based on changes in a published bond index and not on the performance of stocks, other equity instruments or equity based derivatives. *IC* has chosen to avail itself of the provisions of these regulations for 1996 and taxable years thereafter. The 10-year Treasury constant maturity interest rate published for December of 1996 was 6.30 percent. The next shortest maturity published for Treasury constant maturity interest rates is 7 years. As of the end of 1996, the remaining duration of the temporary guarantee period for the Contract was 7 years and 7 months.

(ii) To determine under section 807(d)(2) the end of 1996 reserves for the Contract, *IC* must use a discount interest rate of 6.30 percent for the temporary guarantee period. The interest rate to be used in computing required interest under section 812(b)(2)(A) for 1996 reserves is also 6.30 percent.

(iii) The discount rate applicable to periods outside the 8-year temporary guarantee period is determined under sections 807(c)(3), 807(d)(2)(B), 811(d) and 812(b)(2)(A) without regard to the current market rate.

*Example 2.* Assume the same facts as in *Example 1* except that it is now the last day of 1998. The remaining duration of the temporary guarantee period under the Contract is now 5 years and 7 months. The 7-year Treasury constant maturity interest rate published for December of 1998 was 4.65 percent. The next shortest duration published for Treasury constant maturity interest rates is 5 years. A discount rate of 4.65 percent is used for the remaining duration of the temporary guarantee period for the purpose of determining a reserve under section 807(d) and for the purpose of determining required interest under section 812(b)(2)(A).

*Example 3.* Assume the same facts as in *Example 1* except that it is now the last day of 2001. The remaining duration of the temporary guarantee period under the Contract

is now 2 years and 7 months. The 3-year Treasury constant maturity interest rate published for December of 2001 was 3.62 percent. The next shortest duration published for Treasury constant maturity interest rates is 2 years. A discount rate of 3.62 percent is used for the remaining duration of the temporary guarantee period for the purpose of determining a reserve under section 807(d) and for the purpose of determining required interest under section 812(b)(2)(A).

(c) *Applicable interest rates for equity-indexed modified guaranteed contracts.* [Reserved]

(d) *Effective date.* Paragraphs (a), (b) and (d) of this section are effective on May 7, 2003. However, pursuant to section 7805(b)(7), taxpayers may elect to apply those paragraphs retroactively for all taxable years beginning after December 31, 1995, the effective date of section 817A.

[T.D. 9058, 68 FR 24350, May 7, 2003]

### § 1.818-1 Taxable years affected.

Sections 1.818-2 through 1.818-8, except as otherwise provided therein, are applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112).

[T.D. 6558, 26 FR 2785, Apr. 4, 1961 as amended by T.D. 7469, 42 FR 12181, Mar. 3, 1977]

### § 1.818-2 Accounting provisions.

(a) *Method of accounting.* (1) Section 818(a)(1) provides the general rule that all computations entering into the determination of taxes imposed by part I, subchapter L, chapter 1 of the Code, shall be made under an accrual method of accounting. Thus, the over-all method of accounting for life insurance companies shall be the accrual method. Except as otherwise provided in part I, the term “accrual method” shall have the same meaning and application in section 818 as it does under section 446 (relating to general rule for methods of accounting) and the regulations thereunder. For general rules relating to the taxable year for inclusion of income

and deduction of expenses under an accrual method of accounting, see sections 451 and 461 and the regulations thereunder.

(2) Section 818(a)(2) provides that, to the extent permitted under this section, a life insurance company's method of accounting may be a combination of the accrual method with any other method of accounting permitted by chapter 1 of the Internal Revenue Code of 1954, other than the cash receipts and disbursements method. Thus, section 818(a)(2) specifically prohibits the use by a life insurance company of the cash receipts and disbursements method either separately or in combination with a permissible method of accounting. The term "method of accounting" includes not only the over-all method of accounting of the taxpayer but also the accounting treatment of any item. For purposes of section 818(a)(2), a life insurance company may elect to compute its taxable income under an over-all method of accounting consisting of the accrual method combined with the special methods of accounting for particular items of income and expense provided under other sections of chapter 1 of the Internal Revenue Code of 1954, other than the cash receipts and disbursements method. These methods of accounting for special items include the accounting treatment provided for depreciation (section 167), research and experimental expenditures (section 174), soil and water conservation expenditures (section 175), organizational expenditures (section 248), etc. In addition, a life insurance company may, where applicable, use the crop method of accounting (as provided in the regulations under sections 61 and 162), and the installment method of accounting for sales of realty and casual sales of personalty (as provided in section 453(b)). To the extent not inconsistent with the provisions of the Internal Revenue Code of 1954 or the regulations thereunder and the method of accounting adopted by the taxpayer pursuant to this section, all computations entering into the determination of taxes imposed by part I shall be made in a manner consistent with the manner required for purposes of the annual statement approved by the National Association of Insurance Commissioners.

(3)(i) An election to use any of the special methods of accounting referred to in subparagraph (2) of this paragraph which was made pursuant to any provisions of the Internal Revenue Code of 1954 or prior revenue laws for purposes of determining a company's tax liabilities for prior years, shall have the same force and effect in determining the items of gross investment income under section 804(b) and the items of deduction under section 804(c) of the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112) as if such Act had not been enacted.

(ii) For purposes of determining gain or loss from operations under section 809(b), in computing the life insurance company's share of investment yield under section 809(b) (1)(A) and (2)(A), an election with respect to any of the special methods of accounting referred to in subparagraph (2) of this paragraph which was made pursuant to any provision of the Internal Revenue Code of 1954 or prior revenue laws, shall not be affected in any way by the enactment of the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112).

(iii) For purposes of determining gain or loss from operations under section 809(b), in computing the items of gross amount under section 809(c) and the deduction items under section 809(d), an election to use any of the special methods of accounting referred to in subparagraph (2) of this paragraph must be made in accordance with the specific statutory provisions of the sections containing such elections and the regulations thereunder. However, where a particular election may be made only with the consent of the Commissioner (either because the time for making the election without the consent of the Commissioner has expired or because the particular section contained no provision for making an election without consent), and the time prescribed by the applicable regulations for submitting a request for permission to make such an election for the taxable year 1958 has expired, a life insurance company may make such an election for the year 1958 at the time of filing its return for that year (including extensions thereof). For example, a life insurance company may elect any of the methods of depreciation prescribed

in section 167 (to the extent permitted under that section and the regulations thereunder) with respect to those assets, or any portion thereof, for which no depreciation was allowable under prior revenue laws, for example, furniture and fixtures used in the underwriting department. Similarly, a life insurance company shall be permitted to make an election under section 461(c) (relating to the accrual of real property taxes) with respect to real property for which no deduction was allowable under prior revenue laws. Any such election shall be made in the manner and form prescribed in the applicable regulations.

(iv) For purposes of subdivision (ii) of this subparagraph, the method used under section 1016(a)(3)(C) (relating to adjustments to basis) in determining the amount of exhaustion, wear and tear, obsolescence, and amortization actually sustained shall not preclude a taxpayer from electing any of the methods prescribed in section 167 in accordance with the provisions of that section and the regulations thereunder for determining the amount of such exhaustion, wear and tear, obsolescence, and amortization for the year 1958. For example, if the amount of depreciation actually sustained, under section 1016(a)(3)(C), on a life insurance company's home office building (other than that portion for which depreciation was allowable under prior revenue laws) is determined on the straight line method, the life insurance company may elect for the year 1958 to use any of the methods prescribed in section 167 for determining its depreciation allowance for 1958. However, such election shall be binding for 1958, and for all subsequent taxable years, unless consent to change such election, if required, is obtained from the Commissioner in accordance with the provisions of section 167 and the regulations thereunder.

(4)(i) For purposes of section 805(b)(3)(B)(i) (relating to the determination of the current earnings rate for any taxable year beginning before January 1, 1958), the determination for any year of the investment yield and the assets shall be made as though the taxpayer had been on the accrual method prescribed in subparagraph (1)

of this paragraph for such year, or the accrual method in combination with the other methods of accounting prescribed in subparagraph (2) of this paragraph, if these other methods of accounting are used by the taxpayer in determining the investment yield and assets for the taxable year 1958. However, where the method used for determining the deduction under section 167 for the year 1958 differs from the method used in prior years, the amount of the deduction actually allowed or allowable for such prior years for purposes of section 1016(a)(2) (relating to adjustments to basis) shall be the amount to be taken into account in determining the current earnings rate under section 805(b)(3)(B)(i).

(ii) For purposes of section 812(b)(1)(C) (relating to operations loss carrybacks and carryovers for years prior to 1958), the determination for those years of the gain or loss from operations shall be made as though the taxpayer had been on the accrual method of accounting prescribed in subparagraph (1) of this paragraph for such year, or the accrual method in combination with the other methods of accounting prescribed in subparagraph (2) of this paragraph, if these other methods of accounting are used by the taxpayer in the determination of gain or loss from operations for the taxable year 1958. However, where any adjustment to basis is required under section 1016(a)(3)(C) on account of exhaustion, wear and tear, obsolescence, amortization, and depletion sustained, the amount actually sustained as determined under section 1016(a)(3)(C) for each of the years involved shall be the amount allowed in the determination of gain or loss from operations for purposes of section 812(b)(1)(C).

(b) *Adjustments required if accrual method of accounting was not used in 1957.* The items of gross amount taken into account under section 809(c) and the items of deductions allowed under section 809(d) for the taxable year 1958 shall be determined as though the taxpayer had been on the accrual method of accounting prescribed in paragraph (a) of this section for all prior years. Thus, life insurance companies not on the accrual method for the year 1957 shall accrue, as of December 31, 1957,

those items of gross amount which would have been properly taken into account for the year 1957 if the company had been on the accrual method described in section 818(a). Likewise, life insurance companies not on the accrual method for the year 1957 shall accrue, as of December 31, 1957, those items of deductions which would have been properly allowed for the year 1957 if the company had been on the accrual method described in section 818(a). For example, if certain premium amounts were received during the year 1958 but such amounts would have been properly taken into account for the year 1957 if the taxpayer had been on the accrual method for the year 1957, then the taxpayer will not be required to take such premium amounts into account for the year 1958. If, for example, certain claims, benefits, and losses were paid during the year 1958 but such items would have been properly taken into account for the year 1957 if the taxpayer had been on the accrual method for the year 1957, then the taxpayer will not be permitted to deduct such expense items for the year 1958. For a special transitional rule applicable with respect to changes in method of accounting required by section 818(a) and paragraph (a) of this section, see section 818(e) and § 1.818-6.

(c) *Change of basis in computing reserves.* (1) Section 806(b) provides that if the basis for determining the amount of any item referred to in section 810(c) as of the close of the taxable year differs from the basis for such determination as of the beginning of the taxable year, then for purposes of subpart B, part I, subchapter L, chapter 1 of the Code (relating to the determination of taxable investment income), the amount of such item shall be the amount computed on the old basis as of the close of the taxable year and the amount computed on the new basis as of the beginning of the next taxable year. Similarly, section 810(d)(1) provides rules for determining the amount of the adjustment to be made for purposes of subpart C, part I, subchapter L, chapter 1 of the Code (relating to the determination of gain or loss from operations), if the basis for determining any item referred to in section 810(c) as of the close of any taxable

year differs from the basis for such determination as of the close of the preceding taxable year. Under an accrual method of accounting, a change in the basis or method of computing the amount of liability of any item referred to in section 810(c) occurs in the taxable year in which all the events have occurred which determine the change in the basis or method of computing the amount of such liability and, in which, the amount thereof (whether increased or decreased) can be determined with reasonable accuracy.

(2) The application of subparagraph (1) of this paragraph may be illustrated by the following examples:

*Example 1.* Assume that during the taxable year 1960, M, a life insurance company, determines that the amount of its life insurance reserves held with respect to a particular block of contracts is understated on the present basis being used in valuing such liability and that such liability can be more accurately reflected by changing from the present basis to a particular new basis. Assume that M uses such new basis in computing its reserves under such contracts at the end of the taxable year 1960. Under the provisions of section 818(a) and subparagraph (1) of this paragraph, the change in basis for purposes of sections 806(b) and 810(d) occurs during the taxable year 1960, the year in which all the events have occurred which determine the change in basis and the amount of any increase (or decrease) attributable to such change can be determined with reasonable accuracy. Such change shall be treated as having occurred during the taxable year 1960 whether M determines that its liability under such contracts was understated for the first time during 1960, or that its liability under such contracts has, in fact, been understated for a number of prior years.

*Example 2.* Assume the facts are the same as in example 1, except that during the taxable year 1960 the insurance department of State X issues a ruling, pursuant to authority conferred by statute, requiring M to use the particular new basis which more accurately reflects its liability with respect to such contracts and that as a result of such ruling, M uses the new basis in computing its reserves under such contracts for the taxable years 1958, 1959, and 1960. Under the provisions of section 818(a) and subparagraph (1) of this paragraph, the change in basis for purposes of sections 806(b) and 810(d) occurs during the taxable year 1960, the year in which all the events have occurred which determine that a change in basis should be

### § 1.818-3

### 26 CFR Ch. I (4-1-14 Edition)

made and the amount of any increase (or decrease) attributable to such change can be determined with reasonable accuracy.

[T.D. 6558, 26 FR 2785, Apr. 4, 1961]

#### § 1.818-3 Amortization of premium and accrual of discount.

(a) *In general.* Section 818(b) provides that the appropriate items of income, deductions, and adjustments under part I, subchapter L, chapter 1 of the Code, shall be adjusted to reflect the appropriate amortization of premium and the appropriate accrual of discount on bonds, notes, debentures, or other evidences of indebtedness held by a life insurance company. Such adjustments are limited to the amount of appropriate amortization or accrual attributable to the taxable year with respect to such securities which are not in default as to principal or interest and which are amply secured. The question of ample security will be resolved according to the rules laid down from time to time by the National Association of Insurance Commissioners. The adjustment for amortization of premium decreases the gross investment income, the exclusion and reduction for wholly tax-exempt interest, the exclusion and deduction for partially tax-exempt interest, and the basis or adjusted basis of such securities. The adjustment for accrual of discount increases the gross investment income, the exclusion and reduction for wholly tax-exempt interest, the exclusion and deduction for partially tax-exempt interest, and the basis or adjusted basis of such securities. However, for taxable years beginning after May 31, 1960, only the accrual of discount relating to issue discount will increase the exclusion and reduction for wholly tax-exempt interest. See section 103.

#### (b) *Acquisitions before January 1, 1958.*

(1) In the case of any such security acquired before January 1, 1958, the premium is the excess of its acquisition value over its maturity value and the discount is the excess of its maturity value over its acquisition value. The acquisition value of any such security is its cost (including buying commissions or brokerage but excluding any amounts paid for accrued interest) if purchased for cash, or if not purchased for cash, its then fair market value.

The maturity value of any such security is the amount payable thereunder either at the maturity date or an earlier call date. The earlier call date of any such security may be the earliest interest payment date if it is callable or payable at such date, the earliest date at which it is callable at par, or such other call or payment date, prior to maturity, specified in the security as may be selected by the life insurance company. A life insurance company which adjusts amortization of premium or accrual of discount with reference to a particular call or payment date must make the adjustments with reference to the value on such date and may not, after selecting such date, use a different call or payment date, or value, in the calculation of such amortization or discount with respect to such security unless the security was not in fact called or paid on such selected date.

(2) The adjustments for amortization of premium and accrual of discount will be determined:

(i) According to the method regularly employed by the company, if such method is reasonable, or

(ii) According to the method prescribed by this section.

A method of amortization of premium or accrual of discount will be deemed "regularly employed" by a life insurance company if the method was consistently followed in prior taxable years, or if, in the case of a company which has never before made such adjustments, the company initiates in the first taxable year for which the adjustments are made a reasonable method of amortization of premium or accrual of discount and consistently follows such method thereafter. Ordinarily, a company regularly employs a method in accordance with the statute of some State, Territory, or the District of Columbia, in which it operates.

(3) The method of amortization and accrual prescribed by this section is as follows:

(i) The premium (or discount) shall be determined in accordance with this section; and

(ii) The appropriate amortization of premium (or accrual of discount) attributable to the taxable year shall be an amount which bears the same ratio

to the premium (or discount) as the number of months in the taxable year during which the security was owned by the life insurance company bears to the number of months between the date of acquisition of the security and its maturity or earlier call date, determined in accordance with this section. For purposes of this section, a fractional part of a month shall be disregarded unless it amounts to more than half a month, in which case it shall be considered a month.

(c) *Acquisitions after December 31, 1957.*

(1) In the case of:

(i) Any bond, as defined in section 171(d), acquired after December 31, 1957, the amount of the premium and the amortizable premium for the taxable year, shall be determined under section 171(b) and the regulations thereunder, as if the election set forth in section 171(c) had been made, and

(ii) Any bond, note, debenture, or other evidence of indebtedness not described in subdivision (i) of this subparagraph and acquired after December 31, 1957, the amount of the premium and the amortizable premium for the taxable year, shall be determined under paragraph (b) of this section.

(2) In the case of any bond, note, debenture, or other evidence of indebtedness acquired after December 31, 1957, the amount of the discount and the accrual of discount attributable to the taxable year shall be determined under paragraph (b) of this section.

(d) *Convertible evidences of indebtedness.* Section 818(b)(2)(B) provides that in no case shall the amount of premium on a convertible evidence of indebtedness (including any bond, note, or debenture) include any amount attributable to the conversion features of the evidence of indebtedness. This provision is the same as the one contained in section 171(b), and the rules prescribed in paragraph (c) of § 1.171-2 shall be applicable for purposes of section 818(b)(2)(B). This provision is to be applied without regard to the date upon which the evidence of indebtedness was acquired. Thus, where a convertible evidence of indebtedness was acquired before January 1, 1958, and a portion or all of the premium attributable to the conversion features of the evidence of indebtedness has been am-

ortized for taxable years beginning before January 1, 1958, no adjustment for such amortization will be required by reason of section 818(b)(2)(B). Such amortization will, however, require an adjustment to the basis of the evidence of indebtedness under section 1016(a)(17). For taxable years beginning after December 31, 1957, no further amortization of the premium attributable to the conversion features of such an evidence of indebtedness will be taken into account.

(e) *Adjustments to basis.* Section 1016(a)(17) (relating to adjustments to basis) provides that in the case of any evidence of indebtedness referred to in section 818(b) and this section, the basis shall be adjusted to the extent of the adjustments required under section 818(b) (or the corresponding provisions of prior income tax laws) for the taxable year and all prior taxable years. The basis of any evidence of indebtedness shall be reduced by the amount of the adjustment required under section 818(b) (or the corresponding provision of prior income tax laws) on account of amortizable premium and shall be increased by the amount of the adjustment required under section 818(b) on account of accruable discounts.

(f) *Denial of double inclusion.* Any amount which is includible in gross investment income by reason of section 818(b) and paragraph (a) of this section shall not be includible in gross income under section 1232(a) (relating to the taxation of bonds and other evidences of indebtedness). See section 1232(a)(2)(C) and the regulations thereunder.

[T.D. 6558, 26 FR 2786, Apr. 4, 1961]

**§ 1.818-4 Election with respect to life insurance reserves computed on preliminary term basis.**

(a) *In general.* Section 818(c) permits a life insurance company issuing contracts with respect to which the life insurance reserves are computed on one of the recognized preliminary term bases to elect to revalue such reserves on a net level premium basis for the purpose of determining the amount which may be taken into account as life insurance reserves for purposes of part I, subchapter L, chapter 1 of the Code, other than section 801 (relating

to the definition of a life insurance company). If such an election is made, the method to be used in making this revaluation of reserves shall be either the exact revaluation method (as described in section 818(c)(1) and paragraph (b)(1) of this section) or the approximate revaluation method (as described in section 818(c)(2) and paragraph (b)(2) of this section).

(b) *Revaluation of reserves computed on preliminary term basis.* If a life insurance company makes an election under section 818(c) in the manner provided in paragraph (e) of this section, the amount to be taken into account as life insurance reserves with respect to contracts for which such reserves are computed on a preliminary term basis may be determined on either of the following bases:

(1) *Exact revaluation method.* As if the reserves for all such contracts had been computed on a net level premium basis (using the same mortality or morbidity assumptions and interest rates for both the preliminary term basis and the net level premium basis).

(2) *Approximate revaluation method.* The amount computed without regard to section 818(c):

(i) Increased by \$21 per \$1,000 of insurance in force (other than term insurance) under such contracts, less 2.1 percent of reserves under such contracts, and

(ii) Increased by \$5 per \$1,000 of term insurance in force under such contracts which at the time of issuance cover a period of more than 15 years, less 0.5 percent of reserves under such contracts.

(c) *Exception.* If a life insurance company which makes an election under section 818(c)(2) and paragraph (b)(2) of this section has life insurance reserves with respect to both life insurance and noncancellable accident and health contracts for which such reserves are computed on a preliminary term basis, it shall use the approximate revaluation method for all its life insurance reserves other than that portion of such reserves held with respect to its noncancellable accident and health contracts, and shall use the exact revaluation method for all its life insurance reserves held with respect to such

noncancellable accident and health contracts.

(d) *Reserves subject to recomputation.*

(1) For the first taxable year for which the election under section 818(c) and paragraph (b) of this section applies, a company making such election must revalue all its life insurance reserves held with respect to contracts for which such reserves are computed on a preliminary term basis at the end of such taxable year on the basis elected under section 818(c) and paragraph (b) of this section. However, for purposes of the preceding sentence, an election under section 818(c) shall not apply with respect to such reserves which would not be treated as being computed on the preliminary term basis at the end of such taxable year except for the provisions of section 810 (a) or (b). See paragraph (c)(2) of § 1.810-2. For example, if S, a life insurance company which computes its life insurance reserves on a recognized preliminary term basis at the beginning of the taxable year 1958, strengthens a portion of such reserves during the taxable year by actually changing to a net level premium basis in computing such reserves, and then makes the election under section 818(c) and paragraph (b) of this section for 1958, such election shall not apply with respect to the strengthened contracts.

(2) For any taxable year other than the first taxable year for which the election under section 818(c) and paragraph (b) of this section applies, a company making such election must revalue all its life insurance reserves held with respect to contracts for which such reserves are computed on a preliminary term basis at the beginning or end of the taxable year on the basis elected under section 818(c) and paragraph (b) of this section. For example, if M, a life insurance company which made a valid outstanding election under section 818(c) in the manner provided in paragraph (e) of this section for the taxable year 1959, sells a block of contracts subject to such election on September 1, 1960, M would value such contracts on the basis elected under section 818(c) and paragraph (b) of this section on January 1, 1960, for purposes of determining the net decrease or increase in the sum of the

items described in section 810(c) for the taxable year under section 810 (a) or (b).

(3) For the effect of an election under section 818(c) and paragraph (b) of this section in determining gain or loss from operations for the taxable year, see paragraph (c)(3) of § 1.810-2 and paragraph (e) of § 1.810-3.

(e) *Time and manner of making election.* The election provided by section 818(c) shall be made in a statement attached to the life insurance company's income tax return for the first taxable year for which the company desires the election to apply. The return and statement must be filed not later than the date prescribed by law (including extensions thereof) for filing the return for such taxable year. However, if the last day prescribed by law (including extensions thereof) for filing a return for the first taxable year for which the company desires the election to apply falls before April 4, 1961, the election provided by section 818(c) may be made for such year by filing the statement and an amended return for such taxable year (and all subsequent taxable years for which returns have been filed) before July 4, 1961. The statement shall indicate whether the exact or the approximate method of revaluation has been adopted. The statement shall also set forth sufficient information as to mortality and morbidity assumptions; interest rates; the valuation method used; the amount of the reserves and the amount and type of insurance in force under all contracts for which reserves are computed on a preliminary term basis; and such other pertinent data as will enable the Commissioner to determine the correctness of the application of the revaluation method adopted and the accuracy of the computations involved in revaluing the reserves. The election to use either the exact revaluation method or the approximate revaluation method shall, except for the purposes of section 801, be adhered to in making the computations under part I for the taxable year for which such election is made and for all subsequent taxable years.

(f) *Scope of election.* An election made under section 818(c) and paragraph (b) of this section to use either the exact or the approximate method of reval-

uing the company's life insurance reserves shall be binding for the taxable year for which made, and, except as provided in paragraph (g) of this section, shall be binding for all succeeding taxable years, unless consent to revoke the election is obtained from the Commissioner. However, for taxable years beginning prior to April 4, 1961, a company may revoke the election provided by section 818(c) without obtaining consent from the Commissioner by filing, before July 4, 1961, a statement that the company desires to revoke such election. An amended return reflecting such revocation must accompany the statement for all taxable years for which returns have been filed with respect to such election.

(g) *Special rule for 1958.* If an election is made for a taxable year beginning in 1958 to use the approximate revaluation method described in section 818(c)(2) and paragraph (b)(2) of this section the company may, for its first taxable year beginning after 1958, elect to change to the exact revaluation method described in section 818(c)(1) and paragraph (b)(1) of this section without obtaining the consent of the Commissioner. In such case, the election to change shall be made in a statement attached to the company's income tax return for such taxable year and filed not later than the date prescribed by law (including extensions thereof) for filing the return for such year. The statement shall indicate that the company has elected to change from the approximate to the exact revaluation method for such taxable year and shall include such information and data referred to in paragraph (e) of this section as will enable the Commissioner to determine the correctness and accuracy of the computations involved.

[T.D. 6558, 26 FR 2787, Apr. 4, 1961; 26 FR 3276, Apr. 18, 1961]

#### § 1.818-5 Short taxable years.

(a) *In general.* Section 818(d) provides that if any return of a corporation made under part I, subchapter L, chapter 1 of the Code, is for a period of less than the entire calendar year, then section 443 (relating to returns for a period of less than 12 months) shall not apply. This section further provides

certain rules to be used in determining the life insurance company taxable income for a period of less than the entire calendar year.

(b) *Returns for periods of less than the entire calendar year.* A return for a short period, that is, for a taxable year consisting of a period of less than the entire calendar year, shall be made only under the following circumstances:

(1) If a company which qualifies as a life insurance company is not in existence for the entire taxable year, a return is required for the short period during which the taxpayer was in existence. For example, a life insurance company organized on August 1, is required to file a return for the short period from August 1 to December 31, and returns for each calendar year thereafter. Similarly, if a company which qualifies as a life insurance company completely dissolves during the taxable year it is required to file a return for the short period from January 1 to the date it goes out of existence. All items entering into the computation of taxable investment income and gain or loss from operations for the short period shall be determined on a consistent basis and in the manner provided in paragraph (c) of this section.

(2) A return must be filed for a short period resulting from the termination by the district director of a taxpayer's taxable year for jeopardy. See section 6851 and the regulations thereunder.

A company which was an insurance company for the preceding taxable year (but not a life insurance company as defined in section 801(a) and paragraph (b) of § 1.801-3) and which for the current taxable year qualifies as a life insurance company shall not file a return for the short period from the time during the taxable year that it first qualifies as a life insurance company to the end of the taxable year. Similarly, an insurance company which was a life insurance company for the preceding taxable year but which for the current taxable year does not qualify as a life insurance company shall not file a return for the short period from the beginning of the taxable year to the time during the taxable year that it no longer qualifies as a life insurance company.

(c) *Computation of life insurance company taxable income for short period.* (1) If a return is made for a short period, section 818(d)(1) provides that the taxable investment income and the gain or loss from operations shall be determined on an annual basis by a ratable daily projection of the appropriate figures for the short period. The appropriate figures for the short period shall be determined on an annual basis by multiplying such figures by a fraction, the numerator of which is the number of days in the calendar year in which the short period occurs and the denominator of which is the number of days in the short period.

(2)(i) In computing taxable investment income for a short period, the investment yield, the policy and other contract liability requirements, the policyholders' share of each and every item of investment yield, and the company's share of any item of investment yield shall be determined on an annual basis.

(ii) For purposes of determining the investment yield on an annual basis, each item of gross investment income under section 804(b) and each item of deduction under section 804(c) shall be annualized in the manner provided in subparagraph (1) of this paragraph. In any case in which a limitation is placed on the amount of a deduction provided under section 804(c), the limitation shall apply to the item of deduction computed on an annual basis.

(iii) The policy and other contract liability requirements shall be determined on an annual basis in the following manner:

(a) The interest paid (as defined in section 805(e) and § 1.805-8) for the short period shall be annualized in the manner prescribed in subparagraph (1) of this paragraph.

(b) The current earnings rate for the taxable year in which the short period occurs shall be determined by dividing the taxpayer's investment yield, as determined on an annual basis under subdivision (ii) of this subparagraph, by the mean of the taxpayer's assets at the beginning and end of the short period. For purposes of section 805, any reference to the current earnings rate for the taxable year in which the short

period occurs means the current earnings rate as determined under this subdivision.

(c) The adjusted life insurance reserves shall be determined as provided in section 805(c), and the pension plan reserves shall be determined as provided in section 805(d).

(iv) The policyholders' share of each and every item of investment yield (as defined in section 804(a)) shall be that percentage obtained by dividing the policy and other contract liability requirements, determined under subdivision (iii) of this subparagraph, by the investment yield, determined under subdivision (ii) of this subparagraph.

(v) The taxable investment income for the short period shall be an amount (not less than zero) equal to the life insurance company's share of each and every item of investment yield, as determined under subdivision (ii) of this subparagraph, reduced by the items described in section 804(a)(2) (A) and (B). In determining these reductions under section 804(a)(2)(A) the amount of the respective items shall be the amount that is determined on an annual basis under subdivision (ii) of this subparagraph. The small business deduction, under section 804(a)(2)(B) shall be an amount (not to exceed \$25,000) equal to 10 percent of the investment yield, determined under subdivision (ii) of this subparagraph, for the short period.

(vi) Except as provided in this paragraph, the determination of taxable investment income under subpart B, part I, subchapter L, chapter 1 of the Code, shall be made in accordance with all the provisions of that subpart.

(3)(i) In computing gain or loss from operations for a short period, the share of each and every item of investment yield set aside for policyholders, the life insurance company's share of each and every item of investment yield, the items of gross amount, and the items of deduction shall, except as modified by this subparagraph, be determined on an annual basis in the manner provided in subparagraph (1) of this paragraph. In any case in which a limitation is placed on the amount of a deduction provided under section 809, the limitation shall apply to the item of deduction computed on an annualized basis.

(ii) For purposes of sections 809 and 810, the investment yield shall be determined in the manner provided in subparagraph (2)(ii) of this paragraph. The share of any item of investment yield set aside for policyholders shall be that percentage obtained by dividing the required interest as determined under section 809(a)(2), by the investment yield, as determined in this subparagraph, except that if the required interest exceeds the investment yield then the share of any item of investment yield set aside for policyholders shall be 100 percent.

(iii) The items of gross amount and the items of deduction, other than the operations loss deduction under section 809(d)(4), shall be determined on an annual basis. See subdivision (iv) of this subparagraph for the manner in which the net decrease or net increase in reserves under section 810 shall be annualized.

(iv) For purposes of determining either a net decrease in reserves under section 810(a) or a net increase in reserves under section 810(b), the sum of the items described in section 810(c) as of the end of the short period shall be reduced by the amount of the investment yield not included in gain or loss from operations for the short period by reason of section 809(a)(1). The amount of investment yield excluded under section 809(a)(1) has been determined upon an annualized basis while the sum of the items described in section 180(c) at the end of the short period has been determined on an actual basis. In order to place these on the same basis, the amount of investment yield not included in gain or loss from operations by reason of section 809(a)(1), determined under subdivision (ii) shall, for purposes of section 810(a) and section 810(b), be reduced to an amount which bears the same ratio to the full amount as the number of days in the short period bears to the number of days in the entire calendar year. The net decrease or the net increase of the items referred to in section 810(c) for the short period shall then be determined, as provided in section 810(a) and section 810(b), respectively, and the result annualized.

(4) The portion of the life insurance company taxable income described in

section 802(b) (1) and (2) (relating to taxable investment income and gain or loss from operations) shall be determined on an annual basis by treating the amounts ascertained under subparagraph (2) of this paragraph as the taxable investment income, and the amount ascertained under subparagraph (3) of this paragraph as the gain or loss from operations, for the taxable year.

(5) The portion of the life insurance company taxable income described in section 802(b) (1) and (2) for the short period shall be the amount which bears the same ratio to the amount ascertained under section 818(d) (2) and subparagraph (4) of this paragraph as the number of days in the short period bears to the number of days in the entire year.

(d) *Special rules.* (1) For purposes of determining the average earnings rate (as defined in section 805(b)(3)) for subsequent taxable years, the current earnings rate for the taxable year in which the short period occurs shall be the rate determined under paragraph (c)(2) of this section.

(2) For purposes of determining an operations loss deduction under section 812, the loss from operations for the short period shall be the loss from operations determined under paragraph (c)(5) of this section.

[T.D. 6558, 26 FR 2788, Apr. 4, 1961]

**§ 1.818-6 Transitional rule for change in method of accounting.**

(a) *In general.* Section 818(e) prescribes the rules to be followed in recomputing the taxes of a life insurance company for the taxable year 1957 in cases where the method of accounting required to be used in computing the company's taxes for 1958 under section 818(a) and paragraph (a) of § 1.818-2 is different from the method used in 1957.

(b) *Recomputation of 1957 taxes.* (1) For purposes of recomputing its taxes for 1957, a life insurance company must ascertain the net amount of those adjustments which are determined (as of the close of 1957) to be necessary solely by reason of the change to the method of accounting required by section 818(a) and paragraph (a) of § 1.818-2 in order to prevent amounts from being duplicated or omitted. Thus, for example, life in-

surance companies not on the accrual method of accounting for the year 1957 shall accrue, as of December 31, 1957, those items of gross investment income under section 803(b) and those items of deduction under section 803(c), as in effect for 1957, which would have been properly accruable for the year 1957 if the company had been on the accrual method of accounting.

(2) In the case of a change in the over-all method of accounting, the term "net amount of those adjustments" means the consolidation of adjustments (whether the amounts thereof represent increases or decreases in items of income or deductions) arising with respect to balances in the various accounts on December 31, 1957. In the case of a change in the treatment of a single material item, the amount of the adjustment shall be determined with reference only to the net dollar balances in that particular account.

(3)(i) The amount of the taxpayer's tax for 1957 shall be recomputed (under the law applicable to 1957, modified as provided in section 818(e) (4) and paragraph (e) of this section) by taking into account an amount equal to one-tenth of the net amount of the adjustments determined under subparagraph (1) of this paragraph. The increase or decrease in tax attributable to the adjustments for such year is the difference between the tax for such year computed with the allocation of one-tenth of the net amount of the adjustments to such taxable year over the tax computed without the allocation of any part of the adjustments to such year.

(ii) The amount of increase or decrease (as the case may be) referred to in section 818(e) (2) or (3) and paragraphs (c) or (d) of this section, shall be the amount of the increase or decrease in tax ascertained in the manner described in subdivision (i) of this subparagraph, multiplied by 10.

(c) *Treatment of decrease.* Section 818(e) (2) provides that for purposes of subtitle F of the Code, if the recomputation under paragraph (b) (3) (ii) of this section results in a decrease, the amount of such decrease shall be treated as a decrease in the tax imposed for 1957; except that for purposes of computing the period of limitation on the

making of refunds or the allowance of credits with respect to such overpayments, the amount of such decrease shall be treated as an overpayment of tax for 1959. No interest shall be paid, for any period before March 16, 1960, on any overpayment of the tax imposed for 1957 which is attributable to such decrease.

(d) *Treatment of increase*—(1) *In general.* Section 818(e) (3) (A) provides that for purposes of subtitle F of the Code, other than section 6016 (relating to declarations of estimated income tax by corporations) and section 6655 (relating to failure by corporations to pay estimated income tax), if the recomputation under paragraph (b) (3) (ii) of this section results in an increase, the amount of such increase shall be treated as a tax imposed for 1959. Such tax shall be payable in 10 equal annual installments, beginning with March 15, 1960.

(2) *Special rules.* Section 818(e) (3) (B) provides that for purposes of section 818(e) (3) (A) and subparagraph (1) of this paragraph:

(i) No interest shall be paid on any installment described in section 818(e) (3) (A) and subparagraph (1) of this paragraph before the time prescribed therein for the payment of such installment.

(ii) Section 6152(c) (relating to proration of deficiencies to installments) and the regulations thereunder shall apply. However, section 6152(a) (relating to the election to make installment payments) and the regulations thereunder shall not apply.

(iii) In applying section 6502(a) (1) (relating to collection after assessment) and the regulations thereunder, the assessment of any installment described in section 818(e) (3) (A) and subparagraph (1) of this paragraph shall be treated as made at the time prescribed therein for the payment of such installment.

(iv) If for any taxable year the taxpayer is not a life insurance company, the amount of the increase in tax (as determined under paragraph (b) (3) (ii) of this section), to the extent not taken into account for prior taxable years, shall be payable on the date the return for such taxable year is due (determined without regard to any exten-

sions of time for filing such return), unless such amount is required to be taken into account by the acquiring corporation under section 381(c) (22) and the regulations thereunder.

(e) *Modifications of 1957 tax computation.* Section 818(e) (4) provides that in recomputing the taxpayer's tax for 1957 for purposes of section 818(e) (1) and paragraph (b) of this section:

(1) Section 804(b), as in effect for 1957 (relating to the maximum reserve and other policy liability deduction), shall not apply with respect to any amount required to be taken into account by reason of section 818(e) (1) and paragraph (b) of this section; and

(2) The amount of the deduction allowed by section 805, as in effect for 1957 (relating to the special interest deduction), shall not be reduced by reason of any amount required to be taken into account under section 818(e) (1) and paragraph (b) of this section.

(f) *Illustration of principles.* The application of section 818(e) and this section may be illustrated by the following examples:

*Example 1.* For the taxable year 1957, the life insurance taxable income of M, a life insurance company, is \$200,000 computed on the cash receipts and disbursements method of accounting. The net amount of the adjustments required under section 818(e)(1) by reason of the change to the accrual method of accounting for 1958, increases M's life insurance taxable income for 1957 by \$50,000. The increase in tax attributable to the change in method of accounting required by section 818(a) is \$26,000, computed as follows:

(1) Life insurance taxable income before adjustments .....	\$200,000
(2) Adjustments required by sec. 818(e) (1) (1/10×\$50,000) .....	5,000
(3) Life insurance taxable income after adjustments (item (1) plus item (2)) .....	205,000
(4) Tax liability after adjustments (52%×\$205,000, minus \$5,500) .....	101,100
(5) Tax liability before adjustments (52%×\$200,000, minus \$5,500) .....	98,500
(6) Excess of item (4) over item (5) .....	2,600
(7) Increase in tax for purposes of sec. 818(e) (3) (item (6) multiplied by 10) .....	26,000

Under the provisions of section 818(e)(3), one-tenth of the increase in tax for 1957 attributable to the change in method of accounting required by section 818(a), \$2,600 (1/10×\$26,000), was due and payable on March 15, 1960, and the balance, \$23,400 (9/10×\$26,000), is due and payable in equal installments on March 15th of the nine succeeding taxable years. However, if for the taxable year 1965, M is no longer a life insurance company, and

## § 1.818-7

section 381(c)(22) does not apply, the balance of the installments not paid in prior taxable years, \$10,400 (4/10×\$26,000), shall be due and payable on March 15, 1966.

*Example 2.* Assume the facts are the same as in example 1, except that the net amount of the adjustments required by section 818(e)(1) decreases M's life insurance taxable income for 1957 by \$25,000. The decrease in tax attributable to the change in method of accounting required by section 818(a) is \$13,000, computed as follows:

(1) Life insurance taxable income before adjustments .....	\$200,000
(2) Adjustments required by sec. 818(e) (1) (1/10×\$25,000) .....	2,500
(3) Life insurance taxable income after adjustments (item (1) minus item (2)) .....	197,500
(4) Tax liability after adjustments (52%×\$197,500, minus \$5,500) .....	97,200
(5) Tax liability before adjustments (52%×\$200,000, minus \$5,500) .....	98,500
(6) Excess of item (5) over item (4) .....	1,300
(7) Decrease in tax for purposes of sec. 818(e)(2) (item (6) multiplied by 10) .....	13,000

Under the provisions of section 818(e)(2), the entire \$13,000 decrease in tax for 1957 attributable to the change in method of accounting required by section 818(a) shall be treated as an overpayment of tax for the taxable year 1959.

[T.D. 6558, 26 FR 2789, Apr. 4, 1961]

## § 1.818-7 Denial of double deductions.

Section 818(f) provides that the same item may not be deducted more than once under subpart B, part I, subchapter L, chapter 1 of the Code (relating to the determination of taxable investment income), and more than once under subpart C, part I, subchapter L, chapter 1 of the Code (relating to the determination of gain or loss from operations).

[T.D. 6558, 26 FR 2790, Apr. 4, 1961]

## § 1.818-8 Special rules relating to consolidated returns and certain capital losses.

Section 818(g) provides that, in the case of a life insurance company filing or required to file a consolidated return under section 1501 for a taxable year, the computations of the policyholders' share of investment yield under subparts B and C, part I, subchapter L, chapter 1 of the Code (including all determinations and computations incident thereto) shall be made as if such company were not filing a consolidated return. Thus, for example, if X and Y are life insurance companies which are entitled to file a

## 26 CFR Ch. I (4-1-14 Edition)

consolidated return for 1975 and X has paid dividends to Y during such taxable year, Y must include such dividends in the computation of gross investment income under section 804(b). For other rules relating to the filing of consolidated returns, see sections 1501 through 1504 and the regulations thereunder.

[T.D. 7469, 42 FR 12181, Mar. 3, 1977]

## § 1.819-1 Taxable years affected.

Section 1.819-2 is applicable only to taxable years beginning after December 31, 1957, and all references to sections of part I, subchapter L, chapter 1 of the Code, are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 112).

[T.D. 6558, 26 FR 2791, Apr. 4, 1961]

## § 1.819-2 Foreign life insurance companies.

(a) *Carrying on United States insurance business.* Section 819(a) provides that a foreign life insurance company carrying on a life insurance business within the United States, if with respect to its United States business it would qualify as a life insurance company under section 801, shall be taxable on its United States business under section 802 in the same manner as a domestic life insurance company. Thus, the life insurance company taxable income of such a foreign life insurance company shall not be determined in the manner provided by part I, subchapter N, chapter 1 of the Code (relating to determination of sources of income), but shall be determined in the manner provided by part I, subchapter L, chapter 1 of the Code (relating to life insurance companies). See section 842. Accordingly, in determining its life insurance company taxable income from its United States business, such a foreign life insurance company shall take into account the appropriate items of income irrespective of whether such items of income are from sources within or without the United States. A foreign life insurance company shall take into account the appropriate items of expenses, losses, and other deductions properly allocable to such items of income from its United

States business. To the extent not inconsistent with the provisions of this paragraph, section 818(a), and section 819(b), all computations entering into the determination of taxes imposed by part I shall be made in a manner consistent with the manner required for purposes of the annual statement approved by the National Association of Insurance Commissioners.

(b) *Adjustment where surplus held in the United States is less than specified minimum*—(1) *In general.* Section 819(b)(1) provides that if the minimum figure for the taxable year determined under section 819(b)(2) and subparagraph (2)(i) of this paragraph exceeds the surplus held in the United States as of the end of the taxable year (as defined in section 819(b)(2)(B) and subparagraph (2)(ii) of this paragraph) by a foreign life insurance company carrying on a life insurance business within the United States and taxable under section 802, then:

(i) The amount of the policy and other contract liability requirements (determined under section 805 and § 1.805-4 without regard to this subparagraph), and

(ii) The amount of the required interest (determined under section 809(a)(2) and paragraph (d) of § 1.809-2 without regard to this subparagraph),

shall each be reduced by an amount determined by multiplying such excess by the current earnings rate (as defined in section 805(b)(2) and paragraph (a)(2) of § 1.805-5) of such company. Such current earnings rate shall be determined by reference to the assets held by the company in the United States.

(2) *Definitions.* For purposes of section 819(b)(1) and subparagraph (1) of this paragraph:

(i) The term *minimum figure*, in the case of a taxable year beginning after December 31, 1957, but before January 1, 1959, means the amount obtained by multiplying the company's total insurance liabilities on United States business by 9 percent. In the case of any taxable year beginning after December 31, 1958, such term means the amount obtained by multiplying the company's total insurance liabilities on United States business by the percentage determined and proclaimed by the Sec-

retary as being applicable for such year.

(ii) The term *surplus held in the United States* means the excess of the assets held in the United States (as of the end of the taxable year) over the total insurance liabilities on United States business (as of the end of the taxable year).

(iii) The term *total insurance liabilities* means the sum of the total reserves (as defined in section 801(c) and paragraph (a) of § 1.801-5) as of the end of the taxable year plus (to the extent not included in total reserves) the items referred to in section 810(c) (3), (4), and (5) of paragraph (b) (3), (4), and (5) of § 1.810-2 as of the end of the taxable year; and

(iv) The term *assets* shall have the same meaning as that contained in section 805(b)(4) and paragraph (a)(4) of § 1.805-5.

(3) *Illustration of principles.* The provisions of section 819(b) and this paragraph may be illustrated by the following example:

*Example.* For the taxable year 1958, P, a foreign life insurance company carrying on a life insurance business within the United States and taxable under section 802, has total insurance liabilities on United States business (as of the end of the taxable year) of \$940,000, assets held in the United States of \$1,000,000 (as of the end of the taxable year), policy and other contract liability requirements in the amount of \$30,000 required interest in the amount of \$20,000, and a current earnings rate of 4 percent. In order to determine whether section 819(b) applies for the taxable year 1958, P must first compute its minimum figure, for if the minimum figure is less than the surplus held in the United States (as of the end of the taxable year), no section 819(b) adjustments need be made. Since the minimum figure, \$84,600 (\$940,000, the total insurance liabilities on United States business multiplied by 9 percent, the percentage applicable for 1958), exceeds the surplus held in the United States, \$60,000 (the excess of the assets held in the United States, \$1,000,000, over the total insurance liabilities on United States business, \$940,000), by \$24,600, section 819(b) applies for the taxable year 1958. Thus, the amount of the policy and other contract liability requirements, \$30,000, and the amount of the required interest, \$20,000, shall each be reduced by \$984 (\$24,600, the amount of such excess, multiplied by 4 percent, the current earnings rate).

(4) *Segregated asset accounts.* For taxable years beginning after December 31, 1967, pursuant to the provisions of section 801(g):

(i) A foreign corporation carrying on a life insurance business which issues contracts based on segregated asset accounts shall separately compute in a manner consistent with this subparagraph the adjustment (if any) under section 819 to the amount of policy and other contract liability requirements and the amount of required interest properly attributable to each of such segregated asset accounts. The “minimum figure” used in section 819 in making the adjustment with respect to each of the segregated asset accounts shall be computed as provided in subdivision (ii) of this subparagraph in lieu of the manner provided in subparagraphs (1), (2), and (3) of this paragraph.

(ii) The minimum figure applicable to a segregated asset account referred to in subdivision (i) of this subparagraph is the amount determined by multiplying the total insurance liabilities on U.S. business attributable to such a segregated asset account, by 1 percent.

(iii) The minimum figure as computed under subdivision (ii) of this subparagraph shall be compared only with the surplus held in the United States attributable to each segregated asset account referred to in subdivision (i) of this subparagraph. Such surplus is the excess of assets held in the United States properly attributable to such segregated asset account over the total insurance liabilities on U.S. business properly attributable to such account.

(iv) If the minimum figure applicable to accounts other than segregated asset accounts exceeds the surplus held in the United States attributable to such other accounts, for purposes of section 819 and this paragraph, the amount of such excess shall not exceed the company’s overall excess, as defined in this subdivision. No adjustment under section 819 or this paragraph shall be made with respect to any account if there is no such overall excess. For purposes of this subdivision and of subdivision (v) of this subparagraph, the term “overall excess” means the amount, if any, by which the aggregate

minimum figures applicable to segregated asset accounts plus the minimum figure applicable to accounts other than segregated asset accounts exceeds the surplus held in the United States with respect to the company’s entire U.S. life insurance business, including segregated asset accounts as well as other accounts.

(v) In the case of a company which issues contracts based on one or more than one segregated asset account, if the minimum figure applicable to a segregated asset account exceeds the surplus held in the United States attributable to such account, then for purposes of section 819 and this paragraph, the amount of such excess shall not exceed the account limitation figure, as defined in this subdivision. Therefore, no adjustment under section 819 or under this subparagraph shall be made with respect to any segregated asset account if the aggregate of the account limitation figures is zero, but nothing in this subdivision shall preclude an adjustment under section 819 with respect to accounts other than segregated asset accounts. For purposes of this subdivision, the term “account limitation figure” is a segregated assets account’s proportionate share of the aggregate of the account limitation figures. Such aggregate of the account limitation figures is equal to the lesser of either the company’s overall excess as defined in subdivision (iv) of this subparagraph, or the amount, if any, by which the aggregate of the minimum figures applicable to segregated asset accounts exceeds the surplus held in the United States with respect to all such segregated asset accounts. For purposes of this subdivision, a segregated asset account’s proportionate share of the aggregate of the account limitation figures is determined by multiplying the amount of such aggregate of account limitation figures by a percentage, the numerator of which is the amount by which the minimum figure applicable to such account exceeds the surplus held in the United States attributable to such account, and the denominator of which is the aggregate of the amounts by which the minimum figure applicable to each segregated asset account exceeds the

## Internal Revenue Service, Treasury

## § 1.819-2

surplus held in the United States attributable to such account.

(vi) Subdivisions (i), (ii), (iii), (iv), and (v) of this subparagraph may be illustrated by the following examples:

*Example 1.* (a) For the taxable year 1968, T, a foreign life insurance company carrying on a life insurance business within the United States and taxable under section 802, has the following assets and total insurance liabilities with respect to such U.S. business:

	Regular account	Separate account A	Separate account B
Assets .....	\$9,300,000	\$1,810,000	\$515,000
Total insurance liabilities .....	8,000,000	1,800,000	500,000

It is further assumed that the percentage determined and proclaimed by the Secretary under section 819(a)(2)(A) for the taxable year 1968 is 15 percent.

(b) In order to determine whether any adjustment under section 819 must be made, T must compute the minimum figure applicable to its Regular Account as well as each of its Separate Accounts. The minimum figure for the Regular Account is \$1,200,000 (15 percent of \$8,000,000). The minimum figure applicable to Separate Account A is \$18,000 (1 percent of \$1,800,000). The minimum figure applicable to Separate Account B is \$5,000 (1 percent of \$500,000). The aggregate of the minimum figures is \$1,223,000 (\$1,200,000+\$18,000+\$5,000). The surplus held in the United States with respect to the Regular Account is \$1,300,000 (\$9,300,000-\$8,000,000), with respect to Separate Account A is \$10,000 (\$1,810,000-\$1,800,000) and with respect to Separate Account B is \$15,000 (\$515,000-\$500,000). The surplus held in the United States with respect to T's entire U.S. life insurance business is \$1,325,000 (\$1,300,000+\$10,000+\$15,000).

(c) Since the aggregate of the minimum figures (\$1,223,000) does not exceed the surplus held in the United States attributable to T's entire U.S. life insurance business (\$1,325,000), under subdivision (iv) of this subparagraph no adjustment under section 819 shall be made with respect to the Regular Account or either of the Separate Accounts.

*Example 2.* (a) The facts are the same as in example 1 except that the assets held in the United States with respect to the Regular Account is \$8,300,000 instead of \$9,300,000. Thus, the surplus held in the United States with respect to the Regular Account is \$300,000 (\$8,300,000-\$8,000,000), and the surplus held in the United States with respect to T's entire U.S. life insurance business is \$325,000 (\$300,000+\$10,000+\$15,000).

(b) Since the aggregate of the minimum figures with respect to the Separate Ac-

counts, \$23,000 (\$18,000+\$5,000), does not exceed the surplus held in the United States with respect to both of such Separate Accounts, \$25,000 (\$10,000+\$15,000), under subdivision (v) of this subparagraph, no adjustment under section 819 must be made with respect to either of the Separate Accounts.

(c) The excess of the minimum figure for the Regular Account (\$1,200,000) over the surplus held in the United States with respect to the Regular Account (\$300,000) is equal to \$900,000 (\$1,200,000-\$300,000). However, the company's overall excess as defined in subdivision (iv) of this subparagraph, is \$898,000 (\$1,223,000-\$325,000). Under subdivision (iv) of this subparagraph the excess with respect to the Regular Account (\$900,000) is limited to the amount of overall excess (\$898,000). Thus, the amount of policy and other contract liability requirements with respect to T's Regular Account and the amount of required interest with respect to T's Regular Account (both computed without regard to section 819) shall each be reduced by an amount equal to the product of \$898,000 and the current earnings rate computed only with respect to T's Regular Account.

(c) *Distributions to shareholders*—(1) *In general.* In the case of a foreign life insurance company carrying on a life insurance business within the United States and taxable under section 802, section 819(c)(1) provides alternative methods for determining the amount of distributions to shareholders for purposes of section 815 (relating to distributions to shareholders) and section 802(b)(3) (relating to life insurance company taxable income). Such a foreign life insurance company may elect (in the manner provided by subparagraph (4) of this paragraph) for each taxable year whichever of the alternative methods provided by section 819(c)(1) and this subparagraph it desires, and the method elected for any one taxable year shall be effective only with respect to the taxable year for which the election is made. Such alternative methods are:

(i) The amount of the distributions to shareholders shall be the amount determined by multiplying the total amount of distributions to shareholders by the percentage which the minimum figure for the taxable year is of the excess of the assets of the company over the total insurance liabilities; or

(ii) The amount of the distributions for shareholders shall be the amount determined by multiplying the total

amount of distributions for shareholders by the percentage which the total insurance liabilities on United States business for the taxable year is of the total insurance liabilities of the company.

(2) *Definitions.* For purposes of section 819(c)(1) and subparagraph (1) of this paragraph:

(i) The term *total amount of the distributions to shareholders* means all distributions (within the meaning of section 815 and § 1.815-2) by a foreign life insurance company to all of its shareholders whether or not in the United States;

(ii) The term *minimum figure for the taxable year* means the amount determined under section 819(b)(2)(A) and paragraph (b)(2) of this section;

(iii) The term *assets of the company* means all of the assets (as defined in section 805(b) (4) and paragraph (a) (4) of § 1.805-5) of the foreign life insurance company whether or not in the United States (as of the end of the taxable year); and

(iv) The term *total insurance liabilities of the company* means the total insurance liabilities (as defined in section 819(b)(2) and paragraph (b)(2) of this section) on all of its business whether or not in the United States (as of the end of the taxable year).

(3) *Illustration of principles.* The provisions of section 819(c)(1) and subparagraphs (1) and (2) of this paragraph may be illustrated by the following examples:

*Example 1.* For the taxable year 1958, T, a foreign life insurance company carrying on a life insurance business within the United States and taxable under section 802, has a minimum figure of \$40,000, total amount of distributions to all shareholders (within the meaning of section 815) of \$5,000, assets (as of the end of the year) of \$500,000, total insurance liabilities (as of the end of the year) of \$450,000, and total insurance liabilities on United States business (as of the end of the year) of \$180,000. Based upon these facts, if T elects the method provided in section 819(c)(1)(A) and subparagraph (1)(i) of this paragraph, the amount of T's distributions to shareholders for the taxable year 1958 is \$4,000, that is, \$5,000 (the total amount of distributions to shareholders) multiplied by 80 percent (the percentage which the minimum figure for the taxable year, \$40,000, is of \$50,000, the excess of the assets of the com-

pany (\$500,000) over the total insurance liabilities (\$450,000)).

*Example 2.* The facts are the same as in example 1, except that for the taxable year 1958, T elects the method provided in section 819(c)(1)(B) and subparagraph (1)(ii) of this paragraph. Based upon these facts, the amount of T's distributions to shareholders for the taxable year 1958 is \$2,000, that is, \$5,000 (the total amount of distributions to shareholders) multiplied by 40 percent (the percentage which the total insurance liabilities on United States business (\$180,000) is of the total insurance liabilities of the company (\$450,000)).

(4) *Manner and effect of election.* (i) The election provided by section 819(c)(1) shall be made in a statement attached to the foreign life insurance company's income tax return for any taxable year for which the company desires the election to apply. The return and statement must be filed not later than the date prescribed by law (including extensions thereof) for filing the return for such taxable year. The statement shall indicate the method elected, the name and address of the taxpayer, and shall be signed by the taxpayer (or his duly authorized representative).

(ii) An election made under section 819(c)(1) and this paragraph shall be effective only with respect to the taxable year for which the election is made. Thus, the company must make a new election for each taxable year for which it desires the election to apply. Once such election has been made for any taxable year it may not be revoked. However, for taxable years beginning prior to April 4, 1961, a company may revoke the election provided by section 819(c)(1) without obtaining consent from the Commissioner by filing, before July 4, 1961, a statement that the company desires to revoke such election. An amended return reflecting such revocation and the selection of the other percentage must accompany the statement for all taxable years for which returns have been filed with respect to such election.

(5) *Application of section 815.* Once the amount of distributions to shareholders is determined under the provisions of section 819(c)(1) and this paragraph, the rules of section 815 (relating to distributions to shareholders) shall

apply to the shareholders surplus account and the policyholders surplus account of a foreign stock life insurance company in the same manner as they would apply to a domestic stock life insurance company.

(d) *Distributions pursuant to certain mutualizations.* Section 819(c)(2) provides that for purposes of applying section 815(e) and paragraph (e) of § 1.815-6 (relating to a special rule for certain mutualizations) in the case of a foreign life insurance company subject to tax under section 802:

(1) The paid-in capital and paid-in surplus referred to in section 815(e)(1)(A) of a foreign life insurance company is the portion of such capital and surplus determined by multiplying such amounts by the percentage selected for the taxable year under section 819(c)(1) and paragraph (c)(1) of this section; and

(2) The excess referred to in section 815(e)(2)(A)(i) (without the adjustment provided by section 815(e)(2)(B)), is whichever of the following is the greater:

(i) The minimum figure for 1958 determined under section 819(b)(2)(A); or

(ii) The surplus held in the United States (as defined in section 819(b)(2)(B)) determined as of December 31, 1958.

(e) *No United States insurance business.* Foreign life insurance companies not carrying on an insurance business within the United States shall not be taxable under part I, subchapter L, chapter 1 of the Code, but shall be taxable as other foreign corporations. See section 881 and the regulations thereunder.

[T.D. 6558, 26 FR 2791, Apr. 4, 1961; 26 FR 3276, Apr. 18, 1961, as amended by T.D. 6970, 33 FR 12044, Aug. 24, 1968]

EDITORIAL NOTE: For a determination with respect to the percentage to be used by foreign life insurance companies in computing income tax for the taxable year 1984 and the estimated tax for taxable year 1985, see 51 FR 883, Jan. 9, 1986.

MUTUAL INSURANCE COMPANIES (OTHER THAN LIFE AND CERTAIN MARINE INSURANCE COMPANIES AND OTHER THAN FIRE OR FLOOD INSURANCE COMPANIES WHICH OPERATE ON BASIS OF PERPETUAL POLICIES OR PREMIUM DEPOSITS)

**§ 1.821-1 Tax on mutual insurance companies other than life or marine or fire insurance companies subject to the tax imposed by section 831.**

(a) *In general.* (1) For taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954, all mutual insurance companies, including foreign insurance companies carrying on an insurance business within the United States, not taxable under section 801 or 831 and not specifically exempt under the provisions of section 501(c)(15), are subject to the tax imposed by section 821 on their investment income or on their gross income, whichever tax is the greater, except interinsurers and reciprocal underwriters which are taxed only on their investment income. For the alternative tax, in lieu of the tax imposed by section 821 (a) or (b), where the net long-term capital gain for any taxable year exceeds the net short-term capital loss, see section 1201(a) and the regulations thereunder.

(2) The taxable income of mutual insurance companies subject to the tax imposed by section 821 differs from the taxable income of other corporations. See section 821(a)(2) and section 822. Such companies are entitled, in computing mutual insurance company taxable income, to the deductions provided in part VIII (section 241 and following, except section 248), subchapter B, chapter 1 of the Code. The gross amount of income during the taxable year from interest, the deduction under section 822(c)(1) for wholly tax-exempt interest, and the deduction under section 242 for partially tax-exempt interest, are decreased by the appropriate amortization of premium and increased by the appropriate accrual of discount attributable to the taxable year on bonds, notes, debentures or other evidences of indebtedness held by a mutual insurance company subject to the tax imposed by section 821. See section 822(d)(2) and § 1.822-3.

(3) All provisions of the Code and of the regulations in this part not inconsistent with the specific provisions of section 821 are applicable to the assessment and collection of the tax imposed by section 821 (a) or (b) and mutual insurance companies subject to the tax imposed by section 821 are subject to the same penalties as are provided in the case of returns and payment of income tax by other corporations. The return shall be on Form 1120M.

(4) Foreign mutual insurance companies not carrying on an insurance business within the United States are not taxable under section 821 (a) or (b), but are taxable as other foreign corporations. See section 881.

(5) Mutual insurance companies subject to the tax imposed by section 821, except interinsurers or reciprocal underwriters, with mutual insurance company taxable income (computed without regard to the deduction provided in section 242 for partially tax-exempt interest) of over \$3,000 or with gross amounts of income from interest, dividends, rents, and net premiums (minus dividends to policyholders and wholly tax-exempt interest) in excess of \$75,000, are subject to a tax computed under section 821(a)(1) or section 821(a)(2) whichever is the greater. Interinsurers and reciprocal underwriters with mutual insurance company taxable income (computed without regard to the deduction provided in section 242 for partially tax-exempt interest) of over \$50,000 are subject to a tax computed under section 821(b).

(b) *Rates of tax.* (1) The normal tax under section 821(a)(1)(A) and 821(b)(1), except as hereinafter indicated, is computed upon mutual insurance company taxable income for purposes of the normal tax at the rate of 30 percent.

(2) The surtax under section 821(a)(1)(B) and 821(b)(2), except as hereinafter indicated, is computed on that portion of the mutual insurance company taxable income for purposes of the surtax in excess of \$25,000 at the rate of 22 percent. The tax under section 821(a)(2), except as hereinafter indicated, is 1 percent of the gross amount of income from interest, dividends, rents, and net premiums, minus dividends to policyholders and minus wholly tax-exempt interest.

(3) Under section 821(a)(1)(A) companies with mutual insurance company taxable income for purposes of the normal tax of over \$3,000 and not over \$6,000 pay a normal tax, at a specified rate, on that portion of such income in excess of \$3,000. The rate applicable in computing the normal tax of such companies is 60 percent. Under section 821(a)(2) companies with gross amounts of income from interest dividends, rents, and net premiums, minus dividends to policyholders and minus wholly tax-exempt interest, of over \$75,000 and not over \$150,000 pay a tax equal to 2 percent of that portion in excess of \$75,000.

(4) Under section 821(b)(1) interinsurers and reciprocal underwriters with mutual insurance company taxable income for purposes of the normal tax of over \$50,000 and not over \$100,000 pay a normal tax computed on that portion of such income in excess of \$50,000 at the rate of 60 percent. Under section 821(b)(2) interinsurers and reciprocal underwriters with mutual insurance company taxable income for purposes of the surtax of over \$50,000 and not over \$100,000 pay a surtax, at the rate of 33 percent, on that portion of such income in excess of \$50,000.

(5) Section 821(c) provides for an adjustment of the amount computed under section 821(a)(1), section 821(a)(2), and section 821(b) where the gross amount received during the taxable year from interest, dividends, rents, and premiums (including deposits and assessments) is over \$75,000 and less than \$125,000. The adjustment reduces the tax otherwise computed under those sections to an amount which bears the same proportion to such tax as the excess over \$75,000 bears to \$50,000.

(c) *Application.* The application of section 821 (a) to (c) inclusive, may be illustrated by the following examples:

*Example 1.* The W Company, a mutual casualty insurance company, for the calendar year 1954, has mutual insurance company taxable income for purposes of the surtax of \$5,500 and, due to partially tax-exempt interest of \$800, has income for purposes of the normal tax of \$4,700. The gross amount of income of the W Company from interest, dividends, rents and net premiums, minus dividends to policyholders and wholly tax-exempt interest, is \$150,000. Its normal tax

under section 821(a)(1) for the calendar year 1954 is 60 percent of \$1,700 (\$4,700 minus \$3,000) or \$1,020, since its income subject to normal tax is not over \$6,000. It is not liable for surtax for the calendar year 1954 as its mutual insurance company taxable income for purposes of the surtax does not exceed \$25,000. It has no surtax and, therefore, its total tax under section 821(a)(1)(A) is the normal tax of \$1,020. The tax under section 821(a)(2) is 2 percent of \$75,000 (\$150,000 - \$75,000), or \$1,500. Since the tax under section 821(a)(2) exceeds the tax under section 821(a)(1), the tax under section 821 is \$1,500, namely, that imposed by section 821(a)(2).

*Example 2.* If in example 1 the income for purposes of the normal tax were not over \$3,000, the income for purposes of the surtax were not over \$25,000, the gross amount received from interest, dividends, rents, and premiums (including deposits and assessments) were \$90,000, and the gross amount of income from interest, dividends, rents, and net premiums, minus dividends to policyholders and wholly tax-exempt interest, were \$70,000, the W Company would be required to file an income tax return but due to section 821(a) no income tax would be imposed.

*Example 3.* The X Company, a mutual casualty insurance company, for the calendar year 1954 has mutual insurance company taxable income for surtax purposes of \$28,000 and, due to partially tax-exempt interest of \$5,000, has income for normal tax purposes of \$23,000. The gross amount of income of the X Company from interest, dividends, rents, and net premiums, minus dividends to policyholders and wholly tax-exempt interest, is \$1,200,000. Under section 821(a)(1) its normal tax for the calendar year 1954 is 30 percent of \$23,000, or \$6,900, and the surtax is 22 percent of \$3,000 (\$28,000 - \$25,000), or \$660. The combined tax under section 821(a)(1) is \$7,560 (\$6,900 plus \$660). The tax under section 821(a)(2) is 1 percent of \$1,200,000, or \$12,000. Since the tax under section 821(a)(2) exceeds the tax under section 821(a)(1), the tax under section 821(a) is \$12,000, namely, that imposed by section 821(a)(2).

*Example 4.* The Y Company, a mutual fire insurance company subject to the tax imposed by section 821 for the calendar year 1954, has mutual insurance company taxable income for purposes of the surtax of \$35,000 and, due to partially tax-exempt interest of \$5,000, has income for purposes of the normal tax of \$30,000. The gross amount received from interest, dividends, rents and premiums (including deposits and assessments) is \$120,000, and the gross amount of income from interest, dividends, rents, and net premiums, minus dividends to policyholders and wholly tax-exempt interest, is \$100,000. Under section 821(a)(1), without application of section 821(c), the normal tax would be 30 percent of \$30,000, or \$9,000, since this is less

than \$16,200, 60 percent of \$27,000 (excess of \$30,000 over \$3,000); and the surtax would be 22 percent of \$10,000 (excess of \$35,000 over \$25,000), or \$2,200. The combined tax of \$11,200 (\$9,000 plus \$2,200) would then be reduced by applying section 821(c), since the gross receipts are between \$75,000 and \$125,000. The tax under section 821(a)(1), as thus adjusted, would be 90 percent of \$11,200, or \$10,080, since \$45,000 (excess of \$120,000 over \$75,000) is 90 percent of \$50,000. Under section 821(a)(2), without reference to section 821(c), the tax is 2 percent of \$25,000 (excess of \$100,000 over \$75,000), or \$500, since this is less than \$1,000, 1 percent of \$100,000. Applying section 821(c) reduces this to \$450, or 90 percent of \$500. Since \$10,080, the tax under section 821(a)(1), as adjusted, exceeds \$450, the tax under section 821(a)(2), as adjusted, the tax under section 821(a)(1), as adjusted, is applicable. The Y Company would accordingly pay a combined normal taxing and surtax of \$10,080.

*Example 5.* The Z Exchange, an insurer, for the calendar year 1954 has mutual insurance company taxable income for purposes of the surtax of \$60,000 and, due to partially tax-exempt interest of \$12,000, has income for purposes of the normal tax of \$48,000. The gross amount received from interest, dividends, rents, and premiums (including deposits and assessments) is \$2,700,000. The Z Exchange is not liable for normal tax under section 821(b)(1) for the calendar year 1954 as its mutual insurance company taxable income for purposes of the normal tax does not exceed \$50,000. Its surtax is 33 percent of \$10,000 (\$60,000 minus \$50,000), or \$3,300, since that amount is less than \$7,700, 22 percent of \$35,000 (excess of \$60,000 over \$25,000). Since the Z Exchange has no normal tax, is not subject to the tax imposed by section 821(a)(2), and is not entitled to the adjustment provided in section 821(c), its total tax under section 821(a) is \$3,300.

#### § 1.821-2 Taxable years affected.

Section 1.821-1 is applicable only to taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954, and all references to sections of part II, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, before amendments. Section 1.821-3 is applicable only to taxable years beginning after December 31, 1954, but before January 1, 1963, and all references to sections of part II, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Tax Act for 1955 (70 Stat. 36). Sections 1.821-4 and 1.821-5 are applicable only to taxable years beginning after December 31,

1962, and all references to sections of parts II and III, subchapter L, chapter 1 of the Code are to sections of the Internal Revenue Code of 1954 as amended by section 8 of the Revenue Act of 1962 (76 Stat. 989).

[T.D. 6681, 28 FR 11110, Oct. 17, 1963]

**§ 1.821-3 Tax on mutual insurance companies other than life or marine or fire insurance companies subject to the tax imposed by section 831.**

(a) *In general.* (1) For taxable years beginning after December 31, 1954, all mutual insurance companies, including foreign insurance companies carrying on an insurance business within the United States, not taxable under section 802 or 831 and not specifically exempt under the provisions of section 501(c)(15), are subject to the tax imposed by section 821 on their investment income or on their gross income, whichever tax is the greater, except interinsurers and reciprocal underwriters which are taxed only on their investment income. For the alternative tax, in lieu of the tax imposed by section 821 (a) or (b), where the net long-term capital gain for any taxable year exceeds the net short-term capital loss, see section 1201(a) and the regulations thereunder.

(2) The taxable income of mutual insurance companies subject to the tax imposed by section 821 differs from the taxable income of other corporations. See section 821(a)(2) and section 822. Such companies are entitled, in computing mutual insurance company taxable income, to the deductions provided in part VIII (section 241 and following, except section 248), subchapter B, chapter 1 of the Code. The gross amount of income during the taxable year from interest, the deduction under section 822(c)(1) for wholly tax-exempt interest, and the deduction under section 242 for partially tax-exempt interest, are decreased by the appropriate amortization of premium and increased by the appropriate accrual of discount attributable to the taxable year on bonds, notes, debentures or other evidences of indebtedness held by a mutual insurance company subject to the tax imposed by section 821. See section 822(d)(2) and § 1.822-7. However, for taxable years beginning after May 31, 1960,

only the accrual of discount relating to issue discount will increase the deduction for wholly tax-exempt interest. See section 103. In the case of any such evidence of indebtedness, adjustment shall be made to basis in the same manner as that made by life insurance companies under section 1016(a)(17) and the regulations thereunder.

(3) All provisions of the Internal Revenue Code and of the regulations in this part not inconsistent with the specific provisions of section 821 are applicable to the assessment and collection of the tax imposed by section 821 (a) or (b) and mutual insurance companies subject to the tax imposed by section 821 are subject to the same penalties as are provided in the case of returns and payment of income tax by other corporations. The return shall be on Form 1120M.

(4) Foreign mutual insurance companies not carrying on an insurance business within the United States are not taxable under section 821 (a) or (b), but are taxable as other foreign corporations. See section 881.

(5) Mutual insurance companies subject to the tax imposed by section 821, except interinsurers or reciprocal underwriters, with mutual insurance company taxable income (computed without regard to the deduction provided in section 242 for partially tax-exempt interest) of over \$3,000 or with gross amounts of income during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums (minus dividends to policyholders and wholly tax-exempt interest) in excess of \$75,000, are subject to a tax computed under section 821(a)(1) or section 821(a)(2) whichever is the greater. Interinsurers and reciprocal underwriters with mutual insurance company taxable income (computed without regard to the deduction provided in section 242 for partially tax-exempt interest) of over \$50,000 are subject to a tax computed under section 821(b).

(b) *Rates of tax.* (1) For taxable years beginning before July 1, 1963, the normal tax under section 821(a)(1)(A) and

821(b)(1), except as hereinafter indicated, is computed upon mutual insurance company taxable income for purposes of the normal tax at the rate of 30 percent.

(2) The surtax under section 821(a)(1)(B) and 821(b)(2), except as hereinafter indicated, is computed on that portion of the mutual insurance company taxable income for the purposes of the surtax in excess of \$25,000 at the rate of 22 percent. The tax under section 821(a)(2), except as hereinafter indicated, is 1 percent of the gross amount of income during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums, minus dividends to policyholders and minus wholly tax-exempt interest.

(3) For taxable years beginning before July 1, 1963, under section 821(a)(1)(A) companies with mutual insurance company taxable income for purposes of the normal tax of over \$3,000 and not over \$6,000 pay a normal tax, at a specified rate, on that portion of such income in excess of \$3,000. The rate applicable in computing the normal tax of such companies is 60 percent. Under section 821(a)(2) companies with gross amounts of income during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums, minus dividends to policyholders and minus wholly tax-exempt interest, of over \$75,000 and not over \$150,000 pay a tax equal to 2 percent of that portion in excess of \$75,000.

(4) For taxable years beginning before July 1, 1963, under section 821(b)(1) interinsurers and reciprocal underwriters with mutual insurance company taxable income for purposes of the normal tax of over \$50,000 and not over \$100,000 pay a normal tax computed on that portion of such income in excess of \$50,000 at the rate of 60 percent. Under section 821(b)(2) interinsurers and reciprocal underwriters with mutual insurance company taxable income for purposes of the surtax of over \$50,000 and not over \$100,000 pay a surtax, at the rate of 33 percent, on that portion of such income in excess of \$50,000.

(5) Section 821(c) provides for an adjustment of the amount computed

under section 821(a)(1), section 821(a)(2), and section 821(b) where the gross amount received during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) is over \$75,000 and less than \$125,000. The adjustment reduces the tax otherwise computed under those sections to an amount which bears the same proportion to such tax as the excess over \$75,000 bears to \$50,000.

(c) *Application.* The application of section 821 (a) to (c) inclusive, may be illustrated by the following examples:

*Example 1.* The W Company, a mutual casualty insurance company, for the calendar year 1958, has mutual insurance company taxable income for purposes of the surtax of \$5,500 and, due to partially tax-exempt interest of \$800, has income for purposes of the normal tax of \$4,700. The gross amount of income of the W Company from the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums, minus dividends to policyholders and wholly tax-exempt interest, is \$150,000. Its normal tax under section 821(a)(1) for the calendar year 1958 is 60 percent of \$1,700 (\$4,700 minus \$3,000) or \$1,020, since its income subject to normal tax is not over \$6,000. It is not liable for surtax for the calendar year 1958 as its mutual insurance company taxable income for purposes of the surtax does not exceed \$25,000. It has no surtax and, therefore, its total tax under section 821(a)(1)(A) is the normal tax of \$1,020. The tax under section 821(a)(2) is 2 percent of \$75,000 (\$150,000 - \$75,000), or \$1,500. Since the tax under section 821(a)(2) exceeds the tax under section 821(a)(1), the tax under section 821 is \$1,500, namely, that imposed by section 821(a)(2).

*Example 2.* If in the above example the income for purposes of the normal tax were not over \$3,000, the income for purposes of the surtax were not over \$25,000, the gross amount received from interest, dividends, rents, and premiums (including deposits and assessments) were \$90,000, and the gross amount of income from the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums, minus dividends to policyholders and wholly tax-exempt interest were \$70,000, the W Company would be required to file an income tax return but due to section 821(a) no income tax would be imposed.

*Example 3.* The X Company, a mutual casualty insurance company, for the calendar year 1958, has mutual insurance company taxable income for surtax purposes of \$28,000 and, due to partially tax-exempt interest of \$5,000, has income for normal tax purposes of

## § 1.821-4

## 26 CFR Ch. I (4-1-14 Edition)

\$23,000. The gross amount of income of the X Company received during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums, minus dividends to policyholders and wholly tax-exempt interest, is \$1,200,000. Under section 821(a)(1) its normal tax for the calendar year 1958 is 30 percent of \$23,000, or \$6,900, and the surtax is 22 percent of \$3,000 (\$28,000—\$25,000), or \$660. The combined tax under section 821(a)(1) is \$7,560 (\$6,900 plus \$660). The tax under section 821(a)(2) is 1 percent of \$1,200,000, or \$12,000. Since the tax under section 821(a)(2) exceeds the tax under section 821(a)(1), the tax under section 821(a) is \$12,000, namely, that imposed by section 821(a)(2).

*Example 4.* The Y Company, a mutual fire insurance company subject to the tax imposed by section 821 for the calendar year 1958, has mutual insurance company taxable income for purposes of the surtax of \$35,000 and, due to partially tax-exempt interest of \$5,000, has income for purposes of the normal tax of \$30,000. The gross amount received during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) is \$120,000, and the gross amount of income from interest, dividends, rents, and net premiums, minus dividends to policyholders and wholly tax-exempt interest, is \$100,000. Under section 821(a)(1), without application of section 821(c), the normal tax would be 30 percent of \$30,000, or \$9,000, since this is less than \$16,200, 60 percent of \$27,000 (excess of \$30,000 over \$3,000); and the surtax would be 22 percent of \$10,000 (excess of \$35,000 over \$25,000), or \$2,200. The combined tax of \$11,200 (\$9,000 plus \$2,200) would then be reduced by applying section 821(c), since the gross receipts are between \$75,000 and \$125,000. The tax under section 821(a)(1), as thus adjusted, would be 90 percent of \$11,200, or \$10,080, since \$45,000 (excess of \$120,000 over \$75,000) is 90 percent of \$50,000. Under section 821(a)(2), without reference to section 821(c), the tax is 2 percent of \$25,000 (excess of \$100,000 over \$75,000), or \$500, since this is less than \$1,000, 1 percent of \$100,000. Applying section 821(c) reduces this to \$450, or 90 percent of \$500. Since \$10,080, the tax under section 821(a)(1), as adjusted, exceeds \$450, the tax under section 821(a)(2), as adjusted, the tax under section 821(a)(1), as adjusted, is applicable. The Y Company would accordingly pay a combined normal tax and surtax of \$10,080.

*Example 5.* The Z Exchange, an inter-insurer, for the calendar year 1958 has mutual insurance company taxable income for purposes of the surtax of \$60,000 and, due to partially tax-exempt interest of \$12,000, has income for purposes of the normal tax of \$48,000. The gross amount received during the taxable year from the items described in section 822(b) (other than paragraph (1)(D)

thereof) and premiums (including deposits and assessments) is \$2,700,000. The Z Exchange is not liable for normal tax under section 821(b)(1) for the calendar year 1958 as its mutual insurance company taxable income for purposes of the normal tax does not exceed \$50,000. Its surtax is 33 percent of \$10,000 (\$60,000 minus \$50,000), or \$3,300, since that amount is less than \$7,700, 22 percent of \$35,000 (excess of \$60,000 over \$25,000). Since the Z Exchange has no normal tax, is not subject to the tax imposed by section 821(a)(2), and is not entitled to the adjustment provided in section 821(c), its total tax under section 821(b) is \$3,300.

[T.D. 6610, 27 FR 8718, Aug. 31, 1962]

### **§ 1.821-4 Tax on mutual insurance companies other than life insurance companies and other than fire, flood, or marine insurance companies, subject to tax imposed by section 831.**

(a) *In general*—(1) *Tax imposed.* (i) For taxable years beginning after December 31, 1962, all mutual insurance companies, including foreign insurance companies carrying on an insurance business within the United States, not taxable under section 802 or 831, and not specifically exempt under the provisions of section 501(c)(15), are subject either to the tax imposed by section 821(a) on mutual insurance company taxable income or, in the case of certain small companies, to the tax imposed by section 821(c) on taxable investment income. The determination of whether a mutual insurance company is taxable under section 821 (a) or (c) for the taxable year is dependent upon the gross amount received by the company during such taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments). If such gross amount received exceeds \$150,000, but does not exceed \$500,000 for the taxable year, the company is subject to the tax imposed by section 821(c) on taxable investment income, unless (a) the company elects under section 821(d) in the manner provided in paragraph (f) of this section to be subject to the tax imposed by section 821(a), or (b) there is a balance in its protection against loss account at the beginning of the taxable year. A company having a gross amount received in excess of \$500,000 is subject to the tax imposed by section

821(a). For exemption from income tax of companies having a gross amount received not in excess of \$150,000, see section 501(c)(15). For the alternative tax, in lieu of the tax imposed by section 821 (a) or (c), where the net long-term capital gain for any taxable year exceeds the net short-term capital loss, see section 1201(a) and the regulations thereunder. For the definition of an insurance company, see paragraph (a) of § 1.801-3.

(ii) The term “premiums” as used in section 821 and this section has the same meaning as in section 501(c)(15) and § 1.501(c)(15)-1, and means the total amount of the premiums and other consideration provided in the insurance contract without any deduction for commissions, return premiums, reinsurance, dividends to policyholders, dividends left on deposit with the company, discounts on premiums paid in advance, interest applied in reduction of premiums (whether or not required to be credited in reduction of premiums under the terms of the contract), or any other item of similar nature. Such term includes advance premiums, premiums deferred and uncollected and premiums due and unpaid, deposits, fees, assessments, and consideration in respect of assuming liabilities under contracts not issued by the taxpayer (such as a payment or transfer of property in an assumption reinsurance transaction), but does not include amounts received from other insurance companies for losses paid under reinsurance contracts.

(2) *Tax base.* The taxable income of mutual insurance companies taxable under section 821 differs from the taxable income of other corporations. See sections 821(b) and 822. Mutual insurance companies have special items of income and special deductions not provided for other corporations. See, for example, sections 821(b)(1)(C), 822(d), 823(b), 824(a), and 825(a). Thus, the computation of mutual insurance company taxable income for a company taxable under section 821(a), and the computation of taxable investment income for a company taxable under section 821(c), must be made in strict accordance with the provisions of part II of subchapter L of the Code.

(3) *Applicability of other provisions.* All provisions of the Code and of the regulations in this part not inconsistent with the specific provisions of part II of subchapter L of the Code are applicable to the assessment and collection of the tax imposed by section 821 (a) or (c), and mutual insurance companies subject to the tax imposed by section 821 are subject to the same penalties as are provided in the case of returns and payment of income tax by other corporations. The return shall be on Form 1120M.

(4) *Certain foreign companies.* Foreign mutual insurance companies (other than a life insurance company and other than a fire, flood, or marine insurance company subject to the tax imposed by section 831) not carrying on an insurance business within the United States are not taxable under section 821 (a) or (c), but are taxable as other foreign corporations. See section 881.

(b) *Rates of tax imposed by section 821(a)*—(1) *Normal tax.* For taxable years beginning before January 1, 1964, the normal tax imposed under section 821(a) is the lesser of 30 percent of mutual insurance company taxable income, or 60 percent of the amount by which mutual insurance company taxable income exceeds \$6,000. In the case of taxable years beginning after December 31, 1963, the normal tax is imposed at the rate of 22 percent of mutual insurance company taxable income, or 44 percent of the amount by which mutual insurance company taxable income exceeds \$6,000, whichever is the lesser. For example, a company subject to tax under section 821(a) will file a return but will pay no normal tax if mutual insurance company taxable income does not exceed \$6,000. When mutual insurance company taxable income exceeds \$6,000 but does not exceed \$12,000, the company will pay a normal tax equal to 44 percent (60 percent in the case of taxable years beginning before Jan. 1, 1964), of the amount by which mutual insurance company taxable income exceeds \$6,000. When mutual insurance company taxable income exceeds \$12,000, the company will pay normal tax at the rate of 22 percent (30 percent in the case of taxable

# § 1.821-4

# 26 CFR Ch. I (4-1-14 Edition)

years beginning before Jan. 1, 1964), of such income.

(2) *Surtax*—(i) *Taxable years beginning before January 1, 1964.* For taxable years beginning before January 1, 1964, companies taxable under section 821(a) are subject to a surtax equal to 22 percent of so much of their mutual insurance company taxable income (computed without regard to the deduction provided in section 242 for partially tax-exempt interest) as exceeds \$25,000. In the case of an interinsurer or reciprocal underwriter electing to be subject to the limitation provided in section 826(b), the surtax applies to any increase in mutual insurance company taxable income attributable to such election, without regard to the \$25,000 surtax exemption otherwise provided by this subparagraph, and without regard to whether the company is liable for any normal tax under subparagraph (1) of this paragraph. See section 826(f) and § 1.826-2.

(ii) *Taxable years beginning after December 31, 1963.* For taxable years beginning after December 31, 1963, companies taxable under section 821(a) are subject to a surtax at the rates and with the exemptions provided in section 11(c) on their mutual insurance company taxable income. In the case of an interinsurer or reciprocal underwriter electing to be subject to the limitation provided in section 826(b), the surtax applies to any increase in mutual insurance company taxable income attributable to such election, without regard to the surtax exemption otherwise provided by section 11(d), and without regard to whether the company is liable for any normal tax under section 821(a)(1) and subparagraph (1) of this paragraph. See section 826(f) and § 1.826-2.

(c) *Mutual insurance company taxable income defined.* The tax imposed by section 821(a) with respect to any taxable year is computed upon mutual insurance company taxable income for the taxable year. Section 821(b) provides that in the case of a mutual insurance company subject to the tax imposed by section 821(a), mutual insurance company taxable income means the amount by which:

(1) The sum of:

(i) The taxable investment income (as defined in section 822(a)(1) and paragraph (a)(1) of § 1.822-8).

(ii) The statutory underwriting income (as defined in section 823(a)(1) and paragraph (b)(1) of § 1.823-6), and

(iii) The amounts required by section 824(d) and paragraph (b)(3) of § 1.824-1 to be subtracted from the protection against loss account, exceeds.

(2) The sum of:

(i) The investment loss (as defined in section 822(a)(2) and paragraph (a)(2) of § 1.822-8),

(ii) The statutory underwriting loss (as defined in section 823(a)(2) and paragraph (b)(2) of § 1.823-6), and

(iii) The unused loss deduction provided by section 825(a) and paragraph (a) of § 1.825-1.

If for any taxable year the amount determined under subparagraph (2) of this paragraph equals or exceeds the amount determined under subparagraph (1) of this paragraph, the mutual insurance company taxable income for such year shall be zero.

(d) *Examples.* The application of the tax imposed by section 821(a) may be illustrated by the following examples:

*Example 1.* (a) M, a mutual casualty insurance company, for the calendar year 1963 has gross receipts from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) in excess of \$500,000, and therefore is subject to the tax imposed by section 821(a). M's taxable investment income, computed under section 822, is \$30,000 and its statutory underwriting income, computed under section 823, is \$15,000. M subtracts \$3,000 from its protection against loss account in accordance with the computation made under section 824(d). M has no unused loss deduction. M received no partially tax exempt interest. If M is not subject to section 826, its mutual insurance company taxable income for the taxable year 1963 is \$48,000, computed as follows:

(1) Taxable investment income .....	\$30,000
(2) Statutory underwriting income .....	15,000
(3) Subtractions from protection against loss account .....	3,000
(4) Total income items .....	48,000
(5) Investment loss .....	0
(6) Statutory underwriting loss .....	0
(7) Unused loss deduction .....	0
(8) Total loss items .....	0

## Internal Revenue Service, Treasury

## § 1.821-4

(9) Mutual insurance company taxable income (item (4) minus item (8)) .....	48,000
--	--------

(b) Since M's mutual insurance company taxable income is in excess of \$12,000, M will pay normal tax on its mutual insurance company taxable income at a rate of 30 percent. In addition, since M's mutual insurance company taxable income exceeds \$25,000, M will pay surtax on such excess at a rate of 22 percent. M's total tax liability for the taxable year 1963 is \$19,460, computed as follows:

(1) Mutual insurance company taxable income as computed in item (a)(9) .....	\$48,000
(2) Normal tax; 30 percent of mutual insurance company taxable income .....	14,400
(3) Surtax exemption .....	25,000
(4) Mutual insurance company taxable income subject to the surtax (item (1) minus item (3)) ....	23,000
(5) Surtax: 22 percent of mutual insurance company taxable income subject to the surtax .....	5,060
(6) Total tax (item (2) plus item (5)) .....	19,460

*Example 2.* If in example 1, M's mutual insurance company taxable income for 1963 had been in excess of \$6,000 but not in excess of \$12,000, M would pay normal tax in an amount equal to 60 percent of the amount by which such income exceeded \$6,000. Thus, if M had mutual insurance company taxable income of \$11,000, M's total tax liability for the taxable year 1963 would be \$3,000, computed as follows:

(1) Mutual insurance company taxable income .....	\$11,000
(2) Mutual insurance company taxable income in excess of \$6,000 (\$11,000 minus \$6,000) .....	5,000
(3) 30 percent of item (1) .....	3,800
(4) 60 percent of item (2) .....	3,000
(5) Normal tax (lesser of items (3) or (4)) .....	3,000
(6) Surtax exemption .....	25,000

Since the surtax exemption exceeds the mutual insurance company taxable income for purposes of the surtax, there is no surtax liability. Since the normal tax under section 821(a) is the lesser of 30 percent of mutual insurance company taxable income or 60 percent of the amount by which such income exceeds \$6,000, M's normal tax (and total income tax liability) is \$3,000. If M's mutual insurance company taxable income was not in excess of \$6,000, M would be required to file a return, but would not be liable for any normal tax, since, in such a case, 60 percent of M's mutual insurance company taxable income in excess of \$6,000 would be zero.

*Example 3.* Assume the same income as in example 1 in the 1965 calendar year and that M is not a corporation to which section 1561 (with respect to certain controlled corporations) applies. Since M's mutual insurance company taxable income is in excess of \$12,000, M will pay normal tax on its mutual insurance company taxable income at a rate of 22 percent. In addition, since M's mutual insurance company taxable income exceeds the surtax exemption provided in section 11(d) of \$25,000, M will pay a surtax on such excess at the rate provided in section 11(c),

26 percent. M's total liability for the taxable year 1964 is \$16,540, computed as follows:

(1) Mutual insurance company taxable income as computed in example (1) .....	\$48,000
(2) Normal tax: 22 percent of mutual insurance company taxable income for normal tax purposes .....	10,560
(3) Surtax exemption provided by section 11(d) .....	25,000
(4) Mutual insurance company taxable income subject to the surtax (item (1) minus item (3)) ....	23,000
(5) Surtax: at rates provided in section 11(c): 26 percent of mutual insurance company taxable income subject to the surtax .....	5,980
(6) Total tax (item (2) plus item (5)) .....	16,540

(e) *Alternative tax for certain small mutual insurance companies—(1) In general.*

(i) Section 821(c) provides an alternative tax for certain small mutual insurance companies. This alternative tax, which is in lieu of the tax imposed by section 821(a), is imposed on taxable investment income (as defined in section 822(a)(1) and paragraph (a)(1) of § 1.822-8) and consists of a normal tax and a surtax. The tax provided by section 821(c) is imposed on every mutual insurance company (other than a life insurance company and other than a fire, flood, or marine insurance company subject to the tax imposed by section 831) which received during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) a gross amount in excess of \$150,000 but not in excess of \$500,000, except a company which has properly elected under section 821(d) and paragraph (f) of this section to be subject to the tax imposed by section 821(a), or a company which has a balance in its protection against loss account at the beginning of the taxable year.

(ii) Any company which would be taxable under section 821(c) but for the presence of an amount in its protection against loss account at the beginning of the taxable year may elect to subtract the balance from such account. See section 824(d)(5) and § 1.824-3. If such an election is made in such a case, the company shall not be subject to the tax imposed by section 821(a), but shall be subject to the tax imposed by section 821(c).

(2) *Rates of tax imposed by section 821(c)—(i) Normal tax.* The normal tax for taxable years beginning before January 1, 1964, is the lesser of 30 percent

of taxable investment income or 60 percent of the amount by which taxable investment income exceeds \$3,000. For taxable years beginning after December 31, 1963, the normal tax is imposed at the rate of 22 percent of taxable investment income, or 44 percent of the amount by which taxable investment income exceeds \$3,000, whichever is the lesser. Thus, a company subject to tax under section 821(c) will file a return but will pay no tax if for the taxable year its taxable investment income does not exceed \$3,000; or will pay a normal tax equal to 44 percent (60 percent in the case of taxable years beginning before Jan. 1, 1964), of taxable investment income in excess of \$3,000 when such income exceeds \$3,000 but does not exceed \$6,000. When taxable investment income exceeds \$6,000, the normal tax is imposed at the rate of 22 percent (30 percent in the case of taxable years beginning before Jan. 1, 1964) of such income.

(ii) *Surtax.* For taxable years beginning before January 1, 1964, a surtax is imposed at the rate of 22 percent of taxable investment income (computed without regard to the deduction provided in section 242 for partially tax-exempt interest) in excess of \$25,000. For taxable years beginning after December 31, 1963, a surtax is imposed at the rate provided in section 11(c) on taxable investment income in excess of the surtax exemption provided in section 11(d).

(f) *Election to be taxed under section 821(a)*—(1) *In general.* Section 821(d) provides that any mutual insurance company taxable under section 821(c) may elect, in the manner provided by subparagraph (3) of this paragraph, to be taxed under section 821(a).

(2) *Scope of election.* Except as otherwise provided herein, an election made under section 821(d) and this paragraph to be taxable under section 821(a) shall be binding for the taxable year for which made and for all succeeding taxable years unless the Commissioner consents to a revocation of such election. If for any taxable year the gross amount received from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) does not exceed \$150,000, a company's

prior election made under section 821(d) to be taxable under section 821(a) will automatically terminate and any balance in the protection against loss account will be taken into account for the preceding taxable year. (See section 824(d)(4) and § 1.824-2 for automatic termination of protection against loss account if company is not subject to the tax imposed by section 821(a).) If for any taxable year thereafter the gross amount received exceeds \$150,000 but does not exceed \$500,000, the company shall be taxable under section 821(c) unless it makes a new election to be taxable under section 821(a). If a company subject to tax under section 821(c) for a taxable year elects under section 821(d) and this section to be taxed under section 821(a) and, in a subsequent taxable year, the gross receipts of such company exceed \$500,000, the election made for such earlier taxable year shall be considered as continuing in effect. Thus, such a company will continue to be taxable under section 821(a) notwithstanding that its gross receipts subsequently fall below \$500,000 (so long as they do not fall below \$150,000) unless the Commissioner consents to a revocation of the prior election. Whether revocation is permissible in any case will depend on the facts and circumstances of the particular case, but in no case will revocation be granted in the absence of a showing that the election creates an undue burden or material hardship on the company due to a substantial change in the character of its operations.

(3) *Time and manner of making election.* The election provided by section 821(d) shall be made in a statement attached to the company's income tax return for the first taxable year for which the election is to apply. The statement shall include the name and address of the taxpayer, shall be signed by the taxpayer (or its duly authorized representative), and shall be filed not later than the date prescribed by law (including extensions thereof) for filing the return for such taxable year.

(g) *Examples.* The application of the tax imposed by section 821(c) may be illustrated by the following examples:

*Example 1.* M, a mutual casualty insurance company, for the calendar year 1963 has a

## Internal Revenue Service, Treasury

## § 1.821-5

gross amount received from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) of \$400,000. Since M's gross amount received exceeds \$150,000, but does not exceed \$500,000, M is subject to the tax imposed by section 821(c) on taxable investment income unless it elects to be subject to the tax imposed on mutual insurance company taxable income by section 821(a). M computes its taxable investment income under section 822 to be \$35,000. In computing taxable investment income, M deducted \$2,000 of partially tax-exempt interest under section 242. If M does not make an election to be taxed under section 821(a), its total tax liability for the taxable year 1963 is \$13,140 computed as follows:

(1) Taxable investment income as computed under section 822 .....	\$35,000
(2) 30 percent of taxable investment income .....	10,500
(3) 60 percent of taxable investment income in excess of \$3,000 .....	19,200
(4) Normal tax (lesser of items (2) or (3)) .....	10,500
(5) Partially tax-exempt interest deducted in computing taxable investment income .....	2,000
(6) Taxable investment income for purposes of the surtax (item (1) plus item (5)) .....	37,000
(7) Surtax exemption .....	25,000
(8) Taxable investment income subject to surtax (item (6) minus item (7)) .....	12,000
(9) Surtax (22 percent of item (8)) .....	2,640
(10) Total tax liability (item (4) plus item (9)) .....	13,140

*Example 2.* N, a mutual casualty insurance company, for the taxable year 1963 has a gross amount received from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) of \$210,000. Since N's gross amount received exceeds \$150,000 but does not exceed \$500,000, N is subject to the tax imposed by section 821(c) on taxable investment income unless it elects to be subject to the tax imposed by section 821(a). Furthermore, since the gross amount received by N does not exceed \$250,000, N is entitled to the special tax reduction provided by section 821(c)(2). N computes its taxable investment income under section 822 to be \$24,000. In computing taxable investment income, N deducted \$2,000 of partially tax-exempt interest under section 242. If N does not make an election to be taxed under section 821(a), its total tax liability for the taxable year 1963 is \$4,452 computed as follows:

(1) Taxable investment income as computed under section 822 .....	\$24,000
(2) 30 percent of taxable investment income .....	7,200
(3) 60 percent of taxable investment income in excess of \$3,000 .....	12,600
(4) Normal tax (lesser of items (2) or (3)) .....	7,200
(5) Partially tax-exempt interest deducted in computing taxable investment income .....	2,000
(6) Taxable investment income for purposes of the surtax (item (1) plus item (5)) .....	26,000
(7) Surtax exemption .....	25,000
(8) Taxable investment income subject to surtax (item (6) minus item (7)) .....	1,000

(9) Surtax 22 percent of item (8) .....	220
(10) Tax liability computed without regard to special reduction (item (4) plus item (9)) .....	7,420
(11) Amount by which gross receipts exceed \$150,000 (\$210,000 gross receipts minus \$150,000) .....	60,000
(12) Percentage which item (1) bears to \$100,000 (\$60,000 over \$100,000) .....	0.60
(13) Tax as adjusted (percentage determined in item (12) applied to item (10)) .....	4,452

If N's taxable investment income for purposes of the surtax did not exceed \$3,000, N would file a return but would pay no tax. Had N elected (under section 821(d)) to be subject to tax under section 821(a), N would not be entitled to the special reduction afforded by section 821(c)(2), since that provision applies only to companies taxable under section 821(c).

[T.D. 6681, 28 FR 11110, Oct. 17, 1963, as amended by T.D. 7100, 36 FR 5333, Mar. 20, 1971; 36 FR 5846, Mar. 30, 1971]

### § 1.821-5 Special transitional underwriting loss.

(a) *In general.* Section 821(f) provides a special reduction in the statutory underwriting income (as defined by section 823(a)(1) and paragraph (b)(1) of § 1.823-6) of any company taxable under section 821(a) which was taxable under section 821 for the five taxable years immediately preceding January 1, 1962, and which incurred an underwriting loss (as defined in section 821(f)(3) and paragraph (c) of this section) for each of such five taxable years.

(b) *Amount of reduction.* In the case of a company described in section 821(f)(1) and paragraph (a) of this section the statutory underwriting income for the taxable year (determined without regard to this paragraph) shall be reduced by an amount equal to the amount by which:

(1) The sum of the underwriting losses of such company for the five taxable years immediately preceding January 1, 1962, exceeds

(2) The total amount by which the company's statutory underwriting income was reduced by reason of section 821(f) and this section for prior taxable years.

(c) *Underwriting loss defined.* For purposes of computing the amount of the reduction available under section 821(f) and paragraph (a) of this section, the term underwriting loss means statutory underwriting loss (as defined by section 823(a)(2) and paragraph (b)(2) of

§ 1.823-6) computed without any deduction under section 824(a) and paragraph (a) of § 1.824-1 (relating to deduction to provide protection against losses) and without any deduction under section 832(c)(11) (relating to dividends and similar distributions paid or declared to policyholders). For rules relating to the definition of dividends and similar distributions paid or declared to policyholders, see paragraph (a) of § 1.832-5.

(d) *Years of applicability.* Section 821(f)(4) provides that the special reduction of statutory underwriting income allowed by section 821(f)(2) and paragraph (b) of this section shall apply to any taxable year beginning after December 31, 1962, and before January 1, 1968, for which the taxpayer is subject to the tax imposed by section 821(a).

[T.D. 6681, 28 FR 11112, Oct. 17, 1963]

**§ 1.822-1 Taxable income and deductions.**

(a) *In general.* For taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954, the taxable income of a mutual insurance company subject to the tax imposed by section 821 is its gross investment income, namely, the gross amount of income during the taxable year from interest, dividends, rents, and gains from sales or exchanges of capital assets, less the deductions provided in section 822(c) for wholly tax-exempt interest, investment expenses, real estate expenses, depreciation, interest paid or accrued, capital losses to the extent provided in subchapter P (sec. 1201 and following), chapter 1 of the Code, and the special deductions provided in part VIII (section 241 and following), except section 248, subchapter B, chapter 1 of the Code. In addition to the limitations on deductions relating to real estate owned and occupied by a mutual insurance company subject to the tax imposed by section 821 provided in section 822(d)(1), the adjustment for amortization of premium and accrual of discount provided in section 822(d)(2), and the limitation on the deduction for investment expenses where general expenses are allocated to investment income provided in section 822(c)(2), mu-

tual insurance companies subject to the tax imposed by section 821 are subject to the limitation on deductions relating to wholly tax-exempt income provided in section 265. Such companies are not entitled to the net operating loss deduction provided in section 172.

(b) *Wholly tax-exempt interest.* Interest which in the case of other taxpayers is excluded from gross income by section 103 but included in the gross investment income by section 822(b) is allowed as a deduction from gross investment income by section 822(c)(1).

(c) *Investment expenses.* The deduction allowed by section 822(c)(2) for investment expenses is the same as that allowed life insurance companies by section 803(g)(2). See paragraph (c) of § 1.803-4.

(d) *Taxes and expenses with respect to real estate.* The deduction allowed by section 822(c)(3) for taxes and expenses with respect to real estate owned by the company is the same as that allowed life insurance companies by section 803(g)(3). See paragraph (d) of § 1.803-4.

(e) *Depreciation.* The deduction allowed by section 822(c)(4) for depreciation is the same as that allowed life insurance companies by section 803(g)(4). See paragraph (e) of § 1.803-4.

(f) *Interest paid or accrued.* The deduction allowed by section 822(c)(5) for interest on indebtedness is the same as that allowed other corporations by section 163. See § 1.163-1.

(g) *Capital losses.* (1) The deduction for capital losses under section 822(c)(6) includes not only capital losses to the extent provided in subchapter P but in addition thereto losses from capital assets sold or exchanged to provide funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders. Losses in the latter case may be deducted from ordinary income while the deduction for losses under subchapter P is limited to the gains. See section 1211.

(2) Capital assets are considered as sold or exchanged to provide for the funds or payments specified in section 822(c)(6), to the extent that the gross receipts from the sale or exchange of

such assets are not greater than the excess, if any, for the taxable year of the sum of dividends and similar distributions paid to policyholders, and losses and expenses paid over the sum of interest, dividends, rents, and net premiums received. If, by reason of a particular sale or exchange of a capital asset, gross receipts are greater than such excess, the gross receipts and the resulting loss should be apportioned and the excess included in capital losses subject to the provisions of subchapter P. Capital losses actually used to reduce net income in any taxable year may not again be used in a succeeding taxable year as an offset against capital gains in that year and for that purpose a special rule is set forth for the application of section 1212.

(3) The application of section 822(c)(6) may be illustrated by the following examples:

*Example 1.* The X Company, a mutual fire insurance company subject to the tax imposed by section 821, in the taxable year 1954 sells capital assets in order to obtain funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders. The gross receipts from the sale are \$60,000, resulting in losses of \$20,000. It pays dividends to policyholders of \$150,000. It sustains losses of \$25,000, and pays expenses of \$25,000. It receives interest of \$50,000, dividends of \$5,000, rents of \$4,000, and net premiums of \$66,000. The excess of the sum of dividends, losses, and expenses paid (\$200,000) over the sum of interest, dividends, rents, and net premiums received (\$125,000) is \$75,000. As the gross receipts from the sale of capital assets (\$60,000) do not exceed such excess (\$75,000), the losses of \$20,000 are allowable as a deduction from gross investment income.

*Example 2.* If in example 1 the gross receipts were \$76,000 and the last capital asset sold, for the purpose therein specified, resulted in gross receipts of \$2,000 and a loss of \$500, the losses allowable as a deduction from gross investment income would be \$19,750. The last sale made the gross receipts of \$76,000 exceed by \$1,000 the excess (\$75,000) of the sum of dividends, losses, and expenses paid (\$200,000) over the sum of interest, dividends, rents, and net premiums received (\$125,000). The gross receipts and the resulting loss from the last sale are apportioned on the basis of the ratio of the excess of \$1,000 to the gross receipts of \$2,000, or 50 percent. Fifty percent of the loss of \$500 is deducted from the total loss of \$20,000. The remaining gross receipts of \$1,000 and the proportionate

loss of \$250 should be reported as capital losses under subchapter P.

*Example 3.* If in example 1 the X Company had mutual insurance company taxable income for purposes of the surtax of \$9,750 and, under the provisions of subchapter P, had capital losses of \$18,000 and capital gains of \$10,000, the net capital loss for the taxable year 1954, in applying section 1212 for the purposes of section 822(c)(6), would be \$8,000. This is determined by subtracting from total losses of \$38,000 (\$18,000 capital losses under subchapter P plus \$20,000 other capital losses under section 822(c)(6)) the sum of capital gains of \$10,000 and losses from the sale or exchange of capital assets sold or exchanged to obtain funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders of \$20,000. Such losses of \$20,000 are added to capital gains of \$10,000, since they are less than taxable income for purposes of the surtax, computed without regard to gains or losses from sales or exchanges of capital assets, of \$29,750 (\$9,750 taxable income for purposes of the surtax plus \$20,000 other capital losses under section 822(c)(6) plus the portion of capital losses allowable under subchapter P of \$10,000 minus capital gains under subchapter P of \$10,000).

(h) *Special deductions.* Section 822(c)(7) allows a mutual insurance company the special deductions provided by part VIII (section 241 and following), except section 248, subchapter B, chapter 1 of the Code, relating to partially tax-exempt interest and to dividends received.

#### § 1.822-2 Real estate owned and occupied.

The limitation in section 822(d)(1) on the amount allowable as a deduction for taxes, expenses, and depreciation upon or with respect to any real estate owned and occupied in whole or in part by a mutual insurance company subject to the tax imposed by section 821 is the same as that provided in the case of life insurance companies by section 803(h). See § 1.803-5.

#### § 1.822-3 Amortization of premium and accrual of discount.

Section 822(d)(2) makes provision for the appropriate amortization of premium and the appropriate accrual of discount, attributable to the taxable year, on bonds, notes, debentures or other evidences of indebtedness held by a mutual insurance company subject to the tax imposed by section 821. Such

amortization and accrual is the same as that provided for life insurance companies by section 803(i) and shall be determined in accordance with §1.803-6, except that in determining the premium and discount of a mutual insurance company subject to the tax imposed by section 821 the basis provided in section 1012 shall be used in lieu of the acquisition value.

**§ 1.822-4 Taxable years affected.**

Sections 1.822-1 through 1.822-3 are applicable only to taxable years beginning after December 31, 1953, but before January 1, 1955, and ending after August 16, 1954, and all references to sections of part II, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, before amendments. Sections 1.822-5 through 1.822-7 are applicable only to taxable years beginning after December 31, 1954, but before January 1, 1963, and all references to sections of part II, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Tax Act for 1955 (70 Stat. 36). Sections 1.822-8 through 1.822-12 are applicable only to taxable years beginning after December 31, 1962, and all references to sections of parts II and III, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954 as amended by section 8 of the Revenue Act of 1962 (76 Stat. 989).

[T.D. 6681, 28 FR 11113, Oct. 17, 1963]

**§ 1.822-5 Mutual insurance company taxable income.**

(a) *Mutual insurance company taxable income defined.* Section 822(a) defines the term “mutual insurance company taxable income” for purposes of part II, subchapter L, chapter 1 of the Code. Mutual insurance company taxable income means gross investment income (as defined in section 822(b) and paragraph (b) of this section), less the deductions provided in section 822(c) and paragraph (c) of this section for wholly tax-exempt interest, investment expenses, real estate expenses, depreciation, interest paid or accrued, capital losses, special deductions, trade or business (other than in insurance business) expenses, and depletion. However, such expenses are deductible only to

the extent that they relate to investment income and the deduction of such expenses is not disallowed by any other provision of subtitle A of the Code. For example, investment expenses are not allowable unless they are ordinary and necessary expenses within the meaning of section 162. In addition to the limitations on deductions relating to real estate owned and occupied by a mutual insurance company subject to the tax imposed by section 821 provided in section 822(d)(1), the adjustment for amortization of premium and accrual of discount provided in section 822(d)(2), and the limitation on the deduction for investment expenses where general expenses are allocated to investment income provided in section 822(c)(2), mutual insurance companies subject to the tax imposed by section 821 are subject to the limitation on deductions relating to wholly tax-exempt income provided in section 265. Such companies are not entitled to the net operating loss deduction provided in section 172, and a deduction shall not be permitted with respect to the same item more than once.

(b) *Gross investment income defined.* For purposes of part II, subchapter L, chapter 1 of the Code, section 822(b) defines the term “gross investment income” of a mutual insurance company subject to the tax imposed by section 821 as the sum of the following:

(1) The gross amount of income during the taxable year from:

(i) Interest (including tax-exempt interest and partially tax-exempt interest), as described in §1.61-7. Interest shall be adjusted for amortization of premium and accrual of discount in accordance with the rules prescribed in section 822(d)(2) and §1.822-7;

(ii) Dividends, as described in §1.61-9;

(iii) Rents and royalties, as described in §1.61-8;

(iv) The entering into of any lease, mortgage or other instrument or agreement from which the company may derive interest, rents, or royalties;

(v) The alteration or termination of any instrument or agreement described in subdivision (iv) of this subparagraph;

(vi) Gains from sales or exchanges of capital assets to the extent provided in

subchapter P (section 1201 and following, relating to capital gains and losses), chapter 1 of the Code.

(2) The gross income from any trade or business (other than an insurance business) carried on by a mutual insurance company subject to the tax imposed by section 821, or by a partnership of which the insurance company is a partner.

For example, gross investment income includes amounts received as commitment fees, or as a bonus for the entering into of a lease, or as a penalty for the early payment of a mortgage. In computing the gross income from any trade or business (other than an insurance business) carried on by the insurance company, or by a partnership of which the insurance company is a partner, any item described in section 822(b)(1) and paragraph (b)(1) of this section shall not be considered as gross income arising from the conduct of such trade or business, but shall be taken into account under section 822(b)(1) and paragraph (b)(1) of this section.

(c) *Deductions from gross investment income*—(1) *Wholly tax-exempt interest*. Interest which in the case of other taxpayers is excluded from gross income by section 103 but included in the gross investment income by section 822(b) is allowed as a deduction from gross investment income by section 822(c)(1).

(2) *Investment expenses*. (i) The deduction for investment expenses under section 822(c)(2) includes only those expenses of the taxable year which are fairly chargeable against gross investment income. For example, investment expenses include salaries and expenses paid exclusively for work in looking after investments, and amounts expended for printing, stationery, postage, and stenographic work incident to the collection of interest. An itemized schedule of such expenses shall be attached to the return.

(ii) Any assignment of general expenses to the investment department of a mutual insurance company subject to the tax imposed by section 821 subjects the entire deduction for investment expenses to the limitation provided in section 822(c)(2) and subdivision (iii) of this subparagraph. As used in section 822(c)(2), the term “general

expenses” means any expense paid or incurred for the benefit of more than one department of the company rather than for the benefit of a particular department thereof. For example, if an expense, such as a salary, is attributable to more than one department, including the investment department, such expense may be properly allocated among these departments. If such expense is allocated, the amount properly allocable to the investment department shall be deductible as general expenses assigned to or included in investment expenses and as such shall be subject to the limitation of section 822(c)(2) and subdivision (iii) of this subparagraph. However, a company subject to the tax imposed by section 821 shall not deduct under section 822(c)(2) its real estate taxes, depreciation, or other expenses with respect to any portion of the real estate which it owns, irrespective of whether such items are properly allocable to its investment department. For the rules relating to the deductibility of these items, see section 822(c)(3) and (4) and subparagraphs (3) and (4) of this paragraph. If general expenses are in part assigned to or included in investment expenses, the maximum allowance (as determined under section 822(c)(2)) shall not be granted unless it is shown to the satisfaction of the district director that such allowance is justified by a reasonable assignment of actual expenses. The accounting procedure employed is not conclusive as to whether any assignment has in fact been made. Investment expenses do not include Federal income and excess profits taxes, if any.

(iii) If any general expenses are in part assigned to or included in investment expenses, the total deduction under section 822(c)(2) shall not exceed the sum of:

(a) One-fourth of 1 percent of the mean of the book value of the invested assets held at the beginning and end of the taxable year, plus.

(b) One-fourth of the amount by which mutual insurance company taxable income (computed without any deduction for investment expenses, tax-free interest, partially tax-exempt interest, or dividends received) exceeds 33 $\frac{1}{4}$  percent of the book value of the

mean of the invested assets held at the beginning and end of the taxable year.

For purposes of section 822(c)(2) and this paragraph, the term “invested assets” means only those assets which are owned and used, and to the extent used, for the purpose of producing the income specified in section 822(b). See paragraph (b) of this section. The term does not include real estate owned and occupied, and to the extent owned and occupied, by the company.

(3) *Real estate expenses and taxes.* The deduction for real estate expenses and taxes under section 822(c)(3) includes taxes (as defined in section 164) and other expenses for the taxable year exclusively on or with respect to real estate owned by the company. For example, no deduction shall be allowed under section 822(c)(3) for amounts allowed as a deduction under section 164(e) (relating to taxes of shareholders paid by a corporation). No deduction shall be allowed under section 822(c)(3) for any amount paid out for new buildings, or for permanent improvements or betterments made to increase the value of any property. An itemized schedule of such taxes and expenses shall be attached to the return. See § 1.822-6 for limitation of such deduction.

(4) *Depreciation.* The deduction allowed by section 822(c)(4) for depreciation is, except as provided in section 822(d)(1) and § 1.822-6, identical to that allowed other corporations by section 167. Such amount allowed as a deduction from gross investment income in determining mutual insurance company taxable income is limited to depreciation sustained on the property used, and to the extent used, for the purpose of producing the income specified in section 822(b).

(5) *Interest paid or accrued.* The deduction allowed by section 822(c)(5) for interest on indebtedness is the same as that allowed other corporations by section 163. See § 1.163-1.

(6) *Capital losses.* (i) The deduction for capital losses under section 822(c)(6) includes not only capital losses to the extent provided in subchapter P, chapter 1 of the Code but in addition thereto losses from capital assets sold or exchanged to provide funds to meet abnormal insurance losses and to provide

for the payment of dividends and similar distributions to policyholders. Losses in the latter case may be deducted from ordinary income while the deduction for losses under subchapter P is limited to the gains. See section 1211.

(ii) Capital assets are considered as sold or exchanged to provide for the funds or payments specified in section 822(c)(6), to the extent that the gross receipts from the sale or exchange of such assets are not greater than the excess, if any, for the taxable year of the sum of dividends and similar distributions paid to policyholders, and losses and expenses paid over the sum of the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums received. If, by reason of a particular sale or exchange of a capital asset, gross receipts are greater than such excess, the gross receipts and the resulting loss should be apportioned and the excess included in capital losses subject to the provisions of subchapter P. Capital losses actually used to reduce net income in any taxable year may not again be used in a succeeding taxable year as an offset against capital gains in that year and for that purpose a special rule is set forth for the application of section 1212.

(iii) The application of section 822(c)(6) may be illustrated by the following examples:

*Example 1.* The X Company, a mutual fire insurance company subject to the tax imposed by section 821, in the taxable year 1958 sells capital assets in order to obtain funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders. The gross receipts from the sale are \$60,000, resulting in losses of \$20,000. It pays dividends to policyholders of \$150,000. It sustains losses of \$25,000, and pays expenses of \$25,000. It receives interest of \$50,000, dividends of \$5,000, royalties of \$4,000, and net premiums of \$66,000. The excess of the sum of dividends, losses, and expenses paid (\$200,000) over the sum of the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums received (\$125,000) is \$75,000. As the gross receipts from the sale of capital assets (\$60,000) do not exceed such excess (\$75,000), the losses of \$20,000 are allowable as a deduction from gross investment income.

*Example 2.* If in example 1 the gross receipts were \$76,000 and the last capital asset

sold, for the purpose therein specified, resulted in gross receipts of \$2,000 and a loss of \$500, the losses allowable as a deduction from gross investment income would be \$19,750. The last sale made the gross receipts of \$76,000 exceed by \$1,000 the excess (\$75,000) of the sum of dividends, losses, and expenses paid (\$200,000) over the sum of the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums received (\$125,000). The gross receipts and the resulting loss from the last sale are apportioned on the basis of the ratio of the excess of \$1,000 to the gross receipts of \$2,000, or 50 percent. Fifty percent of the loss of \$500 is deducted from the total loss of \$20,000. The remaining gross receipts of \$1,000 and the proportionate loss of \$250 should be reported as capital losses under subchapter P.

*Example 3.* If in example 1 the X Company had mutual insurance company taxable income for purposes of the surtax of \$9,750 and, under the provisions of subchapter P, chapter 1 of the Code, had capital losses of \$18,000 and capital gains of \$10,000, the net capital loss for the taxable year 1958, in applying section 1212 for the purposes of section 822(c)(6), would be \$8,000. This is determined by subtracting from total losses of \$38,000 (\$18,000 capital losses under subchapter P plus \$20,000 other capital losses under section 822(c)(6)) the sum of capital gains of \$10,000 and losses from the sale or exchange of capital assets sold or exchanged to obtain funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders of \$20,000. Such losses of \$20,000 are added to capital gains of \$10,000, since they are less than taxable income for purposes of the surtax, computed without regard to gains or losses from sales or exchanges of capital assets, of \$29,750 (\$9,750 taxable income for purposes of the surtax plus \$20,000 other capital losses under section 822(c)(6) plus the portion of capital losses allowable under subchapter P of \$10,000 minus capital gains under subchapter P of \$10,000).

(7) *Special deductions.* Section 822(c)(7) allows a mutual insurance company the special deductions provided by part VIII (section 241 and following), except section 248, subchapter B, chapter 1 of the Code, relating to partially tax-exempt interest and to dividends received.

(8) *Trade or business deductions.* (i) Under section 822(c)(8), the deductions allowed by subtitle A of the Code (without regard to this part) which are attributable to any trade or business (other than an insurance business) carried on by the insurance company, or by a partnership of which the company

is a partner are, subject to the limitations in subdivision (ii) of this subparagraph, allowable as deductions from gross investment income in computing mutual insurance company taxable income. Such deductions are allowable, however, only to the extent that they relate to income which is included in the company's gross investment income by reason of section 822(b) (2). Thus, a deduction shall not be allowed under section 822(c)(8) with respect to any item described in section 822(b)(1). The allowable deductions may exceed the gross income from such business.

(ii) In computing the deductions under section 822(c)(8):

(a) Any item, to the extent attributable to the carrying on of the insurance business, shall not be taken into account. For example, if the company operates a radio station primarily to advertise its own insurance services, a portion of the expenses of the radio station shall not be allowed as a deduction. The portion disallowed shall be an amount which bears the same ratio to the total expenses of the station as the value of advertising furnished to the insurance company bears to the total value of services rendered by the station.

(b) The deduction for net operating losses provided in section 172 shall not be allowed.

(9) *Depletion.* The deduction allowed by section 822(c)(9) for depletion is the same as that allowed life insurance companies under section 804(c)(4). See paragraph (b)(5) of § 1.804-4.

[T.D. 6610, 27 FR 8720, Aug. 31, 1962, as amended by T.D. 6631, 28 FR 219, Jan. 9, 1963]

#### § 1.822-6 Real estate owned and occupied.

Section 822(d)(1) provides that the amount allowable as a deduction for taxes, expenses, and depreciation on or with respect to any real estate owned and occupied in whole or in part by a mutual insurance company subject to the tax imposed by section 821 shall be limited to an amount which bears the same ratio to such deduction (computed without regard to this limitation) as the rental value of the space not so occupied bears to the rental value of the entire property. For example, if the rental value of the space not

occupied by the company is equal to one-half of the rental value of the entire property, the deduction for taxes, expenses, and depreciation is one-half of the taxes, expenses, and depreciation on account of the entire property. Where a deduction is claimed as provided in this section, the parts of the property occupied and the parts not occupied by the company, together with the respective rental values thereof, must be shown in a statement accompanying the return.

[T.D. 6610, 27 FR 8722, Aug. 31, 1962]

**§ 1.822-7 Amortization of premium and accrual of discount.**

Section 822(d)(2) makes provision for the appropriate amortization of premium and the appropriate accrual of discount, attributable to the taxable year, on bonds, notes, debentures, or other evidences of indebtedness held by a mutual insurance company subject to the tax imposed by section 821. Such amortization and accrual is the same as that provided for life insurance companies by section 818(b)(1), as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 133), and shall be determined in accordance with paragraphs (a) and (b) of § 1.818-3, except in the case of a mutual insurance company subject to the tax imposed by section 821, paragraph (b) of § 1.818-3 shall apply without regard to the date of acquisition and the basis provided in section 1012 shall be used in lieu of the acquisition value.

[T.D. 6610, 27 FR 8722, Aug. 31, 1962]

**§ 1.822-8 Determination of taxable investment income.**

(a) *In general*—(1) *Taxable investment income defined.* Section 822(a)(1) defines the term “taxable investment income” for purposes of part II, subchapter L, chapter 1 of the Code as the gross investment income (as defined in section 822(b) and paragraph (b) of this section), less the deductions provided in section 822(c) and paragraph (c) of this section for wholly tax-exempt interest, investment expenses, real estate expenses, depreciation, interest paid or accrued, capital losses, special deductions, trade or business (other than an insurance business) expenses, and de-

pletion. However, such expenses are deductible only to the extent that they relate to investment income and the deduction of such expenses is not disallowed by any other provision of subtitle A of the Code.

For example, investment expenses are not allowable unless they are ordinary and necessary expenses within the meaning of section 162. In addition to the limitations on deductions relating to real estate owned and occupied by a mutual insurance company subject to the tax imposed by section 821 provided in section 822(d)(1), the adjustment for amortization of premium and accrual of discount provided in section 822(d)(2), and the limitation on the deduction for investment expenses where general expenses are allocated to investment income provided in section 822(c)(2), mutual insurance companies subject to the tax imposed by section 821 (a) or (c) are subject to the limitation on deductions relating to wholly tax-exempt income provided in section 265. Such companies are not entitled to the net operating loss deduction provided in section 172. See, however, section 825 and paragraph (a) of § 1.825-1 for unused loss deduction allowed companies taxable under section 821(a). A deduction shall not be permitted with respect to the same item more than once.

(2) *Investment loss defined.* The term “investment loss” is defined by section 822(a)(2) as the amount by which the deductions allowable under section 822(c) and paragraph (c) of this section exceed the gross investment income (as defined in section 822(b) and paragraph (b) of this section).

(b) *Gross investment income defined.* For purposes of part II, subchapter L, chapter 1 of the Code, section 822(b) defines the term “gross investment income” of a mutual insurance company subject to the tax imposed by section 821 (a) or (c) as the sum of the following:

(1) The gross amount of income during the taxable year from:

(i) Interest (including tax-exempt interest and partially tax-exempt interest), as described in § 1.61-7. Interest shall be adjusted for amortization of

premium and accrual of discount in accordance with the rules prescribed in section 822(d)(2) and § 1.822-10;

(ii) Dividends, as described in § 1.61-9;

(iii) Rents and royalties, as described in § 1.61-8;

(iv) The entering into of any lease, mortgage or other instrument or agreement from which the company may derive interest, rents, or royalties;

(v) The alteration or termination of any instrument or agreement described in subdivision (iv) of this subparagraph;

(vi) Gains from sales or exchanges of capital assets to the extent provided in subchapter P (section 1201 and following, relating to capital gains and losses) chapter 1 of the Code.

(2) The gross income from any trade or business (other than an insurance business) carried on by a mutual insurance company subject to the tax imposed by section 821 (a) or (c), or by a partnership of which the insurance company is a partner.

For example, gross investment income includes amounts received as commitment fees, or as a bonus for the entering into of a lease, or as a penalty for the early payment of a mortgage. In computing the gross income from any trade or business (other than an insurance business) carried on by the insurance company, or by a partnership of which the insurance company is a partner, any item described in section 822(b)(1) and paragraph (b)(1) of this section shall not be considered as gross income arising from the conduct of such trade or business, but shall be taken into account under section 822(b)(1) and paragraph (b)(1) of this section.

(c) *Deductions from gross investment income*—(1) *Wholly tax-exempt interest*. Interest which in the case of other taxpayers is excluded from gross income by section 103 but included in the gross investment income by section 822(b) is allowed as a deduction from gross investment income by section 822(c)(1).

(2) *Investment expenses*. (i) The deduction for investment expenses under section 822(c)(2) includes only those expenses of the taxable year which are fairly chargeable against gross investment income. For example, investment expenses include salaries and expenses

paid exclusively for work in looking after investments, and amounts expended for printing, stationery, postage, and stenographic work incident to the collection of interest. An itemized schedule of such expenses shall be attached to the return.

(ii) Any assignment of general expenses to the investment department of a mutual insurance company subject to the tax imposed by section 821 (a) or (c) subjects the entire deduction for investment expenses to the limitation provided in section 822(c)(2) and subdivision (iii) of this subparagraph. As used in section 822(c)(2), the term “general expenses” means any expense paid or incurred for the benefit of more than one department of the company rather than for the benefit of a particular department thereof. For example, if an expense, such as a salary, is attributable to more than one department, including the investment department, such expense may be properly allocated among these departments. If such expense is allocated, the amount properly allocable to the investment department shall be deductible as general expenses assigned to or included in investment expenses and as such shall be subject to the limitation of section 822(c)(2) and subdivision (iii) of this subparagraph. However, a company subject to the tax imposed by section 821 (a) or (c) shall not deduct under section 822(c)(2) its real estate taxes, depreciation, or other expenses with respect to any portion of the real estate which it owns, irrespective of whether such items are properly allocable to its investment department. For the rules relating to the deductibility of these items, see section 822(c) (3) and (4) and subparagraphs (3) and (4) of this paragraph. If general expenses are in part assigned to or included in investment expenses, the maximum allowance (as determined under section 822(c)(2)) shall not be granted unless it is shown to the satisfaction of the district director that such allowance is justified by a reasonable assignment of actual expenses. The accounting procedure employed is not conclusive as to whether any assignment has in fact been made. Investment expenses do not include Federal income and excess profits taxes, if any.

(iii) If any general expenses are in part assigned to or included in investment expenses, the total deduction under section 822(c)(2) shall not exceed the sum of:

(a) One-fourth of 1 percent of the mean of the book value of the invested assets held at the beginning and end of the taxable year, plus

(b) One-fourth of the amount by which taxable investment income (computed without any deduction for investment expenses, tax-free interest, partially tax-exempt interest, or dividends received) exceeds 33/4 percent of the book value of the mean of the invested assets held at the beginning and end of the taxable year.

For purposes of section 822(c)(2) and this paragraph, the term “invested assets” means only those assets which are owned and used, and to the extent used, for the purpose of producing the income specified in section 822(b). See paragraph (b) of this section. The term does not include real estate owned and occupied, and to the extent owned and occupied, by the company.

(3) *Real estate expenses and taxes.* The deduction for real estate expenses and taxes under section 822(c)(3) includes taxes (as defined in section 164) and other expenses for the taxable year exclusively on or with respect to real estate owned by the company. For example, no deduction shall be allowed under section 822(c)(3) for amounts allowed as a deduction under section 164(e) (relating to taxes of shareholders paid by a corporation). No deduction shall be allowed under section 822(c)(3) for any amount paid out for new buildings, or for permanent improvements or betterments made to increase the value of any property. An itemized schedule of such taxes and expenses shall be attached to the return. See § 1.822-9 for limitation of such deduction.

(4) *Depreciation.* The deduction allowed by section 822(c)(4) for depreciation is, except as provided in section 822(d)(1) and § 1.822-9, identical to that allowed other corporations by section 167. Such amount allowed as a deduction from gross investment income in determining taxable investment income is limited to depreciation sustained on the property used, and to the

extent used, for the purpose of producing the income specified in section 822(b).

(5) *Interest paid or accrued.* The deduction allowed by section 822(c)(5) for interest on indebtedness is the same as that allowed other corporations by section 163. See § 1.163-1.

(6) *Capital losses.* (i) The deduction for capital losses under section 822(c)(6) includes not only capital losses to the extent provided in subchapter P, chapter 1 of the Code but in addition thereto losses from capital assets sold or exchanged to provide funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders. Losses in the latter case may be deducted from ordinary income while the deduction for losses under subchapter P is limited to the gains. See section 1211.

(ii) Capital assets are considered as sold or exchanged to provide for the funds or payments specified in section 822(c)(6), to the extent that the gross receipts from the sale or exchange of such assets are not greater than the excess, if any, for the taxable year of the sum of dividends and similar distributions paid to policyholders, and losses and expenses paid over the sum of the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums received. If, by reason of a particular sale or exchange of a capital asset, gross receipts are greater than such excess, the gross receipts and the resulting loss should be apportioned and the excess included in capital losses subject to the provisions of subchapter P. Capital losses actually used to reduce net income in any taxable year may not again be used in a succeeding taxable year as an offset against capital gains in that year and for that purpose a special rule is set forth for the application of section 1212.

(iii) The application of section 822(c)(6) may be illustrated by the following examples:

*Example 1.* The X Company, a mutual fire insurance company subject to tax under section 821, in the taxable year 1963 sells capital assets in order to obtain funds to meet abnormal insurance losses and to provide for

the payment of dividends and similar distributions to policyholders. The gross receipts from the sale are \$60,000, resulting in losses of \$20,000. It pays dividends to policyholders of \$150,000. It sustains losses of \$25,000, and pays expenses of \$25,000. It receives interest of \$50,000, dividends of \$5,000, royalties of \$4,000, and net premiums of \$66,000. The excess of the sum of dividends, losses, and expenses paid (\$200,000) over the sum of the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums received (\$125,000) is \$75,000. Since the gross receipts from the sale of capital assets (\$60,000) do not exceed such excess (\$75,000), the losses of \$20,000 are allowable as a deduction from gross investment income in computing taxable investment income under section 822.

*Example 2.* If in example 1 the gross receipts were \$76,000 and the last capital asset sold, for the purpose therein specified, resulted in gross receipts of \$2,000 and a loss of \$500, the losses allowable as a deduction from gross investment income would be \$19,750. The last sale made the gross receipts of \$76,000 exceed by \$1,000 the excess (\$75,000) of the sum of dividends, losses, and expenses paid (\$200,000) over the sum of the items described in section 822(b) (other than paragraph (1)(D) thereof) and net premiums received (\$125,000). The gross receipts and the resulting loss from the last sale are apportioned on the basis of the ratio of the excess of \$1,000 to the gross receipts of \$2,000, or 50 percent. Fifty percent of the loss of \$500 is deducted from the total loss of \$20,000. The remaining gross receipts of \$1,000 and the proportionate loss of \$250 should be reported as capital losses under subchapter P.

*Example 3.* If in example 1 the X Company had taxable investment income for purposes of the surtax of \$9,750 and, under the provisions of subchapter P, chapter 1 of the Code, had capital losses of \$18,000 and capital gains of \$10,000, the net capital loss for the taxable year 1963, in applying section 1212 for the purposes of section 822(c)(6), would be \$8,000. This is determined by subtracting from total losses of \$38,000 (\$18,000 capital losses under subchapter P plus \$20,000 other capital losses under section 822(c)(6)) the sum of capital gains of \$10,000 and losses from the sale or exchange of capital assets sold or exchanged to obtain funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders of \$20,000. Such losses of \$20,000 are added to capital gains of \$10,000, since they are less than taxable investment income for purposes of the surtax, computed without regard to gains or losses from sales or exchanges of capital assets, of \$29,750 (\$9,750 taxable investment income for purposes of the surtax plus \$20,000 other capital losses under section 822(c)(6) plus the portion of capital losses allowable under subchapter P

of \$10,000 minus capital gains under subchapter P of \$10,000).

(7) *Special deductions.* Section 822(c)(7) allows a mutual insurance company the special deductions provided by part VIII (section 241 and following), except section 248, subchapter B, chapter 1 of the Code, relating to partially tax-exempt interest and to dividends received. In applying section 246(b) (relating to limitation on aggregate amount of deductions for dividends received) for purposes of this subparagraph, the reference in such section to "taxable income" shall be treated as a reference to "taxable investment income".

(8) *Trade or business deductions.* (i) Under section 822(c)(8), the deductions allowed by subtitle A of the Code (without regard to this part) which are attributable to any trade or business (other than an insurance business) carried on by the insurance company, or by a partnership of which the company is a partner are, subject to the limitations in subdivision (ii) of this subparagraph, allowable as deductions from gross investment income in computing taxable investment income. Such deductions are allowable, however, only to the extent that they relate to income which is included in the company's gross investment income by reason of section 822(b)(2). Thus, a deduction shall not be allowed under section 822(c)(8) with respect to any item described in section 822(b)(1). The allowable deductions may exceed the gross income from such business.

(ii) In computing the deductions under section 822(c)(8):

(a) Any item, to the extent attributable to the carrying on of the insurance business, shall not be taken into account. For example, if the company operates a radio station primarily to advertise its own insurance services, a portion of the expenses of the radio station shall not be allowed as a deduction. The portion disallowed shall be an amount which bears the same ratio to the total expenses of the station as the value of advertising furnished to the insurance company bears to the total value of services rendered by the station.

(b) The deduction for net operating losses provided in section 172 shall not be allowed.

(9) *Depletion.* The deduction allowed by section 822(c)(9) for depletion is the same as that allowed life insurance companies under section 804(c)(4). See paragraph (b)(5) of § 1.804-4.

[T.D. 6681, 28 FR 11113, Oct. 17, 1963]

**§ 1.822-9 Real estate owned and occupied.**

Section 822(d)(1) provides that the amount allowable as a deduction for taxes, expenses, and depreciation on or with respect to any real estate owned and occupied in whole or in part by a mutual insurance company subject to the tax imposed by section 821 (a) or (c) shall be limited to an amount which bears the same ratio to such deduction (computed without regard to this limitation) as the rental value of the space not so occupied bears to the rental value of the entire property. For example, if the rental value of the space not occupied by the company is equal to one-half of the rental value of the entire property, the deduction for taxes, expenses, and depreciation is one-half of the taxes, expenses, and depreciation on account of the entire property. Where a deduction is claimed as provided in this section, the parts of the property occupied and the parts not occupied by the company, together with the respective rental values thereof, must be shown in a statement accompanying the return.

[T.D. 6681, 28 FR 11115, Oct. 17, 1963]

**§ 1.822-10 Amortization of premium and accrual of discount.**

(a) *In general.* In computing taxable investment income for the taxable year, the gross amount of income from interest, the deduction under section 822(c)(1) for wholly tax-exempt interest, and the deduction under section 242 for partially tax-exempt interest, are, under the provisions of section 822(d)(2), each to be decreased by the appropriate amortization of premium and increased by the appropriate accrual of discount attributable to the taxable year on bonds, notes, debentures, or other evidences of indebtedness held by a mutual insurance com-

pany subject to the tax imposed by section 821 (a) or (c). However, only the accrual of discount relating to issue discount will increase the deduction for wholly tax-exempt interest. See section 103. Such amortization and accrual is the same as that provided for life insurance companies by section 818(b)(1), as amended by the Life Insurance Company Income Tax Act of 1959 (73 Stat. 133), and shall be determined in accordance with paragraphs (a) and (b) of § 1.818-3, except as provided by paragraph (b) of this section.

(b) *Modifications.* (1) Paragraph (b) of § 1.818-3 shall apply to mutual casualty insurance companies subject to the tax imposed by section 821 (a) or (c) without regard to the date of acquisition of the particular securities to which the amortization of premium or accrual of discount is attributable.

(2) In computing the amount of premium or discount for purposes of section 822(d)(2) with respect to securities held by a company taxable under section 821, the basis provided by section 1012 shall be used in lieu of the acquisition value provided by paragraph (b) of § 1.818-3. In the case of a company subject to the tax imposed by section 821(c), adjustments to basis to reflect the accrual of discount and the amortization of premium shall be made in the manner provided by paragraphs (a) and (b) of § 1.818-3. However, for purposes of determining statutory underwriting income or loss for the taxable year under section 823, a company subject to the tax imposed by section 821(a) is not required to accrue discount or to amortize premium in computing its income under section 832 as if it were subject to the tax imposed by section 831. Thus, the accrual of discount and amortization of premium required in the computation of taxable investment income by a company subject to the tax imposed by section 821(a) neither increases nor decreases the mutual insurance company taxable income of such a company and, except to the extent such a company actually accrues discount or amortizes premium for purposes of making the section 832 computation, no adjustment shall be made to the basis of obligations held by it to

## Internal Revenue Service, Treasury

## § 1.823-2

reflect accrual of discount or amortization of premium.

[T.D. 6681, 28 FR 11115, Oct. 17, 1963]

### § 1.822-11 Net premiums.

The term “net premiums”, defined in section 822(f)(1), includes deposits and assessments, but excludes amounts returned to policyholders which are treated as dividends under section 822(f)(2). Net premiums are used in sections 822(c)(6) and 832(c)(5) in determining the limitation on certain capital losses and in the application of section 1212.

[T.D. 6681, 28 FR 11115, Oct. 17, 1963]

### § 1.822-12 Dividends to policyholders.

(a) Dividends to policyholders are used in determining the “underwriting loss” for purposes of the special transitional underwriting loss deduction provided by section 821(f), and the limitation on capital losses under section 822(c)(6); in computing statutory underwriting income or loss under section 823, and the subtractions from the protection against loss account under section 824(d). The term “dividends to policyholders” is defined in section 822(f)(2) as dividends and similar distributions paid or declared to policyholders. It includes amounts returned to policyholders where the amount is not fixed in the insurance contract but depends upon the experience of the company or the discretion of the management. Such amounts are not to be treated as return premiums under section 822(f)(1). Savings credited to the individual accounts of the subscribers of a reciprocal underwriter or inter-insurer under section 823(b)(2) are not dividends paid or declared within the meaning of this paragraph. However, distributions in respect of such credits shall be considered as dividends paid. See section 823(b)(2) and paragraph (c)(2) of § 1.823-6. The term “paid or declared” is to be construed according to the method of accounting regularly employed in keeping the books of the insurance company, and such method shall be consistently followed with respect to all deductions (including dividends and similar distributions to policyholders) and all items of income.

(b) If the method of accounting so employed is the cash receipts and disbursements method, the deduction is limited to the dividends and similar distributions actually paid to policyholders in the taxable year. If, on the other hand, the method of accounting so employed is the accrual method, the deduction, or a reasonably accurate estimate thereof, for dividends and similar distributions declared to policyholders for any taxable year will, in general, be computed by adding the amount of dividends and similar distributions declared but unpaid at the end of the taxable year to dividends and similar distributions paid during the taxable year and deducting dividends and similar distributions declared but unpaid at the beginning of the taxable year. If an insurance company using the accrual method does not compute the deduction for dividends and similar distributions declared to policyholders in the manner stated, it must submit with its return a full and complete explanation of the manner in which the deduction is computed. For the rule as to when dividends are considered paid, see the regulations under section 561.

[T.D. 6681, 28 FR 11115, Oct. 17, 1963]

### § 1.823-1 Net premiums.

Net premiums are one of the items used, together with interest, dividends, and rents, less dividends to policyholders and wholly tax-exempt interest, in determining tax liability under section 821(a)(2). They are also used in section 822(c)(6) in determining the limitation on certain capital losses and in the application of section 1212. The term “net premiums” is defined in section 823(1) and includes deposits and assessments, but excludes amounts returned to policyholders which are treated as dividends under section 823(2).

### § 1.823-2 Dividends to policyholders.

(a) Dividends to policyholders is one of the deductions used, together with wholly tax-exempt interest, in determining tax liability under section 821(a)(2). They are also used in section 822(c)(6) in determining the limitation on certain capital losses and in the application of section 1212. The term

### § 1.823-3

“dividends to policyholders” is defined in section 823(2) as dividends and similar distributions paid or declared to policyholders. It includes amounts returned to policyholders where the amount is not fixed in the insurance contract but depends upon the experience of the company or the discretion of the management. Such amounts are not to be treated as return premiums under section 823(1). Similar distributions include such payments as the so-called unabsorbed premium deposits returned to policyholders by factory mutual fire insurance companies. The term “paid or declared” is to be construed according to the method of accounting regularly employed in keeping the books of the insurance company, and such method shall be consistently followed with respect to all deductions (including dividends and similar distributions to policyholders) and all items of income.

(b) If the method of accounting so employed is the cash receipts and disbursements method, the deduction is limited to the dividends and similar distributions actually paid to policyholders in the taxable year. If, on the other hand, the method of accounting so employed is the accrual method, the deduction, or a reasonably accurate estimate thereof, for dividends and similar distributions declared to policyholders for any taxable year will, in general, be computed as follows:

To dividends and similar distributions paid during the taxable year add the amount of dividends and similar distributions declared but unpaid at the end of the taxable year and deduct dividends and similar distributions declared but unpaid at the beginning of the taxable year.

If an insurance company using the accrual method does not compute the deduction for dividends and similar distributions declared to policyholders in the manner stated, it must submit with its return a full and complete explanation of the manner in which the deduction is computed. For the rule as to when dividends are considered paid, see the regulations under section 561.

### § 1.823-3 Taxable years affected.

Sections 1.823-1 and 1.823-2 are applicable only to taxable years beginning after December 31, 1953, but before Jan-

### 26 CFR Ch. I (4-1-14 Edition)

uary 1, 1955, and ending after August 16, 1954, and all references to sections of part II, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, before amendments. Sections 1.823-4 and 1.823-5 are applicable only to taxable years beginning after December 31, 1954, but before January 1, 1963, and all references to sections of part II, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954, as amended by the Life Insurance Company Tax Act for 1955 (70 Stat. 36). Sections 1.823-6 through 1.823-8 are applicable only to taxable years beginning after December 31, 1962, and all references to sections of parts II and III, subchapter L, chapter 1 of the Code are to the Internal Revenue Code of 1954 as amended by section 8 of the Revenue Act of 1962 (76 Stat. 989).

[T.D. 6681, 28 FR 11116, Oct. 17, 1963]

### § 1.823-4 Net premiums.

Net premiums are one of the items used, together with the gross amount of income during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof), less dividends to policyholders and wholly tax-exempt interest, in determining tax liability under section 821(a)(2). They are also used in section 822(c)(6) in determining the limitation on certain capital losses and in the application of section 1212. The term “net premiums” is defined in section 823(1) and includes deposits and assessments, but excludes amounts returned to policyholders which are treated as dividends under section 823(2).

[T.D. 6610, 27 FR 8722, Aug. 31, 1962]

### § 1.823-5 Dividends to policyholders.

(a) Dividends to policyholders is one of the deductions used, together with wholly tax-exempt interest, in determining tax liability under section 821(a)(2). They are also used in section 822(c)(6) in determining the limitation on certain capital losses and in the application of section 1212. The term “dividends to policyholders” is defined in section 823(2) as dividends and similar distributions paid or declared to policyholders. It includes amounts returned to policyholders where the amount is not fixed in the insurance

contract but depends upon the experience of the company or the discretion of the management. Such amounts are not to be treated as return premiums under section 823(1). Similar distributions include such payments as the so-called unabsorbed premium deposits returned to policyholders by factory mutual fire insurance companies. The term "paid or declared" is to be construed according to the method of accounting regularly employed in keeping the books of the insurance company, and such method shall be consistently followed with respect to all deductions (including dividends and similar distributions to policyholders) and all items of income.

(b) If the method of accounting so employed is the cash receipts and disbursements method, the deduction is limited to the dividends and similar distributions actually paid to policyholders in the taxable year. If, on the other hand, the method of accounting so employed is the accrual method, the deduction, or a reasonably accurate estimate thereof, for dividends and similar distributions declared to policyholders for any taxable year will, in general, be computed as follows: To dividends and similar distributions paid during the taxable year add the amount of dividends and similar distributions declared but unpaid at the end of the taxable year and deduct dividends and similar distributions declared but unpaid at the beginning of the taxable year. If an insurance company using the accrual method does not compute the deduction for dividends and similar distributions declared to policyholders in the manner stated, it must submit with its return a full and complete explanation of the manner in which the deduction is computed. For the rule as to when dividends are considered paid, see the regulations under section 561.

[T.D. 6610, 27 FR 8722, Aug. 31, 1962]

**§ 1.823-6 Determination of statutory underwriting income or loss.**

(a) *In general.* Section 823(a) and this section provide that for purposes of determining statutory underwriting income or loss for the taxable year, a mutual insurance company subject to the tax imposed by section 821(a) must

first take into account the same gross income and deduction items (except as modified by section 823(b) and paragraph (c) of this section) as a taxpayer subject to tax under section 831 would take into account for purposes of determining its taxable income under section 832. These items are then reduced to the extent that they include amounts which are included in determining taxable investment income or loss under section 822(a) and § 1.822-8. In addition, in computing its statutory underwriting income or loss for the taxable year, a company taxable under section 821(a) is allowed to deduct the amount determined under section 824(a) (relating to deduction to provide protection against losses) and, if its gross amount received is less than \$1,100,000, is allowed to deduct the amount determined under section 823(c) and paragraph (d) of this section (relating to special deduction for certain small companies), subject to the limitations provided therein.

(b) *Definitions*—(1) *Statutory underwriting income defined.* Section 823(a) (1) defines the term "statutory underwriting income" for purposes of part II of subchapter L of the Code. Subject to the modifications provided by section 823(b) and paragraph (c) of this section, statutory underwriting income is defined as the amount by which:

(i) The gross income which would be taken into account in computing taxable income under section 832 if the taxpayer were subject to the tax imposed by section 831, reduced by the gross investment income (as determined under section 822(b)), exceeds

(ii) The sum of:

(a) The deductions which would be taken into account in computing taxable income if the taxpayer were subject to the tax imposed by section 831, reduced by the deductions provided in section 822(c) (relating to deductions allowed in computing taxable investment income), plus

(b) The deductions provided in section 823(c) (relating to special deduction for small company having gross amount of less than \$1,100,000) and section 824(a) (relating to deduction to provide protection against losses).

For purposes of subdivision (ii)(a) of this subparagraph, the limitations on

the amounts deductible under paragraphs (9) (relating to charitable, etc., contributions) and (12) (relating to partially tax-exempt interest and to dividends received) of section 832(c) shall be computed by reference to taxable income as defined by section 832(a), and as modified by section 823(b) and paragraph (c) of this section.

(2) *Statutory underwriting loss defined.* “Statutory underwriting loss” is defined in section 823(a)(2) as the amount by which the amount determined under section 823(a)(1)(B) and subparagraph (1)(ii) of this paragraph exceeds the amount determined under section 823(a)(1)(A) and subparagraph (1)(i) of this paragraph.

(c) *Modifications*—(1) *Net operating losses.* In applying section 832 for purposes of determining statutory underwriting income or loss under section 823(a) and paragraph (b) of this section, the deduction for net operating losses provided by section 172 is not allowed. However, see section 825(a) and § 1.825-1 for unused loss deduction allowed companies taxable under section 821(a) in computing mutual insurance company taxable income under section 821(b).

(2) *Interinsurers and reciprocal underwriters*—(i) *In general.* Section 823(b)(2) provides that in computing the statutory underwriting income or loss of a mutual insurance company which is an interinsurer or reciprocal underwriter, there shall be allowed as a deduction the increase for the taxable year in savings credited to subscriber accounts, or there shall be included as an item of gross income the decrease for the taxable year in savings credited to subscriber accounts. For purposes of this subparagraph, the term “savings credited to subscriber accounts” means such portion of the surplus for the taxable year as is credited to the individual accounts of subscribers before the 16th day of the third month following the close of the taxable year, but only if the company would be obligated to pay such amount promptly to such subscriber if he terminated his contract at the close of the company’s taxable year, and only if the company mails notification to such subscriber of the amount credited to his individual

account in the manner provided by subdivision (v) of this subparagraph.

(ii) *Limitations.* Amounts representing return premiums (as defined in paragraph (a)(1)(ii) of § 1.809-4) which the company would be obligated to pay to any subscriber terminating his contract at the close of the company’s taxable year are not savings credited to subscriber accounts within the meaning of section 823(b)(2) and subdivision (i) of this subparagraph. The deduction for savings credited to individual subscriber accounts is allowed only in the case of reciprocal underwriters or interinsurers where the subscriber or policyholder has not only a legally enforceable right to receive the amount so credited if he withdraws from the exchange, but where the amounts credited, as a matter of actual practice, are paid to subscribers or policyholders who terminate their contracts. Thus, no deduction shall be allowed for savings credited to subscriber accounts if such savings are not in fact promptly returned to subscribers when they terminate their contracts.

(iii) *Computation of increase or decrease in savings credited to subscriber accounts.* For purposes of determining the increase or decrease for the taxable year in savings credited to subscriber accounts, every reciprocal underwriter or interinsurer claiming a deduction under section 823(b)(2) and this section shall establish and maintain an account for savings credited to subscriber accounts. The opening balance in such account for the first taxable year for which a deduction is claimed under section 823(b)(2) and this section shall be zero. In each taxable year there shall be added to such account the total amount of savings credited to subscriber accounts for the taxable year, and there shall be subtracted from such account the total amount of savings subtracted from subscriber accounts for the taxable year. However, in no case may the amount added to the account exceed the total amount of savings to subscribers for the taxable year, irrespective of the amount of savings credited to subscriber accounts for the taxable year. Credits made to subscriber accounts after the close of the taxable year and before the 16th day of the third month following the close of

the taxable year will be taken into account as if such amounts had been credited on the last day of the taxable year to the extent such amounts would have become fixed and determinable legal obligations due subscribers if such subscribers had terminated their contracts on the last day of the company's taxable year unless, at the time the amounts are credited, the company specifically designates such amounts as being from surplus for the taxable year in which the amounts were actually credited. Such a designation, once made, shall be irrevocable. However, if a company credited savings to subscriber accounts after December 31, 1962, and before March 16, 1963, and failed to designate such credits as being from surplus for the taxable year 1963, such company may designate such credits as being from surplus for the taxable year 1963 for purposes of determining the total amount of credits to subscriber accounts for such year. In determining the total amount of savings subtracted from subscriber accounts for the taxable year, only amounts subtracted from savings credited for taxable years beginning with the first taxable year for which a deduction was claimed under section 823(b)(2) and this subparagraph will be taken into account. The method of accounting regularly employed by the taxpayer in keeping its books of account will be used for purposes of determining whether the amounts subtracted from the subscriber accounts are from savings for taxable years beginning before the first taxable year for which a deduction is claimed under section 823(b)(2) and this subparagraph, or from savings for taxable years beginning with such first taxable year. Where the method of accounting regularly employed by the taxpayer in keeping its books of account does not clearly indicate whether an amount was subtracted from savings credited to subscriber accounts for taxable years beginning before the first taxable year for which a deduction is claimed under section 823(b)(2) and this subparagraph, or from savings credited for such first taxable year and subsequent taxable years, the amount subtracted will be deemed to have come from savings credited to subscriber accounts for

all taxable years, on a pro rata basis. Where an amount is subtracted from a subscriber's account for record purposes, but such subtraction does not reflect the discharge of the company's legal obligation to pay the amount subtracted promptly to the subscriber if he terminates his contract, then such subtraction shall not be taken into account for purposes of section 823(b)(2) and this subparagraph. On the other hand, where the company ceases to be under a legal obligation to pay promptly to any subscriber the amount credited to his individual account, then such amount shall be considered as having been subtracted from such subscriber's account at the time such obligation ceased to exist. For purposes of section 823(b)(2) and this subparagraph, the increase (if any) for the taxable year in savings credited to subscriber accounts shall be the amount by which the balance in the account for savings credited to subscriber accounts as of the close of the taxable year exceeds the balance in such account as of the close of the preceding taxable year; and the decrease (if any) for the taxable year in savings credited to subscriber accounts shall be the amount by which the balance in the account for savings credited to subscriber accounts as of the close of the preceding taxable year exceeds the balance in such account as of the close of the taxable year.

(iv) *Legal obligation.* For purposes of this subparagraph, the existence of a legal obligation on the part of the company to pay to the subscriber the savings credited to him will be determined under the insurance contract pursuant to which the credits are made. Where it appears that the company is otherwise legally obligated to pay amounts credited to its subscribers, the requisite legal obligation will not be considered absent merely because a subscriber's credits remain subject to absorption by future losses incurred if left on deposit with the company.

(v) *Notification to subscribers.* Every reciprocal underwriter or interinsurer claiming a deduction under section 823(b)(2) and this subparagraph for amounts credited to the individual accounts of its subscribers must mail to

each such subscriber written notification of the amount credited to the subscriber's account for the taxable year, the date on which such amount was credited, and the date on which the subscriber's right to such amount first would have become fixed if such subscriber had terminated his contract at the close of the company's taxable year. As an alternative to providing each subscriber with specific information relating to the amount of savings credited to his individual account, the notification required by this subdivision may be provided in the form of a table or formula mailed to the subscribers. However, a table or formula may not be used in lieu of the specific notification required by this subdivision unless such table or formula has been approved by the Commissioner. Generally, a table or formula will be approved if it enables the subscriber to simply and readily ascertain the amount of savings credited to his individual account for the taxable year, the date on which such amount was credited, and the date on which his right to such amount first would have become fixed if he had terminated his contract at the close of the company's taxable year. A reciprocal underwriter or interinsurer which desires to use such a table or formula should direct a written request for approval of such table or formula to the Commissioner of Internal Revenue, Attention: T:R, Washington, DC, 20224. Such request must set forth a copy of the table or formula proposed to be used, together with sufficient information to permit the Commissioner to determine the basis upon which such table or formula was prepared and the manner in which the subscribers will use such table or formula in determining the amounts credited to their individual accounts. Once a table or formula has been approved, the use of such table or formula with respect to savings credited for subsequent taxable years will not require further approval unless the basis upon which such table or formula was prepared, or the manner in which such table or formula is to be applied, is substantially changed. The table or formula method of notification may be used with respect to all or less than all of the company's subscribers. For ex-

ample, the company might provide the notification required by this subdivision to one class of subscribers in the form of a table or formula mailed to the individual subscribers, while providing another class of subscribers with specific statements of the amounts credited to their individual accounts. The notification required by this subdivision must be mailed before the 16th day of the third month following the close of the reciprocal's taxable year for which the account was credited. Where for any taxable year a reciprocal underwriter or interinsurer claims a deduction under section 823(b) and this subparagraph and fails to give notice as required by this subdivision, such deduction shall not be allowed unless the reciprocal establishes to the satisfaction of the district director that the failure to mail such notice within the prescribed period was due to reasonable cause.

(d) *Special deduction for small company having gross amount of less than \$1,100,000*—(1) *In general.* In the case of a taxpayer subject to the tax imposed by section 821(a), section 823(c) provides that if the gross amount received during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) is less than \$1,100,000, then, subject to the limitation provided in section 823(c)(2) and subparagraph (2) of this paragraph, there shall be allowed an additional deduction for purposes of determining statutory underwriting income or loss under section 823(a) for the taxable year. The amount of the additional deduction is \$6,000; except that if the gross amount received for the taxable year exceeds \$500,000, the additional deduction is limited to an amount equal to 1 percent of the amount by which \$1,100,000 exceeds such gross amount.

(2) *Limitation.* The amount of the deduction provided by section 823(c)(1) may not exceed the statutory underwriting income for the taxable year, computed without regard to the deduction allowed under section 823(c)(1) and subparagraph (1) of this paragraph, and the deduction allowed under section 824(a) (relating to deduction for protection against losses).

## Internal Revenue Service, Treasury

## § 1.825-1

(3) *Example.* The application of section 823(c) and this paragraph may be illustrated by the following example:

*Example.* M, a mutual insurance company subject to the tax imposed by section 821(a), has the following items for the taxable year 1963:

Gross amount for purposes of section 823(c)(1)	\$800,000
Gross investment income (including capital gains)	150,000
Capital gains	100,000
Gross income under section 832	900,000
Deductions under section 822(c)	22,000
Deductions under section 832 (as modified by section 823(b)(2))	746,000

Under the provisions of section 823(c), M's special small company deduction for the taxable year 1963 would be \$3,000, computed as follows:

(1) Gross amount for purposes of section 823(c)(1)	\$800,000
(2) Amount by which \$1,100,000 exceeds item (1) (\$1,100,000 minus \$800,000)	300,000
(3) 1 percent of item (2) (not to exceed \$6,000)	3,000
(4) Gross income under section 832, reduced by gross investment income (\$900,000 minus \$150,000)	750,000
(5) Deductions under section 832 (as modified by section 823(b)), reduced by deductions under section 822(c) (\$746,000 minus \$22,000)	724,000
(6) Limitation on deduction under section 823(c) (1) (excess, if any, of item (4) over item (5))	26,000
(7) Deduction under section 823(c)(1) (item (3) or item (6), whichever is the lesser)	3,000

[T.D. 6681, 28 FR 11116, Oct. 17, 1963]

### § 1.823-7 Subscribers of reciprocal underwriters and interinsurers.

A subscriber or policyholder of a reciprocal underwriter or interinsurer entitled to the deduction allowed by section 823(b)(2) and paragraph (c)(2) of § 1.823-6 shall treat amounts representing savings credit to his individual account for the taxable year as a dividend paid or declared for purposes of computing his taxable income. If a reciprocal credits savings to subscriber accounts after the close of its taxable year, but before the 16th day of the third month following the close of the taxable year, and the reciprocal takes such credits into account as if they had been made on the last day of its taxable year, the subscribers of such reciprocal must take such savings into account as if they had in fact been credited on the last day of the company's taxable year. The subscriber shall take savings credited to his account into account without regard to whether the amounts credited are actually distrib-

uted to him in cash. To the extent the insurance premium constituted a deductible expense when paid or accrued, the subscriber's taxable income for the taxable year will be increased and any loss for the taxable year will be decreased, by the amount credited to his account. Amounts credited to a subscriber's account which are taken into income by him and which subsequently are used to absorb losses of the reciprocal shall be treated by the subscriber as an additional insurance expense for the taxable year in which the amounts are absorbed. Such amounts may be deducted in computing taxable income to the extent insurance constitutes an otherwise properly deductible expense for such taxable year.

[T.D. 6681, 28 FR 11118, Oct. 17, 1963]

### § 1.823-8 Special transitional underwriting loss; cross reference.

With respect to taxable years beginning after December 31, 1962, and before January 1, 1968, section 821(f) provides, for any company subject to the tax imposed by section 821(a), a special reduction in the statutory underwriting income if such company was subject to tax under section 821 for the five taxable years immediately preceding January 1, 1962, and incurred an underwriting loss in each of such five taxable years. For rules relating to the determination of the amount of such reduction, see section 821(f) and § 1.821-5.

[T.D. 6681, 28 FR 11118, Oct. 17, 1963]

### § 1.825-1 Unused loss deduction; in general.

(a) *Amount of deduction.* Section 825(a) provides that the unused loss deduction of a mutual insurance company subject to the tax imposed by section 821(a) shall be an amount equal to the sum of the unused loss carryovers and carrybacks to the taxable year. The amount so determined is used in the computation of mutual insurance company taxable income for the taxable year. See section 821(b) and § 1.821-4.

(b) *Unused loss defined.* Section 825(b) defines the term "unused loss" as the amount (if any) by which:

(1) The sum of the statutory underwriting loss (as defined in section

**§ 1.825-2**

**26 CFR Ch. I (4-1-14 Edition)**

823(a)(2)) and the investment loss (as defined in section 822(a)(2)) exceeds

(2) The sum of:

(i) The taxable investment income (as defined in section 822(a)(1)),

(ii) The statutory underwriting income (as defined in section 823(a)(1)), and

(iii) The amounts required to be subtracted from the protection against loss account under section 824(d).

(c) *Steps in computation of unused loss deduction.* The three steps to be taken in the ascertainment of the unused loss deduction for any taxable year are as follows:

(1) Compute the unused loss for any preceding or succeeding taxable year from which an unused loss may be carried over or carried back to the taxable year.

(2) Compute the unused loss carryovers to the taxable year from such preceding taxable years and the unused loss carrybacks to the taxable year from such succeeding taxable years.

(3) Add such unused loss carryovers and carrybacks in order to determine the unused loss deduction for the taxable year.

(d) *Statement with tax return.* Every mutual insurance company taxable under section 821(a) claiming an unused loss deduction for any taxable year shall file with its return for such year a concise statement setting forth the amount of the unused loss deduction claimed and all material and pertinent facts relative thereto, including a detailed schedule showing the computation of the unused loss deduction.

(e) *Ascertainment of deduction dependent upon unused loss carryback.* If a mutual insurance company taxable under section 821(a) is entitled in computing its unused loss deduction to a carryback which it is not able to ascertain at the time its return is due, it shall compute the unused loss deduction on its return without regard to such unused loss carryback. When the company ascertains the unused loss carryback, it may within the applicable period of limitations file a claim for credit or refund of the overpayment, if any, resulting from the failure to compute the unused loss deduction for the taxable year with the inclusion

of such carryback; or it may file an application under the provisions of section 6411 for a tentative carryback adjustment.

(f) *Law applicable to computations.* The following rules shall apply to taxable years for which the taxpayer is subject to the tax imposed by section 821(a):

(1) In determining the amount of any unused loss carryback or carryover to any taxable year, the necessary computations involving any other taxable year shall be made under the law applicable to such other taxable year.

(2) The unused loss for any taxable year shall be determined under the law applicable to that year without regard to the year to which it is to be carried and in which, in effect, it is to be deducted as part of the unused loss deduction.

(3) The amount of the unused loss deduction which shall be allowed for any taxable year shall be determined under the law applicable for that year.

[T.D. 6681, 28 FR 11122, Oct. 17, 1963]

**§ 1.825-2 Unused loss carryovers and carrybacks.**

(a) *Years to which loss may be carried—*

(1) *In general.* In order to determine its unused loss deduction for any taxable year, a mutual insurance company taxable under section 821(a) must first determine the part of any unused losses for any preceding or succeeding taxable years which are carryovers or carrybacks to the taxable year in issue. An unused loss is to be an unused loss carryback to each of the 3 taxable years preceding the loss year, and an unused loss carryover to each of the 5 taxable years following the loss year, subject to the limitations provided in section 825(g) and subparagraph (2) of this paragraph.

(2) *Limitations.* An unused loss may not be carried:

(i) To or from any taxable year beginning before January 1, 1963,

(ii) To or from any taxable year for which the taxpayer is not subject to the tax imposed by section 821(a), nor

(iii) To any taxable year if, between the loss year and such taxable year, there is an intervening taxable year for which the taxpayer was not subject to the tax imposed by section 821(a).

(3) *Periods of less than 12 months.* A fractional part of a year which is a taxable year under sections 441(b) and 7701(a)(23) is a preceding or a succeeding taxable year for the purpose of determining under section 825 the first, second, etc., preceding or succeeding taxable year.

(b) *Loss year defined.* The term “loss year” as used in this section means any taxable year for which a company subject to the tax imposed by section 821(a) has an unused loss in excess of zero.

(c) *Amount of carrybacks and carryovers.* Section 825(e) provides that in the case of a loss year for a company taxable under section 821(a), the entire amount of the unused loss shall be carried to the earliest taxable year to which such loss may be carried under section 825(d) (subject to the limitations of section 825(g)). The amount of the unused loss carried to each of the other taxable years to which such loss may be carried under section 825(d) following such earliest taxable year shall be the excess (if any) of such loss over the sum of the offsets for each taxable year preceding the taxable year to which the unused loss is carried.

(d) *Offset defined—(1) In general.* Section 825(f) defines the term “offset” and provides that the taxable year to which an unused loss is carried shall be referred to as the “offset year”. The definition of the term offset in the case of an unused loss carryback to an offset year, differs from the definition of such term in the case of an unused loss carryover to an offset year.

(2) *Offset in case of carryback.* In the case of an unused loss carryback from the loss year to the offset year, the offset is the mutual insurance company

taxable income for the offset year, computed without regard to any unused loss carryback from the loss year or any taxable year thereafter.

(3) *Offset in case of carryover.* In the case of an unused loss carryover from the loss year to the offset year, the offset is equal to the sum of:

(i) The amount required to be subtracted from the protection against loss account under section 824(d)(1)(C) (relating to amounts equal to the unused loss carryovers to the offset year), plus

(ii) The mutual insurance company taxable income for the taxable year, computed without regard to any unused loss carryback or carryover from the loss year or any taxable year thereafter.

[T.D. 6681, 28 FR 11123, Oct. 17, 1963]

### § 1.825-3 Examples.

The application of section 825 may be illustrated by the following examples:

*Example 1.* For the taxable year 1967, F, a mutual insurance company subject to the tax imposed by section 821(a), has the following items:

Taxable investment income .....	1
Underwriting loss .....	59
Addition to protection against loss account .....	8
Statutory underwriting loss .....	67

The subtractions from the protection against loss account are as follows:

Amount subtracted from amounts in account with respect to taxable years 1963 through 1966 .....	18
Amount subtracted from amounts in account with respect to taxable year 1967 .....	8

Total subtractions from protection against loss account under section 824(d) .....	26
--	----

The application of section 825 in this case may be illustrated by the facts and results shown in the following table and explained below:

	TAXABLE YEAR					
	1963	1964	1965	1966	1967	1968
Protection against loss account:						
Addition to account during taxable year .....	6	2	3	7	8	7
Subtraction from account during taxable year .....	0	0	0	0	8	7
Protection against loss account (at end of year)	6	2	3	7	0	0
Protection against loss account (at end of taxable year 1968) .....	0	0	0	0	0	0
Unused loss .....	0	0	0	0	40	0
Unused loss carryback .....	0	40	35	25	0	0
Unused loss carryover .....	0	0	0	0	0	18
Unused loss deduction .....	0	40	35	25	0	18
Mutual insurance company taxable income (computed without regard to unused loss) .....	13	5	10	7	0	2

## TAXABLE YEAR—Continued

	1963	1964	1965	1966	1967	1968
Mutual insurance company taxable income (computed with regard to unused loss) .....	13	0	0	0	0	0
Offset for year .....	0	5	10	7	0	9
Offset total .....	0	5	15	22	22	31

1967: Under the provisions of section 825(b), F's unused loss for 1967 is 40, the amount by which the sum of the statutory underwriting loss and the investment loss, 67 (67 plus 0), exceeds the sum of the taxable investment income, the statutory underwriting income, and the amounts required to be subtracted from the protection against loss account under section 824(d) for the taxable year, 27 (the sum of 1, 0, and 26, respectively).

1967 carryback to 1964: Under the provisions of section 825(e), the entire unused loss for 1967 of 40 is carried back to 1964, the earliest year to which the loss may be carried under section 825(d). Since there are no other amounts carried to 1964, the unused loss deduction for 1964 is 40. Thus, after taking the unused loss deduction into account, the mutual insurance company taxable income for 1964 is zero, and the offset for 1964 is 5 (the mutual insurance company taxable income for 1964 determined without regard to the unused loss carryback from 1967 or any year thereafter).

1967 carryback to 1965: The portion of the unused loss for 1967 which is carried back to 1965 is 35 (40 minus 5, the offset for 1964). After taking the unused loss deduction into account, the mutual insurance company taxable income for 1965 is zero. The offset for 1965 is 10, the mutual insurance company taxable income for 1965 determined without regard to any unused loss carryback from 1967 or any year thereafter.

1967 carryback to 1966: The portion of the unused loss for 1967 which is carried back to 1966 is 25. This amount is the excess of the unused loss for 1967 of 40 over the sum of the offset for 1964 (5) and the offset for 1965 (10). As a result of the unused loss deduction the mutual insurance company taxable income for 1966 is reduced to zero. The offset for 1966 is 7.

1967 carryover to 1968: Under the provisions of section 825(d), the portion of the unused loss for 1967 which is carried forward to 1968 is 18 (40 minus the sum of 5, 10, and 7, the offsets for 1964, 1965, and 1966, respectively). Under section 825(f)(2), this amount is first applied against any amounts in the protection against loss account at the end of 1968, and is then applied against the mutual insurance company taxable income for 1968 (computed without regard to any unused loss carryovers or carrybacks from 1967 or any taxable year thereafter). Thus, assuming that there are no other subtractions from its

protection against loss account under section 824(d) for 1968, F's protection against loss account of 7 is reduced to zero by reason of the subtraction under section 824(d)(1)(C). The remaining portion of the unused loss for 1967 which is carried to 1968, 11 (18 minus 7, the amount of the unused loss carryover to 1968 which is subtracted from the protection against loss account under section 824(d)(1)(C)), is then applied against the mutual insurance company taxable income for 1968 computed without regard to any unused carryback or carryover from the loss year (1967) or any taxable year thereafter. After the application of the unused loss deduction for 1968, the mutual insurance company taxable income for 1968 is zero. The offset for 1968 is 9, the sum of the amount required to be subtracted from the protection against loss account under section 824(d)(1)(C) for 1968 (7), plus the mutual insurance company taxable income for 1968, determined without regard to any unused loss carryover or carryback from 1967 or any year thereafter (2). The remaining 9 of the unused loss for 1967 (40 minus the sum of 5, 10, 7, and 9, the offsets for 1964, 1965, 1966, and 1968, respectively), is carried forward to 1969, and to the extent not used in that year or any year thereafter, may be carried forward to 1970, 1971, and 1972, in that order.

Example 2. If in example 1 F had an unused loss in 1966 of 22, then, with respect to F's 1967 unused loss of 40, the offset for 1964 would be zero; the offset for 1965 would be 6—the 1965 mutual insurance company taxable income of 10 less an unused loss carryback of 4 from 1966 (the 1966 unused loss of 22 minus the 1963 offset of 13 and the 1964 offset of 5); the offset for the loss year 1966 would be zero, and 34 (the 1967 unused loss of 40 minus the offset for 1965 of 6) would remain as an unused loss carryover to 1968, 1969, 1970, 1971, 1972, in that order. Thus, the unused loss carrybacks or carryovers to an offset year are applied against the mutual insurance company taxable income for such year in the order in which the losses occurred, with the earliest loss being offset first.

Example 3. For the taxable year 1963, M, a mutual insurance company subject to tax imposed by section 821(a), has an unused loss (as defined in section 825(b)) of \$65,000. Under section 825(g), the loss may not be carried back to any taxable year beginning before 1963. However, the loss may be carried forward to each of the 5 taxable years following

1963 provided that for each of such succeeding taxable years M is subject to the tax imposed by section 821(a).

*Example 4.* Assume the facts are the same as in example 3, except that for the taxable year 1964, the gross amount received by M from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) exceeds \$150,000 but does not exceed \$500,000. If M does not make the election under section 821(d) (relating to election to be taxed under section 821(a)) for 1964, M's 1963 unused loss of \$65,000 will not be allowed as an unused loss carryover or carryback since, by reason of section 825(g)(3), the unused loss may not be carried to any taxable year if, between the loss year and such taxable year, there is an intervening taxable year for which the insurance company was not subject to the tax imposed by section 821(a), and by reason of section 825(g)(1), the unused loss may not be carried to any taxable year beginning before 1963.

[T.D. 6681, 28 FR 11123, Oct. 17, 1963]

**§ 1.826-1 Election by reciprocal underwriters and interinsurers.**

(a) *In general.* Except as otherwise provided in section 826(c), any mutual insurance company which is an interinsurer or reciprocal underwriter taxable under section 821(a) may elect under section 826(a) to limit its deductions for amounts paid or incurred to its attorney-in-fact to the deductions of its attorney-in-fact which are allocable to income received by the attorney-in-fact from the reciprocal during the taxable year. See § 1.826-4 for rules relating to allocation of expenses. In no case may such an election increase the amount deductible by the reciprocal for amounts paid or due its attorney-in-fact for the taxable year. The election allowed by section 826(a) and this section in effect increases the income of the reciprocal by the net income of the attorney-in-fact attributable to its business with the reciprocal. A reciprocal making the election is allowed a credit for the amount of tax paid by the attorney-in-fact for the taxable year which is attributable to income received by the attorney-in-fact from the reciprocal. See section 826(e) and § 1.826-5.

(b) *Companies eligible to elect under section 826(a).* Any mutual insurance company which is a reciprocal underwriter or interinsurer subject to the tax imposed by section 821(a) may elect

(in the manner prescribed by paragraph (c) of this section) to be subject to the limitation provided by section 826(b) and paragraph (a) of this section provided the attorney-in-fact of the electing reciprocal:

(1) Is subject to the taxes imposed by section 11 (b) and (c) and the regulations thereunder;

(2) Consents (in the manner provided by paragraph (a) of § 1.826-3) to provide the information required under paragraph (b) of § 1.826-3 during the period in which the election made under section 826(a) and this section is in effect;

(3) Reports the income received from the reciprocal and the deductions allocable thereto under the same method of accounting used by the reciprocal in reporting its deductions for amounts paid or due its attorney-in-fact; and

(4) Files its income tax return on a calendar year basis.

(c) *Manner of making election.* The election provided by section 826(a) and this section shall be made in a statement attached to the taxpayer's income tax return for the first taxable year for which such election is to apply. The statement shall include the name and address of the taxpayer, shall be signed by the taxpayer (or its duly authorized representative), and shall be filed not later than the time prescribed by law for filing the income tax return (including extensions thereof) for the first taxable year for which such election is to apply. For information required of an electing reciprocal, see paragraph (e) of this section.

(d) *Scope of election.* The election allowed by section 826(a) is binding for the taxable year for which made and all succeeding taxable years unless the Commissioner consents to a revocation of such election. Whether revocation will be permitted will depend upon the facts and circumstances of each particular case.

(e) *Information required of an electing company.* Every reciprocal underwriter or interinsurer making the election provided by section 826(a) and this section shall, in the manner provided by paragraph (f) of this section, furnish the following information for each taxable year during which such election is in effect:

## § 1.826-2

## 26 CFR Ch. I (4-1-14 Edition)

(1) The name and address of the attorney-in-fact with respect to which the election allowed by section 826(a) and this section is in effect; the district in which such attorney-in-fact filed its return for the taxable year; and a copy of the consent required by section 826 and § 1.826-3 and the date and district in which such consent was filed;

(2) The deductible amount paid or due to such attorney-in-fact from the reciprocal computed without regard to the limitation provided by section 826(b);

(3) The total amount claimed as a deduction by the reciprocal for amounts paid to its attorney-in-fact after giving effect to the limitation provided by section 826(b);

(4) The amount of the increase (if any) in underwriting gain (as defined in section 824(a)) attributable to the election allowed by section 826(a);

(5) The amount of the increase (if any) in the deduction allowed by section 824(a) (relating to deduction to provide protection against losses) attributable to the election allowed by section 826(a);

(6) The amount of any increase or decrease in the statutory underwriting income or loss for the taxable year (as computed under section 823) attributable to the election allowed by section 826(a);

(7) The amount of any increase or decrease in the mutual insurance company taxable income or unused loss for the taxable year attributable to the election allowed by section 826(a);

(8) The amount of the increase (if any) in the tax liability of the reciprocal for the taxable year attributable to the election allowed by section 826(a) before taking into account the credit provided by section 826(e);

(9) The amount of tax attributable to income received by the attorney-in-fact from the reciprocal during the taxable year (as determined under § 1.826-5) claimed (under section 826(e) and paragraph (a) of this section) by the reciprocal as a credit for the taxable year; and

(10) The information which the attorney-in-fact is required to submit to the reciprocal under paragraphs (b) and (c) of § 1.826-3.

(f) *Manner in which information is to be provided.* The information required by paragraph (e) of this section shall be set forth in a statement attached to the taxpayer's income tax return for each taxable year for which such information is required. Such statement shall include the name and address of the taxpayer; and shall be filed not later than the date prescribed by law (including extensions thereof) for filing the income tax return for the taxable year with respect to which such information is being provided.

[T.D. 6681, 28 FR 11124, Oct. 17, 1963]

### § 1.826-2 Special rules applicable to electing reciprocals.

(a) *Protection against loss account.* Section 826(d) provides that for purposes of determining the amount to be subtracted from the protection against loss account under section 824(d)(1)(D) and the regulations thereunder (relating to amounts added to the account for the fifth preceding taxable year) for any taxable year, any amount which was added to such account by reason of the election under section 826(a) and paragraph (a) of § 1.826-1 shall be treated as having been added by reason of section 824(a)(1)(A) and the regulations thereunder (relating to amounts equal to 1 percent of losses incurred during the taxable year). Thus, no amount added to the protection against loss account by reason of an election made under section 826(a) may remain in such account beyond the end of the fifth taxable year following the taxable year with respect to which such amount was added. See section 824(d)(1)(D) and paragraph (b)(3) of § 1.824-1. The amount added to the protection against loss account by reason of an election under section 826(a) is that amount which is equal to 25 percent (plus, in the case of a reciprocal which qualifies as a concentrated risk company under section 824(a), so much of the concentrated wind-storm, etc., premium percentage as exceeds 40 percent) of the amount by which:

(1) The underwriting gain (as defined by section 824(a)(1)) computed after taking into account the limitation provided by section 826(b) and § 1.826-1, exceeds

(2) The underwriting gain computed without regard to the limitation provided by section 826(b) and § 1.826-1.

(b) *Denial of surtax exemption.* Section 826(f) provides that the tax imposed upon any increase in the mutual insurance company taxable income of a reciprocal which is attributable to the limitation provided by section 826(b) shall be computed without regard to the surtax exemption provided by section 821(a)(2) and the regulations thereunder. Thus, a company making the election provided under section 826(a) will be subject to surtax, as well as normal tax, on the increase in its mutual insurance company taxable income for the taxable year which is attributable to such election. Similarly, any amount which was added to the protection against loss account by reason of an election under section 826(a) and § 1.826-1, and which is subtracted from such account in accordance with section 826(d) and paragraph (a) of this section, will be subject to surtax, as well as normal tax, to the extent such amount increases mutual insurance company taxable income in the year in which the subtraction is made. Furthermore, the company will be subject to surtax on such increases notwithstanding the fact that it may have no normal tax liability for the taxable year, because its mutual insurance company taxable income (after giving effect to the election provided by section 826(a)) does not exceed \$6,000.

(c) *Adjustment for refunds.* Section 826(g) provides that if for any taxable year an attorney-in-fact is allowed a credit or refund for taxes paid with respect to which credit or refund to the reciprocal resulted under section 826(e), the taxes of such reciprocal for such taxable year shall be properly adjusted. The reciprocal shall make the adjustment required by section 826(g) by increasing its income tax liability for its taxable year in which the credit or refund is allowed to the attorney-in-fact by the amount of such credit or refund which is attributable to taxes paid by the attorney-in-fact on income received from the reciprocal, as determined under § 1.826-6, but only to the extent that the payment of such amount by the attorney-in-fact resulted in a credit or refund to the re-

ciprocal. However, if the refund or credit to the attorney-in-fact is the result of an error in determining its items of income or deduction for the taxable year with respect to which the refund or credit is allowed, and such error affects the amount of deductions allocable to its reciprocal for such taxable year, then, if the reciprocal's period for filing an amended return has not otherwise expired, the preceding sentence shall not apply and the reciprocal shall make the adjustment required by section 826(g) by filing an amended return for such taxable year and all subsequent taxable years for which an adjustment is required. The reciprocal's amended return or returns shall give effect to the change in the deductions of the attorney-in-fact allocable to income received from the reciprocal and the tax paid by the attorney-in-fact attributable to such income. The amount of any adjustment required by section 826(g) and this section and the computation thereof shall be set forth in a statement attached to and filed with the taxpayer's income tax return for the taxable year for which the adjustment is made. Such statement shall include the name and address of the taxpayer, and a copy of the notification received by the attorney-in-fact indicating that it has been allowed the credit or refund requiring adjustment of the reciprocal's taxes.

[T.D. 6681, 28 FR 11125, Oct. 17, 1963, as amended by T.D. 7100, 36 FR 5334, Mar. 20, 1971]

### § 1.826-3 Attorney-in-fact of electing reciprocals.

(a) *Manner of making consent.* Section 826(c)(2) provides that a reciprocal may not elect to be subject to the limitation provided by section 826(b) unless its attorney-in-fact consents to make certain information available. See paragraph (b) of this section. The attorney-in-fact of a reciprocal making the election provided by section 826(a) shall signify the consent required by section 826(c) in a statement attached to its income tax return for the first taxable year for which the reciprocal's election is to apply. Such statement shall include the name and address of the consenting taxpayer; the name and address of the reciprocal with respect

to which such consent is to apply; shall be signed by the taxpayer (or its duly authorized representative); and shall be filed not later than the date prescribed by law (including extensions thereof) for filing the income tax return for the first taxable year for which such consent is to apply. In addition, such statement shall specify that the taxpayer is subject to the taxes imposed by section 11 (b) and (c); the method of accounting used in reporting income received from its reciprocal and the deductions allocable thereto; and that its return is filed on the calendar year basis. Consent, once given, shall be irrevocable for the period during which the election provided for the reciprocal by section 826(a) is in effect. See paragraph (e) of § 1.826-1.

(b) *Information required of consenting attorney-in-fact.* Every attorney-in-fact making the consent provided by section 826(c)(2) and paragraph (a) of this section shall, in the manner prescribed by paragraph (c) of this section, furnish the following information for each taxable year during which the consent provided by section 826(c)(2) and paragraph (a) of this section is in effect:

(1) The name and address of the reciprocal with respect to which the consent required by section 826(c)(2) and paragraph (a) of this section is to apply;

(2) Gross income in total and by sources, adjusted for returns and allowances;

(3) Deductions (itemized to the same extent as on taxpayer's income tax return and accompanying schedules) allocable to each source of gross income and in total (see § 1.826-4);

(4) Method of allocation used in subparagraph (3) of this paragraph;

(5) Taxable income (if any) in total and by sources, as in subparagraph (2) of this paragraph (income by sources from subparagraph (2) of this paragraph minus expenses allocable thereto under subparagraph (3) of this paragraph);

(6) Total income tax liability (if any) for the taxable year;

(7) Taxes paid attributable (under § 1.826-5) to income earned by the taxpayer in dealing with the reciprocal;

(8) Such other information as may be required by the district director.

(c) *Manner in which information is to be provided.* (1) The information required by paragraph (b) of this section shall be set forth in a statement attached to the taxpayer's income tax return for each taxable year for which the consent provided by section 826(c)(2) and paragraph (a) of this section is in effect. Such statement shall include the name and address of the taxpayer, and shall be filed not later than the date prescribed by law (including extensions thereof) for filing the income tax return for each taxable year for which such information is required.

(2) A copy of the statement containing the information required by paragraph (b) of this section shall be submitted to the board of advisors (or other comparable body) of the reciprocal on whose behalf the consent provided under section 826(c)(2) is given. The copy shall be executed in the same manner as the original and shall be delivered to such board not later than 10 days before the last date prescribed by law (including extensions thereof) for filing the reciprocal's income tax return for the taxable year for which the information is required unless the attorney-in-fact establishes to the satisfaction of the district director that the failure to furnish such copy or the failure to furnish such copy within the prescribed 10 day period was due to circumstances beyond its control. In addition, there shall be attached to and made a part of such copy, a copy of the income tax return of the attorney-in-fact (including accompanying schedules) for each taxable year for which such statement is required.

[T.D. 6681, 28 FR 11125, Oct. 17, 1963]

**§ 1.826-4 Allocation of expenses.**

An attorney-in-fact allocating expenses as required by section 826(b) and paragraph (b) of § 1.826-3 shall allocate each expense itemized in its income tax return (and accompanying schedules) for the taxable year to each source of gross income (as set forth pursuant to paragraph (b)(2) of § 1.826-3). However, no portion of the net operating loss deduction allowed by section 172 shall be allocated to income received or due from the reciprocal, and no expenses, other than those directly

related thereto, shall be allocated to capital gains. Where the method of allocation used by the taxpayer does not reasonably reflect the expenses of the taxpayer allocable to income received or due from the reciprocal, the district director may require the taxpayer to use such other method of allocation as is reasonable under the circumstances.

[T.D. 6681, 28 FR 11126, Oct. 17, 1963]

#### § 1.826-5 Attribution of tax.

(a) *In general.* Section 826(e) provides that a reciprocal making the election allowed by section 826(a) shall be credited with so much of the tax paid by the attorney-in-fact as is attributable to the income received by the attorney-in-fact from the reciprocal in such taxable year.

(b) *Computation.* For purposes of section 826(e) and paragraph (a) of this section, the amount of tax attributable to income received by the attorney-in-fact from the reciprocal in the taxable year shall be computed in the following manner:

(1) First, compute the taxable income (if any) from each source of gross income set forth in paragraph (b)(2) of § 1.826-3 by deducting from each such amount the expenses allocable thereto under § 1.826-4;

(2) Second, compute the normal tax on each amount of taxable income computed in subparagraph (1) of this paragraph at the rate provided by section 11(b) of the Code;

(3) Third, deduct from each amount determined in subparagraph (1) of this paragraph an amount which bears the same proportion to the surtax exemption provided by section 11(c) of the Code as each amount computed under subparagraph (1) of this paragraph bears to the total of the amounts computed under subparagraph (1) of this paragraph;

(4) Fourth, compute the surtax on each remainder computed in subparagraph (3) of this paragraph at the rate provided by section 11(c) of the Code;

(5) Fifth, add the normal tax computed under subparagraph (2) of this paragraph to the surtax computed under subparagraph (4) of this paragraph for each amount computed under subparagraph (1) of this paragraph;

(6) Sixth, deduct from each amount of tax computed under subparagraph (5) of this paragraph any tax credits (other than those arising from payments made with respect to the tax liability for the taxable year or other taxable years) allocable (in the same manner as provided for expenses under § 1.826-4) to such amount;

(7) Seventh, compute that amount which bears the same proportion to the tax actually paid with respect to the taxable year as each individual amount computed under subparagraph (6) of this paragraph bears to the total of the amounts computed under subparagraph (6) of this paragraph. The amount so determined with respect to each amount computed under subparagraph (6) of this paragraph is the tax paid which is attributable to the amount computed under subparagraph (1) of this paragraph.

To the extent the amounts determined under subparagraph (1) of this paragraph are attributable to amounts received from the reciprocal for the taxable year, the tax attributable to such amounts (as determined under subparagraph (7) of this paragraph) shall be the amount of tax attributable to income received by the attorney-in-fact from the reciprocal during the taxable year.

(c) *Taxes of attorney-in-fact unaffected.* Nothing in section 826 or the regulations thereunder shall increase or decrease the taxes imposed on the income of the attorney-in-fact.

[T.D. 6681, 28 FR 11126, Oct. 17, 1963]

#### § 1.826-6 Credit or refund.

(a) *Notification required.* In any case where a taxpayer applies for a credit or refund of taxes paid by it in respect of a taxable year for which the taxpayer was the consenting attorney-in-fact of a reciprocal making the election provided by section 826(a), such taxpayer shall give notice to its reciprocal for such taxable year, first, upon applying for the credit or refund; and again, within 10 days from the date on which a final determination is made that such credit or refund has been allowed or denied.

(b) *Notice form.* The notices required by this section shall include the name and address of the taxpayer and shall

## § 1.826-7

## 26 CFR Ch. I (4-1-14 Edition)

be signed by the taxpayer or its duly authorized representative. In addition, there shall be attached to and made a part of each first notice a concise statement of the claim upon which the application for refund or credit is based; and there shall be attached to and made a part of each second notice:

(1) A copy of the notification (if any) received by the taxpayer indicating that the credit or refund has been allowed; and

(2) A statement setting forth the amount of such credit or refund attributable to taxes paid by the taxpayer on income received from the reciprocal, and the computation by which such amount was determined.

(c) *Manner of apportioning refund or credit.* The taxpayer shall determine the amount of the refund or credit attributable to taxes paid on income received from its reciprocal by reallocating its income and expense items for the taxable year, with respect to which the refund or credit is allowed, in the manner provided by §§ 1.826-3 and 1.826-4 so as to reflect the adjustments (if any) in such items which resulted in the credit or refund of tax for the taxable year. The taxpayer shall then recompute the tax attributable to income received from its reciprocal for such taxable year in the manner provided by § 1.826-5. The district director may require such additional information as may be necessary in the circumstances to verify the computations required by this paragraph.

[T.D. 6681, 28 FR 11126, Oct. 17, 1963]

### § 1.826-7 Examples.

The application of section 826 may be illustrated by the following examples:

*Example 1.* For the taxable year 1963, R, a reciprocal underwriter subject to the taxes imposed by section 821(a), has the following items (determined before applying any election under section 826):

Gross income under sec. 832 .....	\$578
Gross investment income .....	50
<hr/>	
Deductions under sec. 832 (as modified by sec. 823(b)):	
Deduction for amounts paid by R to attorney-in-fact A .....	\$100
All other deductions .....	500
<hr/>	
Total deductions under sec. 832 .....	600
Deductions under sec. 822(c) .....	40

Incurred losses .....	400
Protection against loss deduction .....	4
Underwriting gain .....	0
Mutual insurance company taxable income .....	0
Unused loss .....	22
Credit or refund for taxes paid .....	0

Assume that the deductions of attorney-in-fact A allocable to the income received by A from R are 60 and the tax paid by A allocable to the income received from R is 16. If R elects to be subject to the limitation provided in section 826(b), the results for 1963 would be as follows:

Gross income under sec. 832 .....	\$578
Gross investment income .....	50
<hr/>	
Deductions under sec. 832 (as modified by sec. 823(b)):	
Deduction for amounts paid by R to attorney-in-fact A .....	\$60
All other deductions .....	500
<hr/>	
Total deduction under sec. 832 .....	560
Deductions under sec. 822(c) .....	40
Incurred losses .....	400
Underwriting gain .....	8
Protection against loss deduction .....	6
Mutual insurance company taxable income .....	12
Unused loss .....	0
Credit or refund for taxes paid .....	16

Under the provisions of section 826(b), R's deduction for amounts paid or incurred to the attorney-in-fact in the taxable year 1963 would be limited to the deductions of A allocable to the income received by A from R. Thus, R's deductions under section 832 (as modified by section 823(b)) for 1963 would be 60 (the deductions of A which are allocable to the income received by A from R). As a result of making the election under section 826(a) for the taxable year 1963, R's underwriting gain would be 8, and its statutory underwriting income would be 2 (the underwriting gain of 8 minus the protection against loss deduction of 6—of which 4 represents the amount determined under section 824(a)(1)(A)—and 2 represents the amount determined under section 824(a)(1)(B)—or 8 minus 6). R's mutual insurance company taxable income for 1963 would be 12, consisting of taxable investment income of 10 (gross investment income minus deductions under section 822(c), or 50 minus 40) plus statutory underwriting income of 2. Since all of R's mutual insurance company taxable income of 12 is attributable to the limitation under section 826(b), the entire amount is subject to the surtax under section 821(a)(2) without regard to the \$25,000 surtax exemption. The credit of 16, representing that part of the tax paid by A which is allocable to the income received by A from R, may be applied by R against its taxes with respect to its mutual insurance company taxable income of 12 for 1963, and R would be entitled to a refund of any excess of the amount of such credit over its tax liability for 1963.

## Internal Revenue Service, Treasury

## § 1.826-7

Under the provisions of section 826(d), no portion of the amount added to the protection against loss account in 1963 by reason of the election under section 826(a), 2 (25 percent of the amount by which the consolidated underwriting gain exceeds 25 percent of the underwriting gain determined without regard to the election under section 826(a), or the amount by which 25 percent of 8 exceeds 25 percent of 0), may remain in such account beyond the taxable year 1968.

*Example 2.* For the taxable year 1963, F is a corporate attorney-in-fact subject to the taxes imposed by section 11(b) and (c) of the Code. F files its return on the calendar year basis and reports income received from its reciprocal and the deductions allocable thereto under the same method of accounting used by its reciprocal in reporting its deductions for amounts paid to R. F properly consents to provide the information required by paragraph (b) of § 1.826-3. In addition to its attorney-in-fact business, F owns real estate for investment purposes, and operates a real estate management service. For the taxable year 1963, F has gross income from these various sources as follows:

Attorney-in-fact fees .....	\$85,000
Real estate management fees.....	18,000
Rental income .....	25,000

F allocates its expenses for the taxable year on the basis of their direct relation to each source of income. During 1963, F acquired property for use in its attorney-in-fact operations which entitled F to an investment credit of \$800 under section 38. For 1963, F determines that the tax paid by it which is attributable to its reciprocal is \$21,863, computed as follows:

	Attorney-in-fact fees	Real estate management	Rental income	Total
Gross income	\$85,000	\$18,000	\$25,000	\$128,000
Allocable expenses .....	25,000	3,000	35,000	63,000
Taxable income (loss)	60,000	15,000	(10,000)	65,000
Normal tax (30 percent) .....	18,000	4,500	0	19,500
Surtax exemption .....	20,000	5,000	0	25,000
Income subject to surtax .....	40,000	10,000	0	40,000
Surtax (22 percent) .....	8,800	2,200	0	8,800
Total tax .....	26,800	6,700	0	28,300
Investment credit .....	800	0	0	800
1963 tax liability .....	26,000	6,700	0	27,500
1963 tax paid .....	.....	.....	.....	27,500
Allocation of tax paid .....	21,863	5,637	0	27,500

Under paragraph (b)(1) of § 1.826-5, F computes its taxable income from its attorney-in-fact fees to be \$60,000 (\$85,000 minus

\$25,000), and its taxable income from its real estate management to be \$15,000 (\$18,000 minus \$3,000). Since F's rental operations resulted in a \$10,000 loss for the taxable year (\$25,000 minus \$35,000), F's taxable income from its rental operations is zero. Using the 30 percent rate provided by section 11(b), F computes its normal tax to be \$18,000 on its attorney-in-fact fees and \$4,500 on its real estate management operations. F's normal tax on total income is \$19,500. The \$3,000 difference between the normal tax on F's total income and the normal taxes on F's profitable operations results from the loss on F's rental operations. Under paragraph (b)(3) of § 1.826-5, F allocates its surtax exemption as follows: \$20,000 \$60,000/\$75,000×\$25,000) to its attorney-in-fact fees; and \$5,000 \$15,000/\$75,000×\$25,000) to its real estate management operations. F computes its surtax on its profitable operations at the 22 percent rate provided by section 11(c) as follows: \$8,800 (22 percent of \$40,000) on attorney-in-fact fees; and \$2,200 (22 percent of \$10,000) on real estate management income. F adds its normal tax and surtax on its profitable operations and determines its total tax to be \$26,800 on its attorney-in-fact operations; \$6,700 on its real estate management operations; and \$28,300 on its total income. F must allocate its investment credit on the same basis as it used to allocate its expenses. Thus, F's entire investment credit must be allocated to its attorney-in-fact operations. Accordingly, F's 1963 tax liability is \$26,000 on its attorney-in-fact fees; \$6,700 on its real estate management operations; \$0 on its rental operations; and \$27,500 on its total income. Under paragraph (b)(7) of § 1.826-5, F allocates \$21,863 (\$26,000/\$32,700×\$27,500) of its 1963 tax paid to its attorney-in-fact fees; and \$5,637 (\$6,700/\$32,700×\$27,500) of its 1963 tax paid to its real estate management business. F's reciprocal will be allowed a credit or refund of \$21,863 for taxes paid by F which are attributable to F's income received from its reciprocal.

*Example 3.* Assume the same facts as in example 2, and assume further that in 1966 F sustains a net operating loss on its overall operations of \$5,000. In carrying the loss back to 1963 as a net operating loss deduction under section 172, F must allocate the deduction under the same method it used in allocating its 1963 deductions. Thus, if the loss was entirely attributable to F's rental operations for the taxable year 1966, F would reduce its taxable income attributable to those operations by the entire amount of the loss and would recompute the tax attributable to those operations under paragraph (b) of § 1.826-5. As recomputed in the table below, F's 1963 tax liability from attorney-in-fact fees would be \$19,800 and F's total tax liability would be \$24,900.

§ 1.831-1

26 CFR Ch. I (4-1-14 Edition)

	Attorney-in-fact fees	Real estate management	Rental income	Total
Gross income .....				
Allocable expenses	\$85,000	\$18,000	\$25,000	\$128,000
Net operating loss deduction	25,000	3,000	35,000	63,000
Taxable income (loss) .....	0	0	5,000	5,000
Normal tax (30 percent) .....	60,000	15,000	(15,000)	60,000
Surtax exemption ..	18,000	4,500	0	18,000
Income subject to surtax .....	20,000	5,000	0	25,000
Surtax (22 percent) ..	40,000	10,000	0	35,000
Total tax .....	8,800	2,200	0	7,700
Investment credit .....	26,800	6,700	0	25,700
1963 tax liability .....	800	0	0	800
1963 tax paid .....	26,000	6,700	0	24,900
Allocation of tax paid ..	.....	.....	.....	24,900
	19,800	5,100	0	24,900

As a result of its 1966 net operating loss, F would be entitled to a refund of \$2,600 (1963 taxes paid of \$27,500 minus recomputed 1963 taxes of \$24,900). Under paragraph (a) of § 1.826-6, F would be required to notify its reciprocal of its claim for refund and of the amount of the refund or credit attributable to taxes paid on income received from the reciprocal. Since the 1963 tax paid by F attributable to its reciprocal (as recomputed) is less than the amount claimed in 1963 by F's reciprocal as a credit, F's reciprocal would be required, under section 826(g), to add the difference—\$2,063 (\$21,863 minus \$19,800), to its tax liability for 1966. Thus, F's reciprocal would first compute its tax liability for 1966 without regard to section 826(g) and then would increase such liability by \$2,063.

[T.D. 6681, 28 FR 11126, Oct. 17, 1963]

OTHER INSURANCE COMPANIES

**§ 1.831-1 Tax on insurance companies (other than life or mutual), mutual marine insurance companies, and mutual fire insurance companies issuing perpetual policies.**

(a) All insurance companies, other than life or mutual or foreign insurance companies not carrying on an insurance business within the United States, and all mutual marine insurance companies and mutual fire insurance companies exclusively issuing either perpetual policies, or policies for

which the sole premium charged is a single deposit which, except for such deduction of underwriting costs as may be provided, is refundable upon cancellation or expiration of the policy, are subject to the tax imposed by section 831. As used in this section and §§ 1.832-1 and 1.832-2, the term “insurance companies” means only those companies which qualify as insurance companies under the definition provided by paragraph (b) of § 1.801-1 and which are subject to the tax imposed by section 831.

(b) All provisions of the Code and of the regulations in this part not inconsistent with the specific provisions of section 831 are applicable to the assessment and collection of the tax imposed by section 831(a), and insurance companies are subject to the same penalties as are provided in the case of returns and payment of income tax by other corporations.

(c) Since section 832 provides that the underwriting and investment exhibit of the annual statement approved by the National Convention of Insurance Commissioners shall be the basis for computing gross income and since the annual statement is rendered on the calendar year basis, the returns under section 831 shall be made on the basis of the calendar year and shall be on Form 1120. Insurance companies are entitled, in computing insurance company taxable income, to the deductions provided in part VIII (section 241 and following), subchapter B, chapter 1 of the Code.

(d) Foreign insurance companies not carrying on an insurance business within the United States are not taxable under section 831 but are taxable as other foreign corporations. See section 881.

(e) Insurance companies are subject to both normal tax and surtax. The normal tax shall be computed as provided in section 11(b) and the surtax shall be computed as provided in section 11(c). For the circumstances under which the \$25,000 exemption from surtax for certain taxable years may be disallowed in whole or in part, see section 1551. For alternative tax where the net long-term capital gain for any taxable year exceeds the net short-term

## Internal Revenue Service, Treasury

## § 1.831-3

capital loss, see section 1201(a) and the regulations thereunder.

### § 1.831-2 Taxable years affected.

Section 1.831-1 is applicable only to taxable years beginning after December 31, 1953, but before January 1, 1963, and ending after August 16, 1954, and all references therein to sections of the Code and regulations are to sections of the Internal Revenue Code of 1954 and the regulations thereunder before amendments. Section 1.831-3 is applicable only to taxable years beginning after December 31, 1962, and all references therein to sections of the Code and regulations are to sections of the Internal Revenue Code of 1954 as amended. Section 1.831-4 is applicable only with respect to the companies described therein, and only with respect to taxable years beginning after December 31, 1961.

[T.D. 6681, 28 FR 11128, Oct. 17, 1963]

### § 1.831-3 Tax on insurance companies (other than life or mutual), mutual marine insurance companies, mutual fire insurance companies issuing perpetual policies, and mutual fire or flood insurance companies operating on the basis of premium deposits; taxable years beginning after December 31, 1962.

(a) All insurance companies, other than life or mutual or foreign insurance companies not carrying on an insurance business within the United States, and all mutual marine insurance companies and mutual fire or flood insurance companies exclusively issuing perpetual policies or whose principal business is the issuance of policies for which the premium deposits are the same regardless of the length of the term for which the policies are written, are subject to the tax imposed by section 831 if the unabsorbed portion of such premium deposits not required for losses, expenses or reserves is returned or credited to the policyholder on cancellation or expiration of the policy. For purposes of section 831 and this section, in the case of a mutual flood insurance company, the premium deposits will be considered to be the same if the payment of a premium increases the total insurance under the policy in an

amount equal to the amount of such premium and the omission of any annual premium does not result in the reduction or suspension of coverage under the policy. As used in this section and section 832 and the regulations thereunder, the term "insurance companies" means only those companies which qualify as insurance companies under the definition provided by paragraph (b) of § 1.801-1 and which are subject to the tax imposed by section 831.

(b) All provisions of the Code and of the regulations in this part not inconsistent with the specific provisions of section 831 are applicable to the assessment and collection of the tax imposed by section 831(a), and insurance companies are subject to the same penalties as are provided in the case of returns and payment of income tax by other corporations.

(c) Since section 832 provides that the underwriting and investment exhibit of the annual statement approved by the National Convention of Insurance Commissioners shall be the basis for computing gross income and since the annual statement is rendered on the calendar year basis, the returns under section 831 shall be made on the basis of the calendar year and shall be on Form 1120. Insurance companies are entitled, in computing insurance company taxable income, to the deductions provided in part VIII (section 241 and following), subchapter B, chapter 1 of the Code.

(d) Foreign insurance companies not carrying on an insurance business within the United States are not taxable under section 831 but are taxable as other foreign corporations. See section 881.

(e) Insurance companies are subject to both normal tax and surtax. The normal tax shall be computed as provided in section 11(b) and the surtax shall be computed as provided in section 11(c). For the circumstances under which the \$25,000 exemption from surtax for certain taxable years may be disallowed in whole or in part, see section 1551. For alternative tax where the net long-term capital gain for any taxable year exceeds the net short-term

#### § 1.831-4

#### 26 CFR Ch. I (4-1-14 Edition)

capital loss, see section 1201(a) and the regulations thereunder.

[T.D. 6681, 28 FR 11128, Oct. 17, 1963]

#### § 1.831-4 Election of multiple line companies to be taxed on total income.

(a) *In general.* Section 831(c) provides that any mutual insurance company engaged in writing marine, fire, and casualty insurance which, for any 5-year period beginning after December 31, 1941, and ending before January 1, 1962, was subject to the tax imposed by section 831 (or the tax imposed by corresponding provisions of prior law) may elect, in the manner provided by paragraph (b) of this section, to be subject to the tax imposed by section 831, whether or not marine insurance is its predominant source of premium income. A company making an election under section 831(c) and this section will be subject to the tax imposed by section 831 for taxable years beginning after December 31, 1961, rather than subject to the tax imposed by section 821.

(b) *Time and manner of making election.* The election provided by section 831(c) and paragraph (a) of this section shall be made in a statement attached to the taxpayer's return for the taxable year 1962. The statement shall indicate that the taxpayer has made the election provided by section 831(c) and this section; shall include the name and address of the taxpayer, and shall be signed by the taxpayer or his duly authorized representative. In addition, the statement shall list the 5 consecutive taxable years prior to 1962 for which the taxpayer was subject to tax under section 831 (or the corresponding provisions of prior law); the types of insurance written by the company; and the percentage of marine insurance to total insurance written. The return and statement must be filed not later than the date prescribed by law (including extensions thereof) for filing the return for the taxable year 1962. However, if the last date prescribed by law (including extensions thereof) for filing the income tax return for the taxable year 1962 falls before October 17, 1963, the election provided by section 831(c) and this section may be made for such year by filing the statement and an amended return for such

taxable year (and all subsequent taxable years for which returns have been filed) before January 16, 1964.

(c) *Scope of election.* An election made under section 831(c) and paragraph (b) of this section shall be binding for all taxable years beginning after December 31, 1961, unless consent to revoke the election is obtained from the Commissioner. However, if a taxpayer made the election provided by section 831(c) and this section for taxable years beginning prior to October 17, 1963, the taxpayer may revoke such election without obtaining consent from the Commissioner by filing, before January 16, 1964, a statement that the taxpayer desires to revoke such election. Such statement shall be signed by the taxpayer or its duly authorized representative. An amended return reflecting such revocation must accompany the statement for all taxable years for which returns have been filed with respect to such election.

(d) *Limitation on certain net operating loss carryovers and carrybacks.* In the case of a taxpayer making the election allowed under section 831(c) and this section, a net operating loss shall not be carried:

(1) To or from any taxable year for which the insurance company is not subject to the tax imposed by section 831(a) (or predecessor sections); or

(2) To any taxable year if, between the loss year and such taxable year, there is an intervening taxable year for which the insurance company was not subject to the tax imposed by section 831(a) (or predecessor sections).

[T.D. 6681, 28 FR 11128, Oct. 17, 1963]

#### § 1.832-1 Gross income.

(a) Gross income as defined in section 832(b)(1) means the gross amount of income earned during the taxable year from interest, dividends, rents, and premium income, computed on the basis of the underwriting and investment exhibit of the annual statement approved by the National Convention of Insurance Commissioners, as well as the gain derived from the sale or other disposition of property, and all other items constituting gross income under section 61, except that in the case of a mutual fire insurance company described in § 1.831-1 the amount of single

deposit premiums received, but not assessments, shall be excluded from gross income. Gross income does not include increase in liabilities during the year on account of reinsurance treaties, remittances from the home office of a foreign insurance company to the United States branch, borrowed money, or gross increase due to adjustments in book value of capital assets. The underwriting and investment exhibit is presumed to reflect the true net income of the company, and insofar as it is not inconsistent with the provisions of the Code will be recognized and used as a basis for that purpose. All items of the exhibit, however, do not reflect an insurance company's income as defined in the Code. By reason of the definition of investment income, miscellaneous items which are intended to reflect surplus but do not properly enter into the computation of income, such as dividends declared to shareholders in their capacity as such, home office remittances and receipts, and special deposits, are ignored. Gain or loss from agency balances and bills receivable not admitted as assets on the underwriting and investment exhibit will be ignored, excepting only such agency balances and bills receivable as have been allowed as deductions for worthless debts or, having been previously so allowed, are recovered during the taxable year. In computing "premiums earned on insurance contracts during the taxable year" the amount of the unearned premiums shall include (1) life insurance reserves as defined in section 803(b) and § 1.803-1 pertaining to the life, burial, or funeral insurance, or annuity business of an insurance company subject to the tax imposed by section 831 and not qualifying as a life insurance company under section 801, and (2) liability for return premiums under a rate credit or retrospective rating plan based on experience, such as the "War Department Insurance Rating Plan," and which return premiums are therefore not earned premiums. In computing "losses incurred" the determination of unpaid losses at the close of each year must represent actual unpaid losses as nearly as it is possible to ascertain them.

(b) Every insurance company to which this section applies must be pre-

pared to establish to the satisfaction of the district director that the part of the deduction for "losses incurred" which represents unpaid losses at the close of the taxable year comprises only actual unpaid losses stated in amounts which, based upon the facts in each case and the company's experience with similar cases, can be said to represent a fair and reasonable estimate of the amount the company will be required to pay. Amounts included in, or added to, the estimates of such losses which, in the opinion of the district director are in excess of the actual liability determined as provided in the preceding sentence will be disallowed as a deduction. The district director may require any such insurance company to submit such detailed information with respect to its actual experience as is deemed necessary to establish the reasonableness of the deduction for "losses incurred."

(c) That part of the deduction for "losses incurred" which represents an adjustment to losses paid for salvage and reinsurance recoverable shall, except as hereinafter provided, include all salvage in course of liquidation, and all reinsurance in process of collection not otherwise taken into account as a reduction of losses paid, outstanding at the end of the taxable year. Salvage in course of liquidation includes all property (other than cash), real or personal, tangible or intangible, except that which may not be included by reason of express statutory provisions (or rules and regulations of an insurance department) of any State or Territory or the District of Columbia in which the company transacts business. Such salvage in course of liquidation shall be taken into account to the extent of the value thereof at the end of the taxable year as determined from a fair and reasonable estimate based upon either the facts in each case or the company's experience with similar cases. Cash received during the taxable year with respect to items of salvage or reinsurance shall be taken into account in computing losses paid during such taxable year.

#### § 1.832-2 Deductions.

(a) The deductions allowable are specified in section 832(c) and by reason

### § 1.832-3

of the provisions of section 832(c)(10) and (12) include in addition certain deductions provided in sections 161, and 241 and following. The deductions, however, are subject to the limitation provided in section 265, relating to expenses and interest in respect of tax-exempt income. The net operating loss deduction is computed under section 172 and the regulations thereunder. For the purposes of section 172, relating to net operating loss deduction, "gross income" shall mean gross income as defined in section 832(b)(1) and the allowable deductions shall be those allowed by section 832(c) with the exceptions and limitations set forth in section 172(d). In addition to the deduction for capital losses provided in subchapter P (section 1201 and following), chapter 1 of the Code, insurance companies are allowed a deduction for losses from capital assets sold or exchanged in order to obtain funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders. A special rule is provided for the application of the capital loss carryover provisions of section 1212. The deduction is the same as that allowed mutual insurance companies subject to the tax imposed by section 821; see section 822(c)(6) and the regulations thereunder. Insurance companies, other than mutual fire insurance companies described in § 1.831-1, are also allowed a deduction for dividends and similar distributions paid or declared to policyholders in their capacity as such. The deduction is otherwise the same as that allowed mutual insurance companies subject to the tax imposed by section 821; see section 823(2) and the regulations thereunder.

(b) Among the items which may not be deducted are income and profits taxes imposed by the United States, income and profits taxes imposed by any foreign country or possession of the United States (in cases where the company chooses to claim to any extent a credit for such taxes), taxes assessed against local benefits, decrease during the year due to adjustments in the book value of capital assets, decrease in liabilities during the year on account of reinsurance treaties, dividends paid to shareholders in their capacity as such, remittances to the home office

### 26 CFR Ch. I (4-1-14 Edition)

of a foreign insurance company by the United States branch, and borrowed money repaid.

(c) In computing taxable income of insurance companies, losses sustained during the taxable year from the sale or other disposition of property are deductible subject to the limitation contained in section 1211. Insurance companies are entitled to the alternative taxes provided in section 1201.

[T.D. 6500, 25 FR 11814, Nov. 26, 1960, as amended by T.D. 6867, 30 FR 15094, Dec. 12, 1965]

### § 1.832-3 Taxable years affected.

Sections 1.832-1 and 1.832-2 are applicable only to taxable years beginning after December 31, 1953, and before January 1, 1963, and ending after August 16, 1954, and all references therein to sections of the Code and regulations are to sections of the Internal Revenue Code of 1954 and the regulations thereunder before amendments. Sections 1.832-4, 1.832-5, and 1.832-6 are applicable only to taxable years beginning after December 31, 1962, and all references therein to sections of the Code and regulations are to sections of the Internal Revenue Code of 1954 as amended.

[T.D. 6681, 28 FR 11129, Oct. 17, 1963]

### § 1.832-4 Gross income.

(a)(1) Gross income as defined in section 832(b)(1) means the gross amount of income earned during the taxable year from interest, dividends, rents, and premium income, computed on the basis of the underwriting and investment exhibit of the annual statement approved by the National Convention of Insurance Commissioners, as well as the gain derived from the sale or other disposition of property, and all other items constituting gross income under section 61, except that in the case of a mutual fire insurance company described in section 831(a)(3)(A) the amount of single deposit premiums received, but not assessments, shall be excluded from gross income. Section 832(b)(1)(D) provides that in the case of a mutual fire or flood insurance company described in section 831(a)(3)(B), there shall be included in gross income an amount equal to 2 percent of the

premiums earned during the taxable year on contracts described in section 831(a)(3)(B) after deduction of premium deposits returned or credited during such taxable year with respect to such contracts. Gross income does not include increase in liabilities during the year on account of reinsurance treaties, remittances from the home office of a foreign insurance company to the United States branch, borrowed money, or gross increase due to adjustments in book value of capital assets.

(2) The underwriting and investment exhibit is presumed to reflect the true net income of the company, and insofar as it is not inconsistent with the provisions of the Code will be recognized and used as a basis for that purpose. All items of the exhibit, however, do not reflect an insurance company's income as defined in the Code. By reason of the definition of investment income, miscellaneous items which are intended to reflect surplus but do not properly enter into the computation of income, such as dividends declared to shareholders in their capacity as such, home office remittances and receipts, and special deposits, are ignored. Gain or loss from agency balances and bills receivable not admitted as assets on the underwriting and investment exhibit will be ignored, excepting only such agency balances and bills receivable as have been allowed as deductions for worthless debts or, having been previously so allowed, are recovered during the taxable year.

(3) *Premiums earned.* The determination of premiums earned on insurance contracts during the taxable year begins with the insurance company's gross premiums written on insurance contracts during the taxable year, reduced by return premiums and premiums paid for reinsurance. Subject to the exceptions in sections 832(b)(7), 832(b)(8), and 833(a)(3), this amount is increased by 80 percent of the unearned premiums on insurance contracts at the end of the preceding taxable year, and is decreased by 80 percent of the unearned premiums on insurance contracts at the end of the current taxable year.

(4) *Gross premiums written*—(i) *In general.* Gross premiums written are amounts payable for insurance cov-

erage. The label placed on a payment in a contract does not determine whether an amount is a gross premium written. Gross premiums written do not include other items of income described in section 832(b)(1)(C) (for example, charges for providing loss adjustment or claims processing services under administrative services or cost-plus arrangements). Gross premiums written on an insurance contract include all amounts payable for the effective period of the insurance contract. To the extent that amounts paid or payable with respect to an arrangement are not gross premiums written, the insurance company may not treat amounts payable to customers under the applicable portion of such arrangements as losses incurred described in section 832(b)(5).

(ii) *Items included.* Gross premiums written include—

(A) Any additional premiums resulting from increases in risk exposure during the effective period of an insurance contract;

(B) Amounts subtracted from a premium stabilization reserve to pay for insurance coverage; and

(C) Consideration in respect of assuming insurance liabilities under insurance contracts not issued by the taxpayer (such as a payment or transfer of property in an assumption reinsurance transaction).

(5) *Method of reporting gross premiums written*—(i) *In general.* Except as otherwise provided under this paragraph (a)(5), an insurance company reports gross premiums written for the earlier of the taxable year that includes the effective date of the insurance contract or the year in which the company receives all or a portion of the gross premium for the insurance contract. The effective date of the insurance contract is the date on which the insurance coverage provided by the contract commences. The effective period of an insurance contract is the period over which one or more rates for insurance coverage are guaranteed in the contract. If a new rate for insurance coverage is guaranteed after the effective date of an insurance contract, the making of such a guarantee generally

is treated as the issuance of a new insurance contract with an effective period equal to the duration of the new guaranteed rate for insurance coverage.

(ii) *Special rule for additional premiums resulting from an increase in risk exposure.* An insurance company reports additional premiums that result from an increase in risk exposure during the effective period of an insurance contract in gross premiums written for the taxable year in which the change in risk exposure occurs. Unless the increase in risk exposure is of temporary duration (for example, an increase in risk exposure under a workers' compensation policy due to seasonal variations in the policyholder's payroll), the company reports additional premiums resulting from an increase in risk exposure based on the remainder of the effective period of the insurance contract.

(iii) *Exception for certain advance premiums.* If an insurance company receives a portion of the gross premium for an insurance contract prior to the first day of the taxable year that includes the effective date of the contract, the company may report the advance premium (rather than the full amount of the gross premium for the contract) in gross premiums written for the taxable year in which the advance premium is received. An insurance company may adopt this method of reporting advance premiums only if the company's deduction for premium acquisition expenses for the taxable year in which the company receives the advance premium does not exceed the limitation of paragraph (a)(5)(vii) of this section. A company that reports an advance premium in gross premiums written under this paragraph (a)(5)(iii) takes into account the remainder of the gross premium written and premium acquisition expenses for the contract in the taxable year that includes the effective date of the contract. A company that adopts this method of reporting advance premiums must use the method for all contracts with advance premiums.

(iv) *Exception for certain cancellable accident and health insurance contracts with installment premiums.* If an insurance company issues or proportionally reinsures a cancellable accident and

health insurance contract (other than a contract with an effective period that exceeds 12 months) for which the gross premium is payable in installments over the effective period of the contract, the company may report the installment premiums (rather than the total gross premium for the contract) in gross premiums written for the earlier of the taxable year in which the installment premiums are due under the terms of the contract or the year in which the installment premiums are received. An insurance company may adopt this method of reporting installment premiums for a cancellable accident and health insurance contract only if the company's deduction for premium acquisition expenses for the first taxable year in which an installment premium is due or received under the contract does not exceed the limitation of paragraph (a)(5)(vii) of this section. A company that adopts this method of reporting installment premiums for a cancellable accident and health contract must use the method for all of its cancellable accident and health insurance contracts with installment premiums.

(v) *Exception for certain multi-year insurance contracts.* If an insurance company issues or proportionally reinsures an insurance contract, other than a contract described in paragraph (a)(5)(vi) of this section, with an effective period that exceeds 12 months, for which the gross premium is payable in installments over the effective period of the contract, the company may treat the insurance coverage provided under the multi-year contract as a series of separate insurance contracts. The first contract in the series is treated as having been written for an effective period of twelve months. Each subsequent contract in the series is treated as having been written for an effective period equal to the lesser of 12 months or the remainder of the period for which the rates for insurance coverage are guaranteed in the multi-year insurance contract. An insurance company may adopt this method of reporting premiums on a multi-year contract only if the company's deduction for premium acquisition expenses for each year of the multi-year contract does not exceed the limitation of paragraph

(a)(5)(vii) of this section. A company that adopts this method of reporting premiums for a multi-year contract must use the method for all multi-year contracts with installment premiums.

(vi) *Exception for insurance contracts described in section 832(b)(7).* If an insurance company issues or reinsures the risks related to a contract described in section 832(b)(7), the company may report gross premiums written for the contract in the manner required by sections 803 and 811(a) for life insurance companies. An insurance company may adopt this method of reporting premiums on contracts described in section 832(b)(7) only if the company also determines the deduction for premium acquisition costs for the contract in accordance with section 811(a), as adjusted by the amount required to be taken into account under section 848 in connection with the net premiums of the contract. A company that adopts this method of reporting premiums for a contract described in section 832(b)(7) must use the method for all of its contracts described in that section.

(vii) *Limitation on deduction of premium acquisition expenses.* An insurance company's deduction for premium acquisition expenses (for example, commissions, state premium taxes, overhead reimbursements to agents or brokers, and other similar amounts) related to an insurance contract is within the limitation of this paragraph (a)(5)(vii) if—

(A) The ratio obtained by dividing the sum of the company's deduction for premium acquisition expenses related to the insurance contract for the taxable year and previous taxable years by the total premium acquisition expenses attributable to the insurance contract; does not exceed

(B) The ratio obtained by dividing the sum of the amounts included in gross premiums written with regard to the insurance contract for the taxable year and previous taxable years by the total gross premium written for the insurance contract.

(viii) *Change in method of reporting gross premiums.* An insurance company that adopts a method of accounting for gross premiums written and premium acquisition expenses described in paragraph (a)(5)(iii), (iv), (v), or (vi) of this

section must continue to use the method to report gross premiums written and premium acquisition expenses unless the company obtains the consent of the Commissioner to change to a different method under section 446(e) and § 1.446-1(e).

(6) *Return premiums—(i) In general.* An insurance company's liability for return premiums includes amounts previously included in an insurance company's gross premiums written, which are refundable to a policyholder or ceding company, provided that the amounts are fixed by the insurance contract and do not depend on the experience of the insurance company or the discretion of its management.

(ii) *Items included.* Return premiums include amounts—

(A) Which were previously paid and become refundable due to policy cancellations or decreases in risk exposure during the effective period of an insurance contract;

(B) Which reflect the unearned portion of unpaid premiums for an insurance contract that is canceled or for which there is a decrease in risk exposure during its effective period; or

(C) Which are either previously paid and refundable or which reflect the unearned portion of unpaid premiums for an insurance contract, arising from the redetermination of a premium due to correction of posting or other similar errors.

(7) *Method of reporting return premiums.* An insurance company reports the liability for a return premium resulting from the cancellation of an insurance contract for the taxable year in which the contract is canceled. An insurance company reports the liability for a return premium attributable to a reduction in risk exposure under an insurance contract for the taxable year in which the reduction in risk exposure occurs.

(8) *Unearned premiums—(i) In general.* The unearned premium for a contract, other than a contract described in section 816(b)(1)(B), generally is the portion of the gross premium written that is attributable to future insurance coverage during the effective period of the insurance contract. However, unearned premiums held by an insurance company with regard to the net value of

risks reinsured with other solvent companies (whether or not authorized to conduct business under state law) are subtracted from the company's unearned premiums. Unearned premiums also do not include any additional liability established by the insurance company on its annual statement to cover premium deficiencies. Unearned premiums do not include an insurance company's estimate of its liability for amounts to be paid or credited to a customer with regard to the expired portion of a retrospectively rated contract (retro credits). An insurance company's estimate of additional amounts payable by its customers with regard to the expired portion of a retrospectively rated contract (retro debits) cannot be subtracted from unearned premiums.

(ii) *Special rules for unearned premiums.* For purposes of computing "premiums earned on insurance contracts during the taxable year" under section 832(b)(4), the amount of unearned premiums includes—

(A) Life insurance reserves (as defined in section 816(b), but computed in accordance with section 807(d) and sections 811(c) and (d));

(B) In the case of a mutual flood or fire insurance company described in section 832(b)(1)(D) (with respect to contracts described in that section), the amount of unabsorbed premium deposits that the company would be obligated to return to its policyholders at the close of the taxable year if all its insurance contracts were terminated at that time;

(C) In the case of an interinsurer or reciprocal underwriter that reports unearned premiums on its annual statement net of premium acquisition expenses, the unearned premiums on the company's annual statement increased by the portion of premium acquisition expenses allocable to those unearned premiums; and

(D) In the case of a title insurance company, its discounted unearned premiums (computed in accordance with section 832(b)(8)).

(9) *Method of determining unearned premiums.* If the risk of loss under an insurance contract does not vary significantly over the effective period of the contract, the unearned premium

attributable to the unexpired portion of the effective period of the contract is determined on a pro rata basis. If the risk of loss varies significantly over the effective period of the contract, the insurance company may consider the pattern and incidence of the risk in determining the portion of the gross premium that is attributable to the unexpired portion of the effective period of the contract. An insurance company that uses a method of computing unearned premiums other than the pro rata method must maintain sufficient information to demonstrate that its method of computing unearned premiums accurately reflects the pattern and incidence of the risk for the insurance contract.

(10) *Examples.* The provisions of paragraphs (a)(4) through (a)(9) of this section are illustrated by the following examples:

*Example 1.* (i) IC is a non-life insurance company which, pursuant to section 843, files its returns on a calendar year basis. IC writes a casualty insurance contract that provides insurance coverage for a one-year period beginning on July 1, 2000 and ending on June 30, 2001. IC charges a \$500 premium for the insurance contract, which may be paid either in full by the effective date of the contract or in quarterly installments over the contract's one year term. The policyholder selects the installment payment option. As of December 31, 2000, IC collected \$250 of installment premiums for the contract.

(ii) The effective period of the insurance contract begins on July 1, 2000 and ends on June 30, 2001. For the taxable year ending December 31, 2000, IC includes the \$500 gross premium, based on the effective period of the contract, in gross premiums written under section 832(b)(4)(A). IC's unearned premium with respect to the contract was \$250 as of December 31, 2000. Pursuant to section 832(b)(4)(B), to determine its premiums earned, IC deducts \$200 ( $\$250 \times .8$ ) for the insurance contract at the end of the taxable year.

*Example 2.* (i) The facts are the same as *Example 1*, except that the insurance contract has a stated term of 5 years. On each contract anniversary date, IC may adjust the rate charged for the insurance coverage for the succeeding 12 month period. The amount of the adjustment in the charge for insurance coverage is not substantially limited under the insurance contract.

(ii) Under paragraph (a)(5)(i) of this section, IC is required to report gross premiums written for the insurance contract based on

the effective period for the contract. The effective period of the insurance contract is the period for which a rate for insurance coverage is guaranteed in the contract. Although the insurance contract issued by IC has a stated term of 5 years, a rate for insurance coverage is guaranteed only for a period of 12 months beginning with the contract's effective date and each anniversary date thereafter. Thus, for the taxable year ending December 31, 2000, IC includes the \$500 gross premium for the 12 month period beginning with the contract's effective date in gross premiums written. IC's unearned premium with respect to the contract was \$250 as of December 31, 2000. Pursuant to section 832(b)(4)(B), to determine its premiums earned, IC deducts \$200 ( $\$250 \times .8$ ) for the insurance contract at the end of the taxable year.

*Example 3.* (i) The facts are the same as *Example 1*, except that coverage under the insurance contract begins on January 1, 2001 and ends on December 31, 2001. On December 15, 2000, IC collects the first \$125 premium installment on the insurance contract. For the taxable year ended December 31, 2000, IC deducts \$20 of premium acquisition expenses related to the insurance contract. IC's total premium acquisition expenses, based on the insurance contract's \$500 gross premium, are \$80.

(ii) Under paragraph (a)(5)(iii) of this section, IC may elect to report only the \$125 advance premium (rather than the contract's \$500 gross premium) in gross premiums written for the taxable year ended December 31, 2000, provided that IC's deduction for the premium acquisition expenses related to the insurance contract does not exceed the limitation in paragraph (a)(5)(vii). IC's deduction for premium acquisition expenses is within this limitation only if the ratio of the insurance contract's premium acquisition expenses deducted for the taxable year and any previous taxable year to the insurance contract's total premium acquisition expenses does not exceed the ratio of the amounts included in gross premiums written for the taxable year and any previous taxable year for the contract to the total gross premium written for the contract.

(iii) For the taxable year ended December 31, 2000, IC deducts \$20 of premium acquisition expenses related to the insurance contract. This deduction represents 25% of the total premium acquisition expenses for the insurance contract ( $\$20 / \$80 = 25\%$ ). This ratio does not exceed the ratio of the \$125 advance premium to the insurance contract's \$500 gross premium ( $\$125 / \$500 = 25\%$ ). Therefore, under paragraph (a)(5)(iii) of this section, IC may elect to report only the \$125 advance premium (rather than the \$500 gross premium) in gross premiums written for the taxable year ending December 31, 2000. IC reports the balance of the gross premium for

the insurance contract (\$375) and deducts the remaining premium acquisition expenses (\$60) for the insurance contract in the taxable year ending December 31, 2001.

*Example 4.* (i) The facts are the same as *Example 3*, except that for the taxable year ending December 31, 2000, IC deducts \$60 of premium acquisition expenses related to the insurance contract.

(ii) For the taxable year ended December 31, 2000, IC deducted 75% of total premium acquisition expenses for the insurance contract ( $\$60 / \$80 = 75\%$ ). This ratio exceeds the ratio of the \$125 advance premium to the \$500 gross premium ( $\$125 / \$500 = 25\%$ ). Because IC's deduction for premium acquisition expenses allocable to the contract exceeds the limitation in paragraph (a)(5)(vii) of this section, paragraph (a)(5)(i) of this section requires IC to report the \$500 gross premium in gross premiums written for the taxable year ending December 31, 2000. IC's unearned premium with respect to the contract was \$500 as of December 31, 2000. Pursuant to section 832(b)(4)(B), to determine its premiums earned, IC deducts \$400 ( $\$500 \times .8$ ) for the insurance contract at the end of the taxable year.

*Example 5.* (i) IC is a non-life insurance company which, pursuant to section 843, files its returns on a calendar year basis. On August 1, 2000, IC issues a one-year cancellable accident and health insurance policy to X, a corporation with 80 covered employees. The gross premium written for the insurance contract is \$320,000. Premiums are payable in monthly installments. As of December 31, 2000, IC has collected \$150,000 of installment premiums from X. For the taxable year ended December 31, 2000, IC has paid or incurred \$21,000 of premium acquisition expenses related to the insurance contract. IC's total premium acquisition expenses for the insurance contract, based on the \$320,000 gross premium, are \$48,000.

(ii) Under paragraph (a)(5)(iv) of this section, IC may elect to report only the \$150,000 of installment premiums (rather than the \$320,000 estimated gross premium) in gross premiums written for the taxable year ended December 31, 2000, provided that its deduction for premium acquisition expenses allocable to the insurance contract does not exceed the limitation in paragraph (a)(5)(vii). For the taxable year ended December 31, 2000, IC deducts \$21,000 of premium acquisition expenses related to the insurance contract, or 43.75% of total premium acquisition expenses for the insurance contract ( $\$21,000 / \$48,000 = 43.75\%$ ). This ratio does not exceed the ratio of installment premiums to the gross premium for the contract ( $\$150,000 / \$320,000 = 46.9\%$ ). Therefore, under paragraph (a)(5)(iv) of this section, IC may elect to report only \$150,000 of installment premiums for the insurance contract (rather than \$320,000 of gross premium) in gross premiums

written for the taxable year ending December 31, 2000.

*Example 6.* (i) IC is a non-life insurance company which, pursuant to section 843, files its returns on a calendar year basis. On July 1, 2000, IC issues a one-year workers' compensation policy to X, an employer. The gross premium for the policy is determined by applying a monthly rate of \$25 to each of X's employees. This rate is guaranteed for a period of 12 months, beginning with the effective date of the contract. On July 1, 2000, X has 1,050 employees. Based on the assumption that X's payroll would remain constant during the effective period of the contract, IC determines an estimated gross premium for the contract of \$315,000 ( $1,050 \times \$25 \times 12 = \$315,000$ ). The estimated gross premium is payable by X in equal monthly installments. At the end of each calendar quarter, the premiums payable under the contract are adjusted based on an audit of X's actual payroll during the preceding three months of coverage.

(ii) Due to an expansion of X's business in 2000, the actual number of employees covered under the contract during each month of the period between July 1, 2000 and December 31, 2000 is 1,050 (July), 1,050 (August), 1,050 (September), 1,200 (October), 1,200 (November), and 1,200 (December). The increase in the number of employees during the year is not attributable to a temporary or seasonal variation in X's business activities and is expected to continue for the remainder of the effective period of the contract.

(iii) Under paragraph (a)(5)(i) of this section, IC is required to report gross premiums written for the insurance contract based on the effective period of the contract. The effective period of X's contract is based on the 12 month period for which IC has guaranteed rates for insurance coverage. Under paragraph (a)(5)(ii), IC must also report the additional premiums resulting from the change in risk exposure under the contract for the taxable year in which the change in such exposure occurs. Unless the change in risk exposure is of temporary duration, the additional gross premiums are included in gross premiums written for the remainder of the effective period of the contract. Thus, for the taxable year ending December 31, 2000, IC reports gross premiums written of \$348,750 with respect to the workers' compensation contract issued to X, consisting of the sum of the initial gross premium for the contract (\$315,000) plus the additional gross premium attributable to the 150 employees added to X's payroll who will be covered during the last nine months of the contract's effective period ( $150 \times \$25$  (monthly premium)  $\times 9 = \$33,750$ ). IC's unearned premium with respect to the contract was \$180,000 as of December 31, 2000, which consists of the sum of the remaining portion of the original gross premium ( $\$315,000 \times 6 / 12 = \$157,500$ ), plus the ad-

ditional premiums resulting from the change in risk exposure ( $\$33,750 \times 6 / 9 = \$22,500$ ) that are allocable to the remaining six months of the contract's effective period. Pursuant to section 832(b)(4)(B), to determine its premiums earned, IC deducts \$144,000 ( $\$180,000 \times .8$ ) for the insurance contract at the end of the taxable year.

*Example 7.* (i) The facts are the same as *Example 6*, except that the increase in the number of X's employees for the period ending December 31, 2000 is attributable to a seasonal variation in X's business activity.

(ii) Under paragraph (a)(5)(ii) of this section, for the taxable year ending December 31, 2000, IC reports gross premiums written of \$326,500, consisting of the sum of the initial gross premium for the contract (\$315,000) plus the additional premium attributable to the temporary increase in risk exposure during the taxable year ( $150 \times \$25 \times 3 = \$11,250$ ). The unearned premium that is allocable to the remaining six months of the effective period of the contract is \$157,500. Pursuant to section 832(b)(4)(B), to determine its premiums earned, IC deducts \$126,000 ( $\$157,500 \times .8$ ) for the insurance contract at the end of the taxable year.

*Example 8.* (i) IC, a non-life insurance company, issues a noncancellable accident and health insurance contract (other than a qualified long-term care insurance contract, as defined in section 7702B(b)) to A, an individual, on July 1, 2000. The contract has an entry-age annual premium of \$2,400, which is payable by A in equal monthly installments of \$200 on the first day of each month of coverage. IC incurs agents' commissions, premium taxes, and other premium acquisition expenses equal to 10% of the gross premiums received for the contract. As of December 31, 2000, IC has collected \$1,200 of installment premiums for the contract.

(ii) A noncancellable accident and health insurance contract is a contract described in section 832(b)(7). Thus, under paragraph (a)(5)(vi) of this section, IC may report gross premiums written in the manner required for life insurance companies under sections 803 and 811. Accordingly, for the taxable year ending December 31, 2000, IC may report gross premiums written of \$1,200, based on the premiums actually received on the contract. Pursuant to section (a)(5)(vi) of this section, IC deducts a total of \$28 of premium acquisition costs for the contract, based on the difference between the acquisition costs actually paid or incurred under section 811(a) ( $\$1,200 \times .10 = \$120$ ) and the amount required to be taken into account under section 848 in connection with the net premiums for the contract ( $\$1,200 \times .077 = \$92$ ).

(iii) Under paragraph (a)(8)(ii)(A) of this section, IC includes the amount of life insurance reserves (as defined in section 816(b)), but computed in accordance with section 807(d) and sections 811(c) and (d)) in unearned

premiums under section 832(b)(4)(B). Section 807(d)(3)(A)(iii) requires IC to use a two-year preliminary term method to compute the amount of life insurance reserves for a noncancellable accident and health insurance contract (other than a qualified long-term care contract). Under this tax reserve method, no portion of the \$1,200 gross premium received by IC for A's contract is allocable to future insurance coverage. Accordingly, for the taxable year ending December 31, 2000, no life insurance reserves are included in IC's unearned premiums under section 832(b)(4)(B) with respect to the contract.

*Example 9.* (i) IC, a non-life insurance company, issues an insurance contract with a twelve month effective period for \$1,200 on December 1, 2000. Immediately thereafter, IC reinsures 90% of its liability under the insurance contract for \$900 with IC-2, an unrelated and solvent insurance company. On December 31, 2000, IC-2 has an \$825 unearned premium with respect to the reinsurance contract it issued to IC. In computing its earned premiums, pursuant to section 832(b)(4)(B), IC-2 deducts \$660 of unearned premiums ( $\$825 \times .8$ ) with respect to the reinsurance contract.

(ii) Under paragraph (a)(8)(i) of this section, unearned premiums held by an insurance company with regard to the net value of the risks reinsured in other solvent companies are deducted from the ceding company's unearned premiums taken into account for purposes of section 832(b)(4)(B). If IC had not reinsured 90% of its risks, IC's unearned premium for the insurance contract would have been \$1,100 ( $\$1,200 \times 11 / 12$ ) and IC would have deducted \$880 ( $\$1,100 \times .8$ ) of unearned premiums with respect to such contract. However, because IC reinsured 90% of its risks under the contract with IC-2, as of December 31, 2000, the net value of the risks retained by IC for the remaining 11 months of the effective period of the contract is \$110 ( $\$1,100 - \$990$ ). For the taxable year ending December 31, 2000, IC includes the \$1,200 gross premium in its gross premiums written and deducts the \$900 reinsurance premium paid to IC-2 under section 832(b)(4)(A). Pursuant to section 832(b)(4)(B), to determine its premiums earned, IC deducts \$88 ( $\$110 \times .8$ ) for the insurance contract at the end of the taxable year.

(11) *Change in method of accounting—*

(i) *In general.* A change in the method of determining premiums earned to comply with the provisions of paragraphs (a)(3) through (a)(10) of this section is a change in method of accounting for which the consent of the Commissioner is required under section 446(e) and § 1.446-1(e).

(ii) *Application.* For the first taxable year beginning after December 31, 1999,

a taxpayer is granted consent of the Commissioner to change its method of accounting for determining premiums earned to comply with the provisions of paragraphs (a)(3) through (a)(10) of this section. A taxpayer changing its method of accounting in accordance with this section must follow the automatic change in accounting provisions of Rev. Proc. 99-49, 1999-52 I.R.B. 725 (see § 601.601(d)(2) of this chapter), except that—

(A) The scope limitations in section 4.02 of Rev. Proc. 99-49 shall not apply;

(B) The timely duplicate filing requirement in section 6.02(2) of Rev. Proc. 99-49 shall not apply; and

(C) If the method of accounting for determining premiums earned is an issue under consideration within the meaning of section 3.09 of Rev. Proc. 99-49 as of January 5, 2000, then section 7.01 of Rev. Proc. 99-49 shall not apply.

(12) *Effective date.* Paragraphs (a)(3) through (a)(11) of this section are applicable with respect to the determination of premiums earned for taxable years beginning after December 31, 1999.

(13) In computing the amount of unabsorbed premium deposits which a mutual fire or flood insurance company described in section 831(a)(3)(B) would be obligated to return to its policyholders at the close of its taxable year, the company must use its own schedule of unabsorbed premium deposit returns then in effect. A copy of the applicable schedule must be filed with the company's income tax return for each taxable year for which a computation based upon such schedule is made. In addition, a taxpayer making such a computation must provide the following information for each taxable year for which the computation is made:

(i) The amount of gross premiums received during the taxable year, and the amount of premiums paid for reinsurance during the taxable year, on the policies described in section 831(a)(3)(B) and on other policies;

(ii) The amount of insurance written during the taxable year under the policies described in section 831(a)(3)(B) and under other policies, and the amount of such insurance written which was reinsured during the taxable

year. The information required under this subdivision shall only be submitted upon the specific request of the district director for a statement setting forth such information, and, if required, such statement shall be filed in the manner provided by this subparagraph or in such other manner as is satisfactory to the district director;

(iii) The amount of premiums earned during the taxable year on the policies described in section 831(a)(3)(B) and on other policies and the computations by which such amounts were determined, including sufficient information to support the taxpayer's determination of the amount of unearned premiums on premium deposit plan and other policies at the beginning and end of the taxable year, and the amount of unabsorbed premium deposits at the beginning and end of the taxable year on policies described in section 831(a)(3)(B).

The information required by this subparagraph shall be set forth in a statement attached to the taxpayer's income tax return for the taxable year for which such information is being provided. Such statement shall include the name and address of the taxpayer, and shall be filed not later than the date prescribed by law (including extensions thereof) for filing the income tax return for the taxable year.

(14) In computing "losses incurred" the determination of unpaid losses at the close of each year must represent actual unpaid losses as nearly as it is possible to ascertain them.

(b) *Losses incurred.* Every insurance company to which this section applies must be prepared to establish to the satisfaction of the district director that the part of the deduction for "losses incurred" which represents unpaid losses at the close of the taxable year comprises only actual unpaid losses. See section 846 for rules relating to the determination of discounted unpaid losses. These losses must be stated in amounts which, based upon the facts in each case and the company's experience with similar cases, represent a fair and reasonable estimate of the amount the company will be required to pay. Amounts included in, or added to, the estimates of unpaid losses which, in the opinion of the district di-

rector, are in excess of a fair and reasonable estimate will be disallowed as a deduction. The district director may require any insurance company to submit such detailed information with respect to its actual experience as is deemed necessary to establish the reasonableness of the deduction for "losses incurred."

(c) *Losses incurred are reduced by salvage.* Under section 832(b)(5)(A), losses incurred are computed by taking into account losses paid reduced by salvage and reinsurance recovered, the change in discounted unpaid losses, and the change in estimated salvage and reinsurance recoverable. For purposes of section 832(b)(5)(A)(iii), estimated salvage recoverable includes all anticipated recoveries on account of salvage, whether or not the salvage is treated, or may be treated, as an asset for state statutory accounting purposes. Estimates of salvage recoverable must be based on the facts of each case and the company's experience with similar cases. Except as otherwise provided in guidance published by the Commissioner in the Internal Revenue Bulletin, estimated salvage recoverable must be discounted either—

(1) By using the applicable discount factors published by the Commissioner for estimated salvage recoverable; or

(2) By using the loss payment pattern for a line of business as the salvage recovery pattern for that line of business and by using the applicable interest rate for calculating unpaid losses under section 846(c). For purposes of section 832(b)(5)(A) and the regulations thereunder, the term "salvage recoverable" includes anticipated recoveries on account of subrogation claims arising with respect to paid or unpaid losses.

(d) *Increase in unpaid losses shown on annual statement in certain circumstances—*(1) *In general.* An insurance company that takes estimated salvage recoverable into account in determining the amount of its unpaid losses shown on its annual statement is allowed to increase its unpaid losses by the amount of estimated salvage recoverable taken into account if the company complies with the disclosure requirement of paragraph (d)(2) of this section. This adjustment shall not be used in determining under section

846(d) the loss payment pattern for a line of business.

(2) *Disclosure requirement.* (i) *In general.* A company described in paragraph (d)(1) of this section is allowed to increase the unpaid losses shown on its annual statement only if the company either—

(A) Discloses on its annual statement, by line of business and accident year, the extent to which estimated salvage recoverable is taken into account in computing the unpaid losses shown on the annual statement filed by the company for the calendar year ending with or within the taxable year of the company; or

(B) Files a statement on or before the due date of its Federal income tax return (determined without regard to extensions) with the appropriate state regulatory authority of each state to which the company is required to submit an annual statement. The statement must be contained in a separate document captioned “DISCLOSURE CONCERNING LOSS RESERVES” and must disclose, by line of business and accident year, the extent to which estimated salvage recoverable is taken into account in computing the unpaid losses shown on the annual statement filed by the company for the calendar year ending with or within the taxable year of the company.

(ii) *Transitional rule.* For a taxable year ending before December 31, 1991, a taxpayer is deemed to satisfy the disclosure requirement of paragraph (d)(2)(i)(B) of this section if the taxpayer files the statement described in paragraph (d)(2)(i)(B) of this section before March 17, 1992.

(3) *Failure to disclose in a subsequent year.* If a company that claims the increase permitted by paragraph (d)(1) of this section fails in a subsequent taxable year to make the disclosure described in paragraph (d)(2) of this section, the company cannot claim an increase under paragraph (d)(1) of this section in any subsequent taxable year without the consent of the Commissioner.

(e) *Treatment of estimated salvage recoverable—*(1) *In general.* An insurance company is required to take estimated salvage recoverable (including that which cannot be treated as an asset for

state statutory accounting purposes) into account in computing the deduction for losses incurred. Except as provided in paragraph (e)(2)(iii) of this section, an insurance company must apply this method of accounting to estimated salvage recoverable for all lines of business and for all accident years.

(2) *Change in method of accounting—*(i) If an insurance company did not take estimated salvage recoverable into account as required by paragraph (c) of this section for its last taxable year beginning before January 1, 1990, taking estimated salvage recoverable into account as required by paragraph (c) of this section is a change in method of accounting.

(ii) If a company does not claim the deduction under section 11305(c)(3) of the 1990 Act, the company must take into account 13 percent of the adjustment that would otherwise be required under section 481 for pre-1990 accident years as a result of the change in accounting method. This paragraph (e)(2)(ii) applies only to an insurance company subject to tax under section 831.

(iii) If a company claims the deduction under section 11305(c)(3) of the 1990 Act and paragraph (f) of this section, the company must implement the change in method of accounting for estimated salvage recoverable for post-1989 taxable years pursuant to a “cut-off” method.

(3) *Rule for overestimates.* An insurance company is required under section 11305(c)(4) of the 1990 Act to include in gross income 87 percent of any amount (adjusted for discounting) by which the section 481 adjustment is overestimated. The rule is applied by comparing the amount of the section 481 adjustment (determined without regard to paragraph (e)(2)(ii) of this section and any discounting) to the sum of the actual salvage recoveries and remaining undiscounted estimated salvage recoverable that are attributable to losses incurred in accident years beginning before 1990. For any taxable year beginning after December 31, 1989, any excess of the section 481 adjustment over this sum (reduced by amounts treated as overestimates in prior taxable years pursuant to this paragraph (e)(3)) is an overestimate. To determine

the amount to be included in income, it is necessary to discount this excess and multiply the resulting amount by 87 percent.

(f) *Special deduction*—(1) *In general.* Under section 11305(c)(3) of the 1990 Act, an insurance company may deduct an amount equal to 87 percent of the discounted amount of estimated salvage recoverable that the company took into account in determining the deduction for losses incurred under section 832(b)(5) in the last taxable year beginning before January 1, 1990. A company that claims the special deduction must establish to the satisfaction of the district director that the deduction represents only the discounted amount of estimated salvage recoverable that was actually taken into account by the company in computing losses incurred for that taxable year.

(2) *Safe harbor.* The requirements of paragraph (f)(1) of this section are deemed satisfied and the amount that the company reports as bona fide estimated salvage recoverable is not subject to adjustment by the district director, if—

(i) The company files with the insurance regulatory authority of the company's state of domicile, on or before September 16, 1991, a statement disclosing the extent to which losses incurred for each line of business reported on its 1989 annual statement were reduced by estimated salvage recoverable,

(ii) The company attaches a statement to its Federal income tax return filed for the first taxable year beginning after December 31, 1989, agreeing to apply the special rule for overestimates under section 11305(c)(4) of the 1990 Act to the amount of estimated salvage recoverable for which it has taken the special deduction, and

(iii) In the case of a company that is a member of a consolidated group, each insurance company subject to tax under section 831 that is included in the consolidated group complies with paragraph (f)(2)(ii) of this section with respect to its special deduction, if any.

(3) *Limitations on special deduction*—(i) The special deduction under section 11305(c)(3) of the 1990 Act is available only to an insurance company subject to tax under section 831.

(ii) An insurance company that claimed the benefit of the “fresh start” with respect to estimated salvage recoverable under section 1023(e) of the Tax Reform Act of 1986 may not claim the special deduction allowed by section 11305(c)(3) of the 1990 Act to the extent of the estimated salvage recoverable for which a fresh start benefit was previously claimed.

(iii) A company that claims the special deduction is precluded from also claiming the section 481 adjustment provided in paragraph (e)(2)(ii) of this section for pre-1990 accident years.

(g) *Effective date.* Paragraphs (b) through (f) of this section are effective for taxable years beginning after December 31, 1989.

[T.D. 6681, 28 FR 11129, Oct. 17, 1963, as amended by T.D. 8171, 53 FR 118, Jan. 5, 1988; T.D. 8293, 55 FR 9425, Mar. 14, 1990. Redesignated and amended by T.D. 8390, 57 FR 3132, Jan. 28, 1992; 57 FR 6353, Feb. 24, 1992; T.D. 8857, 65 FR 706, Jan. 6, 2000]

#### § 1.832-5 Deductions.

(a) The deductions allowable are specified in section 832(c) and by reason of the provisions of section 832(c)(10) and (12) include in addition certain deductions provided in sections 161, and 241 and following. The deductions, however, are subject to the limitation provided in section 265, relating to expenses and interest in respect of tax-exempt income. The net operating loss deduction is computed under section 172 and the regulations thereunder. For the purposes of section 172, relating to net operating loss deduction, “gross income” shall mean gross income as defined in section 832(b)(1) and the allowable deductions shall be those allowed by section 832(c) with the exceptions and limitations set forth in section 172(d). In addition to the deduction for capital losses provided in subchapter P (section 1201 and following), chapter 1 of the Code, insurance companies are allowed a deduction for losses from capital assets sold or exchanged in order to obtain funds to meet abnormal insurance losses and to provide for the payment of dividends and similar distributions to policyholders. A special rule is provided for the application of the capital loss carryover provisions of section 1212. The deduction is the same

as that allowed mutual insurance companies subject to the tax imposed by section 821; see section 822(c)(6) and the regulation thereunder. Insurance companies, other than mutual fire insurance companies described in section 831(a)(3)(A) and the regulations thereunder, are also allowed a deduction for dividends and similar distributions paid or declared to policyholders in their capacity as such. Similar distributions include such payments as the so-called unabsorbed premium deposits returned to policyholders by factory mutual insurance companies. The deduction is otherwise the same as that allowed mutual insurance companies subject to the tax imposed by section 821; see section 822(f)(2) and the regulations thereunder.

(b) Among the items which may not be deducted are income and profits taxes imposed by the United States, income and profits taxes imposed by any foreign country or possession of the United States (in cases where the company chooses to claim to any extent a credit for such taxes), taxes assessed against local benefits, decrease during the year due to adjustments in the book value of capital assets, decrease in liabilities during the year on account of reinsurance treaties, dividends paid to shareholders in their capacity as such, remittances to the home office of a foreign insurance company by the United States branch, and borrowed money repaid.

(c) In computing taxable income of insurance companies, losses sustained during the taxable year from the sale or other disposition of property are deductible subject to the limitation contained in section 1211. Insurance companies are entitled to the alternative taxes provided in section 1201.

[T.D. 6681, 28 FR 11130, Oct. 17, 1963, as amended by T.D. 6867, 30 FR 15094, Dec. 7, 1965]

**§ 1.832-6 Policyholders of mutual fire or flood insurance companies operating on the basis of premium deposits.**

For purposes of determining his taxable income for any taxable year, a taxpayer insured by a mutual fire or flood insurance company under a policy for which the premium deposit is

the same regardless of the length of the term for which the policy is written, and who is entitled to have returned or credited to him on the cancellation or expiration of such policy the unabsorbed portion of the premium deposit not required for losses, expenses, or establishment of reserves, may, if such amount is otherwise deductible under this chapter, deduct so much of his premium deposit as was absorbed by the company during the taxpayer's taxable year. The amount of the premium deposit absorbed during the taxpayer's taxable year shall be determined in accordance with the schedule of unabsorbed premium deposit returns in effect for the company during such taxable year. If the taxpayer is unable to determine the applicable rate of absorption in effect during his taxable year, he shall compute his deduction on the basis of the rate of absorption in effect at the end of the company's taxable year which next preceded the end of the taxpayer's taxable year. In such a case, an appropriate adjustment will be made upon the final determination of the rate of absorption applicable to the taxable year.

[T.D. 6681, 28 FR 11130, Oct. 17, 1963]

**§ 1.832-7T Treatment of salvage and reinsurance in computing "losses incurred" deduction, taxable years beginning before January 1, 1990 (temporary).**

(a) In computing "losses incurred" the determination of unpaid losses at the close of each year must represent actual unpaid losses as nearly as it is possible to ascertain them.

(b) Every insurance company to which this section applies must be prepared to establish to the satisfaction of the district director that the part of the deduction for "losses incurred" which represents unpaid losses at the close of the taxable year comprises only actual unpaid losses stated in amounts which, based upon the facts in each case and the company's experience with similar cases, can be said to represent a fair and reasonable estimate of the amount the company will be required to pay. Amounts included in, or added to, the estimates of such

losses which in the opinion of the district director are in excess of the actual liability determined as provided in the preceding sentence will be disallowed as a deduction. The district director may require any such insurance company to submit such detailed information with respect to its actual experience as is deemed necessary to establish the reasonableness of the deduction for "losses incurred".

(c) That part of the deduction for "losses incurred" which represents an adjustment to losses paid for salvage and reinsurance recoverable shall, except as hereinafter provided, include all salvage in course of liquidation, and all reinsurance in process of collection not otherwise taken into account as a reduction of losses paid, outstanding at the end of the taxable year. Salvage in course of liquidation includes all property (other than cash), real or personal, tangible or intangible, except that which may not be included by reason of express statutory provisions (or rules and regulations of an insurance department) of any State or Territory or the District of Columbia in which the company transacts business. Such salvage in course of liquidation shall be taken into account to the extent of the value thereof at the end of the taxable year as determined from a fair and reasonable estimate based upon either the facts in each case or the company's experience with similar cases. Cash received during the taxable year with respect to items of salvage or reinsurance shall be taken into account in computing losses paid during such taxable year.

(d) This section is effective for taxable years beginning before January 1, 1990.

[T.D. 8266, 54 FR 38970, Sept. 22, 1989; T.D. 8293, 55 FR 9425, Mar. 14, 1990]

**§ 1.833-1 Medical Loss Ratio under section 833(c)(5).**

(a) *In general.* Section 833 does not apply to an organization unless the organization's medical loss ratio (MLR) for a taxable year is at least 85 percent. Paragraph (b) of this section provides definitions that apply for purposes of section 833(c)(5) and this section. Paragraph (c) of this section provides rules for computing an organization's MLR

under section 833(c)(5). Paragraph (d) of this section addresses the treatment under section 833 of an organization that has an MLR of less than 85 percent. Paragraph (e) of this section provides the effective/applicability date.

(b) *Definitions.* The following definitions apply for purposes of section 833(c)(5) and this section.

(1) *Reimbursement for clinical services provided to enrollees.* The term *reimbursement for clinical services provided to enrollees* has the same meaning as that term has in section 300gg-18 of title 42, United States Code and the regulations issued under that section (see 45 CFR 158.140).

(2) *Total premium revenue.* The term *total premium revenue* means the total amount of premium revenue (excluding Federal and State taxes and licensing or regulatory fees and after accounting for payments or receipts for risk adjustment, risk corridors, and reinsurance under sections 1341, 1342, and 1343 of the Patient Protection and Affordable Care Act, Public Law 111-148 (124 Stat. 119 (2010)) (42 U.S.C. sections 18061, 18062, and 18063)) as those terms are used for purposes of section 300gg-18(b) of title 42, United States Code and the regulations issued under that section (see 45 CFR Part 158).

(c) *Computation of MLR under section 833(c)(5)*—(1) *In general.* Starting with the first taxable year beginning after December 31, 2015, and for all succeeding taxable years, an organization's MLR with respect to a taxable year is the ratio, expressed as a percentage, of the MLR numerator, as described in paragraph (c)(1)(i) of this section, to the MLR denominator, as described in paragraph (c)(1)(ii) of this section.

(i) *MLR numerator.* The numerator of an organization's MLR is the total premium revenue expended on reimbursement for clinical services provided to enrollees under its policies for the taxable year, computed using a three-year period in the same manner as those expenses are computed for the plan year for purposes of section 300gg-18(b) of title 42, United States Code and regulations issued under that section (see 45 CFR Part 158).

(ii) *MLR denominator.* The denominator of an organization's MLR is the

organization's total premium revenue for the taxable year, computed using a three-year period in the same manner as the total premium revenue is computed for the plan year for purposes of section 300gg-18(b) of title 42, United States Code and regulations issued under that section (see 45 CFR Part 158).

(2) *Transition rules.* The transition rules in paragraphs (c)(2)(i) and (c)(2)(ii) of this section apply solely for the first taxable year beginning after December 31, 2013, and the first taxable year beginning after December 31, 2014.

(i) *First taxable year beginning after December 31, 2013.* For the first taxable year beginning after December 31, 2013, the numerator of an organization's MLR is the total premium revenue expended on reimbursement for clinical services provided to enrollees under its policies for the first taxable year beginning after December 31, 2013, and the denominator of an organization's MLR is the organization's total premium revenue for the first taxable year beginning after December 31, 2013.

(ii) *First taxable year beginning after December 31, 2014.* For the first taxable year beginning after December 31, 2014, the numerator of an organization's MLR is the sum of the total premium revenue expended on reimbursement for clinical services provided to enrollees under its policies for the first taxable year beginning after December 31, 2013, and for the first taxable year beginning after December 31, 2014, and the denominator of an organization's MLR is the sum of the organization's total premium revenue for the first taxable year beginning after December 31, 2013, and for the first taxable year beginning after December 31, 2014.

(d) *Failure to qualify under section 833(c)(5)—(1) In general.* If, for any taxable year, an organization's MLR is less than 85 percent, then beginning in that taxable year and for each subsequent taxable year for which the organization's MLR remains less than 85 percent, paragraphs (d)(1)(i) through (d)(1)(iii) of this section apply.

(i) *Automatic stock insurance company status.* The organization is not taxable as a stock insurance company by reason of section 833(a)(1), but may be taxable as an insurance company if it oth-

erwise meets the requirements of section 831(c);

(ii) *Special deduction.* The organization is not allowed the special deduction set forth in section 833(b); and

(iii) *Premiums earned.* The organization must take into account 80 percent, rather than 100 percent, of its unearned premiums under section 832(b)(4) as it applies to other non-life insurance companies, provided the organization qualifies as an insurance company by meeting the requirements of section 831(c).

(2) *No material change.* An organization's loss of eligibility for treatment under section 833 solely by reason of section 833(c)(5) will not be treated as a material change in the operations of such organization or in its structure for purposes of section 833(c)(2)(C).

(e) *Effective/applicability date.* This section applies to taxable years beginning after December 31, 2013.

[T.D. 9651, 79 FR 757, Jan. 7, 2014]

#### § 1.846-0 Outline of provisions.

The following is a list of the headings in §§ 1.846-1 through 1.846-4.

##### § 1.846-1 Application of discount factors.

- (a) In general.
  - (1) Rules.
  - (2) Examples.
  - (3) Increase in discounted unpaid losses shown on the annual statement.
  - (4) Increase in unpaid losses which take into account estimated salvage recoverable.
  - (b) Applicable discount factors.
    - (1) In general.
      - (i) Discount factors published by the Service.
      - (ii) Composite discount factors.
      - (iii) Annual statement changes.
      - (2) Title insurance company reserves.
      - (3) Reinsurance business.
        - (i) Proportional reinsurance for accident years after 1987.
        - (ii) Non-proportional reinsurance.
          - (A) Accident years after 1991.
          - (B) Accident years 1988 through 1991.
        - (iii) Reinsurance for accident years before 1988.
        - (iv) 90 percent exception.
        - (4) International business.
        - (5) Composite discount factors.

##### § 1.846-2 Election by taxpayer to use its own historical loss payment pattern.

- (a) In general.
  - (b) Eligible line of business.
    - (1) In general.

## § 1.846-1

## 26 CFR Ch. I (4-1-14 Edition)

- (2) Other published guidance.
- (3) Special rule for 1987 determination year.
- (c) Anti-abuse rule.
- (d) Effect of section 338 election on section 846(e) election.

### § 1.846-3 *Fresh start and reserve strengthening.*

- (a) In general.
- (b) Applicable discount factors.
- (1) Calculation of beginning balance.
- (2) Example.
- (c) Rules for determining the amount of reserve strengthening.
  - (1) In general.
  - (2) Accident years after 1985.
    - (i) In general.
    - (ii) Hypothetical unpaid loss reserve.
  - (3) Accident years before 1986.
    - (i) In general.
    - (ii) Exceptions.
    - (iii) Certain transactions deemed to be reinsurance assumed (ceded) in 1986.
  - (d) Section 845.
  - (e) Treatment of reserve strengthening.
  - (f) Examples.

### § 1.846-4 *Effective dates.*

- (a) In general.
- (b) Section 338 election.

[T.D. 8433, 57 FR 40843, Sept. 8, 1992; 57 FR 48563, Oct. 27, 1992; T.D. 9257, 71 FR 18005, Apr. 10, 2006; T.D. 9377, 73 FR 3873, Jan. 23, 2008]

### § 1.846-1 **Application of discount factors.**

(a) *In general*—(1) *Rules.* A separate series of discount factors are computed for, and applied, to undiscounted unpaid losses attributable to each accident year of each line of business shown on the annual statement (as defined by section 846(f)(3)) filed by that taxpayer for the calendar year ending with or within the taxable year of the taxpayer. See § 1.832-4(b) relating to the determination of unpaid losses. Paragraph (b) of this section provides rules relating to applicable discount factors and § 1.846-3(b) contains guidance relating to discount factors applicable to accident years prior to the 1987 accident year. Once a taxpayer applies a series of discount factors to unpaid losses attributable to an accident year of a line of business, that series of discount factors must be applied to discount the unpaid losses for that accident year for that line of business for all future taxable years. The discount factors cannot be changed to reflect a change in the taxpayer's loss payment pattern during

a subsequent year or to reflect a different interest rate assumption. However, discount factors may be changed for taxpayers who elect to use their own historical loss payment pattern, if information upon which the pattern is based is adjusted upon examination by the district director.

(2) *Examples.* The following examples illustrate the principles of paragraph (a)(1) of this section:

*Example 1.* A taxpayer discounts unpaid losses attributable to all accident years prior to 1992 using discount factors published by the Service. In 1992, the taxpayer elects, under § 1.846-2, to compute discount factors using its own historical loss payment pattern. The taxpayer must continue to discount unpaid losses attributable to pre-1992 accident years using the discount factors published for those accident years by the Service.

*Example 2.* On its annual statements through 1987, a taxpayer did not allocate unpaid losses attributable to proportional reinsurance to the line of business associated with the risks being reinsured. Beginning with the 1988 annual statement, the taxpayer allocated those losses for all accident years to the line of business being reinsured. The taxpayer must continue to discount the unpaid losses attributable to proportional reinsurance from pre-1988 accident years using the discount factors that were used in determining tax reserves for the 1987 tax year. (See paragraph (b)(3) of this section for rules relating to the application of discount factors to reinsurance unpaid losses.)

(3) *Increase in discounted unpaid losses shown on the annual statement.* If the amount of unpaid losses shown on the annual statement is determined on a discounted basis, and the extent to which the unpaid losses were discounted can be determined on the basis of information disclosed on or with the annual statement, the amount of the unpaid losses to which the discount factors are applied shall be determined without regard to any reduction attributable to the discounting reflected on the annual statement.

(4) *Increase in unpaid losses which take into account estimated salvage recoverable.* If the amount of unpaid losses shown on the annual statement reflects a reduction for estimated salvage recoverable and the extent to which the unpaid losses were reduced by estimated salvage recoverable is appropriately disclosed as required by § 1.832-

4(d)(2), the amount of unpaid losses shall be determined without regard to the reduction for salvage recoverable.

(b) *Applicable discount factors*—(1) *In general.* Except as otherwise provided in section 846(f)(6) (relating to certain accident and health lines of business), in § 1.846-2 (relating to a taxpayer's election to use its own historical loss payment pattern), in this paragraph (b), or in other guidance published in the Internal Revenue Bulletin, the following factors must be used—

(i) *Discount factors published by the Service.* If the Service has published discount factors for a line of business, a taxpayer must discount unpaid losses attributable to that line by applying those discount factors; and

(ii) *Composite discount factors.* If the Service has not published discount factors for a line of business, a taxpayer must discount unpaid losses attributable to that line by applying composite discount factors.

(iii) *Annual statement changes.* If the groupings of individual lines of business on the annual statement changes, taxpayers must discount the unpaid losses on the resulting lines of business with the discounting patterns that would have applied to those unpaid losses based on their annual statement classification prior to the change.

(2) *Title insurance company reserves.* A title insurance company may only take into account case reserves (relating to claims which have been reported to the insurance company). Unless the Service publishes other guidance, the reserves must be discounted using the "Miscellaneous Casualty" discount factors published by the Service. Section 832(b)(8) provides rules for determining the discounted unearned premiums of a title insurance company.

(3) *Reinsurance business*—(i) *Proportional reinsurance for accident years after 1987.* For the 1988 accident year and subsequent accident years, unpaid losses for proportional reinsurance must be discounted using discount factors applicable to the line of business to which those unpaid losses are allocated as required on the annual statement.

(ii) *Non-proportional reinsurance*—(A) *Accident years after 1991.* For the 1992 accident year and subsequent accident

years, unpaid losses for non-proportional reinsurance must be discounted using the applicable discount factors published by the Service for the appropriate reinsurance line of business.

(B) *Accident years 1988 through 1991.* For the 1988, 1989, 1990, and 1991 accident years unpaid losses for non-proportional reinsurance must be discounted using composite discount factors.

(iii) *Reinsurance for accident years before 1988.* If on its annual statement a taxpayer does not allocate unpaid losses to the applicable line of business for proportional or nonproportional reinsurance attributable to the 1987 accident year or a prior accident year, those losses must be discounted using composite discount factors. If on its annual statement a taxpayer allocates to the underlying line of business reinsurance unpaid losses that are attributable to the 1987 accident year or a prior accident year, those losses must be discounted using discount factors applicable to the underlying line of business.

(iv) *90 percent exception.* For purposes of § 1.846-1(b)(3) (ii) and (iii), if more than 90 percent of all the unallocated losses of a taxpayer for an accident year relate to one underlying line of business, the taxpayer must discount all unallocable reinsurance unpaid losses attributable to that accident year using the discount factors published by the Service for the underlying line of business.

(4) *International business.* For any accident year, unpaid losses which are attributable to international business must be discounted using composite discount factors unless more than 90 percent of all losses for that accident year relate to one underlying line of business. If more than 90 percent of all losses for an accident year relate to one underlying line of business, the taxpayer must discount the losses attributable to that accident year using discount factors published by the Service for the underlying line of business.

(5) *Composite discount factors.* For purposes of the regulations under section 846, "composite discount factors" means the series of discount factors

## § 1.846-2

## 26 CFR Ch. I (4-1-14 Edition)

published annually by the Service determined on the basis of the appropriate composite loss payment pattern.

[T.D. 8433, 57 FR 40844, Sept. 8, 1992]

### § 1.846-2 Election by taxpayer to use its own historical loss payment pattern.

(a) *In general.* If a taxpayer has one or more eligible lines of business in a determination year, the taxpayer may elect on the taxpayer's timely filed Federal income tax return for the determination year to discount unpaid losses using its own historical loss payment pattern instead of the industry-wide pattern determined by the Secretary. A taxpayer making the election must use its own historical loss payment pattern in discounting unpaid losses for each line of business that is an eligible line of business in that determination year. The election applies to accident years ending with the determination year and to each of the four succeeding accident years. If a taxpayer makes the election for the 1987 determination year, the taxpayer must use its 1987 loss payment pattern (determined by reference to its 1985 annual statement) to discount unpaid losses attributable to all accident years prior to 1988.

(b) *Eligible line of business*—(1) *In general.* A line of business is an eligible line of business in a determination year if, on the most recent annual statement filed by the taxpayer before the beginning of that determination year, the taxpayer reports losses and loss expenses incurred (in Schedule P, part 1, column 24 of the 1990 annual statement or comparable location in an earlier or subsequently revised blank) for at least the number of accident years for which losses and loss expenses incurred for that line of business are required to be separately reported on that annual statement. For example, for the 1987 determination year, the 1985 annual statement is used. The annual statement to be used to determine eligibility in subsequent determination years is the annual statement for each fifth year after 1985 (e.g., 1990, 1995, etc.).

(2) *Other published guidance.* A line of business is also an eligible line of business for purposes of the election if the

line is an eligible line under requirements published for this purpose in the Internal Revenue Bulletin.

(3) *Special rule for 1987 determination year.* A line of business is an eligible line of business in the 1987 determination year if it is eligible under paragraph (b) (1) or (2) of this section, or if on the most recent annual statement filed by the taxpayer before the beginning of the 1987 determination year, the taxpayer reports written premiums for the line of business for at least the number of accident years that unpaid losses for that line of business are required to be separately reported on that annual statement.

(c) *Anti-abuse rule.* To prevent avoidance of the requirement that the election to use historical loss payment patterns apply to all eligible lines of business of a taxpayer, the district director may—

(1) Nullify a taxpayer's election to compute discounted unpaid losses based on its historical loss payment pattern;

(2) Adjust a taxpayer's historical loss payment pattern; or

(3) Make other proper adjustments.

(d) *Effect of section 338 election on section 846(e) election.* For rules regarding qualified stock purchase occurring on or after April 10, 2006, see §§ 1.338-1(b)(2)(vii) and 1.338-11(e).

[T.D. 8433, 57 FR 40845, Sept. 8, 1992, as amended by T.D. 9257, 71 FR 18005, Apr. 10, 2006; T.D. 9377, 73 FR 3873, Jan. 23, 2008]

### § 1.846-2T Election by taxpayer to use its own historical loss payment pattern (temporary).

(a) through (c) [Reserved]. For further guidance, see § 1.846-2(a) through (c).

(d) *Effect of section 338 election on section 846(e) election.* For rules regarding qualified stock purchases occurring on or after April 10, 2006, see §§ 1.338-1(b)(2)(vii) and 1.338-11T(e).

[T.D. 9257, 71 FR 18005, Apr. 10, 2006]

### § 1.846-3 Fresh start and reserve strengthening.

(a) *In general.* Section 1023(e) of the Tax Reform Act of 1986 ("the 1986 Act") provides rules relating to fresh start and reserve strengthening. For purposes of section 1023(e) of the 1986 Act,

a taxpayer must discount its unpaid losses as of the end of the last taxable year beginning before January 1, 1987. The excess of undiscounted unpaid losses over discounted unpaid losses as of that time is not required to be included in income, except (as provided in paragraph (e) of this section) to the extent of any "reserve strengthening" in a taxable year beginning in 1986. The exclusion from income of this excess is known as "fresh start." The amount of fresh start is, however, included in earnings and profits for the first taxable year beginning after December 31, 1986.

(b) *Applicable discount factors*—(1) *Calculation of beginning balance.* For purposes of section 1023(e) of the 1986 Act, a taxpayer discounts unpaid losses as of the end of the last taxable year beginning before January 1, 1987—

(i) By using the same discount factors that are used in the succeeding taxable year to discount unpaid losses attributable to the 1987 accident year and prior accident years (see section 1023(e)(2) of the 1986 Act); and

(ii) By applying those discount factors as if the 1986 accident year were the 1987 accident year.

(2) *Example.* The following example illustrates the principles of this paragraph (b):

*Example.* X, a calendar year taxpayer, does not make an election in 1987 to use its own historical loss payment pattern. When X computes discounted unpaid losses for its last taxable year beginning before January 1, 1987, the discount factor for AY+0 published in Rev. Rul. 87-34, 1987-1 C.B. 168, must be applied to unpaid losses attributable to the 1986 accident year; the discount factor for AY+1 is applied to unpaid losses attributable to the 1985 accident year; etc.

(c) *Rules for determining the amount of reserve strengthening (weakening)*—(1) *In general.* The amount of reserve strengthening (weakening) is the amount that is determined under paragraph (c)(2) or (3) to have been added to (subtracted from) an unpaid loss reserve in a taxable year beginning in 1986. For purposes of section 1023(e)(3)(B) of the 1986 Act, the amount of reserve strengthening (weakening) must be determined separately for each unpaid loss reserve by applying the rules of this paragraph (c). This deter-

mination is made without regard to the reasonableness of the amount of the unpaid loss reserve and without regard to the taxpayer's discretion, or lack thereof, in establishing the amount of the unpaid loss reserve. The amount of reserve strengthening for an unpaid loss reserve may not exceed the amount of the reserve, including any undiscounted strengthening amount, as of the end of the last taxable year beginning before January 1, 1987. For purposes of this section, an "unpaid loss reserve" is the aggregate of the unpaid loss estimate for losses (whether or not reported) incurred in an accident year of a line of business.

(2) *Accident years after 1985*—(i) *In general.* The amount of reserve strengthening (weakening) for an unpaid loss reserve for an accident year after 1985 is the amount by which that reserve at the end of the last taxable year beginning in 1986 exceeds (is less than) a hypothetical unpaid loss reserve.

(ii) *Hypothetical unpaid loss reserve.* For purposes of this paragraph (c)(2), the term "hypothetical unpaid loss reserve" means a reserve computed for losses the estimates of which were included, at the end of the last taxable year beginning in 1986, in the unpaid loss reserve for which reserve strengthening (weakening) is being determined. The hypothetical unpaid loss reserve must be computed using the same assumptions, other than the assumed interest rates in the case of reserves determined on a discounted basis for annual statement reporting purposes, that were used to determine the 1985 accident year reserve, if any, for the line of business for which the hypothetical reserve is being computed. If there was no 1985 accident year reserve for that line of business, the hypothetical unpaid loss reserve is the reserve, at the end of the last taxable year beginning in 1986, for which reserve strengthening (weakening) is being determined (and thus there is no reserve strengthening or weakening).

(3) *Accident years before 1986*—(i) *In general.* For each taxable year beginning in 1986, the amount of reserve strengthening (weakening) for an unpaid loss reserve for an accident year before 1986 is the amount by which the

reserve at the end of that taxable year exceeds (is less than)—

(A) The reserve at the end of the immediately preceding taxable year; reduced by

(B) Claims paid and loss adjustment expenses paid (“loss payments”) in the taxable year beginning in 1986 with respect to losses that are attributable to the reserve. The amount by which a reserve is reduced as a result of reinsurance ceded during a taxable year beginning in 1986 is treated as a loss payment made in that taxable year.

(ii) *Exceptions.* Notwithstanding paragraph (c)(3)(i) of this section, the amount of reserve strengthening (weakening) for an unpaid loss reserve for an accident year before 1986 does not include—

(A) An amount added to the reserve in a taxable year beginning in 1986 as a result of a loss reported to the taxpayer from a mandatory state or federal assigned risk pool if the amount of the loss reported is not discretionary with the taxpayer; or

(B) Payments made with respect to reinsurance assumed during a taxable year beginning in 1986 or amounts added to the reserve to take into account reinsurance assumed for a line of business during a taxable year beginning in 1986, but only to the extent that the amount does not exceed the amount of a hypothetical reserve for the reinsurance assumed. The amount of the hypothetical reserve is determined using the same assumptions (other than the assumed interest rates) that were used to determine a reserve for reinsurance assumed for the line of business in a taxable year beginning in 1985.

(iii) *Certain transactions deemed to be reinsurance assumed (ceded) in 1986.* For purposes of this paragraph (c)(3), reinsurance assumed (ceded) in a taxable year beginning in 1985 is treated as assumed (ceded) during the succeeding taxable year if the appropriate unpaid loss reserve is not adjusted to take into account the reinsurance transaction until that succeeding taxable year.

(d) *Section 845.* Any reinsurance transaction that has as one of its purposes the avoidance of the reserve strengthening limitation is subject to section 845.

(e) *Treatment of reserve strengthening.* The fresh start provision of section 1023(e)(3)(A) of the 1986 Act does not apply to the portion of the taxpayer’s unpaid losses attributable to reserve strengthening. Thus, the difference between the undiscounted unpaid losses attributable to reserve strengthening and the discounted unpaid losses attributable to reserve strengthening must be included in income and, therefore, included in earnings and profits for the first taxable year beginning after December 31, 1986. The amount that a taxpayer must include in income for its first taxable year beginning after December 31, 1986, as a result of reserve strengthening is equal to the excess (if any) of—

(1) The sum of each amount of reserve strengthening multiplied by the difference between 100 percent and the discount factor that, under paragraph (b) of this section, is applicable to the unpaid loss reserve which was strengthened; over

(2) The sum of each reserve weakening multiplied by the difference between 100 percent and the discount factor that, under paragraph (b) of this section, is applicable to the unpaid loss reserve which was weakened.

(f) *Examples.* The following examples illustrate the principles of this section. For purposes of these examples, it is assumed that the taxpayers are property and casualty insurance companies that in 1987 did not elect to use their own historical loss payment patterns.

*Example 1.* (i) As of the end of 1985, X, a calendar year taxpayer, had undiscounted unpaid losses of \$1,000,000 in the workers’ compensation line of business for the 1984 accident year. The same reserve had undiscounted unpaid losses of \$900,000 at the end of 1986. During 1986, X’s loss payments for this reserve were \$300,000. Accordingly, under paragraph (c)(3)(i) of this section, X has a reserve strengthening of \$200,000 (\$900,000–(\$1,000,000–\$300,000)).

(ii) This was X’s only reserve strengthening or weakening. Thus, under paragraph (e) of this section, for 1987 X must include in income \$54,361.40 (\$200,000×(100%–72.8193%)). The factor of 72.8193% is the AY+2 factor from the workers’ compensation series of discount factors published in Rev. Rul. 87-34, 1987-1 C.B. 168.

*Example 2.* The facts are the same as in *Example 1*, except that X’s 1986 loss payments

for the reserve were \$1,100,000. If only paragraph (c)(3)(i) of this section were applied, X would have a \$1,000,000 reserve strengthening (\$900,000 - (\$1,000,000 - \$1,100,000)). Under paragraph (c)(1) of this section, however, the amount of reserve strengthening for the reserve is limited to the amount of the reserve at the end of 1986. Accordingly, X has a reserve strengthening of \$900,000 and for 1987 must include in income \$244,626.30 (\$900,000 × (100% - 72.1893%)).

*Example 3.* (i) As of the end of 1985, Y, a calendar year taxpayer, had undiscounted unpaid losses of \$1,000,000 in the auto physical damage line of business for the 1985 accident year. The same reserve included undiscounted unpaid losses of \$600,000 at the end of 1986. During 1986, Y had loss payments of \$300,000 for this line of business. Under paragraph (c)(3)(i) of this section Y has a \$100,000 reserve weakening \$600,000 - (\$1,000,000 - \$300,000)).

(ii) Under paragraph (e) of this section, the only effect of the reserve weakening is to reduce the amount that Y is required to include in income as a result of any strengthening of another reserve.

*Example 4.* The facts are the same as in *Example 1* except that X also has a \$100,000 reserve weakening for the 1985 accident year in its auto physical damage line of business. Under paragraph (b) of this section, the reserve discount factor for the reserve is 93.3400, the AY+1 factor from the auto physical damage series of discount factors published in Rev. Rul. 87-34. Thus, under paragraph (e) of this section, the amount that X is required to include in income in 1987 is reduced by \$6,660 (\$100,000 × (100% - 93.3400%)), resulting in an amount of \$47,761.40 (\$54,361.40 - \$6,660).

*Example 5.* (i) At the end of 1985, Z, a calendar year taxpayer, had undiscounted unpaid losses of \$1,000,000 in the workers' compensation line of business for the 1984 accident year. On May 1, 1986, Z ceded \$130,000 of the reserve to an unrelated reinsurer. Z added \$250,000 to the 1985 year end reserve to take into account workers' compensation risks for the 1984 accident year that Z assumed in a reinsurance transaction on September 1, 1986. Z had \$230,000 of 1986 loss payments related to the 1984 accident year of its workers' compensation line, \$60,000 of which was attributable to the reinsurance assumed by Z. At the end of 1986, Z's reserve for the workers' compensation line for the 1984 accident year was \$1,100,000.

(ii) If only paragraph (c)(3)(i) of this section were applied, Z would have a \$460,000 reserve strengthening (\$1,100,000 - (\$1,000,000 - \$230,000 - \$130,000)). Under paragraph (c)(3)(ii)(B) of this section, however, reserve strengthening does not include the \$250,000 that Z added to the reserve to take into account the reinsurance assumed. Also, none of the \$60,000 of loss pay-

ments attributable to the reinsurance assumed in 1986 are taken into account. Accordingly, Z has \$150,000 of reserve strengthening (\$460,000 - \$250,000 - \$60,000). If this is Z's only reserve strengthening or weakening, then the amount that Z must include in income for 1987 under paragraph (e) of this section is \$40,771.05 (\$150,000 × (100% - 72.8193%)). The factor of 72.8193% is the AY+2 factor from the workers' compensation series of discount factors published in Rev. Rul. 87-34.

*Example 6.* (i) X was a calendar year taxpayer before July 1, 1986, the date on which X became a member of an affiliated group of corporations that files a consolidated return with a June 30 year end. Thus, X had two taxable years beginning in 1986: a short taxable year ending June 30, 1986, and a fiscal taxable year ending June 30, 1987.

(ii) As of the end of 1985, X had undiscounted unpaid losses of \$800,000 in the automobile liability line of business for the 1983 accident year. At the end of the short taxable year, X had reserves of \$700,000 of undiscounted unpaid losses, and on June 30, 1987, had reserves of \$600,000 of undiscounted unpaid losses. During the short taxable year, ending June 30, 1986, X's loss payments for this reserve were \$120,000. During the taxable year ending June 30, 1987, X's loss payments for this reserve were \$180,000. Under paragraph (c)(3)(i) of this section, X has a \$100,000 reserve strengthening: of which \$20,000 (\$700,000 - (\$800,000 - \$120,000)) is attributable to the short taxable year ending June 30, 1986 and \$80,000 (\$600,000 - (\$700,000 - \$180,000)) is attributable to the taxable year ending June 30, 1987.

(iii) The amount of reserve strengthening for this line of business is determined pursuant to the principles of paragraph (c)(2) of this section.

[T.D. 8433, 57 FR 40845, Sept. 8, 1992; 57 FR 48563, Oct. 27, 1992; 57 FR 57531, Dec. 4, 1992]

#### § 1.846-4 Effective/applicability date.

(a) *In general.* Sections 1.846-1 through 1.846-3 apply to taxable years beginning after December 31, 1986.

(b) *Section 338 election.* Section 1.846-2(d) applies to section 846(e) elections made with regard to a qualified stock purchase made on or after April 10, 2006.

[T.D. 9257, 71 FR 18006, Apr. 10, 2006, as amended by T.D. 9377, 73 FR 3873, Jan. 23, 2008]

#### § 1.846-4T Effective dates (temporary).

(a) [Reserved]. For further guidance, see § 1.846-2(a).

(b) *Section 338 election.* Section 1.846-2(d) applies to section 846(e) elections

## § 1.848-0

made with regard to a qualified stock purchase made on or after April 10, 2006.

[T.D. 9257, 71 FR 18006, Apr. 10, 2006]

### § 1.848-0 Outline of regulations under section 848.

This section lists the paragraphs in §§ 1.848-1 through 1.848-3.

#### *§ 1.848-1 Definitions and special provisions.*

- (a) Scope and effective date.
- (b) Specified insurance contract.
  - (1) In general.
  - (2) Exceptions.
- (i) In general.
- (ii) Reinsurance of qualified foreign contracts.
- (c) Life insurance contract.
- (d) Annuity contract.
- (e) Noncancellable accident and health insurance contract.
- (f) Guaranteed renewable accident and health insurance contract.
- (g) Combination contract.
  - (1) Definition.
  - (2) Treatment of premiums on a combination contract.
    - (i) In general.
    - (ii) De minimis premiums.
  - (3) Example.
- (h) Group life insurance contract.
  - (1) In general.
  - (2) Group affiliation requirement.
- (i) In general.
- (ii) Employee group.
- (iii) Debtor group.
- (iv) Labor union group.
- (v) Association group.
- (vi) Credit union group.
- (vii) Multiple group.
- (viii) Certain discretionary groups.
- (ix) Employees treated as members.
- (x) Class or classes of a group determined without regard to individual health characteristics.
  - (A) In general.
  - (B) Limitation of coverage based on certain work and age requirements permissible.
- (3) Premiums determined on a group basis.
  - (i) In general.
  - (ii) Exception for substandard premium rates for certain high risk insureds.
  - (iii) Flexible premium contracts.
  - (iv) Determination of actual age.
- (4) Underwriting practices used by company. [Reserved]
- (5) Disqualification of group.
  - (i) In general.
  - (ii) Exception for de minimis failures.
- (6) Supplemental life insurance coverage.
- (7) Special rules relating to the payment of proceeds.
  - (i) Contracts issued to a welfare benefit fund.

## 26 CFR Ch. I (4-1-14 Edition)

- (ii) Credit life insurance contracts.
- (iii) "Organization or association" limited to the sponsor of the contract or the group policyholder.
- (i) General deductions.

#### *§ 1.848-2 Determination of net premiums.*

- (a) Net premiums.
  - (1) In general.
  - (2) Separate determination of net premiums for certain reinsurance agreements.
- (b) Gross amount of premiums and other consideration.
  - (1) General rule.
  - (2) Items included.
  - (3) Treatment of premium deposits.
- (i) In general.
- (ii) Amounts irrevocably committed to the payment of premiums.
- (iii) Retired lives reserves.
- (4) Deferred and uncollected premiums.
- (c) Policy exchanges.
  - (1) General rule.
  - (2) External exchanges.
  - (3) Internal exchanges resulting in fundamentally different contracts.
    - (i) In general.
    - (ii) Certain modifications treated as not changing the mortality, morbidity, interest, or expense guarantees.
    - (iii) Exception for contracts restructured by a court supervised rehabilitation or similar proceeding.
  - (4) Value of the contract.
    - (i) In general.
    - (ii) Special rule for group term life insurance contracts.
    - (iii) Special rule for certain policy enhancement and update programs.
      - (A) In general.
      - (B) Policy enhancement or update program defined.
  - (5) Example.
- (d) Amounts excluded from the gross amount of premiums and other consideration.
  - (1) In general.
  - (2) Amounts received or accrued from a guaranty association.
  - (3) Exclusion not to apply to dividend accumulations.
  - (e) Return premiums.
  - (f) Net consideration for a reinsurance agreement.
    - (1) In general.
    - (2) Net consideration determined by a ceding company.
      - (i) In general.
      - (ii) Net negative and net positive consideration.
    - (3) Net consideration determined by the reinsurer.
      - (i) In general.
      - (ii) Net negative and net positive consideration.
    - (4) Timing consistency required.

(5) Modified coinsurance and funds-withheld reinsurance agreements.

(i) In general.

(ii) Special rule for certain funds-withheld reinsurance agreements.

(6) Treatment of retrocessions.

(7) Mixed reinsurance agreements.

(8) Treatment of policyholder loans.

(9) Examples.

(g) Reduction in the amount of net negative consideration to ensure consistency of capitalization for reinsurance agreements.

(1) In general.

(2) Application to reinsurance agreements subject to the interim rules.

(3) Amount of reduction.

(4) Capitalization shortfall.

(5) Required capitalization amount.

(i) In general.

(ii) Special rule with respect to net negative consideration.

(6) General deductions allocable to reinsurance agreements.

(7) Allocation of capitalization shortfall among reinsurance agreements.

(8) Election to determine specified policy acquisition expenses for an agreement without regard to general deductions limitation.

(i) In general.

(ii) Manner of making election.

(iii) Election statement.

(iv) Effect of election.

(9) Examples.

(h) Treatment of reinsurance agreements with parties not subject to U.S. taxation.

(1) In general.

(2) Agreements to which this paragraph (h) applies.

(i) In general.

(ii) Parties subject to U.S. taxation.

(A) In general.

(B) Effect of a closing agreement.

(3) Election to separately determine the amounts required to be capitalized for reinsurance agreements with parties not subject to U.S. taxation.

(i) In general.

(ii) Manner of making the election.

(4) Amount taken into account for purposes of determining specified policy acquisition expenses.

(5) Net foreign capitalization amount.

(i) In general.

(ii) Foreign capitalization amounts by category.

(6) Treatment of net negative foreign capitalization amount.

(i) Applies as a reduction to previously capitalized amounts.

(ii) Carryover of remaining net negative foreign capitalization amount.

(7) Reduction of net positive foreign capitalization amount by carryover amounts allowed.

(8) Examples.

(i) Carryover of excess negative capitalization amount.

(1) In general.

(2) Excess negative capitalization amount.

(3) Treatment of excess negative capitalization amount.

(4) Special rule for the treatment of an excess negative capitalization amount of an insolvent company.

(i) When applicable.

(ii) Election to forego carryover of excess negative capitalization amount.

(iii) Amount of reduction to the excess negative capitalization amount and specified policy acquisition expenses.

(iv) Manner of making election.

(v) Presumptions relating to the insolvency of an insurance company undergoing a court supervised rehabilitation or similar state proceeding.

(vi) Example.

(j) Ceding commissions with respect to reinsurance of contracts other than specified insurance contracts.

(k) Effective dates.

(1) In general.

(2) Reduction in the amount of net negative consideration to ensure consistency of capitalization for reinsurance agreements.

(3) Net consideration rules.

(4) Determination of the date on which a reinsurance agreement is entered into.

(5) Special rule for certain reinsurance agreements with parties not subject to U.S. taxation.

(6) Carryover of excess negative capitalization amount.

*§ 1.848-3 Interim rules for certain reinsurance agreements.*

(a) Scope and effective dates.

(b) Interim rules.

(c) Adjustments and special rules.

(1) Assumption reinsurance.

(2) Reimbursable dividends.

(3) Ceding commissions.

(i) In general.

(ii) Amount of ceding commission.

(4) Termination payments.

(5) Modified coinsurance agreements.

(d) Examples.

[T.D. 8456, 57 FR 61818, Dec. 29, 1992]

**§ 1.848-1 Definitions and special provisions.**

(a) *Scope and effective date.* The definitions and special provisions in this section apply solely for purposes of determining specified policy acquisition expenses under section 848 of the Internal Revenue Code, this section, and §§ 1.848-2 and 1.848-3. Unless otherwise specified, the rules of this section are effective for the taxable years of an insurance company beginning after November 14, 1991.

(b) *Specified insurance contract*—(1) *In general.* A “specified insurance contract” is any life insurance contract, annuity contract, noncancellable or guaranteed renewable accident and health insurance contract, or combination contract. A reinsurance agreement that reinsures the risks under a specified insurance contract is treated in the same manner as the reinsured contract.

(2) *Exceptions*—(i) *In general.* A “specified insurance contract” does not include any pension plan contract (as defined in section 818(a)), flight insurance or similar contract, or qualified foreign contract (as defined in section 807(e)(4)).

(ii) *Reinsurance of qualified foreign contracts.* The exception for qualified foreign contracts does not apply to reinsurance agreements that reinsure qualified foreign contracts.

(c) *Life insurance contract.* A “life insurance contract” is any contract—

(1) Issued after December 31, 1984, that qualifies as a life insurance contract under section 7702(a) (including an endowment contract as defined in 7702(h)); or

(2) Issued prior to January 1, 1985, if the premiums on the contract are reported as life insurance premiums on the insurance company’s annual statement (or could be reported as life insurance premiums if the company were required to file the annual statement for life and accident and health companies).

(d) *Annuity contract.* An “annuity contract” is any contract (other than a life insurance contract as defined in paragraph (c) of this section) if amounts received under the contract are subject to the rules in section 72(b) or section 72(e) (determined without regard to section 72(u)). The term “annuity contract” also includes a contract that is a qualified funding asset under section 130(d).

(e) *Noncancellable accident and health insurance contract.* The term “noncancellable accident and health insurance contract” has the same meaning for purposes of section 848 as the term has for purposes of section 816(b).

(f) *Guaranteed renewable accident and health insurance contract.* The term

“guaranteed renewable accident and health insurance contract” has the same meaning for purposes of section 848 as the term has for purposes of section 816(e).

(g) *Combination contract*—(1) *Definition.* A “combination contract” is a contract (other than a contract described in section 848(e)(3)) that provides two or more types of insurance coverage, at least one of which if offered separately would be a life insurance contract, an annuity contract, or a noncancellable or guaranteed renewable accident and health insurance contract.

(2) *Treatment of premiums on a combination contract*—(i) *In general.* If the premium allocable to each type of insurance coverage is separately stated on the insurance company’s annual statement (or could be separately stated if the insurance company were required to file the annual statement for life and accident and health companies), the premium allocable to each type of insurance coverage in a combination contract is subject to the capitalization rate, if any, that would apply if that coverage was provided in a separate contract. If the premium allocable to each type of insurance coverage in a combination contract is not separately stated, the entire premium is subject to the highest capitalization percentage applicable to any of the coverages provided.

(ii) *De minimis premiums.* For purposes of this paragraph (g)(2)—

(A) A de minimis premium is not required to be separately stated;

(B) In determining the highest capitalization percentage applicable to a combination contract, the coverage to which a de minimis premium is allocable is disregarded;

(C) If the separate statement requirement of this paragraph (g)(2) is satisfied, a de minimis premium is treated in accordance with its characterization on the insurance company’s annual statement; and

(D) Whether a premium for an insurance coverage is de minimis is determined by comparing that premium with the aggregate of the premiums for the combination contract. A premium that is not more than 2 percent of the

premium for the entire contract is considered de minimis. Whether a premium that is more than 2 percent is de minimis is determined based on all the facts and circumstances.

(3) *Example.* The principles of this paragraph (g) are illustrated by the following example.

*Example.* A life insurance company (L1) issues a contract to an employer (X) which provides cancellable accident and health insurance coverage and group term life insurance coverage to X's employees. L1 charges a premium of \$1,000 for the contract, \$950 of which is attributable to the cancellable accident and health insurance coverage and \$50 of which is attributable to the group term life insurance coverage. On its annual statement, L1 reports the premiums attributable to the accident and health insurance coverage separately from the premiums attributable to the group term life insurance coverage. The contract issued by L1 is a combination contract as defined in paragraph (g)(1) of this section. Pursuant to paragraph (g)(2)(i) of this section, only the premiums attributable to the group term life insurance coverage (\$50) are subject to the provisions of section 848. The premiums attributable to the cancellable accident and health insurance coverage (\$950) are not subject to the provisions of section 848.

(h) *Group life insurance contract*—(1) *In general.* A life insurance contract (as defined in paragraph (c) of this section) is group life insurance contract if—

(i) The contract is a group life insurance contract under the applicable law;

(ii) The coverage is provided under a master contract issued to the group policyholder, which may be a trust, trustee, or agent;

(iii) The premiums on the contract are reported either as group life insurance premiums or credit life insurance premiums on the insurance company's annual statement (or could be reported as group life insurance premiums or credit life insurance premiums if the company were required to file the annual statement for life and accident and health companies);

(iv) The group affiliation requirement of paragraph (h)(2) of this section is satisfied;

(v) The premiums on the contract are determined on a group basis within the meaning of paragraph (h)(3) of this section; and

(vi) The proceeds of the contract are not payable to or for the benefit of the

insured's employer, an organization or association to which the insured belongs, or other similar person. (See paragraph (h)(7) of this section for special rules that apply in determining if this requirement is satisfied.)

(2) *Group affiliation requirement*—(i) *In general.* The group affiliation requirement of section 848(e)(2)(A) and this paragraph (h)(2) is satisfied only if all of the individuals eligible for coverage under the contract constitute a group described in paragraphs (h)(2) (ii) through (viii) of this section.

(ii) *Employee group.* An employee group consists of all of the employees (including statutory employees within the meaning of section 3121(d)(3) and individuals who are treated as employed by a single employer under section 414 (b), (c), or (m)), or any class or classes thereof within the meaning of paragraph (h)(2)(x) of this section, of an employer. For this purpose, the term "employee" includes—

(A) A retired or former employee;

(B) The sole proprietor, if the employer is a sole proprietorship;

(C) A partner of the partnership, if the employer is a partnership;

(D) A director of the corporation, if the employer is a corporation; and

(E) An elected or appointed official of the public body, if the employer is a public body.

(iii) *Debtor group.* A debtor group consists of all of the debtors, or any class or classes thereof within the meaning of paragraph (h)(2)(x) of this section, of a creditor. For this purpose, the term "debtor" includes a borrower of money or purchaser or lessee of goods, services, or property for which payment is arranged through a credit transaction.

(iv) *Labor union group.* A labor union group consists of all of the members, or any class or classes thereof within the meaning of paragraph (h)(2)(x) of this section, of a labor union or similar employee organization.

(v) *Association group.* An association group consists of all of the members, or any class or classes thereof within the meaning of paragraph (h)(2)(x) of this section, of an association that, at the time the master contract is issued—

(A) Is organized and maintained for purposes other than obtaining insurance;

(B) Has been in active existence for at least two years (including, in the case of a merged or successor association, the years of active existence of any predecessor association); and

(C) Has at least 100 members.

(vi) *Credit union group.* A credit union group consists of all of the members or borrowers, or any class or classes thereof within the meaning of paragraph (h)(2)(x) of this section, of a credit union.

(vii) *Multiple group.* A multiple group consists of two or more groups from any single category described in paragraphs (h)(2) (ii) through (vi) of this section. A multiple group may not include two or more groups from different categories described in paragraph (h)(2) (ii) through (vi) of this section.

(viii) *Certain discretionary groups.* Provided that the contract otherwise satisfies the requirements of paragraph (h)(1) of this section, a contract issued to one of the following discretionary groups is treated as satisfying the group affiliation requirement of this paragraph (h)(2)—

(A) A contract issued to a group consisting of students of one or more universities or other educational institutions;

(B) A contract issued to a group consisting of members or former members of the U.S. Armed Forces;

(C) A contract issued to a group of individuals for the payment of future funeral expenses; and

(D) A contract issued to any other discretionary group as specified by the Commissioner in subsequent guidance published in the Internal Revenue Bulletin. (See §601.601(d)(2)(ii)(b) of this chapter.)

(ix) *Employees treated as members.* In determining whether the group affiliation requirement of paragraph (h)(2) of this section is satisfied, the employees of a labor union, credit union, or association may be treated as members of a labor union group, a credit union group, or an association group, respectively.

(x) *Class or classes of a group determined without regard to individual health characteristics—(A) In general.* A class or classes of a group described in paragraphs (h)(2) (ii) through (viii) of this

section may be determined using any reasonable characteristics (for example, amount of insurance, location, or occupation) other than individual health characteristics. The employees of a single employer covered under a policy issued to a multi-employer trust are considered a class of a group described in paragraph (h)(2)(ii) of this section.

(B) *Limitation of coverage based on certain work and age requirements permissible.* A limitation of coverage under a group contract to persons who are actively at work or of a pre-retirement age (for example, age 65 or younger) is not treated as based on individual health characteristics.

(3) *Premiums determined on a group basis—(i) In general.* Premiums for a contract are determined on a group basis for purposes of section 848(e)(2)(B) and this paragraph (h) only if the premium charged by the insurance company for each member of the group (or any class thereof) is determined on the basis of the same rates for the corresponding amount of coverage (for example, per \$1,000 of insurance) or on the basis of rates which differ only because of the gender, smoking habits, or age of the member.

(ii) *Exception for substandard premium rates for certain high risk insureds.* Any difference in premium rates is disregarded for purposes of this paragraph (h)(3) if the difference is charged for an individual who was accepted for coverage at a substandard rate prior to January 1, 1993.

(iii) *Flexible premium contracts.* In the case of a group universal life insurance contract, the identical premium requirement is satisfied if the premium rates used by the insurance company in determining the periodic mortality charges applied to the policy account value of any member insured by the contract differ from those of other members (within the same class) only because of the gender, smoking habits, or age of the member.

(iv) *Determination of actual age.* For purposes of this paragraph (h)(3), determinations of actual age may be made using any reasonable method, provided that this method is applied consistently for all members of the group.

(4) *Underwriting practices used by company.* [Reserved]

(5) *Disqualification of group—(i) In general.* Except as otherwise provided in this paragraph (h)(5), if the requirements of paragraphs (h)(1), (2), and (3) of this section are not satisfied with respect to one or more members of the group, or of a class within a group (within the meaning of paragraph (h)(2)(x) of this section), the premiums for the entire group (or class) are treated as individual life insurance premiums.

(ii) *Exception for de minimis failures.* If the requirements of paragraphs (h)(1), (2), or (3) of this section are not satisfied with respect to one or more members of the group (or class), but the sum of the premiums charged by the insurance company for those individuals is no more than 5 percent of the aggregate premiums for the group (or class), only the premiums charged for those individuals are treated as premiums for an individual life insurance contract.

(6) *Supplemental life insurance coverage.* For purposes of determining whether the requirement in paragraph (h)(3)(i) of this section is satisfied, any supplemental life insurance coverage (including optional coverage for members of the group, their spouses, or their dependent children) is (or is treated as) a separate contract. In determining whether the group affiliation requirement of paragraph (h)(2) of this section is satisfied for the supplemental coverage, a member's spouse and dependent children are treated as members of the group if they are eligible for coverage.

(7) *Special rules relating to the payment of proceeds.* The following rules apply for purposes of section 848(e)(2) and paragraph (h)(1)(vi) of this section.

(i) *Contracts issued to a welfare benefit fund.* If a contract issued to a welfare benefit fund (as defined in section 419) provides for payment of proceeds to the welfare benefit fund, the proceeds of the contract are not considered payable to or for the benefit of the insured's employer, an organization or association to which the insured belongs, or other similar person, provided the proceeds are paid as benefits to the

employee or the employee's beneficiary.

(ii) *Credit life insurance contracts.* If a credit life insurance contract provides for payment of proceeds to the insured's creditor, the proceeds of the contract are not treated as payable to or for the benefit of the insured's employer, an organization or association to which the insured belongs, or other similar person, provided the proceeds are applied against an outstanding indebtedness of the insured.

(iii) *"Organization or association" limited to the sponsor of the contract or the group policyholder.* The term "organization or association" means the organization or association that is either the sponsor of the contract or the group policyholder.

(i) *General deductions.* The term "general deductions" is defined in section 848(c)(2). An insurance company determines its general deductions for the taxable year without regard to amounts capitalized or amortized under section 848(a). The amount of a company's general deductions is also determined without regard to the rules of § 1.848-2(f), which apply only for purposes of determining net consideration for reinsurance agreements.

[T.D. 8456, 57 FR 61819, Dec. 29, 1992; 58 FR 9245, Feb. 19, 1993]

#### § 1.848-2 Determination of net premiums.

(a) *Net premiums—(1) In general.* An insurance company must use the accrual method of accounting (as prescribed by section 811(a)(1)) to determine the net premiums with respect to each category of specified insurance contracts. With respect to any category of contracts, net premiums means—

(i) The gross amount of premiums and other consideration (see paragraph (b) of this section); reduced by

(ii) The sum of—

(A) The return premiums (see paragraph (e) of this section); and

(B) The net negative consideration for a reinsurance agreement (other than an agreement described in paragraph (h)(2) of this section). See paragraphs (f) and (g) of this section for rules relating to the determination of net negative consideration.

(2) *Separate determination of net premiums for certain reinsurance agreements.* Net premiums with respect to reinsurance agreements for which an election under paragraph (h)(3) of this section has been made (certain reinsurance agreements with parties not subject to United States taxation) are treated separately and are subject to the rules of paragraph (h) of this section.

(b) *Gross amount of premiums and other consideration—*(1) *General rule.* The term “gross amount of premiums and other consideration” means the sum of—

(i) All premiums and other consideration (other than amounts on reinsurance agreements); and

(ii) The net positive consideration for any reinsurance agreement (other than an agreement for which an election under paragraph (h)(3) of this section has been made).

(2) *Items included.* The gross amount of premiums and other consideration includes—

(i) Advance premiums;

(ii) Amounts in a premium deposit fund or similar account, to the extent provided in paragraph (b)(3) of this section;

(iii) Fees;

(iv) Assessments;

(v) Amounts that the insurance company charges itself representing premiums with respect to benefits for its employees (including full-time life insurance salesmen treated as employees under section 7701(a)(20)); and

(vi) The value of a new contract issued in an exchange described in paragraph (c)(2) or (c)(3) of this section.

(3) *Treatment of premium deposits—*(i) *In general.* An amount in a premium deposit fund or similar account is taken into account in determining the gross amount of premiums and other consideration at the earlier of the time that the amount is applied to, or irrevocably committed to, the payment of a premium on a specified insurance contract. If an amount is irrevocably committed to the payment of a premium on a specified insurance contract, then neither that amount nor any earnings allocable to that amount are included in the gross amount of premiums and other consideration when applied to the payment of a premium on the same contract.

(ii) *Amounts irrevocably committed to the payment of premiums.* Except as provided in paragraph (b)(3)(iii) of this section, an amount in a premium deposit fund or similar account is irrevocably committed to the payment of premiums on a contract only if neither the amount nor any earnings allocable to that amount may be—

(A) Returned to the policyholder or any other person (other than on surrender of the contract); or

(B) Used by the policyholder to fund another contract.

(iii) *Retired lives reserves.* Premiums received by an insurance company under a retired lives reserve arrangement are treated as irrevocably committed to the payment of premiums on a specified insurance contract.

(4) *Deferred and uncollected premiums.* The gross amount of premiums and other consideration does not include deferred and uncollected premiums.

(c) *Policy exchanges—*(1) *General rule.* Except as otherwise provided in this paragraph (c), an exchange of insurance contracts (including a change in the terms of a specified insurance contract) does not result in any amount being included in the gross amount of premiums and other consideration.

(2) *External exchanges.* If a contract is exchanged for a specified insurance contract issued by another insurance company, the company that issues the new contract must include the value of the new contract in the gross amount of premiums and other consideration.

(3) *Internal exchanges resulting in fundamentally different contracts—*(i) *In general.* If a contract is exchanged for a specified insurance contract issued by the same insurance company that issued the original contract, the company must include the value of the new contract in the gross amount of premiums and other consideration if the new contract—

(A) Relates to a different category of specified insurance contract than the original contract;

(B) Does not cover the same insured as the original contract; or

(C) Changes the interest, mortality, morbidity, or expense guarantees with respect to the nonforfeiture benefits provided in the original contract.

(ii) *Certain modifications treated as not changing the mortality, morbidity, interest, or expense guarantees.* For purposes of paragraph (c)(3)(i)(C) of this section, the following items are not treated as changing the interest, mortality, morbidity, or expense guarantees with respect to the nonforfeiture benefits provided in the contract—

(A) A change in a temporary guarantee with respect to the amounts to be credited as interest to the policyholder's account, or charged as mortality, morbidity, or expense charges, if the new guarantee applies for a period of ten years or less;

(B) The determination of benefits on annuitization using rates which are more favorable to the policyholder than the permanently guaranteed rates; and

(C) Other items as specified by the Commissioner in subsequent guidance published in the Internal Revenue Bulletin.

(iii) *Exception for contracts restructured by a court supervised rehabilitation or similar proceeding.* No amount is included in the gross amount of premiums and other consideration with respect to any change made to the interest, mortality, morbidity, or expense guarantees with respect to the nonforfeiture benefits of contracts of an insurance company that is the subject of a rehabilitation, conservatorship, insolvency, or similar state proceeding. This treatment applies only if the change—

(A) Occurs as part of the rehabilitation, conservatorship, insolvency, or similar state proceeding; and

(B) Is approved by the state court, the state insurance department, or other state official with authority to act in the rehabilitation, conservatorship, insolvency, or similar state proceeding.

(4) *Value of the contract*—(i) *In general.* For purposes of paragraph (c)(2) or (c)(3) of this section, the value of the new contract is established through the most recent sale by the company of a comparable contract. If the value of the new contract is not readily ascertainable, the value may be approximated by using the interpolated terminal reserve of the original contract as of the date of the exchange.

(ii) *Special rule for group term life insurance contracts.* In the case of any exchange involving a group term life insurance contract without cash value, the value of the new contract is deemed to be zero.

(iii) *Special rule for certain policy enhancement and update programs*—(A) *In general.* If the interest, mortality, morbidity, or expense guarantees with respect to the nonforfeiture benefits of a specified insurance contract are changed pursuant to a policy enhancement or update program, the value of the contract included in the gross amount of premiums and other consideration equals 30 percent of the value determined under paragraph (c)(4) of this section.

(B) *Policy enhancement or update program defined.* For purposes of paragraph (c)(4)(iii)(A) of this section, a policy enhancement or update program means any offer or commitment by the insurance company to all of the policyholders holding a particular policy form to change the interest, mortality, morbidity, or expense guarantees used to determine the contract's nonforfeiture benefits.

(5) *Example.* The principles of this paragraph (c) are illustrated by the following example.

*Example.* (i) An individual (A) owns a life insurance policy issued by a life insurance company (L1). On January 1, 1993, A purchases additional term insurance for \$250, which is added as a rider to A's life insurance policy. The purchase of the additional term insurance does not change the interest, mortality, morbidity, or expense guarantees with respect to the nonforfeiture benefits provided by A's life insurance policy.

(ii) A's purchase of the term insurance rider is not considered to result in a fundamentally different contract under paragraph (c)(3) of this section because the addition of the rider did not change the interest, mortality, morbidity, or expense guarantees with respect to the nonforfeiture values of A's original life insurance policy. Therefore, L1 includes only the \$250 received from A in the gross amount of premiums and other consideration.

(d) *Amounts excluded from the gross amount of premiums and other consideration*—(1) *In general.* The following items are not included in the gross amount of premiums and other consideration—

(i) Items treated by section 808(e) as policyholder dividends that are paid to the policyholder and immediately returned to the insurance company as a premium on the same contract that generated the dividends, including—

(A) A policyholder dividend applied to pay a premium under the contract that generated the dividend;

(B) Excess interest accumulated within the contract;

(C) A policyholder dividend applied for additional coverage (for example, a paid-up addition, extension of the period for which insurance protection is provided, or reduction of the period for which premiums are paid) on the contract that generated the dividend;

(D) A policyholder dividend applied to reduce premiums otherwise payable on the contract that generated the dividend;

(E) An experience-rated refund applied to pay a premium on the group contract that generated the refund; and

(F) An experience-rated refund applied to a premium stabilization reserve held with respect to the group contract that generated the refund;

(ii) Premiums waived as a result of the disability of an insured or the disability or death of a premium payor;

(iii) Premiums considered to be paid on a contract as the result of a partial surrender or withdrawal from the contract, or as a result of the surrender or withdrawal of a paid-up addition previously issued with respect to the same contract; and

(iv) Amounts treated as premiums upon the selection by a policyholder or by a beneficiary of a settlement option provided in a life insurance contract.

(2) *Amounts received or accrued from a guaranty association.* Amounts received or accrued from a guaranty association relating to an insurance company that is subject to an insolvency, delinquency, conservatorship, rehabilitation, or similar proceeding are not included in the gross amount of premiums and other consideration.

(3) *Exclusion not to apply to dividend accumulations.* For purposes of section 848(d)(3) and paragraph (d)(1) of this section, amounts applied from a dividend accumulation account to pay premiums on a specified insurance con-

tract are not amounts treated as paid to, and immediately returned by, the policyholder.

(e) *Return premiums.* For purposes of section 848(d)(1)(B) and this section, return premiums do not include policyholder dividends (as defined in section 808), claims or benefits payments, or amounts returned to another insurance company under a reinsurance agreement. For the treatment of amounts returned to another insurance company under a reinsurance agreement, see paragraph (f) of this section.

(f) *Net consideration for a reinsurance agreement—*(1) *In general.* For purposes of section 848, the ceding company and the reinsurer must treat amounts arising from the reinsurance of a specified insurance contract consistently in determining their net premiums. See paragraph (g) of this section for restrictions on the amount of the net negative consideration for any reinsurance agreement that may be taken into account. See paragraph (h) of this section for special rules applicable to reinsurance agreements with parties not subject to United States taxation.

(2) *Net consideration determined by a ceding company—*(i) *In general.* The net consideration determined by a ceding company for a reinsurance agreement equals—

(A) The gross amount incurred by the reinsurer with respect to the reinsurance agreement, including any ceding commissions, annual allowances, reimbursements of claims and benefits, modified coinsurance reserve adjustments under paragraph (f)(5) of this section, experience-rated adjustments, and termination payments; less

(B) The gross amount of premiums and other consideration incurred by the ceding company with respect to the reinsurance agreement.

(ii) *Net negative and net positive consideration.* If the net consideration is less than zero, the ceding company has net negative consideration for the reinsurance agreement. If the net consideration is greater than zero, the ceding company has net positive consideration for the reinsurance agreement.

(3) *Net consideration determined by the reinsurer—*(i) *In general.* The net consideration determined by a reinsurer for a reinsurance agreement equals—

(A) The amount described in paragraph (f)(2)(i)(B) of this section; less

(B) The amount described in paragraph (f)(2)(i)(A) of this section.

(ii) *Net negative and net positive consideration.* If the net consideration is less than zero, the reinsurer has net negative consideration for the reinsurance agreement. If the net consideration is greater than zero, the reinsurer has net positive consideration for the reinsurance agreement.

(4) *Timing consistency required.* For purposes of determining the net consideration of a party for a reinsurance agreement, an income or expense item is taken into account for the first taxable year for which the item is required to be taken into account by either party. Thus, the ceding company and the reinsurer must take the item into account for the same taxable year (or for the same period if the parties have different taxable years).

(5) *Modified coinsurance and funds-withheld reinsurance agreements—(i) In general.* In the case of a modified coinsurance or funds-withheld reinsurance agreement, the net consideration for the agreement includes the amount of any payments or reserve adjustments, as well as any related loan transactions between the ceding company and the reinsurer. The amount of any investment income transferred between the parties as the result of a reserve adjustment or loan transaction is treated as an item of consideration under the reinsurance agreement.

(ii) *Special rule for certain funds-withheld reinsurance agreements.* In the case of a funds-withheld reinsurance agreement that is entered into after November 14, 1991, but before the first day of the first taxable year beginning after December 31, 1991, and is terminated before January 1, 1995, the parties' net consideration in the year of termination must include the amount of the original reserve for any reinsured specified insurance contract that, in applying the provisions of subchapter L, was treated as premiums and other consideration incurred for reinsurance for the taxable year in which the agreement became effective.

(6) *Treatment of retrocessions.* For purposes of this paragraph (f), a retrocession agreement is treated as a separate

reinsurance agreement. The party that is relieved of liability under a retrocession agreement is treated as the ceding company.

(7) *Mixed reinsurance agreement.* If a reinsurance agreement includes more than one category of specified insurance contracts (or specified insurance contracts and contracts that are not specified insurance contracts), the portion of the agreement relating to each category of reinsured specified insurance contracts is treated as a separate agreement. The portion of the agreement relating to reinsured contracts that are not specified insurance contracts is similarly treated as a separate agreement.

(8) *Treatment of policyholder loans.* For purposes of determining the net consideration under a reinsurance agreement, the transfer of a policyholder loan receivable is treated as an item of consideration under the agreement. The interest credited with respect to a policyholder loan receivable is treated as investment income earned directly by the party holding the receivable. The amounts taken into account as claims and benefit reimbursements under the agreement must be determined without reduction for the policyholder loan.

(9) *Examples.* The principles of this paragraph (f) are illustrated by the following examples.

*Example 1.* On July 1, 1992, a life insurance company (L1) transfers a block of individual life insurance contracts to an unrelated life insurance company (L2) under an agreement whereby L2 becomes solely liable to the policyholders under the contracts reinsured. L1 and L2 are calendar year taxpayers. Under the assumption reinsurance agreement, L1 agrees to pay L2 \$100,000 for assuming the life insurance contracts, and L2 agrees to pay L1 a \$17,000 ceding commission. Under paragraph (f)(2) of this section, L1 has net negative consideration of (\$83,000) (\$17,000 ceding commission incurred by L2—\$100,000 incurred by L1 for reinsurance). Under paragraph (f)(3) of this section, L2 has net positive consideration of \$83,000. Under paragraph (b)(1)(ii) of this section, L2 includes the net positive consideration in its gross amount of premiums and other consideration.

*Example 2.* (i) On July 1, 1992, a life insurance company (L1) transfers a block of individual life insurance contracts to an unrelated life insurance company (L2) under an agreement whereby L1 remains liable to the policyholders under the reinsured contracts.

§ 1.848-2

26 CFR Ch. I (4-1-14 Edition)

L1 and L2 are calendar year taxpayers. Under the indemnity reinsurance agreement, L1 agrees to pay L2 \$100,000 for reinsuring the life insurance contracts, and L2 agrees to pay L1 a \$17,000 ceding commission. L1 agrees to pay L2 an amount equal to the future premiums on the reinsured contracts. L2 agrees to indemnify L1 for claims and benefits and administrative expenses incurred by L1 while the reinsurance agreement is in effect.

(ii) For the period beginning July 1, 1992, and ending December 31, 1992, the following income and expense items are determined with respect to the reinsured contracts:

Item	Income	Expense
Premiums .....	\$25,000	.....
Death benefits .....	.....	\$10,000
Surrender benefits .....	.....	8,000
Premium taxes and other expenses .....	.....	2,000
Total .....	.....	20,000

(iii) Under paragraph (f)(2) of this section, L1's net negative consideration equals (\$88,000), which is determined by subtracting the \$125,000 (\$100,000 + \$25,000) incurred by L1 from the \$37,000 incurred by L2 under the reinsurance agreement (\$17,000 + \$10,000 + \$8,000 + \$2,000). L2's net positive consideration is \$88,000. Under paragraph (b)(1)(ii) of this section, L2 includes the \$88,000 net positive consideration in its gross amount of premiums and other consideration.

*Example 3.* (i) Assume that the reinsurance agreement referred to in *Example 2* is terminated on December 31, 1993. During the period from January 1, 1993 through December 31, 1993, the following income and expense items are determined with respect to the reinsured contracts:

Item	Income	Expense
Premiums .....	\$45,000	.....
Death benefits .....	.....	\$18,000
Surrender benefits .....	.....	6,000
Premium taxes and other expenses .....	.....	8,000
Total .....	.....	32,000

(ii) On the termination of the reinsurance agreement, L1 receives a payment of \$70,000 from L2 as consideration for releasing L2 from liability with respect to the reinsured contracts.

(iii) L1's net positive consideration equals \$57,000, which is the excess of the \$102,000 incurred by L2 for the year (\$18,000 + \$6,000 + \$8,000 + \$70,000) over the \$45,000 incurred by L1. L2's net negative consideration is (\$57,000). L1 includes the net positive consideration in its gross amount of premiums and other consideration.

*Example 4.* (i) On January 1, 1993, an insurance company (L1) enters into a modified coinsurance agreement with another insurance

company (L2), covering a block of individual life insurance contracts. Both L1 and L2 are calendar year taxpayers. Under the agreement, L2 is credited with an initial reinsurance premium equal to L1's reserves on the reinsured contracts at the inception of the agreement, any new premiums received with respect to the reinsured contracts, any decrease in L1's reserves on the reinsured contracts, and an amount of investment income determined by reference to L1's reserves on the reinsured contracts. L2 is charged for all claims and expenses incurred with respect to the reinsured contracts plus an amount reflecting any increase in L1's reserves. The agreement further provides that cash settlements between the parties are made at the inception and termination of the agreement, as well as at the end of each calendar year while the agreement is in effect. The cash settlement is determined by netting the sum of the amounts credited to L2 against the sum of the amounts charged to L2 with respect to the reinsured policies. L1's reserves on the reinsured policies at the inception of the reinsurance agreement are \$375,000.

(ii) Under the cash settlement formula, L2 is credited with an initial reinsurance premium equal to L1's reserves on the reinsured policies (\$375,000), but is charged an amount reflecting L1's policy reserve requirements (\$375,000).

(iii) For the period ending December 31, 1993, L2 is also credited and charged the following amounts with respect to the reinsured contracts.

Item	Income	Expense
Premiums .....	\$100,000	.....
Investment income .....	39,000	.....
Death benefits .....	.....	\$65,000
Increase in reserves .....	.....	75,000

(iv) Under paragraph (f)(5) of this section, L2's net negative consideration for the 1993 taxable year equals (\$1,000) which is determined by subtracting the sum of the amounts charged to L2 (\$375,000 + \$65,000 + \$75,000 = \$515,000) from the sum of the amounts credited to L2 (\$375,000 + \$100,000 + \$39,000 = \$514,000). L1's net positive consideration for calendar year 1993 equals \$1,000. Under paragraph (b)(1)(ii) of this section, L1 includes the \$1,000 net positive consideration in its gross amount of premiums and other consideration.

*Example 5.* (i) On January 1, 1993, an insurance company (L1) enters into a coinsurance agreement with another insurance company (L2) covering a block of individual life insurance contracts. Both L1 and L2 are calendar year taxpayers. Under the agreement, L2 is credited with an initial reinsurance premium equal to L1's reserves on the effective date of the agreement, any new premiums received on the reinsured contracts, but must indemnify L1 of all claims and expenses incurred

## Internal Revenue Service, Treasury

## § 1.848-2

with respect to the contracts. As part of the agreement, L2 makes a loan to L1 equal to the amount of the reserves on the reinsured contracts. L1's reserves on the reinsured contracts on the effective date of the agreement are \$375,000. Thus, on the inception date of the reinsurance agreement, L1 transfers to L2 its note for \$375,000 as consideration for reinsurance.

(ii) The reinsurance agreement between L1 and L2 is a funds-withheld reinsurance agreement. Under paragraph (f)(5) of this section, the amount of any loan transaction is taken into account in determining the parties' net consideration. At the inception of the reinsurance agreement, L2 is credited with a reinsurance premium equal to L1's reserves on the reinsured contracts (\$375,000). L2's \$375,000 loan to L1 is treated as an amount returned to L1 under the agreement.

(iii) For the period ending December 31, 1993, L2 is credited and charged the following amounts with respect to the reinsured contracts and the loan transaction with L1.

Item	Income	Expense
Premiums .....	\$100,000	.....
Accrued interest .....	39,000	.....
Death benefits .....	.....	\$65,000
Increase in loan to L1 .....	.....	75,000

(iv) Under paragraph (f)(5) of this section, L2's net negative consideration for the 1993 taxable year equals (\$1,000), which is determined by subtracting the sum of amounts incurred by L2 with respect to death benefits and the loan transaction (\$375,000 + \$65,000 + \$75,000 = \$515,000) from the sum of the amounts credited to L2 as reinsurance premiums and interest on the loan transaction (\$375,000 + \$100,000 + 39,000 = \$514,000). L1's net positive consideration for calendar year 1993 equals \$1,000. Under paragraph (b)(1)(ii) of this section, L1 includes the \$1,000 net positive consideration in its gross amount of premiums and other consideration.

*Example 6.* (i) On December 31, 1993, an insurance company (L1) enters into a reinsurance agreement with another insurance company (L2) covering a block of individual life insurance contracts. Both L1 and L2 are calendar year taxpayers. Under the agreement, L2 is credited with L1's reserves on the reinsured contracts on the effective date of the agreement, plus any new premiums received on the reinsured contracts, but must indemnify L1 for all claims and expenses incurred with respect to the contracts. Under the agreement, L1 transfers cash of \$325,000 to L2 plus rights to its policyholder loan receivables on the reinsured contracts (\$50,000). L2 reports the reinsurance agreement by including the transferred policyholder loan receivables as an asset on its books.

(ii) For the period beginning January 1, 1994 and ending December 31, 1994, the following income and expense items are in-

curred with respect to the reinsured contracts.

Item	Income	Expense
Premiums .....	\$100,000	.....
Death benefits .....	.....	\$25,000
Surrender benefits .....	.....	5,000
Premium taxes and other expenses .....	.....	8,000
Total .....	.....	38,000

(iii) These amounts are net of the outstanding policyholder loans held by L2 of \$20,000 with respect to death benefits and \$15,000 with respect to surrender benefits.

(iv) Under paragraph (f)(8) of this section, the transferred policyholder loan receivables are treated as an item of consideration under the reinsurance agreement. In determining the parties' net consideration for the agreement, the transferred policyholder loan receivables (\$50,000) are treated as an item of consideration incurred by L1 under paragraph (f)(2)(i)(B) of this section. Therefore, for the 1993 taxable year, L1 has net negative consideration of (\$375,000). L2 has net positive consideration of \$375,000. Under paragraph (b)(1)(ii) of this section, L2 includes the \$375,000 net positive consideration in its gross amount of premiums and other consideration.

(v) For the 1994 taxable year, L2 has net positive consideration for the reinsurance agreement of \$62,000 before adjustment for the transferred policyholder loans. Under paragraph (f)(8) of this section, the amounts taken into account as claim and benefit payments must be adjusted by the amount of any transferred policyholder loan receivables which are netted against the reinsurer's claim and benefit reimbursements. Therefore, L2 takes into account \$45,000 (\$25,000+\$20,000=\$45,000) as reimbursements for death benefits, and \$20,000 (\$5,000+\$15,000=\$20,000) as reimbursements for surrender benefits. After adjustment for these items, L2 has net positive consideration of \$27,000, which is determined by subtracting the sum of the amounts charged to L2 (\$45,000+\$20,000+\$8,000=\$73,000) from the sum of the amounts credited to L2 (\$100,000). L1 has net negative consideration of (\$27,000) under the agreement. Under paragraph (b)(1)(ii) of this section, L2 includes the \$27,000 net positive consideration in its gross amount of premiums and other consideration. The amount of any interest earned on the policyholder loan receivables after their transfer to L2 is treated as investment income earned directly by L2, and is not taken into account as an item of consideration under the agreement.

(g) *Reduction in the amount of net negative consideration to ensure consistency of capitalization for reinsurance agreements—(1) In general.* Paragraph (g)(3)

of this section provides for a reduction in the amount of net negative consideration that a party to a reinsurance agreement (other than a reinsurance agreement described in paragraph (h)(2) of this section) may take into account in determining net premiums under paragraph (a)(2)(ii) of this section if the party with net positive consideration has a capitalization shortfall (as defined in paragraph (g)(4) of this section). Unless the party with net negative consideration demonstrates that the party with net positive consideration does not have a capitalization shortfall or demonstrates the amount of the other party's capitalization shortfall which is allocable to the reinsurance agreement, the net negative consideration that may be taken into account under paragraph (a)(2)(ii) of this section is zero. However, the reduction of paragraph (g)(3) of this section does not apply to a reinsurance agreement if the parties make a joint election under paragraph (g)(8) of this section. Under the election, the party with net positive consideration capitalizes specified policy acquisition expenses with respect to the agreement without regard to the general deductions limitation of section 848(c)(1).

(2) *Application to reinsurance agreements subject to the interim rules.* In applying this paragraph (g) to a reinsurance agreement that is subject to the interim rules of § 1.848-3, the term “premiums and other consideration incurred for reinsurance under section 848(d)(1)(B)” is substituted for “net negative consideration,” and the term “gross amount of premiums and other consideration under section 848(d)(1)(A)” is substituted for “net positive consideration.” If an insurance company has “premiums and other consideration incurred for reinsurance under section 848(d)(1)(B)” and a “gross amount of premiums and other consideration under section 848(d)(1)(A)” for the same agreement, the net of these amounts is taken into account for purposes of this paragraph (g).

(3) *Amount of reduction.* The reduction required by this paragraph (g)(3) equals the amount obtained by dividing—

(i) The portion of the capitalization shortfall (as defined in paragraph (g)(4) of this section) allocated to the rein-

surance agreement under paragraph (g)(7) of this section; by

(ii) The applicable percentage set forth in section 848(c)(1) for the category of specified insurance contracts reinsured by the agreement.

(4) *Capitalization shortfall.* A “capitalization shortfall” equals the excess of—

(i) The sum of the required capitalization amounts (as defined in paragraph (g)(5) of this section) for all reinsurance agreements (other than reinsurance agreements for which an election has been made under paragraph (h)(3) of this section); over

(ii) The general deductions allocated to those reinsurance agreements, as determined under paragraph (g)(6) of this section.

(5) *Required capitalization amount—(i) In general.* The “required capitalization amount” for a reinsurance agreement (other than a reinsurance agreement for which an election has been made under paragraph (h)(3) of this section) equals the amount (either positive or negative) obtained by multiplying—

(A) The net positive or negative consideration for an agreement not described in paragraph (h)(2) of this section, and the net positive consideration for an agreement described in paragraph (h)(2) of this section, but for which an election under paragraph (h)(3) of this section has not been made; by

(B) The applicable percentage set forth in section 848(c)(1) for that category of specified insurance contracts.

(ii) *Special rule with respect to net negative consideration.* Solely for purposes of computing a party's required capitalization amount under this paragraph (g)(5)—

(A) If either party to the reinsurance agreement is the direct issuer of the reinsured contracts, the party computing its required capitalization amount takes into account the full amount of any net negative consideration without regard to any potential reduction under paragraph (g)(3) of this section; and

(B) If neither party to the reinsurance agreement is the direct issuer of the reinsured contracts, any net negative consideration is deemed to equal zero in computing a party's required

capitalization amount except to the extent that the party with the net negative consideration establishes that the other party to that reinsurance agreement capitalizes the appropriate amount.

(6) *General deductions allocable to reinsurance agreements.* An insurance company's general deductions allocable to its reinsurance agreements equals the excess, if any, of—

(i) The company's general deductions (excluding additional amounts treated as general deductions under paragraph (g)(8) of this section); over

(ii) The amount determined under section 848(c)(1) on specified insurance contracts that the insurance company has issued directly (determined without regard to any reinsurance agreements).

(7) *Allocation of capitalization shortfall among reinsurance agreements.* The capitalization shortfall is allocated to each reinsurance agreement for which the required capitalization amount (as determined in paragraph (g)(5) of this section) is a positive amount. The portion of the capitalization shortfall allocable to each agreement equals the amount which bears the same ratio to the capitalization shortfall as the required capitalization amount for the reinsurance agreement bears to the sum of the positive required capitalization amounts.

(8) *Election to determine specified policy acquisition expenses for an agreement without regard to general deductions limitation—(i) In general.* The reduction specified by paragraph (g)(3) of this section does not apply if the parties to a reinsurance agreement make an election under this paragraph (g)(8). The election requires the party with net positive consideration to capitalize specified policy acquisition expenses with respect to the reinsurance agreement without regard to the general deductions limitation of section 848(c)(1). That party must reduce its deductions under section 805 or section 832(c) by the amount, if any, of the party's capitalization shortfall allocable to the reinsurance agreement. The additional capitalized amounts are treated as specified policy acquisition expenses attributable to premiums and other consideration on the reinsurance agree-

ment, and are deductible in accordance with section 848(a)(2).

(ii) *Manner of making election.* To make an election under paragraph (g)(8) of this section, the ceding company and the reinsurer must include an election statement in the reinsurance agreement, either as part of the original terms of the agreement or by an addendum to the agreement. The parties must each attach a schedule to their federal income tax returns which identifies the reinsurance agreement for which the joint election under this paragraph (g)(8) has been made. The schedule must be attached to each of the parties' federal income tax returns filed for the later of—

(A) The first taxable year ending after the election becomes effective; or

(B) The first taxable year ending on or after December 29, 1992.

(iii) *Election statement.* The election statement in the reinsurance agreement must—

(A) Provide that the party with net positive consideration for the reinsurance agreement for each taxable year will capitalize specified policy acquisition expenses with respect to the reinsurance agreement without regard to the general deductions limitation of section 848(a)(1);

(B) Set forth the agreement of the parties to exchange information pertaining to the amount of net consideration under the reinsurance agreement each year to ensure consistency;

(C) Specify the first taxable year for which the election is effective; and

(D) Be signed by both parties.

(iv) *Effect of election.* An election under this paragraph (g)(8) is effective for the first taxable year specified in the election statement and for all subsequent taxable years for which the reinsurance agreement remains in effect. The election may not be revoked without the consent of the Commissioner.

(9) *Example.* The principles of this paragraph (g) are illustrated by the following examples.

*Example 1.* (i) On December 31, 1992, a life insurance company (L1) transfers a block of individual life insurance contracts to an unrelated life insurance company (L2) under an agreement in which L2 becomes solely liable to the policyholders on the reinsured contracts. L1 transfers \$105,000 to L2 as consideration for the reinsurance of the contracts.

(ii) L1 and L2 do not make an election under paragraph (g)(8) of this section to capitalize specified policy acquisition expenses with respect to the reinsurance agreement without regard to the general deductions limitation. L2 has no other insurance business, and its general deductions for the taxable year are \$3,500.

(iii) Under paragraph (f)(2) of this section, L1's net negative consideration is (\$105,000). Under paragraph (f)(3) of this section, L2's net positive consideration is \$105,000. Pursuant to paragraph (b)(1)(ii) of this section, L2 includes the net positive consideration in its gross amount of premiums and other consideration.

(iv) The required capitalization amount under paragraph (g)(5) of this section for the reinsurance agreement is \$8,085 ( $\$105,000 \times .077$ ). L2's general deductions, all of which are allocable to the reinsurance agreement with L1, are \$3,500. The \$4,585 difference between the required capitalization amount (\$8,085) and the general deductions allocable to the reinsurance agreement (\$3,500) represents L2's capitalization shortfall under paragraph (g)(4) of this section.

(v) Since L2 has a capitalization shortfall allocable to the agreement, the rules of paragraph (g)(1) of this section apply for purposes of determining the amount by which L1 may reduce its net premiums. Under paragraph (g)(3) of this section, L1 must reduce the amount of net negative consideration that it takes into account under paragraph (a)(2)(ii) of this section by \$59,545 ( $\$4,585 / .077$ ). Thus, of the \$105,000 net negative consideration under the reinsurance agreement, L1 may take into account only \$45,455 as a reduction of its net premiums.

**Example 2.** The facts are the same as *Example 1*, except that L1 and L2 make the election under paragraph (g)(8) of this section to capitalize specified policy acquisition expenses with respect to the reinsurance agreement without regard to the general deductions limitation. Pursuant to this election, L2 must capitalize as specified policy acquisition expenses an amount equal to \$8,085 ( $\$105,000 \times .077$ ). L1 may reduce its net premiums by the \$105,000 of net negative consideration.

**Example 3.** (i) A life insurance company (L1) is both a direct issuer and a reinsurer of life insurance and annuity contracts. For 1993, L1's net premiums under section 848 (d)(1) for directly issued individual life insurance and annuity contracts are as follows:

Category	Net premiums
Life insurance contracts .....	\$17,000,000
Annuity contracts .....	8,000,000

(ii) L1's general deductions for 1993 are \$1,500,000.

(iii) For 1993, L1 is a reinsurer under four separate indemnity reinsurance agreements with unrelated insurance companies (L2, L3, L4, and L5). The agreements with L2, L3, and L4 cover life insurance contracts issued by those companies. The agreement with L5 covers annuity contracts issued by L5. The parties to the reinsurance agreements have not made the election under paragraph (g)(8) of this section to capitalize specified policy acquisition expenses with respect to these agreements without regard to the general deductions limitation.

(iv) L1's net consideration for 1993 with respect to its reinsurance agreements is as follows:

Agreement	Net consideration
L2 .....	\$1,200,000
L3 .....	(350,000)
L4 .....	300,000
L5 .....	600,000

(v) To determine whether a reduction under paragraph (g)(3) of this section applies with respect to these reinsurance agreements, L1 must determine the required capitalization amounts for its reinsurance agreements and the amount of its general deductions allocable to these agreements.

(vi) Pursuant to paragraph (g)(5) of this section, the required capitalization amount for each reinsurance agreement is determined as follows:

L2 .....	$\$1,200,000 \times .077 = \$92,400$
L3 .....	$(\$350,000) \times .077 = (\$26,950)$
L4 .....	$\$300,000 \times .077 = \$23,100$
L5 .....	$\$600,000 \times .0175 = \$10,500$

(vii) Thus, the sum of L1's required capitalization amounts on its reinsurance agreements equals \$99,050.

(viii) Pursuant to paragraph (g)(6) of this section, L1 determines its general deductions allocable to its reinsurance agreements. The amount determined under section 848(c)(1) on its directly issued contracts is:

#### REQUIRED CAPITALIZATION AMOUNT

Category:		
Annuity contracts .....	$\$8,000,000 \times .0175 =$	\$140,000
Life insurance contracts .....	$\$17,000,000 \times .077 =$	1,309,000
		\$1,449,000

(ix) L1's general deductions allocable to its reinsurance agreements are \$51,000 ( $\$1,500,000 - \$1,449,000$ ).

(x) Pursuant to paragraph (g)(4) of this section, L1's capitalization shortfall equals \$48,050, reflecting the excess of L1's required capitalization amounts for its reinsurance agreements (\$99,050) over the general deductions allocable to its reinsurance agreements (\$51,000).

(xi) Pursuant to paragraph (g)(7) of this section, the capitalization shortfall of \$48,050

must be allocated between each of L1's reinsurance agreements with net positive consideration in proportion to their respective required capitalization amounts. The allocation of the shortfall between L1's reinsurance agreements is determined as follows:

L2=\$35,237 (\$48,050×92,400/126,000)

L4=\$8,809 (\$48,050×23,100/126,000)

L5=\$4,004 (\$48,050×10,500/126,000)

(xii) Accordingly, the reduction under paragraph (g)(3) of this section that applies to the amount of net negative consideration that may be taken into account by L2, L4, and L5 under paragraph (a)(1)(ii)(B) of this section is determined as follows:

L2=\$457,623 (\$35,237/.077)

L4=\$114,403 (\$8,809/.077)

L5=\$228,800 (\$4,004/.0175)

*Example 4.* The facts are the same as *Example 3*, except that L1 and L4 make a joint election under paragraph (g)(8) of this section to capitalize specified policy acquisition expenses with respect to the reinsurance agreement without regard to the general deductions limitation. Pursuant to this election, L1 must reduce its deductions under section 805 by an amount equal to the capitalization shortfall allocable to the reinsurance agreement with L4 (\$8,809). L1 treats the additional capitalized amounts as specified policy acquisition expenses allocable to premiums and other consideration under the agreement. L4 may reduce its net premiums by the \$300,000 net negative consideration. The election by L1 and L4 does not change the amount of the capitalization shortfall allocable under paragraph (g)(7) of this section to the reinsurance agreements with L2 and L5. Thus, the reduction required by paragraph (g)(3) of this section with respect to the amount of the net negative consideration that L2 and L5 may recognize under paragraph (a)(2)(ii) of this section is \$457,623 and \$228,800, respectively.

(h) *Treatment of reinsurance agreements with parties not subject to U.S. taxation*—(1) *In general.* Unless an election under paragraph (h)(3) of this section is made, an insurance company may not reduce its net premiums by the net negative consideration for the taxable year (or, with respect to a reinsurance agreement that is subject to the interim rules of § 1.848-3, by the premiums and other consideration incurred for reinsurance) under a reinsurance agreement to which this paragraph (h) applies.

(2) *Agreements to which this paragraph (h) applies*—(i) *In general.* This paragraph (h) applies to a reinsurance agreement if, with respect to the premiums and other consideration under

the agreement, one party to that agreement is subject to United States taxation and the other party is not.

(ii) *Parties subject to U.S. taxation*—(A) *In general.* A party is subject to United States taxation for this purpose if the party is subject to United States taxation either directly under the provisions of subchapter L of chapter 1 of the Internal Revenue Code (subchapter L), or indirectly under the provisions of subpart F of part III of subchapter N of chapter 1 of the Internal Revenue Code (subpart F).

(B) *Effect of a closing agreement.* If a reinsurer agrees in a closing agreement with the Internal Revenue Service to be subject to tax under rules equivalent to the provisions of subchapter L on its premiums and other consideration from reinsurance agreements with parties subject to United States taxation, the reinsurer is treated as an insurance company subject to tax under subchapter L.

(3) *Election to separately determine the amounts required to be capitalized for reinsurance agreements with parties not subject to U.S. taxation*—(i) *In general.* This paragraph (h)(3) authorizes an insurance company to make an election to separately determine the amounts required to be capitalized for the taxable year with respect to reinsurance agreements with parties that are not subject to United States taxation. If this election is made, an insurance company separately determines a net foreign capitalization amount for the taxable year for all reinsurance agreements to which this paragraph (h) applies.

(ii) *Manner of making the election.* An insurance company makes the election authorized by this paragraph (h)(3) by attaching an election statement to the federal income tax return (including an amended return) for the taxable year for which the election becomes effective. The election applies to that taxable year and all subsequent taxable years unless permission to revoke the election is obtained from the Commissioner.

(4) *Amount taken into account for purposes of determining specified policy acquisition expenses.* If for a taxable year an insurance company has a net positive foreign capitalization amount (as

defined in paragraph (h)(5)(i) of this section), any portion of that amount remaining after the reduction described in paragraph (h)(7) of this section is treated as additional specified policy acquisition expenses for the taxable year (determined without regard to amounts taken into account under this paragraph (h)). A net positive capitalization amount is treated as an amount otherwise required to be capitalized for the taxable year for purposes of the reduction under section 848(f)(1)(A).

(5) *Net foreign capitalization amount—*

(i) *In general.* An insurance company's net foreign capitalization amount equals the sum of the foreign capitalization amounts (netting positive and negative amounts) determined under paragraph (h)(5)(ii) of this section for each category of specified insurance contracts reinsured by agreements described in paragraph (h)(2) of this section. If the amount is less than zero, the company has a net negative foreign capitalization amount. If the amount is greater than zero, the company has a net positive foreign capitalization amount.

(ii) *Foreign capitalization amounts by category.* The foreign capitalization amount for a category of specified insurance contracts is determined by—

(A) Combining the net positive consideration and the net negative consideration for the taxable year (or, with respect to a reinsurance agreement that is subject to the interim rules of § 1.848-3, by combining the gross amount of premiums and other consideration and the premiums and other consideration incurred for reinsurance) for all agreements described in paragraph (h)(2) of this section which reinsure specified insurance contracts in that category; and

(B) Multiplying the result (either positive or negative) by the percentage for that category specified in section 848(c)(1).

(6) *Treatment of net negative foreign capitalization amount—*(i) *Applied as a reduction to previously capitalized amounts.* If for a taxable year an insurance company has a net negative foreign capitalization amount, the negative amount reduces (but not below zero) the unamortized balances of the

amounts previously capitalized (beginning with the amount capitalized for the most recent taxable year) to the extent attributable to prior years' net positive foreign capitalization amounts. The amount by which previously capitalized amounts is reduced is allowed as a deduction for the taxable year.

(ii) *Carryover of remaining net negative foreign capitalization amount.* The net negative foreign capitalization amount, if any, remaining after the reduction described in paragraph (h)(6)(i) of this section is carried over to reduce a future net positive capitalization amount. The remaining net negative foreign capitalization amount may only offset a net positive foreign capitalization amount in a future year, and may not be used to reduce the amounts otherwise required to be capitalized under section 848(a) for the taxable year, or to reduce the unamortized balances of specified policy acquisition expenses from preceding taxable years, with respect to directly written business or reinsurance agreements other than agreements for which the election under paragraph (h)(3) of this section has been made.

(7) *Reduction of net positive foreign capitalization amount by carryover amounts allowed.* If for a taxable year an insurance company has a net positive foreign capitalization amount, that amount is reduced (but not below zero) by any carryover of net negative foreign capitalization amounts from preceding taxable years. Any remaining net positive foreign capitalization amount is taken into account as provided in paragraph (h)(4) of this section.

(8) *Examples.* The principles of this paragraph (h) are illustrated by the following examples.

*Example 1.* (i) On January 1, 1993, a life insurance company (L1) enters into a reinsurance agreement with a foreign corporation (X) covering a block of annuity contracts issued to residents of the United States. X is not subject to taxation either directly under subchapter L or indirectly under subpart F on the premiums for the reinsurance agreement with L1. L1 makes the election under paragraph (h)(3) of this section to separately determine the amounts required to be capitalized for the taxable year with respect to

parties not subject to United States taxation.

(ii) For the taxable year ended December 31, 1993, L1 has net negative consideration of (\$25,000) under its reinsurance agreement with X. L1 has no other reinsurance agreements with parties not subject to United States taxation.

(iii) Under paragraph (h)(5) of this section, L1's net negative foreign capitalization amount for the 1993 taxable year equals (\$437.50), which is determined by multiplying L1's net negative consideration on the agreement with X (\$25,000) by the percentage in section 848(c)(1) for the reinsured specified insurance contracts (1.75%). Under paragraph (h)(6)(ii) of this section, L1 carries over the net negative foreign capitalization amount of \$437.50 to future taxable years. The net negative foreign capitalization amount may not be used to reduce the amounts which L1 is required to capitalize on directly written business or reinsurance agreements other than those agreements described in paragraph (h)(2) of this section.

*Example 2.* (i) The facts are the same as *Example 1* except that L1 terminates its reinsurance agreement with X and receives \$35,000 on December 31, 1994. For the 1994 taxable year, L1 has net positive consideration of \$35,000 under its agreement with X. L1 has no other reinsurance agreements with parties not subject to United States taxation.

(ii) Under paragraph (h)(5) of this section, L1's net positive net foreign capitalization amount for the 1984 taxable year equals \$612.50, which is determined by multiplying the net positive consideration on the agreement with X (\$35,000) by the percentage in section 848(c)(1) for the reinsured specified insurance contracts (1.75%). Under paragraph (h)(4) of this section, L1 reduces the net positive foreign capitalization amount for the taxable year by the net negative foreign capitalization amount carried over from preceding taxable years (\$437.50). After this reduction, L1 includes \$175 (\$612.50-\$437.50) as specified policy acquisition expenses for the 1994 taxable year.

(i) *Carryover of excess negative capitalization amount—(1) In general.* This paragraph (i) authorizes a carryover of an excess negative capitalization amount (as defined in paragraph (i)(2) of this section) to reduce amounts otherwise required to be capitalized under section 848. Paragraph (i)(4) provides special rules for the treatment of excess negative capitalization amounts of insolvent insurance companies.

(2) *Excess negative capitalization amount.* The excess negative capitalization amount with respect to a category

of specified insurance contracts for a taxable year is equal to the excess of—

(A) The negative capitalization amount with respect to that category; over

(B) The amount that can be utilized under section 848(f)(1).

(3) *Treatment of excess negative capitalization amount.* The excess negative capitalization amount for a taxable year reduces the amounts that are otherwise required to be capitalized by an insurance company under section 848(c)(1) for future years.

(4) *Special rule for the treatment of an excess negative capitalization amount of an insolvent company—(i) When applicable.* This paragraph (i)(4) applies only for the taxable year in which an insolvent insurance company has an excess negative capitalization amount and has net negative consideration under a reinsurance agreement. See paragraph (i)(4)(v) of this section for the definition of “insolvent.”

(ii) *Election to forego carryover of excess negative capitalization amount.* At the joint election of the insolvent insurance company and the other party to the reinsurance agreement—

(A) The insolvent insurance company reduces the excess negative capitalization amount which would otherwise be carried over under paragraph (i)(1) of this section by the amount determined under paragraph (i)(4)(iii) of this section; and

(B) The other party reduces the amount of its specified policy acquisition expenses for the taxable year by the amount determined under paragraph (i)(4)(iii) of this section.

(iii) *Amount of reduction to the excess negative capitalization amount and specified policy acquisition expenses.* To determine the reduction to the carryover of an insolvent insurance company's excess negative capitalization amount and the specified policy acquisition expenses of the other party with respect to a reinsurance agreement—

(A) Multiply the net negative consideration for each reinsurance agreement of the insolvent insurer for which there is net negative consideration for the taxable year by the appropriate percentage specified in section 848(c)(1) for the category of specified insurance contracts reinsured by the agreement;

(B) Sum the results for each agreement;

(C) Calculate the ratio between the results in paragraphs (i)(4)(iii) (A) and (B) of this section for each agreement; and

(D) Multiply that result by the increase in the excess negative capitalization amount of the insolvent insurer for the taxable year.

(iv) *Manner of making election.* To make an election under paragraph (i)(4) of this section, each party to the reinsurance agreement must attach an election statement to its federal income tax return (including an amended return) for the taxable year for which the election is effective. The election statement must identify the reinsurance agreement for which the joint election under this paragraph (i)(4) has been made, state the amount of the reduction to the insolvent insurance company's excess negative capitalization amount that is attributable to the agreement, and be signed by both parties. An election under this paragraph (i)(4) is effective for the taxable year specified in the election statement, and may not be revoked without the consent of the Commissioner.

(v) *Presumptions relating to the insolvency of an insurance company undergoing a court supervised rehabilitation or similar state proceeding.* For purposes of this paragraph (i)(4), an insurance company which is undergoing a rehabilitation, conservatorship, or similar state proceeding shall be presumed to be insolvent if the state proceeding results in—

(A) An order of the state court finding that the fair market value of the insurance company's assets is less than its liabilities;

(B) The use of funds, guarantees, or reinsurance from a guaranty association;

(C) A reduction of the policyholders' available account balances; or

(D) A substantial limitation on access to funds (for example, a partial or total moratorium on policyholder withdrawals or surrenders that applies for a period of 5 years).

(vi) *Example.* The principles of this paragraph (i)(4) are illustrated by the following example.

*Example.* (i) An insurance company (L1) is the subject of a rehabilitation proceeding under the supervision of a state court. The state court has made a finding that the fair market value of L1's assets is less than its liabilities. On December 31, 1993, L1 transfers a block of individual life insurance contracts to an unrelated insurance company (L2) under an assumption reinsurance agreement whereby L2 becomes solely liable to the policyholders under the contracts reinsured. Under the agreement, L1 agrees to pay L2 \$2,000,000 for assuming the life insurance contracts. This negative net consideration causes L1 to incur an excess negative capitalization amount of \$138,600 for the 1993 taxable year. L1 has no other reinsurance agreements for the taxable year.

(ii) As part of the reinsurance agreement, L1 and L2 agree to make an election under paragraph (i)(4) of this section. Under the election, L1 agrees to forgo the carryover of the \$138,600 excess negative capitalization amount for future taxable years. L2 must include the \$2,000,000 net positive consideration for the reinsurance agreement in its gross amount of premiums and other consideration. L2 reduces its specified policy acquisition expenses for the 1993 taxable year by \$138,600.

(j) *Ceding commissions with respect to reinsurance of contracts other than specified insurance contracts.* A ceding commission incurred with respect to the reinsurance of an insurance contract that is not a specified insurance contract is not subject to the provisions of section 848(g).

(k) *Effective dates—*(1) *In general.* Unless otherwise specified in this paragraph, the rules of this section are effective for the taxable years of an insurance company beginning after November 14, 1991.

(2) *Reduction in the amount of net negative consideration to ensure consistency of capitalization for reinsurance agreements.* Section 1.848-2(g) (which provides for an adjustment to ensure consistency) is effective for—

(i) All amounts arising under any reinsurance agreement entered into after November 14, 1991; and

(ii) All amounts arising under any reinsurance agreement for taxable years beginning after December 31, 1991, without regard to the date on which the reinsurance agreement was entered into.

(3) *Net consideration rules.* Section 1.848-2(f) (which provides rules for determining the net consideration for a reinsurance agreement) applies to—

(i) Amounts arising in taxable years beginning after December 31, 1991, under a reinsurance agreement entered into after November 14, 1991; and

(ii) Amounts arising in taxable years beginning after December 31, 1994, under a reinsurance agreement entered into before November 15, 1991.

(4) *Determination of the date on which a reinsurance agreement is entered into.* A reinsurance agreement is considered entered into at the earlier of—

(i) The date of the reinsurance agreement; or

(ii) The date of a binding written agreement to enter into a reinsurance transaction if the written agreement evidences the parties' agreement on substantially all material items relating to the reinsurance transaction.

(5) *Special rule for certain reinsurance agreements with parties not subject to U.S. taxation.* The election and special rules in paragraph (h) of this section relating to the determination of amounts required to be capitalized on reinsurance agreements with parties not subject to United States taxation apply to taxable years ending on or after September 30, 1990.

(6) *Carryover of excess negative capitalization amount.* The provisions of paragraph (i) of this section, including the special rule for the treatment of excess negative capitalization amounts of insolvent insurance companies, are affected with respect to amounts arising in taxable years ending on or after September 30, 1990.

[T.D. 8456, 57 FR 61821, Dec. 29, 1992; 58 FR 7987, Feb. 11, 1993; 59 FR 947, Jan. 7, 1994]

#### § 1.848-3 Interim rules for certain reinsurance agreements.

(a) *Scope and effective dates.* The rules of this section apply in determining net premiums for a reinsurance agreement with respect to—

(1) Amounts arising in taxable years beginning before January 1, 1992, under a reinsurance agreement entered into after November 14, 1991; and

(2) Amounts arising in taxable years beginning before January 1, 1995, under

a reinsurance agreement entered into before November 15, 1991.

(b) *Interim rules.* In determining a company's gross amount of premiums and other consideration under section 848(d)(1)(A) and premiums and other consideration incurred for reinsurance under section 848(d)(1)(B), the general rules of subchapter L of the Internal Revenue Code apply with the adjustments and special rules set forth in paragraph (c) of this section. Except as provided in paragraph (c)(5) of this section (which applies to modified coinsurance transactions), the gross amount of premiums and other consideration is determined without any reduction for ceding commissions, annual allowances, reimbursements of claims and benefits, or other amounts incurred by a reinsurer with respect to reinsured contracts.

(c) *Adjustment and special rules.* This paragraph sets forth certain adjustments and special rules that apply for reinsurance agreements in determining the gross amount of premiums and other consideration under section 848(d)(1)(A) and premiums and other considerations incurred for reinsurance under section 848(d)(1)(B).

(1) *Assumption reinsurance.* The ceding company must treat the gross amount of consideration incurred with respect to an assumption reinsurance agreement as premiums and other consideration incurred for reinsurance under section 848(d)(1)(B). The reinsurance must include the same amount in the gross amount of premiums and other consideration under section 848(d)(1)(A). For rules relating to the determination and treatment of ceding commissions, see paragraph (c)(3) of this section.

(2) *Reimbursable dividends.* The reinsurer must treat the amount of policyholder dividends reimbursable to the ceding company (other than under a modified coinsurance agreement covered by paragraph (c)(5) of this section) as a return premium under section 848(d)(1)(B). The ceding company must include the same amount in the gross amount of premiums and other consideration under section 848(d)(1)(A). The amount of any experience-related refund due the ceding company is treated

as a policyholder dividend reimbursable to the ceding company.

(3) *Ceding commissions*—(i) *In general.* The reinsurer must treat ceding commissions as a general deduction. The ceding company must treat ceding commissions as non-premium related income under section 803(a)(3). The ceding company may not reduce its general deductions by the amount of the ceding commission.

(ii) *Amount of ceding commission.* For purposes of this section, the amount of a ceding commission equals the excess, if any, of—

(A) The increase in the reinsurer's tax reserves resulting from the reinsurance agreement (computed in accordance with section 807(d)); over

(B) The gross consideration incurred by the ceding company for the reinsurance agreement, less any amount incurred by the reinsurer as part of the reinsurance agreement.

(4) *Termination payments.* The reinsurer must treat the gross amount of premiums and other consideration payable as a termination payment to the ceding company (including the tax reserves on the reinsured contracts) as premiums and other consideration incurred for reinsurance under section 848(d)(1)(B). The ceding company must include the same amount in the gross amount of premiums and other consideration under section 848(d)(1)(A). This paragraph does not apply to modified coinsurance agreements.

(5) *Modified coinsurance agreements.* In the case of a modified coinsurance agreement, the parties must determine their net premiums on a net consideration basis as described in § 1.848-2(f)(5).

(D) *Examples.* The principles of this section are illustrated by the following examples.

*Example 1.* On July 1, 1991, an insurance company (L1) transfers a block of individual life insurance contracts to an unrelated insurance company (L2) under an arrangement whereby L2 becomes solely liable to the policyholder under the contracts reinsured. The tax reserves on the reinsured contracts are \$100,000. Under the assumption reinsurance agreement, L1 pays L2 \$83,000 for assuming the life insurance contracts. Under paragraph (c)(3) of this section, since the increase in L2's tax reserves (\$100,000) exceeds the net consideration transferred by L1 (\$83,000), the reinsurance agreement provides

for a ceding commission. The ceding commission equals \$17,000 (\$100,000-\$83,000). Under paragraph (c)(3) of this section, L1 reduces its gross amount of premiums and other consideration for the 1991 taxable year under section 848(d)(1)(B) by the \$100,000 premium incurred for reinsurance, and L2 includes the \$100,000 premium for reinsurance in its gross amount of premiums and other consideration under section 848(d)(1)(A). L1 treats the \$17,000 ceding commission as non-premium related income and section 803(a)(3).

*Example 2.* On July 1, 1991, a life insurance company (L1) transfers a block of individual life insurance contracts to an unrelated insurance company (L2) under an arrangement whereby L2 becomes solely liable to the policyholder under the contracts reinsured. The tax reserves on the reinsured contracts are \$100,000. Under the assumption reinsurance agreement, L1 pays L2 \$100,000 for assuming the contracts, and L2 pays L1 a \$17,000 ceding commission. Under paragraph (c)(1) of this section, L1 reduces its gross amount of premiums and other consideration under section 848(d)(1)(B) by \$100,000. L2 includes \$100,000 in its gross amount of premiums and other consideration under section 848(d)(1)(A). Under paragraph (c)(3) of this section, since the increase in L2's tax reserves (\$100,000) exceeds the net consideration transferred by L1, the reinsurance agreement provides for a ceding commission. The ceding commission equals \$17,000 (\$100,000 increase in L2's tax reserves less \$83,000 net consideration transferred by L1). L1 treats the \$17,000 ceding commission as non-premium related income under section 803(a)(3).

*Example 3.* On July 1, 1991, a life insurance company (L1) transfers a block of individual life insurance contracts to an unrelated insurance company (L2) under an arrangement whereby L2 becomes solely liable to the policyholder under the contracts reinsured. Under the assumption reinsurance agreement, L1 transfers assets of \$105,000 to L2. The tax reserves on the reinsured contracts are \$100,000. Under paragraph (c)(1) of this section, L1 reduces its gross amount of premiums and other consideration under section 848(d)(1)(B) by \$105,000, and L2 increases its gross amount of premiums and other consideration under section 848(d)(1)(A) by \$105,000. Since the net consideration transferred by L1 exceeds the increase in L2's tax reserves, there is no ceding commission under paragraph (c)(3) of this section.

*Example 4.* (i) On June 30, 1991, a life insurance company (L1) reinsures 40% of certain individual life insurance contracts to be issued after that date with an unrelated insurance company (L2) under an agreement whereby L1 remains directly liable to the policyholders with respect to the contracts reinsured. The agreement provides that L2 is credited with 40% of any premiums received with respect to the reinsured contracts, but

## Internal Revenue Service, Treasury

## §§ 1.849-1.850

must indemnify L1 for 40% of any claims, expenses, and policyholder dividends. During the period from July 1 through December 31, 1991, L1 has the following income and expense items with respect to the reinsured policies:

Item	Income	Expense
Premiums .....	\$8,000	.....
Benefits paid .....	.....	\$1,000
Commissions .....	.....	6,000
Policyholder dividends .....	.....	500
Total .....	.....	7,500

(ii) Under paragraphs (b) and (c)(2) of this section, L1 includes \$8,200 in its gross amount of premiums and other consideration under section 848(d)(1)(A) (\$8,000 gross premiums on the reinsured contracts plus \$200 of policyholder dividends reimbursed by L2 (\$500×40%). L1 reduces its gross amount of premiums and other consideration by \$3,200 (40%×\$8,000) as premiums and other consideration incurred for reinsurance under section 848(d)(1)(B). The benefits and commissions incurred by L1 with respect to the reinsured contracts do not reduce L1's gross amount of premiums and other consideration under section 848(d)(1)(B). L2 includes \$3,200 in its gross amount of premiums and other consideration (40%×\$8,000) and is treated as having paid return premiums of \$200 (the amount of reimbursable dividends paid to L1). L2 is also treated as having incurred the following expenses with respect to the reinsured contracts: \$400 as benefits paid (40%×\$1,000) and \$2,400 as commissions expense (40%×\$6,000). Under paragraph (b) of this section, these expenses do not reduce L2's gross amount of premiums and other consideration under section 848(d)(1)(A).

*Example 5.* On December 31, 1991, an insurance company (L1) terminates a reinsurance agreement with an unrelated insurance company (L2). The termination applies to a rein-

surance agreement under which L1 had ceded 40% of its liability on a block of individual life insurance contracts to L2. Upon termination of the reinsurance agreement, L2 makes a final payment of \$116,000 to L1 for assuming full liability under the contracts. The tax reserves attributable to L2's portion of the reinsured contracts are \$120,000. Under paragraph (c)(4) of this section, L2 reduces its gross amount of premiums and other consideration under section 848(d)(1)(B) by \$120,000. L1 includes \$120,000 in its gross amount of premiums and other consideration under section 848(d)(1)(A).

*Example 6.* (i) On June 30, 1991, an insurance company (L1) reinsures 40% of its existing life insurance contracts with an unrelated life insurance company (L2) under a modified coinsurance agreement. For the period July 1, 1991 through December 31, 1991, L1 reports the following income and expense items with respect to L2's 40% share of the reinsured contracts:

Item	Income	Expense
Premiums .....	\$10,000	.....
Benefits paid .....	.....	\$4,000
Policyholder dividends .....	.....	500
Reserve adjustment .....	.....	1,500
Total .....	.....	6,000

(ii) Pursuant to paragraph (c)(5) of this section, L1 reduces its gross amount of premiums and other consideration under section 848(d)(1)(B) by the \$4,000 net consideration for the modified coinsurance agreement (\$10,000-\$6,000). L2 includes the \$4,000 net consideration in its gross amount of premiums and other consideration under section 848(d)(1)(A).
